As revision to the third edition of BCS neared completion, Dr. Kitty O. Locker passed away. She was a mentor for many years, and I will cherish all that she taught me. Kitty's contributions to teaching and to business communication are far too extensive for proper recognition here. So, it is simply on behalf of the students and colleagues whose lives she touched that I make this special dedication to my friend.

Kitty, you are missed.

Stephen Kyo Kaczmarek

To my husband, Bob Mills, with love.

—KITTY O. LOCKER

For my father, who always believed in me.

—STEPHEN KYO KACZMAREK

About the Authors

Kitty O. Locker was an Associate Professor of English at The Ohio State University, where she taught courses in workplace discourse and research methods. She had taught as Assistant Professor at Texas A&M University and the University of Illinois at Urbana.

She received her BA from DePauw University and her MA and Ph.D. from the University of Illinois at Urbana.

She had also written *Business and Administrative Communication* (7th ed., McGraw-Hill/Irwin, 2005) and *The Irwin Business Communication Handbook: Writing and Speaking in Business Classes* (1993), and co-edited *Conducting Research in Business Communication* (1988).

Her consulting clients included URS Greiner, Abbott Laboratories, the Ohio Civil Service Employees Association, AT&T, and the American Medical Association. She developed a complete writing improvement program for Joseph T. Ryerson, the nation's largest steel materials service center.

In 1994–95, she served as President of the Association for Business Communication (ABC). From 1997 to 2000, she edited ABC's *Journal of Business Communication*. She received ABC's Outstanding Researcher Award in 1992 and ABC's Meada Gibbs Outstanding Teacher Award in 1998.

Stephen Kyo Kaczmarek is a Professor of English at Columbus State Community College and a consultant to business and industry. He teaches courses in business communication, composition, creative writing, freshman experience, film and literature, globalization and culture, and public relations, and he co-advises the Phi Theta Kappa chapter at Columbus State. Steve has also taught at The Ohio State University and Ohio Dominican University. He received an MA in English and BAs in journalism and English from Ohio State.

Steve has presented papers at conferences of the Association for Business Communication (ABC), the College English Association of Ohio (CEAO), the Conference on College Composition and Communication, and the Northeast Modern Language Association. He has served on ABC's Two-Year College Committee and its Diversity Committee, as well as on the CEAO Executive Council. His freelance articles have appeared in a variety of print and web publications, and he is a book reviewer for *The Ohioana Quarterly* and *The Columbus Dispatch*.

Steve's consulting clients include Nationwide Insurance, The Ohio Historical Society, The Ohio Association of Historical Societies and Museums, The Ohio Museums Association, Red Capital Mortgage Group, United Energy Systems, The Thomas Moyer for Chief Justice of Ohio Campaign, and Van Meter and Associates. He also advises individual clients on job search and interviewing techniques and is a reader for the College Board's Advanced Placement Examination in English Language.

Prior to joining Columbus State, Steve managed staff development and information for the Franklin County, Ohio, Commissioners. He has received an Award of Excellence from the National Association of County Information Officers, as well as awards for his writing projects.

August 20, 2012

Dear Student:

Business Communication: Building Critical Skills helps you build the writing, speaking, and listening skills that are crucial for success in the 21st-century workplace.

As you read,

- Look for the answers to each module's questions. Check your memory with the **Instant Replays** and your understanding with the **Summary of Learning Objectives** at the end of the chapter.

- Note the terms in bold type and their definitions. Use the **rewind** and **fast forward** icons to go to discussions of terms.

- Read the **Building a Critical Skill** boxes carefully. Practice the skills both in assignments and on your own. These skills will serve you well for the rest of your work life.

- Use items in the lists when you prepare your assignments or review for tests.

- Use the examples, especially the paired examples of effective and ineffective communication, as models to help you draft and revise. Comments in red ink signal problems in an example; comments in blue ink note things done well.

- Read the **Site to See** and **FYI** boxes in the margins to give you more resources on the Internet and interesting facts about business communication.

When you prepare an assignment,

- Review the PAIBOC questions in Module 1. Some assignments have "Hints" to help probe the problem. Some of the longer assignments have preliminary assignments analyzing the audience or developing reader benefits or subject lines. Use these to practice portions of longer documents.
- If you're writing a letter or memo, read the sample problems in Modules 10, 11, and 12 with a detailed analysis, strong and weak solutions, and a discussion of the solutions to see how to apply the principles in this book to your own writing.

August 20, 2012

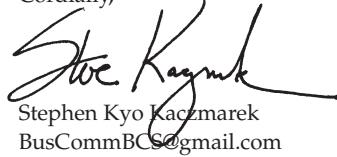

Page 2

- Use the **Polishing Your Prose** exercises to make your writing its best.
- Remember that most problems are open-ended, requiring original, critical thinking. Many of the problems are deliberately written in negative, ineffective language. You'll need to reword sentences, reorganize information, and think through the situation to produce the best possible solution to the business problem.
- Learn as much as you can about what's happening in business. The knowledge will not only help you develop reader benefits and provide examples but also make you an even more impressive candidate in job interviews.
- Visit the *Online Learning Center* (<http://www.mhhe.com/bcs6e>) to see how the resources presented there can help you. You will find updated articles, résumé and letter templates, links to job hunting websites, and much more.

Communication skills are critical to success in both the new economy and the old. *Business Communication: Building Critical Skills* can help you identify and practice the skills you need. Have a good term—and a good career!

Cordially,

Stephen Kyo Kaczmarek
BusCommBCS@gmail.com

August 20, 2012

Dear Professor:

Business Communication: Building Critical Skills (BCS) is here to help make your job teaching business communication a little bit easier.

Its modular design makes adapting *BCS* to 5-, 8-, 10-, or 15-week courses simpler. And, with videos, new media tools, and supplements, it is easy to adapt to Internet courses. The features teachers and students find so useful are also here: anecdotes and examples, easy-to-follow lists, integrated coverage of international business communication, analyses of sample problems, and a wealth of in-class exercises and out-of-class assignments.

But *BCS* takes these features a step further. In each module you'll also find

- **Polishing Your Prose** boxes, featuring straightforward instructions to help students correct common writing errors, as well as exercises to test what they know.
- **Building a Critical Skill** boxes, showing students how to apply what they know in the business world.
- **Site to See** boxes that invite students to use the Internet to get timely information available in cyberspace.
- **Instant Replays** to reinforce concepts students are reading.
- **Fast Forward/Rewind** indicators to help students make connections between concepts in different modules.
- **FYI** boxes that provide some lighthearted information about business communication.

This sixth edition is thoroughly updated based on the latest research in business communication. You'll find many new problems and examples, new Polishing Your Prose exercises, and new Sites to See. Your students will benefit from timelines that identify the steps in planning, writing, and revising everything from seven-minute e-mail messages to memos taking six hours to reports taking 30 business days. Cases for Communicators at the end of each unit provide individual and group activities.

BCS also includes a comprehensive package of supplements to help you and your students.

- An *Instructor's Resource Manual* with sample syllabi, an overview of each module, suggested lecture topics, in-class exercises, examples, discussion and quiz questions, and solutions to problems.
- A *Test Bank* featuring hundreds of questions for use in quizzes, midterms, and final examinations—with answers. The *Test Bank* is in a computerized format (Mac or Windows) that allows you to create and edit your own tests.

August 20, 2012

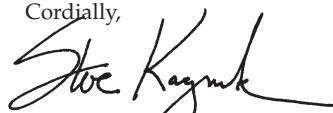

Page 2

- *Videos* showing real managers reacting to situations dealing with cultural differences, active listening, working in teams, and the virtual workplace.
- An *Online Learning Center* (<http://www.mhhe.com/bcs6e>) with self-quizzes for students, a bulletin board to communicate with other professors, current articles and research in business communication, downloadable supplements, links to professional resources, and more.

You can get more information about teaching business communication from the meetings and publications of The Association for Business Communication (ABC). Contact

New and Improved Coverage in BCS6e!

We've listened to your feedback on what you like and what you want improved in *BCS*, keeping as much of the text intact as possible while also making sure *BCS6e* accurately reflects changes in the workplace and in the field of business communication. In particular, Module 13 has been renamed "E-Mail Messages, Web Writing, and Technology" and updated to include more discussion on using social networking tools, and Modules 27 and 28 integrate social media into job application documents. Throughout the book, you'll find hundreds of elements revised or all new, including FYIs, Sites to See, BCS boxes, Problems and Exercises, Polishing Your Prose exercises, and Cases for Communicators.

Module 1: This critical foundation module underscores the importance of excellent communication skills in the workplace. For this edition, it includes a new opener reflecting on the tough economic realities of today's workplace and how the ability to read and write well gives professionals an edge on the competition. There are also new FYIs on Carnegie Speech's language training for a global market; vital 21st-century job skills that include oral and written communication; the slow gains in reading skills among elementary and middle school students (the next wave of college students and young professionals); degrees of study and workplace success that correlate in surprising ways; a typo that may have caused stock market chaos; and the most literate cities in the United States. A new Site to See invites students to test their interpersonal skills, and the BCS box has been updated to include information on start-up companies and a new Apple photo. A new end-of-module problem and new Polishing Your Prose exercises round out the updates.

Module 2: Revisions to the module opener reinforce the importance of audience analysis, and some elements have been moved to improve the flow of the module. New FYIs include discussions on an offensive ad by Nivea that failed to properly analyze its audience; errors by FEMA and subsequent messages that made problems worse for disaster victims; the travails of test takers and a talking pineapple; a politician's lack of awareness of how audiences might view his multimillion-dollar income; public criticism by P. J. Crowley that cost him his job; and the value of role-playing to achieve buy-in from audiences. The BCS box has been updated to note that Zappos was named by *CNN/Money* as one of the 100 Best Companies to Work For. A new end-of-module problem and all new Polishing Your Prose exercises round out the updates.

Module 3: In an ever-shrinking world, this module's overview of the elements of diversity and culture that help shape the workplace becomes even more critical for 21st-century professionals. New FYIs in Module 3 focus on the rise of interracial marriages in the United States; the value of touch to staying healthy; self-definition by Millennials in the workplace; Nike's sexist Olympic T-shirt design; women now scoring higher than men on IQ tests; ads that present women and minorities offensively; Baby Boomers being targeted by con artists; and the lack of diversity in U.S. television and what is being done about it. A new Site to See offers reviews and links to apps that can make travel easier. New end-of-module problems and new Polishing Your Prose exercises round out the updates.

Module 4: This module's revised opener notes that while the increased pace of the workplace has brought increased pressure to compose faster and faster, writers must still take care to compose effectively. New FYIs discuss how what constitutes revisions changes according to audience; Mortgage Resolution Partners' plan to keep more people in their homes; errant e-mails that terrified hundreds of employees into thinking they were fired; and tips from experts on overcoming procrastination. Site to See addresses have been updated, and a new Site to See invites visitors to take beginning and advanced Microsoft Word tutorials. New Polishing Your Prose exercises round out the updates.

Module 5: The module opener has been revised to emphasize that the principles of good design still apply to ever-changing social media, and the BCS box has been updated to reference Google Docs. Two new FYIs discuss the importance of document design—the first being a Pew Charitable Trust study on how checking account documents are too confusing to follow, and the second on how large, multi-touch screens are part of the next wave of technological changes in how we use and format documents. Site to See addresses have been updated, and a new Site to See offers tips on using PowerPoint slides in presentations. New Polishing Your Prose exercises round out the updates to the module, and the new Case for Communicators for Unit 1 examines how poor proofreading caused financial headaches for Old Navy.

Module 6: Modules 6, 7, and 8 detail the cornerstones of good business communication: you-attitude, positive emphasis, and reader benefits. They are briefer than some of the earlier modules but are meant to be read as a collective. For Module 6, examples throughout have been updated to reflect more current dates. One new FYI features a study that found a link among prejudices, low intelligence, and social conservatism, while another notes the lack of you-attitude among employees at Goldman Sachs, who, among other things, referred to clients as “muppets.” A new Site to See invites students to test their Emotional Intelligence. New end-of-module problems and new Polishing Your Prose exercises round out the updates.

Module 7: Understanding the role of positive emphasis in business communication—and contrasting it with negative points of view—is vital to composing effective messages. Revisions to this module include FYIs on the disturbing findings that for the first time, most Americans do not believe today’s young people will have better lives than their parents; the effect of optimism on both physical and financial health; the news that happier people make better workers; the role of resilience in helping people cope with stress and life’s challenges; tips on making video apologies; and updates on failed apologies and on the happiest states in the United States. New end-of-module problems and new Polishing Your Prose exercises round out the updates.

Module 8: Developing good reader benefits can challenge students, so new FYIs focus on creative and interesting ways that benefits affect people. These FYIs discuss how the intrinsic value of self-image may be more important to people than even money; how boutique grocery stores provide online shopping and home delivery benefits to customers; the correlation between more education and longer life expectancy; and the counterintuitive patterns of liars and cheaters being unfazed by potential consequences. New Polishing Your Prose exercises round out the updates to the module, and the new Case for Communicators for Unit 2 examines how poor proofreading resulted in embarrassment for *The New York Times*.

Module 9: While the formats for memos and letters remain unchanged, technology is influencing how such documents are created and sent. Thus, new FYIs reflect on cloud technology making it easier to store documents but with the added challenge of making sure formats remain intact; indecipherable handwriting on letters and packages thwarted by Post Office scanning equipment; and CEOs Mike Duke and Tom Barrack being embarrassed by the memos they sent to employees that went viral. Examples throughout this module have been updated to reflect current dates. New Polishing Your Prose exercises round out the updates.

Module 10: This module has been renamed “Informative and Positive Messages” and all examples have been updated to reflect more current dates. In addition, FYIs now include the best out-of-office e-mail reply of all time; a movie trailer that uses a customer’s rant to remind others of its no-talking/no-texting policy; chocolate, indeed, being able to change a person’s mood for the better; customers tweeting complaints and how companies can

better manage their image; the earliest appearance of the now-popular word “information”; and the effect of nearly 25% of the world workers’ depression on productivity. A new end-of-module problem and all new Polishing Your Prose exercises round out the updates.

Module 11: New FYIs include how what most people would consider bad news actually helped shooting victim Petra Anderson; the surprising answer to who was behind a campaign to spread negative information about Google; the potential negative effect on reputation from working at home; types of “toxic” bosses in the workplace; workers wanting honesty from managers and supervisors; a gay instructor fired by Facebook for daring to give a chatty employee a look; Lego’s attempts to cater to girls; and the most educated employees also facing the most stress on the job. Sites to See addresses have been updated, and examples throughout this module reflect more current dates. A new end-of-module problem and all new Polishing Your Prose exercises round out the updates.

Module 12: Though we’re surrounded by persuasive messages every day, understanding them and then creating our own effective ones require careful effort. For better flow in the discussion, some elements of this module have been moved, and new FYIs discuss online bullying persuading people to help the victims; former Xerox CEO Anne Mulcahy almost being persuaded by sexist salespeople to go somewhere else; “birthers” refusing to be persuaded by President Obama’s birth certificate; branding’s effect on persuading consumers; the “like me bias” in performance appraisals; and tips for writing effective sales letters. Revisions to existing FYIs involve product placement in James Bond movies, and Blockbuster Video CEO Jim Keyes’ public criticism of Netflix failing to persuade consumers. A new end-of-module problem and all new Polishing Your Prose exercises round out the updates.

Module 13: Of all the modules in *BCS6e*, this one has been revised the most extensively, reflecting the rapid changes that come with our highly technological age. For starters, it has been renamed “E-Mail Messages, Web Writing, and Technology,” and the body copy has been tweaked to better integrate technology into the discussion while examples have been updated to reflect more current dates. In particular, the discussion on using social networking tools has been expanded, and a new photo coordinates with changes to Facebook’s current design. Some elements have been moved to improve the flow of the discussion. New FYIs discuss the ever-increasing use of smartphones for e-mail and web use; a cyber-stalking investment manager’s 1,600-word plea for another date; a study of more than 977 e-mail messages revealing that shorter subject lines attract more clicks; Pew Research Center’s findings that most Americans prefer vocal communication to texting, while a Nielsen survey shows that 13- to 17-year-olds send and receive 10 times as many texts as people ages 45 to 54; signs that the popularity of blogging among young people is waning; tips to use social networking in business; offensive tweets that got their authors in trouble; Latino and Hispanic Americans leading the way in embracing web technology; and a host of tips for better cell phone etiquette. An existing FYI includes more information on e-mail etiquette, and a new Site to See offers 20 tips on using Facebook in business. A new end-of-module problem and new Polishing Your Prose exercises round out the updates to the module, and the new Case for Communicators for Unit 3 examines the problems United Airlines faced when a computer glitch booked flights to Asia at an incorrect price.

Module 14: This module focuses on the nuts and bolts of using grammar and punctuation effectively. New FYIs reveal how 45% of employers surveyed say they are increasing training to improve grammar and other skills of employees; how CEO Kyle Wiens requires all job applicants to his companies to take a grammar test; and commentator Andy Rooney’s aversion to apostrophes. There is also an addition to an existing module regarding a cable TV charge of \$16.4 million, and Site to See addresses have been updated. New end-of-module problems and new Polishing Your Prose exercises round out the updates.

Module 15: Because choosing the right word is as much an art as it is a skill, new FYIs present examples of real-world applications—as well as misapplications: how U.S. presidents have managed to misspeak in public; what food label language might actually mean; idiomatic phrases that baffle non-native speakers of English; and the limitations of spell-checkers with common errors. The BCS box has been revised to challenge readers to think about the implications of a study that shows “mean” men do better in the workplace than nicer ones. New end-of-module problems and new Polishing Your Prose exercises round out the updates.

Module 16: New FYIs in this module include the arrogant style of a college student seeking a summer job; missed opportunities for message revision that resulted in athletes being insulted or being dismissed from the field of play; buzzwords on LinkedIn that are overused; and venerable critic Roger Ebert’s Facebook page being censored for posts during a heated exchange. An existing FYI has been updated to include the 2012 winners of a wacky warning label contest, and the BCS box caption has been updated to note Johnnetta B. Cole’s current position as chair of the institute that bears her name. New end-of-module and new Polishing Your Prose exercises round out the updates to the module, and the new Case for Communicators for Unit 4 examines how a misspelling on a key road sign proved an embarrassment for the state of Ohio.

Module 17: This module features new FYIs on how listeners today need a shift in stimulation about every 20 minutes; how students learning foreign languages did better after training in listening skills; and how archetypes for bad listeners, including Preamblers, such as the hosts of CNN’s *Crossfire* were called out by guest Jon Stewart for using the show as a platform to give speeches on their points of view. Site to See addresses and the caption for the photo of Elizabeth Gonzalez-Gann have also been updated.

Module 18: New FYIs to help students better understand how to be effective on work teams discuss the hidden costs of being on a team; how introverts may suffer from the effects of groupthink; how social networking media is making us lonelier; how to use hip hop as a team-building exercise; ways to keep “digital nomads” connected with the workplace; and how a diverse team of students presented a business plan at Florida Atlantic University. The existing FYI on bad bosses has been revised to include the results of two recent polls. New Polishing Your Prose exercises round out the updates.

Module 19: A new module opener underscores how meetings are viewed by many employees, as well as the importance of choosing whether to hold a meeting in the first place. New FYIs focus on how many hours CEOs spend in meetings; using chocolate and other creative ways to keep meetings on track; tips to be an effective meeting participant; caveats for teleconferencing; companies, such as Nutrisystem, Symantec, and Herman Miller, that are holding annual meetings online; and Twist, an app from investor Bill Lee that helps track where meeting-goers are. One FYI has been revised to include information on using tablet PCs and other tools to make meetings more interactive, and Site to See addresses have been updated. New Polishing Your Prose exercises round out the updates.

Module 20: New FYIs include Kathy Caprino’s tips to avoid mistakes in speeches; gaffes by a university president; Microsoft’s Kirill Tatarinov’s quick recovery from a technical glitch during a presentation; a poetry recitation that went horribly wrong; Steve Carell’s effective use of humor during a graduation speech; a criminal’s conviction being upheld because of his silence; and the importance of rehearsing before a speech. A new Site to See showcases PowerPoint examples and other resources. New Polishing Your Prose exercises round out the updates to the module, and the new Case for Communicators for Unit 5 looks at the role of charisma in leadership and whether people can be trained to be more charismatic.

Module 21: This module on proposals and progress reports features new FYIs on how feasibility studies on sports arenas show they are money losers for taxpayers; the London Business School’s John W. Mullins’ advice on writing a good business plan; how people are using Twitter to submit business plans; how some successful businesses nevertheless had their business plans lose in-class competitions; the effect of discourse communities on sales proposals; and the results of Apple’s annual Supplier and Responsibility Report. Site to See addresses have been updated, and new Sites to See include sample recommendation reports from the Centers for Disease Control, tips for writing proposals from the Small Business Association, the New York City school system’s progress reports, and progress reports from the World Health Organization on the fight against HIV/AIDS. Examples throughout the module have been updated to reflect more current dates. New Polishing Your Prose exercises round out the updates.

Module 22: Because research is so critical today, a new module opener stresses the importance of research to business and industry, as well as the need to make sure information resources are trustworthy. Minor tweaks have been made to the body copy. New FYIs include a discussion on Splunk, the first “Big Data” company to go public; how a Florida man convicted of murder got a new trial because a stenographer erased records inadvertently; unusual findings from research, such as how the more debt college students have, the higher their self-esteem; the high number of fake accounts on Facebook; estimates of how much data is consumed annually online; racist tweets that got two Olympians expelled from the London games; and the amount of money spent by corporations for employee training despite a lack of research on its effectiveness. New Sites to See include Survey Monkey and the Purdue OWL website. New Polishing Your Prose exercises round out the updates.

Module 23: Some elements of this module have been reorganized to improve flow. New FYIs include reports from companies questioning the effectiveness of Facebook ads; how younger people are choosing to rent a wide variety of items rather than own them; a Georgetown University report that despite some college majors being more employable than others, research still shows a college degree is worth it; employers scouring credit reports on job applicants; “pink slime” and its effects on consumer perceptions; and how disorganization—not just in documents but in general—costs companies. New Polishing Your Prose exercises round out the updates.

Module 24: The sample student report in this module has been revised to reflect more current dates. One new FYI discusses an innovative annual report from Austria Solar that uses light to make text on its otherwise blank pages visible. Another new FYI gives examples of how report data helps organizations to strategize. Orbitz, for instance, found that Apple users spend as much as 30% more per night on hotels than PC users. Site to See addresses have been updated, and new Sites to See include Graphis’s Top 100 Annual Reports winners and a copy of NASA’s Education Recommendation Report. A new Polishing Your Prose exercise rounds out the updates.

Module 25: A new module opener emphasizes the importance of charts, graphs, clip art, and other images in this increasingly visual age. New FYIs include technology that allows people to write using eye movements; tips for effective visual note taking; websites like Pinterest and Flickr that are changing the way we share information; how Ambassador Gary Locke became a hit in China for carrying his own bags and getting his own coffee; hidden messages in corporate logos; and the challenges from corporate branding on the 2012 Olympics. New Polishing Your Prose exercises round out the updates to the module, and the new Case for Communicators for Unit 6 looks at how waterless car washes are transforming that industry in the Middle East, as well as implications for such businesses in the United States.

Module 26: The module opener has been revised to discuss the challenges of finding a job in a bad economy as well as how getting started early and using social networking tools like LinkedIn and Facebook can help. Some elements have been reorganized to improve flow. New FYIs include revelations on how despite younger people embracing information technology, relatively few of them choose it as a career field; location being a major factor in job applicant trends; how unemployment is affecting college graduates and how many jobs that don't require degrees are going unfilled; the top master's degrees for income potential and which career requiring a graduate degree women find most satisfying; apps for people looking for a job; states making it illegal to bar the unemployed from applying for jobs; how employees in the middle of the income pack are vulnerable to downsizing; and how unemployment is affecting different generations. New Polishing Your Prose exercises round out the updates.

Module 27: Revisions to the module opener note how technology may be changing how résumés look and are submitted, underscoring the need to adapt to the employer's expectations. Minor tweaks have been made to improve body copy. Examples throughout the module have been updated to reflect more current dates, and several examples now include social networking page addresses. New FYIs discuss a college student who sent a photo of Nicolas Cage instead of her résumé to a prospective employer; résumé gaffes like listing "phishing" as a hobby; how companies use tracking systems to check on applicants' social networking pages; the proliferation of lies on résumés; and how recruiters and others use Facebook and Google to screen applicants.

Module 28: The module opener reminds job applicants to use the process employers want, such as a brief e-mail message in lieu of a formal letter in some cases. Examples throughout the module have been updated to reflect more current dates. New FYIs include discussions on a 3,000-word rejection letter sent to job applicants that went viral, and debates among experts as to whether the job application letter is going away. New Sites to See provide job application letter examples from Virginia Polytechnic Institute, State University, and Monster. New Polishing Your Prose exercises round out the updates.

Module 29: New FYIs in this module cover employers wanting Facebook passwords from applicants; UBS AG's stringent dress codes; leaving emotional baggage behind in job interviews; a survey that revealed 70% of hiring managers have experienced odd behavior from interviewees; unusual stress interview situations; how students coming from homes that appreciate in value are more likely to go to more expensive colleges; LinkedIn's compilation of worst questions asked of female job applicants; advice from Jason Fried for hiring managers to screen out applicants who ask "how" instead of "why" questions; and tips for making the most of virtual job interviews. New Polishing Your Prose exercises round out the updates.

Module 30: Revisions to this module's opener remind students to think in terms of careers rather than simply jobs, and to be self-reliant but not mercenary. New FYIs include Jenny Foss's advice on staying in touch with job interviewers through such resources as LinkedIn; planning carefully for career and early retirement; and how today's employees are more likely to have many short-term jobs in their careers than previous generations did. Examples throughout the module have been updated to reflect more current dates. New Polishing Your Prose exercises round out the updates to the module, and the new Case for Communicators for Unit 7 looks at how traditional Arts and Sciences programs at universities are starting to incorporate entrepreneurial and other job-related coursework into their curriculums.

Acknowledgments

All writing is in some sense collaborative. This book in particular builds upon the ideas and advice of teachers, students, and researchers. The people who share their ideas in conferences and publications enrich not only this book but also business communication as a field.

People who contributed directly to the formation of this sixth edition include the following:

Frederick C. Alm, *Hudson Valley Community College*
Roxanne Bengelink, *Kalamazoo Valley Community College*
Danielle Blesi, *Hudson Valley Community College*
Mary Young Bowers, *The W.A. Franke College of Business-Northern Arizona University*
Marjorie Coffey, *Oregon State University*
Donna R. Everett, *Morehead State University*
Frances M. Hale, *Columbus State Community College*
Anna Haney-Withrow, *Florida Gulf Coast University*
Elizabeth F. Heath, *Florida Gulf Coast University*
Norma Johansen, *Scottsdale Community College Business Institute*
James Katt, *University of Central Florida*
Mark Mabrito, *Purdue University Calumet*
Marcia A. Metcalf, *Northern Arizona University*
Lori Oldham, *San Diego City College*
Miri Pardo, *St. John Fisher College*
Richard D. Parker, Ph.D., *High Point University*
Renee Rallo, *Florida Gulf Coast University*
Marcel M. Robles, *Eastern Kentucky University*
Kathy Standen, *Fullerton College*
Sharron Stockhausen, *Anoka Ramsey Community College*

Sonia Wilson-Pusey, *Estfield College*

For having provided encouragement and assistance in past editions, we also thank

Donna Kienzler, *Iowa State University*

Alisha Rohde, *The Ohio State University*

We thank Kitty's husband, Robert S. Mills, who in past editions provided a sounding board for ideas, encouragement, and, when deadlines were tight, weekly or nightly rides to Federal Express.

Thanks goes to Marith Adams for a keen eye, cheerful disposition, and excellent proofreading ability.

Steve thanks for encouragement over the years friends and colleagues too numerous to mention in their entirety here. Of special note are Marith Adams, Bruce Ardinger, Carol Baker, Daniel Barnes, J. D. Britton, Saretta Burke, Lucy Caswell, Jen Chapman, Laura Dachenbach, Elizabeth Dellapa, Ann Frazier, Janet Gething, Kate Hancock, David Hockenberry, Charlie Hottel, Marilyn Howard, Sheila Kapur, Lisa Mackall-Young, Valeriana Moeller, Susan Moran, Donna Pydlek, Crystal Robinson, Maggie Sanese, Bud Sawyer, Wilma Schneider, David Smith, Mike Snider, Jim Strider, Joe Taleroski, and, of course, his coauthor, friend, and mentor, Kitty O. Locker. Special thanks also go to his mother, Myo, and sister, Susan, for love, strength, and guidance—and for putting up with him in ways that can only be described as truly remarkable.

Guided Tour

The 6th edition of *Business Communication: Building Critical Skills* reinforces the essential skills of good communication. The contents consist not of chapters but of 30 skill-centered modules that can be taught in any order.

Please take a moment to page through the highlights of this 6th edition to see the helpful tools that reinforce this flexible approach to business communication education.

Building a Critical Skill

Understanding What Your Organization Wants LO 2-1

Michelle wondered whether her boss was sexist. Everyone else who had joined the organization when she did had been promoted. Her boss never seemed to have anything good to say about her or her work.

Michelle didn't realize that, in her boss's eyes, she wasn't doing good work. Michelle was proud of her reports; she thought she was the best writer in the office. But her boss valued punctuality, and Michelle's reports were always late.

Just as every sport has rules about scoring, so, too, do workplaces have rules about what "counts." Even in the same industry, different organizations and different supervisors may care about different things. One boss circles misspelled words and posts the offending message on a bulletin board for everyone to see. Other people are more tolerant of errors. One company values original ideas, while another workplace tells employees just to do what they're told. One supervisor likes technology and always buys the latest hardware and software; another is technophobic and has to be persuaded to get needed upgrades.

Succeeding in an organization depends first on understanding what "counts" at your organization. To find out what counts in your organization:

- Ask your boss, "What parts of my job are most important? What's the biggest thing I could do to improve my work?"
- Listen to the stories colleagues tell about people who have succeeded and those who have failed. When you see patterns, check for confirmation: "So his real problem was that he didn't socialize with co-workers?" This gives your colleagues a chance to provide feedback: "Well, it was more than never joining us for lunch. He didn't really seem to care about the company."
- Observe. See who is praised, who is promoted.

Understanding, by the way, can and should be a two-way street. Online shoe retailer Zappos.com listened to employees who said they wanted a workplace that is more accommodating to their lifestyle. The result was a nap room for a quick snooze and social events that include after-hours mixers and

Who is my audience? LO 2-2

► More people than you might think!

In an organizational setting, a message may have five separate audiences.¹

1. The **primary audience** will decide whether to accept your recommendations or will act on the basis of your message. You must reach the decision maker to fulfill your purposes.
2. The **secondary audience** may be asked to comment on your message or to implement your ideas after they've been approved. Secondary audiences can also include lawyers

Module Openers

Modules open with short objectives that concisely convey the important concepts of the module. The module learning objectives map the topics and motivate students to learn the material. The module addresses each learning objective with a thorough coverage of each topic and teaches real-world skills important in business.

Module

3 | Communicating Across Cultures

LEARNING OBJECTIVES

Explores the many facets of communicating across cultures in business. After completing this module, you should be able to

- Define culture through context.
- Compare and contrast dimensions of culture.
- Apply strategies for international communication success.
- Identify differences among generations.

LO 3-5 Apply strategies for workplace discrimination solutions.

LO 3-6 Apply strategies for bias-free documents.

In this module, you'll work with people whose backgrounds differ from yours. Residents of small rural areas have different notions of friendliness than do people from big cities. Californians and New Yorkers speak differently than people in the Midwest. The cultural icons that resonate for us may mean little to teenagers. The world continues to become globalized. Businesses become busier and globalization continues to change the workplace, consumer behavior, and how people communicate. For instance, jet-setters can have personal assistants from Ask Sunday—based in New York but with a workforce in India—handle everything from ordering local takeout meals to sending birthday cards to friends and family. With 10,000 subscribers, TutorVista provides tutoring in a range of subjects from 600 tutors based in India.¹ "Offshoring" of jobs is expected to continue, with companies like Wipro, Inc., predicting that American employers will move about 3.3 million white-collar overseas in the next five years.²

Building a Critical Skill

Building a Critical Skill boxes explain 30 skills necessary for job success. Topics include Dealing with Discrimination, Leading by Listening, and Negotiating Salary and Benefits.

The National Assessment of Adult Literacy, a study by the U.S. Department of Education, showed that Mississippi has improved adult literacy in every one of its counties. Some other states, however, saw an increase in adult literacy, and one in seven U.S. adults is challenged to read anything more complex than a child's picture book.

Source: Greg Toppo, "Literacy Study: 1 in 7 Adults are Unable to Read Basic Documents," USA Today, January 8, 2009, http://www.usatoday.com/news/education/2009-01-08-adult-literacy_N.htm.

paragraphs of evidence, and a final concluding paragraph.

- Business communication is organized to meet the psychological needs of the reader. Most often, the main point comes up front (►► Modules 10–12).

Style

- The style for school writing is often formal. Big words and long sentences and paragraphs are often rewarded.
- The style for business communication is friendly, not formal. Short words and a mix of sentence and paragraph lengths are best (►► Modules 15 and 16).

Document Design

- School writing often rewards long paragraphs. Papers are often double spaced, with no attention to visual design.
- Businesspeople want to be able to skim documents. Headings, lists, and single-spaced paragraphs with double spacing between paragraphs help readers find information quickly (►► Module 5).

Visuals

- Except for math, construction, and engineering, few classes expect writing to contain anything other than words.
- Business writers are expected to choose the most effective way to convey information. Even a one-page memo may contain a table, graph, or other visual. You'll be expected to be able to use computer programs to create graphs, visuals, and slides for presentations (►► Modules 5, 20, and 25).

What does communication accomplish? LO 1-3

FYI

FYI sidebars in each module include fun factoids such as which messages busy executives notice, errors that spell-checkers won't catch, and even how students are being paid to study on company time.

Site to See

Site to See boxes show websites that provide more information about topics in the modules. You'll find The Home for Abused Apostrophes, Word Games on the Web, How to Use Parliamentary Procedure, and Before and After Versions of PowerPoint Slides.

Site to See

Go to <http://travelandcultureapps.com/>
for reviews and links to apps that can make travel easier.

How does culture affect business communication? LO 3-2

► In every single aspect!

Culture influences every single aspect of business communication: how to show politeness and respect, how much information to give, how to motivate people, how loud to talk, even what size paper to use.

The discussion that follows focuses on national and regional cultures. But business communication is also influenced by the organizational culture and by personal culture, such as gender, race and ethnicity, social class, and so forth. As Figure 3.7 suggests, all of these

Instant Replay

Instant Replay sidebars in the margins of each module reinforce key concepts presented earlier in the module. Topics include Strategies for Active Listening, Guidelines for Page Design, Organizing Bad News to Superiors, Responding to Criticism, and How to Create a Summary of Qualifications for a Résumé.

understand the social and political relationships among readers, and negotiate conflicts orally rather than depending solely on the document. These writers were then able to think about content as well as about organization and style, appeal to common grounds (such as reducing waste or increasing productivity) that several readers shared, and reduce the number of revisions needed before documents were approved.³

Thinking about the content, layout, or structure of your document can also give you ideas. For long documents, write out the headings you'll use. For anything that's under five pages, less formal notes will probably work. You may want to jot down ideas you can use as the basis for a draft. For an oral presentation, a meeting, or a document with lots of visuals, try creating a **storyboard**, with a rectangle representing each page or unit. Draw a box with a visual for each main point. Below the box, write a short caption or label.

Letters and memos will go faster if you choose a basic organizational pattern before you start. Modules 10, 11, and 12 give detailed patterns of organization for the most common kinds of letters and memos. You may want to customize those patterns with a **planning guide**⁴ to help you keep the "big picture" in mind as you write. Figure 4.3 shows planning guides developed for specific kinds of documents.

How Experts Write

Expert writers

- Realize that the first draft can be revised.
- Write regularly.
- Break big jobs into small chunks.
- Have clear goals focusing on purpose and audience.
- Have several different sources from which to choose from.
- Use rules flexibly.
- Wait to edit until after the draft is complete.

Cases for Communicators

Unit-ending cases provide both individual and team activities to solve communication challenges faced by real-world companies and organizations. Topics include the costs of bad grammar, an alternative to banner ads on the web, and the role of improv in corporate training programs.

Keep on Reading with Us

In December 2011, *The New York Times*, one of the nation's oldest and most respected newspapers, had to scramble to recover from an e-mail message mistakenly sent out that promised a 50% discount for 16 weeks on a subscription. The offer had been intended only for a few hundred people who had recently cancelled subscriptions but was instead sent to 8.6 million e-mail addresses.

Shortly after, the *Times* tweeted: "If you received an e-mail today about cancelling your NYT subscription, ignore it. It's not from us." Of course, the newspaper did send the original e-mail message.

Damage from the error included many people calling or writing in to take advantage of the offer, including some who already had a subscription but threatened to cancel unless the deal was honored. The *Times* did initially honor the discount, but later that day stopped giving out discounts. The results included angry customers and a parody Twitter account poking fun at the mistake.

Individual Activity

Imagine you are in the Marketing Department of *The New York Times* and you have been selected to work on its campaign to regain subscriber confidence. The *Times* knows it has a strong product with a long history of satisfied readers. However, company executives fear that some subscribers may avoid renewing their subscriptions in the future, especially those subscribers who weren't able to take advantage of the erroneous e-mail offer. In addition, potential new subscribers may have been scared off by the negative publicity surrounding the debacle.

To achieve its goal, the Marketing Department has decided to e-mail a different offer to these customers. The company will use the e-mail addresses already in its database for renewals but will pay for additional e-mail addresses for potential customers. The e-mail message, tailored to each customer group, will only be sent to those customers who did not respond with the previous offer.

Subscribers will receive the following benefits:

- A free two-week subscription to its home-delivered print edition, along with a collectible holiday edition to anyone who chooses to start or renew a subscription for three months.
- A free four-week subscription to its home-delivered print edition, along with a collectible holiday edition and a free *Times* coffee mug to anyone who chooses to start or renew a subscription for six months.
- For either subscription, readers will get access to premium features in the online version of the *Times* (The online version is

Unit 2 Cases for Communicators

free but provides limited access to stories and other features, such as a searchable database of older articles.)

While an e-mail message will go out to all of the customers affected, the *Times* would like to segment the e-mail messages for subscribers more likely to respond to one offer versus the other. To identify them, consider the following questions:

- What intrinsic and extrinsic benefits are inherent in a subscription to *The New York Times*? What might customers gain from these benefits?
- What are the demographic and lifestyle characteristics of potential customers?
- What needs, feelings, or concerns might be motivating customers?
- Why would customers pay for a print edition of *The New York Times* when a lot of the same information can be found free at the newspaper's website?

Identify as many different potential customer groups as you can think of, noting at least one intrinsic and one extrinsic benefit that each group can expect from purchasing a *Times* subscription.

Give enough detail in your customer descriptions so that the Marketing Department can use the information to guide its choice of appeals to customers.

Group Activity

Combine the results of your list with those of your classmates to generate a comprehensive list of customers and benefits. Then, as a group, select five customer groups on which to focus. Identify the benefits that will be in the e-mail message to potential subscribers and develop these benefits using psychological description.

Think of how the e-mail message will convince potential customers they should purchase your company's products.

Write the e-mail message. Be sure to:

- Include at least one intrinsic and one extrinsic benefit for each customer group.
- Justify negative information, focusing on what the reader can do rather than on limitations.
- Omit unnecessary negative information.
- Use you-attitude.
- Talk about the reader, not the company.

Source: "NY Times Offers Discounts in Mistaken E-Mail Gaffe," December 28, 2011, <http://finance.yahoo.com/news/nytimes-offers-discounts-mistaken-email-gaffe-224635047.html>.

Polishing Your Prose

Polishing Your Prose exercises conclude each module. They may be assigned in any order throughout the term. Students can do the odd-numbered exercises for practice and check the answers at the end of the book. Answers to even-numbered exercises, which can be assigned for homework or used for quizzes, are included in the *Instructor's Resource Manual*.

100 Unit Two Creating Goodwill

Polishing Your Prose

It's/Its

With an apostrophe, *it's* is a contraction meaning *it is*. Without an apostrophe, *its* is a possessive pronoun meaning *belonging to it*. Contractions always use apostrophes:

It is → it's
I have → I've
You will → you'll
They are → they're
Possessive pronouns (unlike possessive nouns) do not use apostrophes:
His / hers / its
My / mine / our / ours
Your / yours
Their / theirs

Because both *it's* and *its* sound the same, you have to look at the logic of your sentence to choose the right word. If you could substitute *it is*, use *it's*.

Decide whether to use contractions (such as *it's*, *they're*, *you're*, *we're*, *should've*, and so forth) based on audience, purpose, and organizational culture. Some audiences find contractions too informal; others find a lack of contractions off-putting or unfriendly. If the purpose of your document is to persuade while being casual, then contractions make sense. If, however, documents have significant legal ramifications, contractions may seem flip. Your organization may have its own conventions, too—check past correspondence to see what is preferred.

In general, more formal documents such as résumés and long research reports use few (or no) contractions. Contractions are often

OK in e-mail, memos, and letters in which you want a conversational tone, such as a fund-raising letter for the local animal shelter.

Exercises

Choose the right word in the set of brackets.

1. [It's/Its] a good idea to keep paper copies of documents, as electronic files can be lost or corrupted.
2. Halle told us [it's/its] going to be at least five business days before we can expect a reply to our Singapore proposal.
3. Though the app has been thoroughly tested, [it's/its] a good idea to test it one more time, just to be certain.
4. Because the Halloran Company values innovation, [it's/its] vital that creative people have the opportunity to realize their potential there.
5. Each department should make sure [it's/its] personnel files are kept confidential.
6. We believe [it's/its] a sign of good faith that our customers have stayed with us in tough economic times.
7. Patel and Associates is dedicated to making sure [it's/its] clients receive the best service possible.
8. In her keynote address, Sophia told us that an organization is strong only because [it's/its] employees are strong.
9. While [it's/its] impossible to be prepared for all emergencies, [it's/its] prudent to have a general disaster plan.
10. To keep up with [it's/its] competition, a company needs to make certain [it's/its] social networking pages are kept up-to-date.

Check your answers to the odd-numbered exercises at the back of the book.

Support Materials

Business Communication: Building Critical Skills, 6e, includes a variety of resources to help instructors prepare and present the material in this textbook more effectively.

Instructor's Manual

This is one of the few textbooks for which the authors write the *Instructor's Manual*. This ensures that the instructor materials represent the textbook's content and support instructor needs. Each chapter includes the learning objectives, module overview, key lecture points, teaching tips, in-class exercises, thumbnail images of corresponding PowerPoint slides, and answers to textbook assignments.

Test Bank and EZ Test

Prepared by the author, the test bank includes more than 1,800 true/false, multiple-choice, short-answer, and fill-in-the blank questions. Each question identifies the answer, difficulty level, and Bloom's Taxonomy level coding. Each test question is also tagged to the learning objective it covers in the chapters and the AACSB Learning Standard it falls under.

EZ Test Online

McGraw-Hill's *EZ Test Online* is a flexible and easy-to-use electronic testing program. The program allows instructors to create tests from book-specific items, accommodates a wide range of question types, and enables instructors to even add their own questions. Multiple versions of a test can be created, and any test can be exported for use with course management systems such as WebCT and Blackboard or with any other course management system. *EZ Test Online* is accessible to busy instructors virtually anywhere via the web, and the program eliminates the need for them to install test software. For more information about *EZ Test Online*, please see the website at www.eztestonline.com.

PowerPoint Presentation Slides

Each PowerPoint file has more than two dozen slides relating to the chapter, including two or more graphics from the textbook and notes offering tips for using the slides. The PowerPoint slides have been prepared by the authors, allowing seamless integration between the slides and the *Instructor's Manual*.

Assurance of Learning Ready

Many educational institutions today are focused on the notion of *assurance of learning*, an important element of some accreditation standards. *Business Communication: Building Critical Skills* is designed specifically to support your assurance of learning initiatives with a simple, yet powerful solution.

Each test bank question for *Business Communication: Building Critical Skills* maps to a specific chapter learning outcome/objective listed in the text. You can use our test bank software, EZ Test, and EZ Test Online, or in *Connect Business Communication* you can easily query for learning outcomes/objectives that directly relate to the learning objectives for your course. You can then use the reporting features of EZ Test to aggregate student results in a similar fashion, making the collection and presentation of assurance of learning data simple and easy.

AACSB Statement

The McGraw-Hill Companies is a proud corporate member of AACSB International. Understanding the importance and value of AACSB accreditation, *Business Communication: Building Critical Skills*, 6e recognizes the curricula guidelines detailed in the AACSB standards for business accreditation by connecting selected questions in [the text and/or the test bank] to the six general knowledge and skill guidelines in the AACSB standards.

The statements contained in *Business Communication: Building Critical Skills*, 6e are provided only as a guide for the users of this textbook. The AACSB leaves content coverage and assessment within the purview of individual schools, the mission of the school, and the faculty. While *Business Communication: Building Critical Skills*, 6e, and the teaching package make no claim of any specific AACSB qualification or evaluation, we have within *Business Communication: Building Critical Skills*, 6e, labeled selected questions according to the six general knowledge and skills areas.

McGraw-Hill and Blackboard

McGraw-Hill Higher Education and Blackboard have teamed up. What does this mean for you?

- 1. Your life, simplified.** Now you and your students can access McGraw-Hill's *Connect* and *Create* right from within your Blackboard course—all with one single sign-on. Say goodbye to the days of logging in to multiple applications.
- 2. Deep integration of content and tools.** Not only do you get single sign-on with *Connect* and *Create*, but you also get deep integration of McGraw-Hill content and content engines right in Blackboard. Whether you're choosing a book for your course or building *Connect* assignments, all the tools you need are right where you want them—inside Blackboard.

The Best of Both Worlds

3. **Seamless gradebooks.** Are you tired of keeping multiple gradebooks and manually synchronizing grades into Blackboard? We thought so. When a student completes an integrated *Connect* assignment, the grade for that assignment automatically (and instantly) feeds into your Blackboard grade center.
4. **A solution for everyone.** Whether your institution is already using Blackboard or you just want to try Blackboard on your own, we have a solution for you. McGraw-Hill and Blackboard can now offer you easy access to industry-leading technology and content, whether your campus hosts it or we do. Be sure to ask your local McGraw-Hill representative for details.

McGraw-Hill Campus™

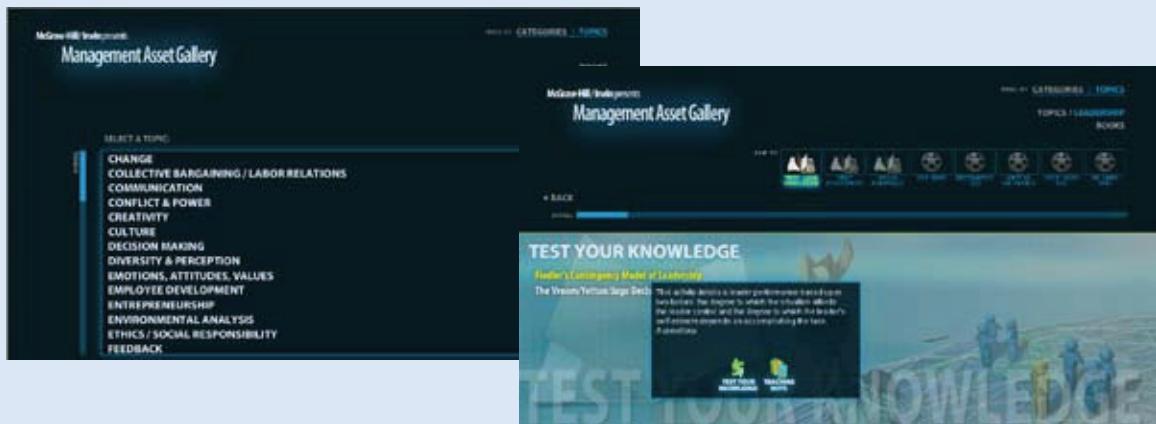

McGraw-Hill Campus™ is a new one-stop teaching and learning experience available to users of any learning management system. This institutional service allows faculty and students to enjoy single sign-on (SSO) access to all McGraw-Hill Higher Education materials, including the award-winning McGraw-Hill *Connect* platform, from directly within the institution's website. McGraw-Hill Campus™ provides faculty with instant access to all McGraw-Hill Higher Education teaching materials (e.g., eTextbooks, test banks, PowerPoint slides, animations and learning objects, etc.), allowing them to browse, search, and use any instructor ancillary content in our vast library at no additional cost to the instructor or students. Students enjoy SSO access to a variety of free items (e.g., quizzes, flash cards, narrated presentations, etc.) and subscription-based products (e.g., McGraw-Hill *Connect*). With this program enabled, faculty and students will never need to create another account to access McGraw-Hill products and services. Learn more at www.mhcampus.com.

McGraw-Hill Customer Care Contact Information

At McGraw-Hill, we understand that getting the most from new technology can be challenging. That's why our services don't stop after you purchase our products. You can e-mail our Product Specialists 24 hours a day to get product-training online. Or you can search our knowledge bank of Frequently Asked Questions on our support website. For Customer Support, call **800-331-5094**, e-mail **hmsupport@mcgraw-hill.com**, or visit **www.mhhe.com/support**. One of our Technical Support Analysts will be able to assist you in a timely fashion.

McGraw-Hill's Expanded Management Asset Gallery! For Business Communication

McGraw-Hill/Irwin is excited to now provide a one-stop-shop for our wealth of assets, making it super quick and easy for instructors to locate specific materials to enhance their courses.

All of the following can be accessed within the Management Asset Gallery:

Manager's Hot Seat

This interactive, video-based application puts students in the manager's hot seat and builds critical thinking and decision-making skills and allows students to apply concepts to real managerial challenges. Students watch as 15 real managers apply their years of experience when confronting unscripted issues such as bullying in the workplace, cyber loafing, globalization, inter-generational work conflicts, workplace violence, and leadership vs. management.

Self-Assessment Gallery

Unique among publisher-provided self-assessments, our 23 self-assessments provide students with background information to ensure that they understand the purpose of the assessment. Students test their values, beliefs, skills, and interests in a wide variety of areas allowing them to personally apply chapter content to their own lives and careers.

Every self-assessment is supported with PowerPoints and an instructor manual in the Management Asset Gallery, making it easy for the instructor to create an engaging classroom discussion surrounding the assessments.

Online Learning Center (OLC)

www.mhhe.com/lockerbc6e

Find a variety of online teaching and learning tools that are designed to reinforce and build on the text content. Students will have direct access to the learning tools, while instructor materials are password-protected.

eBook Options

eBooks are an innovative way for students to save money and to “go green.” McGraw-Hill’s eBooks are typically 40% off the bookstore price. Students have the choice between an online and a downloadable CourseSmart eBook.

Through CourseSmart, students have the flexibility to access an exact replica of their textbook from any computer that has Internet service, without plug-ins or special software, via the online version or to create a library of books on their hard drive via the downloadable version. Access to the CourseSmart eBooks lasts for one year.

FEATURES

CourseSmart eBooks allow students to highlight, take notes, organize notes, and share the notes with other CourseSmart users. Students can also search for terms across all eBooks in their purchased CourseSmart library. CourseSmart eBooks can be printed (five pages at a time).

MORE INFO AND PURCHASE

Please visit www.coursesmart.com for more information and to purchase access to our eBooks. CourseSmart allows students to try one chapter of the eBook, free of charge, before purchase.

Binder Ready Loose-Leaf Text

This full-featured text is provided as an option for the financially strapped student. It is a full 4-color text that's three-hole punched and made available at a discount to students. It is also available in a package with Connect Plus.

Create

Craft your teaching resources to match the way you teach! With McGraw-Hill Create, www.mcgrawhillcreate.com, you can easily rearrange chapters, combine material from other content sources, and quickly upload content you have written, like your course syllabus or teaching notes. Find the content you need in Create by searching through thousands of leading McGraw-Hill textbooks. Arrange your book to fit your teaching style. Create even allows you to personalize your book's appearance by selecting the cover and adding your name, school, and course information. Order a Create book and you'll receive a complimentary print review copy in three to five business days or a complimentary electronic review copy (eComp) via e-mail in about one hour. Go to www.mcgrawhillcreate.com today and register. Experience how McGraw-Hill Create empowers you to teach *your* students *your* way.

Contents

Unit One Building Blocks for Effective Messages 1

Module 1 Business Communication, Management, and Success 2

Will I really have to write? 5

Don't I know enough about communication? 5

What does communication accomplish? 6

The Importance of Listening, Speaking, and Interpersonal Communication 8

The Purposes of Messages in Organizations 8

How much does correspondence cost? 8

What makes a message effective? 9

How should I analyze business communication situations? 10

Building a Critical Skill Thinking Creatively 11

Module 2 Adapting Your Message to Your Audience 19

Building a Critical Skill Understanding What Your Organization Wants 20

Who is my audience? 20

Why is my audience so important? 22

Audience and PAIBOC 22

Audience and the Communication Process 23

What do I need to know about my audience(s)? 24

Analyzing Individuals and Members of Groups 24

Analyzing People in Organizations 27

Now that I have my analysis, what do I do with it? 29

What if my audiences have different needs? 30

How do I reach my audience(s)? 31

Module 3 Communicating Across Cultures 38

What is “culture”? 40

How does culture affect business communication? 40

Values, Beliefs, and Practices 41

Nonverbal Communication 41

Body Language 42

Space 43

Time 44

Oral Communication 45

Writing to International Audiences 48

There are so many different cultures! How can I know enough to communicate? 48

Are differences among generations changing the workplace and how we communicate? 49

Building a Critical Skill Dealing with Discrimination 50

How can I make my documents bias-free? 51

Making Language Nonsexist 51

Making Language Nonracist and Nonagist 53

Talking about People with Disabilities and Diseases 53

Choosing Bias-Free Photos and Illustrations 54

Module 4 Planning, Writing, and Revising 59

Planning 60

Writing 60

Revising 60

Does it matter what process I use? 60

I don't have much time. How should I use it? 61

What planning should I do before I begin writing or speaking? 62

What is revision? How do I do it? 64

Can a grammar checker do my editing for me? 65

I spell-check. Do I still need to proofread? 66

How can I get better feedback? 66

Can I use form letters? 67

Building a Critical Skill Revising after Feedback 68

How can I overcome writer's block and procrastination? 69

Module 5 Designing Documents, Slides, and Screens 73

How should I design paper pages? 74

Use White Space 74

Use Headings 74

Limit the Use of Words Set in All Capital Letters 75

Use No More than Two Fonts in a Single Document 75

Decide Whether to Justify Margins Based on the Situation and the Audience 77

How should I design presentation slides? 78

How should I design web pages? 79

How do I know whether my design works? 79

Building a Critical Skill Using Computers to Create Good Design 80

When should I think about design? 80

Unit Two Creating Goodwill 95

Module 6 You-Attitude 90

How do I create you-attitude in my sentences? 91

1. *Talk about the Reader, Not about Yourself* 91
2. *Refer to the Reader's Request or Order Specifically* 92
3. *Don't Talk about Feelings, Except to Congratulate or Offer Sympathy* 92
4. *In Positive Situations, Use You More Often than I. Use We When It Includes the Reader* 92
5. *Avoid You in Negative Situations* 93

Does you-attitude basically mean using the word *you*? 94

I've revised my sentences. Do I need to do anything else? 94

Building a Critical Skill Seeing Another Point of View 97

Ethically 106

Why do I need to think about tone, politeness, and power? 106

What's the best way to apologize? 108

Module 8 Reader Benefits 112

Why do reader benefits work? 113

How do I identify reader benefits? 113

1. *Think of Feelings, Fears, and Needs that May Motivate Your Reader. Then Identify Features of Your Product or Policy that Meet Those Needs* 113
2. *Identify the Features of Your Product or Policy. Then Think How These Features Could Benefit the Audience* 114

How detailed should each benefit be? 115

How do I decide which benefits to use? 117

1. *Use at Least One Benefit for Each Part of Your Audience* 117
2. *Use Intrinsic Benefits* 117
3. *Use the Benefits You Can Develop Most Fully* 118

Building a Critical Skill Matching the Benefit to the Audience 119

What else do reader benefits need? 120

Module 7 Positive Emphasis 101

How do I create positive emphasis? 102

1. *Avoid Negative Words and Words with Negative Connotations* 102
2. *Focus on What the Reader Can Do Rather than on Limitations* 104
3. *Justify Negative Information by Giving a Reason or Linking It to a Reader Benefit* 105
4. *If the Negative Is Truly Unimportant, Omit It* 105
5. *Bury the Negative Information and Present It Compactly* 105

Building a Critical Skill Using Positive Emphasis

Unit Three Letters, Memos, E-Mail, and Web Writing 125

Module 9 Formats for Letters and Memos 126

How should I set up letters? 127

Building a Critical Skill Creating a Professional Image, 1 130

What courtesy titles should I use? 132

When You Know the Reader's Name and Gender 136

When You Know the Reader's Name but Not the Gender 136

When You Know Neither the Reader's Name Nor Gender 136

How should I set up memos? 137

Module 10 Informative and Positive Messages 143

What's the best subject line for an informative or positive message? 144

Making Subject Lines Specific 145

Making Subject Lines Concise 145

Making Subject Lines Appropriate for the Pattern of Organization 145

How should I organize informative and positive messages? 145

When should I use reader benefits in informative and positive messages? 148

What are the most common kinds of informative and positive messages? 150

Transmittals 150

Confirmations 151

Summaries 151

Adjustments and Responses to Complaints 151

Thank-You and Congratulatory Notes 152

How can I apply what I've learned in this module? 152

Problem 153

Analysis of the Problem 153

Building a Critical Skill Writing a Goodwill Ending 154

Discussion of the Sample Solutions 154

Module 11 Negative Messages 164

What's the best subject line for a negative message? 165

How should I organize negative messages? 165

Giving Bad News to Customers and Other People Outside Your Organization 166

Building a Critical Skill Thinking about the Legal Implications of What You Say 168

Giving Bad News to Superiors 171

Giving Bad News to Peers and Subordinates 172

When should I consider using a buffer? 172

What are the most common kinds of negative messages? 174

Rejections and Refusals 174

Disciplinary Notices and Negative Performance Appraisals 175

Layoffs and Firings 175

How can I apply what I've learned in this module? 175

Problem 176

Analysis of the Problem 177

Discussion of the Sample Solutions 178

Module 12 Persuasive Messages 187

What is the best persuasive strategy? 188

What is the best subject line for a persuasive message? 189

How should I organize persuasive messages? 190

Writing Direct Requests 191

Organizing Problem-Solving Messages 191

How do I identify and overcome objections? 193

What other techniques can make my messages more persuasive? 196

Build Credibility 196

Build Emotional Appeal 196

Use the Right Tone 197

Building a Critical Skill Building Common Ground 198

Offer a Reason for the Reader to Act Promptly 198

What are the most common kinds of persuasive messages? 199

Orders 199

Collection Letters 199

Performance Appraisals 200

Letters of Recommendation 202

How can I apply what I've learned in this module? 203

Problem 203

Analysis of the Problem 204

Discussion of the Sample Solutions 204

Module 13 E-Mail Messages, Web Writing, and Technology 217

How should I set up e-mail messages? 219

What kinds of subject lines should I use for e-mail messages? 220

Subject Lines for Informative and Positive E-Mail Messages 222

Subject Lines for Negative E-Mail Messages 222

Subject Lines for Persuasive E-Mail Messages 223

Should I write e-mail messages the same way I write paper messages? 223

Writing Positive and Informative E-Mail Messages 223

Writing Negative E-Mail Messages 223

Writing Persuasive E-Mail Messages 224

Building a Critical Skill Managing Your Time 225

What e-mail "netiquette" rules should I follow? 226

How and when should I use attachments? 226

What style should I use when writing for the web? 226

Can I use blogging on the job? 227

Can I use social networking tools for business situations? 228

Facebook and MySpace 229

Spoke and LinkedIn 229

Twitter 230

YouTube 230

What other technologies use the Internet? 230

Unit Four Polishing Your Writing 237

Module 14 Editing for Grammar and Punctuation 238

- Building a Critical Skill** Creating a Professional Image, 2 239
- What grammatical errors do I need to be able to fix? 239
- Agreement* 239
 - Case* 241
 - Dangling Modifier* 242
 - Misplaced Modifier* 242
 - Parallel Structure* 242
 - Predication Errors* 243
- How can I fix sentence errors? 243
- Comma Splices* 243
 - Run-On Sentences* 244
 - Fused Sentences* 244
 - Sentence Fragments* 244
- Should I put a comma every place I'd take a breath? 245
- What punctuation should I use inside sentences? 245
- Apostrophe* 245
 - Colon* 247
 - Comma* 247
 - Dash* 248
 - Hyphen* 248
 - Parentheses* 249
 - Period* 249
 - Semicolon* 249
- What do I use when I quote sources? 249
- Quotation Marks* 250
 - Square Brackets* 250
 - Ellipses* 250
 - Underlining and Italics* 250
- How should I write numbers and dates? 251
- How do I mark errors I find in proofreading? 251

Module 15 Choosing the Right Word 256

Does using the right word really matter? 257

Getting Your Meaning Across 257

Getting the Response You Want 257

Building a Critical Skill Thinking Critically 259

How do words get their meanings? 260

Is it OK to use jargon? 260

What words confuse some writers? 261

Module 16 Revising Sentences and Paragraphs 271

What is “good” style? 272

Building a Critical Skill Using the Right Tone 273

Are there rules I should follow? 273

What should I look for when I revise sentences? 274

1. *Use Active Verbs Most of the Time* 274
2. *Use Verbs to Carry the Weight of Your Sentence* 275
3. *Tighten Your Writing* 276
4. *Vary Sentence Length and Sentence Structure* 277
5. *Use Parallel Structure* 280
6. *Put Your Readers in Your Sentences* 281

What should I look for when I revise paragraphs? 281

1. *Begin Most Paragraphs with Topic Sentences* 281
2. *Use Transitions to Link Ideas* 282

How does organizational culture affect style? 282

Unit Five Interpersonal Communication 287

Module 17 Listening 288

What do good listeners do? 289

Pay Attention 289

Focus on the Other Speaker(s) in a Generous Way 290

Avoid Making Assumptions 290

Listen for Feelings as Well as Facts 290

What is active listening? 291

How do I show people that I’m listening to them? 292

Can I use these techniques if I really disagree with someone? 292

Building a Critical Skill Leading by Listening 293

Module 18 Working and Writing in Teams 297

What kinds of messages should groups attend to? 298

What roles do people play in groups? 299

Leadership in Groups 300

<i>Characteristics of Successful Student Groups</i>	300
Building a Critical Skill	Leading Without Being Arrogant
<i>Peer Pressure and Groupthink</i>	301
How should we handle conflict?	302
<i>Steps in Conflict Resolution</i>	302
<i>Responding to Criticism</i>	304
<i>You-Attitude in Conflict Resolution</i>	305
How can we create the best co-authored documents?	306
<i>Planning the Work and the Document</i>	307
<i>Composing the Drafts</i>	307
<i>Revising the Document</i>	307
<i>Editing and Proofreading the Document</i>	307
<i>Making the Group Process Work</i>	308
Module 19	Planning, Conducting, and Recording Meetings
What planning should precede a meeting?	313
When I'm in charge, how do I keep the meeting on track?	316
What decision-making strategies work well in meetings?	316
Building a Critical Skill	Networking
How can I be an effective meeting participant?	318
What should go in meeting minutes?	319

Unit Six Research, Reports, and Visuals 341

Module 21	Proposals and Progress Reports
What is a “report”?	343
What should I do before I write a proposal?	343
What should go in a proposal?	345
<i>Proposals for Class Research Projects</i>	346
<i>Sales Proposals</i>	351
Building a Critical Skill	Identifying “Hot Buttons”
<i>Proposals for Funding</i>	352
<i>Figuring the Budget and Costs</i>	352
What should go in a progress report?	353

Business Communication, Management, and Success

LEARNING OBJECTIVES

Module 1 explores with you the importance of communication in the business world. After completing the module, you should be able to

- | | | | |
|---------------|--|---------------|---|
| LO 1-1 | Recognize myths about on-the-job writing. | LO 1-4 | Understand costs for business communication. |
| LO 1-2 | Distinguish business communication from other school writing. | LO 1-5 | Define criteria for effective messages. |
| LO 1-3 | Explain accomplishments through communication. | LO 1-6 | Apply strategies for communication analysis. |
| | | LO 1-7 | Apply strategies for creative thinking. |

If a word could sum up life in the early 21st century, it would be “change.”

Changes to politics, diversity, education, technology, fuel costs, and business practices have altered the pace and quality of our lives. While change is ever constant, the scope of change over the past decade has been startling. Consider how with a cell phone and Internet connection, one person now can run a business globally or how workers can be employed from overseas or from the local labor pool. More students are going to college than ever before, millions of American workers are becoming eligible to retire, and millions of new workers are entering the job market—some with very different expectations than those of previous generations.

Americans, and indeed much of the world’s population, also felt the stunning economic turbulence that erupted in the first decade of the 21st century. Foreclosures soared, unemployment rose past 10%, and foreign-born workers with H-1B visas found themselves heading back to their home countries for greener pastures.¹

Unless you have a fairy godmother, you'll need to know how to communicate.

Copyright © 1993 Warren Miller/The New Yorker Collection, www.cartoonbank.com.

As this book goes to press, the U.S. economy continues to improve, but for millions of Americans struggling to make ends meet, the improvements have yet to affect their day-to-day lives. At least one thing is clear, though: workers with high-level skills and education continue to have the best chance of weathering the economic turbulence.

For instance, at the same time there were more than 600,000 job openings in education and health services, there were only 67,000 openings in construction. A lack of talent caused many jobs in the former—which typically require a higher level of education—to go unfilled.²

Of course, no one is immune to the problems. There are plenty of skilled employees who are unemployed or underemployed. Data suggest that college graduates under the age of 25 and with bachelor's degrees are facing one of the bleakest job markets in years.³ But you increase your chances of success with the more you know and the more you can do. In particular, "soft skills," such as communication skills, become even more important as prospective employers scrutinize job applications.

Many Americans are challenged, however, by their level of English-language literacy. The last large-scale study of U.S. literacy by the National Endowment for the Arts, for instance, found that more American adults are not even reading one book a year, and the number of adults with bachelor's degrees deemed proficient in reading prose dropped from 40% to 31% in a decade.⁴ A literacy study funded by the Pew Charitable Trust found that more than half of graduating students at four-year colleges and 75% at two-year colleges lack the literacy to handle complex, real-life tasks, such as analyzing news stories and understanding credit card offers.⁵

Work requires communication. People communicate to plan products and services; hire, train, and motivate workers; coordinate manufacturing and delivery; persuade customers to buy; and bill them for the sale. For many business, nonprofit, community, and government organizations, the "product" is information or a service rather than something tangible. Information and services are created and delivered by communication. In every organization, communication is the way people get their points across, get work done, and get recognized for their contributions.

Carnegie Speech is among companies providing English language training in an age of globalization, in this case to pilots who are non-native speakers of English. Beyond reading and writing, pilots must be able to pronounce words sufficiently so there is no confusion with the control tower. The potential for disaster is great enough that the United Nations issued new recommendations to improve English-language acquisition, citing past accidents where the lack of proficiency in English was a factor.

Source: Joe Sharkey, "English Skills a Concern as Global Aviation Grows," *The New York Times*, May 21, 2012, http://www.nytimes.com/2012/05/22/business/english-skills-a-concern-as-global-aviation-grows.html?_r=1.

A National Association of Colleges and Employers survey revealed that the ability to work in a team structure and to verbally communicate with persons inside and outside the organization topped the list of skills employers want in job candidates. The findings dovetail with those of the Partnership for 21st Century Skills, which found that 99% of people surveyed felt that success in the global economy depends on developing critical thinking and analytical skills, with 88% of those surveyed feeling that schools should also focus on teaching such skills as communication. Of the 14 skill sets offered for ranking, reading comprehension rated the highest in importance.

Sources: "Job Outlook: The Candidate Skills/Qualities Employers Want," The National Association of Colleges and Employers, October 26, 2011, http://www.naceweb.org/s10262011/candidate_skills_employer_qualities/; and "Beyond the Three Rs: Voter Attitudes Toward 21st Century Skills (Key Findings)," November 23, 2007, The Partnership for 21st Century Skills, www.21stcenturyskills.org/documents/p21_pollreport_2pg.pdf.

Communication takes many forms. **Verbal communication**, or communication that uses words, includes

- Face-to-face or phone conversations
- Meetings
- Text, e-mail, and voice-mail messages
- Letters and memos
- Reports

Nonverbal communication does not use words. Examples include

- Pictures
- Company logos
- Gestures and body language
- Who sits where at a meeting
- How long someone keeps a visitor waiting

Even in your first job, you'll communicate. You'll read information; you'll listen to instructions; you'll ask questions; you may solve problems with other workers in teams. In a manufacturing company, hourly workers travel to a potential customer to make oral sales presentations. In an insurance company, clerks answer customers' letters. Even "entry-level" jobs require high-level skills in reasoning, mathematics, and communicating. As a result, communication ability consistently ranks first among the qualities that employers look for in college graduates.⁶

Experts predict that globalization will continue to revolutionize business and industry throughout the upcoming years, transforming economies in the process. Here, workers inspect a tanker at Hyundai Heavy Industries, Inc., a South Korean manufacturer of industrial robots, construction equipment, and electric and electronic systems that is also the world's largest shipbuilder. For companies with an eye toward being global leaders, effective communication is vital, whether to ensure smooth operations, cultivate strong relationships with diverse clients, or increase market share in a competitive environment. Of course, organizations with more local aspirations benefit from effective communication, too!

Communication affects all levels of work. Training specialists Brad Humphrey and Jeff Stokes identify communication skills as being among the most important for modern supervisors.⁷ Andrew Posner, a career counselor, advises that employees looking to make a career change need such “transferable skills” as the ability to “analyze, write, persuade, and manage.”⁸

Employers clearly want employees who communicate well, yet a staggering 40 million people in the United States alone have limited literacy skills, including some college graduates.⁹ According to one report by the College Board’s National Commission on Writing, states spend more than \$220 million annually on remedial writing training for their employees, and corporations may spend \$3.1 billion to fix problems from writing deficiencies; two-thirds of private-sector employers surveyed said writing was an important responsibility for employees.¹⁰

Because writing skills are so valuable, good writers earn more. Linguist Stephen Reder has found that among people with two- or four-year degrees, workers in the top 20% of writing ability earn, on average, more than three times as much as workers whose writing falls into the worst 20%.¹¹

The conclusion is simple: Good communication skills are vital in today’s workplace. Technology, especially through e-mail, instant messaging, and cell phones, is making the globe a smaller and busier place, one where messages must be understood immediately. Traditional paper messages flourish, even as electronic channels expand our ability to reach more people. The better an employee’s communication skills are, the better his or her chance for success.

For U.S. elementary and middle school students, significant gains in math and science on standardized tests have been offset by only modest gains in reading skills. In 1992, for instance, 29% of fourth-grade students were proficient in reading, but nearly 20 years later, that number had risen only five percentage points. There were no gains at all from 2008 to 2009.

Source: Sam Dillon, “Since 1990s, U.S. Students’ Math Has Sharpened, But Reading Lags,” *The New York Times*, November 1, 2011, <http://www.nytimes.com/2011/11/02/education/us-students-math-skills-sharpen-but-reading-lags.html>.

Will I really have to write? LO 1-1

- Yes. A lot.

Claims that people can get by without writing are flawed.

Claim 1: Secretaries will do all my writing.

Reality: Because of automation and restructuring, secretaries and administrative assistants are likely to handle complex tasks such as training, research, and database management for several managers. Managers are likely to take care of their own writing, data entry, and phone calls.¹²

Claim 2: I’ll use form letters or templates when I need to write.

Reality: A **form letter** is a prewritten fill-in-the-blank letter designed to fit standard situations. Using a form letter is OK if it’s a good letter. But form letters cover only routine situations. The higher you rise, the more frequently you’ll face situations that aren’t routine and that demand creative solutions.

Claim 3: I’m being hired as an accountant, not a writer.

Reality: Almost every entry-level professional or managerial job requires you to write e-mail messages, speak to small groups, and write paper documents. People who do these things well are more likely to be promoted beyond the entry level.

Claim 4: I’ll just pick up the phone.

Reality: Important phone calls require follow-up letters, memos, or e-mail messages. People in organizations put things in writing to make themselves visible, to create a record, to convey complex data, to make things convenient for the reader, to save money, and to convey their own messages more effectively. “If it isn’t in writing,” says a manager at one company, “it didn’t happen.” Writing is an essential way to make yourself visible, to let your accomplishments be known.

Some research has found less correlation between college majors and success in the workplace than might be expected. A study by Payscale, Inc., for instance, found that history majors who pursued business careers earned as much on average as those who majored in business. Much to the chagrin of his father, CNN’s Ted Turner majored in Classics, and Michael Eisner, former head of The Walt Disney Company and at one time the highest-paid executive in the U.S., graduated with a Bachelor’s Degree in English. George Brown College found that “most employers cite communication skills as the most important skill

(continued)

Don’t I know enough about communication? LO 1-2

- *Business communication differs from other school writing.*

Although both business communication and other school writing demand standard edited English, in other ways the two are very different.

to test your interpersonal skills.

The National Assessment of Adult Literacy, a study by the U.S. Department of Education, showed that Mississippi has improved adult literacy in every one of its counties. Some other states, however, saw an increase in adult illiteracy, and one in seven U.S. adults is challenged to read anything more complex than a child's picture book.

Source: Greg Toppo, “Literacy Study: 1 in 7 Adults are Unable to Read this Story,” *USA Today*, January 8, 2009, http://www.usatoday.com/news/education/2009-01-08-adult-literacy_N.htm.

Purpose

- The purpose of school writing is usually to show that you have learned the course material and to demonstrate your intelligence.
- The purpose of business communication is to meet an organizational need. No one will pay you to write something that he or she already knows.

Audience

- The audiences for school writing are limited: usually just the instructor and the other students. The real audience is “an educated person.” Even if the instructor disagrees with your views, if they are well-supported, the paper can earn a good grade. The instructor is paid, in part, to read your papers and will read them even if they are boring.
- The audiences for business communication include people both inside and outside the organization (►► Module 2). Real audiences pay attention to messages only if they seem important, relevant, and interesting.

Information

- Information in school writing may be new to you but is rarely new to your instructor.
- Information in business communication is usually new to your reader. (If it isn’t, you have to work extra hard to make it interesting.)

Organization

- School writing often follows the traditional essay form, with a thesis statement up front, paragraphs of evidence, and a final concluding paragraph.
- Business communication is organized to meet the psychological needs of the reader. Most often, the main point comes up front (►► Modules 10–12).

Style

- The style for school writing is often formal. Big words and long sentences and paragraphs are often rewarded.
- The style for business communication is friendly, not formal. Short words and a mix of sentence and paragraph lengths are best (►► Modules 15 and 16).

Document Design

- School writing often rewards long paragraphs. Papers are often double spaced, with no attention to visual design.
- Businesspeople want to be able to skim documents. Headings, lists, and single-spaced paragraphs with double spacing between paragraphs help readers find information quickly (►► Module 5).

Visuals

- Except for math, construction, and engineering, few classes expect writing to contain anything other than words.
- Business writers are expected to choose the most effective way to convey information. Even a one-page memo may contain a table, graph, or other visual. You’ll be expected to be able to use computer programs to create graphs, visuals, and slides for presentations (►► Modules 5, 20, and 25).

What does communication accomplish? LO 1-3

- *Management happens through communication.*

According to Henry Mintzberg, managers have three basic jobs: to collect and convey information, to make decisions, and to promote interpersonal unity—that is, to make people want to work together to achieve organizational goals.¹³ All of these jobs happen through communication. Effective managers are able to use a wide variety of media and

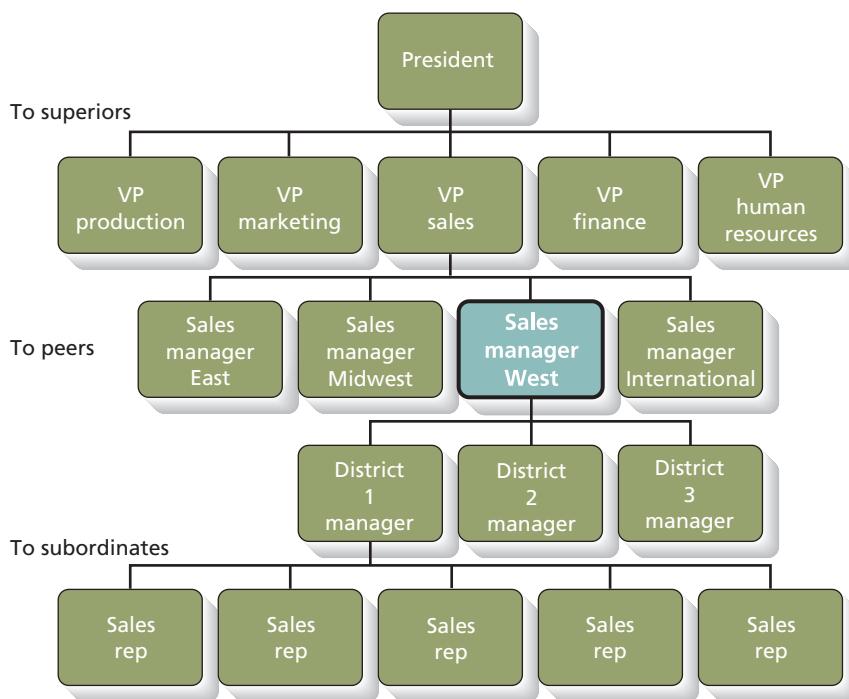

Figure 1.1 The Internal Audiences of the Sales Manager—West

strategies to communicate. They know how to interpret comments from informal channels such as the company grapevine; they can speak effectively in small groups and in formal presentations; they write well.

Communication—oral, nonverbal, and written—goes to both internal and external audiences. **Internal audiences** (Figure 1.1) are other people in the same organization: subordinates, superiors, peers. **External audiences** (Figure 1.2) are people outside the organization: customers, suppliers, unions, stockholders, potential employees, government agencies, the press, and the general public.

Word-of-mouth rather than traditional advertising has fueled sales of Tesla Motors' electric cars.

The Importance of Listening, Speaking, and Interpersonal Communication

Informal listening, speaking, and working in groups are just as important as writing formal documents and giving formal oral presentations. As a newcomer in an organization, you'll need to listen to others both to find out what you're supposed to do and to learn about the organization's values and culture. Informal chitchat, both about yesterday's game and about what's happening at work, connects you to the **grapevine**, an informal source of company information. You may be asked to speak to small groups, either inside or outside your organization.¹⁴ Networking with others in your office and in town and working with others in workgroups will be crucial to your success.

Internal and External Audiences

Internal Audiences

Are other people in the same organization: subordinates, superiors, peers.

External Audiences

Are people outside the organization: customers, suppliers, unions, stockholders, potential employees, government agencies, the press, and the general public.

The Purposes of Messages in Organizations

Messages in organizations have one or more of **three basic purposes**: to inform, to request or persuade, and to build goodwill. When you **inform**, you explain something or tell readers something. When you **request or persuade**, you want the reader to act. The word *request* suggests that the action will be easy or routine; *persuade* suggests that you will have to motivate and convince the reader to act. When you **build goodwill**, you create a good image of yourself and of your organization—the kind of image that makes people want to do business with you.

Most messages have multiple purposes.

- When you answer a question, you're informing, but you also want to build goodwill by suggesting that you're competent and perceptive and that your answer is correct and complete.
- In a claims adjustment, whether your answer is yes or no, you want to suggest that the reader's claim has been given careful consideration and that the decision is fair, businesslike, and justified.
- To persuade, a résumé gives information to prove that you're qualified for the job and uses layout to emphasize your strong points and build a good image of you.

How much does correspondence cost? LO 1-4

- \$21.15 a page—even more if it doesn't work.

Writing costs money. Besides the cost of paper, computers, and software, there is the major expense: employees' time. A consultant who surveyed employees in seven industries found that to prepare a one-page letter, most of them spent 54 minutes planning, composing, and revising the letter. According to the most recent figures from the U.S. Labor Department, employers paid an average of \$23.50 per hour per employee for wages and benefits. At that rate, an employer would pay \$21.15 for an employee's time spent writing a typical letter.¹⁵ One company in Minneapolis sends out 3,000 original letters a day—worth more than \$66,000 at the average rate. A first-class stamp on each letter would add another \$1,000 to the company's daily expenses.

In many organizations, all external documents must be approved before they go out. A document may **cycle** from writer to superior to writer to another superior to writer again three or four or many more times before it is finally approved. The cycling process increases the cost of correspondence.

Longer documents can involve large teams of people and take months to write. An engineering firm that relies on military contracts for its business calculates that it spends \$500,000 to put together an average proposal and \$1 million to write a large proposal.¹⁶

Poor correspondence costs even more. When writing isn't as good as it could be, you and your organization pay a price in wasted time, wasted efforts, and lost goodwill.

The international nonprofit organization ProLiteracy estimates that \$60 billion is lost annually by American businesses due to issues stemming from illiteracy.

Source: Robert Roy Britt, "14 Percent of U.S. Adults Can't Read," *Livescience*, January 10, 2009, downloaded at <http://www.livescience.com/culture/090110-illiterate-adults.html>.

Bad writing wastes time by

- Taking more time to read.
- Requiring more time to revise and causing more rounds of revision.
- Confusing ideas so that discussions and decisions are needlessly drawn out.
- Delaying action while the reader asks for more information or tries to figure out the meaning.

Ineffective messages don't get results. A reader who has to guess what the writer means may guess wrong. A reader who finds a letter or memo unconvincing or insulting simply won't do what the message asks. Thus, second and third and fourth requests are necessary.

Whatever the literal content of the words, every letter, memo, and report serves either to enhance or to damage the image the reader has of the writer. Poor messages damage business relationships.

Good communication is worth every minute it takes and every penny it costs. For instance, the consulting firm Watson Wyatt Worldwide conducted research showing greater returns to shareholders in companies with the most effective programs for communicating with their employees. Those companies also enjoyed lower employee turnover and a 30% increase in their stocks' market value.¹⁷

A typo may have led to the Wall Street chaos in 2010 that ultimately cost investors billions of dollars. At heart was a \$16 million trade in Procter & Gamble stock, but someone entered it as \$16 billion instead. In just 15 minutes, the Dow Jones average sank more than 700 points, losing nearly 1,000 points before finally stabilizing at a loss of 347 points.

Source: David Louie, "Typo May Have Been Cause of Market Meltdown," ABC Channel 7 News, May 7, 2010, <http://abclocal.go.com/kgo/story?section=news/business&id=7427822>.

What makes a message effective? LO 1-5

- Good messages meet five criteria.

Good business and administrative writing

- **Is clear.** The meaning the reader gets is the meaning the writer intended. The reader doesn't have to guess.
- **Is complete.** All of the reader's questions are answered. The reader has enough information to evaluate the message and act on it.
- **Is correct.** All of the information in the message is accurate. The message is free from errors in punctuation, spelling, grammar, word order, and sentence structure.
- **Saves the reader's time.** The style, organization, and visual impact of the message help the reader to read, understand, and act on the information as quickly as possible.
- **Builds goodwill.** The message presents a positive image of the writer and his or her organization. It treats the reader as a person, not a number. It cements a good relationship between the writer and the reader (►► Modules 6–8).

Whether a message meets these five criteria depends on **the interactions among the writer, the audience, the purposes of the message, and the situation**. No single set of words will work in all possible situations.

Better writing helps you to

- **Save time.** Reduce reading time, since comprehension is easier. Eliminate the time now taken to rewrite badly written materials. Reduce the time taken asking writers, "What did you mean?"
- **Make your efforts more effective.** Increase the number of requests that are answered positively and promptly—on the first request. Present your points—to other people in your organization; to clients, customers, and suppliers; to government agencies; to the public—more forcefully.
- **Communicate your points more clearly.** Reduce the misunderstandings that occur when the reader has to supply missing or unclear information. Make the issues clear, so that disagreements can surface and be resolved more quickly.
- **Build goodwill.** Build a positive image of your organization. Build an image of yourself as a knowledgeable, intelligent, capable person.

Central Connecticut State University (CCSU) determined that Washington, D.C., is the most literate city in the United States with a population greater than 250,000, followed by Seattle, Minneapolis, Atlanta, and Boston. While Seattle often tops many lists of literate cities, the CCSU study included web traffic with more traditional factors as education level, bookstore number, library access, and periodical readership. The study's author, John W. Miller, found no correlation between literacy and a city's wealth.

Source: John Metcalf, "America's Most Literate Cities Not Necessarily the Wealthiest," *The Atlantic*, January 26, 2012, <http://www.theatlanticcities.com/arts-and-lifestyle/2012/01/americas-most-literate-cities-not-necessarily-wealthiest/1063/#>.

How should I analyze business communication situations? LO 1-6

► Try PAIBOC.

Before you write or speak, you need to understand the situation. Ask yourself the following questions:

- **What's at stake—to whom?** Think not only about your own needs but about the concerns your boss and your readers will have. Your message will be most effective if you think of the entire organizational context—and the larger context of shareholders, customers, and regulators. When the stakes are high, you'll need to take into account people's emotional feelings as well as objective facts.
- **Should you send a message?** Sometimes, especially when you're new on the job, silence is the most tactful response. But be alert for opportunities to learn, to influence, to make your case. You can use communication to build your career.
- **What channel should you use?** Paper documents and presentations are formal and give you considerable control over the message. E-mail, phone calls, and stopping by someone's office are less formal. Oral channels are better for group decision making, allow misunderstandings to be cleared up more quickly, and seem more personal. Sometimes you may need more than one message, in more than one channel.
- **What should you say?** Content for a message may not be obvious. How detailed should you be? Should you repeat information that the audience already knows? The answers will depend upon the kind of document, your purposes, your audiences, and the corporate culture. And you'll have to figure these things out for yourself, without detailed instructions.
- **How should you say it?** How you arrange your ideas—what comes first, what second, what last—and the words you use shape the audience's response to what you say.

When you're faced with a business communication situation, you need to develop a solution that will both **solve the organizational problem and meet the psychological needs of the people involved**. The strategies in this section will help you solve the problems in this book. Almost all of these strategies can also be applied to problems you encounter on the job.

- **Understand the situation.** What are the facts? What additional information might be helpful? Where could you get it?
- **Brainstorm solutions.** Consciously develop several solutions. Then measure them against your audience and purposes: Which solution is likely to work best?

Instant Replay

Documents' Purposes

Documents in organizations have three basic purposes: to inform, to request or persuade, and to build goodwill.

Most documents have more than one purpose.

Instant Replay

Criteria for Effective Messages

Good business and administrative writing is clear, complete, and correct. It saves the reader time, and it builds goodwill.

Whether a message meets these five criteria depends on the **interactions among the writer, the audience, the purposes of the message, and the situation**. No single set of words will work in all possible situations.

People communicate to plan products and services; hire, train, and motivate workers; coordinate manufacturing and delivery; persuade customers to buy; bill them for the sale; and communicate with stakeholders. The Iowa chapter of the Sierra Club honored the Davenport Alcoa plant for its innovative environmental programs. Pictured here is Alcoa employee Shannon Saliard.

Thinking Creatively LO 1-7

Creativity is essential to success in business and business communication. Here are some examples.

- In a risky move, Apple Computer branched into portable digital music players, a market in which it had no significant experience. The results were the iPod, now the de facto standard, and iTunes, a popular online music store. The company then gambled on the iPhone, iTunes Movie Rentals, the MacBook Air, and the iPad, an electronic tablet that Apple touted as “Our most advanced technology in a magical and revolutionary device at an unbelievable price.” To maintain its dominance, Apple must continue to innovate.
- W.L. Gore & Associates, maker of GORE-TEX fabrics and Glide dental floss, was named Most Innovative Company by *Fast Company* magazine. Organized more like a university than a corporation, the company prefers egalitarian teams to boss-driven departments, mixes researchers with salespeople and production workers, and prefers small buildings on minicampuses to gigantic complexes. The \$1.6 billion company is the brainchild of Wilbert L. Gore, who believed “communication really happens in the carpool,” where hierarchies don’t stifle free expression.

Thinking creatively often means shedding common paradigms. For instance, when the fledgling Cartoon Network decided to offer programming aimed at 18- to 34-year-olds, it sought writers and producers who ignored standard marketing practice and instead envisioned a block of shows they’d watch.

The result was *Adult Swim*, an after-hours cavalcade of hip satires like *Futurama* and *The Venture Brothers* mixed with Japanese anime series and off-the-wall comedies like *Family Guy* and *Aqua Teen Hunger Force*. During commercial breaks, postmodern spots advertised upcoming shows or challenged viewers’ trivia knowledge. Soon, *Adult Swim* was beating the competition—chiefly Jay Leno and David Letterman.

Ways to become more creative include brainstorming, working within limits, and consciously seeking problems or dissonances that need work.

IBM’s tips for creativity are even more diverse. Some of them include

- Have a constructive argument.
- Brainstorm with someone 10 years older and someone 10 years younger.
- Clean your desk.
- Come in early—enjoy the quiet.
- Leave the office. Sit with just a pencil and a pad of paper. See what happens.

Question “conventional wisdom,” which can rely on myths and stereotypes. Conventional wisdom argues, for instance, that people naturally side with others along racial, ethnic, gender, religious, or socioeconomic lines. Yet, Asian Americans, even those with Chinese ancestors, are at a disadvantage teaching English in China, where Caucasians, regardless of qualifications, are in demand. Barack Obama was the big Democratic winner in the 2008 Iowa Caucus, which had a record turnout of 236,000 voters and was held in a state that is more than 90% white. And Harvard Business School’s Noam Wasserman found that by the time a start-up company has raised its third round of funding, 52% of founder CEOs have been replaced, with three-quarters of them fired by the board. The most successful of founders were actually the first ones to get fired.

Figure 1.3 PAIBOC Questions for Analysis

Use the PAIBOC questions to analyze business communication problems:

- P What are your **purposes** in writing or speaking?
- A Who is (are) your **audience(s)**? How do members of your audience differ? What characteristics are relevant to this particular message?
- I What **information** must your message include?
- B What reasons or reader **benefits** can you use to support your position?
- O What **objection(s)** can you expect your reader(s) to have? What negative elements of your message must you deemphasize or overcome?
- C How will the **context** affect reader response? Think about your relationship to the reader, morale in the organization, the economy, the time of year, and any special circumstances.

- **If you want to add or change information, get permission first.** If you have any questions about ideas you want to use, *ask your instructor*. He or she can tell you *before* you write the message.

When you use this book to create messages on the job, you can't change facts. That is, if it's October, you can't pretend that it's April just because it may be easier to think of reader benefits for that time of year. But it may be possible to change habits that your company has fallen into, especially if they no longer serve a purpose. Check with your supervisor to make sure that your departure from company practice is acceptable.

- **Use the PAIBOC questions in Figure 1.3 to analyze your purpose, your audience, and the situation.**

As Figure 1.3 shows, PAIBOC offers an acronym for the questions you need to answer before you begin composing your message. The following discussion lists specific questions you can answer: ►► Modules 10, 11, and 12 for examples of answers to these questions for specific situations.

- P **What are your purposes** in writing or speaking?

What must this message do to solve the organizational problem? What must it do to meet your own needs? What do you want your readers to do? To think or feel? List all your purposes, major and minor. Specify *exactly* what you want your reader to know, think, or do. Specify *exactly* what kind of image of yourself and of your organization you want to project.

Even in a simple message, you may have several related purposes: to announce a new policy, to make readers aware of the policy's provisions and requirements and to have them think that the policy is a good one, that the organization cares about its employees, and that you are a competent writer and manager.

- A **Who is (are) your audience(s)**? How do the members of your audience differ from each other? What characteristics are relevant to this particular message?

How much does your audience know about your topic? How will audience members respond to your message? Some characteristics of your readers will be irrelevant; focus on ones that matter *for this message*. Whenever you write to several people or to a group (like a memo to all employees), try to identify the economic, cultural, or situational differences that may affect how various subgroups respond to what you have to say.

- I **What information** must your message include?

Make a list of the points that must be included; check your draft to make sure you include them all. If you're not sure whether a particular fact must be included, ask your instructor or your boss.

To include information without emphasizing it, put it in the middle of a paragraph or document and present it as briefly as possible.

- B **What reasons or reader benefits** can you use to support your position?

Brainstorm to develop reasons for your decision, the logic behind your argument, and possible benefits to readers if they do as you ask. Reasons and reader benefits do not have to be monetary. Making the reader's job easier or more pleasant is a good reader benefit. In an informative or persuasive message, identify at least five reader benefits. In your message, use those you can develop most easily and most effectively.

Be sure the benefits are adapted to your reader. Many people do not identify closely with their companies; the fact that the company benefits from a policy will help the reader only if the savings or profit is passed directly on to the employees. That is rarely the case: Savings and profits are often eaten up by returns to stockholders, bonuses to executives, and investments in plants and equipment or in research and development.

- O **What objections** can you expect your reader(s) to have? What negative elements of your message must you deemphasize or overcome?

Instant Replay

Business communications need both to solve the organizational problem and to meet the psychological needs of the people involved.

Some negative elements can only be deemphasized. Others can be overcome. Be creative: Is there any advantage associated with (even though not caused by) the negative? Can you rephrase or redefine the negative to make the reader see it differently?

- C How will the **context** affect the reader's response? Think about your relationship to the reader, morale in the organization, the economy, the time of year, and any special circumstances.

Readers may like you or resent you. You may be younger or older than the people you're writing to. The organization may be prosperous or going through hard times; it may have just been reorganized or may be stable. All these different situations will affect what you say and how you say it.

Think about the news, the economy, the weather. Think about the general business and regulatory climate, especially as it affects the organization specified in the problem. Use the real world as much as possible. Think about interest rates, business conditions, and the economy. Is the industry in which the problem is set doing well? Is the government agency in which the problem is set enjoying general support? Think about the time of year. If it's fall when you write, is your business in a seasonal slowdown after a busy summer? Gearing up for the Christmas shopping rush? Or going along at a steady pace unaffected by seasons?

To answer these questions, draw on your experience, your courses, and your common sense. You may want to talk to other students or read *The Wall Street Journal* or look at a company's annual report. Sometimes you may even want to phone a local business person to get information. For instance, if you needed more information to think of reader benefits for a problem set in a bank, you could call a local banker to find out what kinds of services it offers customers and what its rates are for loans.

The remaining modules in this book will show you how to use this analysis to create business messages that meet your needs, the needs of the reader, and the needs of the organization.

www.netflix.com

Netflix made video rentals easier by establishing a monthly fee and eliminating late charges. Later, the company made rentals available by allowing customers to watch them online.

Writing, scholars believe, was invented to record inventories of livestock and grain to calculate taxes.

Source: Denise Schmandt-Besserat, "The Earliest Precursor of Writing," *Scientific American*, 238, no. 6 (1978): 50-59.

Bob Kellaher, a manager of customer service operations at the New Haven Post Office, collects a last-minute tax return. Kellaher dresses as Uncle Sam every year and stands outside the post office collecting tax forms and mail. Because tax season is a particularly stressful time for individuals filing tax returns, even government organizations such as the U.S. Postal Service can benefit from efforts to foster customer satisfaction.

Summary of Learning Objectives

- Communication helps organizations and the people in them achieve their goals. The ability to write and speak well becomes increasingly important as you rise in an organization. (**LO 1-1**)
 - People put things in writing to create a record, to convey complex data, to make things convenient for the reader, to save money, and to convey their own messages more effectively. (**LO 1-2**)
 - **Internal documents** go to people inside the organization. **External documents** go to audiences outside: clients, customers, suppliers, stockholders, the government, the media, the general public. (**LO 1-3**)
 - The three basic purposes of business and administrative communication are **to inform, to request or persuade, and to build goodwill**. Most messages have more than one purpose. (**LO 1-3**)
 - A one-page message that took an hour to plan, write, and revise cost on average \$21.15. Poor writing costs even more since it wastes time, wastes efforts, and jeopardizes goodwill. (**LO 1-4**)
 - Good business and administrative writing meets five basic criteria: it's **clear, complete, and correct; it saves the reader's time; and it builds goodwill**. (**LO 1-5**)
 - To evaluate a specific document, we must know the interactions among the writer, the reader(s), the purposes of the message, and the situation. No single set of words will work for all readers in all situations. (**LO 1-6**)
 - To understand business communication situations, ask the following questions: (**LO 1-6**)
 - What's at stake—to whom?
 - Should you send a message?
- What channel should you use?
 - What should you say?
 - How should you say it?
- Use the PAIBOC question to analyze business communication problems: (**LO 1-6**)
 - P What are your **purposes** in writing or speaking?
 - A Who is (are) your **audience(s)**? How do members of your audience differ? What characteristics are relevant to the particular message?
 - I What **information** must your message include?
 - B What reasons or reader **benefits** can you use to support your position?
 - O What **objection(s)** can you expect your reader(s) to have? What negative elements of your message must you deemphasize or overcome?
 - C How will the **context** affect reader response? Think about your relationship to the reader, morale in the organization, the economy, the time of year, and any special circumstances.
 - A solution to a business communication problem must both solve the organizational problem and meet the needs of the writer or speaker, the organization, and the audience. (**LO 1-6**)
 - To think creatively, brainstorm, work within limits, consciously seek problems that need work, have a constructive argument, clean your desk, come in early, leave the office with a pencil and pad, and question conventional wisdom. (**LO 1-7**)

Assignments for Module 1

Questions for Comprehension

1.1 What are the three basic purposes of business messages? (**LO 1-3**)

1.2 What are the five basic criteria for effective messages? (**LO 1-5**)

1.3 What does PAIBOC stand for? (**LO 1-6**)

Questions for Critical Thinking

1.4 Why do writing and speaking become even more important as people rise in the organization? (**LO 1-1 to LO 1-3**)

1.6 Why do you need to understand the purposes, audience, and context for a message to know whether a specific set of words will work? (**LO 1-2**)

1.5 If you're just looking for a low-level job, why is it still useful to be able to write and speak well? (**LO 1-1 to LO 1-3**)

1.7 What opportunities do you have in volunteer or student organizations to do real "business writing" while you're in school? (**LO 1-5**)

Exercises and Problems

1.8 Discussing Strengths (LO 1-5, LO 1-6)

Introduce yourself to a small group of other students. Identify three of your strengths that might interest an

employer. These can be experience, knowledge, or personality traits (like enthusiasm).

1.9 Introducing Yourself to Your Instructor (LO 1-5, LO 1-6)

Write a memo (at least 1½ pages long) introducing yourself to your instructor. Include the following topics:

- Background: Where did you grow up? What have you done in terms of school, extracurricular activities, jobs, and family life?

- Interests: What are you interested in? What do you like to do? What do you like to think about and talk about?
- Achievements: What achievements have given you the greatest personal satisfaction? List at least five. Include things that gave you a real sense of accomplishment and pride, whether or not they’re the sort of thing you’d list on a résumé.
- Goals: What do you hope to accomplish this term? Where would you like to be professionally and personally five years from now?

1.10 Describing Your Experiences in and Goals for Writing (LO 1-5, LO 1-6)

Write a memo (at least 1½ pages long) to your instructor describing the experiences you’ve had writing and what you’d like to learn about writing during this course.

Answer several of the following questions:

- What memories do you have of writing? What made writing fun or frightening in the past?
- What have you been taught about writing? List the topics, rules, and advice you remember.
- What kinds of writing have you done in school? How long have the papers been?
- How has your school writing been evaluated? Did the instructor mark or comment on mechanics and grammar? Style? Organization? Logic? Content? Audience analysis and adaptation? Have you gotten extended comments on your papers? Have instructors in different classes had the same standards, or have you changed aspects of your writing for different classes?

1.11 Letters to Angry Electric Company Customers (LO 1-5 to LO 1-7)

Your regional electric utility provides power to rural, urban, and suburban customers. Recently, a series of heavy summer rainstorms knocked out electricity to thousands of customers. Because overhead power lines came down—in some cases due to inadequate tree trimming by home owners—some customers were without power for more than a week. In addition to the inconvenience of not having electricity, many customers also had to throw away spoiled food, as well as go without air conditioning on days when temperatures climbed past 90 degrees.

Today, you receive a letter from Harper Henry, a long-time customer and local business leader whose husband, Stephen D’Amico, is a county commissioner. Ms. Henry is

Use complete memo format with appropriate headings. (►► Module 9 for examples of memo format.) Use a conversational writing style; check your draft to polish the style and edit for mechanical and grammatical correctness. A good memo will enable your instructor to see you as an individual. Use specific details to make your memo vivid and interesting. Remember that one of your purposes is to interest your reader!

- What voluntary writing have you done—journals, poems, stories, essays? Has this writing been just for you, or has some of it been shared or published?
- Have you ever written on a job or in a student or volunteer organization? Have you ever typed other people’s writing? What have these experiences led you to think about real-world writing?
- What do you see as your current strengths and weaknesses in writing skills? What skills do you think you’ll need in the future? What kinds of writing do you expect to do after you graduate?

Use complete memo format with appropriate headings. (►► Module 9 for examples of memo format.) Use a conventional writing style; edit your final draft for mechanical and grammatical correctness.

angry that power to her neighborhood was out for four days and that though similar storms have knocked out power in past years, nothing seems to have been done to prepare for future storms. In particular, there is no plan to bury overhead power lines. “Your company puts making money ahead of customer service,” she writes. “You continue to post record profits while putting countless lives at stake, all for the sake of your bottom line.”

The following letters are possible approaches to answering this complaint. How well does each message meet the needs of the reader, the writer, and the organization? Is the message clear, complete, and correct? Does it save the reader’s time? Does it build goodwill?

1.

Dear Sir or Madam:

You opinion is valuable to us, and you can rest assured that we are looking into the problem. Should you have questions or concerns in the future, please do not hesitate to contact us.

2.

Dear Harper:

You’re right — we dropped the ball on this one! But the utility business is an unpredictable one, and only God Himself controls the weather. So, while we deal with the frustration of being mere mortals, you can help us with your patience. Make sure, too, that you trim any trees that are on your property and are close to overhead power lines since falling trees caused a lot of the problems. With any luck, we’ll all be better off in the next storm.

P.S. How funny that someone named Harper would be sending a letter to complain!

3. Dear Mrs. Henry:

The electric utility business is a particularly difficult one. You'd be surprised at all of the variables that come into play. For instance, there are union contracts to negotiate with employees. Did you know that we can't expect a lineman to work more than eight hours in one day without doubling his hourly rate? We also have to provide meals if the work goes beyond 12 hours and overnight accommodations if the worker must travel more than 50 miles from home. All that's just part of the labor issue. Unions are killing this business.

There's also the cost of producing the electricity, meeting the government regulations for clean air in our coal-fired plants, and upkeep of the overhead power lines. As you know, we trim trees that are within 10 feet of any power line, but home owners are responsible for the other trees. Do they trim them? Of course not. Then a good wind comes along and knocks them down, right onto those lines. It's a crazy business, Mrs. Henry, and one that is a miracle to make any money in.

Anyway, we're sorry for the inconvenience you faced. But I'm sure you can now see just how challenging all this is. Think about that the next time you flip a switch. This is what we do so you can have light to read by and television to watch. Your electric company is on your side.

4. Dear Ms. Henry:

Thank you for your recent feedback regarding the power outage to your home.

As you know, the storms that hit this year were particularly powerful. Hundreds of miles of overhead power lines were brought down in a matter of minutes, leaving thousands of customers stranded. Though more than 1,500 extra utility workers from surrounding states were brought in to help restore electricity, clearly we could have done better. Going without electricity for even a few minutes is too long, and we are making strides to improve our service.

We are currently working with local municipalities to explore cost-effective ways to solve this problem. Suggestions from valuable customers like you will help in the effort. As you noted in your letter, burying power lines is an option to consider.

Your loyalty and input will help us to provide even better service to customers.

1.12 Online Messages for Discussion—Responding to Rumors (LO 1-5 to LO 1-7)

The Acme Corporation has been planning to acquire Best Products, and Acme employees are worried about how the acquisition will affect them. Ed Zeplin, Acme's human resource manager, has been visiting the message boards on job search sites like Vault.com and sees a dramatic rise in the number of messages posted by people claiming to be Acme employees. Many of the messages

are spreading rumors about layoffs, and most of the rumors are false.

The following messages are possible responses that Ed can post to the message boards. How well does each message meet the needs of the reader, the writer, and the organization? Is the message clear, complete, and correct? Does it save the reader's time? Does it build goodwill?

1.

It Will Be Great!

Author: L. Ed Zeplin, HR

Date: Tuesday, May 23

I am happy to tell you that the HR news is good. Two months ago, the CEO told me about the merger, and I have been preparing a human resource plan ever since.

I want you to know about this because morale has been bad, and it shouldn't be. You really should wait for the official announcements, and you'll see that the staffing needs will remain strong. My department has been under a lot of pressure, but if you'll be patient, we'll explain everything—the staffing, the compensation.

Our plan should be ready by Monday, and then if you have any questions, just contact your HR rep.

2.

HR Staffing
Author: HR Boss
Date: Tuesday, May 23

The rumors are false. Just ask anyone in HR. There will be no layoffs.

3.

Don't Believe the Rumors
Author: lezeplin@acme.com
Date: Tuesday, May 23

Acme has 475 employees, and Best Products has 132 employees. Our human resource plan for next year calls for 625 employees. If you do the math, you can see that there will be no layoffs. Rather, we will be hiring 20 employees. Of course, as we consolidate operations with Best, there will be some redeployments. However, our plan indicates that we will be able to retain our current staff. All employees are valued at Acme, as our current benefits package testifies.

Our HR plan is based on the best analytic techniques and a business forecast by a top consulting firm. If you're an employee, you should review our business plan, at the Our Goals page on Acme's intranet. Everyone should read Acme's mission statement on our home page, www.acme.com/homepage.html.

4.

Layoff Rumors Do Acme a Disservice
Author: Zeplin in HR
Date: Tuesday, 23 May

If you come here to get your company information, you aren't getting the straight story. The people posting to this discussion board are spreading false rumors, not the truth. If you want to know the truth about Acme, ask the people who have access to the information.

As HR manager, I can assure you we won't be laying off employees after the merger with Best Products. I'm the one who approves the staffing plan, so I should know. If people would ask me, instead of reading the negative, whining lies at this site, they would know the facts, too.

If people really cared about job security, they would be meeting and exceeding their work goals, rather than wasting their time in rumor-mongering on message boards. Hard work: that's the key to success!

5.

The True Story about Lay-Offs
Author: lezeplin@acme.com
Date: Tuesday, 23 May

Whenever there is a merger or acquisition, rumors fly. It's human nature to turn to rumors when a situation seems uncertain. The case of Acme acquiring Best Products is no exception, so I'm not surprised to see rumors about layoffs posted on this message board.

Have no fear! I am working closely with our CEO and with the CEO and human resource manager at Best Products, and we all agree that our current staff is a valuable asset to Acme, to Best, and to our combined companies in the future. We have no plans to lay off any of our valued people. I will continue monitoring this message board and will post messages as I am able to disclose more details about our staffing plans. In the meantime, employees should watch for official information in the company newsletter and on our intranet.

We care about our people! If employees ever have questions about our plans and policies, they should contact me directly.

L. Ed Zeplin, HR Manager

Polishing Your Prose

Sentence Fragments

A complete sentence has a subject and a verb. If either the subject or the verb is missing, the result is a sentence fragment.

The job candidates.

Passed seven rounds of interviews.

And have taken three tests.

To fix the fragment, join it to other words to make a complete sentence.

The job candidates passed seven rounds of interviews and have taken three tests.

Sentence fragments also occur when a clause has both a subject and a verb but is unable to stand by itself as a complete sentence.

Although I read my e-mail

Because she had saved her work

If he upgrades his computer

The words *although*, *because*, and *since* make the clause subordinate, which means the clause cannot stand alone. It must be joined to a main clause.

Although I read my e-mail, I did not respond to the draft of the proposal.

Because she had saved her work, Paula was able to restore it after the crash.

If he upgrades his computer, he will be able to use the new software.

Words that make clauses subordinate are

after	if
although, though	when, whenever
because, since	while, as
before, until	

Even sentences that have a subject and verb and are not subordinate may seem fragmentary in thought.

The computer is.

I need.

She transfers.

Add more information to make the sentence clear.

The computer is the latest model.

I need more letterhead.

She transfers to the logistics department on Tuesday.

Sometimes fragments are OK. For instance, fragments are used in résumés, advertisements, and some sales and fund-raising letters. However, fragments are inappropriate for most business documents. Because they are incomplete, they can confuse or mislead readers.

But the biggest problem with grammatical errors like sentence fragments is that readers sometimes assume that people who make errors are unprofessional or unpromotable (►► Module 14). Of course, using “incorrect” grammar has nothing to do with intelligence, but many people nevertheless use grammar as a yardstick. People who cannot measure up to that yardstick may be stuck in low-level jobs.

Exercises

Make the following sentence fragments into complete sentences.

1. Making the most of a difficult situation.
2. The latest word processing app.
3. Mia, who recently graduated from business school.
4. Because Terrence will be in Portland for the day.
5. Downloading a patch for that software glitch.
6. Whenever Joyce gets a chance to review the file.
7. The vice president of our Chicago office, Ajay Sajda.
8. More than 20 years of IT experience, including consulting overseas.
9. Tweeted an invitation for the reception at the Four Seasons Hotel.
10. Chloe, certain the manufacturing license will be granted by July 2.

Check your answers to the odd-numbered exercises at the back of the book.

Adapting Your Message to Your Audience

LEARNING OBJECTIVES

Module 2 can help you best meet the needs of your audiences for communication. After completing the module, you should be able to

- | | | | |
|---------------|---|---------------|--|
| LO 2-1 | Understand expectations from your organization. | LO 2-5 | Apply strategies for audience needs analysis. |
| LO 2-2 | Define audiences for messages. | LO 2-6 | Adapt messages for audiences. |
| LO 2-3 | Apply strategies for audience analysis with PAIBOC. | LO 2-7 | Choose channels for audiences. |
| LO 2-4 | Apply strategies for individual and group audience analyses. | | |

Understanding your audience is fundamental to the success of any message. You need to adapt your message to fit the audience's goals, interests, and needs.

Analyzing your audience and adapting your message can be done in a cynical, manipulative way. It can also be done in a sensitive, empathetic, ethical way. Audiences have a keen sense for messages that try to manipulate them; empathetic analysis and adaptation are almost always more successful, as well as being more ethical.

Some students pride themselves on their "honesty" in not adapting their discourse to anyone and in criticizing their bosses as sharply as they might younger brothers and sisters. But almost all organizations expect deference to people in authority. And customers have enough options to deal only with companies that treat them respectfully.

With the rapid pace of communication today, analyzing audiences is a must. Before sending that next tweet or e-mail message, for instance, think carefully about all of the audiences that may read it. Do your best, but should mistakes happen, learn from them. Careful audience analysis combined with experience will help you to avoid problems.

Building a Critical Skill

Understanding What Your Organization Wants LO 2-1

Michelle wondered whether her boss was sexist. Everyone else who had joined the organization when she did had been promoted. Her boss never seemed to have anything good to say about her or her work.

Michelle didn't realize that, in her boss's eyes, she wasn't doing good work. Michelle was proud of her reports; she thought she was the best writer in the office. But her boss valued punctuality, and Michelle's reports were always late.

Just as every sport has rules about scoring, so, too, do workplaces have rules about what "counts." Even in the same industry, different organizations and different supervisors may care about different things. One boss circles misspelled words and posts the offending message on a bulletin board for everyone to see. Other people are more tolerant of errors. One company values original ideas, while another workplace tells employees just to do what they're told. One supervisor likes technology and always buys the latest hardware and software; another is technophobic and has to be persuaded to get needed upgrades.

Succeeding in an organization depends first on understanding what "counts" at your organization. To find out what counts in your organization:

- Ask your boss, "What parts of my job are most important? What's the biggest thing I could do to improve my work?"
- Listen to the stories colleagues tell about people who have succeeded and those who have failed. When you see patterns, check for confirmation: "So his real problem was that he didn't socialize with co-workers?" This gives your colleagues a chance to provide feedback: "Well, it was more than never joining us for lunch. He didn't really seem to care about the company."
- Observe. See who is praised, who is promoted.

Understanding, by the way, can and should be a two-way street. Online shoe retailer Zappos.com listened to employees who said they wanted a workplace that is more accommodating to their lifestyle. The result was a nap room for a quick snooze and social events that include after-hours mixers and

lighthearted "parades" in the office. With \$1 billion in sales in 2009 alone, the company also encourages its 1,500 employees to tweet about Zappos and hosts free daily tours of its Las Vegas headquarters. The work still gets done. In 2012, Zappos was named one of *CNNMoney*'s 100 Best Companies to Work For.

Source: Morley Safer, "The 'Millennials' Are Coming," *60 Minutes*, November 11, 2007; and Jake Chessum, "How to Make Customers Love You," *Inc.*, 2010. Downloaded on February 12, 2010, at <http://www.inc.com/ss/how-to-make-customers-love-you>; and "100 Best Companies to Work For," *CNNMoney*, February 6, 2012, <http://money.cnn.com/magazines/fortune/bestcompanies/2012/snapshots/11.html>.

Who is my audience? LO 2-2

- *More people than you might think!*

In an organizational setting, a message may have five separate audiences.¹

1. The **primary audience** will decide whether to accept your recommendations or will act on the basis of your message. You must reach the decision maker to fulfill your purposes.
2. The **secondary audience** may be asked to comment on your message or to implement your ideas after they've been approved. Secondary audiences can also include lawyers

who may use your message—perhaps years later—as evidence of your organization’s culture and practices.

3. The **initial audience** receives the message first and routes it to other audiences. Sometimes the initial audience also tells you to write the message.
4. A **gatekeeper** has the power to stop your message before it gets to the primary audience. A secretary who decides who gets to speak to or see the boss is a gatekeeper. Sometimes the supervisor who assigns the message is also the gatekeeper; however, sometimes the gatekeeper is higher in the organization. In some cases, gatekeepers exist outside the organization.
5. A **watchdog audience**, though it does not have the power to stop the message and will not act directly on it, has political, social, or economic power. The watchdog pays close attention to the transaction between you and the primary audience and may base future actions on its evaluation of your message.

As the charts in Figures 2.1 and 2.2 show, one person or group can be part of two audiences. Frequently, a supervisor is both the initial audience and the gatekeeper. Sometimes the initial audience is also the primary audience that will act on the message.

Figure 2.1 The Audiences for a Marketing Plan

Writer	An account executive in an ad agency
Initial audience	Her boss, who asks her to write the plan
Gatekeeper	Her boss, who must approve the plan before it goes to the client
Primary audience	The executive committee of the client company, which will decide whether to adopt the plan
Secondary audiences	The marketing staff of the client company, who will be asked for comments on the plan The artists, writers, and media buyers who will implement the plan if it is accepted

In what can at best be described as a baffling move, Nivea for Men ran an advertisement in *Esquire* suggesting men “re-civilize” themselves, complete with an image of a man in business casual clothes tossing away a head with a beard and Afro. The company later apologized for the ad, which prompted public outcry. Even if some audiences are untroubled by the content of a message, good communicators take into consideration all of the audiences for that message. At the very least, they should re-think messages that appeal to some audiences at the expense of other audiences.

Figure 2.2 The Audiences for a Consulting Report

Writers	Two workers at a consulting think tank
Initial audience	A consortium of manufacturers, which hires the think tank to investigate how proposed federal regulations would affect manufacturing, safety, and cost
Gatekeeper	The consortium. If the consortium doesn’t like the report, it won’t send it on to the federal government.
Primary audience	The federal government agency that regulates this consumer product. It will set new regulations based in part (the manufacturers hope) on this report. Within this audience are economists, engineers, and policymakers.
Secondary audiences	The general public Other manufacturers of the product Other clients and potential clients of the consulting think tank The consulting think tank’s competitors
Watchdog audience	Industry reviewers who read drafts of the report and commented on it. Although they had no direct power over this report, their goodwill was important for the consulting company’s image—and its future contracts. Their comments were the ones that authors took more seriously as they revised their drafts.

Why is my audience so important? LO 2-3

- To be successful, messages must meet the audiences' needs.

Good business communication is audience-centered. Audience is central to both PAIBOC and to the communication process.

On his blog, Robert Greene, who co-wrote the best-selling *The 50th Law* with musician 50 Cent, notes the performer's four principles for reaching his audience. Among them is to "crush as much distance as possible between you and your audience," reaching people and their inner lives and reflecting their spirit in your message.

Source: Robert Greene, "Four Things 50 Cent Can Teach You About Connecting with Your Audience," downloaded on February 16, 2010, at <http://www.copyblogger.com/robert-greene-50-cent/>.

Instant Replay

Five Kinds of Audiences

Initial

Is first to receive the message; may assign message.

Gatekeeper

Has the power to stop the message before it gets to primary audience.

Primary

Decides whether to accept recommendations; acts.

Secondary

Comments on message or implements recommendations.

Watchdog

Has political, social, or economic power; may base future actions on its evaluation of your message.

Audience and PAIBOC

Think about the PAIBOC questions in Module 1 (► p. 12). Of the six questions, the five in blue relate to audience.

P What are your purposes in writing or speaking?

Your purposes come from you and your organization. Your audience determines how you achieve those purposes, but not what the purposes are.

A Who is (are) your audience(s)? How do members of your audience differ? What characteristics are relevant to this particular message?

These questions ask directly about your audience.

I What information must your message include?

The information you need to give depends on your audience. You need to say more when the topic is new to your audience. If your audience has heard something but may have forgotten it, you'll want to protect readers' egos by saying "As you know," or putting the information in a subordinate clause: "Because we had delivery problems last quarter,"

B What reasons or reader benefits can you use to support your position?

What counts as a good reason and what is a benefit depends on your audience. For some audiences, personal experience counts as a good reason. Other audiences are more persuaded by scientific studies or by experts. For some people, saving money is a good benefit of growing vegetables. Other people may care less about the money than about avoiding chemicals, growing varieties that aren't available in grocery stores, or working outside in the fresh air. ►► Module 8 gives more information on developing reader benefits.

Carl Caspers understands the market for Harmony Systems' prostheses because he is part of it. Often, however, you'll have to analyze audiences of which you are not a part.

- O What objection(s) can you expect your reader(s) to have? What negative elements of your message must you deemphasize or overcome?

Different audiences will have different attitudes. One audience may object to a price increase. Another audience may expect price changes as routine and not be bothered by them. ►► Module 12 on persuasion gives more information on overcoming objections.

- C How will the context affect reader response? Think about your relationship to the reader, morale in the organization, the economy, the time of year, and any special circumstances.

People exist in a context. How well they know you, how they feel about you and your organization, how well the economy is doing, even what's been in the news recently will all influence the way they respond to your message.

Understanding potential objections from audiences requires thinking about the context of the situation, including timing. When the Cedar River flooded his home with 13 feet of water and destroyed most of his possessions, Justin Van Fleet asked for help from the Federal Emergency Management Agency (FEMA). He was living in a FEMA trailer when, after repeated applications, he was granted more than \$20,000 from the agency. The following March, however, Van Fleet received a letter from FEMA stating he should never have received the money and had 30 days to repay it. The agency admitted to such mistakes but also noted by law it's required to recover funds—little comfort to thousands of Americans who collectively received more than \$22 million because of FEMA errors.

Source: Ryan J. Foley, "FEMA Asks for Return of Disaster Aid," May 10, 2011, http://news.yahoo.com/s/ap/20110510/ap_on_re_us/us_fema_reclaiming_aid.

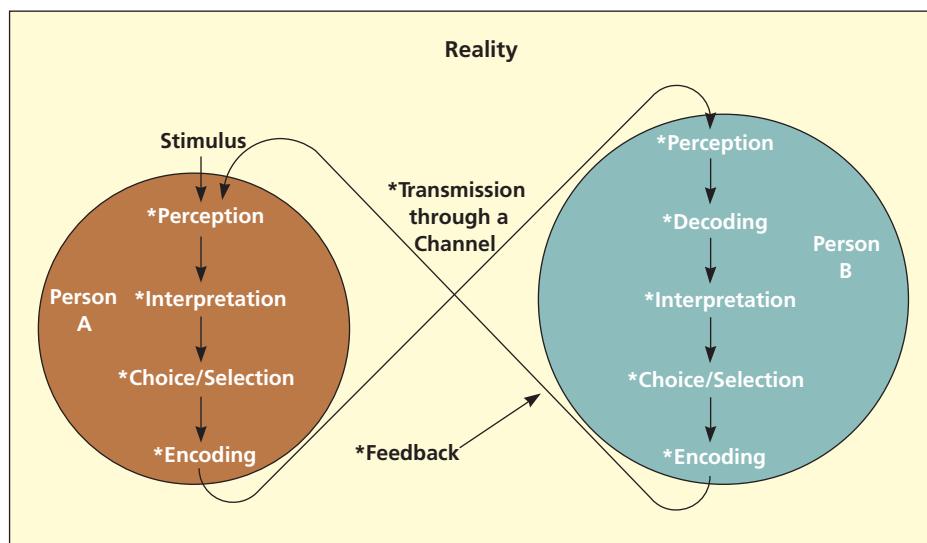

Audience and the Communication Process

Audience is also central to the communication process.

The following model of the communication process drastically simplifies what is perhaps the most complex of human activities. However, even a simplified model can give us a sense of the complexity of the communication process. And the model is useful in helping us see where and why miscommunication occurs. Figure 2.3 shows the basic process that occurs when one person tries to communicate ideas to someone else.

The process begins when Person A (let's call him Alex) **perceives** some stimulus. Here we are talking about literal perception: the ability to see, to hear, to taste, to smell, to touch. Next, Alex **interprets** what he has perceived. Is it important? Unusual? The next step is for Alex to **choose or select** the information he wishes to send to Person B (whom we'll call Barbara). Now Alex is ready to put his ideas into words. (Some people argue that we can think only in words and would put this stage before interpretation and choice.) Words are not the only way to convey ideas; gestures, clothing, and pictures can carry meaning nonverbally. The stage of putting ideas into any of these symbols is called **encoding**. Then Alex must **transmit** the message to Barbara using some **channel**. Channels include memos, phone calls, meetings, billboards, TV ads, and e-mail, to name just a few.

To receive the message, Barbara must first **perceive** it. Then she must **decode** it, that is, extract meaning from the symbols. Barbara then repeats the steps Alex has gone through:

*Noise (and miscommunication) can occur here.

Figure 2.3 A Model of Two-Person Communication with Feedback

A test question featuring a talking pineapple ended up baffling eighth graders on a recent standardized exam. Though offered in the context of a fable, the concept of a piece of fruit challenging anyone to a race so confused students that the question ultimately was thrown out. Care must be taken to anticipate how audiences will understand or interpret communication, especially if it presents unusual ideas.

Source: Valerie Strauss, “Talking Pineapple Question on Standardized Test Baffles Students,” *The Washington Post*, April 20, 2012, http://www.washingtonpost.com/blogs/answer-sheet/post/talking-pineapple-question-on-standardized-test-baffles-students/2012/04/20/glQA8i01VT_blog.html.

interpreting the information, choosing a response, and encoding it. The response Barbara sends to Alex is called **feedback**. Feedback may be direct and immediate or indirect and delayed; it may be verbal or nonverbal.

Noise can interfere with every aspect of the communication process. Noise may be physical or psychological. Physical noise could be a phone line with static, a lawn mower roaring outside a classroom, or handwriting that is hard to read. Psychological noise could include disliking a speaker, being concerned about something other than the message, or already having one’s mind made up on an issue.

Channel overload occurs when the channel cannot handle all the messages that are being sent. A small business may have only two phone lines; no one else can get through if both lines are in use. **Information overload** occurs when more messages are transmitted than the human receiver can handle. Some receivers process information “first come, first served.” Some may try to select the most important messages and ignore others. A third way is to depend on abstracts or summaries prepared by other people. None of these ways is completely satisfactory.

At every stage, both Alex and Barbara could misperceive, misinterpret, choose badly, encode poorly, or choose inappropriate channels. Miscommunication can also occur because different people have different frames of reference. We always interpret messages in light of our personal experiences, our cultures and subcultures, and even the point in history at which we live.

Successful communication depends on the common ground between you and your audience. Choose information that your audience needs and will find interesting. Encode your message in words and other symbols the audience will understand. Transmit the message along a channel that your audience will attend to.

What do I need to know about my audience(s)? LO 2-4

► *Everything that's relevant to what you're writing or talking about.*

Almost everything about your audience is relevant to some message. But for any particular message, only a few facts about your audience will be relevant.

Since the factors that matter vary depending on the situation, no one-size-fits-all list of questions for audience analysis exists. In general, you need to use common sense and empathy. **Empathy** is the ability to put yourself in someone else’s shoes, to feel with that person. Empathy requires not being self-centered because, in all probability, the audience is *not* just like you. Use what you know about people and about organizations to predict likely responses.

Analyzing Individuals and Members of Groups

When you write or speak to people in your own organization and in other organizations you work closely with, you may be able to analyze your audience as individuals. You may already know your audience; it will usually be easy to get additional information by talking to members of your audience, talking to people who know your audience, and observing your audience.

In other organizational situations, you’ll analyze your audience as members of a group: “taxpayers who must be notified that they owe more income tax,” “customers living in the northeast side of the city,” or “employees with small children.”

Information that is most often helpful includes the following:

- How much the audience knows about your topic
- Demographic factors, such as age, income, number of children, and so forth
- Personality
- Values and beliefs
- Past behavior

Message/Purpose	Audience	Relevant Factors
Memo announcing that the company will reimburse employees for tuition if they take work-related college courses	All employees	<ul style="list-style-type: none"> Attitudes toward education (some people find courses fun; others may be intimidated) Time available (some may be too busy) Interest in being promoted or in getting cross-training Attitude toward company (those committed to its success will be more interested in program)
Letter offering special financing on a new or used car	College students	<ul style="list-style-type: none"> Income Expectations of future income (and ability to repay loan) Interest in having a new car Attitude toward cars offered by that dealership Knowledge of interest rates Access to other kinds of financing
Letter giving a meeting agenda and saying that you will bring your child along	Client	<ul style="list-style-type: none"> How well the client knows you How much the client likes you How important agenda items are to the client How the client feels about children Physical space for meeting (room for child to play)

When Louisiana Representative John Fleming downplayed his annual income of \$6 million on MSNBC while discussing his opposition to taxes on the rich, he raised the eyebrows of interviewer Chris Jansing. Fleming pointed out he actually takes home only about \$600,000, with \$200,000 less after meeting living expenses, to which Lansing stated, "You do understand, congressman, that the average person out there who's making maybe 40, 50, \$60,000 out there, when they hear you only have \$400,000 left over, it's not exactly a sympathetic position." How audiences interpret messages depends on both the facts being presented and their emotional reactions to them.

Source: Chris Moody, "Rep. John Fleming Fields Criticism Over 600K Income," September 20, 2011, <http://news.yahoo.com/blogs/ticket/rep-john-fleming-field-criticism-over-600k-income-153305241.html>.

Knowledge

Even people in your own organization won't share all your knowledge. USAA provides insurance to military personnel and their families, but not all the 22,000 people who work there know insurance jargon.²

Most of the time, you won't know exactly what your audience knows. Moreover, even if you've told readers before, they may not remember the old information when they read the new message. To remind readers of information in a tactful way,

- Preface statements with "As you know," "As you may know," or a similar phrase.
- Spell out acronyms the first time you use them: "Employee Stock Ownership Plan (ESOP)."
- Give brief definitions in the text: "the principal—the money you have invested—."
- Put information readers should know in a subordinate clause: "Because the renovation is behind schedule, . . ."

Demographic Factors

Demographic characteristics are measurable features that can be counted objectively: age, sex, race, religion, education level, income, and so on.

Sometimes demographic information is irrelevant; sometimes it's important. Does age matter? Most of the time, probably not. (Mick Jagger is more than 60 years old, but he probably doesn't subscribe to *Modern Maturity*.) On the other hand, if you were explaining a change in your company's pension plan, you'd expect older workers to be more concerned than younger workers.

Business and nonprofit organizations get demographic data by surveying their customers, clients, and donors; by using U.S. census data; or by purchasing demographic

for demographic information about the U.S. population and more. To get information on your community, click on "American Factfinder."

Keep audiences in mind when using social networking sites. Lee Landor, deputy press secretary to Scott M. Stringer, Manhattan borough president, resigned after her reference to President Barack Obama as "O-dumb-a" and racially tinged comments during a heated exchange about the arrest of Harvard scholar Henry Louis Gates, Jr., on Facebook became public. Her situation rivals that of a woman in the United Kingdom who posted "OMG I HATE MY JOB!" after insulting her boss . . . and then found out he was a Facebook friend. She not only lost the job with two weeks left on her probationary period, but the exchange went viral on the web.

Key in your Zip code to learn which psychographic groups are most common in your neighborhood.

data from marketing companies. For many messages, simply identifying subsets of your audience is enough. For example, a school board trying to win support for a tax increase knows that not everyone living in the district will have children in school. It isn't necessary to know the exact percentages to realize that successful messages will need to appeal not only to parents but also to voters who won't directly benefit from the improvements that the tax increase will fund.

Personality

When your primary audience is just one person, his or her personality is relevant. There are many ways to analyze personality. For business, one of the most useful is the **Myers-Briggs Type Indicator®** instrument, which uses four pairs of dichotomies to identify ways that people differ.³

- **Extraversion–Introversion:** where someone gets energy. Introverted types get their energy from within; extraverted types are energized by interacting with other people.
- **Sensing–Intuition:** how someone gets information. Sensing types gather information through their senses, preferring what is real and tangible. Intuitive types prefer to look at the big picture, focusing on the relationships and connections between facts.
- **Thinking–Feeling:** how someone makes decisions. Thinking types consider logical consequences of an action to reach decisions. Feeling types make decisions based on the impact to people.
- **Judging–Perceiving:** how someone orients himself or herself to the external world. Judging types like to live in a planned, orderly way, seeking closure. Perceiving types prefer a flexible environment, enjoying possibilities.

Some businesses administer the Myers-Briggs Type Indicator® instrument to all employees. They find that results can be used to assist with team building and/or personal growth and development.

Knowing your audience's personality type can help you select the appropriate channel and craft your message. For instance, an introvert might want a written message because it favors contemplation, while an extravert might instead prefer the dynamics of a phone call or face-to-face meeting. Sensitive types look for detailed facts, arranged sequentially so they can judge each accordingly, while intuitive types want to know the overall situation first to then apply creative solutions.

You'll be most persuasive if you play to your audience's strengths. Indeed, many of the general principles of business communication reflect the types most common among managers. Putting the main point up front satisfies the needs of judging types, and some 75% of U.S. managers are judging. Giving logical reasons satisfies the needs of the nearly 80% of U.S. managers who are thinking types.⁴

Know that human beings are also adaptable. For instance, some research suggests that while only 50% of Americans are estimated to be extraverts, the vast majority of managers and executives demonstrate extraverted personality traits.⁵ Introverts can learn many of the associated behaviors, even if they're not their inclination.

Values and Beliefs

Psychographic characteristics are qualitative rather than quantitative: values, beliefs, goals, and lifestyles. For example, two families living next door to each other might make about the same amount of money and each have two children. But one family might save every possible penny for college and retirement, taking inexpensive vacations and cooking meals at home rather than eating out. The other family might spend almost everything they make on clothes, cars, vacations, entertainment, and dinners out. One family might do most things together as a family, while the other members might spend most of their time on individual activities. The families might have different religious and political beliefs.

If you wanted to persuade each family to do the same thing, you might need to use different reasons and reader benefits; you would have different objections to overcome.

Knowing what your audience finds important allows you to organize information in a way that seems natural to your audience and to choose appeals that audience members will find persuasive.

Many marketers use the **Values and Lifestyles (VALS)** profiles developed by the SRI research firm in California. VALS profiles divide U.S. buyers into eight categories according to their primary motivation, the amount of resources they have, and the extent to which they innovate. For instance, Strivers are motivated by achievement and are relatively low in resources and innovation. These conspicuous consumers try to be in style, even without a lot of money.

Innovators, on the other hand, may have more disposable income and enjoy cooking and fine food. As Patricia Breman, a senior consultant for SRI Consulting Business Intelligence, points out, Innovators may be an excellent target market for upscale grocery stores.⁶

The other VALS categories are Thinkers, Believers, Achievers, Experiencers, Makers, and Survivors.⁷

Researcher Mary Modahl's survey of 250,000 households found that online buying depends not on demographics such as age and Zip code but on psychographics: the consumer's attitude toward technology along a continuum from "profoundly suspicious" to "eagerly accepting."⁸

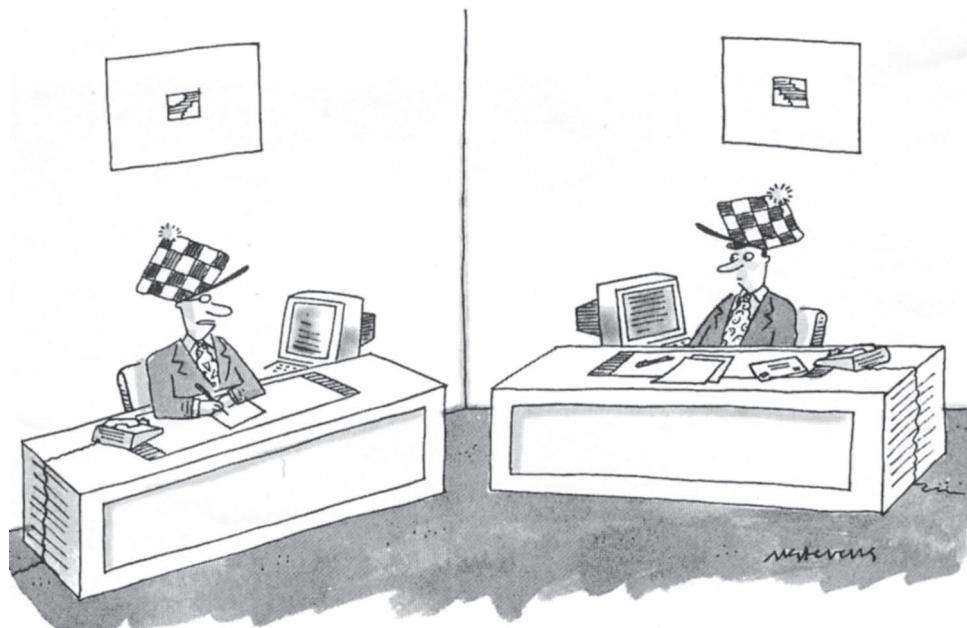

Past Behavior

How people have behaved in the past often predicts how they'll behave in the future. For example, examining records of customer purchases showed Fingerhut that customers who moved made large purchases of furniture and decorations. Fingerhut developed a "mover's catalog" filled with products likely to appeal to this group—and saved money by not mailing other catalogs to this group right after they moved.⁹

Analyzing People in Organizations

Your reader's reaction is affected not only by his or her personal preferences and feelings but also by the discourse communities to which the reader belongs and by the organizational culture.

Some aspects of corporate culture may no longer serve an obvious purpose.

"I don't know how it started, either. All I know is that it's part of our corporate culture."

Copyright © 1994 Mick Stevens/The New Yorker Collection, www.cartoonbank.com.

Ken Blanchard is now a successful business writer with a track record of bestsellers, including *The One Minute Manager*, but people used to tell him he wrote poorly. Blanchard has said that when he was a student in graduate school, professors told him he could not write well enough to succeed as a college professor. But he adds, "Later I learned that the problem with my writing from their point of view was that you could understand it, which meant it wasn't academic enough." At the time, however, he accepted the advice and pursued a career in administration. To date, Blanchard's books have sold more than 20 million copies. His latest is *Great Leaders Grow: Becoming a Leader in Life*.

Source: Based on Kevin Ryan, *Write Up the Corporate Ladder* (New York: Amacom, 2003), 126–27; and Dan Schawbel, "Ken Blanchard on How Great Leaders Grow," *Forbes*, March 1, 2012, <http://www.forbes.com/sites/danschawbel/2012/03/01/ken-blanchard-on-howgreat-leaders-grow/>.

When State Department spokesman P.J. Crowley called the U.S. Army's treatment of a soldier suspected of collaborating with WikiLeaks "stupid" and "ridiculous," he may have been speaking off the cuff. But the remarks generated enough criticism that Crowley later resigned, illustrating among other things the need to carefully weigh audience when communicating. In particular, consider organizational culture and discourse community—a comment that might be acceptable to one group may be unacceptable to another, even if that group includes peers.

Source: Matthew Lee, "Clinton Spokesman Resigns After WikiLeaks Flap," *MSNBC*, March 13, 2011, http://www.msnbc.msn.com/id/4206000/ns/politics-more_politics/t/clinton-spokesman-resigns-after-wikileaks-flap/#.UAsP47Se6tw.

Discourse Community

A **discourse community** is a group of people who share assumptions about what channels, formats, and styles to use, what topics to discuss and how to discuss them, and what constitutes evidence.

A discourse community is a group of people who share assumptions about what channels, formats, and styles to use, what topics to discuss and how to discuss them, and what constitutes evidence. Each person is part of several discourse communities, which may or may not overlap.

To analyze an organization's discourse community, ask the following questions:

- What channels, formats, and styles are preferred for communication? Do you write a paper memo, send e-mail, or walk down the hall to talk to someone? How formal or informal are you supposed to be?
- What do people talk about? What is not discussed?
- What kind of and how much evidence is needed to be convincing? Is personal experience convincing? Do you need numbers and formal research?

Procter & Gamble's discourse community requires that recommendations be just one page. So writers create one-page memos—and then add as many pages of "attachments" as they need. In contrast, a Silicon Valley company expects recommendations to be presented as a PowerPoint slide with a triangle with three words around it.

An **organization's culture** is its values, attitudes, and philosophies. Organizational culture (or **corporate culture**, as it is often called; ►► Module 3) is revealed verbally in the organization's myths, stories, and heroes and nonverbally in the allocation of space, money, and power.

The following questions will help you analyze an organization's culture:

- What are the organization's goals? Making money? Serving customers and clients? Advancing knowledge? Contributing to the community?
- What does the organization value? Diversity or homogeneity? Independence or being a team player? Creativity or following orders?
- How do people get ahead? Are rewards based on seniority, education, being well-liked, making technical discoveries, or serving customers? Are rewards available to only a few top people, or is everyone expected to succeed?
- How formal are behavior, language, and dress?

Two companies in the same field may have very different cultures. To compare corporate cultures, Cecilia Rothenberger reviewed how two executives described their own organizations.¹⁰ According to her, Andersen Consulting, which employs 65,000 people in 48 countries, values compensation, bonuses, prestige, resources, and rewards; the 35-person Creative Good firm values communication, relationships, creativity, and growth. Researcher Jennifer Chatman found that new hires who "fit" a company's culture were more likely to stay with the job, be more productive, and be more satisfied than those who did not fit the culture.¹¹

Organizations can have subcultures. For example, manufacturing and marketing may represent different subcultures in the same organization: workers may dress differently and have different values.

You can learn about organizational culture by observing people and by listening to the stories they tell. Here are two of the stories Nike's leaders tell.

Story	Lesson
Coach Bowerman (a company co-founder) decided his team needed better running shoes. So he went into his workshop and poured rubber into the family waffle iron to create a waffle sole.	Nike is committed to innovation.
Steve Prefontaine (a runner and another co-founder) worked to make running a professional sport and to get better-performing equipment.	Nike is committed to helping athletes.

You can also learn about a company's culture by looking at its website. Many companies try to describe their cultures, usually as part of the section on employment.

Now that I have my analysis, what do I do with it? LO 2-5

► Use it to plan strategy, organization, style, document design, and visuals.

If you know your audience well and if you use words well, much of your audience analysis and adaptation will be unconscious. If you don't know your audience or if the message is very important, take the time to analyze your audience formally and to revise your draft with your analysis in mind.

You can adapt your message's strategy, organization, and style to meet the audience's needs. For paper or electronic documents, you can also adapt the document's design and the photos or illustrations you choose.

Strategy

- Make the action as easy as possible.
- Protect the reader's ego.
- Decide how to balance logic and emotion, what details to use, and whether to use a hard-sell or soft-sell approach based on the specific audience, the organizational culture, and the discourse community.
- Choose appeals and reader benefits that work for the specific audience (►► Module 8).
- Modules 7, 11, and 13 will show you how to emphasize positive aspects, decide how much information to include, and overcome obstacles.

Organization

- Because most managers are intuitive types, it's usually better to get to the point right away. The major exceptions are
 - When we must persuade a reluctant reader.
 - When we have bad news and want to let the reader down gradually.
- Make the organizational pattern clear to the audience. Modules 9, 23, and 24 show you how to use headings and overviews. Module 20 shows how to use overviews and signposts in oral presentations.

Style

- For most audiences, use easy-to-understand words, a mixture of sentence lengths, and paragraphs with topic sentences (►► Modules 15 and 16).
- Avoid words that sound defensive or arrogant.
- Avoid hot buttons or "red-flag" words to which some readers will have an immediate negative reaction: *criminal, un-American, crazy, fundamentalist, liberal*.
- Use the language(s) that your audience knows best. In Quebec, messages are normally presented both in English and in French. In the Southwest United States, messages may be most effective printed in both English and Spanish.
- Use conversational, not "academic," language.

To tap into youth markets, companies are seeking advice from people in the target market. Natalie Rodriguez, Heide Panglemaier, and Rosaura Lezama offer their opinions of marketers' efforts through 3iyng.com.

"Terrifying," "psychedelic," and "awesomely bad" were among terms critics used to describe an advertisement by California Senate candidate Carly Fiorina's campaign that attacked her opponent, Tom Campbell. The video combined live action with animation to show a flock of sheep infiltrated by a red-eyed, costumed human. While Michael Scherer in *Time* notes the spot is "so weird that you will click on it online," the question remains whether getting attention is the same as swaying the audience.

Source: Brett Michael Dykes, "Bizarre Attack Ad Heats Up California Senate Race," February 4, 2010, http://news.yahoo.com/s/ynews/ynews_pl1112.

Instant Replay

Organizational Culture

An organization's culture is its values, attitudes, and philosophies. Organizational culture (or **corporate culture** as it is also called) is revealed verbally in the organization's myths, stories, and heroes and nonverbally in the allocation of space, money, and power.

Document Design

- Use lists, headings, and a mix of paragraph lengths to create white space.
- Choices about format, footnotes, and visuals may be determined by the organizational culture or the discourse community.
- ►► Module 5 for advice about effective document design.

Photographs and Visuals

- Use bias-free photographs and clip art (►► Module 25).
- Photos and visuals can make a document look more informal or more formal. Think of the difference between cartoons and photos of "high art."
- Some cultures (e.g., French, Japanese) use evocative photographs that bear little direct relationship to the text. Most U.S. audiences expect photos that clearly relate to the text, often with a caption that further reinforces the connection.
- For electronic and web documents, consider content and such issues as music or time to download, especially with video or animation.

What if my audiences have different needs? LO 2-6

- Focus on gatekeepers and decision makers.

When the members of your audience share the same interests and the same level of knowledge, you can use the principles outlined earlier for individual readers or for members of homogenous groups. But often different members of the audience have different needs.

When it is not possible to meet everyone's needs, meet the needs of gatekeepers and primary audiences first.

Content and Choice of Details

- Provide an overview or executive summary for readers who just want the main points.
- In the body of the document, provide enough detail for primary audiences and for anyone else who could veto your proposal.
- If the primary audiences don't need details that other audiences will want, provide those details in appendices—statistical tabulations, earlier reports, and so forth.

Organization

- Use headings and a table of contents so readers can turn to the portions that interest them.
- Organize your message based on the primary audiences' attitudes toward it.

Level of Formality

- Avoid personal pronouns. *You* ceases to have a specific meaning when several different audiences use a document.
- If both internal and external audiences will use a document, use a slightly more formal style than you would in an internal document.
- Use a more formal style when you write to international audiences.

Use of Technical Terms and Theory

- In the body of the document, assume the degree of knowledge that primary audiences will have.
- Put background information and theory under separate headings. Then readers can use the headings and the table of contents to read or skip these sections, as their knowledge dictates.
- If primary audiences will have more knowledge than other audiences, provide a glossary of terms. Early in the document, let readers know that the glossary exists.

Achieving buy-in from audiences can be easier by role-playing first with a friend or colleague to test ideas and prepare for possible objections. That gives you the opportunity to hone the approach.

Source: John Kotter, "If You Think You're Prepared, Think Again," *The Harvard Business Review*, April 19, 2011, <http://blogs.hbr.org/kotter/2011/04/if-you-think-youre-prepared-th.html>.

The culture at software company Siebel Systems is professional and competitive. Employees can't eat at their desks. Men wear suits; women wear pantsuits or skirted suits with panty hose. Employees are rated, and every year the lowest 5% are fired.

Sun Microsystems' corporate culture fosters informality and flexibility. Employees can use the iWork computer facilities at various Sun drop-in centers, or enroll in the work-from-home program. This provides employees with flexible workplaces and saves valuable driving time, enabling Sun Microsystems to retain the best talent available.

Both companies are now owned by software giant Oracle Corporation.

How do I reach my audience(s)? LO 2-7

- *Important messages may require multiple channels.*

Communication channels vary in

- Speed
- Accuracy of transmission
- Cost
- Number of messages carried
- Number of people reached
- Efficiency
- Ability to promote goodwill

The family of Sergeant Jesse Jasper received a “red line” phone call that he, along with Sergeant Tyler Judin, had been killed in action. What they didn’t learn until hours later was that Jasper was alive and well. As a result, the U.S. Army’s 82nd Airborne Division is reconsidering how its family readiness group notifies all families of individual deaths within the unit. While Jasper’s father said, “I don’t know why they would tell us about someone else’s tragedy,” the unit is considering revising messages to start with “Your son or daughter is fine” when that is the case.

Source: Carolyn Thompson, “NY Dad Told Soldier-Son Killed in War—He Wasn’t,” September 16, 2009, http://news.yahoo.com/s/ap/20090916/ap_on_re_us/us_afghanistan_not_dead.

Depending on your purposes, the audience, and the situation, one channel may be better than another.

A written message makes it easier to

- Present many specific details of a law, policy, or procedure.
- Present extensive or complex financial data.
- Minimize undesirable emotions.

Messages on paper are more formal than e-mail messages. E-mail messages are appropriate for routine messages to people you already know. Paper is usually better for someone to whom you’re writing for the first time.

Oral messages make it easier to

- Answer questions, resolve conflicts, and build consensus.
- Use emotion to help persuade the audience.
- Get immediate action or response.
- Focus the audience’s attention on specific points.
- Modify a proposal that may not be acceptable in its original form.

Scheduled meetings and oral presentations are more formal than phone calls or stopping someone in the hall.

Important messages should use more formal channels, whether they’re oral or written. Oral and written messages have many similarities. In both, you should

- Adapt the message to the specific audience.
- Show the audience members how they benefit from the idea, policy, service, or product (► Module 8).
- Overcome any objections the audience may have.
- Use you-attitude and positive emphasis (► Modules 6 and 7).
- Use visuals to clarify or emphasize material (► Module 25).
- Specify exactly what the audience should do.

Even when everyone in an organization has access to the same channels, different discourse communities may prefer different ones. When a university updated its employee benefits manual, the computer scientists and librarians wanted the information online. Faculty wanted to be able to read the information on paper. Maintenance workers and carpenters wanted to get answers on voice mail.¹²

The bigger your audience, the more complicated channel choice becomes because few channels reach everyone in your target audience. When possible, use multiple channels. Also use multiple channels for very important messages. For example, talk to key players about a written document before the meeting where the document will be discussed.

Summary of Learning Objectives

- Succeeding in an organization depends first on understanding what “counts” at your organization. To find out what counts in your organization, ask your boss thoughtful questions, listen to the stories colleagues tell about people who have succeeded and those who have failed, and observe who is praised and promoted. (**LO 2-1**)
- The **primary audience** will make a decision or act on the basis of your message. The **secondary audience** may be asked by the primary audience to comment on your message or to implement your ideas after they’ve been approved. The **initial audience** routes the message to other audiences and may assign the message. A **gatekeeper** controls whether the message gets to the primary audience. A **watchdog audience** has political, social,
- or economic power and may base future actions on its evaluation of your message. (**LO 2-2**)
- A sender goes through the following steps: **perception, interpretation, choice or selection, encoding, transmitting** the message through a **channel**. The receiver perceives the message, **decodes** it, interprets it, chooses a response, encodes the response, and transmits it. The message transmitted to the original sender is called **feedback**. **Noise** is anything that interferes with communication; it can be both physical and psychological. Miscommunication can occur at every point in the communication process. (**LO 2-3**)
- **Channel overload** occurs when a channel cannot handle all the messages being sent. **Information overload** occurs when

the receiver cannot process all the messages that arrive. Both kinds of overload require some sort of selection to determine which messages will be sent and which ones will be attended to. (LO 2-3)

- Common sense and empathy are crucial to good audience analysis. (LO 2-3)
- A **discourse community** is a group of people who share assumptions about what channels, formats, and styles to use, what topics to discuss and how to discuss them, and what constitutes evidence. (LO 2-4)
- An **organization's culture** is its values, attitudes, and philosophies. Organizational culture is revealed verbally in the organization's myths, stories, and heroes and nonverbally in the allocation of space, money, and power. (LO 2-4)
- Almost everything about your audience is relevant to some message. But for any particular message, only a few facts about your audience will be relevant. Use **empathy** to put yourself in “someone else’s shoes,” and look at such factors as knowledge, demographics, personality, psychographics, past behavior, discourse community, and organizational culture. (LO 2-4)

- If you don’t know your audience or if the message is very important, take the time to analyze your audience formally and to revise your draft with your analysis in mind. You can adapt your message’s strategy, organization, and style to meet the audience’s needs. For paper or electronic documents, you can also adapt the document’s design and the photos or illustrations you choose. (LO 2-5)
- When you write to multiple audiences, use the primary audience and the gatekeeper to determine level of detail, organization, level of formality, and use of technical terms and theory. (LO 2-6)
- You can adapt your message’s strategy, organization, and style to meet the audience’s needs. For paper or electronic documents, you can also adapt the document’s design and the photos or illustrations you choose. (LO 2-6)
- The best channel for a message will depend on the audience, the sender’s purposes, and the situation. Channel choice may be shaped by the organizational culture. (LO 2-7)
- When you communicate to a big audience or talk about an important topic, use multiple channels. (LO 2-7)

Assignments for Module 2

Questions for Comprehension

- 2.1 What are the five kinds of audiences? (LO 2-2)
- 2.2 What are ways to analyze your audience? (LO 2-3, LO 2-4)

Questions for Critical Thinking

- 2.4 Emphasizing the importance of audience, marketers frequently say, “The customer is in control.” To what extent do you feel in control as a customer, a student, a citizen? What actions could you take to increase your control? (LO 2-1 to LO 2-3)
- 2.5 If you are employed, which aspects of your organization’s culture match your own values? What kind of culture would you like to join when you are next on the job market? (LO 2-1 to LO 2-3)

- 2.3 What are three ways to adapt your message to your audience? (LO 2-5, LO 2-6)

- 2.6 Why do internal audiences, especially your boss, sometimes feel more important than primary audiences outside your organization? (LO 2-1 to LO 2-3)
- 2.7 What are your options if your boss’s criteria for a document are different than those of the primary audience? (LO 2-1 to LO 2-3)

Exercises and Problems

2.8 Identifying Audiences (LO 2-1 to LO 2-4)

In each of the following situations, label the audiences as initial, gatekeeper, primary, secondary, or watchdog:

1. Andrea, a financial planner, wants to hold a dinner seminar for married couples to help them with their financial planning. Her specialty is setting up retirement accounts, but she also wants to help parents save money for their child’s college expenses. Before she can hold her seminar, she has to make sure she has the proper licensing and permits in her community as well as schedule catering and meeting space at a local hotel or business center. She has paid for a mailing list of 200 people and their spouses, with hopes that at least 30 couples will attend. As an enticement, she will award

several prizes, including theater tickets, a bicycle, and a weekend vacation at a bed and breakfast, all donated from local vendors who would like their businesses recognized at the seminar.

2. Carmale hopes to get a franchise for a casual dining restaurant. She will need to fill out an application with the corporation and also show that she has secured a loan for the balance of costs to build the restaurant.
3. Paul works for the mayor’s office in a big city. As part of a citywide cost-cutting measure, a blue-ribbon panel has recommended requiring employees who work more than 40 hours in a week to take compensatory time off rather than being paid overtime. The only exceptions will be the police and fire departments. The mayor asks

Paul to prepare a proposal for the city council, which will vote on whether to implement the change. Before they vote, council members will hear from (1) citizens, who will have an opportunity to read the proposal and communicate their opinions to the city council; (2) mayors' offices in other cities that may be asked about their experiences; (3) union representatives, who may

be concerned about the reduction in income that will occur if the proposal is implemented; (4) department heads, whose ability to schedule work might be limited if the proposal passes; and (5) the blue-ribbon panel and good-government lobbying groups. Council members come up for reelection in six months.

2.9 Choosing a Channel to Reach a Specific Audience (LO 2-1 to LO 2-4)

Suppose that your business, government agency, or non-profit group has a product, service, or program targeted for each of the following audiences. What would be the best channel(s) to reach people in that group in your city? Would that channel reach all group members?

1. Commuters
2. Internet bulletin board users
3. Retired pilots

4. African Americans
5. Police officers
6. Asian-American voters
7. Outdoor enthusiasts
8. Financial planners
9. College freshmen
10. People thinking about a second career

2.10 Analyzing a Discourse Community (LO 2-1 to LO 2-4)

Analyze the way a group you are part of uses language. Possible groups include

- Work teams
- Sports teams
- Honor organizations and other service or social groups
- Churches, synagogues, temples, and mosques
- Geographic or ethnic groups
- Groups of friends

Questions to ask include the following:

- What specialized terms might not be known to outsiders?
- What topics do members talk or write about? What topics are considered unimportant or improper?
- What channels do members use to convey messages?

- What forms of language do members use to build goodwill? To demonstrate competence or superiority?
- What strategies or kinds of proof are convincing to members?
- What formats, conventions, or rules do members expect messages to follow?

As Your Instructor Directs,

- a. Share your results orally with a small group of students.
- b. Present your results in an oral presentation to the class.
- c. Present your results in a memo to your instructor.
- d. Share your results in an e-mail message to the class.
- e. Share your results with a small group of students and write a joint memo reporting the similarities and differences you found.

2.11 Analyzing an Organization's Culture (LO 2-1 to LO 2-4)

Interview several people about the culture of their organization. Possible organizations include

- Work teams
- Sports teams
- Honor organizations and other service or social groups
- Churches, synagogues, temples, and mosques
- Geographic or ethnic groups
- Groups of friends

Questions to ask include those in this module and the following:

1. Tell me about someone in this organization you admire. Why is he or she successful?
2. Tell me about someone who failed in this organization. What did he or she do wrong?

3. What ceremonies and rituals does this organization have? Why are they important?

4. Why would someone join this group rather than a competitor?

As Your Instructor Directs,

- a. Share your results orally with a small group of students.
- b. Present your results in an oral presentation to the class.
- c. Present your results in a memo to your instructor.
- d. Share your results in an e-mail message to the class.
- e. Share your results with a small group of students and write a joint memo reporting the similarities and differences you found.

2.12 Analyzing the Audiences of Noncommercial Web Pages (LO 2-1 to LO 2-4)

Analyze the implied audiences of two web pages of two noncommercial organizations with the same purpose (combating hunger, improving health, influencing the political process, etc.). You could pick pages of the national organization and a local affiliate, or pages of two separate organizations working toward the same general goal.

Answer the following questions:

- Do the pages work equally well for surfers and for people who have reached the page deliberately?
- Possible audiences include current and potential volunteers, donors, clients, and employees. Do the pages provide material for each audience? Is the

- material useful? Complete? Up-to-date? Does new material encourage people to return?
- What assumptions about audience do content and visuals suggest?
 - Can you think of ways that the pages could better serve their audiences?

As Your Instructor Directs,

- a. Share your results orally with a small group of students.

2.13 Analyzing People in Your Organization (LO 2-1 to LO 2-4)

1. Analyze your supervisor.
 - Does he or she like short or long explanations?
 - Does he or she want to hear about all the problems in a unit or only the major ones?
 - How important are punctuality and deadlines?
 - How well informed about a project does he or she wish to be?
 - Is he or she more approachable in the morning or the afternoon?
 - What are your supervisor's major hassles?
2. Analyze other workers in your organization.
 - Is work "just a job" or do most people really care about the organization's goals?
 - How do workers feel about clients or customers?
 - What are your co-workers' major hassles?

2.14 Persuading a Lender to Defer Paying a Student Loan (LO 2-2)

Many college graduates today leave school with large debts from student loans. Though the loans must be repaid, the time to do so and the monthly payment are determined by the lender. With a tough economy making it harder to find a job, students may also find it harder to repay loans. Many lenders, however, expect them to start doing so upon graduation. You plan to request a deferral to start paying back your loan.

To do so, answer the following questions about your audience.

- What is at stake for the lender if it defers the loan?
- What regulating bodies (e.g., state and federal government) govern how a lender may alter the terms of a loan agreement?

2.15 Sending a Question to a Website (LO 2-2, LO 2-3)

Send a question or other message that calls for a response to a website. (►► Problem 13.12.) You could

- Ask a question about a product.
- Apply for an internship or a job (assuming you'd really like to work there).
- Ask for information about an internship or a job.
- Ask a question about an organization or a candidate before you donate money or volunteer.
- Offer to volunteer for an organization or a candidate. You can offer to do something small and one-time (e.g., spend an afternoon stuffing envelopes, put up a yard sign), or you can, if you want to, offer to do something more time-consuming or even ongoing.

- b. Present your results in an oral presentation to the class.
- c. Present your results in a memo to your instructor. Attach copies of the web pages.
- d. Share your results with a small group of students and write a joint memo reporting the similarities and differences you found.
- e. Post your results in an e-mail message to the class. Provide links to the two web pages.

3. Analyze your customers or clients.

- What attitudes do they have toward the organization and its products or services?
- What are their major hassles?
- Do education, age, or other factors affect the way they read?

As Your Instructor Directs,

- a. Write a memo to your instructor summarizing your analysis.
- b. Discuss your analysis with a small group of students.
- c. Present your analysis orally to the class.
- d. Combine your information with classmates' information to present a collaborative report comparing and contrasting your audiences at work.

- What objections might a lender raise to deferring the loan?
- What other resources might the lender suggest tapping in order to repay the loan?
- What might the lender expect from you as a guarantee that you will repay the loan after the deferral?
- What channel is the best way to reach the lender?
- What tone will work best in the message to the lender?

Pick a specific organization you might use and answer these questions about it.

- Does the organization ask for questions or offers? Or will yours "come out of the blue"?
- How difficult will it be for the organization to supply the information you're asking for or to do what you're asking it to do? If you're applying for an internship or offering to volunteer, what skills can you offer? How much competition do you have?
- What can you do to build your own credibility so the organization takes your question or request seriously?

2.16 Convincing Your Organization to Allow Flex-Time for Students (LO 2-2, LO 2-3)

Your organization has a generous tuition reimbursement program, but currently employees must take classes outside of regular business hours. You've noticed that many classes you want or need at the local university are offered infrequently during evenings and weekends. If a class is already full or you have another commitment, you often have to wait months before a seat is available. Your co-workers are similarly affected.

You plan to write a memo to upper management describing your solution: flex-time for full-time employees going to school. Your solution would allow employees to reschedule up to five hours each week to take classes during work hours. Employees could make up hours in the mornings, evenings, or weekends and could only reschedule hours if meetings and other work-related duties don't conflict.

Pick an organization you know something about and answer the following questions:

- What is the purpose of the tuition reimbursement program?
- How do employees benefit? How does the organization benefit?

2.17 Announcing Holiday Diversity (LO 2-2, LO 2-3)

To better respect the religious and ethnic diversity of your employees, your organization will now allow employees to take any 10 days off. (►► Problem 13.9.) Any religious, ethnic, or cultural holiday is acceptable. (Someone who wants to take off Cinco de Mayo or Bastille Day can do so.) As Vice President for Human Resources, you need to announce the policy.

Pick a specific organization you know something about and answer these questions about it.

- What religious and ethnic groups do your employees come from?
- How much do various groups know about each others' holidays?

- Will it cost the company money or lost efficiency to offer flex-time?
- What obstacles must be overcome regarding organizational culture?
- How will employee schedules be tracked? Who will be responsible?
- How would you deal with the objection that employees could take distance-learning courses, such as those offered on the web?
- What is the company's competitive position? Is it growing? Shrinking?

Polishing Your Prose

Comma Splices

In filmmaking, editors might *splice*, or connect, two segments of film with tape to create one segment. A *comma splice* occurs when writers try to create one sentence by connecting two sentences with only a comma.

Correct: We shipped the order on **Tuesday**. It arrived on Wednesday.

Incorrect: We shipped the order on **Tuesday**, it arrived on Wednesday. (comma splice)

Comma splices are almost always inappropriate in business communication. (Poetry and fiction sometimes use comma splices to speed up action or simulate dialect; some sales letters and advertisements use comma splices for the same effect, though not always successfully.)

- What is the general climate for religious and ethnic tolerance? Should the message have a secondary purpose of educating people about less-common holidays?
- Is your organization open every day of the year, or will you be closed on some holidays (e.g., Christmas, New Year's Day)? If an employee chooses to work on a day when offices or factories are closed, what should he or she do? Work at home? Get a key? (How? From whom?) What kinds of work could a person working alone most profitably do?

Fix a comma splice in one of four ways:

1. If the ideas in the sentences are closely related, use a semicolon:
We shipped the order on **Tuesday**; it arrived on Wednesday.
2. Add a coordinating conjunction (such as *and*, *or*, or *but*):
We shipped the order on **Tuesday**, and it arrived on Wednesday.
3. Make the incorrect sentence into two correct ones:
We shipped the order on **Tuesday**. It arrived on Wednesday.
4. Subordinate one of the clauses:
Because we shipped the order on **Tuesday**, it arrived on Wednesday.

Exercises

Fix the comma splices in the following sentences.

1. Dress appropriately for your job interview, wear your best suit.
2. Wednesday was the last time we did anything on our Facebook page, ask Sandy to post an update on our news feed, please.
3. Because of storms, Ethan's flight was delayed, he arrived in Tulsa 30 minutes after the ceremony started but was able to give his speech.
4. Suri decided to hold the meeting online, that will save a considerable amount of money in our travel budget.
5. We've narrowed down our hiring choices to Michael, Isabella, and Dylan, we should schedule another round of interviews to make our final decision.
6. The Purchasing Department needs copies of your receipts from the Kyoto trip, if you submit them by Friday, you will be reimbursed.
7. Liudmila and Carlos developed the reorganization plan for Gemma Infotech, in a display of interdepartmental cooperation, Linda, Mehran, and Alex helped to revise it.
8. About an hour after the executive council meeting, we got a call that the proposal had been accepted, needless to say, it was great news for the team!
9. Dr. Faulkner, head of the Savannah research project, asked us to send the report directly to the CDC, we should hear confirmation of the findings by April 20.
10. Lani Kapur, who graduated from Oxford University and spent several years in Geneva, is fluent in French and German, she would be an excellent candidate to lead the consulting team in Western Europe.

Check your answers to the odd-numbered exercises at the back of the book.

Module

3

Communicating Across Cultures

LEARNING OBJECTIVES

Module 3 explores the many facets of communicating across cultures in business. After completing the module, you should be able to

- | | | | |
|---------------|--|---------------|---|
| LO 3-1 | Define culture through context. | LO 3-5 | Apply strategies for workplace discrimination solutions. |
| LO 3-2 | Compare and contrast dimensions of culture. | LO 3-6 | Apply strategies for bias-free documents. |
| LO 3-3 | Apply strategies for international communication success. | | |
| LO 3-4 | Identify differences among generations. | | |

In any organization, you'll work with people whose backgrounds differ from yours. Residents of small towns and rural areas have different notions of friendliness than do people from big cities. Californians may talk and dress differently than people in the Midwest. The cultural icons that resonate for Baby Boomers may mean little to teenagers. The world continues to become globalized.

As Americans become busier and globalization continues to change the workplace, consumer services performed by employees in other countries are becoming more common. For instance, jet-setting U.S. executives can have personal assistants from Ask Sunday—based in New York but with most of its workforce in India—handle everything from ordering local takeout meals to sending birthday greetings to friends and family. With 10,000 subscribers, TutorVista provides tutoring in a range of K–12 subjects from 600 tutors based in India.¹ “Offshoring” of jobs is expected to continue, with Forrester Research, Inc., predicting that American employers will move about 3.3 million white-collar service jobs overseas in the next five years.²

The last 30 years have seen a growing emphasis on diversity, with the “news” that more and more women and people of color are joining the U.S. workforce.³ But people outside the power structure have always worked. In the past, such people (including non-elite white males) may have been relegated to low-status and low-paying jobs, to agricultural or domestic work, or to staff rather than line work and management.

People often want easy answers about diversity and culture when only guidelines are possible. Human beings are individuals as much as they are part of a group. In many ways, we've only begun to scratch the surface for understanding and respecting the diversity around us; no single discussion can offer all the answers. Because learning about others is an ongoing process, we must find the answers as much through our experiences as through research, using sensitivity and respect. Use this module as a starting point.

“Diversity” in the workplace comes from many sources:

- Gender
- Race and ethnicity
- Regional and national origin
- Social class
- Religion
- Age
- Sexual orientation
- Physical ability

Many young Americans are already multicultural. According to U.S. census figures, a third of Americans aged 17 to 27 are Native Americans or of African, Latino, or Asian descent.⁴ One study showed that 80% of teens have a close friend of another race.⁵

Bilingual Canada has long compared the diversity of its people to a “mosaic.” But now immigrants from Italy, Greece, and Hong Kong add their voices to the medley of French, English, and Inuit. Radio station CHIN in Toronto broadcasts in 32 languages.⁶ The United States has more than 1,100 mosques and Islamic centers, 1,500 Buddhist centers, and 800 Hindu centers.⁷ People work in Japanese plants in Peterborough, New Hampshire; Marysville, Ohio; and Smyrna, Tennessee. Employees at the Digital Equipment plant in Boston come from 44 countries and speak 19 languages; the plant's announcements are printed in English, Chinese, French, Spanish, Portuguese, Haitian Creole, and Vietnamese.⁸

Diversity increases in the global marketplace, where your customers, suppliers, subordinates, or bosses may have different cultural values and business practices. Business increasingly transcends national boundaries. *BusinessWeek* reports that two-thirds of all industries either already operate globally or are in the process of doing so. Michelin, for instance, earns 35% of its profits in the United States, and McDonald's earns more than 62% of its income outside the United States. Nearly 98% of Nokia's sales are outside its home country, Finland.⁹

Many companies depend on vendors or operations in different countries. More software is written in Ireland than anywhere else in the world. India is a choice destination for service and high-tech industries. General Electric Capital's customer services calls are answered by 1,000 English-speaking Indian employees in New Delhi, workers respond to customer service e-mails for Compaq from offices in Madras, and Texas Instruments operates a design facility in Bangalore that is responsible for 225 patents. The 3M Corporation earns more than half of its annual revenue from outside the United States, including \$500 million in China, where it operates factories.¹⁰

As many companies have discovered, valuing diversity is good business as well as good social practice. A growing body of literature shows that ethnically diverse teams produce more and higher-quality ideas.¹¹ One problem with our awareness of difference, however, is that when someone feels shut out, he or she can attribute the negative interaction to prejudice, when other factors may be responsible. A second problem is that members of a dominant group can recognize difference but still expect everyone else to adapt to them, rather than making the effort to understand the preferred communication styles of other workers.

One in 12 marriages in the U.S. is now interracial, according to a Pew Research Center study. Out of the 4.8 million Americans who married someone of a different race, most live in western states like Nevada and California. According to the report, more than 25% of Asians and Hispanics who married in 2010 had a spouse of a different race compared to 9.4% of whites.

Source: Hope Yen, “Interracial Marriage in U.S. Hits New High,” February 16, 2012, http://hosted2.ap.org/OHCOL/8ef5320729ce4298abefc1903704cd5/Article_2012-02-16-US-Interracial-Marriage-id-03bb505a50d140009dfc4d0430889575.

By 2014, Asia will represent 43% of the world's online population, while North America will represent 13%.

Figure 3.1 Views of Communication in High- and Low-Context Cultures

	High-Context (Examples: Japan, United Arab Emirates)	Low-Context (Examples: Germany, Canada, the United States)
Preferred communication strategy	Indirectness, politeness, ambiguity	Directness, confrontation, clarity
Reliance on words to communicate	Low	High
Reliance on nonverbal signs to communicate	High	Low
Importance of written word	Low	High
Agreements made in writing	Not binding	Binding
Agreements made orally	Binding	Not binding
Attention to detail	Low	High

Is globalization best represented by fast food? In a way—researchers at South Africa's University of Stellenbosch say a Big Mac meal symbolizes how interconnected the world has become. Potatoes were originally domesticated in South America, and mustard came from India, onions and wheat from the Middle East, and coffee from Ethiopia. All told, the meal represents about 20 different plant species, as well as years of plant breeding from cultures around the globe.

What is “culture”? LO 3-1

- *Our understanding of acceptable actions and beliefs.*

Each of us grows up in a **culture** that provides patterns of acceptable behavior and belief. We may not be aware of the most basic features of our own culture until we come into contact with people who do things differently. For example, we read from left to right. In some countries, text goes from right to left or from bottom to top. In the United States, new acquaintances often ask, “What do you do?” as if our jobs tell people who we are. In many countries, new acquaintances want to know, “Who is your family?” and are more likely to judge people by their family ties.

We can categorize cultures as high-context or low-context.

- In **high-context cultures**, most of the information is inferred from the context of a message; little is “spelled out.” Japanese, Arabic, and Latin American cultures are high-context.
- In **low-context cultures**, context is less important; most information is explicitly spelled out. German, Scandinavian, and the dominant U.S. cultures are low-context.

As David Victor points out, high- and low-context cultures value different kinds of communication and have different attitudes toward oral and written channels (◀◀ Module 2, p. 24).¹² As Figure 3.1 shows, low-context cultures favor direct approaches and may see indirectness as dishonest or manipulative. The written word is seen as more important than oral statements, so contracts are binding but promises may be broken. Details matter. Business communication practices in the United States reflect these low-context preferences.

How does culture affect business communication? LO 3-2

- *In every single aspect!*

Culture influences every single aspect of business communication: how to show politeness and respect, how much information to give, how to motivate people, how loud to talk, even what size paper to use.

The discussion that follows focuses on national and regional cultures. But business communication is also influenced by the organizational culture and by personal culture, such as gender, race and ethnicity, social class, and so forth. As Figure 3.2 suggests, all of these

intersect to determine what kind of communication is needed in a given situation. Sometimes one kind of culture may be more important than another. For example, in a study of aerospace engineers in Europe, Asia, and the United States, researchers John Webb and Michael Keene found that the similarities of the professional discourse community outweighed differences in national cultures.¹³

Values, Beliefs, and Practices

Values and beliefs, often unconscious, affect our response to people and situations. Most North Americans, for example, value “fairness.” “You’re not playing fair” is a sharp criticism calling for changed behavior. In some countries, however, people expect certain groups to receive preferential treatment. Most North Americans accept competition and believe it produces better performance. The Japanese, however, believe competition leads to disharmony. U.S. businesspeople believe that success is based on individual achievement and is open to anyone who excels. In England and in France, success is more obviously linked to social class. And in some countries, people of some castes or races are prohibited by law from full participation in society.

Many people in the United States value individualism. Other countries may value the group. In traditional classrooms, U.S. students are expected to complete assignments alone; if they get much help from anyone else, they’re “cheating.” In Japan, in contrast, groups routinely work together to solve problems. In the dominant U.S. culture, quiet is a sign that people are working. In Japan, people talk to get the work done.¹⁴

Values and beliefs are influenced by religion. Christianity coexists with a view of the individual as empowered to make things happen. In some Muslim and Asian countries, however, it is seen as presumptuous to predict the future by promising action by a certain date. The Puritan work ethic legitimizes wealth by seeing it as a sign of divine favor. In other Christian cultures, a simpler lifestyle is considered to be closer to God.

These differences in values, beliefs, and practices lead to differences in what kinds of appeals motivate people. See Figure 3.3.

Nonverbal Communication

Nonverbal communication—communication that doesn’t use words—takes place all the time. Body language, the size of an office, or how long someone keeps a visitor waiting—all these communicate pleasure or anger, friendliness or distance, power and status.

Figure 3.2 National Culture, Organizational Culture, and Personal Culture Overlap

↻
Instant Replay

High- and Low-Context Cultures

In **high-context cultures**, most of the information is inferred from the context of a message; little is “spelled out.”

In **low-context cultures**, context is less important; most information is explicitly spelled out.

Soon after a flight takes off from La Guardia Airport, a passenger produces a small leather box, straps it to his forehead, and wraps what appears to be wires from it around his arm and hand. He prays. A terrorist bomber? No, a peaceful 17-year-old wearing *tefillin*, used in morning prayers by observant Jews. The sight, reported by a flight attendant, was enough for pilots to divert the plane to the nearest city, where federal authorities boarded to investigate. While all parties involved were of goodwill, a religious and cultural misunderstanding took on frightening overtones. Said Isaac Abraham, himself an observant Jew: "But the obvious reality of it is that when we see people carrying explosive material in their shoes and their pants and I am the passenger next to him and see someone strapping, I would panic too."

Source: James Barron, "A Flight is Diverted by a Prayer Seen as Ominous," *The New York Times*, January 21, 2010, <http://www.nytimes.com/2010/01/22/nyregion/22airplane.html?hpw>.

In Bulgaria, people nod their heads up and down to mean *no*. They shake their heads from side to side to mean *yes*.

Source: Glenna Dod and Gergana Kuneva, "Yes or No: Communication Barriers Between Bulgaria and The United States," ABC Canadian, Eastern U.S., Southeastern U.S. Joint Regional Conference, Nashville, TN, March 30–April 1, 2000.

Nonverbal signals can be misinterpreted just as easily as verbal symbols (words). A young woman took a new idea into her boss, who glared at her, brows together in a frown, as she explained her proposal. The stare and lowered brows symbolized anger to her, and she assumed he was rejecting her idea. Several months later, she learned that her boss always "frowned" when he was concentrating. The facial expression she had interpreted as anger had not been intended to convey anger at all.

Misunderstandings are even more common in communication across cultures. A European American teacher sends two African American students to the principal's office because they're "fighting." European Americans consider fighting to have started when loud voices, insults, and posture indicate that violence is likely. But African Americans may not assume that those signs alone will lead to violence: They can be part of nonviolent disagreements.¹⁵ An Arab student assumed that his U.S. roommate disliked him intensely because the U.S. student sat around the room with his feet up on the furniture, soles toward the Arab roommate. Arab culture sees the foot in general and the sole in particular as unclean; showing the sole of the foot is an insult.¹⁶

Learning about nonverbal language can help us project the image we want to project and make us more aware of the signals we are interpreting. However, even within a single culture a nonverbal symbol may have more than one meaning.

Body Language

Posture and body movements connote energy and openness. North American **open body positions** include leaning forward with uncrossed arms and legs, with the arms away from the body. **Closed or defensive body positions** include leaning back, sometimes with both hands behind the head, arms and legs crossed or close together, or hands in pockets. As the labels imply, open positions suggest that people are accepting and open to new ideas. Closed positions suggest that people are physically or psychologically uncomfortable, that they are defending themselves and shutting other people out.

People who cross their arms or legs often claim that they do so only because the position is more comfortable. Certainly crossing one's legs is one way to be more comfortable in a chair that is the wrong height. U.S. women are taught to keep their arms close to their bodies and their knees and ankles together. But notice your own body the next time you're in a perfectly comfortable discussion with a good friend. You'll probably find that you naturally assume open body positions. The fact that so many people in organizational settings adopt closed positions may indicate that many people feel at least slightly uncomfortable in school and on the job.

The Japanese value the ability to sit quietly. They may see the U.S. tendency to fidget and shift as an indication of a lack of mental or spiritual balance. Even in North America, interviewers and audiences usually respond negatively to nervous gestures such as fidgeting with a tie or hair or jewelry, tapping a pencil, or swinging a foot.

Eye Contact

North American whites see **eye contact** as a sign of honesty. But in many cultures, dropped eyes are a sign of appropriate deference to a superior.

Puerto Rican children are taught not to meet the eyes of adults.¹⁷ The Japanese are taught to look at the neck.¹⁸ In Korea, prolonged eye contact is considered rude. The lower-ranking person is expected to look down first.¹⁹ In Muslim countries, women and men are not supposed to have eye contact.

These differences can lead to miscommunication in the multicultural workplace. Superiors may feel that subordinates are being disrespectful when the subordinate is being fully respectful—according to the norms of his or her culture.

Gestures

Americans sometimes assume that they can depend on gestures to communicate if language fails. But Birdwhistell reported that "although we have been searching for 15 years [1950–65], we have found no gesture or body motion which has the same meaning in all societies."²⁰

Gestures that mean approval in the United States may have very different meanings in other countries. The “thumbs up” sign that means “good work” or “go ahead” in the United States and most of western Europe is a vulgar insult in Greece. The circle formed with the thumb and first finger that means *OK* in the United States is obscene in Southern Italy and can mean “you’re worth nothing” in France and Belgium.²¹

In the question period after a lecture, a man asked the speaker, a Puerto Rican professor, if shaking the hands up and down in front of the chest, as though shaking off water, was “a sign of mental retardation.” The professor was horrified: in her culture, the gesture meant “excitement, intense thrill.”²² Studies have found that Spanish-speaking doctors rate the mental abilities of Latino patients much higher than do English-speaking doctors. The language barrier is surely part of the misevaluation by English-speaking doctors. Cultural differences in gestures may contribute to the misevaluation. Similarly, European American supervisors in the workplace may underestimate the abilities of Hispanics because gestures differ in the two cultures.

Space

Personal space is the distance someone wants between himself or herself and other people in ordinary, nonintimate interchanges. Observation and limited experimentation show that most North Americans, North Europeans, and Asians want a bigger personal space than do Latin Americans, French, Italians, and Arabs. People who prefer lots of personal space are often forced to accept close contact on a crowded elevator or subway.

Even within a culture, some people like more personal space than do others. One U.S. study found that men took more personal space than women did.²³ In many cultures, people who are of the same age and sex take less personal space than do mixed-age or mixed-sex groups. Latin Americans will stand closer to people of the same sex than North Americans would, but North Americans stand closer to people of the opposite sex.²⁴

Touch

Repeated studies have shown that babies need to be touched to grow and thrive and that older people are healthier both mentally and physically if they are touched. But some people are more comfortable with touch than others. Some people shake hands in greeting but otherwise don’t like to be touched at all, except by family members or lovers. Other people, having grown up in families that touch a lot, hug as part of a greeting and touch even casual friends. Each kind of person may misinterpret the other. A person who dislikes touch may seem unfriendly to someone who’s used to touching. A toucher may seem overly familiar to someone who dislikes touch.

Studies in the United States have shown that touch is interpreted as power: More powerful people touch less powerful people. When the toucher had higher status than the recipient, both men and women liked being touched.²⁵

Most parts of North America allow opposite-sex couples to hold hands or walk arm-in-arm in public but frown on the same behavior in same-sex couples. People in Asia, the Middle East, and South America have the opposite expectation: Male friends or female friends can hold hands or walk arm-in-arm, but it is slightly shocking for an opposite-sex couple to touch in public. In Iran, even handshakes between men and women are seen as improper.²⁶

People who don’t know each other well may feel more comfortable with each other if a piece of furniture separates them. For example, a group may work better sitting around a table than just sitting in a circle. In North America, a person sitting at the head of a table is generally assumed to be the group’s leader. However, one experiment showed that when a woman sat at the head of a mixed-sex group, observers assumed that one of the men in the group was the leader.²⁷

Spatial Arrangements

In the United States, the size, placement, and privacy of one’s office connote status. Large corner offices have the highest status. An individual office with a door that closes connotes

To better understand how the immune system responds to touch, researchers studied two groups of healthy adults. One group received 45 minutes of Swedish massage while the other received 45 minutes of lighter touch. The group receiving massages showed “substantially more white blood cells—including natural killer cells, which help the body fight viruses and other pathogens—and fewer types of inflammatory cytokines associated with autoimmune diseases.”

The World Factbook, published online by the Central Intelligence Agency, is a good starting point for learning about the people of another country. Extensive country-by-country information includes languages spoken and communications technology available.

Doing business internationally requires an understanding of language and business practices and a sensitivity to cultural differences. But look for similarities, too, to understand the “big picture.” For instance, you probably recognize the place in this photo as a gas station, even if the words, layout, and color scheme are unfamiliar. Seeing similarities while honoring differences can help you adapt quickly and effectively.

Color associations can lead to workplace revelations. Delta Air Lines irked flight attendants with a designer red uniform in sizes 18 and below when other uniforms also came in larger sizes. *USA Today* gathered 877 CEOs to gauge favorite colors. Magenta won. According to consultant Dewey Sadka, it suggests a more sensitive and less perfectionist personality than average and someone who is also suited to be an artist or teacher. Atlanta's MARTA officials named the train service into the city's Asian-American community the “yellow line,” even after John Yasutake, manager of equal opportunity and conflict resolution, pointed out negative connotations for Asian people, including 200,000 in the metropolitan area. Officials later renamed it the “gold line.”

Source: Harry R. Weber, “Some NWA Flight Attendants Want to Wear Red Dress,” July 10, 2009, <http://finance.yahoo.com/news/Some-NWA-flight-attendants-apf-1099900293.html?x=0&.v=3;> Del Jones, “Favorite Colors Test Shows CEOs Are Different; Take the Test,” *USA Today*, February 8, 2010, http://www.usatoday.com/money/companies/management/2010-02-08-ceocolors08_ST_N.htm; and Dan Chapman and Ariel Hart, “MARTA ‘yellow line’ to Doraville Angers Some in Asian Community,” *The Atlanta Journal-Constitution*, February 8, 2010, <http://www.ajc.com/news/atlanta/marta-yellow-line-to-294162.html>.

more status than a desk in a common area. Japanese firms, however, see private offices as “inappropriate and inefficient,” reports Robert Christopher. Only the very highest executives and directors have private offices in the traditional Japanese company, and even they will also have desks in the common areas.²⁸

Japanese homes have much smaller rooms than most U.S. homes. The Japanese use less furniture and arrange it differently: A small table will be in the center of the room. In cold weather, a heater is placed under the table; the tablecloth keeps the warm air around the legs and feet of everyone who sits at the table. Even though U.S. homes have more pieces of furniture than the traditional Japanese home, Japanese may see Western rooms as “empty” since Western furniture lines the walls, leaving a large empty space in the middle of the room.²⁹

Time

Organizations in the United States—businesses, government, and schools—keep time by the calendar and the clock. Being “on time” is seen as a sign of dependability. Other cultures may keep time by the seasons and the moon, the sun, internal “body clocks,” or a personal feeling that “the time is right.”

North Americans who believe that “time is money” are often frustrated in negotiations with people who take a much more leisurely approach. Part of the problem is that people in many other cultures want to establish a personal relationship before they decide whether to do business with each other.

The problem is made worse because various cultures mentally measure time differently. Many North Americans measure time in five-minute blocks. Someone who’s five minutes late to an appointment or a job interview feels compelled to apologize. If the executive or interviewer is running half an hour late, the caller expects to be told about the likely delay upon arriving. Some people won’t be able to wait that long and will need to reschedule their appointments. But in other cultures, 15 minutes or half an hour may be the smallest block of time. To someone who mentally measures time in 15-minute blocks, being 45 minutes late is no worse than being 15 minutes late is to someone who is conscious of smaller units.

Edward T. Hall distinguishes between **monochronic** cultures, which treat time as a resource, and **polychronic** cultures, which emphasize relationships. Researchers see the United States as monochronic. When U.S. managers feel offended because a Latin American manager also sees other people during “their” appointments, the two kinds of time are in conflict.

According to some scholars, Europeans schedule fewer events in a comparable period of time than do North Americans. Perhaps as a result, Germans and German Swiss see North Americans as too time-conscious.³⁰

Other Nonverbal Symbols

Many other symbols can carry nonverbal meanings: clothing, colors, age, and height, to name a few.

In the United States and Canada, certain styles and colors of clothing are considered more “professional” and more “credible.” In *Dress for Success* and *The Woman’s Dress for Success Book*, John T. Molloy tells readers what clothes carry nonverbal messages of success, prestige, and competence. In Japan, clothing denotes not only status but also occupational group. Students wear uniforms. Company badges indicate rank within the organization. Workers wear different clothes when they are on strike than they do when they are working.³¹

Colors can also carry meanings in a culture. In the United States, mourners wear black to funerals, while brides wear white. In pre-Communist China and in some South American tribes, white is the color of mourning. Purple flowers are given to the dead in Mexico.³² In Korea, red ink is used to record deaths but never to write about living people.³³

In the United States, youth is valued. Some men as well as some women color their hair and even have face-lifts to look as youthful as possible. In Japan, younger people defer to older people. Americans attempting to negotiate in Japan are usually taken more seriously if at least one member of the team is noticeably gray-haired.

Height connotes status in many parts of the world. Executive offices are usually on the top floors; the underlings work below. Even being tall can help a person succeed. Studies have shown that employers are more willing to hire men over 6 feet tall than shorter men with the same credentials. Studies of real-world executives and graduates have shown that taller men make more money. In one study, every extra inch of height brought in an extra \$600 a year.³⁴ But being too big can be a disadvantage. A tall, brawny football player complained that people found him intimidating off the field and assumed that he “had the brains of a Twinkie.”

Oral Communication

Effective oral communication requires cultural understanding. As Figure 3.4 shows, the purpose of and the information exchanged in business introductions differs across cultures.

Deborah Tannen uses the term **conversational style** to denote our conversational patterns and the meaning we give to them: the way we show interest, politeness, and appropriateness.³⁵ Your answers to the following questions reveal your own conversational style:

- How long a pause tells you that it’s your turn to speak?
- Do you see interruption as rude? Or do you say things while other people are still talking to show you’re interested and to encourage them to say more?
- Do you show interest by asking lots of questions? Or do you see questions as intrusive and wait for people to volunteer whatever they have to say?

Tannen concludes that the following features characterize her own conversational style:

Fast rate of speech

Fast rate of turn-taking

Yale University's Rudd Center for Food Policy and Obesity found that weight discrimination has increased, even though about two-thirds of Americans are overweight. Discrimination includes being denied jobs and receiving inferior medical care. So far, Michigan is the only state that bars weight discrimination. Even the famous are not immune. Actor and director Kevin Smith was asked to deplane when a pilot thought he didn't fit in his seat, per the airline's "Customer of Size" policy. Said Smith, who later received an apology from the company, "If you look like me, you may be ejected from Southwest Air."

Source: Catherine Arnst, “Bias of the Bulge,” *BusinessWeek*, April 28, 2008, 22; and “Silent Bob’ Not Silent About Being Ejected from Flight for Being Too Fat,” *The Columbus Dispatch*, February 15, 2010, http://www.dispatch.com/live/content/national_world/stories/2010/02/15/silent-bob-not-silent-about-ejection-from-flight.html?sid=101.

Figure 3.4 Cultural Contrasts in Business Introductions

	United States	Japan	Arab Countries
Purpose of introduction	Establish status and job identity; network	Establish position in group, build harmony	Establish personal rapport
Image of individual	Independent	Member of group	Part of rich culture
Information	Related to business	Related to company	Personal
Use of language	Informal, friendly; use first name	Little talking	Formal; expression of admiration
Values	Openness, directness, action	Harmony, respect, listening	Religious harmony, hospitality, emotional support

Source: Adapted from Farid Elashmawi and Philip R. Harris, *Multicultural Management 2000: Essential Cultural Insights for Global Business Success* (Houston: Gulf, 1998), 113.

In Japan, silence can mean “I don’t like your idea,” but it can also mean “I’m thinking.” Knowing this is essential for international negotiators. One American business person offered an apparatus to a Japanese customer for \$100,000. The customer sat quietly. After 10 minutes, the American, who couldn’t stand the silence any more, lowered his price \$10,000. Reading this through a U.S. lens, you might think that the Japanese customer was happy and perhaps even used silence deliberately. Not so. In fact, he was deeply disappointed by the poor negotiation. Relationships are far more important than price in Japan. How could someone be so impatient?

Source: Based on J. M. Ulijn, “How Can a Multicultural Workforce of a Company Successfully Communicate in International Trade?” *Acta Universitatis Wratislaviensis*, No. 1774, 264–65.

Persistence—if a turn is not acknowledged, try again
Preference for personal stories
Tolerance of, preference for simultaneous speech
Abrupt topic shifting

Different conversational styles are not better or worse than each other, but people with different conversational styles may feel uncomfortable without knowing why. A subordinate who talks quickly may be frustrated by a boss who speaks slowly. People who talk more slowly may feel shut out of a conversation with people who talk more quickly. Someone who has learned to make requests directly (“Please pass the salt”) may be annoyed by someone who uses indirect requests (“This casserole needs some salt”).

In the workplace, conflicts may arise because of differences in conversational style. Generation Xers often use a rising inflection on statements as well as questions. Xers see this style as gentler and more polite. But Baby Boomer bosses may see this speech pattern as hesitant, as if the speaker wants advice—which they then proceed to deliver.³⁶ Thomas Kochman claims that African Americans often use direct questions to criticize or accuse.³⁷ If Kochman is right, an African American employee might see a question (“Will that report be ready Friday?”) as a criticism of his or her progress. One supervisor might mean the question simply as a request for information. Another supervisor might use the question to mean “I want that report Friday.”

Daniel N. Maltz and Ruth A. Borker believe that differences in conversational style may be responsible for the miscommunication that sometimes occurs in male–female conversations. For example, researchers have found that women are much more likely to nod and to say *yes* or *mm hmm* than men are. Maltz and Borker hypothesize that to women, these symbols mean simply, “I’m listening; go on.” Men, on the other hand, may decode these symbols as “I agree” or at least “I follow what you’re saying so far.” A man who receives nods and *mms* from a woman may feel that she is inconsistent and unpredictable if she then disagrees with him. A woman may feel that a man who doesn’t provide any feedback isn’t listening to her.³⁸

www.travlang.com

to learn languages for international travel.

Understatement and Exaggeration

Closely related to conversational style is the issue of understatement and overstatement. The British have a reputation for understatement. Someone good enough to play at Wimbledon may say he or she “plays a little tennis.” Many people in the United States exaggerate. A U.S. businessman negotiating with a German said, “I know it’s impossible, but can we do it?” The German saw the statement as nonsensical: By definition, something that is impossible cannot be done at all. The American saw “impossible” as merely a strong way of saying “difficult” and assumed that with enough resources and commitment, the job could in fact be done.³⁹

Compliments

The kinds of statements that people interpret as compliments and the socially correct way to respond to compliments also vary among cultures. The statement “You must be really tired” is a compliment in Japan since it recognizes the other person has worked hard. The correct response is “Thank you, but I’m OK.” An American who is complimented on giving a good oral presentation will probably say “Thank you.” A Japanese, in contrast, will apologize: “No, it wasn’t very good.”⁴⁰

Statements that seem complimentary in one context may be inappropriate in another. For example, women in business are usually uncomfortable if male colleagues or superiors compliment them on their appearance: The comments suggest that the women are being treated as visual decoration rather than as contributing workers.

In Tanzania, it is a compliment to note that someone has gained weight.

Silence

Silence also has different meanings in different cultures and subcultures. Some Americans have difficulty doing business in Japan because they do not realize that silence almost always means that the Japanese do not like the Americans’ ideas. Muriel Saville-Troike reports that during a period of military tension, Greek air traffic controllers responded with silence when Egyptian planes requested permission to land. The Greeks intended silence as a refusal; the Egyptians interpreted silence as consent. Several people were killed when the Greeks fired on the planes as they approached the runway.⁴¹

Different understandings of silence can prolong problems with sexual harassment in the workplace. White women sometimes use silence to respond to comments they find offensive, hoping that silence will signal their lack of appreciation. But some men may think that silence means appreciation or at least neutrality. African American women may be more likely to “talk tough” in response to unwelcome advances.

Instant Replay

Two Views of Time

Monochronic cultures treat time as a resource.

Polychronic cultures emphasize relationships.

Translating a product’s advertising slogan is especially tricky, because the product’s benefits have to be packed into just a few words. A poor translation can be embarrassing, as in the following examples:

Kentucky Fried Chicken’s slogan in English: *Finger lickin’ good.*

Meaning in Chinese translation: *Eat your fingers off.*

Otis Engineering Corporation’s slogan: *Completion equipment.*

Meaning in Russian translation: *Equipment for orgasms.*

Parker Pen Company’s slogan: *Avoid embarrassment.*

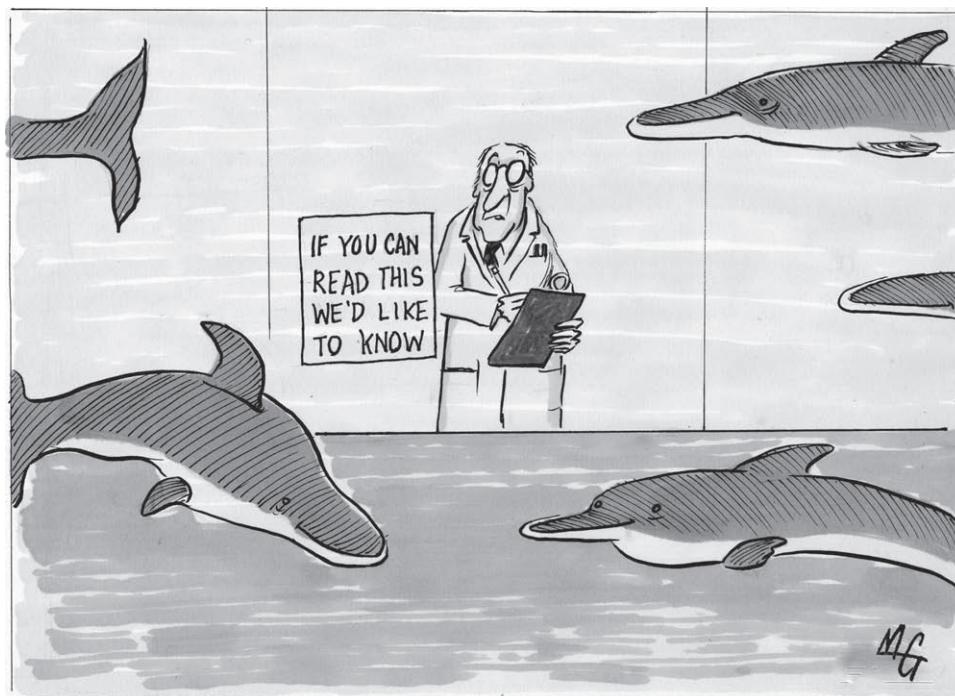

Meaning in Spanish translation: *Avoid pregnancy.*

Perdue Farms’ slogan: *It takes a tough man to make a tender chicken.*

Meaning in Spanish translation: *It takes a sexually excited man to make a chicken affectionate.*

Experts disagree on how to define generations or even what to call them. For example, the U.S. Census Bureau says Baby Boomers were born from 1946 to 1964. On the other hand, authors William Strauss and Neil Howe say from 1943 to 1960. For them, Millennials start with births in 1982, but Deloitte Consulting concludes there is no definitive agreement among experts on birth years (or even terms, including *Generation Y* and the *Internet Generation*), with anywhere from 1978 to 1995 possible and 1981 to 1993 most popular. Generation X exists somewhere between Baby Boomers and Millennials.

Sources: U.S. Census Bureau, "Oldest Baby Boomers Turn 60!" (News release), January 3, 2006, downloaded at www.census.gov/Press-Release/www/

(continued)

Many developing countries have gone straight to cell phones, skipping the expensive step of laying cables. Many owners of cell phones have become entrepreneurs, allowing people to make calls on their phones for a small fee. Now, farmers can call to find out what prices are in the cities so they aren't at the mercy of what wholesalers claim.

Writing to International Audiences

Most cultures are more formal than the United States. When you write to international audiences, use titles, not first names. Avoid contractions, slang, and sports metaphors.

The patterns of organization that work for North American audiences may need to be modified for international correspondence. For most cultures, buffer negative messages (► Module 11) and make requests (► Module 12) more indirect. As Figure 3.5 suggests, you may need to modify style, structure, and strategy when you write to international readers. Make a special effort to avoid phrases that could be seen as arrogant or uncaring. Cultural mistakes made orally float away on the air; those made in writing are permanently recorded.

There are so many different cultures! How can I know enough to communicate? **LO 3-3**

► Focus on being sensitive and flexible.

The first step in understanding another culture is to realize that it may do things very differently, and that the difference is not bad or inferior. But people within a single culture differ. The kinds of differences summarized in this module can turn into stereotypes, which can be just as damaging as ignorance. Don't try to memorize the material here as a rigid set of rules. Instead, use the examples to get a sense for the kinds of things that differ from one culture to another. Test these generalizations against your experience. When in doubt, ask.

If you plan to travel to a specific country, or if you work with people from other cultures, read about that country or culture and learn a little of the language. Also talk to people. That's really the only way to learn whether someone is wearing black as a sign of mourning, as a fashion statement, or as a color that slenderizes and doesn't show dirt.

As Brenda Arbeláez suggests, the successful international communicator is

- Aware that his or her preferred values and behaviors are influenced by culture and are not necessarily "right."
- Flexible and open to change.
- Sensitive to verbal and nonverbal behavior.
- Aware of the values, beliefs, and practices in other cultures.
- Sensitive to differences among individuals within a culture.⁴²

Are differences among generations changing the workplace and how we communicate? LO 3-4

► According to some observers, yes.

Baby Boomers and Millennials, sometimes called Generation Y or the Internet Generation, have made headlines in recent years, clashing over such issues as appropriate dress, ethics, hierarchies, expectations, and responsiveness in the workplace. Have the conflicts been blown out of proportion? Perhaps. Friction among members of generations can be found throughout history. But corporations have gone so far as to hire consultants to sort things out, and billions of dollars are spent annually now to help accommodate and motivate employees. How America's two largest generations are able to resolve their differences, real or perceived, has profound implications for changes in the workplace.

While *some* Millennials shake their heads at Baby Boomers' mandates that employees start at entry-level jobs or work well beyond 40 hours per week, *some* members of the older generation lament perceived impertinence, poor communication skills, and what consultant Bruce Tulgan refers to as "self-esteem on steroids."⁴³ Differing values may be involved, too. According to a Pew Research Center poll, 81% in Generation Y say being rich is their most important life goal.⁴⁴

Of Millennials' strengths, including optimism, confidence, enthusiasm, organization, and goal orientation, their greatest may be with technology. No generation has ever been as plugged in as the Millennials, who are accomplished multitaskers, so it's probably unsurprising that a Deloitte Consulting study found that 84% of them text message, 62% watch YouTube and similar sites, and 56% create their own entertainment.⁴⁵ Accordingly, supervisors relying on "snail mail," voice mail, or even e-mail messages to contact Millennial employees may find they're better off texting or adopting newer technologies, and vice versa.⁴⁶

Unlike significantly smaller Generation X, whose also-tech-savvy members were born after the Baby Boomers but before the Millennials, Generation Y has a reputation for wanting to work in peer groups and with close direction from supervisors, much to the chagrin of co-workers valuing autonomy. Workstations that allow face-to-face communication, opportunities to access social networking sites like Facebook and Myspace, and increased use of mobile technologies, such as iPods, laptops, or cell phones, are attractive to many Millennials.

In the same spirit, greater attention to detail, especially when it comes to writing, may go a long way for Millennials in impressing colleagues and supervisors:

- Read often to enhance literacy.
- Edit for grammar and proofread for spelling (► Modules 14–16).
- Avoid e-mail abbreviations in business correspondence and be mindful of netiquette (► Module 13).
- Use the appropriate tone, format, and language for the intended audience (► Module 4).
- Build common ground when negotiating (► Module 12 BCS Box, p. 198).
- Find a mentor or role model to further develop skills and adapt to what the organization wants (◀ Module 2 BCS Box, p. 20).

As Generation Y has shown great facility with gathering information—according to one survey, of U.S. adults visiting a library recently, 62% were from Generation Y, and 65% of all patrons used computers there to do web research⁴⁷—going deeper while analyzing the credibility of information, especially from the Internet, would also be advantageous.

releases/archives/facts_for_features_special_editions/006105.html; William Strauss and Neil Howe, *The Fourth Turning: An American Prophecy* (LifeCourse Associates), downloaded on December 27, 2007, at www.fourthturning.com/my_html/body_generations_in_history.html; and Deloitte Consulting, "Who Are the Millennials? AKA Generation Y," downloaded on August 19, 2012, at http://www.deloitte.com/assets/Dcom-UnitedStates/Local%20Assets/Documents/us_consulting_hc_millennials_110608.pdf.

According to the Young Entrepreneur Council, 36% of the U.S. workforce will be Millennials by 2014, with the number climbing to 46% by 2020. Writer Larissa Faw believes Millennials struggle to identify themselves by profession, in part because they are "career hustling," or working multiple jobs simultaneously. The concept is older than it may seem. Many educated people have held multiple jobs or worked in several fields at once—college faculty, for instance, often divide their time among teaching, writing, speaking, consulting, and operating side businesses—but Faw notes, "I don't know any Millennial who self-identifies using only one 'job.'"

Source: Larissa Faw, "How Millennials Are Redefining Their Careers as Hustlers," *Forbes*, July 19, 2012, <http://www.forbes.com/sites/larissafaw/2012/07/19/how-millennials-are-redefining-their-careers-as-hustlers/>.

Mark Zuckerberg represents a new generation of CEO—born in 1984, he founded Facebook.com. The popular social website is worth billions of dollars.

Building a Critical Skill

Dealing with Discrimination LO 3-5

Dealing with discrimination is never easy. It's generally accepted that women and racial minorities face the most discrimination in the United States, though chances are everyone has experienced it in some form. Successfully handling discrimination means understanding the situation and your options.

Not Everything Is Discrimination.

IBM, AT&T, and Lucent Technologies Manager Roland Nolan writes, "As people of color, we don't have ready access to the 'good old boy' network or to powerful mentors who can give us a leg up. But the reality is, not all white males do, either." One woman complained that male clients tested her because she is a woman. But another successful woman pointed out that men test other men, too.

Decide on a Strategy.

Despite earning outstanding performance reviews and having two master's degrees, including an MBA, and a Ph.D., Cheryl Green kept getting passed over for promotion at a Fortune 500 company. When she asked why, her boss told her she might make vice president—if she went back to school. "I understood at that moment that I wasn't getting into the club no matter how many hurdles I jumped," says Green.

Many women and minorities find themselves facing a "glass ceiling" that keeps them from rising to levels for which they are qualified. In promotion situations, Green advises people who might face discrimination to

- Ask for honest feedback.
- Find a mentor.
- Avoid casting yourself as the victim.
- Be prepared to move on.

The experience showed Green that many companies still need to understand the importance of diversity. She now runs her own human-resources consulting firm, Green Resource Group.

Chart Your Own Path.

African Americans, Latinos, and Asian Americans make up only 19% of the advertising industry's employees and only 3% of its management positions, yet people of color represent approximately 30% of the U.S. population and trillions of dollars in buying power.

"It's hard for people (of color) to be in a business that is predominantly about white culture," says Wanla Cheng, who notes that after being in the industry a couple of years, "it became painfully obvious that there weren't people above a certain level. The bulk of people of color were administrative assistants or in the mail room . . . it was disheartening."

Carmen Jones founded Solutions Marketing Group (www.disability-marketing.com) to help mainstream businesses serve people with disabilities—a group with roughly \$1 trillion in spending power.

Source: "Taking the 'Dis' Out of Disability," *Black Enterprise*, March 2002, 102.

She had good experiences but also notes, "I had to work harder at fitting into the advertising-industry culture."

Cheng did break the glass ceiling at several agencies but ultimately left to found Asia Link Consulting Group, which specializes in multicultural marketing and research.

Take the High Road.

When Tiger Woods heard of friend and Golf Channel anchor Kelly Tilghman's bizarre comment about him during a national broadcast, the sports legend issued a statement that he felt she meant no harm. Woods, whose heritage includes Asian, African, and European ancestry, helped end the media frenzy surrounding Tilghman and her "lynch him" remark, noting, "We all say things we do regret, and that's certainly a moment she does regret." Tilghman did not escape unscathed. In addition to public embarrassment, she was suspended from her job. Woods himself would later face intense scrutiny over unrelated revelations of marital infidelity.

As stated earlier in this module, people are individuals as much as they are members of groups, and for many Millennials, Gen-Xers, and Baby Boomers, intergenerational conflicts are nonexistent. If you do sense tension, be flexible and think about the situation from the other person's point of view (►► Module 6 BCS Box, p. 97). That's good advice for any generation.

How can I make my documents bias-free? LO 3-6

► Start by using nonsexist, nonracist, and nonagist language.

Bias-free language is language that does not discriminate against people on the basis of sex, physical condition, race, age, or any other category. Bias-free language is fair and friendly; it complies with the law. It includes all readers; it helps to sustain goodwill. When you produce newsletters or other documents with photos and illustrations, choose a sampling of the whole population, not just part of it.

Making Language Nonsexist

Nonsexist language treats both sexes neutrally. Check to be sure your writing is free from sexism in four areas: words and phrases, job titles, pronouns, and courtesy titles. Courtesy titles are discussed in Module 9 on format. Words and phrases, job titles, and pronouns are discussed in this module.

Words and Phrases

If you find any of the terms in the first column in Figure 3.6 in your writing or your company's documents, replace them with terms from the second column.

Not every word containing *man* is sexist. For example, *manager* is not sexist. The word comes from the Latin *manus*, meaning *hand*; it has nothing to do with maleness.

Avoid terms that assume that everyone is married or is heterosexual.

Biased: You and **your husband** or wife are cordially invited to the dinner.

Better: You and **your guest** are cordially invited to the dinner.

Nike's commemorative Olympic T-shirt, emblazoned with "Gold Digging" and made available only to women, was rebuked for sexism.

Source: Ryan Wooley, "Is Nike Being Sexist with 'Gold Digging' TShirt?" CBS Detroit 62, August 16, 2012, <http://detroit.cbslocal.com/2012/08/16/is-nike-being-sexist-with-these-selling-of-this-olympic-shirt/>.

Instant Replay

The successful international communicator is

- Aware that his or her preferred values and behaviors are influenced by culture and are not necessarily "right."
- Flexible and open to change.
- Sensitive to verbal and nonverbal behavior.
- Aware of the values, beliefs, and practices in other cultures.
- Sensitive to differences among individuals within a culture.

In 2007, women earned 166 associate's degrees and 135 bachelor's degrees for every 100 earned by men, according to the U.S. Department of Education. That factor helps suggest why men were harder hit by the recession that followed than women. A study by New Zealand-based researcher James Flynn also revealed that women now score higher on IQ tests than men.

(continued)

Figure 3.6 Getting Rid of Sexist Terms and Phrases

Instead of	Use	Because
The girl at the front desk	The woman's name or job title: "Ms. Browning," "Rosa," "the receptionist"	Call female employees women just as you call male employees men. When you talk about a specific woman, use her name, just as you use a man's name to talk about a specific man.
The ladies on our staff	The women on our staff	Use parallel terms for males and females. Therefore, use ladies only if you refer to the males on your staff as gentlemen. Few businesses do, since social distinctions are rarely at issue.
Manpower Manhours Manning	Personnel Hours or worker hours Staffing	The power in business today comes from both women and men. If you have to correspond with the U.S. Department of Labor's Division of Manpower Administration, you are stuck with the term. When you talk about other organizations, however, use nonsexist alternatives.
Managers and their wives	Managers and their guests	Managers may be female; not everyone is married.

online.wsj.com/article/SB1000142405274870389004575033762482114190.html; and Carrie Gann, "Women Beat Men on IQ Tests for First Time," ABC News, July 16, 2012, <http://abcnews.go.com/blogs/health/2012/07/16/women-beat-men-on-iq-tests-for-first-time/>.

While the U.S. population has always been diverse, sensitivity to many groups still lags. Vodka maker Belvedere unveiled an ad featuring a terrified woman trying to get away from a grinning man and the tagline "Unlike some people, Belvedere goes down smoothly," apparently making light of both rape and misogyny. A viral campaign for the Lung Cancer Alliance—using posters with such statements as "Hipsters Deserve to Die" and "Crazy Old Aunts Deserve to Die"—raised ire, as some viewed the ads as offensive rather than ironic. Snackfood company Popchips produced a campaign that featured Ashton Kutcher appearing in "brown face" as a man of Asian Indian descent, much to the chagrin of many people who saw it.

Sources: Jared T. Miller, "Belvedere Vodka Retracts Offensive Ad, Flubs Apology," *Time*, March 25, 2012, Read more: <http://newsfeed.time.com/2012/03/25/belvedere-vodka-retracts-offensive-adflubs-apology/#ixzz20dPB12J6>; Marissa Bailey, "Offensive or Thought-Provoking? 'Deserve to Die' Ads Are Turning Heads," *CBS Channel 2 News*, June 25, 2012, <http://chicago.cbslocal.com/2012/06/25/offensive-or-thought-provoking-deserve-to-die-ads-are-turning-heads/>; and Camille Mann, "Ashton Kutcher's Popchip Ads Pulled After Called Racist," *CBS News*, May 3, 2012, http://www.cbsnews.com/8301-31749_162-57426873-10391698/ashton-kutchers-popchipads-pulled-after-called-racist/.

Job Titles

Use neutral titles which do not imply that a job is held only by men or only by women. Many job titles are already neutral: *accountant, banker, doctor, engineer, inspector, manager, nurse, pilot, secretary, technician*, to name a few. Other titles reflect gender stereotypes and need to be changed.

Instead of	Use
Businessman	A specific title: executive, accountant, department head, owner of a small business, men and women in business, businessperson
Chairman	Chair, chairperson, moderator
Foreman	Supervisor (from <i>Job Title Revisions</i>)
Salesman	Salesperson, sales representative
Waitress	Server
Woman lawyer	Lawyer
Workman	Worker, employee. Or use a specific title: crane operator, brick-layer, etc.

Pronouns

When you write about a specific person, use the appropriate gender pronouns:

In **his** speech, **John** Jones said that . . .
In **her** speech, **Judy** Jones said that . . .

When you are not writing about a specific person, but about anyone who may be in a given job or position, traditional gender pronouns are sexist.

- Sexist: a. Each **supervisor** must certify that the time sheet for **his** department is correct.
Sexist: b. When the **nurse** fills out the accident report form, **she** should send one copy to the Central Division Office.

Business writing uses four ways to eliminate sexist generic pronouns: use plurals, use second-person *you*, revise the sentence to omit the pronoun, and use pronoun pairs. Whenever you have a choice of two or more ways to make a phrase or sentence nonsexist, choose the alternative that is the smoothest and least conspicuous.

The following examples use these methods to revise sentences.

1. Use plural nouns and pronouns.

- Nonsexist: a. **Supervisors** must certify that the **time sheets** for **their departments** are correct.

Note: When you use plural nouns and pronouns, other words in the sentence may need to be made plural too. In the previous example, plural supervisors have plural time sheets and departments.

Avoid mixing singular nouns and plural pronouns.

- Nonsexist but lacks agreement: a. Each **supervisor** must certify that the time sheet for **their** department is correct.

Because *supervisor* is singular, it is incorrect to use the plural *they* to refer to it. The resulting lack of agreement is becoming acceptable orally but is not yet acceptable to many readers in writing. Instead, use one of the four grammatically correct ways to make the sentence nonsexist.

2. Use *you*.

- Nonsexist: a. **You** must certify that the time sheet for **your** department is correct.
Nonsexist: b. When **you** fill out an accident report form, send **one** copy to the Central Division Office.

You is particularly good for instructions and statements of the responsibilities of someone in a given position. Using *you* as the understood subject also shortens sentences, because you write "Send one copy" instead of "You should send one copy." It also makes your writing more direct.

3. Substitute an article (*a*, *an*, or *the*) for the pronoun, or revise the sentence so that the pronoun is unnecessary.

- | | |
|------------|--|
| Nonsexist: | a. The supervisor must certify that the time sheet for the department is correct. |
| Nonsexist: | b. The nurse will |
| | 1. Fill out the accident report form. |
| | 2. Send one copy of the form to the Central Division Office. |

4. When you must focus on the action of an individual, use pronoun pairs.

- | | |
|------------|---|
| Nonsexist: | a. The supervisor must certify that the time sheet for his or her department is correct. |
| Nonsexist: | b. When the nurse fills out the accident report form, he or she should send one copy to the Central Division Office. |

Making Language Nonracist and Nonagist

Language is **nonracist** and **nonagist** when it treats all races and ages fairly, avoiding negative stereotypes of any group. Use these guidelines to check for bias in documents you write or edit:

- **Give someone's race or age only if it is relevant to your story.** When you do mention these characteristics, give them for everyone in your story—not just the non-Caucasian, non-young-to-middle-aged adults you mention.
- **Refer to a group by the term it prefers. As preferences change, change your usage.** Sixty years ago, *Negro* was preferred as a more dignified term than *colored* for African Americans. As times changed, *black* and *African American* replaced it. Surveys in the mid-1990s showed that almost half of blacks aged 40 and older preferred *black*, but those 18 to 39 preferred *African American*.⁴⁸

Oriental has been replaced by *Asian*.

The term *Latino* is the most acceptable group term to refer to Mexican Americans, Cuban Americans, Puerto Ricans, Dominicans, Brazilians, and other people with Central and Latin American backgrounds. (*Latina* is the term for an individual woman.) Better still is to refer to the precise group. The differences among various Latino groups are at least as great as the differences among Italian Americans, Irish Americans, Armenian Americans, and others descended from various European groups.

Native American is often preferred to *American Indian*, but many native people simply want to be known as the people they are—the Modoc Tribe of Oklahoma, for example, or the Cheyenne River Sioux Tribe.

Some native people in Alaska accept the term *Eskimo*, but others prefer native terms such as *Inuit*, which means *the people*. First Nation people in Canada prefer the term *Inuit*.

Older people and *mature customers* are more generally accepted terms than *senior citizens* or *golden agers*.

- **Avoid terms that suggest that competent people are unusual.** The statement “She is an intelligent black woman” suggests that the writer expects most black women to be stupid. “He is an asset to his race” suggests that excellence in the race is rare. “He is a spry 70-year-old” suggests that the writer is amazed that anyone that age can still move.

Talking about People with Disabilities and Diseases

A disability is a physical, mental, sensory, or emotional impairment that interferes with the major tasks of daily living. According to the U.S. Census Bureau, 21% of Americans currently have a disability; the number of people with disabilities will rise as the population ages.⁴⁹

- **People-first language** focuses on the person, not the condition. Use it instead of traditional adjectives used as nouns which imply that the condition defines the person.

Baby Boomers—arguably the wealthiest generation in U.S. history—are quickly becoming the targets of con artists seeking to steal their life's savings. With more than 76 million Baby Boomers approaching retirement age, the potential for ill-gotten gains is high. In 2010, more than 1,200 enforcement actions were brought by states against investment hucksters, double the number for 2009.

Source: Lucy Lazarony, “Baby Boomers: Con Artists Are Targeting You,” *Fox News*, July 20, 2012, <http://www.foxbusiness.com/personalfinance/2012/07/20/baby-boomers-conartists-are-targeting/>.

Recent events show that even in the face of rapidly changing U.S. demographics, some industries are slow to catch on. Television, long criticized for a lack of racial diversity in its programming, particularly among lead characters, continues to draw fire. In 2011, Fox Sports cancelled *The College Experiment* after backlash over a segment mocking Asians, and the critically acclaimed HBO series *Girls* is among programs nonetheless questioned for a lack of diversity. Asks *Entertainment Weekly*'s Mark Harris, “When will minorities get not just a presence but a voice?” Wise communicators in any industry realize that demeaning or ignoring audiences is a poor substitute for inclusion.

Sources: “Fox Sports Cancels Show After Airing Segment Mocking Asian Students,” September 8, 2011, <http://www.hollywoodreporter.com/news/fox-sports-cancels-show-airing-232955>; and Mark Harris, “TV’s Diversity Dilemma,” May 4, 2012, <http://popwatch.ew.com/2012/05/04/mark-harris-tvs-diversity-dilemma/>.

Instead of	Use	Because
The mentally retarded	People with mental retardation (Some audiences prefer terms like “people with intellectual disabilities” or “people with developmental disabilities.”)	The condition does not define the person or his or her potential.
The blind	People with vision impairments	
Cancer patients	People being treated for cancer	

McDonald's Japan created controversy with its popular "Mr. James" character. The blond, doughy expatriate from Ohio extols his generosity on the Japanese by sharing McDonald's food and merchandise with passers-by, all while speaking mangled Japanese and smiling from behind clunky spectacles. Some see the figure as a stereotype of Caucasian foreigners in Japan, while others find him a "cute and unthreatening" American.

Source: Coco Masters, "Not Everyone Is Lovin' Japan's New McDonald's Mascot," *Time*, August 25, 2009, <http://www.time.com/time/world/article/0,8599,1918246,00.html>.

- **Avoid negative terms, unless the audience prefers them.** You-attitude takes precedence over positive emphasis: Use the term a group prefers. People who lost their hearing as infants, children, or young adults often prefer to be called *deaf*, or *Deaf* in recognition of Deafness as a culture. But people who lose their hearing as older adults often prefer to be called *hard of hearing*, even when their hearing loss is just as great as someone who identifies as part of deaf culture.

Just as people in a single ethnic group may prefer different labels based on generational or cultural divides, so differences exist within the disability community. Using the right term requires keeping up with changing preferences. If your target audience is smaller than the whole group, use the term preferred by that audience, even if the group as a whole prefers another term.

Some negative terms, however, are never appropriate. Negative terms such as *afflicted*, *suffering from*, and *struck down* also suggest an outdated view of any illness as a sign of divine punishment.

Choosing Bias-Free Photos and Illustrations

When you produce a document with photographs or illustrations, check the visuals for possible bias. Do they show people of both sexes and all races? Is there a sprinkling of various kinds of people (younger and older, people using wheelchairs, etc.)? It's OK to have individual pictures that have just one sex or one race; the photos as a whole do not need to show exactly 50% men and 50% women. But the general impression should suggest that diversity is welcome and normal.

Check relationships and authority figures as well as numbers. If all the men appear in business suits and the women in maids' uniforms, the pictures are sexist even if an equal number of men and women are pictured. If the only blacks and Latinos pictured are factory workers, the photos support racism even when an equal number of people from each race are shown.

In the late 1990s, as Marilyn Dyrud has shown, only 22% of the images of humans in standard clip art files were women, and most of those showed women in traditional roles. An even smaller percent pictured members of minority groups.⁵⁰ Don't use biased clip art or stock photos: create your own bias-free illustrations. Be mindful that quick technical solutions may create other problems. A photo published on Microsoft's U.S. website showed two men, one Asian and one black. But on the website of a European affiliate, the black man's head was replaced with that of a white man (though his hand remained unchanged). After criticism for altering the man's race, the company apologized.⁵¹

Instant Replay

To eliminate sexist pronouns,

1. Use plurals.
2. Use second-person *you*.
3. Revise the sentence to omit the pronoun.
4. Use pronoun pairs.

Summary of Learning Objectives

- **Culture** provides patterns of acceptable behavior and beliefs. (**LO 3-1**)
- In **high-context cultures**, most of the information is inferred from the context of a message; little is explicitly conveyed. In **low-context cultures**, context is less important; most information is explicitly spelled out. (**LO 3-1**)
- Nonverbal signals can be misinterpreted just as easily as can verbal symbols (words). (**LO 3-2**)
- No gesture has a universal meaning across all cultures. Gestures that signify approval in North America may be insults in other countries, and vice versa. (**LO 3-2**)

- **Personal space** is the distance someone wants between himself or herself and other people in ordinary, nonintimate interchanges. (**LO 3-2**)
- North Americans who believe that “time is money” are often frustrated in negotiations with people who want to establish a personal relationship before they decide whether to do business with each other or who measure time in 15- or 30-minute increments rather than the 5-minute intervals North Americans are used to. (**LO 3-2**)
- **Monochronic** cultures treat time as a resource. The United States is classified as monochronic. **Polychronic** cultures emphasize relationships. (**LO 3-2**)
- **Conversational style** denotes our conversational patterns and the way we show interest, politeness, appropriateness. (**LO 3-2**)
- The successful intercultural communicator is (**LO 3-3**)
 - Aware that his or her preferred values and behaviors are influenced by culture and are not necessarily “right.”
- Flexible and open to change.
- Sensitive to verbal and nonverbal behavior.
- Aware of the values, beliefs, and practices in other cultures.
- Sensitive to differences among individuals within a culture.
- Generational differences may affect perceptions in the workplace. Use empathy and see other points of view to adapt. (**LO 3-4**)
- When dealing with discrimination, review your options carefully—consider that not everything may be discrimination, decide on a strategy, chart your own path, and take the high road. (**LO 3-5**)
- Traditional pronouns are sexist when they refer to a class of people, not to specific individuals. Four ways to make the sentence nonsexist are to use plurals, to use *you*, to revise the sentence to omit the pronoun, and to use pronoun pairs. (**LO 3-6**)
- Bias-free language is fair and friendly; it complies with the law. It includes all readers; it helps to sustain goodwill. (**LO 3-6**)

Assignments for Module 3

Questions for Comprehension

- 3.1** What sources create diversity in the workplace? (**LO 3-1 to LO 3-4**)
- 3.2** What is intercultural competence? (**LO 3-1 to LO 3-4**)

- 3.3** What four methods make a sentence nonsexist? (**LO 3-6**)

Questions for Critical Thinking

- 3.4** What other cultures are you most likely to work with? How could you learn about those cultures? (**LO 3-1 to LO 3-4**)
- 3.5** You can’t possibly learn what every symbol means in every culture. How can you avoid offending the people you work with? (**LO 3-1 to LO 3-5**)
- 3.6** Suppose you have an audience that is sexist, racist, or prejudiced in some other way. To what extent, if any, should you adapt to this aspect of your audience? (**LO 3-6**)

- 3.7** It’s sexist to always put the male pronoun first in pronoun pairs (e.g., *he/she* rather than *she/he* or *s/he*). Why do the authors of this book recommend that method? Which method do you prefer? (**LO 3-6**)

Exercises and Problems

3.8 Planning an International Trip (LO 3-1 to LO 3-3)

Assume that you’re going to the capital city of another country on business two months from now. (You pick the country.) Use a search engine to find out

- What holidays will be celebrated in that month.
- What the climate will be.
- What current events are in the news.
- What key features of business etiquette you should know.
- What kinds of gifts you should bring to your hosts.
- What sightseeing you should try to include.

3.9 Sending a Draft to South Korea (LO 3-1 to LO 3-3)

You’ve drafted instructions for a product that will be sold in South Korea. Before the text is translated, you want to find out if the pictures will be clear. So you send an e-mail to your Korean counterpart, Jang Kyu Yi, asking for a response within a week.

As Your Instructor Directs,

- a. Write a memo to your instructor reporting the information you found.
- b. Post a message to the class analyzing the pages. Include the URLs as hotlinks.
- c. Make an oral presentation to the class.
- d. Join with a small group of students to create a group report on several countries in a region.
- e. Make a group oral presentation to the class.

Note, in Korean culture, last names usually go first, as in Yi Jang Kyu.

Write an e-mail message; assume you will send the pictures as an attachment.

3.10 Requesting Information about a Country (LO 3-1 to LO 3-3)

Use one or more of the following ways to get information about a country. Information you might focus on could include

- Business opportunities
- History and geography
- Principal exports and imports
- Dominant religions
- Holidays
- School system
- Political system

1. Write to the U.S. & Foreign Commercial Service Office in your district. (Your instructor has the addresses in the *Instructor's Manual*.)

3.11 Creating a Web Page (LO 3-1 to LO 3-3, LO 3-5)

Create a web page for managers who must communicate across cultures.

Assume that this page can be accessed from the organization's intranet. Offer at least seven links. (More is better.) You may offer information as well as links to other pages with information. At the top of the page, offer an overview of what the page covers. At the bottom of the page, put the creation/update date and your name and e-mail address.

As Your Instructor Directs,

- a. Turn in two laser copies of your page(s). On another page, give the URLs for each link.
- b. Turn in one laser copy of your page(s) and a disk with the HTML code and .gif files.
- c. Write a memo to your instructor
 - (1) identifying the audience for which the page is designed and explaining (2) the search strategies you

3.12 Identifying Sources of Miscommunication (LO 3-1 to LO 3-4)

In each of the following situations, identify one or more ways that cultural differences may be leading to miscommunication.

1. Alan is a U.S. sales representative in Mexico. He makes appointments and is careful to be on time. But the person he's calling on is frequently late. To save time, Alan tries to get right to business. But his hosts want to talk about sightseeing and his family. Even worse, his appointments are interrupted constantly, not only by business phone calls, but also by long conversations with other people and even the customers' children who come into the office. Alan's first progress report is very negative. He hasn't yet made a sale. Perhaps Mexico just isn't the right place to sell his company's products.
2. Clark travels to Switzerland to set up the European branch office of his company. Because he is unfamiliar with the local transportation, he has been late several times to meetings with public officials who can expedite getting the proper permits and licenses. He's also

3.13 Advising a Hasty Subordinate (LO 3-4, LO 3-5)

Three days ago, one of your subordinates forwarded to everyone in the office a bit of e-mail humor he'd received from a friend. Titled "You know you're Southern when

2. Check the country's trade office, if there is one in your city.
3. Interview someone from that country or someone who has lived there.
4. Read published materials about the country.

As Your Instructor Directs,

- a. Share your findings orally with a small group of students.
- b. Summarize your findings in a memo to your instructor.
- c. Present your findings to the class.
- d. E-mail your findings to the class.
- e. Join with a group of classmates to write a group report on the country.

used to find material on this topic, (3) why you chose the pages and information you've included, and (4) why you chose the layout and graphics you've used.

- d. Post your memo in an e-mail message to the class.
- e. Present your page orally to the class.

Hints:

- Limit your page to just one culture or country.
- Try to cover as many topics as possible: history, politics, notable people, arts, conversational style, customs, and so forth. For a culture in another country, also include money, living accommodations, geography, transport, weather, business practices, and so forth.
- Chunk your links into small groups under headings.
- See ►► Module 5 on web page design.

had to cancel one meeting. Now, when he tries to make appointments, he is told nothing is available for weeks.

3. Stan wants to negotiate a joint venture with a Chinese company. He asks Tung-Sen Lee if the Chinese people have enough discretionary income to afford his product. Mr. Lee is silent for a time, and then says, "Your product is good. People in the West must like it." Stan smiles, pleased that Mr. Lee recognizes the quality of his product, and he gives Mr. Lee a contract to sign. Weeks later, Stan still hasn't heard anything. If China is going to be so inefficient, he wonders if he really should try to do business there.
4. Elspeth is very proud of her participatory management style. On assignment in India, she is careful not to give orders and instead asks for suggestions. But people rarely suggest anything. Even a formal suggestion system doesn't work. And to make matters worse, she doesn't sense the respect and camaraderie of the plant she managed in the United States. Perhaps, she decides gloomily, people in India just aren't ready for a woman boss.

...," the message poked fun at Southern speech, attitudes, and lifestyles. Today you get this message from your subordinate:

Subject: Should I Apologize?

I'm getting flamed left and right because of the Southern message. I thought it was funny, but some people just can't take a joke. So far I've tried not to respond to the flames, figuring that would just make things worse. But now I'm wondering if I should apologize. What do you think?

Answer the message.

3.14 Responding to a Complaint (LO 3-4 to LO 3-6)

You're Director of Corporate Communications; the employee newsletter is produced by your office. Today you get this e-mail message from Caroline Huber:

Respond to Caroline. And send a message to your staff, reminding them to edit newsletter stories as well as external documents to replace biased language.

Subject: Complaint about Sexist Language

The article about the "Help Desk" says that Martina Luna and I "are the key customer service representatives 'manning' the desk." I don't MAN anything! I WORK.

3.15 Answering an Inquiry about Photos (LO 3-5)

You've just been named Vice President for Diversity, the first person in your organization to hold this position.

Today, you receive this memo from Sheila Lathan, who edits the employee newsletter.

Subject: Photos in the Employee Newsletter

Please tell me what to do about photos in the monthly employee newsletter. I'm concerned that almost no single issue represents the diversity of employees we have here.

As you know, our layout allows two visuals each month. One of those is always the employee of the month (EM). In the last year, most of those have been male and all but two have been white. What makes it worse is that people want photos that make them look good. You may remember that Ron Olmos was the EM two months ago; in the photo he wanted me to use, you can't tell that he's in a wheelchair. Often the EM is the only photo; the other visual is often a graph of sales or something relating to quality.

Even if the second visual is another photo, it may not look balanced in terms of gender and race. After all, 62% of our employees are men, and 78% are white. Should the pictures try to represent those percentages? The leadership positions (both in management and in the union) are even more heavily male and white. Should we run pictures of people doing important things, and risk continuing the imbalance?

I guess I could use more visuals, but then there wouldn't be room for as many stories—and people really like to see their names in print. Plus, giving people information about company activities and sales is important to maintaining goodwill. A bigger newsletter would be one way to have more visuals and keep the content, but with the cost-cutting measures we're under, that doesn't look likely.

What should I do?

As Your Instructor Directs,

- Work in a small group with other students to come up with a recommendation for Sheila.
- Write a memo responding to her.

- Write an article for the employee newsletter about the photo policy you recommend and how it relates to the company's concern for diversity.

3.16 Revising Sexist Job Titles (LO 3-6)

Suggest nonsexist alternatives for the following:

barmaid

deliveryman

chairwoman

female soldier

fireman

lady lawyer

lunch lady

male model

ombudsman

policeman

postman

stuntman

3.17 Eliminating Biased Language (LO 3-6)

Explain the source of bias in each of the following and revise to remove the bias.

- While he is a victim of muscular dystrophy, Salvatore is one of our top salesmen.

- Make sure the young men you hire are married because we are looking for wholesome, responsible employees.
- Though she was born and raised in the south, Terri is surprisingly open-minded about people of different races.

4. We'll be showing a video at the conference, but Salvatore, who is blind, probably will have little interest in it.
5. Sam Madigan
Ark Industries
5112 Grosvenor Boulevard
Los Angeles, CA 90066
Dear Mr. Madigan:
6. While she was probably admitted because she is a woman and a minority, Kendra nonetheless graduated at the top of her engineering class that year.
7. Though Xian doesn't look like he was born in this country, he speaks English better than anyone else I know.
8. We want to provide a quiet space for religious members of the community to reflect, but Jews and Muslims can use the space, too.
9. Make sure you seat the entire team, including the minorities, Atik, Curtis, and Brianna, at the center table during this year's "Celebration of Diversity" dinner.
10. You certainly can't go wrong with Joanne—the old girl has more enthusiasm than employees half her age.

Polishing Your Prose

Using Idioms

Idioms are phrases that have specific meanings different from the meanings for each individual word.

Idiom

Cut to the chase

Meaning

Express your main point immediately.

Read between the lines

Look for a hidden message.

Like idioms, slang changes the definitions of words. *Bad*, a word that is negative, becomes positive when used in slang to denote something good or desirable. Dictionaries often are slow to adapt to slang, which changes constantly.

You need to understand a culture to make sense of its idioms. Because idioms usually violate the rules of standard edited English, they are particularly troublesome for people new to the language.

To learn idioms,

1. Study native speakers in person and on television. When possible, ask native speakers what unfamiliar words and phrases mean.
2. Underline unfamiliar passages in newspapers and magazines. Ask a friend or your instructor to explain their meaning.
3. Practice what you learn with a conversation partner.

Exercises

What do these 10 common idiomatic phrases mean literally? What do they mean in business?

1. Tighten our belts.
2. Close out the books.
3. Get off the ground.
4. Take stock of the situation.
5. Carry the day
6. Have the floor.
7. Crunch the numbers.
8. Keep your nose to the grindstone.
9. Pick over the bones.
10. Incentivize your customers.

Check your answers to the odd-numbered exercises at the back of the book.

Planning, Writing, and Revising

LEARNING OBJECTIVES

Module 4 shows the value of using a multistep approach to create the best documents. After completing the module, you should be able to

- | | | | |
|---------------|--|---------------|---|
| LO 4-1 | Apply processes for writing quality improvement. | LO 4-5 | Support writing with grammar and spell-checkers. |
| LO 4-2 | Manage time for writing projects. | LO 4-6 | Apply strategies for feedback and revision with it. |
| LO 4-3 | Plan writing and speaking projects for increased success. | LO 4-7 | Apply strategies for form letter use. |
| LO 4-4 | Apply strategies for revision. | LO 4-8 | Apply strategies for writer's block and procrastination solutions. |

Skilled performances look easy and effortless. In reality, as every dancer, musician, or athlete knows, they're the product of hard work, hours of practice, attention to detail, and intense concentration. Like all skilled performances, writing rests on a base of work.

The pace at which writers compose has increased. While memos and letters are still standard business documents, e-mail messages are commonplace, and increasingly, people use social media at work. The pressure may be to dash off messages as quickly as possible, but a better strategy is to send messages as quickly as necessary, with the appropriate amount of planning, writing, and revising. Practicing the techniques in this module until they become second nature will help you compose messages efficiently and successfully.

What constitutes revision—and when it's acceptable—depends on many factors, including audience expectations. For instance, Broadway producers found themselves facing criticism when revising the George Gershwin classic *Porgy and Bess*, which was “reimagined” for contemporary audiences. Revising history texts can elicit similar results, and even the term can create arguments as some people argue it's really about being more inclusive. Said author Kenneth C. Davis, “In school, we focus on the ‘important people’ and Founding Fathers, but what that ‘great man version’ of history does is really leave out an awful lot of people who have tremendous impact.”

Sources: Anthony Tommasini, “Adapting, Revising, Provoking,” *The New York Times*, March 9, 2012, <http://www.nytimes.com/2012/03/11/arts/music/some-ground-rules-for-revising-operas-and-musicals.html?pagewanted=all>; and Ashley Strickland, “Revising History to Show America’s ‘Secret Heroes,’ ” CNN, April 17, 2012, <http://www.cnn.com/2012/04/17/living/secret-american-heroes/index.html>.

Planning, writing, and revising include the following activities:

Planning

- Analyzing the problem, defining your purposes, and analyzing the audience; thinking of information, benefits, and objections; choosing a pattern of organization or making an outline; and so on.
- Gathering the information you need—from the message you’re answering, a person, a book, or the web.

Writing

- Putting words on paper or on a screen. Writing can be lists, fragmentary notes, stream-of-consciousness writing, or a formal draft.

Revising

- Evaluating your work and measuring it against your goals and the requirements of the situation and audience. The best evaluation results from *re-seeing* your draft as if someone else had written it. Will your audience understand it? Is it complete? Convincing? Friendly?
- Getting feedback from someone else. Is your pattern of organization appropriate? Does a revision solve an earlier problem? Are there any typos in the final copy?
- Adding, deleting, substituting, or rearranging. Revision can be changes in single words or in large sections of a document.
- Editing the draft to see that it satisfies the requirements of standard English. Here you’d correct spelling and mechanical errors and check word choice and format. Unlike revision, which can produce major changes in meaning, editing focuses on the surface of writing.
- Proofreading the final copy to see that it’s free from typographical errors.

Note the following points about these activities:

- **The activities do not have to come in this order.** Some people may gather information *after* writing a draft when they see that they need more specifics to achieve their purposes.
- **You do not have to finish one activity to start another.** Some writers plan a short section and write it, plan the next short section and write it, and so on throughout the document. Evaluating what is already written may cause a writer to do more planning or to change the original plan.
- **You may do an activity several times, not just once.** For an important document, you might get feedback, revise, get more feedback, revise yet again, and so on.
- **Most writers do not use all activities for all the documents they write.** You’ll use more activities when you write a new kind of document, about a new subject, or to a new audience.

Does it matter what process I use? LO 4-1

- *Using expert processes will improve your writing.*

Just as athletes can improve their game by studying videotapes and working on just how they kick a ball or spin during a jump, so writers can improve their writing by studying their own processes. No single writing process works for all writers all of the time. However, expert writers seem to use different processes than novice writers.¹ Expert writers are more likely to

Proofread carefully to communicate a clear message and to protect your credibility.

Copyright © Aaron Bacall/The New Yorker Collection,
www.cartoonbank.com.

- Realize that the first draft can be revised.
- Write regularly.
- Break big jobs into small chunks.
- Have clear goals focusing on purpose and audience.
- Have several different strategies to choose from.
- Use rules flexibly.
- Wait to edit until after the draft is complete.

Research shows that experts differ from novices in identifying and analyzing the initial problem more effectively, understanding the task more broadly and deeply, drawing from a wider repertoire of strategies, and seeing patterns more clearly. Experts actually composed more slowly than novices, perhaps because they rarely settled for work that was just “OK.” Finally, experts were better at evaluating their own work.²

Thinking about the writing process and consciously adopting “expert” processes will help you become a better writer.

A 15-year-old in Japan sold 110,000 paper copies of the three-volume novel, *Wolf Boy x Natural Girl*, she composed on her cell phone. *Keitai*, the name for the genre, allows writers to publish manuscript pages on a website as soon as they are finished. Popular novels are later printed and sold, in this case grossing more than \$611,000.

Use this calculator from Virginia Polytechnic Institute and State University to see how much time you have for schoolwork weekly. Then see how much of that time you can spend planning, writing, and revising.

I don't have much time. How should I use it? LO 4-2

► Save two-thirds of your time for planning and revising.

To get the best results from the time you have, spend only a third of your time actually “writing.” Spend at least one-third of your time analyzing the situation and your audience, gathering information, and organizing what you have to say. Spend another third evaluating what you’ve said, revising the draft(s) to meet your purposes and the needs of the audience and the organization, editing a late draft to remove any errors in grammar and mechanics, and proofreading the final typed copy.

When you first get an assignment, think about all the steps you’ll need to go through so you can plan your time for that project. Certainly two writers might need different amounts of time to produce the same quality document. Figure 4.1 shows how a writer might use six hours needed to plan, write, and revise a memo.

The habits of professional writers are as diverse as the prose they create. When composing *Interview with the Vampire*, Anne Rice revised each typed page before she wrote the next. Michael Ondaatje, whose *The English Patient* won the Booker Prize, literally cuts and pastes handwritten passages. While drafting *Lowboy*, John Wray rode subways with a laptop, sometimes six hours a day.

Creative planning can lead to creative solutions. Mortgage Resolution Partners offers a plan in California that has local government use eminent domain to condemn a distressed home, pay fair market value for it to the mortgage owner, and then help to refinance the home through the company, lowering mortgage payments in hopes of keeping people in their homes. While the plan irks some banks and financial experts, others see it as potentially useful, even if they have their doubts. The University of Missouri's Randall Wray, for instance, notes that because foreclosures are hampering America's economic recovery, "Anything that will stop that I think is worth looking at."

What planning should I do before I begin writing or speaking? **LO 4-3**

► *As much as you can!*

Spend at least one-third of your time planning and organizing before you begin to write. The better your ideas are when you start, the fewer drafts you'll need to produce a good document. Start by using the analysis questions from Module 1 to identify purpose and audience. Use the strategies described in Module 2 to analyze audience and in Module 8 to develop reader benefits. Gather information you can use for your document.

If ideas won't come, try the following techniques.

- **Brainstorm.** Think of all the ideas you can, without judging them. Consciously try to get at least a dozen different ideas before you stop. The first idea you have may not be the best.
- **Freewrite.**³ Make yourself write, without stopping, for 10 minutes or so, even if you must write "I will think of something soon." At the end of 10 minutes, read what you've written and identify the best point in the draft. Get a clean paper or screen and write for another 10 uninterrupted minutes. Read this draft, marking anything that's good and should be kept, and then write again for another 10 minutes. By the third session, you will probably produce several sections that are worth keeping—maybe even a complete draft that's ready to be revised.
- **Cluster.**⁴ Write your topic in the middle of the page and circle it. Write down the ideas the topic suggests, circling them, too. (The circles are designed to tap into the nonlinear half of your brain.) When you've filled the page, look for patterns or repeated ideas. Use different colored pens to group related ideas. Then use these ideas to develop reader benefits in a memo, questions for a survey, or content for the body of a report. Figure 4.2 presents the clusters that one writer created about business communication in the United States and France.
- **Talk to your audiences.** As Rachel Spilka's research shows, talking to internal and external audiences helped writers involve readers in the planning process,

Figure 4.2 Clustering Helps Generate Ideas

understand the social and political relationships among readers, and negotiate conflicts orally rather than depending solely on the document. These writers were then able to think about content as well as about organization and style, appeal to common grounds (such as reducing waste or increasing productivity) that several readers shared, and reduce the number of revisions needed before documents were approved.⁵

Thinking about the content, layout, or structure of your document can also give you ideas. For long documents, write out the headings you'll use. For anything that's under five pages, less formal notes will probably work. You may want to jot down ideas you can use as the basis for a draft. For an oral presentation, a meeting, or a document with lots of visuals, try creating a **Storyboard**, with a rectangle representing each page or unit. Draw a box with a visual for each main point. Below the box, write a short caption or label.

Letters and memos will go faster if you choose a basic organizational pattern before you start. Modules 10, 11, and 12 give detailed patterns of organization for the most common kinds of letters and memos. You may want to customize those patterns with a **planning guide**⁶ to help you keep the “big picture” in mind as you write. Figure 4.3 shows planning guides developed for specific kinds of documents.

What is revision? How do I do it? LO 4-4

- Revision means “re-seeing” the document.

Good writers make their drafts better by judicious revising, editing, and proofreading.

- **Revising** means making changes that will better satisfy your purposes and your audience.
- **Editing** means making surface-level changes that make the document grammatically correct.
- **Proofreading** means checking to be sure the document is free from typographical errors.

When you’re writing to a new audience or have to solve a particularly difficult problem, plan to revise the draft at least three times. The first time, look for content and clarity. The second time, check the organization and layout. Finally, check style and tone, using the information in Modules 15 and 16. Figure 4.4 summarizes the questions you should ask.

Often you’ll get the best revision by setting aside your draft, getting a blank page or screen, and redrafting. This strategy takes advantage of the thinking you did on your first draft without locking you into the sentences in it.

As you revise, be sure to read the document through from start to finish. This is particularly important if you’ve composed in several sittings or if you’ve used text from other documents. Researchers have found that such documents tend to be well organized but don’t flow well.⁷ You may need to add transitions, cut repetitive parts, or change words to create a uniform level of formality throughout the document.

If you’re really in a time bind, do a light revision (see Figure 4.5). The quality of the final document may not be as high as with a thorough revision, but even a light revision is better than skipping revision.

Checklist for Thorough Revision

Content and Clarity

- Does your document meet the needs of the organization and of the reader—and make you look good?
- Have you given readers all the information they need to understand and act on your message?
- Is all the information accurate?
- Is each sentence clear? Is the message free from apparently contradictory statements?
- Are generalizations and benefits backed up with adequate supporting detail?

Organization and Layout

- Is the pattern of organization appropriate for your purposes, audience, and situation?
- Are transitions between ideas smooth? Do ideas within paragraphs flow smoothly?
- Does the design of the document make it easy for readers to find the information they need? Is the document visually inviting?
- Are the points emphasized by layout ones that deserve emphasis?
- Are the first and last paragraphs effective?

Style and Tone

- Is the message easy to read?
- Is the message friendly and free from biased language?
- Does the message build goodwill?

Figure 4.4 Thorough Revision Checklist

Checklist for Light Revision

Light Revision

- Are the first and last paragraphs effective?
- Does the design of the document make it easy for readers to find the information they need?
- Have you told the reader what to do?

Figure 4.5 Light Revision Checklist

Can a grammar checker do my editing for me? LO 4-5

► *No. You have to decide whether to make each change.*

Grammar checkers are good at finding missing halves. For example, if you open a parenthesis and never close it, a grammar checker will note that a second one is needed. Of course, you have to decide where it goes. In terms of other errors, all a grammar checker can do is ask you about what you have done. A grammar checker can tell you that you've used a passive verb, and ask if you want to change it. But you have to decide whether the passive is justified. If it finds the word *well*, the grammar checker can tell

you that *good* and *well* are sometimes confused. But you have to decide which word fits your meaning (►► Module 15). You still need to know the rules so that you can decide which changes to make.

Check to be sure that the following are accurate:

- Sentence structure
- Subject–verb and noun–pronoun agreement
- Punctuation
- Word usage
- Spelling—including spelling of names
- Numbers

You need to know the rules of grammar and punctuation to edit. Module 14 reviews grammar and punctuation. Module 15 reviews words that are often confused. Most writers make a small number of errors over and over. If you know that you have trouble with dangling modifiers or subject–verb agreement, for example, specifically look for them in your draft. Also look for any errors that especially bother your boss and correct them.

Editing should always *follow* revision. There's no point in taking time to fix a grammatical error in a sentence that may be cut when you clarify your meaning or tighten your style. Some writers edit more accurately when they print out a copy of a document and edit the hard copy. But beware: Laser printing makes a page look good but does nothing to correct errors.

I spell-check. Do I still need to proofread? LO 4-5

Instant Replay

How to Revise

When you're writing to a new audience or have to solve a particularly difficult problem, plan to revise the draft at least three times. The first time, look for content and clarity. The second time, check the organization and layout. Finally, check style and tone. Do all this **before** you edit and proofread.

- Yes.

Proofread every document both with a spell-checker and by eye to catch the errors a spell-checker can't find.

Proofreading is hard because writers tend to see what they know should be there rather than what really is there. Because it's always easier to proof something you haven't written, you may want to swap papers with a proofing buddy. (Be sure the person looks for typos, not for content.)

To proofread,

- Read once quickly for meaning to see that nothing has been left out.
- Read a second time, slowly. When you find an error, correct it and then *reread that line*. Readers tend to become less attentive after they find one error and may miss other errors close to the one they've spotted.
- To proofread a document you know well, read the lines backward or the pages out of order.

Always triple-check numbers, headings, the first and last paragraphs, and the reader's name.

How can I get better feedback? LO 4-6

- Ask for the kind of feedback you need.

The process of drafting, getting feedback, revising, and getting more feedback is called **cycling**. Dianna Booher reports that documents in her clients' firms cycled an average of 4.2 times before reaching the intended audience.⁸ Susan Kleimann studied a 10-page document whose 20 drafts made a total of 31 stops on the desks of nine reviewers on four different levels.⁹ Being asked to revise a document is a fact of life in businesses, government agencies, and nonprofit organizations.

To improve the quality of the feedback you get, tell people which aspects you'd especially like comments about. For example, when you give a reader the outline or planning draft,¹⁰ you might want to know whether the general approach is appropriate. After your second draft, you might want to know whether reader benefits are well developed.

Checklist for

Questions to Ask Readers

Outline or Planning Draft

- Does the plan seem “on the right track”?
- What topics should be added? Should any be cut?
- Do you have any other general suggestions?

Revising Draft

- Does the message satisfy all its purposes?
- Is the message adapted to the audience(s)?
- Is the organization effective?
- What parts aren’t clear?
- What ideas need further development?
- Do you have any other suggestions?

Polishing Draft

- Are there any problems with word choice or sentence structure?
- Did you find any inconsistencies?
- Did you find any typos?
- Is the document’s design effective?

Figure 4.6 Questions to Ask Readers

When you reach the polishing draft, you’ll be ready for feedback on style and grammar. Figure 4.6 lists questions to ask.

It’s easy to feel defensive when someone criticizes your work. If the feedback stings, put it aside until you can read it without feeling defensive. Even if you think the reader has misunderstood what you were trying to say, the fact that the reader complained means the section could be improved. If the reader says “This isn’t true” and you know that the statement is true, several kinds of revision might make the truth clear to the reader: rephrasing the statement, giving more information or examples, or documenting the source.

Can I use form letters? LO 4-7

► Yes. But make sure they’re good.

A **form letter** is a prewritten fill-in-the-blank letter designed for routine situations. Some form letters have different paragraphs that can be inserted, depending on the situation. For example, a form letter admitting students to college might have additional paragraphs to be added for students who were going to receive financial aid.

Boilerplate is language—sentences, paragraphs, even pages—from a previous document that a writer includes in a new document. In academic papers, material written by others must be quoted and documented. However, because businesses own the documents their employees write, old text may be included without attribution.

In some cases, boilerplate may have been written years ago. For example, many legal documents, including apartment leases and sales contracts, are almost completely boilerplated. In other cases, writers may use boilerplate they themselves have written. For example, a section from a proposal describing the background of the problem could also be used in the final report after the proposed work was completed. A section from a progress report describing what the writer had done could be used with only a few changes in the Methods section of the final report.

Before sending out any message—paper or electronic—address it correctly and proof it carefully. Employees at Aviva Investors thought they were being dismissed after receiving an e-mail message, a blow made plausible because the company had announced it would trim its workforce. It turns out the message was meant for only one employee who was leaving the company, but the language wishing the reader “all the best for the future” was chilling to workers already worried about job security. Needless to say, such actions may produce less-than-positive feedback from the remaining employees.

Source: Fox Van Allen, “E-mail Accident Leads an Entire Company to Think It’s Being Fired,” April 23, 2012, <http://news.yahoo.com/blogs/technology-blog/email-accident-leads-entire-company-think-being-fired-165511639.html>.

Building a Critical Skill

Revising after Feedback LO 4-6

When you get feedback that you understand and agree with, make the change.

If you get feedback you don't understand, ask for clarification.

- Paraphrase: "So you're asking me to give more information?"
- Ask for more information: "Can you suggest a way to do that?"
- Test your inference: "Would it help if I did such and such?"

Sometimes you may get feedback you don't agree with.

- If it's an issue of grammatical correctness, check this book. (Sometimes even smart people get things wrong.)
- If it's a matter of content, recognize that *something* about the draft isn't as good as it could be: something is leading the reader to respond negatively.
- If the reader thinks a fact is wrong (and you know it's right), show where the fact came from. "According to . . ."
- If the reader suggests a change in wording you don't like, try another option.

- If the reader seems to have misunderstood or misread the text, think about ways to make the meaning clearer.

Your supervisor's comments on a draft can help you improve that document, help you write better drafts the next time, and teach you about the culture of your organization. Look for patterns in the feedback you receive. Are you asked to use more formal language or to make the document more conversational? Does your boss want to see an overview before details? Does your company prefer information presented in bulleted lists rather than in paragraphs? Are your photos or artwork bias free?

Feedback is sometimes painful, but focus on the point of the feedback rather than feelings. Ford Motor Company CEO Alan Mulally raised eyebrows when he publicly criticized the looks of the 2008 Taurus. Derrick Kuzak, head of global development, went on to compare the car to TV's Homer Simpson, and the two stressed that a more attractive successor would be in the works. "That's only delivered when the engineering team does not dumb down the design because of engineering and manufacturing feasibility concerns," Kuzak added. While the comments may have rankled some insiders, analysts welcomed the company's willingness to fix problems.

If honest, sharp criticism or even a rebuke can be beneficial. Pay close attention to what is at the heart of a comment rather than how the comment is delivered. Remember, though, what it feels like to be on the receiving end when *you* give feedback. Temper your words, and let your example encourage others to be more gracious.

Source: "Taurus and Homer Simpson—Separated at Birth?" January 29, 2008, downloaded at www.cnn.com/2008/LIVING/wayoflife/01/29/ford.homer.simpson.ap/index.html.

Writers use form letters and boilerplate to save time and energy and to use language that has already been approved by the organization's legal staff. However, as Glenn Broadhead and Richard Freed point out, reusing old text creates two problems.¹¹

- Using unrevised boilerplate can create a document with incompatible styles and tones.
- Form letters and boilerplate can encourage writers to see situations and audiences as identical when in fact they differ.

Before you use a form letter, make sure it is well written and that it applies to the situation in which you are thinking of using it.

Before you incorporate old language in a new document,

- Check to see that the old section is well written.
- Consciously look for differences between the two situations, audiences, or purposes that may require different content, organization, or wording.
- Read through the whole document at a single sitting to be sure that style, tone, and level of detail are consistent in the old and new sections.

How can I overcome writer's block and procrastination? LO 4-8

► *Talk, participate, and practice. Reward yourself for activities that lead to writing.*

According to psychologist Robert Boice, a combination of five actions works best to overcome writer's block:¹²

- **Participate actively in the organization and the community.** The more you talk to people, the more you interact with some of your audiences, the more you learn about the company, its culture, and its context, the easier it will be to write—and the better your writing will be.
- **Practice writing regularly and in moderation.**
- **Learn as many strategies as you can.** Good writers have a “bag of tricks” to draw on; they don’t have to “reinvent the wheel” in each new situation. This book suggests many strategies and patterns. Try them; memorize them; make them your own.
- **Talk positively to yourself:** “I can do this.” “If I keep working, ideas will come.” “It doesn’t have to be wonderful; I can always make it better later.”
- **Talk about writing to other people.** Value the feedback you get from your boss. Talk to your boss about writing. Ask him or her to share particularly good examples—from anyone in the organization. Find colleagues at your own level and talk about the writing you do. Do different bosses value different qualities? What aspects of your own boss’s preferences are individual and which are part of the discourse community of the organization? Talking to other people expands your repertoire of strategies and helps you understand the discourse community in which you write.

To avoid procrastination, modify your behavior by rewarding yourself for activities that lead to writing:

- **Set a regular time to write.** Sit down and stay there for the time you’ve planned, even if you write nothing usable.
- **Develop a ritual for writing.** Choose tools—paper, pen, computer, chair—that you find comfortable. Use the same tools in the same place every time you write.
- **Try freewriting.** Write for 10 minutes without stopping.
- **Write down the thoughts and fears you have as you write.** If the ideas are negative, try to substitute more positive statements: “I can do this.” “I’ll keep going and postpone judging.” “If I keep working, I’ll produce something that’s OK.”
- **Identify the problem that keeps you from writing.** Deal with that problem; then turn back to writing.
- **Set modest goals** (a paragraph, not the whole document) **and reward yourself for reaching them.**

Proofreading is especially important when reusing language. For 2009, a mint produced Chilean 50-pesos coins, each worth about a U.S. dime, with the name of the country spelled “CHIE.” Chile’s Central Bank did not learn of the engraver’s error until a year later, when the newspaper *El Mercurio* reported the story. About 1.5 million of the errant coins were in circulation by then.

Source: Eva Vergara, “Is It ‘Chile’ or ‘Chile’? Mint Issues Bad Coins,” *The Boston Globe*, February 12, 2010, http://www.boston.com/news/world/latinamerica/articles/2010/02/12/is_it_chile_or_chile_mint_issues_bad_coins/.

Dealing with procrastination can be challenging, but Kevin Purdy recommends several strategies. Among them are getting rid of clutter, acknowledging that you’re actually procrastinating, and dealing with the more difficult tasks early. Believe in yourself, too. Says Rory Vaden, author of *Take the Stairs: 7 Steps to Achieving True Success*, “The number one reason we procrastinate is we don’t believe we have what it takes to pull it off.”

Source: Kevin Purdy, “Get to Work by Meeting Procrastination Head-On,” *Fast Company*, April 10, 2012, <http://www.fastcompany.com/1830018/get-work-meetingprocrastination-head>.

Summary of Learning Objectives

- Processes that help writers write well include expecting to revise the first draft, writing regularly, modifying the initial task if it's too hard or too easy, having clear goals, knowing many different strategies, using rules as guidelines rather than as absolutes, and waiting to edit until after the draft is complete. (**LO 4-1**)
- Spend a third of your time planning, a third writing, and a third revising. (**LO 4-2**)
- To think of ideas, try brainstorming, **frewriting** (writing without stopping for 10 minutes or so), and **clustering** (brainstorming with circled words on a page). (**LO 4-3**)
- Planning, writing, and revising can include analyzing, gathering, writing, evaluating, getting feedback, revising, editing, and proofreading. **Revising** means changing the document to make it better satisfy the writer's purposes and the audience. **Editing** means making surface-level changes that make the document grammatically correct. **Proofreading** means checking to be sure the document is free from typographical errors. (**LO 4-4**)
- If the writing situation is new or difficult, plan to revise the draft at least three times. The first time, look for content and clarity. The second time, check the organization and layout. Finally, check style and tone. (**LO 4-4**)
- Grammar checkers and spell-checkers only catch some errors. Be sure to also check documents manually. (**LO 4-5**)
- You can improve the quality of the feedback you get by telling people which aspects of a draft you'd like comments about. If a reader criticizes something, fix the problem. If you think the reader misunderstood you, try to figure out what caused the misunderstanding and revise the draft so that the reader can see what you meant. (**LO 4-6**)
- If you get feedback you don't understand, paraphrase, ask for more information, or test your inference. (**LO 4-6**)
- If you get feedback you don't agree with, check against a grammar book for grammar issues, consider something could be improved if the comment is about content, show the reader where any disputed facts came from, try another option if the suggestion is about wording, or make information more clear if readers are confused. (**LO 4-6**)
- **Boilerplate** is language from a previous document that a writer includes in a new document. Using form letters and boilerplate can encourage writers to see as identical situations and audiences that in fact differ. Putting boilerplate into a new document can create incompatible styles and tones. (**LO 4-7**)
- To overcome writer's block, (**LO 4-8**)
 1. Participate actively in the organization and the community.
 2. Follow a regimen. Practice writing regularly and in moderation.
 3. Learn as many strategies as you can.
 4. Talk positively to yourself.
 5. Talk about writing to other people.
- To overcome the tendency to procrastinate, modify your behavior to reward yourself for the activities that lead to writing. (**LO 4-8**)

Assignments for Module 4

Questions for Comprehension

- 4.1** What processes do expert writers use? (**LO 4-1**)
- 4.2** How is revision different from editing? From proofreading? (**LO 4-4**)

Questions for Critical Thinking

- 4.4** Which processes that expert writers use do you already use? How could you modify your process to incorporate at least one more on the list? (**LO 4-1**)
- 4.5** Of the people who have seen your writing, which one(s) have given you the most useful feedback? What makes it useful? (**LO 4-6**)

Exercises and Problems

4.8 Interviewing Writers about Their Composing Processes (LO 4-1**)**

Interview someone about the composing process(es) he or she uses for on-the-job writing. Questions you could ask include the following:

- What kind of planning do you do before you write? Do you make lists? Formal or informal outlines?
- When you need more information, where do you get it?

4.3 What are good strategies for overcoming writer's block? Procrastination? (**LO 4-8**)

- 4.6** In which areas are you best at giving feedback to other people? How could you make your feedback even better? (**LO 4-6**)
- 4.7** Think about the form letters you have received. How do they make you feel? If they have flaws, how could they be improved? (**LO 4-7**)

- How do you compose your drafts? Do you dictate? Draft with pen and paper? Compose on screen? How do you find uninterrupted time to compose?
- When you want advice about style, grammar, and spelling, what source(s) do you consult?
- Does your superior ever read your drafts and make suggestions?

- Do you ever work with other writers to produce a single document? Describe the process you use.
- Describe the process of creating a document where you felt the final document reflected your best work.
- Describe the process of creating a document that you found difficult or frustrating. What sorts of things make writing easier or harder for you?

As Your Instructor Directs,

- a. Share your results orally with a small group of students.
- b. Present your results in an oral presentation to the class.

4.9 Analyzing Your Own Writing Processes (LO 4-1)

Save your notes and drafts from several assignments so that you can answer the following questions.

- Which of the activities discussed in Module 4 do you use?
- How much time do you spend on each activity?
- What kinds of revisions do you make most often?
- Do you use different processes for different documents, or do you have one process that you use most of the time?
- Which practices of good writers do you follow?
- What parts of your process seem most successful? Are there any places in the process that could be improved? How?
- What relation do you see between the process(es) you use and the quality of the final document?

4.10 Checking Spell and Grammar Checkers (LO 4-5)

Each of the following paragraphs contains errors in grammar, spelling, and punctuation. Which errors does your spelling or grammar checker catch? Which errors does it miss? Does it flag as errors any words that are correct?

1. Answer to an Inquiry

Thin Lost Vegans is lonely a place to gambling! Thank again? There is mooch to do do in Las Vega for families to, such as them parks, magic shoes, and sporting. Events. Ewe cane also experience fin dining and tours of the surrendering desert with it's bootyful florid and fawna. The warm colors of the dessert well stay with your four many years two come. Visited Las Vegetables for a vacate of a. Lifeboat. Time.

2. Performance Appraisal

This quarterly perform appraise is. Four lisa. She have a good quart, witch ending with a 22 percent in crease in here sales for the three month. In fax Lissa outperform aviary one in her compartment. Lisa is a good employment, often straying late or working threw the weekends. Her dedication is great? Won of her peers, said "She is a la mode salesperson and a goon coat working."

4.11 Giving and Evaluating Feedback (LO 4-6)

In a group with other students, use the Checklist for Thorough Revision in Figure 4.4 to provide feedback on drafts of letters or memos for this course.

As you give feedback, answer the following questions:

- When you give feedback, do you normally start by looking for places to add, delete, substitute, or change? Or do you normally start by looking for grammatical errors and typos?

- c. Present your results in a memo to your instructor.
- d. Post an e-mail message to the class discussing your results.
- e. Share your results with a small group of students and write a joint memo reporting the similarities and differences you found.

As Your Instructor Directs,

- a. Discuss your process with a small group of other students.
- b. Write a memo to your instructor analyzing in detail your process for composing one of the papers for this class.
- c. Write a memo to your instructor analyzing your process during the term. What parts of your process(es) have stayed the same throughout the term? What parts have changed?

3. Brochure

Thin Lost Vegans is lonely a place to gambling! Thank again? There is mooch to do do in Las Vega for families to, such as them parks, magic shoes, and sporting. Events. Ewe cane also experience fin dining and tours of the surrendering desert with it's bootyful florid and fawna. The warm colors of the dessert well stay with your four many years two come. Visited Las Vegetables for a vacate of a. Lifeboat. Time.

4. Presentation Slides

How to Crate a Web résumé

- Omit home addressee and phone numb
- Use other links only if the help a employer evaluate ewe.

A. be Professionally!

B. Carelessly craft and proof read the phrase on the index pager.

Cow to Create a Scanable Resume

- Crate a "plane vanilla" document.
- Use include a Keywords" section. Include personality trades as will as accomplishments.
- Be specific aunt Quantifiable.

- On which aspects is it easiest for you to comment? Which aspects require more thought? Why?
- How many times do you have to read the draft to answer all of the questions in the Checklist?
- Do you tend to suggest mostly big changes, mostly small ones, or a mix?
- How do you tend to word your comments? Are they mostly positive or mostly negative? Do you tend to

describe your reaction as a reader, identify why a change is needed, name the change needed, make the change for the writer, or what?

When you read feedback from others, answer the following questions:

- Which comments were new information to you? Which told you something about your draft that you already knew or suspected?
- Did you have any questions that comments did not address?
- What kinds of feedback were most helpful to you? Why?

- Were any comments unclear? Talk to the commenter, and try to figure out what wording would have been clearer to you.
- Did any comments annoy or offend you? Why? Could the commenter have made the same point in a better way?

As Your Instructor Directs,

- a. Share your answers with other students in your group. Discuss ways that each of you can make your future feedback even more useful.
- b. Organize your answers in a memo to your instructor.

Polishing Your Prose

Using Spell and Grammar Checkers

Most word-processing programs come with spell and grammar checkers. While these computer tools can be useful, remember that they have limitations.

Spellcheckers identify words that don't match their dictionary. If the word is a real word, the spellchecker can't tell if it's the right word for the context (e.g., "their" versus "there," as in "We will review the report when we get their").

Grammar checkers only suggest possible errors and solutions; you must make the final decision. That is, a grammar checker may tell you that you've used passive voice, but the checker can't tell you whether the passive is appropriate in that particular sentence.

Therefore, use spell and grammar checkers as one of several tools to make your writing better. In addition, keep a dictionary, thesaurus, and stylebook handy. Work to improve your command of spelling and grammar; take a class or work with a college writing center for help.

Exercises

Type the following into your word processor. Are all the words or constructions that show up as errors really wrong? Are there any errors that don't show up?

1. There report notes fore markets wear increased prophets are passable.
2. Even if ewe posses the rite skulls, lending the job you wont cane be trickily.

3. Ill chick with the mangers to fine out if they're employs fell hoppy with there compensated.
4. Quit a phew organisms have a bored of directors that overseas howl the organism operates.
5. Tree investors axed if wee mite consider celling are products inline.
6. Sharon tolled us that thee purchase requests should bee reviewed at lest too thymes before making then.
7. Mike twitted a massage abut the sails kickoff planed for the fiftieth of Augusta.
8. Whale sum people thank a lack of compliants is the same thing as doing will, a true sine of succession is grater market shore.
9. Hour facts machine heartily gets used any moor, butt its steel an imported peace of offense equipment.
10. Win Jenny decided too weight four confirmation from the pre-diction staph, she maid a whys incision—ant saved this business money!

Check your answers to the odd-numbered exercises at the back of the book.

Designing Documents, Slides, and Screens

LEARNING OBJECTIVES

Module 5 can help you design business documents successfully. After completing the module, you should be able to

- | | | | |
|---------------|--|---------------|--|
| LO 5-1 | Apply strategies for paper page design. | LO 5-4 | Apply strategies for design tests. |
| LO 5-2 | Apply strategies for presentation slide design. | LO 5-5 | Apply strategies for computer use in design. |
| LO 5-3 | Apply strategies for web page design. | LO 5-6 | Recognize questions about design while writing. |

Good document design saves time and money, reduces legal problems, and builds goodwill. A well-designed document looks inviting, friendly, and easy to read. Effective design also groups ideas visually, making the structure of the document more obvious so the document is easier to read. Research shows that easy-to-read documents also enhance your credibility and build an image of you as a professional, competent person.¹

Guidelines for creating effective paper documents are well supported with research and practice. Much less research has been done on effective slides and screens. Moreover, as the population in general becomes more experienced in seeing presentation slides and using the web, what works may change. Pay attention to the documents, slides, and screens you see and to the responses they get from other people in your organization so that you can keep up with evolving standards. In particular, changes to social media like Facebook require users to stay current. Even if fonts and layouts change, however, the principles of good design described in this module should still apply.

Information Mapping uses grids and tables to present complex information in an easy-to-use format.

A study by the Pew Charitable Trust found that checking account documents are still too confusing for consumers. Because disclosures, for instance, can be hard to read, consumers may struggle to understand fees. In addition to design issues, such as too little white space, length can be a problem. The median length of checking account disclosures is 69 pages—down from 111 pages.

Source: Jim Puzzanghera, "Checking Accounts Still Too Confusing and Expensive, Study Finds," *The Los Angeles Times*, June 9, 2012, <http://www.latimes.com/business/la-fi-bank-fees-20120609,0,4130869.story>.

Menu design and language can affect what a diner orders. Using decoys, such as placing an expensive dish at the top of the menu to make other prices seem more reasonable, removing dollar signs from prices, and adding sensory labels, like "buttery plump" to otherwise ordinary words like "pasta," can all play on the customer's culinary desires.

Source: Sarah Kershaw, "Using Menu Psychology to Entice Diners," *The New York Times*, December 23, 2009, D1.

How should I design paper pages? LO 5-1

► Follow these five guidelines.

Use the following guidelines to create visually attractive documents.

- Use white space to separate and emphasize points.
- Use headings to group points.
- Limit the use of words set in all capital letters.
- Use no more than two fonts in a single document.
- Decide whether to justify margins based on the situation and the audience.

Use White Space

White space—the empty space on the page—makes material easier to read by emphasizing the material that it separates from the rest of the text. To create white space,

- Use headings.
- Use a mix of paragraph lengths (most no longer than seven typed lines).
- Use lists.
 - Use tabs or indents—not spacing—to align items vertically.
 - Use numbered lists when the number or sequence of items is exact.
 - Use bullets (large dots or squares like those in this list) when the number and sequence don't matter.

When you use a list, make sure all of the items in it are parallel and fit into the structure of the sentence that introduces the list.

Faulty: The following suggestions can help employers avoid bias in job interviews:

1. Base questions on the job description.
2. Questioning techniques.
3. Selection and training of interviewers.

Parallel: The following suggestions can help employers avoid bias in job interviews:

1. Base questions on the job description.
2. Ask the same questions of all applicants.
3. Select and train interviewers carefully.

Also parallel: Employers can avoid bias in job interviews by

1. Basing questions on the job description.
2. Asking the same questions of all applicants.
3. Selecting and training interviewers carefully.

Figure 5.1 shows an original typed document. In Figure 5.2, the same document is improved by using shorter paragraphs, lists, and headings. These devices take space. When saving space is essential, it's better to cut the text and keep white space and headings.

Use Headings

Headings are words or short phrases that group points and divide your letter, memo, or report into sections.

- Make headings specific.
- Make each heading cover all the material until the next heading.
- Keep headings at any one level parallel: all nouns, all complete sentences, or all questions.

In a letter or memo, type main headings even with the left-hand margin in bold. Capitalize the first letters of the first word and of other major words; use lowercase for all other letters. (See Figure 5.2 for an example.) In single-spaced text, triple-space

Figure 5.1 A Document with Poor Visual Impact

Long paragraph is visually uninviting.

MONEY DEDUCTED FROM YOUR WAGES TO PAY CREDITORS

When you buy goods on credit, the store will sometimes ask you to sign a Wage Assignment form allowing it to deduct money from your wages if you do not pay your bill. When you buy on credit, you sign a contract agreeing to pay a certain amount each week or month until you have paid all you owe. The Wage Assignment Form is separate. It must contain the name of your present employer, your Social Security number, the amount of money loaned, the rate of interest, the date when payments are due, and your signature. The words "Wage Assignment" must be printed at the top of the form and also near the line for your signature. Even if you have signed a Wage Assignment agreement, Roysner will not withhold part of your wages unless all of the following conditions are met: 1. You have to be more than forty days late in payment of what you owe; 2. Roysner has to receive a correct statement of the amount you are in default and a copy of the Wage Assignment form; and 3. You and Roysner must receive a notice from the creditor at least twenty days in advance stating that the creditor plans to make a demand on your wages. This twenty-day notice gives you a chance to correct the problems yourself. If these conditions are all met, Roysner must withhold 15 percent of each paycheck until your bill is paid and give this money to your creditor.

If you think you are not late or that you do not owe the amount stated, you can argue against it by filing a legal document called a "defense." Once you file a defense, Roysner will not withhold any money from you. However, be sure you are right before you file a defense. If you are wrong, you have to pay not only what you owe but also all legal costs for both yourself and the creditor. If you are right, the creditor has to pay all these costs.

Important information is hard to find.

Full capital letters make title hard to read.

between the previous text and the heading; double-space between the heading and the text that follows.

Limit the Use of Words Set in All Capital Letters

We recognize words by their shapes.² (See Figure 5.3.) In capitals, all words are rectangular; letters lose the descenders and ascenders that make reading go more quickly. Use full capitals sparingly. Instead, make text bold to emphasize it.

Use No More than Two Fonts in a Single Document

Each font comes in several sizes and usually in several styles (bold, italic, etc.). Typewriter fonts are **fixed**; that is, every letter takes the same space. An *i* takes the same space as a *w*. Courier and Prestige Elite are fixed fonts. Computers usually offer **proportional** fonts as well, where wider letters take more space than narrower letters. Times Roman, Palatino, Helvetica, Geneva, and Arial are proportional fonts.

Serif fonts have little extensions, called serifs, from the main strokes. (In Figure 5.4, look at the feet on the *t* in Times Roman and the little flicks on the ends of the top bar of the *t*.) Courier, Times Roman, Palatino, and Lucinda Calligraphy are serif fonts. Serif fonts are

It pays to read the fine print. While about 97% of a credit card donation gets to charities, the rest is kept by many banks and credit card companies. *The Huffington Post* notes they make about \$250 million annually from such fees. Visa and American Express later waived fees for Haiti's earthquake relief, but one bank, Capital One, always waives such charges through its "No Hassle Giving Site."

Source: Laura Bassett, "As Wallets Open for Haiti, Credit Card Companies Take Big Cut," January 14, 2010, http://news.yahoo.com/s/huffpost/20100114/cm_huffpost/423238.

Figure 5.2 A Document Revised to Improve Visual Impact

**Money Deducted from Your Wages
to Pay Creditors**

First letter of each main word capitalized—
Title split onto two lines.

When you buy goods on credit, the store will sometimes ask you to sign a Wage Assignment form allowing it to deduct money from your wages if you do not pay your bill.

Have You Signed a Wage Assignment Form?

Headings divide document into chunks.

When you buy on credit, you sign a contract agreeing to pay a certain amount each week or month until you have paid all you owe. The Wage Assignment Form is separate. It must contain

- The name of your present employer,
- Your Social Security number,
- The amount of money loaned,
- The rate of interest,
- The date when payments are due, and
- Your signature.

List with bullets where order of items doesn't matter.

Single-space list when items are short.

The words "Wage Assignment" must be printed at the top of the form and also near the line for your signature.

When Would Money Be Deducted from Your Wages to Pay a Creditor?

Headings must be parallel. Here, all are questions.

Even if you have signed a Wage Assignment agreement, Roysner will not withhold part of your wages unless all of the following conditions are met:

1. You have to be more than 40 days late in payment of what you owe;
2. Roysner has to receive a correct statement of the amount you are in default and a copy of the Wage Assignment form; and
3. You and Roysner must receive a notice from the creditor at least 20 days in advance stating that the creditor plans to make a demand on your wages. This 20-day notice gives you a chance to correct the problem yourself.

White space between items emphasizes them.

Double-space between items in a list when most items are two lines or longer.

If these conditions are all met, Roysner must withhold fifteen percent (15%) of each paycheck until your bill is paid and give this money to your creditor.

What Should You Do If You Think the Wage Assignment Is Incorrect?

If you think you are not late or that you do not owe the amount stated, you can argue against it by filing a legal document called a "defense." Once you file a defense, Roysner will not withhold any money from you. However, be sure you are right before you file a defense. If you are wrong, you have to pay not only what you owe but also all legal costs for both yourself and the creditor. If you are right, the creditor has to pay all these costs.

Figure 5.3 Full Capitals
Hide the Shape of a Word

Full capitals hide the shape of a word and slow reading 19%.

FULL CAPITALS HIDE THE SHAPE OF A WORD AND SLOW READING 19%.

This sentence is set in 12-point Times Roman.

This sentence is set in 12-point Arial.

This sentence is set in 12-point New Courier.

This sentence is set in 12-point Lucinda Calligraphy.

This sentence is set in 12-point Broadway.

This sentence is set in 12-point Technical.

Figure 5.4 Examples of Different Fonts

easier to read because the serifs help the eyes move from letter to letter. Helvetica, Geneva, and Arial are **sans serif** fonts because they lack serifs (*sans* is French for *without*). Sans serif fonts are good for titles, tables, and narrow columns.

Most business documents use just one font—usually Times Roman, Palatino, Helvetica, or Arial in 11- or 12-point. In a complex document, use bigger type for main headings and slightly smaller type for subheadings and text. If you combine two fonts in one document, choose one serif and one sans serif typeface.

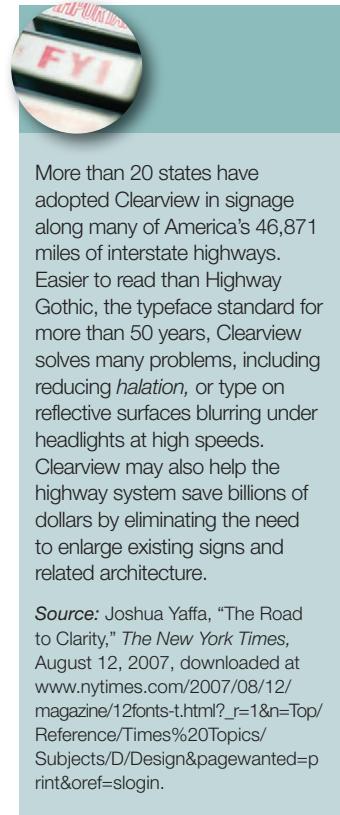

Decide Whether to Justify Margins Based on the Situation and the Audience

Computers allow you to use **full justification** so that type on both sides of the page is evenly lined up. This paragraph justifies margins. Margins that are justified only on the left are sometimes called **ragged right margins**. Lines end in different places because words are of different lengths. The FYI and Instant Replay boxes use ragged right margins.

Use justified margins when you

- Can use proportional typefaces.
- Want a more formal look.
- Want to use as few pages as possible.
- Write to skilled readers.³

The visual design of a message can support or undercut the impact of the words.

for Dave Paradi's tips and links on using PowerPoint slides in presentations.

Multi-touch screens, which let people use finger gestures to access features from their smartphone and tablet PC displays, may soon be common in their larger cousins. Microsoft's purchase of Perceptive Pixel, which is a pioneer in the technology for desktop PCs, coincides with enhancements planned for Windows 8 for use with multi-touch screens. The change in how users interface with computers may significantly affect how users plan and use presentation software, such as PowerPoint.

Source: Clint Boulton, "Microsoft Bringing Multi-Touch Screens to the Big Time," *The Wall Street Journal*, July 11, 2012, <http://blogs.wsj.com/cio/2012/07/11/microsoft-bringing-multi-touch-screens-to-the-big-time/?KEYWORDS=power point+presentation>.

Use ragged right margins when you

- Do not have proportional typefaces.
- Want a less formal look.
- Want to be able to revise an individual page without reprinting the whole document.
- Use very short line lengths.

How should I design presentation slides? LO 5-2

- *Keep slides simple, relevant, and interesting.*

As you design slides for PowerPoint and other presentation programs, keep these guidelines in mind.

- Use a big font: 44- or 50-point for titles, 32-point for subheads, and 28-point for examples.
- Use bullet-point phrases rather than complete sentences.
- Use clear, concise language.
- Make only three to five points on each slide. If you have more, consider using two slides.
- Customize your slides with the company logo, charts, and scanned-in photos and drawings.

Use clip art only if the art is really appropriate to your points and only if you are able to find nonsexist and nonracist images. (At the end of the 1990s, as Marilyn Dyrud has shown, the clip art in major software programs was biased.⁴) Today, Internet sources offer many more choices.

Choose a consistent template, or background design, for the entire presentation. Make sure the template is appropriate for your subject matter. For example, use a globe only if your topic is international business and palm trees only if you're talking about tropical vacations. One problem with PowerPoint is that the basic templates may seem repetitive to people who see lots of presentations made with the program. For a very important presentation, you may want to consider customizing the basic template.

Choose a light background if the lights will be off during the presentation and a dark background if the lights will be on. Slides will be easier to read if you use high contrast between the words and background. See Figure 5.5 for examples of effective and ineffective color combinations.

Figure 5.5 Effective and Ineffective Colors for Presentation Slides

Effective

Use high contrast between words and the background.

Repeat colors in words and in design elements.

Ineffective

Limit the number of bright colors.

Dark colors disappear against a dark background.

Light colors disappear against a light background.

How should I design Web pages? LO 5-3

- Pay attention to content, navigation, and the first screen.

Good web pages have both good content and an interesting design. You should be able to evaluate the design of a web page even if you never create one from scratch.

The opening screen is crucial. Not only must the first screen open quickly, but it also must contain the information visitors need to quickly find what they are looking for. While some studies show that users grow impatient after waiting 15 seconds for a page to load, research by Jakob Nielsen puts that number at 10 seconds, and he says users often leave web pages within 10 to 20 seconds, staying on average less than a minute. In addition, users tend not to scroll down beyond the first screen of text.⁵ To keep visitors around long enough to find (and buy) what they want, make using the first screen extremely easy.

- Provide an introductory statement orienting the surfing reader to the organization.
- Offer an overview of the content of your page, with links to take readers to the parts that interest them. A site index and internal search engine are valuable tools.
- Include information that will be most interesting and useful to most readers.

The rest of the page can contain information that only a limited number of readers will want. When a document reaches four pages or more, think about dividing it into several documents. Specialized information can go on another page, which readers can click on if they want it.

Make it clear what readers will get if they click on a link.

Ineffective phrasing: Employment. Openings and skills levels are determined by each office.

Better phrasing: Employment. Openings listed by skills level and by location.

Minimize the number of links readers have to click through to get to the information they want.

As you design pages,

- Use small graphics; keep animation to a minimum. Both graphics and animation take time to load, especially with a slow modem. Include a Skip Intro button if you have an animated introduction page.
- Provide visual variety. Use indentations, bulleted or numbered lists, and headings.
- Unify multiple pages with a small banner, graphic, or label so surfers know who sponsors each page.
- On each page, provide a link to the home page, the name and e-mail address of the person who maintains the page, and the date when the page was last revised.
- If your web pages include music or sound effects, put an Off button where the user can find it immediately.

Instant Replay

Guidelines for Page Design

- Use white space to separate and emphasize points.
- Use headings to group points.
- Limit the use of words set in all capital letters.
- Use no more than two fonts in a single document.
- Decide whether to justify margins based on the situation and the audience.

People in the United States focus first on the left side of a website. websites in Arabic and Hebrew orient text, links, and graphics from right to left.

Source: Albert N. Badre, "The Effects of Cross Cultural Interface Design Orientation on World Wide Web User Performance," GVU Technical Report GIT-GVU-01-03, August 31, 2000, 8; [www.cc.gatech.edu/gvu/reports/2001/](http://cc.gatech.edu/gvu/reports/2001/), visited site July 27, 2002.

How do I know whether my design works? LO 5-4

- Test it.

A design that looks pretty may or may not work for the audience. To know whether your design is functional, test it with your audience.

- Watch someone as he or she uses the document to do a task. Where does the reader pause, reread, or seem confused? How long does it take? Does the document enable the reader to complete the task accurately?
- Ask the reader to “think aloud” while completing the task, interrupt the reader at key points to ask what he or she is thinking, or ask the reader to describe the thought process after completing the document and the task. Learning the reader’s thought processes is

Building a Critical Skill

Using Computers to Create Good Design LO 5-5

Standard word-processing programs such as Word, WordPerfect, and Google Docs let you control how your page looks. Different versions of each program handle these commands differently. Look up the following bolded terms in a manual, a book about the program, or the online Help menu of your computer program to find out how to use each feature.

Letters and Memos

Choose a businesslike font in 11- or 12-point type. Times Roman, Palatino, Helvetica, and Arial are the most commonly used business fonts.

Use **bold** headings. Avoid having a heading all by itself at the bottom of the page. If you can't have at least one line of text under it, move the heading to the next page. You can check this by eye or set your program to avoid **widows** and **orphans**.

Use **tabs** or **indents** to line up the return address and signature blocks in modified block format (►► Module 9), the To/From/Subject line section of a memo, or the items in a list.

Change your **tab settings** to create good visual impact. A setting at .6" works well for the To/From/Subject line section of memos. Use .4" for paragraphs and .6" for the start of bulleted lists. For lists with 10 or more items, the setting will need to be a bit further to the right—about .65".

Choose the design for **bullets** under Insert or Format. Both WordPerfect and Word will create bulleted or numbered lists automatically. If you have lists with paragraphs, turn off the automatic bullets and create them with the bullets in Symbols. Use **indent** (not tab) to move the whole list in, not just a single line of it.

Use a **header** (in the Insert or View menu) with automatic **page numbering** (pull down Format to Page) for second and subsequent pages. That way, when you delete a paragraph or

expand your reader benefits, you don't have to manually move the header. You can either **delay** the header till page 2 or create it on page 2. For best visual impact, make your header one point size smaller than the body type.

For a two-page document, change the top **margin** of the second page to .5" so the header is close to the top of the page.

Use the same side margins as your letterhead. If you aren't using a letterhead, use 1" side margins.

On a two-page document, make sure the second page has at least 4 to 6 lines of text for letters and at least 10 lines of text for memos. If you have less, either (1) add details, (2) start the message further down on page one so that there is more text on page two, or (3) make the text fit on just one page by (a) tightening your prose, (b) using full justification to save space, or (c) using less white space.

Word-processing programs have a **quickcorrect** or **auto-correct** feature that changes *hte* to *the*, (c) to ©, and so forth. Go into the Tools or Format menus to find these features and edit them so they make only the changes you want.

Hyphenation may be under Format or under Language in Tools.

Printing

To save paper, check **print preview** on the File menu. You'll be able to see how your document will look on the page and make minor layout changes before you print.

If you prepare your document on one computer and print it from another, be sure to open the document and check all of it before you print. Different printers may change margins slightly. Even the same size font may differ from printer to printer, so that a document that fit nicely on one page in 11-point on one computer may suddenly take up more room on a different one.

important, since a reader may get the right answer for the wrong reasons. In such a case, the design still needs work.

- Test the document with the people who are most likely to have trouble with it: very old or young readers, people with little education, people who read English as a second language.
- Ask readers to put a plus sign (+) in the margins by any part of the document they like or agree with and a minus sign (−) by any part that seems confusing or wrong. Then use interviews or focus groups to find out the reasons.

Instant Replay

Designing PowerPoint Slides

- Use a big font.
- Use bullet-point phrases.
- Use clear, concise language.
- Make only three to five points on each slide.
- Customize your slides.

When should I think about design? LO 5-6

- At each stage of the writing process.

Document design isn't something to "tack on" when you've finished writing. Indeed, the best documents are created when you think about design at each stage of your writing process(es).

- As you plan, think about your audiences. Are they skilled readers? Are they busy? Will they read the document straight through or skip around in it?
- As you write, incorporate lists and headings. Use visuals to convey numerical data clearly and forcefully.
- Get feedback from people who will be using your document. What parts of the document do they think are hard to understand? Is there additional information they need?
- As you revise, check your draft against the guidelines in this module.

 Site to See

Go to www.webpagesthatsuck.com
for examples of poorly designed web pages.

Summary of Learning Objectives

- To create visually attractive documents, **(LO 5-1)**
 - Use white space.
 - Use headings.
 - Limit the use of words set in all capital letters.
 - Limit the number of fonts in a single document.
 - Decide whether to justify margins based on the situation and the audience.
- As you design slides for PowerPoint and other presentation programs, **(LO 5-2)**
 - Use a big font.
 - Use bullet-point phrases.
 - Use clear, concise language.
 - Make only three to five points on each slide.
 - Customize your slides.
- Good web pages have both good content and an interesting design. **(LO 5-3)**
 - Orient the surfing reader to the organization.
 - Offer an overview of the content of your page, with links to take readers to the parts that interest them.
 - Make it clear what readers will get if they click on a link.
 - Keep graphics small.
 - Provide visual variety.
 - Unify multiple pages with a small banner, graphic, or label.
- On each page, provide a link to the home page, the name and e-mail address of the person who maintains the page, and the date when the page was last revised.
- Provide a Skip Intro button for animated introductions and an Off button for sound.
- To test a document, observe readers, ask them to “think aloud” while completing the task, interrupt them at key points to ask what they are thinking, or ask them to describe their thought process after completing the document and the task. **(LO 5-4)**
- WordPerfect and Word let you control how your page looks. In general, **(LO 5-5)**
 - Use the program manual or help function to see commands to use.
 - Choose a businesslike font in 11- or 12-point type.
 - Use Times Roman, Palatino, Helvetica, or Arial.
 - Use print preview to see what a page will look like printed.
- The best documents are created when you think about design at each stage of the writing process. **(LO 5-6)**
 - As you plan, think about the needs of your audience.
 - As you write, incorporate lists, headings, and visuals.
 - Get feedback from people who will be using your document.
 - As you revise, check your draft against the guidelines in this chapter.

Assignments for Module 5

Questions for Comprehension

- 5.1** How can you create white space? **(LO 5-1)**
5.2 How do you decide whether to use bullets or numbers in a list? **(LO 5-1)**

- 5.3** What are three criteria for good web pages? **(LO 5-3)**

Questions for Critical Thinking

- 5.4** “Closed captions” for people with hearing impairments are almost always typed in full capital letters. Why is that a bad idea? Are there any advantages to using full capitals? What arguments could you use for changing the practice? **(LO 5-1)**

- 5.5** Suppose that, in one company, a worker says, “We don’t need to worry about design. People pay a toll charge to call us, and we make a slight profit on each call. So if they have questions about the product, that’s OK. If better design reduced the number of calls, we might actually lose

money!" How would you persuade such a person that good document design is worth doing? (LO 5-1)

- 5.6** Central Community College is preparing a brochure to persuade prospective students to consider taking classes. The college doesn't have the money for full-scale document testing. What free or almost-free things could it do to make the document as effective as possible? (LO 5-1)
- 5.7** Design choices may have ethical implications. Indicate whether you consider each of the following actions ethical, unethical, or a gray area. Which of the actions would you

Exercises and Problems

5.8 Evaluating Page Designs (LO 5-1)

Use the guidelines in Module 5 to evaluate each of the following page designs. What are their strong points? What could be improved?

a.

do? Which would you feel uncomfortable doing? Which would you refuse to do? (LO 5-1)

- Putting the advantages of a proposal in a bulleted list, while discussing the disadvantages in a paragraph.
- Using a bigger type size so that a résumé visually fills a whole page.
- Putting the services that are not covered by your health plan in full caps to make it less likely that people will read the page.

b. **RESIST the TEMPTATION to use all the fonts available on your COMPUTER.**
Too many fonts create visual clutter ☺ and make a document HARD to read!! **FONTS** that call *attention* to **themselves** are NOT *appropriate* for **BUSINESS** letters, memos, and reports. ☺
Even in a standard font, avoid shadows, outlines, and OVERUSE OF bold and italics. ☺

5.9 Improving a Financial Aid Form (LO 5-1)

You've just joined the Financial Aid office at your school. The director gives you the accompanying form and asks you to redesign it.

"We need this form to see whether parents have other students in college besides the one requesting aid. Parents are supposed to list all family members that the parents support—themselves, the person here, any other kids in college, and any younger dependent kids."

"Half of these forms are filled out incorrectly. Most people just list the student going here; they leave out everyone else."

"If something is missing, the computer sends out a letter and a second copy of this form. The whole process starts over. Sometimes we send this form back two or three times before it's right. In the meantime, students' financial aid is delayed—maybe for months. Sometimes things are so late that they can't register for classes, or they have to pay tuition themselves and get reimbursed later."

"If so many people are filling out the form wrong, the form itself must be the problem. See what you can do with it. But keep it to a page."

As Your Instructor Directs,

- Analyze the current form and identify its problems.
- Revise the form. Add necessary information; reorder information; change the chart to make it easier to fill out.

Hints:

- Where are people supposed to send the form? What is the phone number of the financial aid office? Should they need to call the office if the form is clear?
- Does the definition of *half-time* apply to all students or just those taking courses beyond high school?
- Should capital or lowercase letters be used?
- Are the lines big enough to write in?
- What headings or subdivisions within the form would remind people to list all family members whom they support?
- How can you encourage people to return the form promptly?

Please complete the chart below by listing all family members for whom you (the parents) will provide more than half support during the academic year (July 1 through June 30). Include yourselves (the parents), the student, and your dependent children, even if they are not attending college.

EDUCATIONAL INFORMATION, 200_ - 200_						
FULL NAME OF FAMILY MEMBER	AGE	RELATIONSHIP OF FAMILY MEMBER TO STUDENT	NAME OF SCHOOL OR COLLEGE THIS SCHOOL YEAR	FULL-TIME	HALF-TIME* OR MORE	LESS THAN HALF-TIME
STUDENT APPLICANT						

*Half-time is defined as 6 credit hours or 12 clock hours a term.

When the information requested is received by our office, processing of your financial aid application will resume.

Please sign and mail this form to the above address as soon as possible. Your signature certifies that this information and the information on the FAF is true and complete to the best of your knowledge. If you have any questions, please contact a member of the need analysis staff.

Signature of Parent(s)

Date

5.10 Using Headings (LO 5-1)

Reorganize the items in each of the following lists, using appropriate headings. Use bulleted or numbered lists as appropriate.

- a. Rules and Procedures for a Tuition Reimbursement Plan
 1. You are eligible to be reimbursed if you have been a full-time employee for at least three months.
 2. You must apply before the first class meeting.
 3. You must earn a “C” or better in the course.
 4. You must submit a copy of the approved application, an official grade report, and a receipt for tuition paid to be reimbursed.
 5. You can be reimbursed for courses related to your current position or another position in the company, or for courses that are part of a degree related to a current or possible job.
 6. Your supervisor must sign the application form.

5.11 Analyzing Documents (LO 5-1)

Collect several documents available to you as a worker, student, or consumer: letters and memos, newsletters, ads and flyers, reports. Use the guidelines in Module 5 to evaluate each of them.

As Your Instructor Directs,

- a. Discuss the documents with a small group of classmates.
- b. Write a memo to your instructor evaluating three or more of the documents. Include originals or photocopies

5.12 Revising a Document (LO 5-1)

Your state government hires interns for many of its offices. The Director of Human Resources has noticed that few of the interns submit all the needed paperwork on time and

7. Courses may be at any appropriate level (high school, college, or graduate school).
- b. Activities in Starting a New Business
 - Getting a loan or venture capital
 - Getting any necessary city or state licenses
 - Determining what you will make, do, or sell
 - Identifying the market for your products or services
 - Pricing your products or services
 - Choosing a location
 - Checking zoning laws that may affect the location
 - Identifying government and university programs for small business development
 - Figuring cash flow
 - Ordering equipment and supplies
 - Selling
 - Advertising and marketing

of the documents you discuss as an appendix to your memo.

- c. Write a memo to your supervisor recommending ways the organization can improve its documents.
- d. In an oral presentation to the class, explain what makes one document good and another one weak. If possible, use transparencies so that classmates can see the documents as you evaluate them.

suspects that the problem is the form memo that goes out to interns. You've been asked to revise the memo to make it more effective.

Subject: Getting Your First Paycheck on Time

So that you can receive your first paycheck on time, please send the following items to the office of Human Resources by the first working day of next month: a copy of your Social Security card or a copy of your birth certificate; a copy of your driver's license; proof of enrollment in an accredited college (accepted items include a paid fee statement; a letter from the registrar's office; a copy of your college identification card with the term and year on it); and proof of your grade status (e.g., first year, sophomore). Attach one of the following: your latest grade report, your latest transcript; a letter from the registrar's office verifying your grade status; a copy of your college identification card that shows what level you are in. Pay is based on how many quarter or semester hours you have completed. At the end of each term, notify Human Resources. You may be eligible for a pay increase.

Rewrite the message, paying special attention to layout and page design.

5.13 Evaluating PowerPoint Slides (LO 5-2)

Evaluate the following drafts of PowerPoint slides.

- Is the background appropriate for the topic?
- Do the slides use words or phrases rather than complete sentences?

- Is the font big enough to read from a distance?
- Is the art relevant and appropriate?
- Is each slide free from errors?

5.14 Evaluating Web Pages (LO 5-3)

Compare three web pages in the same category (for example, nonprofit organizations, car companies, university departments, sports information). Which page(s) are most effective? Why? What weaknesses do the pages have?

As Your Instructor Directs,

- a. Discuss the pages with a small group of classmates.
- b. Write a memo to your instructor evaluating the pages. Include URLs of the pages in your memo.

- c. In an oral presentation to the class, explain what makes one page good and another one weak. If possible, put the pages on screen so that classmates can see the pages as you evaluate them.
- d. Post your evaluation of the pages in an e-mail message to the class. Include hot links to the pages you evaluate.

Polishing Your Prose

Active and Passive Voice

Verbs have "voice": active and passive voice. Business communication generally prefers active voice because it is shorter and clearer.

A verb is active if the grammatical subject acts. Passive voice occurs when the subject is acted upon by someone or something else.

Active: The man bought grapes at the store.

Passive: The grapes were bought by the man at the store.

In the active voice, the subject—*the man*—is doing the action—bought. In the passive version, *the grapes* is the subject, yet it is *the man*, not *the grapes*, that is actually doing the action. It is harder for the reader to follow who or what did the action. In addition, it takes more words to convey the same idea.

To change a passive voice construction into the active voice, start by identifying who or what is doing the action. If no agent ("by ____") is present in the sentence, you will need to supply it. A passive verb is usually accompanied by a helping verb, such as *is*, *are*, or *were*. Rewrite the sentence by putting the actor in the role of subject and dropping the helping verb:

Passive: The plan was approved by our clients.

Active: Our clients approved the plan.

Passive: PowerPoint slides have been created.

Active: Susan created the PowerPoint slides.

Passive: It is desired that you back up your work daily.

Active: Back up your work daily.

In business communication, active voice is usually better. However, passive voice is better in three situations:

1. Use passive voice to emphasize the object receiving the action, not the agent.

Your order was shipped November 15.

The customer's order, not the shipping clerk, is important.

2. Use passive voice to provide coherence within a paragraph. A sentence is easier to read if "old" information comes at the beginning of a sentence. When you have been discussing a topic, use the word again as your subject even if that requires a passive verb.

The bank made several risky loans in the late 1990s. These loans were written off as "uncollectible" in 2002.

Using *loans* as the subject of the second sentence provides a link between the two sentences, making the paragraph as a whole easier to read.

3. Use passive voice to avoid assigning blame.

The order was damaged during shipment.

An active verb would require the writer to specify *who* damaged the order. The passive here is more tactful.

Exercises

Identify whether the passives in the following sentences are acceptable or whether the verb should be changed to active.

1. A mistake cost company several thousand dollars.
2. Two dozen résumés were reviewed by the hiring committee.
3. Rules for using the company posted on the door.
4. The final report was written Jessica Malone and Dylan Toshi.
5. It is recommended that employees keep all personal items locked drawers to discourage theft.
6. Files are kept on the third floor the Accounting Department.
7. A second set of tablet PCs was purchased by the IT Department backup.
8. The campaign is predicted by be a great success in Asia.
9. Apps were created for our customers to access their accounts with a smartphone.
10. Emily, Candice, and Ruben nominated by the awards committee for Employee of the Month.

Check your answers to the odd-numbered exercises at the back of the book.

Unit 1 Cases for Communicators

Old Navy Taken to School

Proofreading—checking for and correcting typographical errors—is the final step in the writing process. While always an integral part of writing, it is of particular importance if the finished product will be mass produced. Beyond checking a message for errors, however, writers also must make sure it gets sent to its intended audience.

Take the case of clothing retailer Old Navy, which won a lucrative deal to produce T-shirts for 70 colleges and universities, such as Duke, Syracuse, Notre Dame, the University of Texas, and the University of Southern California. The shirts feature each institution's name and mascot, along with the phrase "Let's go!" The problem is that the required apostrophe was left out. Hundreds of thousands of shirts with the error were shipped out before anyone caught the mistake.

Old Navy executives want to reprint the T-shirts with the correction, but at least one institution, Syracuse, wants to know who approved the copy before it was printed. Some college officials and alumni are embarrassed that their institution of higher learning is now associated with the mistake. In addition, the error has gone viral, resulting in tweets such as "Pains my English major heart" and "Why graphic designers need proofreaders," as well as other negative publicity for the company.

The cost to reprint the T-shirts alone will be in the thousands of dollars, but the company also stands to lose future customers

from the mistake. The reprinted shirts may also make it to stores too late for the current sports season, defeating the purpose of the campaign in the first place.

Individual Activity

Choose one of the following:

- a. Imagine you are the communications manager at Old Navy. Your task is to write an apology letter to the college or university affected by the error. (You may choose which college or university.) Because the letter is an important part of your company's effort to restore customer confidence by mending relationships, the vice president of communications will be reviewing the message before it is sent.

In addition to accepting full responsibility for the error, your company will take actions to underscore its commitment to good customer service:

1. Developing a strategy to improve editing and reduce the potential for errors.
2. Explaining how your company will settle this matter. (The company has agreed to pay for the offers to affected parties outlined in b.)
- b. Imagine you are the marketing manager for the college or university. It is your task to write a letter of apology to the institution's Board of Trustees, whose members may be embarrassed

by the publicity about the error. Because the letter will be such an important part of the company's effort to restore customer confidence, the institution's president will review the message before it is sent.

Old Navy has ordered the shipments of shirts with the error returned, but there is the possibility that some shirts have already sold or that retailers will keep them in hopes that they become collector's items. To reduce the possibility of continued embarrassment over the error as well as to demonstrate a commitment to good customer service, the company will:

1. Offer a 20% discount on a future wholesale order for a shipment returned in its entirety.
2. Offer a \$2 credit on future merchandise orders for each shirt that is returned in the event some shirts have already sold or are missing.

Before you write either letter, you will need to carefully analyze this communication problem. Use PAIBOC to make sure that you understand the purpose, audience, and situation.

P: What is the purpose of this letter? (Remember, there may be more than one!)

A: Who are the initial, primary, gatekeeper, secondary, and watchdog audiences for my letter?

I: What information should my letter include?

B: What benefits for the reader can I highlight?

O: What objections should I expect?

C: How will the context affect reader response?

Write your thoughts down so you can refer to them later. Be thorough in your answers.

Group Activity

As the communications manager at Old Navy, you have been given the task of developing a “Best Practices” program to establish good revising, editing, and proofreading habits among employees. After you have created the plan, you will submit it to the owners of the company, who will review it before instituting it.

With your fellow managers, develop an outline of this new program. In the plan, explain why revising, editing, and proofreading are important; what the best practices are; and how employees can effectively implement these best practices in their own work.

Consider the following questions:

- What critical communication elements need to be applied?
- How can employees learn to provide quality feedback?
- How important is quality feedback in the writing process?
- What is cycling?
- What specific steps are involved in editing and proofreading a document?
- What is thorough revision? What is light revision?
- How will readers benefit from your improved strategy?

Include any other tips that you, as experts, can offer to your audience.

Creating Goodwill

Module 6

You-Attitude

Module 7

Positive Emphasis

Module 8

Reader Benefits

Module

6

You-Attitude

LEARNING OBJECTIVES

Module 6 focuses on the importance of you-attitude in business communication. After completing the module, you should be able to

LO 6-1 Apply strategies for you-attitude use.

LO 6-2 Compare and contrast situations for you use.

LO 6-3 Apply strategies for goodwill creation with you-attitude.

LO 6-4 Apply strategies for point-of-view adaptation.

You-attitude is a style of writing that

- Looks at things from the reader's point of view.
- Respects the reader's intelligence.
- Protects the reader's ego.
- Emphasizes what the reader wants to know.

You-attitude is a concrete way to show empathy (◀◀ p. 24) and the foundation of persuasion.

You-attitude is a matter of style. That is, revisions for you-attitude do not change the basic meaning of the sentence. However, revising for you-attitude often makes sentences longer since sentences become more specific.

Often, we can create you-attitude by changing words. Sometimes, however, it's necessary to revise organization and content as well as style to create the best document.

How do I create you-attitude in my sentences? LO 6-1

► Talk about the reader—except in negative situations.

To create you-attitude,

1. Talk about the reader, not about yourself.
2. Refer to the reader's request or order specifically.
3. Don't talk about feelings, except to congratulate or offer sympathy.
4. In positive situations, use *you* more often than *I*. Use *we* when it includes the reader.
5. Avoid *you* in negative situations.

1. Talk about the Reader, Not about Yourself

Readers want to know how they benefit or are affected. When you provide this information, you make your message more complete and more interesting.

Lacks you-attitude: I have negotiated an agreement with Apex Rent-a-Car that **gives you** a discount on rental cars.

You-attitude: As a Sunstrand employee, **you can now get** a 20% discount when you rent a car from Apex.

Any sentence that focuses on the writer's work or generosity lacks you-attitude, even if the sentence contains the word *you*. Instead of focusing on what we are giving the reader, focus on what the reader can now do. To do that, you may need to change the grammatical subject.

Lacks you-attitude: We are shipping **your order** of September 21 this afternoon.

You-attitude: **The two dozen CorningWare starter sets you ordered** will be shipped this afternoon and should reach you by **September 28**.

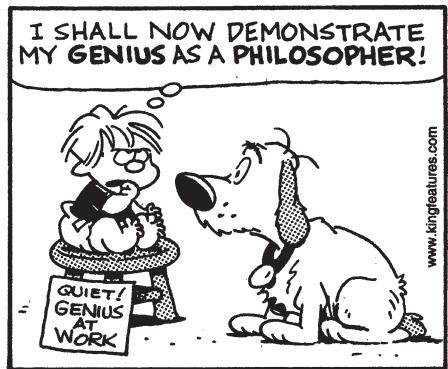

Emphasize what the reader wants to know. The reader is less interested in when we shipped the order than in when it will arrive. Note that the phrase “should reach you by” leaves room for variations in delivery schedules. If you can't be exact, give your reader the information you do have: “UPS shipment from California to Texas normally takes three days.” If you have absolutely no idea, give the reader the name of the carrier, so the reader knows whom to contact if the order doesn't arrive promptly.

In 2008, drugstore giant Walgreen announced plans to open pharmacies and operate health centers at work sites throughout the U.S., bringing services to busy customers rather than the other way around. The company purchased I-trax, Inc., and Whole Health Management, two companies that collectively ran 350 health centers at corporate offices. The company further identified more than 7,600 office sites with 1,000 or more employees that could support similar centers. The result is Take Care Clinics, part of a wholly owned subsidiary of Walgreen. Looking at things from the customer's point of view is helping Walgreen and other companies transform health services.

Source: Amy Merrick, “How Walgreen Changed Its Prescription for Growth,” *The Wall Street Journal*, March 19, 2008, B1; and *Take Care Clinic at Select Walgreens* website (“About Us”), downloaded on February 12, 2010, at http://www.takecarehealth.com/about/?tab=tc_about_us.

Me-attitude can make you seem pompous and self-serving.

You-attitude, positive emphasis, and bias-free language build goodwill with words, just as service, quality, and reliability build goodwill with actions. The Baldrige National Quality Program encourages and recognizes quality in U.S. businesses.

The word *company* has the same root as the word *companion*: both come from the Latin words for eating bread together.

Instant Replay

Definition of You-Attitude

You-attitude is a style of writing that

- Looks at things from the reader's point of view.
- Respects the reader's intelligence.
- Protects the reader's ego.
- Emphasizes what the reader wants to know.

2. Refer to the Reader's Request or Order Specifically

Refer to the reader's request, order, or policy specifically, not as a generic *your order* or *your policy*. If your reader is an individual or a small business, it's friendly to specify the content of the order. If you're writing to a company with which you do a great deal of business, give the invoice or purchase order number.

Lacks you-attitude: Your order . . .

You-attitude (to individual): The desk chair you ordered

You-attitude (to a large store): Your invoice #783329

3. Don't Talk about Feelings, Except to Congratulate or Offer Sympathy

Lacks you-attitude: We are happy to extend you a credit line of \$5,000.

You-attitude: You can now charge up to \$5,000 on your American Express card.

In most business situations, your feelings are irrelevant and should be omitted. The reader doesn't care whether you're happy, bored stiff at granting a routine application, or worried about granting so much to someone who barely qualifies. All the reader cares about is the situation from his or her point of view.

It is appropriate to talk about your own emotions in a message of congratulation or condolence.

You-attitude: Congratulations on your promotion to district manager! I was really pleased to read about it.

You-attitude: I was sorry to hear that your father died.

In internal memos, it may be appropriate to comment that a project has been gratifying or frustrating. In the letter of transmittal that accompanies a report, it is permissible to talk about your feelings about doing the work. But even other readers in your own organization are primarily interested in their own concerns, not in your feelings.

Don't talk about the reader's feelings, either. It can be offensive to have someone else tell us how we feel—especially if the writer is wrong.

Lacks you-attitude: You'll be happy to hear that Open Grip Walkway Channels meet OSHA requirements.

You-attitude: Open Grip Walkway Channels meet OSHA requirements.

Maybe the reader expects that anything you sell would meet government regulations (OSHA—the Occupational Safety and Health Administration—is a federal agency). The reader may even be disappointed if he or she expected higher standards. Simply explain the situation or describe a product's features; don't predict the reader's response.

When you have good news for the reader, simply give the good news.

Lacks you-attitude: You'll be happy to hear that your scholarship has been renewed.

You-attitude: Congratulations! Your scholarship has been renewed.

4. In Positive Situations, Use You More Often than I. Use We When It Includes the Reader

Talk about the reader, not you or your company.

Lacks you-attitude: We provide health insurance to all employees.

You-attitude: You receive health insurance as a full-time Procter & Gamble employee.

Most readers are tolerant of the word *I* in e-mail messages, which seem like conversation. Edit paper documents to use *I* rarely if at all. *I* suggests that you're concerned about personal issues, not about the organization's problems, needs, and opportunities. *We* works well when it includes the reader. Avoid *we* if it excludes the reader (as it would

in a letter to a customer or supplier or as it might in a memo about what *we* in management want *you* to do).

5. Avoid You in Negative Situations

To avoid blaming the reader, use an impersonal expression or a passive verb. Talk about the group to which the reader belongs so readers don't feel they're singled out for bad news.

Lacks you-attitude: *You failed to sign your check.*

You-attitude (impersonal): *Your check arrived without a signature.*

You-attitude (passive): *Your check was not signed.*

Impersonal constructions omit people and talk only about things. **Passive verbs** describe the action performed on something, without necessarily saying who did it. (► See Module 16 for a full discussion of passive verbs.)

In most cases, active verbs are better. But when your reader is at fault, passive verbs may be useful to avoid assigning blame.

Normally, writing is most lively when it's about people—and most interesting to readers when it's about them. When you have to report a mistake or bad news, however, you can protect the reader's ego by using an impersonal construction, one in which things, not people, do the acting.

Lacks you-attitude: *You made no allowance for inflation in your estimate.*

You-attitude (passive): *No allowance for inflation has been made in this estimate.*

You-attitude (impersonal): *This estimate makes no allowance for inflation.*

A University of California, Berkeley, study suggests couples who use inclusive language, such as *we* and *our* rather than *I* or *me*, are more likely to have greater affection and less physiological stress during a disagreement.

Source: Rachel Rettner, "Couples Who Say 'We' Fare Better in Fights," *LiveScience*, February 3, 2010, <http://www.livescience.com/culture/couples-we-words-100203.html>.

Goodwill comes in many forms. Whitlowe R. Green spent a lifetime teaching students the value of economics—and living a frugal life that included buying expired meat and secondhand clothes. When he passed away in 2002, the 88-year-old willed \$2.1 million to his alma mater, Prairie View A & M University, for scholarships, the largest single-donor gift in the institution's history.

A study sure to provoke strong feelings found a link among prejudices, low intelligence, and social conservatism, suggesting, among other things, that anti-prejudice campaigns that expect participants to see things from another person's point of view may be too difficult to handle for people with low IQs. As researchers suspected, low intelligence in childhood corresponded with racism in adulthood. Still, they are quick to point out that drawing sweeping conclusions from the study is unwise. Said lead researcher Gordon Hodson: "There are multiple examples of very bright conservatives and not-so-bright liberals, and many examples of very principled conservatives and very intolerant liberals."

Source: Stephanie Pappas, "Low IQ & Conservative Beliefs Linked to Prejudice," *Live Science*, January 26, 2012, <http://www.livescience.com/18132-intelligence-social-conservatism-racism.html>.

Five Ways to Create You-Attitude

1. Talk about the reader, not about yourself.
2. Refer to the reader's request or order specifically.
3. Don't talk about feelings, except to congratulate or offer sympathy.
4. In positive situations, use *you* more often than *I*. Use *we* when it includes the reader.
5. Avoid *you* in negative situations.

When executive Greg Smith resigned from Goldman Sachs, he criticized the firm for ignoring the best interests of clients. He wrote that employees referred to them as "muppets" and junior analysts commonly asked, "How much money did we make off the client?" Smith's disgust at the firm's me-centered culture was revealed in a scathing editorial published in *The New York Times*.

Source: Greg Smith, "Why I Am Leaving Goldman Sachs," *The New York Times*, March 14, 2012, [%3Fsrc%3Dtþ&smid=fb-share.](http://www.nytimes.com/2012/03/14/opinion/why-i-am-leaving-goldman-sachs.html?_r=1&pagewanted=all)

A purist might say that impersonal constructions are illogical: An estimate, for example, is inanimate and can't "make" anything. In the pragmatic world of business writing, however, impersonal constructions often help you convey criticism tactfully.

When you restrict the reader's freedom, talk about the group to which the reader belongs rather than about the reader as an individual.

Lacks you-attitude: *You* must get approval from the director **before you** publish any articles or memoirs based on your work in the agency.

You-attitude: *Agency personnel* must get approval from the director to publish any articles or memoirs based on *their work* at the agency.

Does you-attitude basically mean using the word *you*? LO 6-2

- No.

All messages should use you-attitude, but the words to achieve it will change depending on the situation.

- In a positive message, focus on what the reader can do. "We give *you*" lacks you-attitude because the sentence focuses on what we are doing.
- Avoid *you* when it criticizes the reader or limits the reader's freedom.
- In a job application letter, create you-attitude by showing how you can help meet the reader's needs, but keep the word *you* to a minimum (► Module 28).

I've revised my sentences. Do I need to do anything else? LO 6-3

- Check content and organization, too.
- Emphasize what the reader wants to know.

Good messages apply you-attitude beyond the sentence level by using content and organization as well as style to build goodwill.

To create goodwill with content,

- Be complete. When you have lots of information to give, consider putting some details in an appendix that may be read later.
- Anticipate and answer questions the reader is likely to have.
- When you include information the reader didn't ask for, show why it is important.
- Show readers how the subject of your message affects them.

To organize information to build goodwill,

- Put information readers are most interested in first.
- Arrange information to meet your reader's needs, not yours.
- Use headings and lists so that the reader can find key points quickly.

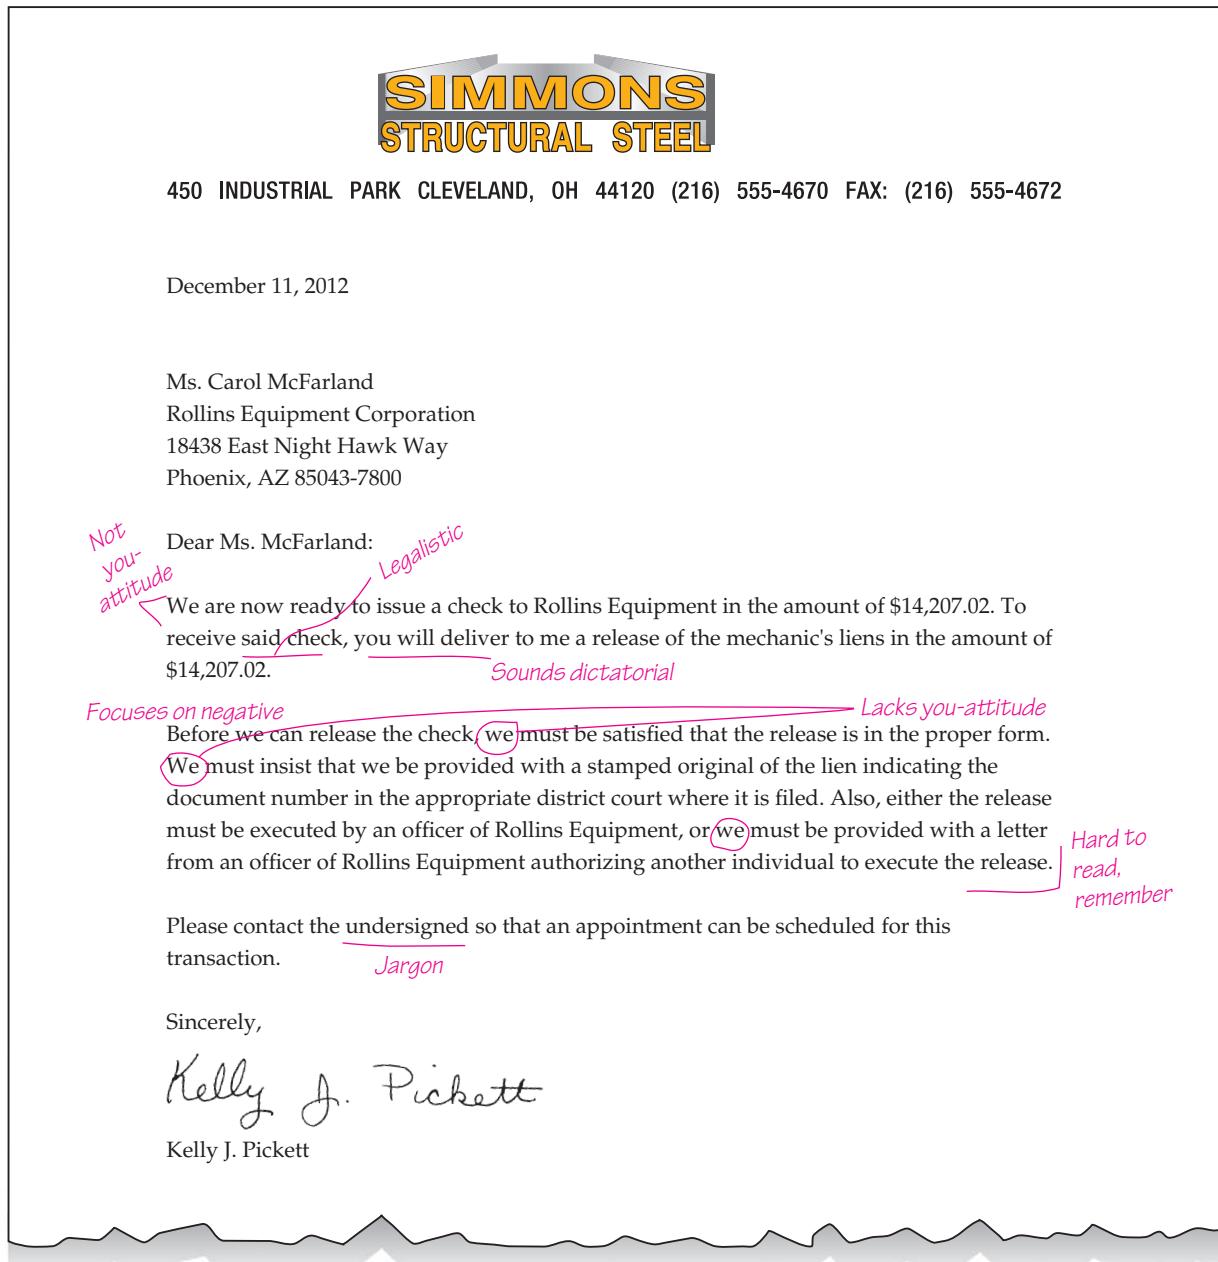

Consider the letter in Figure 6.1. As the red marginal notes indicate, many individual sentences in this letter lack you-attitude. The last sentence in paragraph 1 sounds both harsh and defensive; the close is selfish. The language is stiff and filled with outdated jargon. Perhaps the most serious problem is that the fact most interesting to the reader is buried in the middle of the first paragraph. Since we have good news for the reader, we should put that information first.

Instant Replay

Definitions of Impersonal Constructions

Impersonal constructions omit people and talk only about things. **Passive verbs** describe the action performed on something, without necessarily saying who did it.

Figure 6.1 A Letter Lacking You-Attitude

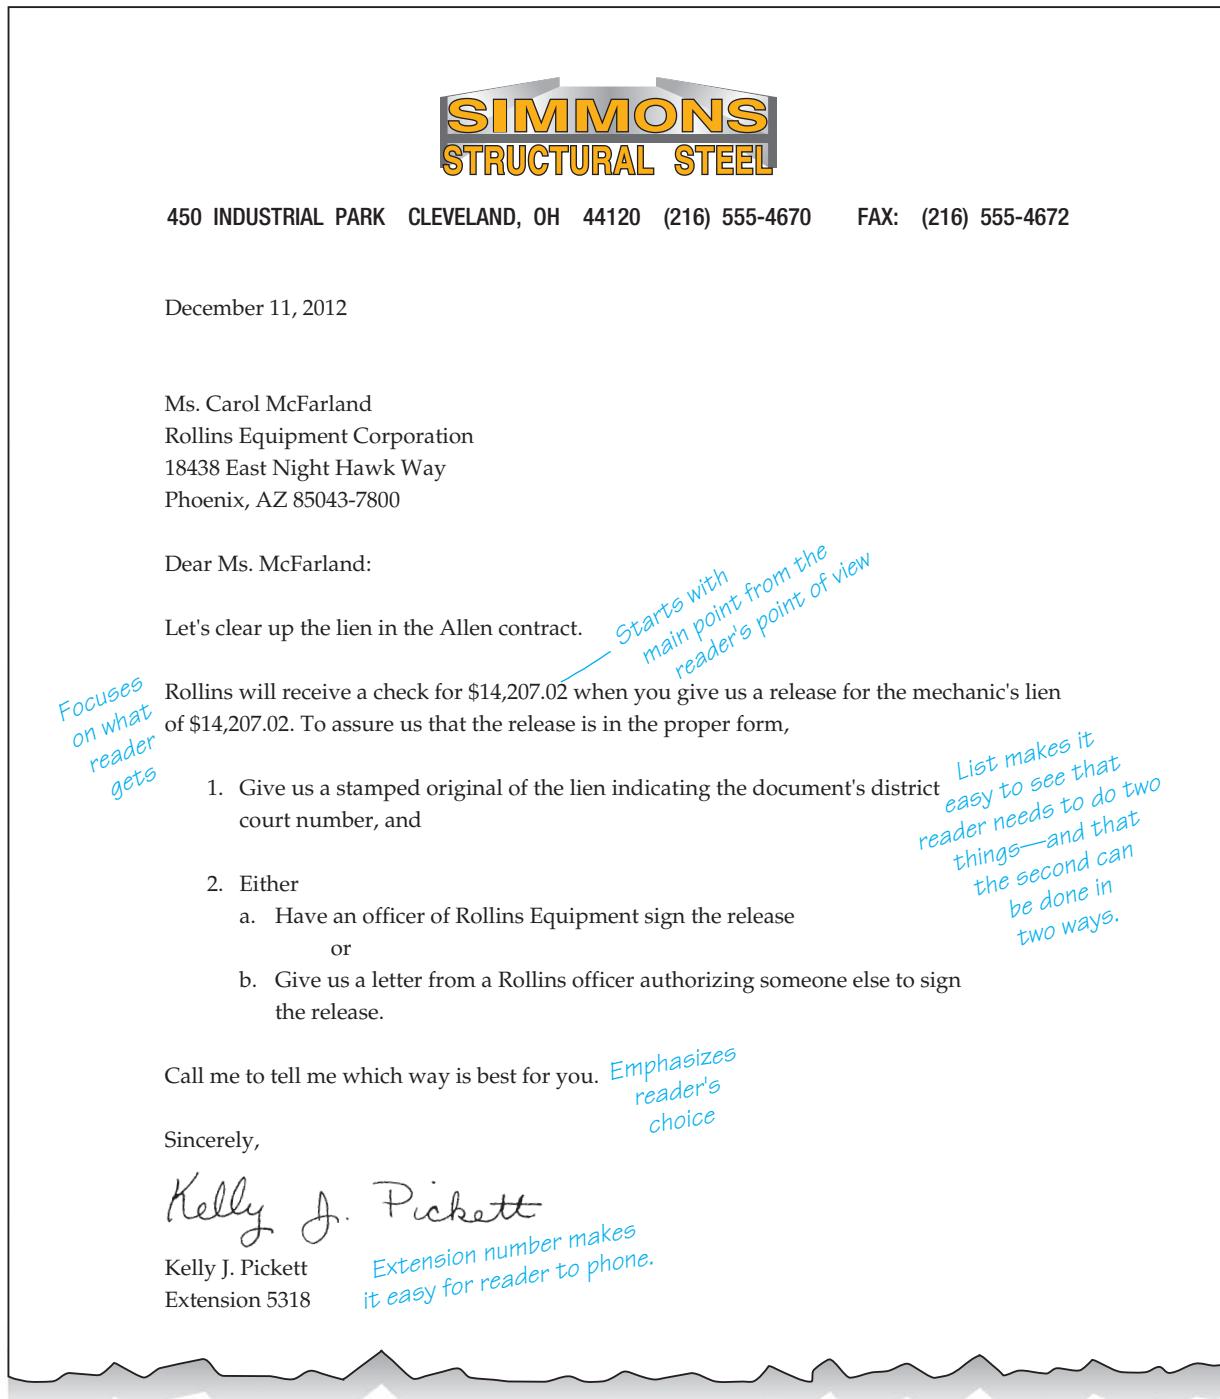

Fixing individual sentences could improve the letter. However, it really needs to be rewritten. Figure 6.2 shows a possible revision. The revision is clearer, easier to read, and friendlier.

When you have negatives, third-person is better you-attitude than second-person because third-person shows that everyone is being treated the same way.

www.leadershipcharacter.com/eq_quiz2.htm
 to assess your Emotional Intelligence.

Figure 6.2 A Letter Revised to Improve You-Attitude

Seeing Another Point of View LO 6-4

Seeing another point of view means more than observing and sympathizing. It also means empathizing—putting yourself “in the other person’s shoes.”

How? Start with shared experiences. A professor thought a student who dozed in his class was being rude. Some of her classmates did, too. But then the professor recalled how he’d worked his way through college. Many students today have full-time jobs, he knew, and the professor noticed this student often wore green medical togs.

Instead of taking offense, the professor met with the student and discovered she frequently came to his class from a double shift at the local hospital. She simply was exhausted, as he often had been. He helped her transfer to another course section so she could sleep before class. She finished the term with high marks and even took a class with him later.

Resolving conflicts often requires empathy. To learn to look beyond your own point of view, think of a situation where you were misunderstood. How did you feel? What resources of yours—time, money, and emotional energy—were wasted? What did you want from the other person?

Now, turn it around. How might the other person answer the same questions? What could you have given? The points where concerns overlap are opportunities for compromise.

Resist the temptation to put your needs ahead of others’. Instead, remember that all business is exchange, a form of compromise. Learning to see another point of view is the first step toward a successful exchange.

Many companies want employees who can empathize. To prepare for her role in overseeing the operations of McDonald’s China at the 2008 Olympic Games in Beijing, Shantel Wong completed a nine-month training program, learning every aspect of restaurant practice, including filling orders, flipping burgers, and cleaning toilets.

Even if she never works another deep fryer again, Wong knows what it takes, as well as what her employees go through daily. She also understands how they can make the customers’ dining experiences even better.

RunPee.com empathized with moviegoers seeking timely restroom breaks and now gets 3,000 to 6,000 visitors daily. The site’s slogan: “Helping your bladder enjoy going to the movies as much as you do.”

McDonald's China executive Shantel Wong's intensive training helps her to see other points of view.

Some researchers believe that “emotional intelligence,” or EQ, is a predictor of success in life. Daniel Goleman, whose bestseller *Emotional Intelligence* helped popularize the concept, found that “self-awareness, self-discipline, persistence, and empathy were more important than intelligence in getting ahead in life.” In his follow-up, *Working with Emotional Intelligence*, he argued that EQ was more important than intellect or technical skill for success on the job. Key to building healthy relationships with clients, customers, and co-workers is seeing another point of view.

Summary of Learning Objectives

- To create you-attitude in sentences, (**LO 6-1**)
 1. Talk about the reader, not about yourself.
 2. Refer to the reader's request or order specifically.
 3. Don't talk about feelings, except to congratulate or offer sympathy.
 4. In positive situations, use *you* more often than *I*. Use *we* when it includes the reader.
 5. Avoid *you* in negative situations.
- Apply you-attitude beyond the sentence level by using organization, content, and layout as well as style to build goodwill. (**LO 6-2**)
- To create goodwill with content, (**LO 6-3**)
 - Be complete.
 - Anticipate and answer likely questions from readers.
- Show why information is important if the reader didn't ask for it.
- Show readers how the message subject affects them.
- To organize information with goodwill,
 - Put information readers are most interested in first.
 - Arrange information to meet your reader's needs.
 - Use headings and lists.
- Seeing another point of view means putting yourself "in the other person's shoes." (**LO 6-4**)
 - Use **empathy**.
 - Think of a situation where you were misunderstood.
 - Resist the temptation to put your needs ahead of others'.

Assignments for Module 6

Questions for Comprehension

- 6.1** What is you-attitude? (**LO 6-1**)
6.2 How can you create you-attitude within sentences? (**LO 6-1**)

Questions for Critical Thinking

- 6.4** Can you think of situations in which the five strategies would *not* create you-attitude? If so, how would you create you-attitude in those situations? (**LO 6-1, LO 6-2**)
6.5 Why do sentences starting "We give you" lack you-attitude? (**LO 6-1, LO 6-2**)

Exercises and Problems

6.8 Using Passives and Impersonal Constructions to Improve You-Attitude (LO 6-1)

Revise each of these sentences to improve you-attitude, first using a passive verb, then using an impersonal construction (one in which things, not people, do the action). Are both revisions equally good? Why or why not?

1. You did not park your car in the appropriate lot.
2. You did not turn in the correct receipts for reimbursement.

6.3 How can you create you-attitude beyond the sentence level? (LO 6-2, LO 6-3)

- 6.6** Think of a time when you felt a business cared about you. What words or actions made you feel that way? (**LO 6-1, LO 6-2**)
6.7 Why doesn't the word *you* always create you-attitude? (**LO 6-2**)

6.9 Improving You-Attitude (LO 6-1, LO 6-2)

Revise these sentences to improve you-attitude. Eliminate any awkward phrasing. In some cases, you may need to add information to revise the sentence effectively.

1. I know you will appreciate the enclosed special membership pricing.
2. Because Pinnacle Marketing is a leader in online promotion, we can offer the best and the brightest talent to our customers.

3. Because of your error, you cost this company \$14,000 in extra charges.
4. You did not provide a portfolio showing relevant work samples for this job.
5. You did not submit your weekly report on time to your supervisor.

3. We are pleased to make this limited-time offer available to our audience.
4. As president and CEO, I personally guarantee our products are the best on the market.
5. We have no doubt that you will not find a better deal anywhere else.
6. I hope that you will take the time to visit one of our neighborhood locations close to you.

7. You will be pleased to know that a refund check is being sent to you.
8. In the next few weeks, the company will offer wellness seminars to encourage better lifestyle choices.

6.10 Improving You-Attitude (LO 6-1, LO 6-2)

Revise these sentences to improve you-attitude. Eliminate any awkward phrasing. In some cases, you may need to add information to revise the sentence effectively.

1. The management provides a generous package of benefits for all of its employees to enjoy.
2. You will no doubt be pleased to know that we have decided to give you a refund.
3. Though you seem less qualified than the other candidates, we've decided to offer you the job anyway.
4. This letter you wrote has so many typos I'm beginning to regret hiring you.
5. Expect our phone call on or about October 3 to schedule an appointment with our delivery person.

6.11 Revising a Memo for You-Attitude (LO 6-1 to LO 6-3)

Revise the following memo to improve you-attitude.

Subject: Status of Building Renovations

We are happy to announce that the renovation of the lobby is not behind schedule. By Monday, October 9, we should be ready to open the west end of the lobby to limited traffic.

The final phase of the renovation will be placing a new marble floor in front of the elevators. This work will not be finished until the end of the month.

We will attempt to schedule most of the work during the evenings so that normal business is not disrupted.

Please exercise caution when moving through the construction area. The floor will be uneven and steps will be at unusual heights. Watch your step to avoid accidental tripping or falling.

6.12 Evaluating You-Attitude in Documents that Cross Your Desk (LO 6-1 to LO 6-4)

Identify three sentences that use (or should use) you-attitude in documents you see as a worker, consumer, or student. If the sentences are good, write them down or attach a copy of the document(s) marking the sentence(s) in the margin. If the sentences need work, provide both the original sentence and a possible revision.

As Your Instructor Directs,

- a. Share your examples with a small group of students.

9. Since you were late to the meeting, we assigned you to help with recruiting, the job nobody else wanted.
10. Thanks to your costly mistake, the company lost \$34,000 on the deal.

6. We assume even someone of your limited experience can understand the need for discretion in our business.
7. If you do not turn in your time card punctually, you will not receive your paycheck.
8. I saw the job posting you wrote and quite frankly I'm surprised that anyone even bothered to answer it.
9. All of my employees must share my attitude about serving the customer first—anything less will not be tolerated by me.
10. I can't understand why you complain so much here. It's as though you don't really want to work for me.

- b. Write a memo to your instructor discussing your examples.
- c. Post an e-mail message to the class discussing your examples.
- d. Present two or three of your examples to the class in a short presentation.
- e. With your small group, write a collaborative short report to your instructor about the patterns you see.

Polishing Your Prose

It's/Its

With an apostrophe, *it's* is a contraction meaning *it is*. Without an apostrophe, *its* is a possessive pronoun meaning *belonging to it*.

Contractions always use apostrophes:

It is → it's

I have → I've

You will → you'll

They are → they're

Possessive pronouns (unlike possessive nouns) do not use apostrophes:

His / hers / its

My / mine / our / ours

Your / yours

Their / theirs

Because both *it's* and *its* sound the same, you have to look at the logic of your sentence to choose the right word. If you could substitute *it is*, use *it's*.

Decide whether to use contractions (such as *it's*, *they're*, *you're*, *we're*, *should've*, and so forth) based on audience, purpose, and organizational culture. Some audiences find contractions too informal; others find a lack of contractions off-putting or unfriendly. If the purpose of your document is to persuade while being casual, then contractions make sense. If, however, documents have significant legal ramifications, contractions may seem flip. Your organization may have its own conventions, too—check past correspondence to see what is preferred.

In general, more formal documents such as résumés and long research reports use few (or no) contractions. Contractions are often

OK in e-mail, memos, and letters in which you want a conversational tone, such as a fund-raising letter for the local animal shelter.

Exercises

Choose the right word in the set of brackets.

1. [It's/Its] a good idea to keep paper copies of documents, as electronic files can be lost or corrupted.
2. Halle told us [it's/its] going to be at least five business days before we can expect a reply to our Singapore proposal.
3. Though the app has been thoroughly tested, [it's/its] a good idea to test it one more time, just to be certain.
4. Because the Halloran Company values innovation, [it's/its] vital that creative people have the opportunity to realize their potential there.
5. Each department should make sure [it's/its] personnel files are kept confidential.
6. We believe [it's/its] a sign of good faith that our customers have stayed with us in tough economic times.
7. Patel and Associates is dedicated to making sure [it's/its] clients receive the best service possible.
8. In her keynote address, Sophia told us that an organization is strong only because [it's/its] employees are strong.
9. While [it's/its] impossible to be prepared for all emergencies, [it's/its] prudent to have a general disaster plan.
10. To keep up with [it's/its] competition, a company needs to make certain [it's/its] social networking pages are kept up-to-date.

Check your answers to the odd-numbered exercises at the back of the book.

Positive Emphasis

LEARNING OBJECTIVES

As Module 7 shows, positive emphasis builds goodwill and is better in most business messages than negative emphasis. After completing the module, you should be able to

LO 7-1 Apply strategies for positive emphasis use.

LO 7-2 Analyze situations for ethical positive emphasis.

LO 7-3 Explain reasons for tone, politeness, and power considerations.

LO 7-4 Identify situations for apologies.

Some negatives are necessary.

- Straightforward negatives build credibility when you have bad news to give the reader: announcements of layoffs, product defects and recalls, price increases.
- Negatives may help people take a problem seriously. Wall Data improved the reliability of its computer programs when it eliminated the term *bugs* and used instead the term *failures*.
- In some messages, such as negative performance appraisals, your purpose is to deliver a rebuke with no alternative. Even here, avoid insults or attacks on the reader's integrity or sanity. Being honest about the drawbacks of a job reduces turnover.
- Sometimes negatives create a "reverse psychology" that makes people look favorably at your product. Rent-a-Wreck is thriving. (The cars really don't look so bad.)¹

But in most situations, it's better to be positive. Researchers Annette N. Shelby and N. Lamar Reinsch, Jr., found that businesspeople responded more positively to positive rather than to negative language and were more likely to say they would act on a positively worded request.² Martin Seligman's research for Met Life found that optimistic salespeople sold 37% more insurance than pessimistic colleagues. As a result, Met Life began hiring optimists even when they failed to meet the company's other criteria. These "unqualified" optimists outsold pessimists 21% in their first year and 57% the next.³

Positive emphasis is a way of looking at things. Is the bottle half empty or half full? You can create positive emphasis with the words, information, organization, and layout you choose.

Happy U.S. states tend to be ones that are wealthy, better educated, and more tolerant, according to research by the University of Cambridge. Utah scored the highest. Though the differences in scores were often marginal, well-being was highest in the Mountain and West Coast states and lowest in the Midwest and Southern states. A Gallup Poll, however, found more Midwestern and Western states represented in the top 10 for happiness, citing emotional health and work environment among the reasons for well-being. Hawaii has topped the list three years running.

How do I create positive emphasis? LO 7-1

► *Deemphasize or omit negative words and information.*

The following five techniques deemphasize negative information:

1. Avoid negative words and words with negative connotations.
2. Focus on what the reader can do rather than on limitations.
3. Justify negative information by giving a reason or linking it to a reader benefit.
4. If the negative is truly unimportant, omit it.
5. Put the negative information in the middle and present it compactly.

In some messages, especially negative ones (► Module 11), you won't use all five techniques. Practice each of these techniques so that you can use them when they're appropriate.

1. Avoid Negative Words and Words with Negative Connotations

Figure 7.1 lists some common negative words. If you find one of these words in a draft, try to substitute a more positive word. When you must use a negative, use the *least negative* term that will convey your meaning.

The following examples show how to replace negative words with positive words.

Negative: We have failed to finish taking inventory.

Better: We haven't finished taking inventory.

Still better: We will be finished taking inventory Friday.

Negative: If you can't understand this explanation, feel free to call me.

Better: If you have further questions, just call me.

Still better: Omit the sentence. (Readers aren't shrinking violets. They'll call if they do have questions.)

Omit double negatives.

Negative: Do not forget to back up your disks.

Better: Always back up your disks.

Figure 7.1 Negative Words to Avoid

afraid	eliminate	lacking	trivial
anxious	error	loss	trouble
avoid	except		wait
bad	fail		weakness
careless	fault	misfortune	worry
damage	fear	missing	wrong
delay	hesitate	mistake	
delinquent	ignorant		
deny	ignore	neglect	
difficulty	impossible	never	
		no	
		not	
Some dis-words:		Many in-words:	
disappoint	inadequate	objection	
disapprove	incomplete	problem	
dishonest	inconvenient	reject	
disinform	injury	sorry	
dissatisfied	insincere	terrible	
Some mis-words:		Many un-words:	

Even when rejecting someone or something, you should avoid harsh or insulting words.

"We have an opening that will suit you perfectly. It's marked Exit."

Reprinted by permission of CartoonStock.com,
www.cartoonstock.com.

When you must use a negative, use the least negative term that is accurate.

- Negative:** Your balance of \$835 is **delinquent**.
Better: Your balance of \$835 is **past due**.

Getting rid of negatives has the added benefit of making what you write easier to understand. Sentences with three or more negatives are very hard to understand.⁴

Beware of **hidden negatives**: words that are not negative in themselves but become negative in context. *But* and *however* indicate a shift, so, after a positive statement, they are negative. *I hope* and *I trust that* suggest that you aren't sure. *Patience* may sound like a virtue, but it is a necessary virtue only when things are slow. Even positives about a service or product may backfire if they suggest that in the past the service or product was bad.

- Negative:** **I hope** this is the information you wanted.
[Implication: I'm not sure.]
Better: Enclosed is a brochure **about road repairs scheduled for 2013–14**.
Still better: The brochure contains a list of **all roads and bridges scheduled for repair during 2013–14**. Call Gwen Wong at **555–3245** for specific dates when work will start and stop and for alternate routes.
Negative: Please be **patient** as we switch to the automated system.
[Implication: you can expect problems.]
Better: If you have **questions** during our transition to the automated system, call Melissa Morgan.
Still better: You'll be able to get information **instantly** about any house on the market when the automated system is in place. If you have questions during the transition, call Melissa Morgan.
Negative: Now Crispy Crunch tastes **better**. [Implication: it used to taste terrible.]
Better: Now Crispy Crunch tastes **even** better.

Removing negatives does not mean being arrogant or pushy.

- Negative:** **I hope** that you are **satisfied enough** to place future orders.
Arrogant: **I look forward** to receiving **all of your future business**.
Better: Call Mercury whenever you need transistors.

Optimism can be powerful in helping a person achieve his or her goals, but a lack of optimism might also be a hindrance—and a self-fulfilling prophecy. A recent Gallup Poll found that for the first time on record, most Americans did not believe that today's young people would have better lives than their parents. The poll, administered on and off since 1983, found that only 44% of Americans thought things would turn out better. How such thinking may shape the future, of course, remains to be seen.

Source: Catherine Rampell, "Dimming Optimism for Today's Youth," *The New York Times*, May 2, 2011, <http://economix.blogs.nytimes.com/2011/05/02/dimming-optimism-for-todays-youth/?gwh=354CD1DC224BF21C6B9B0A2740E9E2AC>.

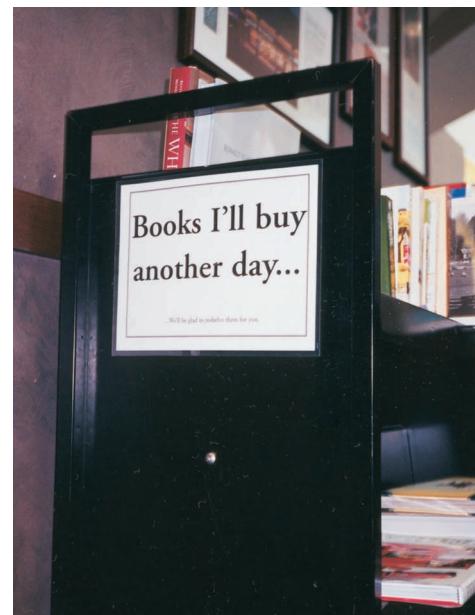

Five Ways to Create Positive Emphasis

To deemphasize negative information,

1. Avoid negative words and words with negative connotations.
2. Focus on what the reader can do rather than on limitations.
3. Justify negative information by giving a reason or linking it to a reader benefit.
4. If the negative is truly unimportant, omit it.
5. Put the negative information in the middle and present it compactly.

Some stores might say, "Put books you don't want here." But Bookseller Joseph-Beth in Lexington, Kentucky, uses positive emphasis.

Happiness and optimism may have a good effect on your heart, according to researchers at Harvard University. While scientists have known for some time about the reverse relationship—how depression, for instance, can be bad for the heart—less was known about the influence of positive thinking on the organ. When it comes to financial issues, however, too much optimism may actually be a bad thing. According to Duke University's Manju Puri and David T. Robinson, extreme optimists may avoid long-term savings or paying off credit cards because they think the economy will always do better.

Sources: Anahad O'Connor, "Really? Optimism Reduces the Risk of Heart Disease," *The New York Times*, April 23, 2012, <http://well.blogs.nytimes.com/2012/04/23/really-optimism-reduces-the-risk-of-heart-disease/?gwh=BADA807829DF77253E2810F80B07EF6A>; and Alina Tugend, "Lean Toward the Sunny Side, but Don't Overdo It," *The New York Times*, September 23, 2011, http://www.nytimes.com/2011/09/24/business/optimism-but-not-too-much-can-be-good-for-you.html?_r=1&pagewanted=all&gwh=842BAB5DF37429951FDD485A9E5C0A54.

When you eliminate negative words, be sure to maintain accuracy. Words that are exact opposites will usually not be accurate. Instead, use specifics to be both positive and accurate.

Negative: The exercycle is **not** guaranteed for life.

Not true: The exercycle is **guaranteed for life**.

True: The exercycle is **guaranteed for 10 years**.

Negative: Customers under 60 are **not eligible** for the Prime Time discount.

Not true: You must be **over 60 to be eligible** for the Prime Time discount.

True: **If you're 60 or older**, you can save 10% on all your purchases with RightWay's Prime Time discount.

Legal phrases also have negative connotations for most readers and should be avoided whenever possible. The idea will sound more positive if you use conversational English.

Negative: If your account is still **delinquent**, a second, **legal** notice will be sent to you informing you that **cancellation** of your policy will occur **30 days after the date of the legal notice if we do not receive your check**.

Better: Even if your check is **lost in the mail and never reaches us**, you still have a **30-day grace period**. If you do get a second notice, you will know that **your payment hasn't reached us**. To keep your account in good standing, stop payment on the first check and send a second one.

2. Focus on What the Reader Can Do Rather than on Limitations

Sometimes positive emphasis is a matter of the way you present something: Is the glass half empty or half full? Sometimes it's a matter of eliminating double negatives. When there are limits, or some options are closed, focus on the alternatives that remain.

Negative: We will **not** allow you to charge **more than \$1,500** on your VISA account.

Better: **You can charge \$1,500** on your new VISA card.

or: Your new VISA card **gives you \$1,500 in credit that you can use at thousands of stores nationwide**.

As you focus on what will happen, **check for you-attitude** (◀◀ p. 90). In the last example, "We will allow you to charge \$1,500" would be positive, but it lacks you-attitude.

When you have a benefit and a requirement the reader must meet to get the benefit, the sentence is usually more positive if you put the benefit first.

- Negative:** You will **not** qualify for the student membership rate of \$25 a year **unless** you are enrolled for at least 10 hours.
- Better:** You **get all the benefits of membership for only \$25 a year if you're enrolled for 10 hours or more.**

3. Justify Negative Information by Giving a Reason or Linking It to a Reader Benefit

A reason can help your reader see that the information is necessary; a benefit can suggest that the negative aspect is outweighed by positive factors. Be careful, however, to make the logic behind your reason clear and to leave no loopholes.

- Negative:** We **cannot** sell computer disks in lots of **less than 10**.
- Loophole:** To **keep down packaging costs and to help you save on shipping and handling costs**, we sell computer disks in lots of 10 or more.

Suppose the customer says, "I'll pay the extra shipping and handling. Send me seven." If you can't or won't sell in lots of less than 10, you need to write:

- Better:** To **keep down packaging costs and to help customers save on shipping and handling costs**, we sell computer disks **only** in lots of 10 or more.

If you link the negative element to a benefit, be sure it is a benefit the reader will acknowledge. Avoid telling people that you're doing things "for their own good." They may have a different notion of what their own good is. You may think you're doing customers a favor by limiting their credit so they don't get in over their heads and go bankrupt. They may feel they'd be better off with more credit so they could expand in hopes of making more sales and more profits.

4. If the Negative Is Truly Unimportant, Omit It

Omit negatives entirely only when

- The reader does not need the information to make a decision.
- You have already given the reader the information and he or she has access to the previous communication.
- The information is trivial.

The following examples suggest the kind of negatives you can omit:

- Negative:** A one-year subscription to *PC Magazine* is \$49.97. **That rate is not as low as the rates charged for some magazines.**
- Better:** A one-year subscription to *PC Magazine* is \$49.97.
- Still better:** A one-year subscription to *PC Magazine* is \$49.97. You save 43% off the newsstand price of \$87.78.
- Negative:** If you are not satisfied with Interstate Fidelity Insurance, you do not have to renew your policy.
- Better:** Omit the sentence.

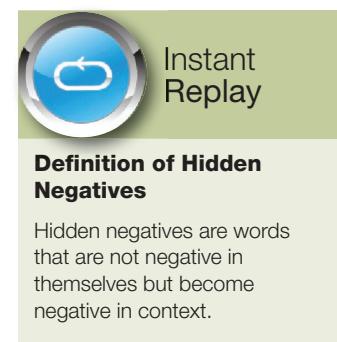

Researchers Teresa Amabile and Steven Kramer found that happier people make better workers. In a study of nearly 12,000 electronic diary entries from business professionals, however, they discovered a third were unhappy, unmotivated, or both, a situation exacerbated by dwindling job resources and security. With employees more likely to have new ideas on happier days, the cost of lost productivity is high—one estimate is \$300 billion annually in the U.S.

Sources: Teresa Amabile and Steven Kramer, "Do Happier People Work Harder?" *The New York Times*, September 3, 2011, <http://www.nytimes.com/2011/09/04/opinion/sunday/do-happier-people-work-harder.html>; and Teresa Amabile and Steven Kramer, "Pro: Bring on the Smiles, Count the Profits," *Bloomberg Businessweek*, February 22, 2012, http://www.businessweek.com/debateroom/archives/2012/02/employee_happiness_matters_more_than_you_think.html.

5. Bury the Negative Information and Present It Compactly

The beginning and end are always positions of emphasis. Put negatives here only if you want to emphasize the negative, as you may in a negative message (►► Module 11). To deemphasize a negative, put it in the middle of a paragraph rather than in the first or last sentence, in the middle of the message rather than in the first or last paragraphs.

When a letter or memo runs several pages, remember that the bottom of the first page is also a position of emphasis, even if it is in the middle of a paragraph, because of the extra white space of the bottom margin. (The first page gets more attention because it is on top and the reader's eye may catch lines of the message even when he or she isn't consciously

Building a Critical Skill

Using Positive Emphasis Ethically

The methods to achieve positive emphasis can be misused, so be careful when using them.

Consider omission of necessary details.

Shannon Castillo played a local radio station's weeklong contest to win a Hummer H2 vehicle. When she showed up on April 1 to collect her prize, she didn't get the \$60,000 vehicle she expected. Instead, she received a remote-controlled toy replica. The station contended it was an April Fool's Day joke and that the winners weren't promised the actual vehicle. A similar contest was held by a restaurant that promised employees a "Toyota" for selling the most beer. When the winner came forward, she was presented with a *Star Wars* character doll—her "toy Yoda."

In both cases, full disclosure might have affected decisions: Participants might have passed on the contests had they known that the prize wasn't what they expected. It isn't ethical to omit information that people need to make decisions. Lawsuits also can occur from such practice.

Focusing on what the reader can do rather than on limitations works when the situation is appropriate. People don't expect, for instance, to be congratulated for being able to use their skills with another employer when, in fact, they're being fired.

Presenting information compactly also can go too far. A credit card company mailed out a letter with the good news that the minimum monthly payment was going down. But a separate small flyer explained that interest rates (on the charges not repaid) were going up. The print was far too small

LO 7-2

to read: 67 lines of type were crowded into five vertical inches of text.

The Federal Emergency Management Agency, or FEMA, still reeling from criticism over its handling of the Hurricane Katrina disaster, was further embarrassed when John P. "Pat" Philbin, its external affairs director, staged a briefing with FEMA staff members posing as reporters. They asked easy-to-answer questions phrased in positive language. Authentic journalists were invited 15 minutes before the briefing and allowed to listen through a conference call but not ask questions. At the time, Philbin had already accepted a job with the Director of National Intelligence. That offer was later rescinded.

Food manufacturers may substitute lesser-known ingredients for those that have negative connotations for some customers. Thus, shoppers avoiding *sugar* should be aware that *corn syrup*, *high-fructose corn syrup*, and *white grape juice concentrate* may be euphemisms for the same.

Sources: Tim Molloy, "Woman Sues Over Radio Station's Toy Hummer April Fools' Prank," July 13, 2005, downloaded at www.montereyherald.com/mld/montereyherald/news/12124132.htm; Reg Wydeven, "Radio Giveaways End Up Taking Listeners for a Bad Ride," July 23, 2005, downloaded at www.wisinfo.com/postrescent/news/archive/col_21850677.shtml; Donna S. Kienzler, "Visual Ethics," *The Journal of Business Communication* 34 (1997): 175–76; Pamela Hess, "Former FEMA Spokesman Loses Spy Job," downloaded at <http://abcnews.go.com/Politics/wireStory?id=3792287> on December 24, 2007; and Dan Shapley, "Don't Be Misled by These Food Label Tricks," February 3, 2010. http://green.yahoo.com/blog/daily_green_news/280/don-t-be-misled-by-these-food-label-tricks.html.

Researchers Jacqueline Mayfield and Milton Mayfield found in their study at Texas A&M University that total effects showed for every 10% increase in motivating language to students, there was about a 3% decrease in absenteeism.

Source: Jacqueline Mayfield and Milton Mayfield, "The Role of Leader Motivating Language in Employee Absenteeism," *Journal of Business Communication*, October 2009, 46:4, 455–479.

reading it; the tops and bottoms of subsequent pages don't get this extra attention.) If possible, avoid placing negative information at the bottom of the first page.

Giving a topic lots of space emphasizes it. Therefore, you can deemphasize negative information by giving it as little space as possible. Give negative information only once in your message. Don't list negatives vertically on the page because lists take space and emphasize material.

Why do I need to think about tone, politeness, and power? LO 7-3

► So you don't offend people by mistake.

No one likes to deal with people who seem condescending or rude. Poorly chosen words can create that sense, whether the sender "meant" to be rude or not. **Tone** is the implied attitude of the writer toward the reader. Tone is tricky because it interacts with power: The words that might seem friendly from a superior to a subordinate may seem uppity if used by the subordinate to the superior. Norms for politeness are cultural and generational.

Language that is acceptable within one group may be unacceptable if used by someone outside the group.

The desirable tone for business writing is businesslike but not stiff, friendly but not phony, confident but not arrogant, polite but not groveling. The following guidelines will help you achieve the tone you want.

- Use courtesy titles for people outside your organization whom you don't know well.**

Most U.S. organizations use first names for everyone, whatever their age or rank. But many people don't like being called by their first names by people they don't know or by someone much younger. When you talk or write to people outside your organization, use first names only if you've established a personal relationship. If you don't know someone well, use a courtesy title (►► Module 9):

Dear Mr. Reynolds:

Dear Ms. Lee:

- Be aware of the power implications of the words you use.** “Thank you for your cooperation” is generous coming from a superior to a subordinate; it’s not appropriate in a message to your superior. Different ways of asking for action carry different levels of politeness.⁵

Order
(lowest politeness)

Turn in your time card by Monday.

Polite order
(midlevel politeness)

Please turn in your time card by Monday.

Indirect request
(higher politeness)

Time cards should be turned in by Monday.

Question
(highest politeness)

Would you be able to turn in your time card by Monday?

You need more politeness if you’re asking for something that will inconvenience the reader and help you more than the person who does the action. Generally, you need less politeness when you’re asking for something small, routine, or to the reader’s benefit. Some discourse communities, however, prefer that even small requests be made politely.

Lower politeness: To start the scheduling process, please describe your availability for meetings during the second week of the month.

Higher politeness: Could you let me know what times you’d be free for a meeting the second week of the month?

Higher levels of politeness may be unclear. In some cases, a question may seem like a request for information to which it’s acceptable to answer, “No, I can’t.” In other cases, it will be an order, simply phrased in polite terms. Generally, requests sound friendliest when they use conversational language.

Poor tone: Return the draft with any changes by next Tuesday.

Better tone: Let me know by Tuesday whether you’d like any changes in the draft.

- When the stakes are low, be straightforward.** Messages that “beat around the bush” sound pompous and defensive.

Poor tone: Distribution of the low-fat plain granola may be limited in your area.
May we suggest that you discuss this matter with your store manager.

Better tone: Our low-fat granola is so popular that there isn’t enough to go around. We’re expanding production to meet the demand. Ask your store manager to keep putting in orders so that your grocery is on the list of stores that will get supplies when they become available.

or: Store managers decide what to stock. If your store has stopped carrying our low-fat granola, the store manager has stopped ordering it. Talk to the manager. Managers try to meet customer needs, so if you say something you’re more likely to get what you want.

Resilience—the ability to weather life’s stressors and setbacks—plays an important part in our success. In *Resilience: Why Things Bounce Back*, Andrew Zolli found that most people are resilient and often more than they think. The key to resilience, he argues, is mental attitude. Said Zolli, who in the same year suffered through the loss of a child, death of business partner, and mother’s diagnosis with a serious illness, “If you believe that the world is a meaningful place, and you have a meaningful place within it; if you believe that you have agency within the world, that your actions have meaning . . . that successes and failures are put in your life to teach you things, and that they’re not just random acts of chance, then you have a much higher degree of resilience in the face of trauma.”

Source: Gregory M. Lamb, “Why Resilience Is the Key to Solving 21st Century Problems,” *The Christian Science Monitor*, July 20, 2012, <http://www.csmonitor.com/World/Making-a-difference/Change-Agent/2012/0720/Why-resilience-is-the-key-to-solving-21st-century-problems>.

Making a video apology? Consultant Abbie Lundberg advises, “Make the message clear, look into the camera, consider clothes and lighting, and practice.” Such actions might have improved BP CEO Tony Hayward’s disastrous YouTube apology for the Gulf oil spill.

Source: David Rosenbaum, “Apologizing for Bad News? Be Careful with the Video,” *CFO*, April 16, 2012, http://www3.cfo.com/article/2012/4/technology_video-executive-apologies-restatements.

Apologies may work—or may not. Auto giant Toyota faced criticism for taking too long to acknowledge vehicle safety problems. Even CEO Akio Toyoda's public apology in 2010 did little to salve angst over what critics called "foot dragging." The company later weathered lawsuits and sales declines.

And while apologizing might have worked better for New Hampshire Representative Martin Harty, the 91-year-old refused after saying the mentally disabled should be shipped to Siberia. Harty resigned in 2011. His defiance was echoed by Illinois Representative Joe Walsh, who criticized his political opponent, Tammy Duckworth, a decorated Blackhawk helicopter pilot who lost both legs in the Iraq War, for discussing her experiences while campaigning in 2012: "All she does, guys, is talk about her service." Walsh, who never served in the military, stood by his statements despite public outcry.

Sources: Chris Isidore, "Toyota: Apology but No New Recall," *CNN*, February 5, 2010, http://money.cnn.com/2010/02/05/news/companies/toyota_announcement/; "New Hampshire Rep Who Suggested Disabled Go to Siberia Quits," March 14, 2011, <http://news.yahoo.com/blogs/ticket/rep-joe-walsh-doubles-down-accusation-tammy-duckworth-144349000.htm>.

- When you must give bad news, consider hedging your statement. John Hagge and Charles Kostelnick have shown that auditors' suggestion letters rarely say directly that firms are using unacceptable accounting practices. Instead, they use three strategies to be more diplomatic: specifying the time ("currently, the records are quite informal"), limiting statements ("it appears," "it seems"), and using impersonal statements that do not specify who caused a problem or who will perform an action.⁶

What's the best way to apologize? LO 7-4

- ▶ Early, briefly, and sincerely.

When you are at fault, you may build goodwill by admitting that fact forthrightly. In some cases, laws now provide protection for workplace apologies. Ohio and 26 other states, for instance, have "I'm sorry" laws that allow physicians to acknowledge mistakes without fear of lawsuits.⁷ However, apologies may have negative legal implications, so some organizations prefer that apologies not be issued to customers or the public. Think about your audience and the organizational culture in deciding whether to apologize explicitly.

- No explicit apology is necessary if the error is small and if you are correcting the mistake.

Negative: I'm sorry the clerk did not credit your account properly.

Better: Your statement has been corrected to include your payment of \$263.75.

- Do not apologize when you are not at fault. When you have done everything you can and when a delay or problem is due to circumstances beyond your control, you aren't at fault and don't need to apologize. It may be appropriate to include an explanation so the reader knows you weren't negligent. If the news is bad, put the explanation first. If you have good news for the reader, put it before your explanation.

Negative: I'm sorry that I could not answer your question sooner. I had to wait until the sales figures for the second quarter were in.

Better (neutral or bad news): We needed the sales figures for the second quarter to answer your question.

Better (good news): Now that they're in, I can tell you that . . .

The new advertising campaign is a success. The sales figures for the second quarter are finally in, and they show that . . .

If the delay or problem is long or large, it is good you-attitude to ask the reader whether he or she wants to confirm the original plan or make different arrangements.

Negative: I'm sorry that the chairs will not be ready by August 25 as promised.

Better: Due to a strike against the manufacturer, the desk chairs you ordered will not be ready until November. Do you want to keep that order, or would you like to look at the models available from other suppliers?

- When you apologize, do it early, briefly, and sincerely. Apologize only once, early in the message. Let the reader move on to other, more positive information.

Even if major trouble or inconvenience has resulted from your error, you don't need to go on about all the horrible things that happened. The reader already knows this negative information, and you can omit it. Instead, focus on what you have done to correct the situation.

If you don't know whether or not any inconvenience has resulted, don't raise the issue at all.

Negative: I'm sorry I didn't answer your letter sooner. I hope that my delay hasn't inconvenienced you.

Better: I'm sorry I didn't answer your letter sooner.

Summary of Learning Objectives

- **Positive emphasis** means focusing on the positive rather than the negative aspects of a situation. (**LO 7-1**)
 1. Avoid negative words and words with negative connotations.
 2. State information positively. Focus on what the reader can do rather than on what you won't or can't let the reader do.
 3. Justify negative information by giving a reason or linking it to a reader benefit.
 4. If the negative is truly unimportant, omit it.
 5. Put the negative information in the middle and present it compactly.
- **Hidden negatives** are words that are not negative in themselves but become negative in context. (**LO 7-1**)
- Use positive emphasis ethically. (**LO 7-2**)
 - Include information readers need to make decisions.
 - Focus on what the reader can do when it's appropriate.
 - Present information legibly and large enough to read.
 - Avoid misleading claims.

- The desirable tone for business writing is businesslike but not stiff, friendly but not phony, confident but not arrogant, polite but not groveling. The following guidelines will help you achieve the tone you want. (**LO 7-3**)
 - Use courtesy titles for people outside your organization whom you don't know well.
 - Be aware of the power implications of the words you use.
 - When the stakes are low, be straightforward.
 - When you must give bad news, consider hedging your statement.
- Don't apologize if the error is small and if you are correcting the mistake. Don't apologize if you are not at fault. If the delay or problem is long or large, it is good you-attitude to ask the reader whether he or she wants to make different arrangements. (**LO 7-4**)
- When you apologize, do it early, briefly, and sincerely. However, apologies may have legal implications, so some organizations prefer that apologies not be issued to customers or the public. (**LO 7-4**)

Assignments for Module 7

Questions for Comprehension

- 7.1** How can you create positive emphasis? (**LO 7-1**)
- 7.2** Which of the following are negative words that you should avoid? (**LO 7-1**)
- | | | |
|---------|----------|---------|
| anxious | hesitate | eager |
| change | hope | instead |

necessary
unfortunately

- 7.3** What are your options when you need to apologize? (**LO 7-4**)

Questions for Critical Thinking

- 7.4** Can you think of situations in which positive emphasis might backfire or be inappropriate? What strategies would be most likely to meet the audience's needs in those situations? (**LO 7-1, LO 7-2**)
- 7.5** Some negative phrases (such as "please do not hesitate") are business clichés. Why is it better to avoid them? (**LO 7-3**)

- 7.6** If you work for a company that claims to be egalitarian, do you still need to attend to tone, power, and politeness? (**LO 7-3**)
- 7.7** Think of a situation when an apology was appropriate. What strategy was actually used? Would another strategy have been better? (**LO 7-4**)

Exercises and Problems

7.8 Evaluating the Ethics of Positive Emphasis (**LO 7-1**)

The first word in each line is negative; the second is a positive term that is sometimes substituted for it. Which of the positive terms seem ethical? Which seem unethical? Briefly explain your choices.

- | | |
|---------------|-----------------------------|
| 1. anxious | excited |
| 2. flack | public relations specialist |
| 3. gadget | device |
| 4. junk bonds | high-yield bonds |

- | | |
|--------------------|--------------|
| 5. problem | challenge |
| 6. right-winger | conservative |
| 7. tax | user fee |
| 8. layoffs | rightsizing |
| 9. liberal | progressive |
| 10. mouthpiece | attorney |
| 11. price increase | price change |

7.9 Focusing on the Positive (**LO 7-1**)

Revise each of the following sentences to focus on the options that remain rather than those that are closed off.

1. We do not expect to have any problems with this account.

2. Do not hesitate to contact me should you have any questions.
3. If you are not neat and not punctual, you will find yourself not being promoted.

7.10 Identifying Hidden Negatives (LO 7-1)

Identify the hidden negatives in the following sentences and revise to eliminate them. In some cases, you may need to add information to revise the sentence effectively.

1. We hope you will enjoy working with us.

7.11 Revising Sentences to Improve Positive Emphasis (LO 7-1 to LO 7-4)

Revise the following sentences to improve positive emphasis. In some cases, you may need to add or omit information to revise effectively.

1. Relax! You don't have to worry about getting your money.
2. Since Amanda can't make the meeting on Tuesday, we won't be able to meet as a group until next Friday.
3. I just can't believe how much your work has improved in the past few months.
4. Emily, Paula, and Nell—she's the really short one—arent going to be able to make it to the reception until 7:45.
5. It isn't that we don't appreciate the work you're doing here. It's just that you don't seem to like it when people compliment you.
6. It's not a bad idea to be prepared for the worst since it's not likely it won't happen eventually.

7.12 Revising Sentences to Improve Positive Emphasis (LO 7-1 to LO 7-4)

Revise the following sentences to improve positive emphasis. In some cases, you may need to add or omit information to revise effectively.

1. Don't plan on being late. Try to arrive on time for the meeting.
2. Noelani does not expect to use all of her sick leave, so she wants to donate it to one of her co-workers who does not have enough leave to cover an illness.
3. The server is down. I'm guessing it will be available again in a few hours, so be patient.
4. You can't change your dental plan once you've selected it except during the annual enrollment period. That won't happen again until October 1 through October 20.
5. I'm sorry you were inconvenienced because one of our customer service representatives couldn't answer your question.
6. I doubt there will be any problems scheduling one of our service technicians to look at your furnace on

7.13 Revising a Memo to Improve Positive Emphasis (LO 7-1 to LO 7-4)

Revise the following memo to improve you-attitude and positive emphasis.

2. I expect you will be pleased with the enclosed refund.
3. I'm guessing you would like to know if you will receive a bonus this year.

7. Hey, don't get too excited about the interim promotion since you won't be in the job past August.
8. While Sean isn't the worst employee we have, he isn't the best employee either. We hope his job performance improves soon.
9. Don't ever hesitate to contact us, no matter how silly or trivial you think your question might be. We couldn't have become one of the top financial planning firms in this area without listening to our customers, even when they aren't asking relevant questions.
10. Since you don't have much collateral, we're guessing that you don't expect to have the loan approved. Well, that's a silly idea. At Provincial Bank, we don't judge our customers. We help them even when they seem high risk.

Wednesday. Just don't plan on leaving your home between 1 pm and 5 pm.

7. We've had problems lately with our deliveries, so accept my apologies for your package not being delivered on time. It should be there in a few days.
8. Don't forget that Monday is a holiday, and we don't expect anyone to work that day because the office is closed!
9. You wouldn't believe how hard the committee worked to get this job done, in spite of not having a proper budget or the support of senior management. In fact, it's a miracle the project wasn't a disaster.
10. Though Luis does not spend a great deal of time in the office, when he is there, he is not a lazy worker. The office could do far worse than hire more employees like Luis.

Subject: Status of College Internship Program

I've made great progress on the college internship program for our company. Though the program isn't yet ready for implementation, I can't believe I'm far from making it so.

To date, I've drafted a plan for the program, contacted several HR managers at comparable companies about their programs, and established a proposed budget for the program.

I'd be further along, but Rob made a mistake when he contacted State University about the program. He accidentally indicated the program would begin in 2007, but the year is actually 2008. It was a silly mistake but not a fatal one.

I wouldn't worry about this error, as it shouldn't be a problem to fix it.

If you have any questions about the program, please don't hesitate to contact me.

7.14 Identifying Positive Emphasis in Ads and Documents (LO 7-1 to LO 7-4)

Look at print advertisements and at documents you receive from your college or university, from your workplace, and from organizations to which you belong. Identify five sentences that either (a) use positive emphasis or (b) should be revised to be more positive.

As Your Instructor Directs,

- Share your examples with a small group of students.

- Write a memo to your instructor discussing your examples.
- Post an e-mail message to the class discussing your examples.
- Present two or three of your examples to the class in a short presentation.
- With your small group, write a collaborative short report to your instructor about the patterns you see.

Polishing Your Prose

Singular and Plural Possessives

To show possession when a noun is singular, put the apostrophe right after the word; then add *s*:

Allen's	The manager's
Smith's	The company's

If the possessing noun is plural, put the apostrophe right after the word:

Customers'
Employees'
Companies'

In names that end with *s* or *x*, style books permit either form:

Thomas'	Linux'	Jones'
Thomas's	Linux's	Jones's

Often, the location of the apostrophe tells the reader whether the noun is singular or plural.

Singular Possessive	Plural Possessive
The employee's	The employees'
Product's	Products'

Because the singular and plural possessives sound the same, look at the logic of your sentence to choose the right word. Also note that when you have plural possessive nouns, other words in the sentence will also become plural.

Plural *employees* have plural *opinions*. Plural *products* have plural *prices*.

We listen to our employees' opinions.

You can find all of our products' prices on our website.

Exercises

Choose the correct word in each set of brackets. Indicate if either word is acceptable.

- While we can debate its methodology, the [report's/reports'] conclusion is clear: We should expand into South America.
- [Alex's/Alex'] point is the longer we hesitate to get into the marketplace, the more potential customers we lose.
- Too many [department's/departments'] employees are dressing casually on days other than Friday.
- Before we decide to offer products in Costa Rica, we should first determine what its [people's/peoples'] opinions are of our company.
- This [company's/companies'] first order of business is to serve the customer as best as it can.
- Each [manager's/managers'] viewpoint is valuable, and we want to give everyone a chance to participate.
- Carefully review each [smartphone's/smartphones'] capabilities before committing to purchase one for business use.
- Shaytell told us her [employee's/employees'] after-work social events are also helping to build teamwork in the office.
- We found [Chris's/Chris'] qualifications to be far superior to the other job candidates'.
- [Delvecchio and Associates's/Delvecchio and Associates'] final sales figures beat the estimates.

Check your answers to the odd-numbered exercises at the back of the book.

Module

8

Reader Benefits

LEARNING OBJECTIVES

Reader benefits enhance business messages, and Module 8 provides techniques for you to use reader benefits well. After completing the module, you should be able to

- | | | | |
|---------------|---|---------------|---|
| LO 8-1 | Explain functions of reader benefits. | LO 8-4 | Select reader benefits for messages. |
| LO 8-2 | Identify reader benefits for messages. | LO 8-5 | Apply strategies for reader benefits and audience harmony. |
| LO 8-3 | Apply strategies for reader benefits creation. | LO 8-6 | Support reader benefits with you-attitude. |

Reader benefits are benefits or advantages that the reader gets by

- Using your services.
- Buying your products.
- Following your policies.
- Adopting your ideas.

Reader benefits are important in both informative and persuasive messages. In informative messages, reader benefits give reasons to comply with the policies you announce and suggest that the policies are good ones. In persuasive messages, reader benefits give reasons to act and help overcome reader resistance. Negative messages (► Module 11) do not use reader benefits.

Good reader benefits are

- Adapted to the audience.
- Based on intrinsic advantages.
- Supported by clear logic and explained in adequate detail.
- Phrased in you-attitude.

Why do reader benefits work? LO 8-1

► *Reader benefits improve the audience's attitudes and actions.*

Reader benefits improve both the attitudes and the behavior of the people you work with and write to. They make people view you more positively; they make it easier for you to accomplish your goals.

Expectancy theory says most people try to do their best only when they believe they can succeed and when they want the rewards that success brings. Reader benefits tell or remind readers that they can do the job and that success will be rewarded.¹ Thus, they help overcome two problems that reduce motivation: People may not think of all the possible benefits, and they may not understand the relationships among efforts, performance, and rewards.²

The intrinsic value of self-image may be more important to some people than the extrinsic value of price. A recent study published in *The Proceedings of the National Academy of Sciences* suggests that even when consumers are offered something for nothing but have the option to pay, they pay. The study used several scenarios to test the theory and also discovered that if proceeds from sales are tied to charity, people will pay even more. According to lead researcher Ayelet Gneezy, from the University of California at San Diego, "Generally this paper is about peoples' aversion to feeling bad about themselves."

Source: Sarah Nassauer, "A Psychological Twist in Getting Something for Nothing," April 23, 2012, *The Wall Street Journal*, <http://blogs.wsj.com/health/2012/04/23/a-psychological-twist-in-getting-something-for-nothing/?KEYWORDS=business+psychology>

How do I identify reader benefits? LO 8-2

► *Brainstorm!*

Sometimes reader benefits will be easy to think of and to explain. When they are harder to identify, brainstorm. You may want to brainstorm in two steps:

1. Think of the feelings, fears, and needs that may motivate your reader. Then identify features of your product or policy that meet those needs.
2. Identify the objective features of your product or policy. Then think how these features could benefit the audience.

Try to brainstorm at least three to five possible benefits for every informative message and five to seven benefits for every persuasive message. The more benefits you have, the easier it will be to choose good ones rather than settling for something that's so-so.

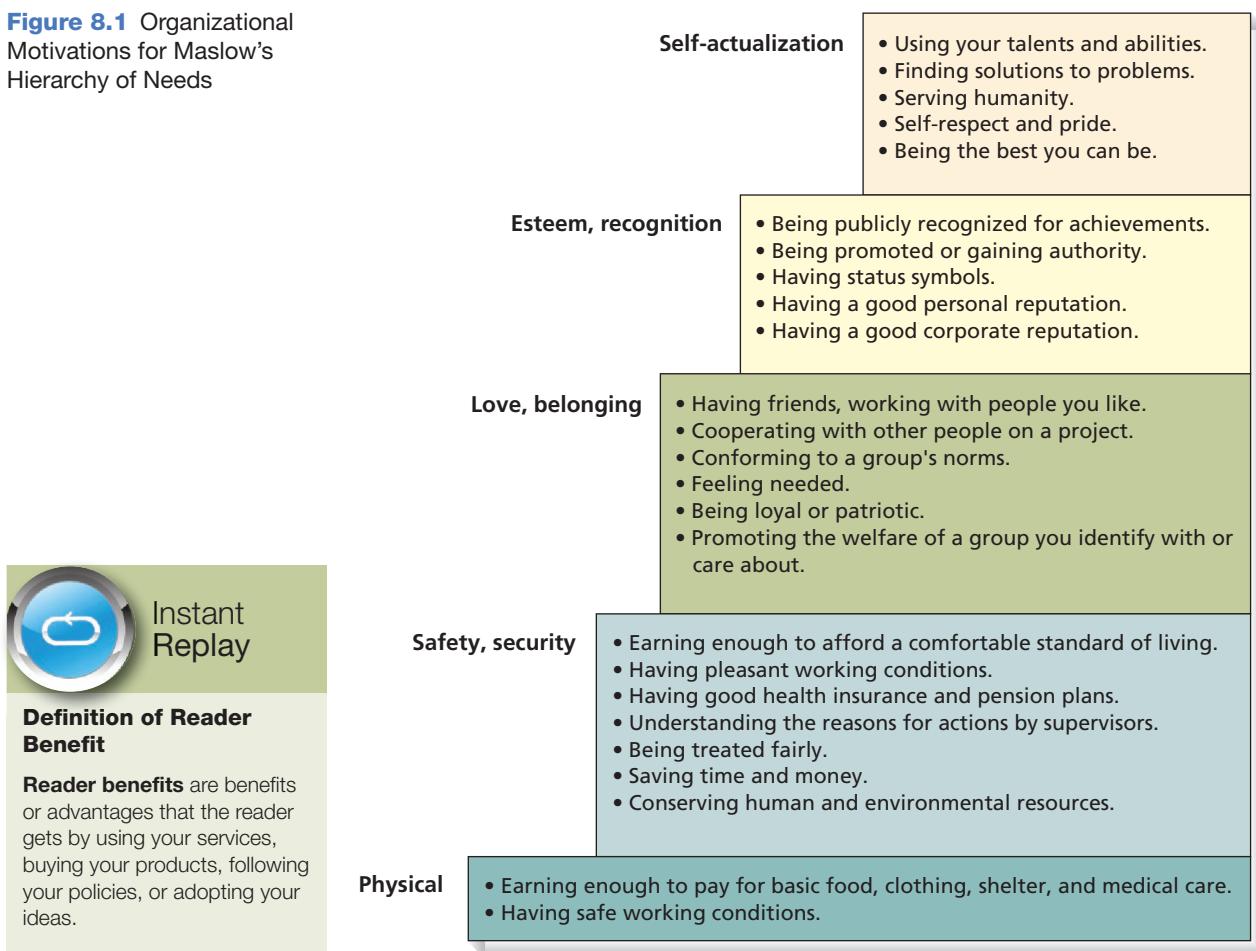

1. Think of Feelings, Fears, and Needs that May Motivate Your Reader. Then Identify Features of Your Product or Policy that Meet Those Needs

One of the best-known analyses of needs is Abraham H. Maslow's hierarchy of needs.³ Physical needs are the most basic, followed by needs for safety and security, for love and a sense of belonging, for esteem and recognition, and finally for self-actualization or self-fulfillment. All of us go back and forth between higher- and lower-level needs. Whenever lower-level needs make themselves felt, they take priority.

Maslow's model is a good starting place to identify the feelings, fears, and needs that may motivate your audience. Figure 8.1 shows organizational motivators for each of the levels in Maslow's hierarchy. Often, a product or idea can meet needs on several levels. Focus on the ones that audience analysis suggests are most relevant for your audience, but remember that even the best analysis may not reveal all of a reader's needs. For example, a well-paid manager may be worried about security needs if her spouse has lost his job or if the couple is supporting kids in college or an elderly parent. Other motivation experts have found that motivators can vary with employees' ages; for example, young salespeople are more likely to enjoy travel rewards, whereas older salespeople might prefer to remain close to home and family, enjoying cash or merchandise as rewards.⁴

Definition of Reader Benefit

Reader benefits are benefits or advantages that the reader gets by using your services, buying your products, following your policies, or adopting your ideas.

Criteria for Reader Benefits

Good reader benefits are

- Adapted to the audience.
- Based on intrinsic advantages.
- Phrased in you-attitude.

The Rousing Creativity Group sells the solid brass Benefit Finder™ to help salespeople develop benefits for the features of their products or services.

2. Identify the Features of Your Product or Policy. Then Think How These Features Could Benefit the Audience

A feature by itself is not a benefit. Often, a feature has several possible benefits.

Feature: Bottled water

Benefits: Is free from chemicals, pollutants

Tastes good

Has no calories

Is easy to carry to class; can be used while biking, driving, hiking

Feature: Closed captions on TV

Benefits: Enables hard-of-hearing viewers to follow dialogue

Helps speakers of English as a second language learn phrases and idioms

Helps small children learn to read

Feature: Flextime

- Benefits:**
- Enables workers to accommodate personal needs
 - Helps organization recruit, retain workers
 - More workers available in early morning and in evening
 - Enables office to stay open longer—more service to clients, customers
 - Enables workers to communicate with colleagues in different time zones more easily

Different features may benefit different subgroups in your audience. Depending on what features a restaurant offered, you could appeal to one or more of the following subgroups:

Subgroup	Features to meet the subgroup's needs
People who work outside the home	A quick lunch; a relaxing place to take clients or colleagues
Parents with small children	High chairs, child-size portions, and things to keep the kids entertained while they wait for their orders
People who eat out a lot	Variety both in food and in decor
People on tight budgets	Economical food; a place where they don't need to tip (cafeteria or fast food)
People on special diets	Low-sodium and low-calorie dishes; vegetarian food; kosher food
People to whom eating out is part of an evening's entertainment	Music or a floor show; elegant surroundings; reservations so they can get to a show or event after dinner; late hours so they can come to dinner after a show or game

To develop your benefits, think about the details of each one. If your selling point is your relaxing atmosphere, think about the specific details that make the restaurant relaxing. If your strong point is elegant dining, think about all the details that contribute to that elegance. Sometimes you may think of features that do not meet any particular need but are still good benefits. In a sales letter for a restaurant, you might also want to mention the nonsmoking section, your free coatroom, the fact that you're close to a freeway or offer free parking or a drive-up window, and how fast your service is.

Look beyond the ordinary, too. Noticing that almost half of U.S. marriages today are the partners' second unions, with many involving children, some hotels and resorts are offering "familymoon" packages that include baby-sitting, multiple bedrooms, and other family friendly amenities.⁵

Whenever you're writing to customers or clients about features that are not unique to your organization, it's wise to present both the benefits of the features themselves and the benefits of dealing with your company. If you talk about the benefits of dining in a relaxed atmosphere but don't mention your own restaurant, people may go somewhere else!

How detailed should each benefit be? LO 8-3

► Use strong, vivid details.

You'll usually need at least three to five sentences to give enough details about a reader benefit. If you develop two or three reader benefits fully, you can use just a sentence or two for less important benefits. Develop reader benefits by linking each feature to the readers' needs—and provide details to make the benefit vivid!

While large chains like Meijer and Sam's Club provide limited online grocery shopping, many also require shoppers to pick up orders at the store. The Hills Market in Worthington, Ohio, is among niche grocery stores providing the benefits of both online shopping and home delivery—including 5,000 of its best-selling items. Says The Hills Market spokesperson Jill Moorhead: "It gets our name out there and is a draw for busy people who like to shop at work or want to have access to our store anytime."

Source: Tracy Turner, "Gourmet Grocer Puts Aisles Online," *The Columbus Dispatch*, May 19, 2011, <http://www.dispatch.com/live/content/business/stories/2011/05/19/gourmet-grocer-puts-aisles-online.html?sid=101>.

An extraordinary benefit to having more education is a longer life expectancy. According to a study published in *Health Affairs*, the "lifelong relationships of education and its correlates with health and longevity are striking."

Source: Phillip Moeller, "Education: A Predictor of Longer Life," *U.S. News & World Report*, August 13, 2012, <http://money.usnews.com/money/blogs/the-best-life/2012/08/13/education-a-predictor-of-longer-life>.

Different audiences may value different intrinsic and extrinsic benefits.

"You got your corner office, so now what's your problem?"

Sensory details give color, texture, and depth to experiences, even ones hard to fathom. Ever wonder what space smells like? According to astronauts returning from spacewalks, it's something like gunpowder or ozone. Skin can hear, at least according to one study. Air puffed on skin altered the perceptions of people distinguishing between "pa" and "ta" and "ba" and "da." And a study at The Ohio State University suggests that touching an object evokes feelings of ownership in as little as 30 seconds.

Source: Tariq Malik, "Space Sights and Smells Surprise Rookie Astronauts," September 5, 2009, [studyyoutouchityoubuyit](http://news.yahoo.com/s/livescience/20090116/sc_livescience/studyyoutouchityoubuyit)

Weak: We have place mats with riddles.

Better: Answering all the riddles on Monical's special place mats will keep the kids happy till your pizza comes. If they don't have time to finish (and they may not, since your pizza is ready so quickly), just take the riddles home—or answer them on your next visit.

Make your reader benefits specific.

Weak: You get quick service.

Better: If you only have an hour for lunch, try our Business Buffet. Within minutes, you can choose from a variety of main dishes, vegetables, and a make-your-own-sandwich-and-salad bar. You'll have a lunch that's as light or filling as you want, with time to enjoy it—and still be back to the office on time.

Psychological description is a technique you can use to develop vivid, specific reader benefits. **Psychological description** means creating a scenario rich with sense impressions—what the reader sees, hears, smells, tastes, feels—so readers can picture themselves using your product or service and enjoying its benefits. You can also use psychological description to describe the problem your product will solve. Psychological description works best early in the message to catch readers' attention.

Feature: Snooze alarm

Benefit: If the snooze button is pressed, the alarm goes off and comes on again nine minutes later.

Psychological description: Some mornings, you really want to stay in bed just a few more minutes. With the Sleepytime Snooze Alarm, you can snuggle under the covers for a few extra winks, secure in the knowledge that the alarm will come on again to get you up for that breakfast meeting with an important client. If you don't have to be anywhere soon, you can keep hitting the snooze alarm for up to an additional 63 minutes of sleep. With Sleepytime, you're in control of your mornings.

Feature: Tilt windows

Benefit: Easier to clean

Psychological description: It's no wonder so many cleaners "don't do windows."

Balancing precariously on a rickety ladder to clean upper-story windows . . . shivering outside in the winter winds and broiling in the summer sun as you

scrub away . . . running inside, then outside, then inside again to try to get the spot that always seems to be on the other side. Cleaning traditional windows really is awful.

In contrast, cleaning is a breeze with Tilt-in Windows. Just pull the inner window down and pull the bottom toward you. The whole window lifts out! Repeat for the outer window. Clean them inside in comfort (sitting down or even watching TV if you choose). Then replace the top of the outer window in its track, slide up, and repeat with the inner window. Presto! Clean windows!

In psychological description, you're putting your reader in a picture. If the reader doesn't feel that the picture fits, the technique backfires. To prevent this, psychological description often uses subjunctive verbs ("if you like . . ." "if you were . . .") or the words *maybe* and *perhaps*.

You're hungry but you don't want to bother with cooking. Perhaps you have guests to take to dinner. Or it's 12 noon and you only have an hour for lunch. Whatever the situation, the Illini Union has a food service to fit your needs. If you want convenience, we have it. If it's atmosphere you're seeking, it's here too. And if you're concerned about the price, don't be. When you're looking for a great meal, the Illini Union is the place to find it.

—Illini Union brochure

How do I decide which benefits to use? LO 8-4

► Use the following three principles to decide.

Three principles guide your choice of reader benefits:

1. Use at least one benefit for each part of your audience.
2. Use intrinsic benefits.
3. Use the benefits you can develop most fully.

1. Use at Least One Benefit for Each Part of Your Audience

Most messages go to multiple audiences. In a memo announcing a company-subsidized day care program, you want benefits not only for parents who might use the service but also for people who don't have children or whose children are older. Reader benefits for these last two audiences help convince them that spending money on day care is a good use of scarce funds.

In a letter to "consumers" or "voters," different people will have different concerns. The more of these concerns you speak to, the more persuasive you'll be.

2. Use Intrinsic Benefits

Intrinsic benefits come automatically from using a product or doing something. **Extrinsic benefits** are "added on." Someone in power decides to give them; they do not necessarily come from using the product or doing the action. Figure 8.2 gives examples of extrinsic and intrinsic rewards for three activities.

Intrinsic rewards or benefits are better than extrinsic benefits for two reasons:

1. There just aren't enough extrinsic rewards for everything you want people to do. You can't give a prize to every customer every time he or she places an order or to every subordinate who does what he or she is supposed to do.
2. Research suggests that you'll motivate subordinates more effectively by stressing the intrinsic benefits of following policies and adopting proposals.

In a groundbreaking study of professional employees, Frederick Herzberg found that the things people said they liked about their jobs were all *intrinsic* rewards—pride

for a "one-stop shopping" portal to benefits provided by the U.S. government.

While the actual cost of producing a U.S. dollar bill is 6.4 cents, it comes backed by the "full faith and credit of the United States," an intrinsic value that makes it popular in business throughout the world.

Source: "15 Things You Never Noticed on a Dollar," January 24, 2010, <http://shine.yahoo.com/channel/life/15-things-you-never-noticed-on-a-dollar-575113/>.

Instant Replay

Psychological Description

Psychological description means creating a scenario rich with sense impressions—what the reader sees, hears, smells, tastes, feels—so readers can picture themselves using your product or service and enjoying its benefits.

Some benefits are never predictable. From a helicopter, Swiss rescuers located two skiers by the light from their MP3 player. A mother's handwritten labels on her record collection let her only child—30 years after her passing—realize the records he'd bought at a distant antique store were once hers. People who focus on one task at a time are more effective at multitasking than those who multitask regularly, according to one study.

Source: Sam Cage, "MP3 Player Guides Rescuers to Lost Tourists," December 27, 2009, <http://www.reuters.com/article/idUSTRE4BQ14P20081227>; Gina Kim, "Sacramento Buys Old Vinyl 45s, Finds Out They Were His Mom's." *The Sacramento Bee*, July 31, 2009, <http://www.sacbee.com/topstories/story/2071033.html>; and Randolph E. Schmid, "Study Finds People Who Multitask Often Bad at It," August 24, 2009, http://news.yahoo.com/s/ap/20090824/ap_on_sc/us_sci_multitasking_mayhem.

In *The (Honest) Truth About Dishonesty*, Duke University's Dan Ariely observes when liars and cheats consider doing something wrong, their thinking is counterintuitive. For instance, going to prison seems a natural deterrent to committing a crime, but Ariely maintains that in his experience, "big cheaters" don't think of long-term consequences. With regard to inside traders, he suggests "incredibly close to zero, maybe exactly zero" considered the consequences of jail time.

(continued)

Figure 8.2 Extrinsic and Intrinsic Rewards

Activity	Extrinsic Reward	Intrinsic Reward
Making a sale.	Getting a commission.	Pleasure in convincing someone; pride in using your talents to think of a strategy and execute it.
Turning in a suggestion to a company suggestion system.	Getting a monetary reward when the suggestion is implemented.	Solving a problem at work; making the work environment a little more pleasant.
Writing a report that solves an organizational problem.	Getting praise, a good performance appraisal, and maybe a raise.	Pleasure in having an effect on an organization; pride in using your skills to solve problems; solving the problem itself.

in achievement, an enjoyment of the work itself, responsibility. Extrinsic features—pay, company policy—were sometimes mentioned as things people disliked, but they were never cited as things that motivated or satisfied them. People who made a lot of money still did not mention salary as a good point about the job or the organization.⁶ In a 1998 survey of workers all over the United States, Aon Consulting found that the factor most likely to produce employee loyalty and a desire to be productive was management's recognition of employees' personal and family lives. Salary didn't make the top 10.

Many family friendly companies have discovered that a culture of care keeps turnover low. The higher salary that a competitor might pay just doesn't overcome the advantage of working at a supportive, flexible company that values its employees.⁷ In a competitive job market, different candidates want different things. But many accept lower salaries to get flextime, stock options, interesting work, or people they want to work with.⁸

Because money is not the only motivator, choose reader benefits that identify intrinsic as well as extrinsic motivators for following policies and adopting ideas.

3. Use the Benefits You Can Develop Most Fully

One-sentence benefits don't do much. Use the benefits that you can develop in three to five sentences or more.

A reader benefit is a claim or assertion that the reader will benefit if he or she does something. Convincing the reader, therefore, involves two steps: making sure the benefit really will occur and explaining it to the reader.

If the logic behind a claimed reader benefit is faulty or inaccurate, there's no way to make that particular reader benefit convincing. Revise the benefit to make it logical.

Faulty logic: Using a computer will enable you to write letters, memos, and reports **much more quickly**.

Analysis: If you've never used a computer, in the short run it will take you *longer* to create a document using a computer than it would to type it. Even after you know how to use a computer and its software, the real time savings comes when a document incorporates parts of previous documents or goes through several revisions. Creating a first draft from scratch will still take planning and careful composing; the time savings may or may not be significant.

Revised reader benefit: Using a computer allows you to **revise and edit a document more easily**. It eliminates **retyping as a separate step** and reduces the time needed to proofread revisions. It allows you to move the text around on the page to create the best layout.

Matching the Benefit to the Audience

LO 8-5

When you communicate with different audiences, you may need to stress different benefits.

Suppose that you manufacture a product and want to persuade dealers to carry it. The features you may cite in ads directed toward customers—stylish colors, sleek lines, convenience, durability, good price—won’t convince dealers. Shelf space is at a premium, and no dealer carries all the models of all the brands available for any given product. Why should the dealer stock your product? To be persuasive, talk about the features that are benefits from the dealer’s point of view: turnover, profit margin, a national advertising campaign to build customer awareness and interest, special store displays that will draw attention to the product.

Look for intrinsic as well as extrinsic benefits. For instance, Rossmoor Elementary School Principal Lauren Telfer says, “If you’re looking for what’s best for students, it’s important to have them interact with both sexes. . . . I think students really benefit from having that mix.” However, the proportion of men in teaching is at a 40-year low—only 21% in U.S. public schools. Telfer works to recruit male teachers. With 33 of her 35 teachers female, she says she also tries to make male teachers more comfortable, including asking faculty to rein in lunchroom conversations about intimate matters.

Alumni at prestigious business schools provide financial support and word-of-mouth advertising for alma maters, but they also benefit from a strong network of peers and a sense of belonging.

Even in your own organization, different audiences may care about different things. To create an intranet for Xerox, Cindy Casselman needed support from a variety of divisions. She had to persuade her own supervisor to let her work on the project. He said “yes” but told her she had to raise the \$250,000 herself. She got the money and the programming talent she needed by showing other managers how they would benefit from the proposed intranet. The CIO cared about the enormous financial investment the company had already made in its computer infrastructure. She told him that the intranet would put content there. The director of education and training cared about learning at Xerox. Cindy pointed out that the intranet would provide a place for learning to happen. She raised the \$250,000 by showing people how her idea would benefit the aspects of the company they cared most about.

Internet banking customers may expect different benefits than ones for traditional brick-and-mortar banks. No lines, better interest rates, and 24-hour banking from home can attract web-friendly customers. Brick-and-mortar bank customers expect convenient ATMs, local branches, and other amenities, as well as less risk of fraud or theft. With many bank customers today having multiple credit cards and bank accounts, keeping track of where all the money goes can be challenging, too. PNC launched Virtual Wallet, an online service that presents account

When Beth Blake came up empty-handed in her search for a bridesmaid dress, she and designer friend Sophie Simmons teamed up to create one instead. The results of their bridal project created such a stir at the wedding that they decided to launch their own business. Their company, Thread, offers fashionable bridesmaid dresses that can be worn beyond the wedding. The seven-year-old company that was started with \$100,000 now boasts millions in revenue, a celebrity clientele, and three boutiques.

information tied to a calendar. If the account is close to an overdraft, a red “danger day” appears. The service can automatically move money from one account to another if the customer has yet to catch the problem.

Source: Joanna Pearl Steinem, "Why We Lie, Go to Prison and Eat Cake," *Wired*, June 22, 2012, <http://www.wired.com/business/2012/06/why-we-lie-cheat-go-to-prison-and-eat-chocolate-cake-10-questions-with-dan-ariely/>.

If the logic is sound, making that logic evident to the reader is a matter of providing enough evidence and showing how the evidence proves the claim that there will be a benefit. Always provide enough detail to be vivid and concrete. You'll need more detail in the following situations:

- The reader may not have thought of the benefit before.
- The benefit depends on the difference between the long run and the short run.
- The reader will be hard to persuade, and you need detail to make the benefit vivid and emotionally convincing.

Does the following statement have enough detail?

You will benefit if the company saves money.

Some benefits come long after the product has been conceived. Marcelle Shriver, whose soldier son wrote of how Silly String can help troops find bomb trip wires in Iraq, worked with Thom Campbell, one of the founders of a shipping company, to get 80,000 cans sent to U.S. forces.

Readers always believe their own experience. Many readers will know that they didn't get bonuses even during a year that the company did well. In addition to bonuses for top executives, companies could use profits to pay higher dividends to shareholders, to retire debt, or to increase research and development spending. Even spending money on upgrading computers or remodeling the employee lounge may not seem like a strong benefit to some workers. Instead,

you'll need to show that money saved will go into one or more specific programs that will benefit employees directly or indirectly. The more indirect the benefit is, the more proof you'll need.

What else do reader benefits need? LO 8-6

► Check for you-attitude.

If reader benefits aren't in you-attitude (◀◀ p. 90), they'll sound selfish and won't be as effective as they could be. A Xerox letter selling copiers with strong you-attitude as well as reader benefits got a far bigger response than did an alternate version with reader benefits but no you-attitude.⁹ It doesn't matter how you phrase reader benefits while you're brainstorming and developing them, but in your final draft, edit for you-attitude.

Lacks you-attitude: *We* have the lowest prices in town.

You-attitude: *At Havlicek Cars, you get* the best deal in town.

Summary of Learning Objectives

- **Expectancy theory** says most people try to do their best only when they believe they can succeed and when they want the rewards that success brings. (**LO 8-1**)
- Good reader benefits are adapted to the audience, based on intrinsic rather than extrinsic advantages, supported by clear logic and explained in adequate detail, and phrased in you-attitude. Extrinsic benefits simply aren't available to reward every desired behavior; further, they reduce the satisfaction in doing something for its own sake. (**LO 8-2**)
- To create reader benefits,
 1. Identify the feelings, fears, and needs that may motivate your reader.
 2. Show how the reader can meet his or her needs with the features of the policy or product.
- **Psychological description** means creating a scenario rich with sense impressions—what the reader sees, hears, smells, tastes, feels—so readers can picture themselves using your product or service and enjoying its benefits. (**LO 8-3**)
- Brainstorm twice as many reader benefits as you'll need for a message. (**LO 8-4**)
 1. Use at least one benefit for each part of your audience.
 2. Use intrinsic benefits.
 3. Use the benefits you can develop most fully.
- When you communicate with different audiences, you may need to stress different benefits. (**LO 8-5**)
- Make sure reader benefits are phrased in you-attitude. (**LO 8-6**)

Assignments for Module 8

Questions for Comprehension

- 8.1 What are reader benefits? (LO 8-1)
- 8.2 In a message with reader benefits, how many different benefits should you use? (LO 8-2)

Questions for Critical Thinking

- 8.5 How do reader benefits help you achieve your goals? (LO 8-1)
- 8.6 Why do reader benefits need to be in you-attitude? (LO 8-3)

Exercises and Problems

8.8 Identifying and Developing Reader Benefits (LO 8-1, LO 8-2)

Listed here are several things an organization might like its employees to do.

1. Go “green.”
2. Give up smoking.
3. Conserve using office supplies.
4. Car pool with other employees.
5. Participate in a cancer charity walk.

8.9 Identifying Objections and Reader Benefits (LO 8-1 to LO 8-3)

Think of an organization you know something about, and answer the following questions for it.

1. Your college wants to install cameras in public areas around campus and to require that students use swipe cards to enter campus buildings after 5 p.m. What objections might people have? What benefits would the campus community receive? Which people would be easiest to convince?
2. Your organization is considering posting the names of employees who contribute to the annual charity fund-raiser on its web page. What objections might people have? What benefits might your organization receive? Which people would be easiest to convince?

8.10 Identifying and Developing Reader Benefits for Different Audiences (LO 8-1 to LO 8-3)

Assume that you want to encourage people to do one of the following activities:

1. Having a personal trainer

Audiences: Professional athletes
Busy managers
Someone trying to lose weight
Someone making a major lifestyle change after a heart attack
2. Using public transportation

Audiences: People who must travel throughout the city for their job
People who have children in day care
People who live in the suburbs
3. Getting advice about refinancing a home mortgage

Audiences: Investors
Empty nesters

8.3 What is psychological description? (LO 8-2)

- 8.4 What is the difference between intrinsic and extrinsic reader benefits? Which are better? Why? (LO 8-3)

- 8.7 If you are writing to multiple audiences with different needs, should you include all the reader benefits you can think of in the message? (LO 8-3)

As Your Instructor Directs,

- a. Identify the motives or needs that might be met by each of the activities.
 - b. Develop each need or motive as a reader benefit in a full paragraph. Use additional paragraphs for the other needs met by the activity. Remember to use you-attitude!
 - 3. Your local recreation department is considering asking for a 3-mill levy to provide for upgraded parks and summer camp programs. What objections might people have? What benefits would such a program offer? Which people would be easiest to convince?
- As Your Instructor Directs,*
- a. Share your answers orally with a small group of students.
 - b. Present your answers in an oral presentation to the class.
 - c. E-mail your answers to class members.
 - d. Write a paragraph developing the best reader benefit you identified. Remember to use you-attitude.

Potential retirees

Single professionals

Parents looking to finance a child's education

4. Getting advice on retirement strategies

- Audiences: Young adults entering the workforce
People earning less than \$50,000 annually
People planning to attend graduate or professional school, such as law school
Parents with small children
People within 10 years of retirement

5. Eating organic foods

- Audiences: Upscale shoppers
People on tight budgets
People with small children
Supporters of local farming

- People concerned with soil conservation
People concerned with reducing pesticides
6. Buying an HDTV

Audiences: College students
Sports aficionados
Residence hall managers
Tavern and restaurant owners
Trade show display salespeople
 7. Teaching adults to read

Audiences: Retired workers
Businesspeople
Students who want to become teachers
High school and college students
People concerned about poverty
 8. Attending college or graduate school

Audiences: Recent high school graduates
Retirees
Working professionals
Single parents
Wealthy people
Entrepreneurs
 9. Attending a fantasy sports camp (you pick the sport), playing with and against retired players who provide coaching and advice

Polishing Your Prose

Plurals and Possessives

Singular possessives and plurals sound the same but are spelled differently. A possessive noun will always have an apostrophe. Most possessives of singular nouns are formed by adding 's' to the word.

Singular Possessive	Plural
company's	companies
computer's	computers
family's	families
job's	jobs
manager's	managers
team's	teams

Because singular possessive nouns and plurals sound the same, you will have to look at the logic of your sentence to choose the right word.

Exercises

Choose the right word in each set of brackets.

1. Dean told us that his [customers/customer's] expect excellent service—even if that means going above and beyond, such as working past quitting time.
2. [Stakeholders/Stakeholder's] believe in a company for many reasons, but generally a solid business plan helps to build their confidence.

10. Taking a cruise, where passengers have all meals included but must pay for tips, drinks, airfare, and off-ship excursions

As Your Instructor Directs,

- a. Identify needs that you could meet for the audiences listed here. In addition to needs that several audiences share, identify at least one need that would be particularly important to each group.
- b. Identify a product or service that could meet each need.
- c. Write a paragraph or two of reader benefits for each product or service. Remember to use you-attitude.
- d. Develop one or more of the benefits using psychological description.

Hints:

- For this assignment, you can combine benefits or programs as if a single source offered them all.
- Add specific details about particular sports, cities, tourist attractions, activities, etc., as material for your description.
- Be sure to move beyond reader benefits to vivid details and sense impressions.
- Put your benefits in you-attitude.

3. The [printers/printer's] toner cartridge is jammed, so someone will need to take a look at it.
4. Since we have a [weeks/week's] worth of work left to do, we should get started as soon as possible.
5. Cassandra emerged from the meeting with a big smile and said, “The [ayes/aye's] have it!”
6. We learned from Jack that [supervisors/supervisor's] will be expected to complete daily progress reports now in addition to their weekly ones.
7. Because our pool [cars/car's] are expensive to maintain, we're thinking of using [rentals/rental's] instead next year.
8. The Public Relations Department noted that public [opinions/opinion's] can change according to how effective a [companies/company's] media strategy is.
9. When reviewing her [teams/team's] progress, Martina found that many [efforts/effort's] in 2012 paid off.
10. Because a [memos/memo's] purpose should be clear, the subject [lines/line's] content is very important.

Check your answers to the odd-numbered exercises at the back of the book.

Unit 2 Cases for Communicators

Keep on Reading with Us

In December 2011, *The New York Times*, one of the nation's oldest and most respected newspapers, had to scramble to recover from an e-mail message mistakenly sent out that promised a 50% discount for 16 weeks on a subscription. The offer had been intended only for a few hundred people who had recently cancelled subscriptions but was instead sent to 8.6 million e-mail addresses.

Shortly after, the *Times* tweeted: "If you received an e-mail today about cancelling your NYT subscription, ignore it. It's not from us." Of course, the newspaper did send the original e-mail message.

Damage from the error included many people calling or writing in to take advantage of the offer, including some who already had a subscription but threatened to cancel unless the deal was honored. The *Times* did initially honor the discount, but later that day stopped giving out discounts. The results included angry customers and a parody Twitter account poking fun at the mistake.

Individual Activity

Imagine you are in the Marketing Department of *The New York Times* and you have been selected to work on its campaign to regain subscriber confidence. The *Times* knows it has a strong product with a long history of satisfied readers. However, company executives fear that some subscribers may avoid renewing their subscriptions in the future, especially those subscribers who weren't able to take advantage of the erroneous e-mail offer. In addition, potential new subscribers may have been scared off by the negative publicity surrounding the debacle.

To achieve its goal, the Marketing Department has decided to e-mail a different offer to these customers. The company will use the e-mail addresses already in its database for renewals but will pay for additional e-mail addresses for potential customers. The e-mail message, tailored to each customer group, will only be sent to those customers who did not renew with the previous offer.

Subscribers will receive the following benefits:

- A free two-week subscription to its home-delivered print edition, along with a collectible holiday edition to anyone who chooses to start or renew a subscription for three months.
- A free four-week subscription to its home-delivered print edition, along with a collectible holiday edition and a free *Times* coffee mug to anyone who chooses to start or renew a subscription for six months.
- For either subscription, readers will get access to premium features in the online version of the *Times* (The online version is

free but provides limited access to stories and other features, such as a searchable database of older articles.)

While an e-mail message will go out to all of the customers affected, the *Times* would like to segment the e-mail messages for subscribers more likely to respond to one offer versus the other. To identify them, consider the following questions:

- What intrinsic and extrinsic benefits are inherent in a subscription to *The New York Times*? What might customers gain from these benefits?
- What are the demographic and lifestyle characteristics of potential customers?
- What needs, feelings, or concerns might be motivating customers?
- Why would customers pay for a print edition of *The New York Times* when a lot of the same information can be found free at the newspaper's website?

Identify as many different potential customer groups as you can think of, noting at least one intrinsic and one extrinsic benefit that each group can expect from purchasing a *Times* subscription.

Give enough detail in your customer descriptions so that the Marketing Department can use the information to guide its choice of appeals to customers.

Group Activity

Combine the results of your list with those of your classmates to generate a comprehensive list of customers and benefits. Then, as a group, select five customer groups on which to focus. Identify the benefits that will be in the e-mail message to potential subscribers and develop these benefits using psychological description.

Think of how the e-mail message will convince potential customers they should purchase your company's products.

Write the e-mail message: Be sure to:

- Include at least one intrinsic and one extrinsic benefit for each customer group.
- Justify negative information, focusing on what the reader can do rather than on limitations.
- Omit unnecessary negative information.
- Use you-attitude.
- Talk about the reader, not the company.

Formats for Letters and Memos

LEARNING OBJECTIVES

Module 9 details the most common formats for business letters and memos. After completing the module, you should be able to

- | | |
|--|--|
| LO 9-1 Apply principles for correct letter formats. | LO 9-3 Recognize courtesy titles for correspondence. |
| LO 9-2 Apply strategies for professional image creation with documents and beyond. | LO 9-4 Apply principles for correct memo formats. |

Letters normally go to people outside your organization; **memos** go to other people in your organization. In very large organizations, corporate culture determines whether people in different divisions or different locations feel close enough to each other to write memos.

Letters and memos do not necessarily differ in length, formality, writing style, or pattern of organization. However, letters and memos do differ in format. **Format** means the parts of a document and the way they are arranged on the page.

Short reports use letter or memo format (►► Module 23). Long reports can use the formal format illustrated in Module 24. If your organization has its own formats for letters and memos, use them. Otherwise, choose one of the formats in this module. See Module 13 for e-mail formats.

How should I set up letters? LO 9-1

► Use block or modified block format.

The two most common letter formats are **block**, sometimes called full block (see Figure 9.2), and **modified block** (see Figure 9.3). Your organization may make minor changes from the diagrams in margins or spacing.

Figure 9.1 shows how the formats differ.

Use the same level of formality in the **salutation**, or greeting, as you would in talking to someone on the phone: *Dear Glenn* if you're on a first-name basis, *Dear Mr. Helms* if you don't know the reader well enough to use the first name.

Sincerely and *Cordially* are standard **complimentary closes**. When you are writing to people in special groups or to someone who is a friend as well as a business acquaintance, you may want to use a less formal close. Depending on the circumstances, the following informal closes might be acceptable: *Yours for a better environment*, or even *Ciao* or *Thanks*.

In **mixed punctuation**, a colon follows the salutation and a comma follows the close. In a sales or fund-raising letter, it is acceptable to use a comma after the salutation to make the letter look like a personal letter rather than like a business letter. Most organizations use mixed punctuation. A few organizations use open punctuation, which is faster to type. In **open punctuation**, omit all punctuation after the salutation and the close.

A **subject line** tells what the letter is about. Subject lines are required in memos; they are optional in letters. Good subject lines are specific, concise, and appropriate for your purposes and the response you expect from your reader.

- When you have good news, put it in the subject line.
- When your information is neutral, summarize it concisely in the subject line.
- When your information is negative, use a negative subject line if the reader may not read the message or needs the information to act, or if the negative is your error.
- When you have a request that will be easy for the reader to grant, put either the subject of the request or a direct question in the subject line.
- When you must persuade a reluctant reader, use a common ground, a reader benefit, or a directed subject line (►► Module 12) that makes your stance on the issue clear.

For examples of subject lines in each of these situations, see Modules 10, 11, and 12.

A **reference line** refers the reader to the number used on the previous correspondence this letter replies to, or the order or invoice number which this letter is about. Very large organizations, such as the IRS, use numbers on every piece of correspondence they send out so that it is possible to quickly find the earlier document to which an incoming letter refers.

Both formats can use headings, lists, and indented sections for emphasis.

Each format has advantages. Block format is the format most frequently used for business letters; readers expect it; it can be typed quickly because everything is lined up at the

With cloud technology becoming more popular for document storage, care must be taken to ensure formats remain. For instance, Google Drive, a cloud service that also features a custom word processor, Google Docs, allows up to five gigabytes of free file storage, but if you use Microsoft Word, you will only be able to view documents there unless you convert the document. Each system may have its idiosyncrasies, and whether using Dropbox, SugarSync, Google Drive, or Microsoft's SkyDrive, care must be taken to know how document formats might be affected.

Source: Walter Mossberg, "Google Stores, Syncs, Edits in the Cloud," *The Wall Street Journal*, April 25, 2012, <http://online.wsj.com/article/SB10001424052702303459004577362111867730108.html?KEYWORDS=document+format>.

Mr. James E. Murphy, Accounts Payable *Title could be on a separate line.*
Salt Lake Equipment Rentals
5600 Wasatch Boulevard
Salt Lake City, Utah 84121

Use first name in salutation if you'd use it on the phone.

Dear Jim: *Colon in mixed punctuation*

The following items totaling \$393.09 are still open on your account. *#1 never has a heading.*

Invoice #01R-784391 *Bold heading*

After the bill for this invoice arrived on May 14, you wrote saying that the material had not been delivered to you. On May 29, our Claims Department sent you a copy of the delivery receipt signed by an employee of Salt Lake Equipment. You have had proof of delivery for over three weeks, but your payment has not yet arrived. *5th - 1"*

Please send a check for \$78.42. *Single-space paragraphs.* *Double-space between paragraphs.*

Triple-space before new heading.

Voucher #59351

Do not indent paragraphs.

The reference line on your voucher #59351, dated June 11, indicates that it is the gross payment for invoice #01G-002345. However, the voucher was only for \$1171.25, while the invoice amount was \$1246.37. Please send a check for \$75.12 to clear this item.

Voucher #55032

Voucher #55032, dated June 15, subtracts a credit for \$239.55 from the amount due. Our records do not show that any credit is due on this voucher. Please send either an explanation or a check to cover the \$239.55 immediately.

Total Amount Due *Headings are optional in letters.*

Please send a check for \$393.09 to cover these three items and to bring your account up to date. *2-3 spaces*

Sincerely,

3-4 spaces

Cyclops Communication Technologies
1050 South Sierra Bonita Avenue
Los Angeles, CA 90019 *Zip code on same line*

Dear Ms. Arcas: *Colon in mixed punctuation*

Indenting ¶ is optional in modified block.

Single-space paragraphs.

Double-space between paragraphs.

Let me respond to your request for an evaluation of Colleen Kangas. Colleen was hired as a clerk-typist by Bay City Information Systems on April 4, 2008, and was promoted to Administrative Assistant the following August. At her review in June, I recommended that she be promoted again. She is intelligent with good work habits and a good knowledge of computer software.

As an Administrative Assistant, Colleen not only handles routine duties such as processing time cards, ordering supplies, and entering data, but also screens calls for two marketing specialists, answers basic questions about Bay City Information Systems, compiles the statistics I need for my monthly reports, and investigates special assignments for me. In the past eight months, she has investigated freight charges, phone systems, and firewalls. I need only to give her general directions: she has a knack for tracking down information quickly and summarizing it accurately.

Although the department's workload has increased during the year, Colleen manages her time so that everything gets done on schedule. She is consistently poised and friendly under pressure. Her willingness to work overtime on occasion is particularly remarkable considering that she has been going to college part-time ever since she joined our firm.

At Bay City Information Systems, Colleen uses Microsoft Word and Access software. She tells me that she has also used WordPerfect and PowerPoint in her college classes.

If Colleen were staying in San Francisco, we would want to keep her. She has the potential either to become an Executive Secretary or to move into line or staff work, especially once she completes her degree. I recommend her highly.

Headings are optional in letters.

Encl.: Evaluation Form for Colleen Kangas

Leave at least 3-6 spaces at bottom of page—more if letter is short.

September 14, 2012
*Line up date with signature block.
1 or 2/3 of the way over to the right.*

Sincerely, *Comma in mixed punctuation*
Jeanne Cederlind

left margin. Modified block format creates a visually attractive page by moving the date and signature block over into what would otherwise be empty white space. Modified block is a traditional format; readers are comfortable with it.

The examples of the formats in Figures 9.2 and 9.3 show one-page letters on company letterhead. **Letterhead** is preprinted stationery with the organization's name, logo,

Building a Critical Skill

Creating a Professional Image, 1 LO 9-2

The way you and your documents look affects the way people respond to you and to them. Every organization has a dress code. One young man was upset when an older man told him he should wear wing-tip shoes. He was wearing leather shoes but not the kind that said “I’m promotable” in that workplace. Dress codes are rarely spelled out; the older worker was doing the young man a favor by being direct. If you have a mentor in the organization, ask him or her if there are other ways you can make your appearance even more professional. If you don’t have a mentor, look at the people who rank above you. Notice clothing, jewelry, and hairstyles. If you’re on a budget, go to stores that sell expensive clothing to check the kind of buttons, the texture and colors of fabric, and the width of lapels and belts. Then go to stores in your price range and choose garments that imitate the details of expensive clothing.

On casual days, wear clothes in good repair that are one or two “notches” below what you’d wear on other days. If suits are the norm, choose blazers and slacks or skirts. If blazers and slacks or skirts are the norm, choose sweaters or knit sport shirts; khakis, simple skirts, or dressier jeans; or simple dresses. Wear good shoes and always be well groomed. Avoid anything that’s ill-fitting or revealing.

Too many photographs, knickknacks, and posters can make you seem frivolous. Avoid offensive photos, slogans, or screensavers. One local government supervisor, known for being strict, put a poster of Adolf Hitler on his door to make light of his reputation. He so offended others that he lost his job.

If you’re allowed to listen to music, keep the volume at a reasonable level, and tune out “shock jocks,” whose coarse language and offensive stereotypes may alienate people. Wear headphones if your organization allows it.

Computer game playing and personal web surfing and e-mailing are best done on your own time. Keep your voice-mail message succinct and professional—find out what co-workers say in theirs.

Organize your desk by filing papers and keeping stacks to a minimum. Purge unneeded materials, and store food elsewhere. Clean regularly. Water your plants. While a messy desk can be

charming to some co-workers, others find it a distraction. Some experts even suggest excessive clutter and disorganization may be a sign of depression or a brain injury.

While most people wouldn’t shout across an office, many of us are louder than we think when we’re excited or happy—monitor your volume. Keep personal conversations to a minimum, in person and on the phone.

Rules for documents, like rules for clothing, are sometimes unwritten. To make your document look professional,

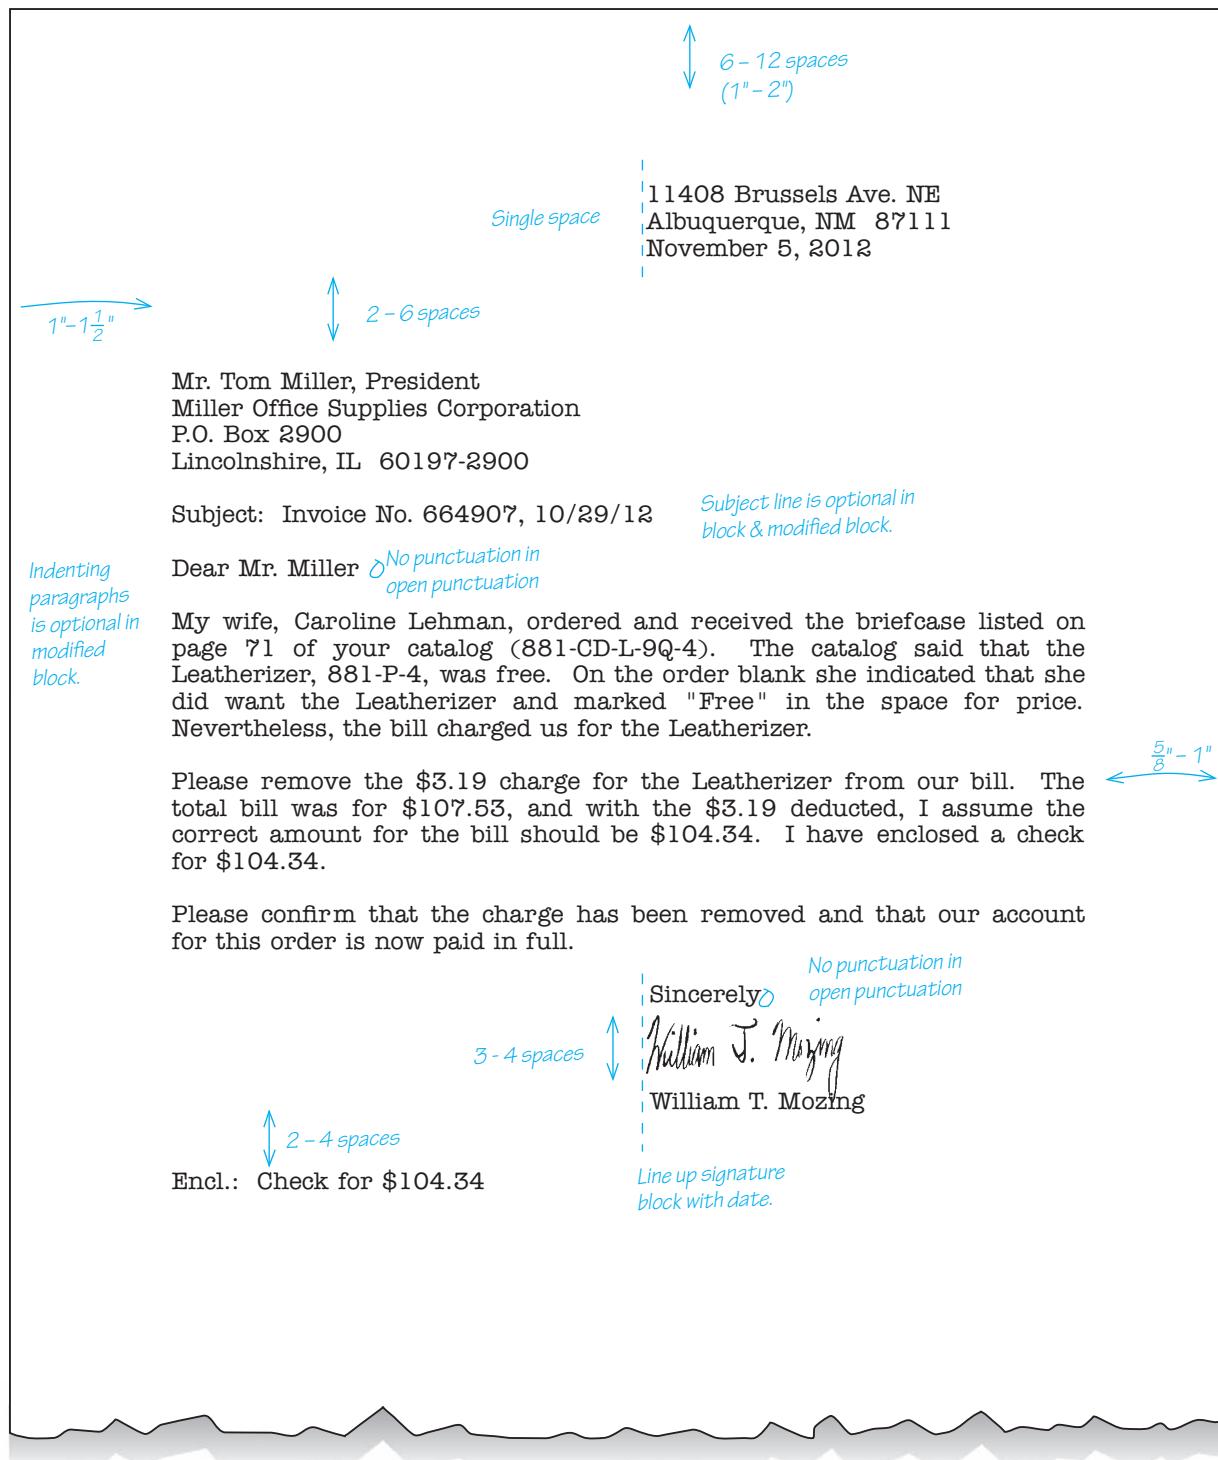

- Use good visual impact (◀◀ Module 5).
- Edit and proofread to eliminate errors and typos (▶▶ Modules 14 and 15).
- Make sure the ink or toner is printing evenly.
- Use a standard format.

Know your organizational culture. When in doubt, follow the lead of someone the organization respects.

Source: Tara Parker-Pope, “A Clutter Too Deep for Mere Bins and Shelves,” *The Wall Street Journal*, January 1, 2008, downloaded at http://online.wsj.com/public/article/SB11994026739226173-r6vgPqwm_F_R4GXRfeoBN_OboA_20080202.html?mod=tff_main_tff_top.

address, and phone number. Figure 9.4 shows how to set up modified block format when you do not have letterhead. (It is also acceptable to use block format without letterhead.)

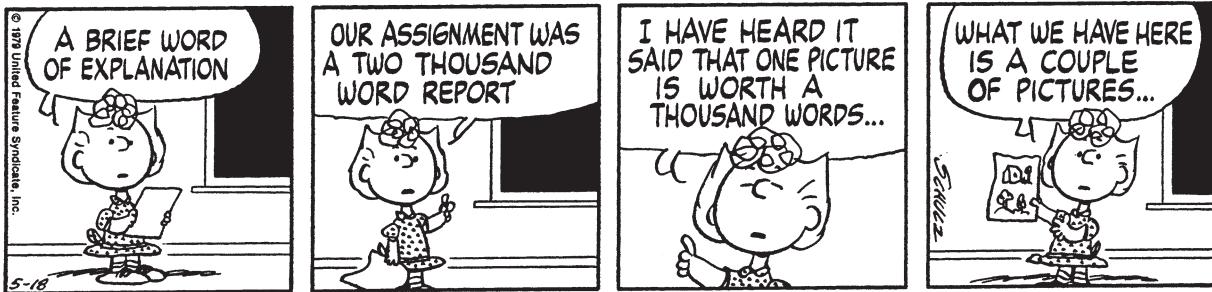

When your letter runs two or more pages, use a heading on the second page to identify it. Putting the reader’s name in the heading helps the writer, who may be printing out

Figure 9.4 Modified Block Format without Letterhead (open punctuation; claim letter)

many letters at a time, to make sure the right second page gets in the envelope. Even when the signature block is on the second page, it is still lined up with the date.

or

The days of the dead letter office have changed significantly since Herman Melville wrote of his depressed scrivener, Bartleby. To increase the chances a letter stays out of the shredder, U.S. Postal Service workers use sophisticated document scanners to decipher the worst handwriting on envelopes. While some names and addresses are hopelessly indecipherable, the technology tries to salvage as many letters as possible—more than 714 million such letters were scanned in one year alone.

Date

When a letter runs two or more pages, use letterhead only for page 1. (See Figures 9.5 and 9.6.) For the remaining pages, use plain paper that matches the letterhead in weight, texture, and color.

Set side margins of 1" to $1\frac{1}{2}$ " on the left and to $\frac{5}{8}$ " to 1" on the right. If your letterhead extends all the way across the top of the page, set your margins even with the ends of the letterhead for the most visually pleasing page. The top margin should be three to six lines under the letterhead, or 2" down from the top of the page if you aren't using letterhead. If your letter is very short, you may want to use bigger side and top margins so that the letter is centered on the page.

Many letters are accompanied by other documents. Whatever these documents may be—a multipage report or a two-line note—they are called **enclosures**, because they are enclosed in the envelope. The writer should refer to the enclosures in the body of the letter: "As you can see from my résumé, . . ." The enclosure line is usually abbreviated: *Encl.* (see Figure 9.3). The abbreviation reminds the person who seals the letter to include the enclosure(s).

Sometimes you write to one person but send copies of your letter to other people. If you want the reader to know that other people are getting copies, list their names on the last page. The abbreviation *cc* originally meant *carbon copy* but now means *computer copy*. Other acceptable abbreviations include *pc* for *photocopy* or simply *c* for *copy*. You can also send copies to other people without telling the reader. Such copies are called **blind copies**. Blind copies are not mentioned on the original; they are listed on the copy saved for the file with the abbreviation *bc* preceding the names of people getting these copies.

You do not need to indicate that you have shown a letter to your superior or that you are saving a copy of the letter for your own files. These are standard practices.

States with names of more than five letters are frequently abbreviated in letters and memos. The U.S. Postal Service abbreviations use two capital letters with no punctuation. See Figure 9.7.

What courtesy titles should I use? LO 9-3

- Use "Ms." unless a woman has a professional title or prefers a traditional title.
Use "Mr." unless a man has a professional title.

Letters require courtesy titles in the salutation *unless* you're on a first-name basis with your reader. Use the first name only if you'd use it in talking to the person on the phone.

August 10, 2013

Ms. Stephanie Voght
Stephen F. Austin High School
1200 Southwest Blvd.
San Antonio, TX 78214

Dear Ms. Voght:

Enclosed are 100 brochures about State University to distribute to your students. The brochures describe the academic programs and financial aid available. When you need additional brochures, just let me know.

Videotape about State University

You may also want to show your students the videotape "Life at State University." This 45-

<p>Plain paper for page 2.</p> <p style="text-align: center;">$\frac{1}{2}^{\prime\prime}$ - 1"</p> <p style="text-align: center;">Center</p> <p>Stephanie Voght Reader's name</p>	<p>2</p> <p>Also OK to line up page number, date at left under reader's name.</p>	<p>August 10, 2013</p>
--	---	------------------------

campus life, including football and basketball games, fraternities and sororities, clubs and organizations, and opportunities for volunteer work. The tape stresses the diversity of the student body and the very different lifestyles that are available at State.

Triple space before each new heading.

Scheduling the Videotape *Bold headings.*

To schedule your free showing, just fill out the enclosed card with your first, second, and third choices for dates, and return it in the stamped, self-addressed envelope. Dates are reserved in the order that requests arrive. Send in your request early to increase the chances of getting the date you want.

"Life at State University" will be on its way to give your high school students a preview of the college experience.

Sincerely,

Michael L. Mahler

Though written for internal audiences, memos can go public—with stunning consequences. A July 6, 2009, memo was among 75,000 pages of documents Congressional investigators scrutinized while investigating Toyota Motor Corporation's recall of cars. At heart were statements that suggested company officials had saved more than \$100 million by replacing floor mats rather than issuing a more extensive safety recall.

Source: David Shepardson, "Toyota Disavows Memo Bragging of Savings by Limiting Recall," *The Detroit News*, February 24, 2010, downloaded from <http://www.detnews.com/article/20100224/AUTO01/2240435/1361/Toyota-disavows-memo-bragging-of-savings-by-limiting-recall>.

Site to See

Go to
www.usps.gov/zip4/welcome.htm

If you know the address, the U.S. Post Office page will give you the ZIP + 4 code.

Cathy Arnst warns against resorting to a flurry of correspondence in the workplace for no reason, especially in tough economic times. Among other questionable practices is a memo at *The South Bend Tribune* instructing staff to write daily “productivity” memos detailing all of their actions.

Source: Cathy Arnst, “Memo Madness, or, Does Busy Work Increase Productivity?” *Bloomberg Businessweek*, February 2, 2010, downloaded from http://www.businessweek.com/careers/workingparents/blog/archives/2009/02/memo_madness_or.html.

Sometimes the contents of a memo or letter can come back to haunt the writer. Walmart Mike Duke sent employees a memo extolling the company’s “strong anti-corruption” programs, even while the company faced allegations of paying \$24 million in bribes to Mexican officials since 2005. Real estate tycoon Tom Barrack may still regret his 1,700-word letter to employees celebrating the important life lessons to be learned from the *Twilight* book series, which he discovered one night while yachting in Turkey.

Sources: Diane Brady, “Wal-Mart, Avon Execs Should Stop Hiding Behind Boards,” *Bloomberg BusinessWeek*, April 25, 2012, <http://www.businessweek.com/articles/2012-04-25/wal-mart-avonexecs-should-stop-hiding-behind-boards>; and Anton Troianovski, “Twilight Memo: Tom Barrack’s Most Embarrassing Moment,” *The Wall Street Journal*, <http://blogs.wsj.com/developments/2010/11/29/twilight-memo-tom-barracks-most-embarrassing-moment>.

When You Know the Reader’s Name and Gender

When you know your reader’s name and gender, use courtesy titles that do not indicate marital status: *Mr.* for men and *Ms.* for women. There are, however, two exceptions:

1. Use professional titles when they’re relevant.

Dr. Kristen Sorenson is our new company physician.

The Rev. Robert Townsley gave the invocation.

2. If a woman prefers to be addressed as *Mrs.* or *Miss*, use the title she prefers rather than *Ms.* (You-attitude [◀◀ p. 90] takes precedence over nonsexist language: address the reader as she—or he—prefers to be addressed.)

To find out if a woman prefers a traditional title,

- a. Check the signature block in previous correspondence. If a woman types her name as *(Miss) Elaine Anderson* or *(Mrs.) Kay Royster*, use the title she designates.
- b. Notice the title a woman uses in introducing herself on the phone. If she says, “This is Robin Stine,” use *Ms.* when you write to her. If she says, “I’m Mrs. Stine,” use the title she specifies.
- c. Check your company directory. In some organizations, women who prefer traditional titles can list them with their names.
- d. When you’re writing job letters or other crucial correspondence, call the company and ask the receptionist which title your reader prefers.

Ms. is particularly useful when you do not know what a woman’s marital status is. However, even when you happen to know that a woman is married or single, **you still use *Ms.* unless you know that she prefers another title.**

In addition to using parallel courtesy titles, use parallel forms for names.

Not parallel

Members of the committee will be
Mr. Jones, Mr. Yacone, and Lisa.

Parallel

Members of the committee will be
Mr. Jones, Mr. Yacone, and Ms. Melton.

or

Members of the committee will be
Irving, Ted, and Lisa.

When You Know the Reader’s Name but Not the Gender

When you know your reader’s name but not the gender, either

1. Call the company and ask the receptionist, or
2. Use the reader’s full name in the salutation:

Dear Chris Crowell:

Dear J. C. Meath:

When You Know Neither the Reader’s Name Nor Gender

When you know neither the reader’s name nor gender, you have three options:

1. Use the reader’s position or job title:

Dear Loan Officer:

Dear Registrar:

2. Use a general group to which your reader belongs:

Dear Investor:

Dear Admissions Committee:

3. Omit the salutation and use a subject line in its place:

Subject: Recommendation for Ben Wandell

When Brad Garlinghouse, a senior vice president at Yahoo .com, wrote a lengthy message about the company's need to reorganize, he used boldface, bullet points, and metaphors to make complex ideas easier to follow. His *Peanut Butter Manifesto*, so-called because of his description of spreading resources too thin, ends with three one-line paragraphs:

So, let's get back up.

Catch the balls.

And stop eating peanut butter.

Source: "Yahoo Memo: The 'Peanut Butter Manifesto,'" *The Wall Street Journal*, November 18, 2006, downloaded at http://online.wsj.com/public/article/SB116379821933826657-0mbjXoHnQwDMFH_PVeb_jqe3Chk_20061125.html.

How should I set up memos? LO 9-4

- *The standard memo format mimics block format but has no salutation, close, or signature.*

Memos omit both the salutation and the close. Memos never indent paragraphs. Subject lines are required; headings are optional. Each heading must cover all the information until the next heading. Never use a separate heading for the first paragraph.

Figure 9.8 illustrates the standard memo format typed on a plain sheet of paper. Note that the first letters of the reader's name, the writer's name, and the subject phrase are lined up vertically. Note also that memos are usually initialed by the To/From block. Initialing tells the reader that you have proofread the memo and prevents someone's sending out your name on a memo you did not in fact write.

Some organizations have special letterhead for memos. When *Date/To/From/Subject* are already printed on the form, the date, writer's and reader's names, and subject may be set at the main margin to save typing time. (See Figure 9.9.)

Some organizations alter the order of items in the *Date/To/From/Subject* block. Some organizations ask employees to sign memos rather than simply initialing them. The signature goes below the last line of the memo, starting halfway over on the page, and prevents anyone adding unauthorized information.

If the memo runs two pages or more, use a heading at the top of the second and subsequent pages (see Figure 9.10). Because many of your memos go to the same people, putting a brief version of the subject line will be more helpful than just using "All Employees."

Subject: A Low-Cost Way to Reduce Energy Use *Capitalize first letter of each major word in subject line.*

2 - 4 spaces *Line up* *Double-space* *1" - 1 1/2"* *No heading for ¶¶* *5 3/8" - 1"*

As you requested, I've investigated low-cost ways to reduce our energy use. Reducing the building temperature on weekends is a change that we could make immediately, that would cost nothing, and that would cut our energy use by about 6%.

Triple-space before each new heading.

The Energy Savings from a Lower Weekend Temperature *Bold headings.*

Single-space paragraphs; double-space between paragraphs.

Lowering the temperature from 68° to 60° from 8 p.m. Friday evening to 4 a.m. Monday morning could cut our total consumption by 6%. It is not feasible to lower the temperature on weeknights because a great many staff members work late; the cleaning crew also is on duty from 6 p.m. to midnight. Turning the temperature down for only four hours would not result in a significant heat saving.

Turning the heat back up at 4 a.m. will allow the building temperature to be back to 68° by 9 a.m. Our furnace already has computerized controls which can be set to automatically lower and raise the temperature.

Triple-space *Capitalize first letter of each major word of heading.*

How a Lower Temperature Would Affect Employees

A survey of employees shows that only 14 people use the building every weekend or almost every weekend. Eighteen percent of our staff have worked at least one weekend day in the last two months; 52% say they "occasionally" come in on weekends.

Do not indent paragraphs.

People who come in for an hour or less on weekends could cope with the lower temperature just by wearing warm clothes. However, most people would find 60° too cool for extended work. Employees who work regularly on weekends might want to install space heaters.

Action Needed to Implement the Change

Would you also like me to check into the cost of buying a dozen portable space heaters? Providing them would allow us to choose units that our wiring can handle and would be a nice gesture toward employees who give up their weekends to work. I could have a report to you in two weeks.

We can begin saving energy immediately. Just authorize the lower temperature, and I'll see that the controls are reset for this weekend.

Memos are initialed by To/From/Subject block — no signature

Headings are optional in memos.

Figure 9.9 Memo Format (on memo letterhead; good news)

**Kimball,
Walls, and
Morganstern**

Date: March 15, 2013 *Line up horizontally with printed Date/To/From/Subject.*

To: Annette T. Califero

From: Kyle B. Abrams *KBA* *Writer's initials added in ink*

Subject: The Effectiveness of Reducing Building Temperatures on Weekends

Margin lined up with items in To/From/Subject block to save typing time

Triple-space

Reducing the building temperature to 60° on weekends has cut energy use by 4% compared to last year's use from December to February and has saved our firm \$22,000.

This savings is particularly remarkable when you consider that this winter has been colder than last year's, so that more heat would be needed to maintain the same temperature.

Fewer people have worked weekends during the past three months than during the preceding three months, but snow and bad driving conditions may have had more to do with keeping people home than the fear of being cold. Five of the 12 space heaters we bought have been checked out on an average weekend. On one weekend, all 12 were in use and some people shared their offices so that everyone could be in a room with a space heater.

Fully 92% of our employees support the lower temperature. I recommend that we continue turning down the heat on weekends through the remainder of the heating season and that we resume the practice when the heat is turned on next fall.

Heads are optional in memos.

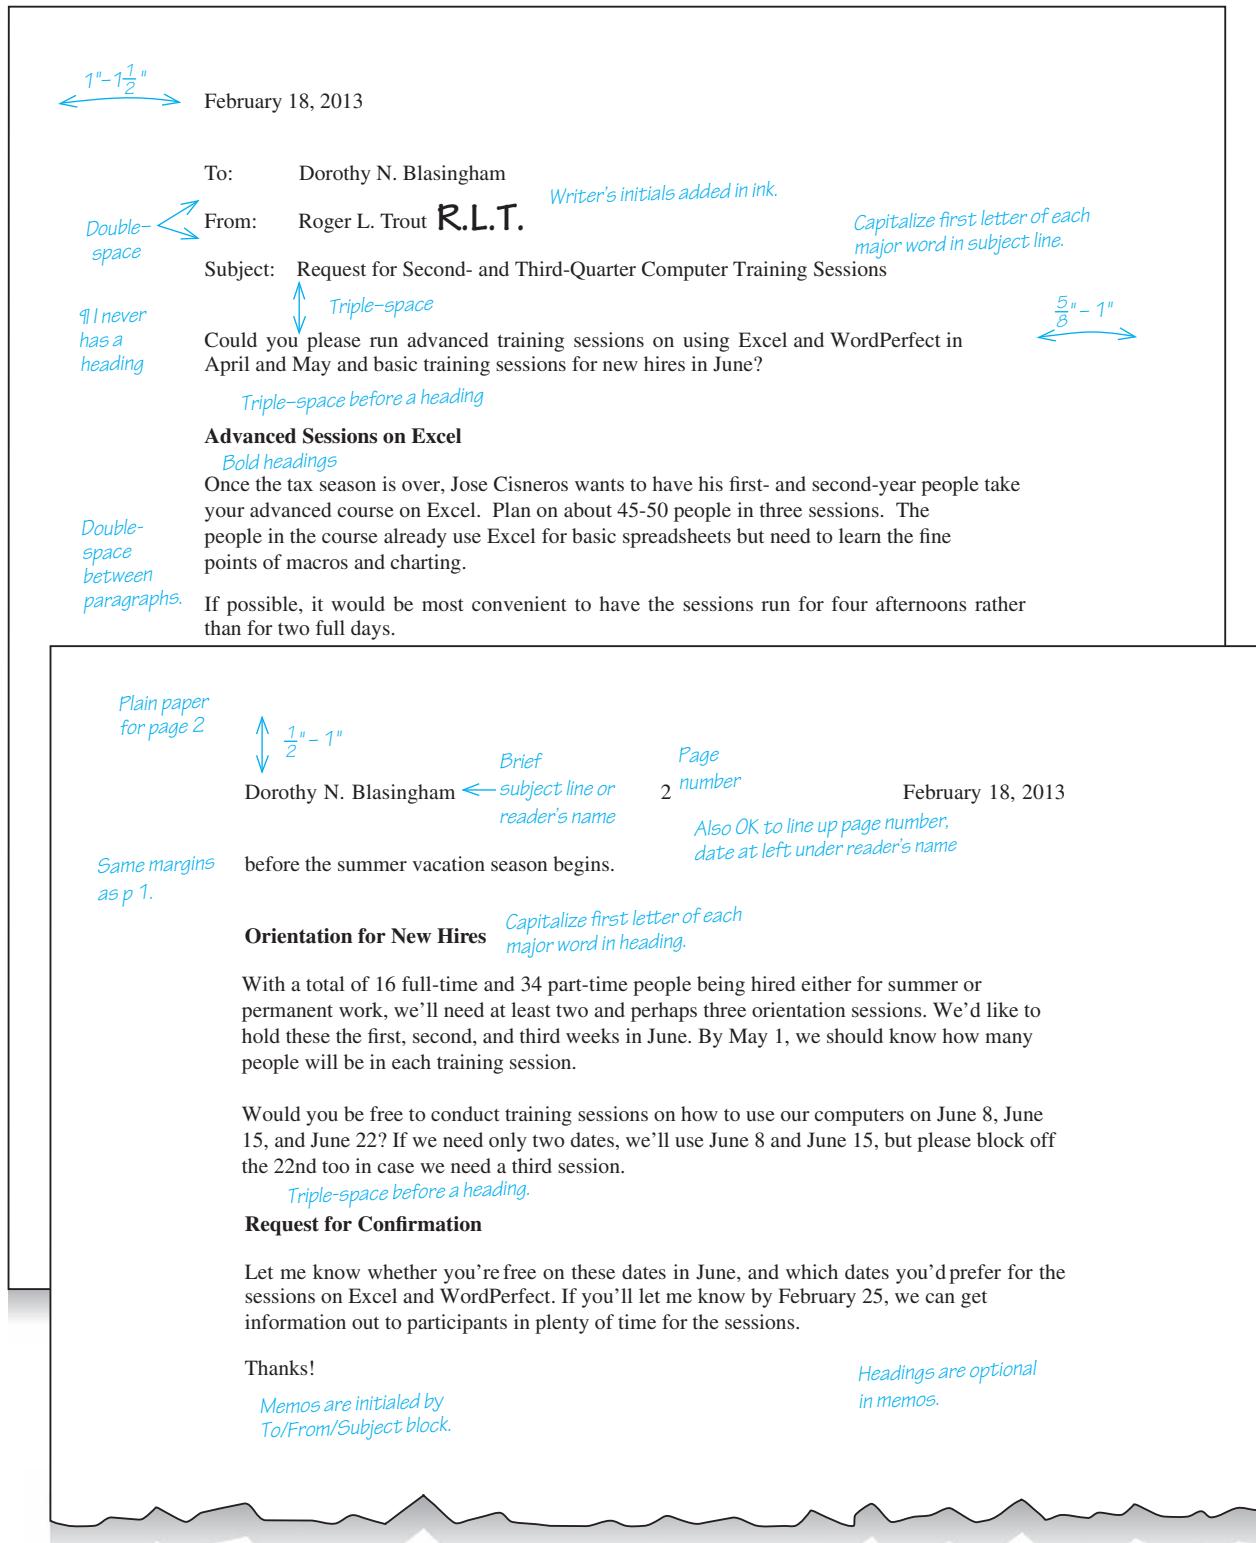

Figure 9.10 Option 2 for Page 2 of a Memo (direct request)

Summary of Learning Objectives

- **Block** and **modified block** are the two standard letter formats. (**LO 9-1**)
- Use the same level of formality in the **salutation**, or greeting, as you would in talking to someone on the phone. (**LO 9-1**)
- *Sincerely* and *Cordially* are standard **complimentary closes**. (**LO 9-1**)
- Just as the way your documents look affects how people respond to you, so does your appearance and behavior. (**LO 9-2**)
 - On casual days, wear clothes in good repair that are one or two “notches” below what you’d wear on other days.
 - Avoid displaying too many photographs, knickknacks, and posters, which can make you seem frivolous.
 - Save computer game playing and personal web surfing and e-mailing for your own time.
 - Organize your desk by filing papers and keeping stacks to a minimum.
- Use *Ms.* as the courtesy title for a woman, unless she has a professional title, or unless she prefers a traditional title. (**LO 9-3**)
- Use *Mr.* as the courtesy title for a man, unless he has a professional title. (**LO 9-3**)
- In a list of several people, use parallel forms for names. Use either courtesy titles and last names for everyone, or use first names for everyone. For example, it’s sexist to use “*Mr.*” for each man in a document that calls all the women by their first names. (**LO 9-3**)
- Memos omit both the salutation and the close. Memos never indent paragraphs. Subject lines are required; headings are optional. Each heading must cover all the information until the next heading. Never use a separate heading for the first paragraph. (**LO 9-4**)

Assignments for Module 9

Questions for Comprehension

- 9.1** What are the differences between mixed and open punctuation? (**LO 9-1**)
- 9.2** What are the differences between block and modified block letter formats? (**LO 9-1**)

Questions for Critical Thinking

- 9.5** Which letter format do you prefer? Why? (**LO 9-1**)
- 9.6** What are the advantages in telling your reader who is getting copies of your message? (**LO 9-1**)

- 9.3** What are the differences between block format for letters and the formats for memos? (**LO 9-1, LO 9-4**)
- 9.4** What is the Postal Service abbreviation for your state or province? (**LO 9-3**)

- 9.7** Does following a standard format show a lack of originality and creativity? (**LO 9-1, LO 9-4**)

Polishing Your Prose

Making Subjects and Verbs Agree

Make sure the subjects and verbs in your sentences agree. Subjects and verbs agree when they are both singular or both plural:

Correct: The **laser printer** no longer **works**.

Correct: The nonworking **laser printers** are in the storeroom.

Often, subject–verb errors occur when other words come between the subject and verb. Learn to correct errors by looking for the subject—who or what is doing the principal action—and the verb—the action itself:

Correct: A **team** of marketing researchers **is** reviewing our promotional campaign.

Correct: The four-color **brochures**, which cost about \$1,000 to print and ship, **were** sent to our St. Louis affiliate.

U.S. usage treats company names and the words *company* and *government* as singular nouns. In England and countries adopting the British system, these nouns are plural:

Correct: **Nationwide Insurance** is

(U.S.) headquartered in Columbus, Ohio.

Correct: **Lloyds of London** are

(U.K.) headquartered in London.

Use a plural verb when two or more singular subjects are joined by *and*.

Correct: Mr. Simmens, Ms. Lopez, and Mr. Yee **were** in Seoul for a meeting last week.

Use a singular verb when two or more singular subjects are joined by *or*, *nor*, or *but*. Follow this rule when using *neither/nor* and *either/or* combinations. However, when one of the subjects is plural, choose the verb based on the subject nearest the verb.

Correct: Neither Crandall nor the Panzinis want to play on the department's softball team this year.

Correct: Either the Panzinis or Crandall needs to help keep score.

Correct: Neither Dr. Hroscoe nor Mr. Jamieson is in today.

When the sentence begins with *There* or *Here*, make the verb agree with the subject that follows the verb:

Correct: There were blank pages in the fax we received.

Correct: Here is the information on the job candidate you requested.

Some words that end in *s* are considered singular and require singular verbs:

Correct: The World Series features advertisements of our product in the stadium.

For some nouns, singular and plural forms can be spelled the same. Examples are *data*, *deer*, and *fish*. Choose a verb based on how you are using the word—singular or plural.

When you encounter situations that don't seem to fit the rule, or when following the rules produces an awkward sentence, rewrite the sentence to avoid the problem:

Problematic: The grant coordinator in addition to the awarding agency (is, are?) happy with the latest proposal we submitted.

Better:

The grant coordinator and the awarding agency are happy with the latest proposal we submitted.

Exercises

Choose the correct verb or rewrite the sentence.

1. My tablet PC's apps [is/are] truly exceptional.
2. What [is/are] Mainwaring, Inc., employees doing to prepare for the one-week plant shutdown?
3. We [makes/make] more profit in one week in Asia than in a whole month in the U.S.
4. Both Colin and Danita [plans/plan] to return to school for an MBA.
5. Either Ashley or Phillip [needs/need] to submit an expense report for the team.
6. While the vice president in addition to her staff [is/are] planning to attend, we have yet to get an actual confirmation.
7. Even though Jill, Marianne, Theodore, and Svetlana [has/have] traveled extensively, they [is/are] still good candidates for intercultural communication training.
8. Neither Li Xiang nor the DuChamps [intends/intend] to purchase stock until they fully understand how market changes [affects/affect] performance.
9. There [is/are] many good reasons to start saving early for retirement. The most obvious [is/are] time [is/are] on your side.
10. My glasses [was/were] broken, so I had to ask people to help me read the fine print; people [was/were] happy to help, but I [expects/expect] now to always have a spare set in the future.

Check your answers to the odd-numbered exercises at the back of the book.

Informative and Positive Messages

LEARNING OBJECTIVES

Module 10 focuses on helping you write effective informative and positive messages. After completing the module, you should be able to

- | | |
|--|--|
| LO 10-1 Create subject lines for informative and positive messages. | LO 10-4 List common kinds of informative and positive messages. |
| LO 10-2 Apply strategies for informative and positive message organization. | LO 10-5 Apply strategies for informative and positive message analysis with PAIBOC. |
| LO 10-3 Identify situations for reader benefits use with informative and positive messages. | LO 10-6 Create goodwill endings for informative and positive messages. |

We categorize messages both by the author's purposes and by the initial response we expect from the reader. In an **informative or positive message**, you expect the audience to respond neutrally to the message or to be pleased. Negatives are minor; they are not the main point of the message. You must convey information but are not asking the audience to do anything. However, you may well want the reader to save the information and act on it later on. You usually do want to build positive attitudes toward the information you are presenting, so in that sense, even an informative message has a persuasive element.

Piper Weiss believes that an out-of-office e-mail reply from Josh Kopelman is the best she's ever seen. The message announces that he is out of the office, of course, but goes on to stress that he and his wife are on vacation and would prefer to be left alone, going so far as to create an e-mail with the moniker "interruptyourvacation@" should anyone want to contact him. The reply preserves goodwill while emphasizing that Kopelman is still available if the need to contact him is important.

Source: Piper Weiss, "The Best Out-of-Office E-Mail Ever Written," September 2, 2011, <http://shine.yahoo.com/channel/life/the-best-out-of-office-email-ever-written-2538155/>.

Informative and positive messages include

- Acceptances.
- Positive answers to reader requests.
- Information about procedures, products, services, or options.
- Announcements of policy changes that are neutral or positive.
- Changes that are to the reader's advantage.

Even a simple informative or good news message usually has several purposes:

Primary Purposes:

- To give information or good news to the reader or to reassure the reader.
- To have the reader read the message, understand it, and view the information positively.
- To deemphasize any negative elements.

Secondary Purposes:

- To build a good image of the writer.
- To build a good image of the writer's organization.
- To cement a good relationship between the writer and reader.
- To reduce or eliminate future correspondence on the same subject so the message doesn't create more work for the writer.

What's the best subject line for an informative or positive message? **LO 10-1**

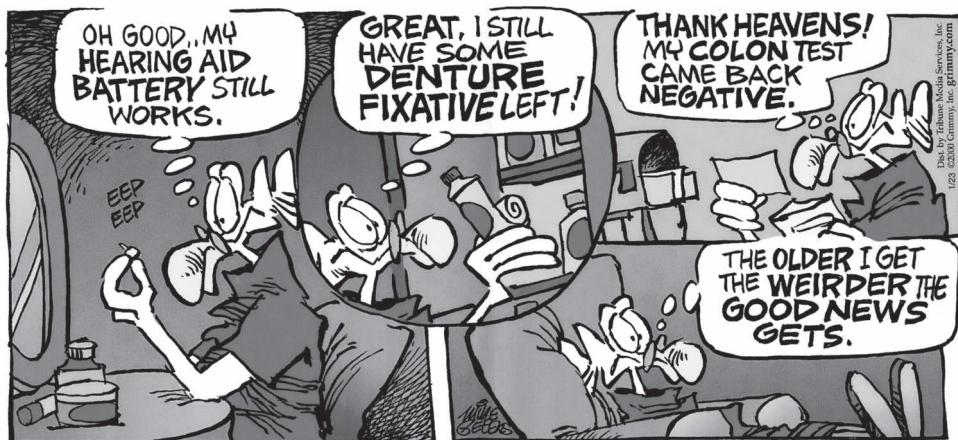

- One that contains the basic information or good news.

A **subject line** is the title of a document. It aids in filing and retrieving the document, tells readers why they need to read the document, and provides a framework in which to set what you're about to say.

Subject lines are standard in memos. Letters are not required to have subject lines (◀◀ Module 9). However, a survey of business people in the Southwest found that 68% of them considered a subject line in a letter to be important, very important, or essential; only 32% considered subject lines to be unimportant or only somewhat important.¹

A good subject line meets three criteria: it is specific, concise, and appropriate to the kind of message (positive, negative, persuasive).

Good news comes in many forms.

MOTHER GOOSE & GRIM © 2010 Grimmy, Inc. Reprinted with permission of King Features Syndicate.

Making Subject Lines Specific

The subject line needs to be specific enough to differentiate that message from others on the same subject, but broad enough to cover everything in the message.

Too general: Training Sessions

To make this general subject line more specific, identify the particular topic of *this* message.

Better: Dates for 2013 Training Sessions

or: Evaluation of Training Sessions on Conducting Interviews

or: Should We Schedule a Short Course on Proposal Writing?

Making Subject Lines Concise

Most subject lines are relatively short—usually no more than 10 words, often only 3 to 7 words.²

Wordy: Survey of Student Preferences in Regards to Various Pizza Factors

Again, the best revision depends on the specific factors you'll discuss.

Better: Students' Pizza Preferences

or: The Feasibility of a Cassano's Branch on Campus

or: What Students Like and Dislike about Cassano's Pizza

If you can't make the subject both specific and short, be specific.

Making Subject Lines Appropriate for the Pattern of Organization

In general, do the same thing in your subject line that you would do in the first paragraph.

When you have good news for the reader, build goodwill by highlighting it in the subject line. When your information is neutral, summarize it concisely for the subject line.

Subject: Discount on Rental Cars Effective January 2

Starting January 2, as an employee of Amalgamated Industries you can get a 15% discount on cars you rent for business or personal use from Roadway Rent-a-Car.

Subject: Update on Arrangements for Videoconference with France

In the last month, we have chosen the participants and developed a tentative agenda for the videoconference with France scheduled for March 21.

A customer escorted out of an Alamo Drafthouse movie theater in Austin, Texas, for violating the chain's no-talking/no-texting policy may have thought she was getting the last laugh when she later left a profanity-laced message on voice mail, but the joke turned out to be on her. The company spliced the rants into a public service announcement now shown before each film to inform rude cell phone users of the policy. Accordingly, the uncensored version is shown only before R-rated films.

Source: Phoebe Connelly, "Texas Movie Theater Makes an Example (and a PSA) of a Texting Audience Member," June 7, 2011, http://news.yahoo.com/s/yblog_thelookout/20110607/us_yblog_thelookout/texas-movie-theater-makes-an-example-and-a-psa-of-a-texting-audience-member.

How should I organize informative and positive messages? **LO 10-2**

► *Put the good news and a summary of the information first.*

The patterns of organization in this module and the modules that follow will work for 70% to 90% of the writing situations most people in business, government, and nonprofit organizations face. Using the appropriate pattern can help you compose more quickly and create a better final product.

Consuming chocolate apparently can change a person's mood—in as little as three minutes, according to one study. The quality of the chocolate affects how well it changes mood, and researchers theorize that the benefits are due to the sensory pleasure of taste and the emotional associations with chocolate rather than impacts on the brain's neurotransmitters.

Source: Susan Albers, "The 3-Minute Effect of Chocolate," *Psychology Today*, October 10, 2011, <http://www.psychologytoday.com/blog/comfort-cravings/201110/the-3-minute-effect-chocolate>.

- Be sure you understand the rationale behind each pattern so that you can modify the pattern if necessary. (For example, if you write instructions, any warnings should go up front, not in the middle of the message.)
- Not every message that uses the basic pattern will have all the elements listed. The elements you do have will go in the order presented in the pattern.
- Sometimes you can present several elements in one paragraph. Sometimes you'll need several paragraphs for just one element.

Present informative and positive messages in the following order:

1. **Give any good news and summarize the main points.** Share good news immediately. Include details such as the date policies begin and the percent of a discount. If the reader has already raised the issue, make it clear you're responding.
 2. **Give details, clarification, background.** Don't repeat information from the first paragraph. Do answer all the questions your reader is likely to have; provide all the information necessary to achieve your purposes. Present details in the order of importance to the reader.
 3. **Present any negative elements—as positively as possible.** A policy may have limits; information may be incomplete; the reader may have to satisfy requirements to get a discount or benefit. Make these negatives clear, but present them as positively as possible.
 4. **Explain any reader benefits.** Most informative memos need reader benefits. Show that the policy or procedure helps readers, not just the company. Give enough detail to make the benefits clear and convincing. In letters, you may want to give benefits of dealing with your company as well as benefits of the product or policy.
- In a good news message, it's often possible to combine a short reader benefit with a goodwill ending in the last paragraph.
5. **Use a goodwill ending: positive, personal, and forward-looking.** Shifting your emphasis away from the message to the specific reader suggests that serving the reader is your real concern.

Figure 10.1 summarizes the pattern. Figures 10.2 and 10.3 illustrate two ways that the basic pattern can be applied. (◀◀ Figures 9.5 and 9.9 also use this pattern.)

The letter in Figure 10.2 authorizes a one-year appointment that the reader and writer have already discussed and describes the organization's priorities. Because the writer knows that the reader wants to accept the job, the letter doesn't need to persuade. The opportunity for the professor to study records that aren't available to the public is an implicit reader benefit; the concern for the reader's needs builds goodwill.

The memo in Figure 10.3 announces a new employee benefit. The first paragraph summarizes the policy. Paragraph 2 gives details. Negative elements are in paragraphs 3 and 4, stated as positively as possible. Paragraphs 5 to 7 give reader benefits and show that everyone—even part-timers who are not eligible for reimbursement—will benefit from the new program.

Fax: 404-555-5270

March 8, 2012

Professor Adrienne Prinz
Department of History
Duke University
Durham, North Carolina 27000

Dear Professor Prinz:

Your appointment as archivist for Interstate Fidelity Insurance has been approved. When you were in Atlanta in December, you said that you could begin work June 1. We'd like you to start then if that date is still good for you.

The Board has outlined the following priorities for your work: Assumes reader's primary interest is the job

1. **Organize and catalogue the archives.** You'll have the basement of the Palmer Building for the archives and can requisition the supplies you need. You'll be able to control heat and humidity; the budget doesn't allow special lighting or security measures.
2. **Prepare materials for a 4-hour training session in October** for senior-level managers. We'd like you to cover how to decide what to send to the archives. If your first four months of research uncover any pragmatic uses for our archives (like Wells Fargo's use of archives to teach managers about past pitfalls), include those in the session.
3. **Write an article each month for the employee newsletter** describing the uses of the archives. When we're cutting costs in other departments, it's important to justify committing funds to start an archive program.
4. **Study the IFI archives to compile** information that (a) can help solve current management problems, (b) could be included in a history of the company, and (c) might be useful to scholars of business history.
5. **Begin work on a corporate history of IFI.** IFI will help you find a publisher and support the book financially. You'll have full control over the content.

Your salary will be \$41,000 for six months; your contract can be renewed twice for a total of 18 months. You're authorized to hire a full-time research assistant for \$19,000 for six months; you'll need to go through the normal personnel request process to request that that money be continued next year. A file clerk will be assigned full-time to your project. You'll report to me. At least for the rest of this calendar year, the budget for the Archives Project will come from my department.

IFI offices are equipped with Pentium computers with Microsoft Office Professional Plus 2010. Is there any software that we should buy for cataloguing or research? Are there any office supplies that we need to have on hand June 1 so that you can work efficiently?

Figure 10.2 A Positive Letter (*Continued*)

Professor Adrienne Prinz
March 8, 2012
Page 2

In the meantime,

1. Please send your written acceptance right away.

2. Let me know if you need any software or supplies.

3. Send me the name, address, and Social Security number of your research assistant by May 1 so that I can process his or her employment papers.

4. If you'd like help finding a house or apartment in Atlanta, let me know. I can give you the name of a real estate agent.

Goodwill ending

On June 1, you'll spend the morning in Personnel. Stop by my office at noon. We'll go out for lunch, and then I'll take you to the office you'll have while you're at IFI.

Welcome to IFI!

Cordially,

Cynthia Yen
Cynthia Yen
Director of Education and Training

When should I use reader benefits in informative and positive messages? **LO 10-3**

► *When you want readers to view your policies and your organization positively.*

Not all informative and positive messages need reader benefits (◀◀ p. 112).

You don't need reader benefits when

- You're presenting factual information only.
- The reader's attitude toward the information doesn't matter.
- Stressing benefits may make the reader sound selfish.
- The benefits are so obvious that to restate them insults the reader's intelligence. (See Figure 10.2.)

You do need reader benefits when

- You are presenting policies.
- You want to shape readers' attitudes toward the information or toward your organization.
- Stressing benefits presents readers' motives positively.
- Some of the benefits may not be obvious to readers.

Messages to customers or potential customers sometimes include a sales paragraph promoting products or services you offer in addition to the product or service that the reader has asked about. Sales promotion in an informative or positive message should be low-key, not "hard sell."

 Instant Replay

Organizing Informative and Positive Messages

1. Give any good news and summarize the main points.
2. Give details, clarification, background.
3. Present any negative elements—as positively as possible.
4. Explain any reader benefits.
5. Use a goodwill ending: positive, personal, and forward-looking.

Figure 10.3 A Positive Memo

March 1, 2013

To: All Chamber Employees and Members of the Chamber Insurance Group

From: Lee Ann Rabe, Vice President for Human Resources *LAR*

Subject: Health Care Benefits for Same-Sex Partners

Good news in subject line and first paragraph

Good news Beginning May 1, same-sex partners of employees covered by the Chamber's Health Plan will be eligible for the same coverage as spouses.

Details In order to have a partner covered, an employee must sign an affidavit in the Human Resources Department stating that the employee and his or her partner (1) live together, (2) intend to stay together, and (3) are responsible for each other. If the relationship ends, employees must notify the Human Resources Department within 30 days, just as do married couples who divorce.

Negatives Costs and coverage of the Chamber's Health Plan remain the same. Dental and vision coverage are also available for a fee; limitations apply and remain the same. For information about the specifics of the Chamber's Health Plan, pick up a brochure in the Human Resources Department.

Negatives Opposite-sex couples must still marry to receive the spousal coverage.

Reader Benefits Extending coverage to same-sex partners of employees shows the Chamber as a progressive, open-minded organization. This in turn portrays Columbus in a positive light.

The new policy will affect not only Chamber employees but also the small businesses that are a part of the Chamber's Health Plan. New businesses may see the change as a reason to join the Chamber—and the Health Plan. Growth in the Health Plan creates a wider base for insurance premiums and helps keep costs as low as possible. Additional Chamber members give us the funds and resources to plan more conferences for members. These conferences, such as the recent "R&D in Ohio's Small Businesses," help Chamber members do business successfully.

Goodwill ending Making the Health Plan more comprehensive keeps us competitive with other major U.S. cities. As we move out of the recession, businesses are carefully considering possible moves. A policy change like this one shows Columbus' continued goodwill toward minorities in general and will make convincing businesses to relocate here that much easier.

Goodwill ending Selling Columbus as a good place to live and do business has never been easier.

Reader benefits are hardest to develop when you are announcing policies. The organization probably decided to adopt the policy because it appeared to help the organization; the people who made the decision may not have thought at all about whether it would help or hurt employees. Yet reader benefits are most essential in this kind of message so readers see the reason for the change and support it.

When you present reader benefits, be sure to present advantages *to the reader*. Most new policies help the organization in some way, but few workers will see their own interests

Sharing information is crucial to business success. To drive home that point, Siemens deposited 60 managers from around the world on the shores of a lake south of Munich, Germany, and told them to build rafts. They weren't allowed to talk: They had to write messages and diagrams on flip charts. Back in the office, ShareNet lets employees around the world ask questions and share answers.

It's unfair to make a negative message sound like a positive one. When Merrick Bank acquired NextCard, a customer claimed he was offered "a favor" that split the \$120 annual fee into \$10 payments. The customer called to point out he didn't have an annual fee, so the customer service representative told him, "You do now." He canceled his \$300-limit credit card. AT&T's Universal Card allegedly offered one customer a 7.9% APR on balance transfers. The problem was her card already had a 7.35% APR. In addition, subprime credit card offers—those to high-risk borrowers—may require careful reading. Premier Bankcard recently offered such customers a credit card with a \$300 limit and a 79.9% APR, all perfectly legal so long as there's disclosure. Said CEO Miles Beacom, "From our initial research we know that 83 percent of the people who accepted the offer are fully aware of the interest rate they are receiving and the purpose of the credit card to help re-establish credit."

Source: Dayana Yochim, "Awful Offers," *The Motley Fool*, downloaded at <http://fool.com/cc/manage/manage05.htm>, September 5, 2005; and Connie Prater, "Issuer of 79.9% Interest Rate Credit Card Defends Its Product," downloaded on February 12, 2010, at <http://finance.yahoo.com/banking-budgeting/article/108839/issuer-of-79.9-interest-rate-credit-card-defends-its-product?mod=bb-creditcards>.

as identical with the organization's. Even if the organization saves money or increases its profits, workers will benefit directly only if they own stock in the company, if they're high up enough to receive bonuses, if the savings enables a failing company to avoid layoffs, or if all of the savings goes directly to employee benefits. In many companies, any money saved will go to executive bonuses, shareholder profits, or research and development.

To develop reader benefits for informative and positive messages, use the steps suggested in Module 8. Be sure to think about **intrinsic benefits** (◀ p. 117) of your policy—that is, benefits that come from the activity or policy itself, apart from any financial benefits. Does a policy improve the eight hours people spend at work?

What are the most common kinds of informative and positive messages? LO 10-4

► *Transmittals, confirmations, summaries, adjustments, and thank-you notes.*

Many messages can be informative, negative, or persuasive depending on what you have to say. A transmittal, for example, can be positive when you're sending glowing sales figures or persuasive when you want the reader to act on the information. A performance appraisal is positive when you evaluate someone who's doing superbly, negative when you want to compile a record to justify firing someone, and persuasive when you want to motivate a satisfactory worker to continue to improve. A collection letter is persuasive; it becomes negative in the last stage when you threaten legal action. Each of these messages is discussed in the module for the pattern it uses most frequently. However, in some cases you will need to use a pattern from a different module.

Transmittals

When you send someone something in an organization, attach a memo or letter of transmittal explaining what you're sending. A transmittal can be as simple as a small yellow Post-it™ note with "FYI" written on it ("For Your Information") or it can be a separate typed document, especially when it transmits a formal document such as a report (► see Module 24).

Organize a memo or letter of transmittal in this order:

1. Tell the reader what you're sending.
2. Summarize the main point(s) of the document.
3. Indicate any special circumstances or information that would help the reader understand the document. Is it a draft? Is it a partial document that will be completed later?
4. Tell the reader what will happen next. Will you do something? Do you want a response? If you do want the reader to act, specify exactly what you want the reader to do and give a deadline.

Frequently, transmittals have important secondary purposes, such as building goodwill and showing readers that you're working on projects they value.

Confirmations

Many informative messages record oral conversations. These messages are generally short and give only the information shared orally; they go to the other party in the conversation. Start the message by indicating that it is a confirmation, not a new message:

As we discussed on the phone today, . . .

As I told you yesterday, . . .

Attached is the meeting schedule we discussed earlier today.

Instant Replay

Use reader benefits when

- You are presenting policies.
- You want to shape readers' attitudes toward the information or toward your organization.
- Stressing benefits presents readers' motives positively.
- Some of the benefits may not be obvious to readers.

Summaries

You may be asked to summarize a conversation, a document, or an outside meeting for colleagues or superiors. (Minutes of an internal meeting are usually more detailed. See Module 18 for advice on writing minutes of meetings.)

In a summary of a conversation for internal use, identify

- The people who were present.
- The topic of discussion.
- Decisions made.
- Who does what next.

To summarize a document

1. Start with the main point.
2. Give supporting evidence and details.
3. Evaluate the document, if your audience asks for evaluation.
4. Identify the actions your organization should take based on the document. Should others in the company read this book? Should someone in the company write a letter to the editor responding to this newspaper article? Should your company try to meet with someone in the organization that the story is about?

Social media like Twitter are letting angry customers complain about the way their complaints are handled. MIT's Michael Schrage recommends companies be more transparent with how they handle both the complaints and the compliments, or, as he puts it, avoiding the Watergate aphorism "The cover-up is worse than the crime." He recommends companies consider proactive solutions, such as posting the top 100 call center transcripts so visitors can see just what happens when someone contacts the company.

Source: Michael Schrage, "A Better Way to Handle Publicly Tweeted Complaints," *Bloomberg Businessweek*, November 21, 2011, <http://www.businessweek.com/management/a-better-way-to-handle-publicly-tweeted-complaints-11212011.html>.

Adjustments and Responses to Complaints

A lot of consumers are angry these days, and organizations should be responding to their complaints. In a recent survey by Customer Care Measurement and Consulting, 45% of the consumers said they had had problems with a product or service in the past year, and more than two-thirds of them were "very" or "extremely" upset about their problem. Most said they told friends or other people about their bad experience. This kind of bad publicity is even riskier in an Internet economy. A business traveler from Seattle was furious when a hotel told him at two o'clock in the morning that his supposedly guaranteed room was already occupied. The traveler had to demand that the reluctant night clerk find him somewhere else to spend the night. Upon his return home, the consultant prepared a PowerPoint presentation about his experience and e-mailed it to some friends. Fortunately for the hotel, he also mailed a copy to the manager. As the humorous presentation was forwarded to more and more readers, the hotel quickly contacted him to solve the problem.³

When you grant a customer's request for an adjusted price, discount, replacement, or other benefit to resolve a complaint, do so in the very first sentence.

Your Visa bill for a night's lodging has been adjusted to \$63. Next month a credit of \$37 will appear on your bill to reimburse you for the extra amount you were originally asked to pay.

Thank-you notes can be written on standard business stationery, using standard formats. But one student noticed that his adviser really liked cats and had pictures of them in her office. So he found a cat card for his thank-you note.

Don't talk about your own process in making the decision. Don't say anything that sounds grudging. Give the reason for the original mistake only if it reflects credit on the company. (In most cases, it doesn't, so the reason should be omitted.)

Thank-You and Congratulatory Notes

Paul S. Gumbinner, president of the executive search firm that bears his name, says that while 60% of job candidates send the company a thank-you note after an interview, interviewers sending like messages is almost unheard of and a missed opportunity to build goodwill. One person who received a thank-you from an interviewer "was blown away by the gesture and called to tell me that she was utterly impressed and how much she wanted to work for this company."

Source: Paul S. Gumbinner, "Companies Should Send Candidates Thank-You Notes, Too," *Advertising Age*, January 20, 2010, from http://adage.com/talentworks/article?article_id=141600.

Sending a **thank-you note** will make people more willing to help you again in the future. Thank-you letters can be short but must be prompt. They need to be specific to sound sincere.

Congratulating someone can cement good feelings between you and the reader and enhance your own visibility. Again, specifics help.

Avoid language that may seem condescending or patronizing. A journalism professor was offended when a former student wrote to congratulate her for a feature article that appeared in a major newspaper. As the professor pointed out, the letter's language implied that the writer had more status than the person being praised. The praiser was "quite impressed," congratulated the professor on reaching a conclusion that the praiser had already reached, and assumed that the professor would have wanted to discuss matters with the praiser. To the reader, "Keep up the good work!" implied that the one cheering her on had been waiting for ages at the finish line.⁴

How can I apply what I've learned in this module? LO 10-5

- Plan your activities and answer the PAIBOC questions.

Before you tackle the assignments for this module, examine the following problem. Figure 4.1 (◀◀ p. 62) lists the activities needed to produce a good message. See how the PAIBOC questions probe the basic points required for a solution. Study the two sample solutions to see what makes one unacceptable and the other one good. Note the recommendations for revision that could make the good solution excellent.⁵ The checklist at the end of the Module in Figure 10.6 can help you evaluate a draft.

Problem

Interstate Fidelity Insurance (IFI) uses computers to handle its payments and billings. There is often a time lag between receiving a payment from a customer and recording it on the computer. Sometimes, while the payment is in line to be processed, the computer sends out additional notices: past-due notices, collection letters, even threats to sue. Customers are frightened or angry and write asking for an explanation. In most cases, if they just waited a little while, the situation would be straightened out. But policyholders are afraid that they'll be without insurance because the company thinks the bill has not been paid.

IFI doesn't have the time to check each individual situation to see if the check did arrive and has been processed. It wants you to write a letter that will persuade customers to wait. If something is wrong and the payment never reached IFI, IFI would send a legal notice to that effect saying that the policy would be canceled by a certain date (which the notice would specify) at least 30 days after the date on the original premium bill. Continuing customers always get this legal notice as a third chance (after the original bill and the past due notice).

Prepare a form letter that can go out to every policyholder who claims to have paid a premium for automobile insurance and resents getting a past-due notice. The letter should reassure readers and build goodwill for IFI.

Site to See

Go to

www.bluemountain.com/

Electronic greeting cards are fun to send and receive; they build goodwill.

Analysis of the Problem

P What are your **purposes** in writing or speaking?

To reassure readers: they're covered for 30 days. To inform them they can assume everything is OK *unless* they receive a second notice. To avoid further correspondence on this subject. To build goodwill for IFI: (a) we don't want to suggest IFI is error-prone or too cheap to hire enough people to do the necessary work; (b) we don't want readers to switch companies; (c) we do want readers to buy from IFI when they're ready for more insurance.

Site to See

Go to

www.planetfeedback.com

To read sample letters praising companies, choose a company or industry and choose Compliment under Feedback Type.

A Who is (are) your **audience(s)**? How do the members of your audience differ from each other? What characteristics are relevant to this particular message?

Automobile insurance customers who say they've paid but have still received a past-due notice. They're afraid they're no longer insured. Because it's a form letter, different readers will have different situations: in some cases payment did arrive late, in some cases the company made a mistake, in some the reader never paid (check lost in mail, unsigned, bounced, etc.).

I What **information** must your message include?

Readers are still insured. We cannot say whether their checks have now been processed (company doesn't want to check individual accounts). Their insurance will be canceled if they do not pay after receiving the second past-due notice (the legal notice).

B What reasons or reader **benefits** can you use to support your position?

Computers help us provide personal service to policyholders. We offer policies to meet all their needs. Both of these points would need specifics to be interesting and convincing.

O What **objections** can you expect your reader(s) to have? What negative elements of your message must you deemphasize or overcome?

Computers appear to cause errors. We don't know if the checks have been processed. We will cancel policies if their checks don't arrive.

C How will the **context** affect the reader's response? Think about your relationship to the reader, morale in the organization, the economy, the time of year, and any special circumstances

The earliest known written appearance of the word "information" occurred in 1387, and in terms of online use, it's the 22nd most common word in the English language.

Source: Jennifer Schuessler, "Too Much Information About 'Information'?" *The New York Times*, March 23, 2011, <http://artsbeat.blogs.nytimes.com/2011/03/23/too-much-information-about-information/>.

Building a Critical Skill

Writing a Goodwill Ending

LO 10-6

Goodwill endings focus on the business relationship you share with your reader. When you write to one person, a good last paragraph fits that person specifically. When you write to someone who represents an organization, the last paragraph can refer to your company's relationship to the reader's organization. When you write to a group (for example, to "All Employees") your ending should apply to the whole group.

Possibilities include complimenting the reader for a job well done, describing a reader benefit, or looking forward to something positive that relates to the subject of the message.

For example, consider possible endings for a letter answering the question, "When a patient leaves the hospital and returns, should we count it as a new stay?" For one company, the answer was that if a patient was gone from the hospital overnight or longer, the hospital should start a new claim when the patient was readmitted.

Weak closing Should you have any questions regarding this paragraph: matter, please feel free to call me.

Goodwill ending:

Many employee-patients appreciate the freedom to leave the hospital for a few hours. It's nice working with a hospital that is flexible enough to offer that option.

Also acceptable:

Omit the paragraph; stop after the explanation.

Some writers end every message with a standard invitation: If you have questions, please do not hesitate to ask.

That sentence lacks positive emphasis (◀◀ p. 102). But saying "feel free to call"—though more positive—is rarely a good idea. Most of the time, the writer should omit the sentence and make the original message clear.

One of the reasons you write is to save the time needed to tell everyone individually. People in business aren't shrinking violets; they will call if they need help. Do make sure your phone number is in the letterhead or is typed below your name. You can also add your e-mail address below your name.

With nearly 25% of the global workforce depressed, the challenge is for employers to find ways to improve the emotional well-being of workers. Happy employees translate into more productive ones. In the U.S. alone, estimates of the costs are as high as \$51 billion annually due to absenteeism and lost productivity from depressed employees.

Sources: Victoria McGrane, "Nearly Quarter of Workers Are Depressed," *The Wall Street Journal*, November 11, 2011, <http://blogs.wsj.com/economics/2011/11/11/nearly-quarter-of-workers-are-depressed/>; and Jhaneel Lockhart, "Employee Depression Costs Workplaces \$51 Billion Annually," *The Business Insider*, January 17, 2012, http://articles.businessinsider.com/2012-01-17/strategy/30634551_1-depression-productivity-absenteeism.

The insurance business is highly competitive—other companies offer similar rates and policies. The customer could get a similar policy for about the same money from someone else. Most people find that money is tight, so they'll want to keep insurance costs low. On the other hand, the fact that prices are steady or rising means that the value of what they own is higher—they need insurance more than ever.

Many insurance companies are refusing to renew policies (car, liability, malpractice insurance). These refusals to renew have gotten lots of publicity, and many people have heard horror stories about companies and individuals whose insurance has been canceled or not renewed after a small number of claims. Readers don't feel very kindly toward insurance companies.

People need car insurance. If they have an accident and aren't covered, they not only have to bear the costs of that accident alone but also (depending on state law) may need to place as much as \$50,000 in a state escrow account to cover future accidents. They have a legitimate worry.

Discussion of the Sample Solutions

The solution in Figure 10.4 is unacceptable. The red marginal comments show problem spots. Because this is a form letter, we cannot tell customers we have their checks; in some cases, we may not. The letter is far too negative. The explanation in paragraph 2 makes IFI look irresponsible and uncaring. Paragraph 3 is far too negative. Paragraph 4 is too vague; there are no reader benefits; the ending sounds selfish.

A major weakness with the solution is that it lifts phrases straight out of the problem; the writer does not seem to have thought about the problem or about the words he or she is using. Measuring the draft against the answers to the questions for analysis suggests that this writer should start over.

The solution in Figure 10.5 is much better. The blue marginal comments show the letter's strong points. The message opens with the good news that is true for all readers. (Whenever possible, one should use the good news pattern of organization.) Paragraph 2

Figure 10.4 An Unacceptable Solution to the Sample Problem

Need date

Dear Customer:

Relax. We got your check.

This explanation makes company look bad.

*Not necessarily true.
Reread problem.*

There is always a time lag between the time payments come in and the time they are processed. While payments are waiting to be processed, the computer with super-human quickness is sending out past-due notices and threats of cancellation.

Too negative

Cancellation is not something you should worry about. No policy would be canceled without a legal notice to that effect giving a specific date for cancellation which would be at least 30 days after the date on the original premium notice.

If you want to buy more insurance, just contact your local Interstate Fidelity agent. We will be happy to help you.

Sincerely,

Need to present this positively

This paragraph isn't specific enough to work as a reader benefit. It lacks you-attitude and positive emphasis.

Figure 10.5 A Good Solution to the Sample Problem

Need date

Dear Customer:

Better: use computer to personalize. Put in name and address of a specific reader.

Your auto insurance is still in effect.

Good ¶ 1. True for all readers

Past-due notices are mailed out if the payment has not been processed within three days after the due date. This may happen if a check is delayed in the mail or arrives without a signature or account number. When your check arrives with all the necessary information, it is promptly credited to your account. *Good you-attitude*

Good to treat notice as information, tell reader what to do if it arrives

Even if a check is lost in the mail and never reaches us, you still have a 30-day grace period. If you do get a second notice, you'll know that we still have not received your check. To keep your insurance in force, just stop payment on the first check and send a second one.

Benefits of using computers

Computer processing of your account guarantees that you get any discounts you're eligible for: multicar, accident-free record, good student. If you have a claim, your agent uses computer tracking to find matching parts quickly, whatever car you drive. You get a check quickly—usually within three working days—without having to visit dealer after dealer for time-consuming estimates. *Better to put in agent's name, phone number*

Too negative

Today, your home and possessions are worth more than ever. You can protect them with Interstate Fidelity's homeowners' and renters' policies. Let your local agent show you how easy it is to give yourself full protection. If you need a special rider to insure a personal computer, a coin or gun collection, or a fine antique, you can get that from IFI, too. *Good specifics*

Need to add benefits of insuring with IFI

Whatever your insurance needs—auto, home, life, or health—one call to IFI can do it all. *Acceptable ending*

Sincerely,

explains IFI's policy. It avoids assigning blame and ends on a positive note. The negative information is buried in paragraph 3 and is presented positively: The notice is information, not a threat; the 30-day extension is a "grace period." Telling the reader now what to do if a second notice arrives eliminates the need for a second exchange of letters. Paragraph 4 offers benefits for using computers, since some readers may blame the notice on computers, and offers benefits for being insured by IFI. Paragraph 5 promotes other policies the company sells and prepares for the last paragraph.

As the red comments indicate, this good solution could be improved by personalizing the salutation and by including the name and number of the local agent. Computers could make both of these insertions easily. This good letter could be made excellent by revising paragraph 4 so that it doesn't end on a negative note, and by using more reader benefits. For instance, do computers help agents advise clients of the best policies for them? Does IFI offer good service—quick, friendly, nonpressured—that could be stressed? Are agents well trained? All of these might yield ideas for additional reader benefits.

Figure 10.6

**Checklist
for**

Informative and Positive Messages

- Does the subject line give the good news? Is the subject line specific enough to differentiate this message from others on the same subject?
- Does the first paragraph summarize the information or good news? If the information is too complex to fit into a single paragraph, does the paragraph list the basic parts of the policy or information in the order in which the memo discusses them?
- Is all the information given in the message? (What information is needed will vary depending on the message, but information about dates, places, times, and anything related to money usually needs to be included. When in doubt, ask!)
- In messages announcing policies, is there at least one reader benefit for each segment of the audience? Are all reader benefits ones that seem likely to occur in this organization?
- Is each reader benefit developed, showing that the benefit will come from the policy and why the benefit matters to this organization? Do the benefits build on the job duties of people in this organization and the specific circumstances of the organization?
- Does the message end with a positive paragraph—preferably one that is specific to the readers, not a general one that could fit any organization or policy?

And, for all messages, not just informative and positive ones,

- Does the message use you-attitude and positive emphasis?
- Is the style easy to read and friendly?
- Is the visual design of the message inviting?
- Is the format correct?
- Does the message use standard grammar? Is it free from typos?

Originality in a positive or informative message may come from

- Creating good headings, lists, and visual impact.
- Developing reader benefits.
- Thinking about readers and giving details that answer their questions and make it easier for them to understand and follow the policy.

Summary of Learning Objectives

- A **subject line** is the title of a document. A good subject line meets three criteria: it's specific; it's reasonably short; and it's adapted to the kind of message (positive, negative, persuasive). If you can't make the subject both specific and short, be specific. (**LO 10-1**)
- The subject line for an informative or positive message should highlight any good news and summarize the information concisely. (**LO 10-1**)
- Informative and positive messages normally use the following pattern of organization: (**LO 10-2**)
 1. Give any good news and summarize the main points.
 2. Give details, clarification, background.
 3. Present any negative elements as positively as possible.
 4. Explain any reader benefits.
 5. Use a goodwill ending: positive, personal, and forward-looking.
- Use reader benefits in informative and positive messages when (**LO 10-3**)
 - You are presenting policies.
 - You want to shape readers' attitudes toward the information or toward your organization.
 - Stressing benefits presents readers' motives positively.
 - Some of the benefits may not be obvious to readers.
- Transmittals, confirmations, summaries, adjustments, and thank-you notes are common types of informative and positive messages. (**LO 10-4**)
- Use the PAIBOC questions listed in Module 1 to examine the basic points needed for successful informative and positive messages. (**LO 10-5**)
- **Goodwill endings** focus on the business relationship you share with your reader. (**LO 10-6**)
 - To create a goodwill ending, (**LO 10-6**)
 - Compliment the reader for a job well done.
 - Describe a reader benefit.
 - Look forward to something positive that relates to the message.

Assignments for Module 10

Questions for Comprehension

- 10.1** What are the three criteria for good subject lines? (**LO 10-1**)
10.2 How should you organize a positive or informative message? (**LO 10-2**)

Questions for Critical Thinking

- 10.4** What's wrong with the subject line "New Policy"? (**LO 10-1**)
10.5 Is it unethical to "bury" any negative elements in an otherwise positive or informative message? (**LO 10-2**)

Exercises and Problems

10.8 Revising a Positive Message (LO 10-1 to LO 10-6)

As director of purchasing for City College, you maintain a list of approved vendors who must comply with all local, state, and federal laws. You buy only from approved vendors.

You are now responding to a request from Amelia Kemp that her printing company be reinstated on the list. The company was suspended a month ago for paying less than the minimum wage, but she didn't own the business then. A subordinate has prepared this draft for your signature.

- 10.3** How do varieties of informative and positive messages adapt the basic pattern? (**LO 10-4**)

- 10.6** Why is it important to recognize the secondary as well as the primary purposes of your message? (**LO 10-2, LO 10-4**)
10.7 Are you more likely to need reader benefits in informative letters or memos? Why? (**LO 10-3**)

You know that this is a terrible letter. Both organization and style can be much better.

As Your Instructor Directs,

- a. Identify the draft's problems in organization, style, your attitude, and positive emphasis.
- b. Write a new letter to replace this draft.

Dear Ms. Kemp:

This is in response to your letter of last week appealing your suspension as a printing vendor for City College because of non-compliance with the prevailing wage requirement.

I have had both our administrative and legal staff review the circumstances surrounding the suspension, and they have recommended that it be reduced to 30 days. Their recommendation is based strongly on the fact that you were not the owner of the business when the violation occurred which resulted in your suspension. In addition, your letter of last week promised that you will be in compliance for all future jobs printed for City College.

Since the letter informing you of the suspension was dated 33 days ago, this means that you are immediately reinstated as an approved vendor. My office, however, reserves the right to review future jobs performed by your company to ensure that you comply with the wage requirements and other requirements.

If you have any questions or concerns about this action, please feel free to contact me.

10.9 Announcing a New Policy of Compensatory Time Off (LO 10-1 to LO 10-6)

Most of the workers in your office are salaried, so they do not receive overtime pay when they work after 5 PM. However, the Executive Committee last week decided to institute a policy of compensatory time off. Under this policy, if someone works 2 or more hours more than the basic 40-hour workweek, he or she can take off the same number of hours on another day while still being paid the full rate.

The employee's supervisor must approve the time chosen for compensatory time off; an employee cannot take time off if he or she is needed for an important project. This policy is effective starting the first full week of next month. It is not retroactive; that is, people will not receive compensatory time off for additional hours they may have already worked.

Write a message to all employees announcing the policy.

10.10 Accepting Suggestions (LO 10-1 to LO 10-6)

Your city government encourages money-saving suggestions to help balance the city budget. The suggestion committee, which you chair, has voted to adopt five suggestions.

1. Direct deposit paychecks to save distribution and printing costs. Suggested by Park Kim Lee, in Recreation and Parks.
2. Buy supplies in bulk. Suggested by Jolene Zigmund, in Maintenance.
3. Charge nearby towns and suburbs a fee for sending their firefighters through the city fire academy. Suggested by Charles Boxell, in Fire Safety.
4. Ask employees to reimburse the city for personal photocopies or phone calls. Suggested by Maria Echeverria, in Police.

5. Install lock boxes so that meter readers don't have to turn off water valves when people move. This causes wear and tear, and broken valves must be dug up and replaced. Suggested by Travis Gratton, in Water Line Maintenance.

Each suggester gets \$100. The Accounting Department will cut checks the first of next month; checks should reach people in interoffice mail a few days later.

As Your Instructor Directs,

- a. Write to one of the suggesters, giving the good news.
- b. Write to all employees, announcing the award winners.

10.11 Giving Good News (LO 10-1 to LO 10-6)

Write to a customer or client, to a vendor or supplier, or to your boss announcing good news. Possibilities include a

product improvement, a price cut or special, an addition to your management team, a new contract, and so forth.

10.12 Agreeing to Waive a Fee (LO 10-1 to LO 10-6)

You're a customer service representative for a major credit card company. Last week, Naomi Neyens called asking that you waive the annual fee on her account. "I'm getting offers from other companies with no annual fee. I'd like to keep my account, but only if you waive the fee for the life

of the account." You agreed to do as she asked, effective immediately. Now, you need to write a letter confirming the conversation.

Write to Ms. Neyens, specifying her 16-digit account number.

10.13 Reminding Employees of the Company Web Use Policy (LO 10-1 to LO 10-6)

Recently, a longtime employee was terminated for accessing adult websites on a company computer. Though the employee claimed that while doing a job-related web search several adult ads popped up, records show the site addresses were actually keyed in. The employee was also logged into the computer in question at the time.

tasks relevant to company business, and employees are to use the company e-mail system for company business only. If an employee receives a personal e-mail message through the company system, he or she should forward it to a personal e-mail system and open it elsewhere while "off the clock."

This was the third time the employee was found to be using the web inappropriately. He was given a written warning both previous times.

The company reserves the right to monitor employee web and e-mail use on a company computer at any time. Finally, employees who violate the policy are subject to disciplinary action, up to and including termination.

Now is the time to remind employees of the company's policy on using the web. For starters, web use is limited to

Write an e-mail message reminding employees of the policy.

10.14 Announcing an Additional Employee Benefit (LO 10-1 to LO 10-6)

To help employees who are caring for elderly relatives, your Human Resources office will provide information and referral services for elder day care and long-term assisted-living or nursing care and names and addresses of people willing to work part- or full-time as caregivers. In addition, you will sponsor seminars on a number of topics about dealing with elderly parents, ranging from deciding whether to use a nursing facility, when to stop driving, and how to fill out medical forms.

As part of the new policy, the organization will allow employees to use personal time off and sick time to care for any family member. You will also allow employees to take time off during the workday to stay until a nurse arrives or to drive a parent to a doctor's appointment. Employees must notify their supervisors in advance that they will be away and must make up the time sometime during the next 30 days. Employees who need more time can take unpaid leaves of up to 15 months and can return to their present jobs and current salaries.

The policy takes effect the first of next month.

Assume that you're Director of Human Resources, and write a memo to all employees announcing the benefit.

Hints:

- Pick a business, government, or nonprofit organization you know well.
- What age groups do employees represent? How many of them are caring for elderly parents now?

10.15 Answering a Customer Complaint about Shipping and Handling Costs (LO 10-1 to LO 10-6)

You receive the following letter today:

Recently, I telephoned to order a bookcase from your catalogue. The price was \$143, plus shipping and handling. Because the catalogue said to inquire about the shipping and handling cost, I asked the customer service representative how much that might be. I was expecting \$25. Imagine my shock when the representative said \$178!

I pointed out the shipping and handling cost was more than the actual bookcase, and he replied, "Well, that's the standard rate. Take it or leave it." I couldn't believe my ears. When I asked to speak to a manager, he said she was out. Then, he hung up.

I don't know what is the bigger outrage—the shipping and handling cost or his rude behavior. I order regularly through catalogues and websites, and I've never found shipping and handling to be more than the actual item. How is it that others can ship for more reasonable rates than you can?

This all smacks of unethical business practices, and I have a good mind to report you to the State's Attorney General's Office.

Sincerely,

Carla Biedler

Your company's shipping rates are a frequent sore spot with customers. What they don't understand is that shipping prices are determined by the carrier, an overland trucking company that charges higher rates because it has an impeccable record for delivering packages on time and intact.

Since switching to that carrier, returns for your company on damaged goods have dropped more than 90%. The carrier charges a rate based on size and weight. The bookcase is oversized and weighs 145 pounds, making it expensive to ship.

In addition, your company uses premium crating and packing materials to protect all products. Preparing items for shipment takes longer than simply putting an address label on a box, so handling charges are more than some vendors might charge. However, there is no markup on the handling charges.

You'll investigate which of your 38 customer service representatives might have spoken rudely to Ms. Biedler, but because your company doesn't record conversations, identifying him may be impossible.

Write a response to Ms. Biedler explaining the situation.

10.16 Informing Employees that Flu Shots Are Available (LO 10-1 to LO 10-6)

To give an additional benefit and to help inoculate employees against an illness that affects their attendance, your organization is providing flu shots to all employees at your central office. The flu shots will be administered on two days: October 1 and October 15, from 8 AM to 4 PM. The cost is \$10 for employees in the organization's HMO program and \$15 for employees in the organization's PPO program. Employees covered by another insurance provider cannot participate.

Employees at satellite locations and within driving distance can still participate, but they may need to take personal leave for the travel time to and from the central office.

People who receive the flu shot generally avoid getting the flu for an entire season, but there may be some discomfort and swelling in the arm muscle where the injection occurs.

To participate, employees must contact your Human Resources Office at ext. 2173 and schedule an appointment. Employees must also fill out a questionnaire regarding any recent health problems and sign a waiver against liability to the organization. The flu shots will be administered by a registered nurse, and participants will receive a free health screening from a nurse practitioner. Write a message to your employees informing them of the additional benefit.

10.17 Announcing an Employee Fitness Center (LO 10-1 to LO 10-6)

Your company is ready to open an employee fitness center with on-site aerobics classes, swimming pool, and weight machines. The center will be open 6 AM to 10 PM daily; a qualified instructor will be on duty at all times. Employees get first preference; if there is extra room, spouses and children may also use the facilities. Locker rooms and showers will be available.

Your company hopes that the fitness center will help out-of-shape employees get the exercise they need to be more productive. Other companies have gained as many as 762 workdays from shorter hospital stays by fitness center members. People who exercise have medical bills that are 35% lower than people who do not get enough exercise.

Write the memo announcing the center.

Hints:

- Who pays the medical insurance for employees? If the employer pays, then savings from healthier employees will pay for the center. If another payment plan is in

effect, you'll need a different explanation for the company's decision to open the fitness center.

- Stress those benefits apart from the company's saving money. How can easier access to exercise help employees? What do they do? How can exercise reduce stress, improve strength, and increase their productivity at work?
- What kind of record does the company have of helping employees be healthy? Is the fitness center a new departure for the company, or does the company have a history of company sports teams, stop-smoking clinics, and the like?
- What is the company's competitive position? If the company is struggling, you'll need to convince readers that the fitness center is a good use of scarce funds. If the company is doing well, show how having fit employees can make people even more productive.
- Stress fun as a benefit. How can access to the center make employees' lives more enjoyable?

10.18 Confirming a Reservation (LO 10-1 to LO 10-6)

Most travelers phone 13 months in advance to reserve rooms at Signal Mountain Lodge in Grand Teton National Park. Once you process the credit card (payment for the first night), you write to confirm the reservation.

The confirmation contains the amount charged to the credit card, the date on which the reservation was made, the confirmation number, the kind of room (Lakefront Retreat or Mountainview Retreat), and the dates the guest will be arriving and leaving.

The amount of the deposit and the amount quoted per night is the rate for the current calendar year. However, the guest will be charged the rate for the calendar year of the stay, which is likely to increase about 4% to 5%. In addition to paying the new rate for each additional night, the guest will need to pay the difference between the amount of the deposit and the new rate for the first night.

Anyone who wants a refund must cancel the reservation in writing four days prior to the scheduled arrival date. Cancellations may be faxed: The fax number is on the letterhead; the letter will be printed on.

Parking is limited. People who bring big motorhomes, boats, or camp trailers may have to park in the main parking area rather than right by their cabins.

All of the rooms are cabin style with three to four rooms in each building. There are no rooms in a main lodge. People will need to walk from their cabins to the restaurants, unless they do their own cooking.

Both Lakefront and Mountainview Retreats have kitchenettes with microwaves, but guests must bring their own cooking utensils, dishes, supplies, and food. The bedroom area (with a king-size bed in the Lakefront Retreats and a queen-size bed in the Mountainview Retreats) has a sliding divider that can separate it from the sitting area, which has a sofa bed.

Since the deposit pays for the first night (less any increase in room rate), the room will be held regardless of the time of arrival. Check-in time is 3 PM; earlier room availability cannot be guaranteed. Check-out time is 11 AM.

All cabins are nonsmoking. Smoking is permitted on the decks of the Lakefront Retreats or the porches of the Mountainview Retreats.

The guest should present the confirmation letter when checking in.

As Your Instructor Directs,

- a. Write a form letter that can be used for one type of room (either Lakefront or Mountainview Retreat). Indicate with square brackets material that would need to be filled in for each guest (e.g., "arriving [date of arrival] and departing [date of departure]").
- b. Write a letter to Stephanie Simpson, who has reserved a Lakefront Retreat room arriving September 18 and departing September 20. Her credit card is being billed for \$183.75 (\$175 plus tax—the current rate). Her address is 3122 Ellis Street, Stevens Point, WI 54481.

10.19 Lining Up a Consultant to Improve Teamwork (LO 10-1 to LO 10-6)

As director of education and training, you oversee all in-house training programs. Five weeks ago, Pat Dyrud, Vice President for Human Resources, asked you to set up a training course on teams. You tracked down Sarah Reed, a Business Communication professor at a nearby college.

"Yes, I do workshops on teamwork," she told you on the phone. "I would want at least a day and a half with

participants—two full days would be better. They need time to practice the skills they'll be learning. I'm free Mondays and Tuesdays. I'm willing to work with up to five teams at a time, as long as the total number of people is 30 or less. Tell me what kinds of teams they work in, what they already know, and what kinds of things you want me to emphasize. My fee is \$2,500 a day. Of course, you'd reimburse me for expenses."

You told her you thought a two-day session would be feasible, but you'd have to get back to her after you got budget approval. You wrote a quick memo to Pat Dyrud

explaining the situation and asking about what the session should cover.

Two weeks ago, you received this memo:

I've asked the Veep for budget approval for \$5,000 for a two-day session plus no more than \$750 for all expenses. I don't think there will be a problem.

We need some of the basics: strategies for working in groups, making decisions, budgeting time, and so forth. We especially need work on dealing with problem group members and on handling conflict—I think some of our people are so afraid that they won't seem to be "team players" if they agree too readily.

I don't want some ivory tower theorist. We need practical exercises that can help us practice skills that we can put into effect immediately.

Attached is a list of 24 people who are free Monday and Tuesday of the second week of next month. Note that we've got a good mix of people. If the session goes well, I may want you to schedule additional sessions.

Today, you got approval from the vice president to schedule the session and pay Professor Reed the fee and reimburse her for expenses to a maximum of \$750. She will have to keep all receipts and turn in an itemized list of expenses to be reimbursed; you cannot reimburse her if she does not have receipts.

You also need to explain the mechanics of the session. You'll meet in the Conference Room, which has a screen and flip charts. You have an overhead projector, a slide projector, a laptop computer for showing PowerPoint slides, a video camera, a DVD player, and a TV, but you need to reserve these if she wants to use them.

Write to Professor Reed. You don't have to persuade her to come since she's already informally agreed, but you

do want her to look forward to the job and to do her best work.

Hints:

- Choose an organization you know something about.
- What do teams do in this organization? What challenges do they face?
- Will most participants have experience working in teams? Will they have bad habits to overcome? What attitudes toward teams are they likely to have?
- Check the calendar to get the dates. If there's any ambiguity about what "the second week of next month" is, "call" Pat to check.

10.20 Answering an International Inquiry (LO 10-1 to LO 10-6)

Your business, government, or nonprofit organization has received the following inquiries from international correspondents. (You choose the country the inquiry is from.)

1. Please tell us about a new product, service, or trend so that we can decide whether we want to buy, license, or imitate it in our country.
2. We have heard about a problem [technical, social, political, or ethical] which occurred in your organization. Could you please tell us what really happened and estimate how it is likely to affect the long-term success of the organization?
3. Please tell us about college programs in this field that our managers could take.
4. We are considering setting up a plant in your city. We have already received adequate business information. However, we would also like to know how comfortable our nationals will feel. Do people in your city speak our language? How many? What opportunities exist for our nationals to improve their English? Does your town

already have people from a wide mix of nations? Which are the largest groups?

5. Our organization would like to subscribe to an English-language trade journal. Which one would you recommend? Why? How much does it cost? How can we order it?

As Your Instructor Directs,

- a. Answer one or more of the inquiries. Assume that your reader either reads English or can have your message translated.
- b. Write a memo to your instructor explaining how you've adapted the message for your audience.

Hints:

- Even though you can write in English, English may not be your reader's native language. Write a letter that can be translated easily.
- In some cases, you may need to spell out background information that might not be clear to someone from another country.

10.21 Writing a Thank-You Letter (LO 10-1 to LO 10-6)

Write a thank-you letter to someone who has helped you achieve your goals.

As Your Instructor Directs,

- a. Turn in a copy of the letter.

- b. Mail the letter to the person who helped you.

- c. Write a memo to your instructor explaining the choices you made in writing the thank-you letter.

10.22 Evaluating web pages (LO 10-1 to LO 10-6)

Today you get this e-mail message from your boss:

Subject: Evaluating Our web page

Our CEO wants to know how our web page compares to those of our competitors. I'd like you to do this in two steps. First, send me a list of your criteria. Then give me an evaluation of two of our competitors and of our own pages. I'll combine your memo with others on other web pages to put together a comprehensive evaluation for the next Executive Meeting.

As Your Instructor Directs,

- a. List the generic criteria for evaluating a web page. Think about the various audiences for the page and the content that will keep them coming back, the way the page is organized, how easy it is to find something, the visual design, and the details, such as a creation/update date.
- b. List criteria for pages of specific kinds of organizations. For example, a nonprofit organization might want

information for potential and current donors, volunteers, and clients. A financial institution might want to project an image both of trustworthiness and as being a good place to work.

- c. Evaluate three web pages of similar organizations. Which is best? Why?

Hint:

Review web page design tips in Module 5.

10.23 Announcing a Tuition Reimbursement Program (LO 10-1 to LO 10-6)

Your organization has decided to encourage employees to take courses by reimbursing each eligible employee a maximum of \$3,500 in tuition and fees during any one calendar year. Anyone who wants to participate in the program must apply before the first class meeting; the application must be signed by the employee's immediate supervisor. The Office of Human Resources will evaluate applications. That office has application forms.

The only courses eligible are those related to the employee's current position or to a position in the company that the employee might hold someday, or that are part of a job-related degree program. Again, the degree may be one that would help the employee's current position or that would qualify him or her for a promotion or transfer in the organization.

Only tuition and fees are covered, not books or supplies. People whose applications are approved will be reimbursed when they have completed the course with a grade of C or better. An employee cannot be reimbursed until he or she submits a copy of the approved application, an official grade report, and a statement of the tuition paid. If someone is eligible for other financial aid (scholarship, veterans' benefits), the company will pay tuition costs not covered by that aid as long as the employee does not receive more than \$3,500 and as long as the total tuition

reimbursement does not exceed the actual cost of tuition and fees.

Part-time employees are not eligible; full-time employees must work at the company three months before they can apply to participate in the program. Courses may be at any appropriate level (high school, college, or graduate). However, the IRS currently requires workers to pay tax on any reimbursement for graduate programs. Undergraduate and basic education reimbursements of \$5,250 a year are not taxed.

As director of human resources, write a memo to all employees explaining this new benefit.

Hints:

- Pick an organization you know something about. What do its employees do? What courses or degrees might help them do their jobs better?
- How much education do employees already have? How do they feel about formal schooling?
- The information in the problem is presented in a confusing order. Put related items together.
- The problem stresses the limits of the policy. Without changing the provision, present them positively.
- How will having a better-educated workforce help the organization? Think about the challenges the organization faces, its competitive environment, and so forth.

10.24 Correcting a Mistake (LO 10-1 to LO 10-6)

A glitch in your payroll system erroneously withheld about 10% less in federal taxes from each paycheck during the last two pay periods. Therefore, more money must be withheld from employee paychecks during upcoming pay periods to compensate. The amount will vary depending on employee, but all employees were affected by the error.

Now you must send a letter to employees explaining that a corresponding amount will have to be withheld from

future paychecks. Since there are only three pay periods before the end of the year, and it will take one pay period before the correction to the payroll system can go into effect, the amount will be divided among the two remaining pay periods. Of course, since the system must cycle through one pay period before changes can take effect, the total shortfall of federal taxes affected will be closer to 30%. The withholdings must be made in the current calendar year.

The HR Director wants to avoid a flood of inquiries regarding the situation and is counting on your message to help minimize questions. However, a hotline has been

established with a recording to address likely frequently asked questions.

Write the letter.

Polishing Your Prose

Dangling Modifiers

Modifiers are words or phrases that give more information about parts of a sentence. For instance, an adjective is a modifier that usually describes a noun. **Dangling modifiers** make no sense to readers because the word they modify is not in the sentence. If you diagrammed the sentence, the modifier would not be attached to anything; it would dangle.

Dangling: *Confirming our conversation, your Hot Springs Hot Tub Spa* is scheduled for delivery April 12. (This sentence says that the spa is doing the confirming.)

Dangling: *At the age of 10, I* bought my daughter her first share of stock.

Correct a dangling modifier in either of these ways:

1. Rewrite the modifier as a subordinate clause.

Correct: *As I told you yesterday, your Hot Springs Hot Tub Spa* is scheduled for delivery April 12.

Correct: I bought my daughter her first share of stock *when she was 10*.

2. Rewrite the main clause so its subject or object can be modified correctly.

Correct: *Talking on the phone, we* confirmed that your Hot Springs Hot Tub Spa is scheduled for delivery April 12.

Correct: *At the age of 10, my daughter* received the first share of stock I bought for her.

Exercises

Correct the dangling modifiers in these sentences.

1. Traveling overseas on business, the sights were absolutely incredible.
2. At the age of 11, my mother told me that I was a natural-born salesman.
3. Ringing over and over, I finally answered the phone.
4. Speaking with you on the phone, our appointment will be at 3 P.M. on July 2.
5. Imagining the worst, the storm really made me worry about traveling this weekend.
6. Speaking with a great deal of confidence, the interview went well for Kim.
7. After carefully selecting from all of my investment options, my mutual funds yielded a 7% return this past year.
8. Reviewing the e-mail message, the customer was complaining about how our counter person was rude to her.
9. Featuring so many great apps, I had a hard time choosing which ones to download from the website.
10. Demonstrating hard work and dedication, the Outstanding Employee Award went to Gary, a 32-year veteran of Seitz, Noonan, and Cobb.

Check your answers to the odd-numbered exercises at the back of the book.

Module

11

Negative Messages

LEARNING OBJECTIVES

While writing negative messages can be challenging, Module 11 will help you to write them well. After completing the module, you should be able to

- | | |
|--|---|
| <p>LO 11-1 Create subject lines for negative messages.</p> <p>LO 11-2 Apply strategies for informative and positive message organization.</p> <p>LO 11-3 Assess legal implications with messages, especially negative ones.</p> | <p>LO 11-4 Identify situations for buffer use.</p> <p>LO 11-5 List common kinds of negative messages.</p> <p>LO 11-6 Apply strategies for negative message analysis with PAIBOC.</p> |
|--|---|

In a **negative message**, the basic information is negative, so we expect the reader to be disappointed or angry. Few people like to give bad news—and even fewer people like to get it—but negative messages are common in business. How we present negatives and what we write or say can affect how audiences respond to our messages, as well as how they view us and our organization.

Negative messages include

- Rejections and refusals.
- Announcements of policy changes that do not benefit customers or consumers.
- Requests the reader will see as insulting or intrusive.
- Negative performance appraisals and disciplinary notices.
- Product recalls or notices of defects.

A negative message always has several purposes:

Primary Purposes:

- To give the reader the bad news.
- To have the reader read, understand, and accept the message.
- To maintain as much goodwill as possible.

Secondary Purposes:

- To build a good image of the writer.
- To build a good image of the writer's organization.
- To reduce or eliminate future correspondence on the same subject so the message doesn't create more work for the writer.

Even when it is not possible to make the reader happy with the news we must convey, we still want readers to feel that

- They have been taken seriously.
- Our decision is fair and reasonable.
- If they were in our shoes, they would make the same decision.

What's the best subject line for a negative message? **LO 11-1**

► *Only use negative subject lines if you think the reader may otherwise ignore the message.*

Letters don't require subject lines (◀◀ p. 127). Omit a subject line in negative letters unless you think readers may ignore what they think is a routine message. (See, for example, Figure 11.2 later in this module).

When you give bad news to superiors, use a subject line that focuses on solving the problem.

Subject: Improving Our Subscription Letter

When you write to peers and subordinates, put the topic (but not your action on it) in the subject line.

Subject: Status of Conversion Table Program

Due to heavy demands on our time, we have not yet been able to write programs for the conversion tables you asked for.

How should I organize negative messages? **LO 11-2**

► *It depends on your purposes and audiences.*

Choose the pattern based on the situation.

- Letters to people outside your organization should be indirect to build goodwill.
- When you write to superiors, you need to propose solutions, not just report a problem.
- When you write to peers and subordinates, try to get their input in dealing with negative situations.

Even bad news can have a silver lining. Petra Anderson was among dozens wounded at the Aurora, Colorado, shooting at the premiere of *The Dark Knight Rises* that also killed 12 people. But owing to a small birth defect in her brain, the buckshot that might otherwise have killed her in fact missed anything vital. With all of the bad news in her life at the time—her mother was diagnosed with terminal cancer—a brain defect might have been just one more burden to carry. But in this case, it was the miracle that saved her life.

General guidelines for saying “no” can be applied to specific situations. Computer expert Jakob Neilsen explains how to tell users that your website can’t do what they want.

The mystery of which client hired Burson-Marsteller, a public relations firm, to help spread negative information about Google was solved when an influential blogger revealed it to be none other than Facebook. The revelation proved embarrassing for the social networking site, as news of the effort was reported nationally when some Facebook users were also expressing concerns over privacy and whether personal data was being sold to third parties. Always consider ethics when sending out negative messages.

Source: Dan Lyons, “Facebook Busted in Clumsy Smear on Google,” May 12, 2011, http://news.yahoo.com/s/dailybeast/20110512/ts_dailybeast/14045_facebookbustedinclumsy-smearattemptongoogle.

What pattern of organization to use is also influenced by your purposes. The patterns in this section assume that maintaining goodwill is an important purpose. But as you’ll see later in the module, on some occasions, maintaining goodwill is less important than giving the negative clearly.

Giving Bad News to Customers and Other People Outside Your Organization

The following pattern helps writers maintain goodwill:

1. **Give the reason for the refusal before the refusal itself when you have a reason that readers will understand and accept.** A good reason prepares the reader to expect the refusal.
2. **Give the negative just once, clearly.** Inconspicuous refusals can be missed, making it necessary to say no a second time.
3. **Present an alternative or compromise, if one is available.** An alternative not only gives readers another way to get what they want but also suggests that you care about readers and helping them solve their problems.
4. **End with a positive, forward-looking statement.**

Figure 11.1 summarizes the pattern. Figure 11.2 uses the basic pattern.

Reasons

Make the reason for the refusal clear and convincing. The following reason is inadequate.

Weak reason: The goal of the Knoxville CHARGE-ALL Center is to provide our customers faster, more personalized service. Since you now live outside the Knoxville CHARGE-ALL service area, we can no longer offer you the advantages of a local CHARGE-ALL Center.

If the reader says, “I don’t care if my bills are slow and impersonal,” will the company let the reader keep the card? No. The real reason for the negative is that the bank’s franchise allows it to have cardholders only in a given geographical region.

Real reason: Each local CHARGE-ALL Center is permitted to offer accounts to customers in a several-state area. The Knoxville CHARGE-ALL Center serves customers east of the Mississippi. You can continue to use your current card until it expires. When that happens, you’ll need to open an account with a CHARGE-ALL Center that serves Texas.

Don’t hide behind “company policy”: Readers will assume the policy is designed to benefit you at their expense. If possible, show how the readers benefit from the policy. If they do not benefit, don’t mention the policy.

Figure 11.1 How to Organize a Negative Letter

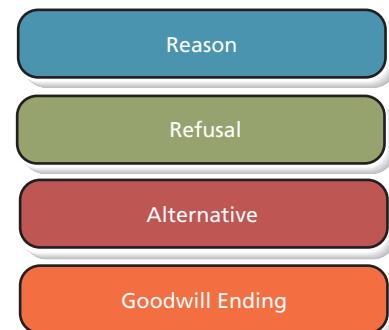

Figure 11.2 A Negative Letter

Vickers
Insurance Company

Negative information highlighted so reader won't ignore message.

Liability Coverage Is Being Discontinued—Here's How to Replace It!

3373 Forbes Avenue
Rosemont, PA 19010
(215) 555-0100

Negative Alternative

Dear Policyholder:

Negative

When your auto insurance is renewed, it will no longer include liability coverage unless you select the new Assurance Plan. Here's why.

Positive information underlined for emphasis.

Liability coverage is being discontinued. It, and the part of the premium which paid for it, will be dropped from all policies when they are renewed.

This could leave a gap in your protection. But you can replace the old Liability Coverage with Vickers' new Assurance Plan.

No reason is given. The change probably benefits the company rather than the reader, so it is omitted.

Alternative

With the new Assurance Plan, you receive benefits for litigation or awards arising from an accident—regardless of who's at fault. The cost for the Assurance Plan at any level is based on the ages of drivers, where you live, your driving record, and other factors. If these change before your policy is renewed, the cost of your Assurance Plan may also change. The actual cost will be listed in your renewal statement.

Forward-looking ending emphasizes reader's choice.

To sign up for the Assurance Plan, just check the level of coverage you want on the enclosed form and return it in the postage-paid envelope within 14 days. You'll be assured of the coverage you select.

Sincerely,
C. J. Morgan
C. J. Morgan
President

Alternative

P.S. The Assurance Plan protects you against possible legal costs arising from an accident. Sign up for the Plan today and receive full coverage from Vickers.

Weak reason: I cannot write an insurance policy for you because company policy does not allow me to do so.

Better reason: Gorham insures cars only when they are normally garaged at night. Standard insurance policies cover a wider variety of risks and charge higher fees. Limiting the policies we write gives Gorham customers the lowest possible rates for auto insurance.

Building a Critical Skill

Thinking about the Legal Implications of What You Say LO 11-3

Any message that is recorded—on paper (even a napkin), on a disk or hard drive, on voice mail—can be subpoenaed in a legal case. During the government's months-long case against Microsoft in the late 1990s, e-mail messages figured prominently as evidence. Even an electronic message that has been erased can be reconstituted by experts, and servers can be hacked, as was the case at the University of East Anglia, where hundreds of e-mails from prominent British and American climate researchers, some suggesting to critics that data might have been manipulated or withheld, undermined their public image. In any message you write, however informal or hurried, you need to be sure to say exactly what you mean.

Dell, Inc., and its financial service affiliate in New York were sued after about 700 complaints flooded the office of Andrew Cuomo, the state's attorney general. At heart was whether Dell had engaged in “bait and switch,” with salespeople promising customers 0% financing but then tricking them into higher interest rates. According to Paul Reisner, who had excellent credit and owned his own home, the company informed him that he'd never qualified for 0% financing and then promptly obligated him to pay a 29% interest rate.

Thinking about the legal implications of what you say is particularly important in negative messages. In an effort to cushion bad news, writers sometimes give reasons that create legal liabilities. For example, as Elizabeth McCord has shown, the statement that a plant is “too noisy and dangerous” for a group tour could be used as evidence against the company in a worker's compensation claim. In another case, a writer telling a job candidate that the firm had hired

someone else said that he thought she was the best candidate. She sued and won.

People have found themselves in hot water for posting negative information on the Internet. Alan and Linda Townsend were sued after launching a website to complain about the quality of a product, Spray on Siding, used on their house. The suit alleged the site infringed on the company's trademarks, defamed its product, and intentionally misled and confused consumers. An automobile club in California fired 27 workers for posting offensive material. A Boston University instructor blogged about an attractive student and was dismissed, as was a nanny who revealed too much about herself and her employers.

You don't need to be a lawyer to figure out what to say—or not to say. Think about how a reasonable person might interpret your words. If that interpretation isn't what you mean, revise the passage so that it says what you mean.

Avoid saying that you *cannot* do something. Most negative messages exist because the writer or company has chosen certain policies or cutoff points. In the preceding example, the company could choose to insure a wider variety of customers if it wanted to do so.

Often you will enforce policies you did not design. Don't pass the buck by saying, “This is a terrible policy.” Carelessly criticizing your superiors is never a good idea. If you really think a policy is bad, try to persuade your superiors to change it. If you can't think of convincing reasons to change the policy, maybe it isn't so bad after all.

If you have several reasons for saying *no*, use only those that are strong and watertight. If you give five reasons and readers dismiss two of them, readers may feel that they've won and should get the request.

Weak reason: You cannot store large bulky items in the dormitory over the summer because moving them into and out of storage would tie up the stairs and the elevators just at the busiest times when people are moving in and out.

Way to dismiss the reason: We'll move large items before or after the two days when most people are moving in or out.

If you do not have a good reason, omit the reason rather than use a weak one. Even if you have a strong reason, omit it if it makes the company look bad.

- Reason that hurts company:** Our company is not hiring at the present time because profits are down. In fact, the downturn has prompted top management to reduce the salaried staff by 5% just this month, with perhaps more reductions to come.
- Better:** Our company does not have any openings now.

Refusals

Deemphasize the refusal by putting it in the same paragraph as the reason, rather than in a paragraph by itself.

Sometimes you may be able to imply the refusal rather than stating it directly.

- Direct refusal:** You cannot get insurance for just one month.
Implied refusal: The shortest term for an insurance policy is six months.

Be sure that the implication is crystal clear. Any message can be misunderstood, but an optimistic or desperate reader is particularly unlikely to understand a negative message. One of your purposes in a negative message is to close the door on the subject. You do not want to have to write a second letter saying that the real answer is *no*.

Alternatives

Giving the reader an alternative or a compromise, if one is available,

- Offers the reader another way to get what he or she wants.
- Suggests that you really care about the reader and about helping to meet his or her needs.
- Enables the reader to reestablish the psychological freedom you limited when you said *no*.
- Allows you to end on a positive note and to present yourself and your organization as positive, friendly, and helpful.

When you give an alternative, give readers all the information they need to act on it, but don't take the necessary steps. Let readers decide whether to try the alternative.

Negative messages limit the reader's freedom. People may respond to a limitation of freedom by asserting their freedom in some other arena. Jack W. Brehm calls this phenomenon **psychological reactance**.¹ Psychological reactance is at work when a customer who has been denied credit no longer buys even on a cash basis or a subordinate who has been passed over for a promotion gets back at the company by deliberately doing a poor job.

Psychological reactance often triggers questionable behavior.

Organizing Letters to Customers

1. Give the reason for the refusal before the refusal itself when you have a reason that readers will understand and accept.
2. Give the negative just once, clearly.
3. Present an alternative or compromise, if one is available.
4. End with a positive, forward-looking statement.

The alternative of working from home may be sending a negative message at the office, according to a study by Kimberly Elsbach, of the University of California, Davis, and Daniel Cable, of London Business School. "Face time" at the office generated a more positive image of workers than working outside the office. Wrote Elsbach and Cable: "Just being seen at work, without any information about what you're actually doing, leads people to think more highly of you."

Source: Chana R. Schoenberger, "Working from Home? Beware a Career Hit," *The Wall Street Journal*, July 13, 2012, <http://blogs.wsj.com/atwork/2012/07/13/working-from-home-beware-a-careerhit/?KEYWORDS=good+news+>.

An alternative allows the reader to react in a way that doesn't hurt you. By letting readers decide for themselves whether they want the alternative, you allow them to reestablish their sense of psychological freedom.

The specific alternative will vary depending on the circumstances. In Figure 11.3, the company is unwilling to quote a price on an item on which it cannot be competitive. In different circumstances, the writer might offer different alternatives.

Figure 11.3 A Refusal with an Alternative

"Serving the needs of America since 1890"
 1800 Olney Avenue • Philadelphia, PA 19140 • 215•555•7800 • Fax: 215•555•9803

April 27, 2012

Mr. H. J. Moody
 Canton Corporation
 2407 North Avenue
 Kearney, NE 68847

Subject: Bid Number 5853, Part Number D-40040

Dear Mr. Moody:

Buffer Thank you for requesting our quotation on your Part No. D-40040.

Reason Your blueprints call for flame-cut rings 1/2" thick A516 grade 70. To use that grade, we'd have to grind down from 1" thick material. However, if you can use A515 grade 70, which we stock in 1/2" thick, you can cut the price by more than half.

Quantity	Description	Gross Weight	Price/Each
75	Rings Drawing D-40040, A516 Grade 70 1" thick x 6" O.D. x 2.8" I.D. ground to .5" thick.	12 lbs.	\$15.08
75	Rings Drawing D-40040, A515 Grade 70 1/2" thick x 6" O.D. x 2.8" I.D.	6 lbs.	\$6.91

If you can use A515 grade 70, let me know.

*Alternative
(Depending on
circumstances,
different
alternatives
may exist.)*

*Leaves decision up to reader to re-
establish psychological freedom.*

Sincerely,

Valerie Prynne

Valerie Prynne
 VP:wc

Endings

If you have a good alternative, refer to it in your ending: "Let me know if you can use A515 grade 70."

The best endings look to the future, as in this letter refusing to continue a charge account for a customer who has moved.

Wherever you have your account, you'll continue to get all the service you've learned to expect from CHARGE-ALL and the convenience of charging items at over a million stores, restaurants, and hotels in the U.S. and abroad—and in Knoxville, too, whenever you come back to visit!

Avoid endings that seem insincere.

We are happy to have been of service, and should we be able to assist you in the future, please contact us.

This ending lacks you-attitude and would not be good even in a positive message. In a situation where the company has just refused to help, it's likely to sound sarcastic or mean.

Giving Bad News to Superiors

Your superior expects you to solve minor problems by yourself. But sometimes, solving a problem requires more authority or resources than you have. When you give bad news to a superior, also recommend a way to deal with the problem. Turn the negative message into a persuasive one.

1. **Describe the problem.** Tell what's wrong, clearly and unemotionally.
2. **Tell how it happened.** Provide the background. What underlying factors led to this specific problem?
3. **Describe the options for fixing it.** If one option is clearly best, you may need to discuss only one. But if the reader will think of other options, or if different people will judge the options differently, describe all the options, giving their advantages and disadvantages.
4. **Recommend a solution and ask for action.** Ask for approval so you can make the necessary changes to fix the problem.

Figure 11.4 summarizes the pattern.

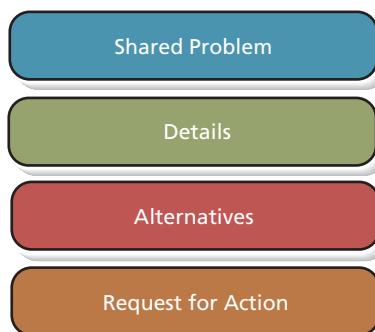

Figure 11.4 How to Organize a Negative Memo to Your Superior

Journalist Lynze Wardle Lenio notes that some types of bosses make employees so uncomfortable that she calls them "toxic." The Slacker spends most of his or her time on trivial projects, only to panic when deadlines approach. The Land Mine explodes in anger when, despite a long list of successes, an employee errs in some relatively minor way. Knowing what type of boss you have is vital to understanding how best to work with him or her. The good news is that most bosses want to work well with their employees.

Source: Lynze Wardle Lenio, "4 Types of Toxic Bosses—and How to Handle Them," *Forbes*, May 25, 2012, <http://www.forbes.com/sites/dailymuse/2012/05/25/4-types-of-toxic-bosses-and-how-to-handlethem/>.

Figure 11.5 How to Organize a Negative Memo to Peers or Subordinates

Blogger and management guru Peter Bregman believes that honesty is “much more compelling, powerful, and effective than the alternative,” and that employees want honesty from bosses. He cites a survey by one of his clients that found, for instance, that the number one behavior distinguishing the best managers from others is their ability to honestly ask for help from employees. Bregman’s position is supported by others, including author Terry Bacon, whose findings published in *What People Want* reveal that honesty is the foremost thing employees want from leaders.

Sources: Peter Bregman, “Do People Really Want You to Be Honest?” *Harvard Business Review*, January 10, 2012, <http://blogs.hbr.org/bregman/2012/01/do-people-really-want-you-to-be.html>; and “9 Things Employees Want from Their Managers (and 5 Things They Don’t),” *Business Management Daily*, May 21, 2012, <http://www.businessmanagementdaily.com/11630/9-things-employees-want-from-their-managers-and-5-things-they-don-t>.

Giving Bad News to Peers and Subordinates

When you must pass along serious bad news to peers and subordinates, use a variation of the pattern to superiors:

1. **Describe the problem.** Tell what’s wrong, clearly and unemotionally.
2. **Present an alternative or compromise, if one is available.** An alternative gives readers another way to get what they want and also suggests that you care about readers and helping them meet their needs.
3. **If possible, ask for input or action.** People in the audience may be able to suggest solutions. And workers who help make a decision are far more likely to accept the consequences.

Figure 11.5 summarizes this pattern.

No serious negative (such as being downsized or laid off) should come as a complete surprise. Managers can prepare for possible negatives by giving full information as it becomes available. It is also possible to let the people who will be affected by a decision participate in setting the criteria. Someone who has bought into the criteria for awarding cash for suggestions or retaining workers is more likely to accept decisions using such criteria. And in some cases, the synergy of groups may make possible ideas that management didn’t think of or rejected as “unacceptable.” Some workplaces, for example, might decide to reduce everyone’s pay slightly rather than laying off some individuals. Employee suggestions enabled Mentor Training, a San Jose company providing software training, to cut its payroll by 30% without laying off any full-time employees.²

When the bad news is less serious, as in Figure 11.6, use the pattern for negative letters unless your knowledge of the reader(s) suggests that another pattern will be more effective.

For memos, the context of communication is crucial. The reader’s reaction is influenced by the following factors:

- Do you and the reader have a good relationship?
- Does the organization treat people well?
- Have readers been warned of possible negatives?
- Have readers “bought into” the criteria for the decision?
- Do communications after the negative build goodwill?

When should I consider using a buffer? LO 11-4

- When the reader values harmony or when the buffer also serves another purpose.

To some writers and readers, the direct patterns used in the previous section may seem too blunt. You may want to begin messages with a buffer when the reader (individually or culturally) values harmony or when the buffer serves another purpose. For example, when you must thank the reader somewhere in the letter, putting the “thank you” in the first paragraph allows you to start on a positive note.

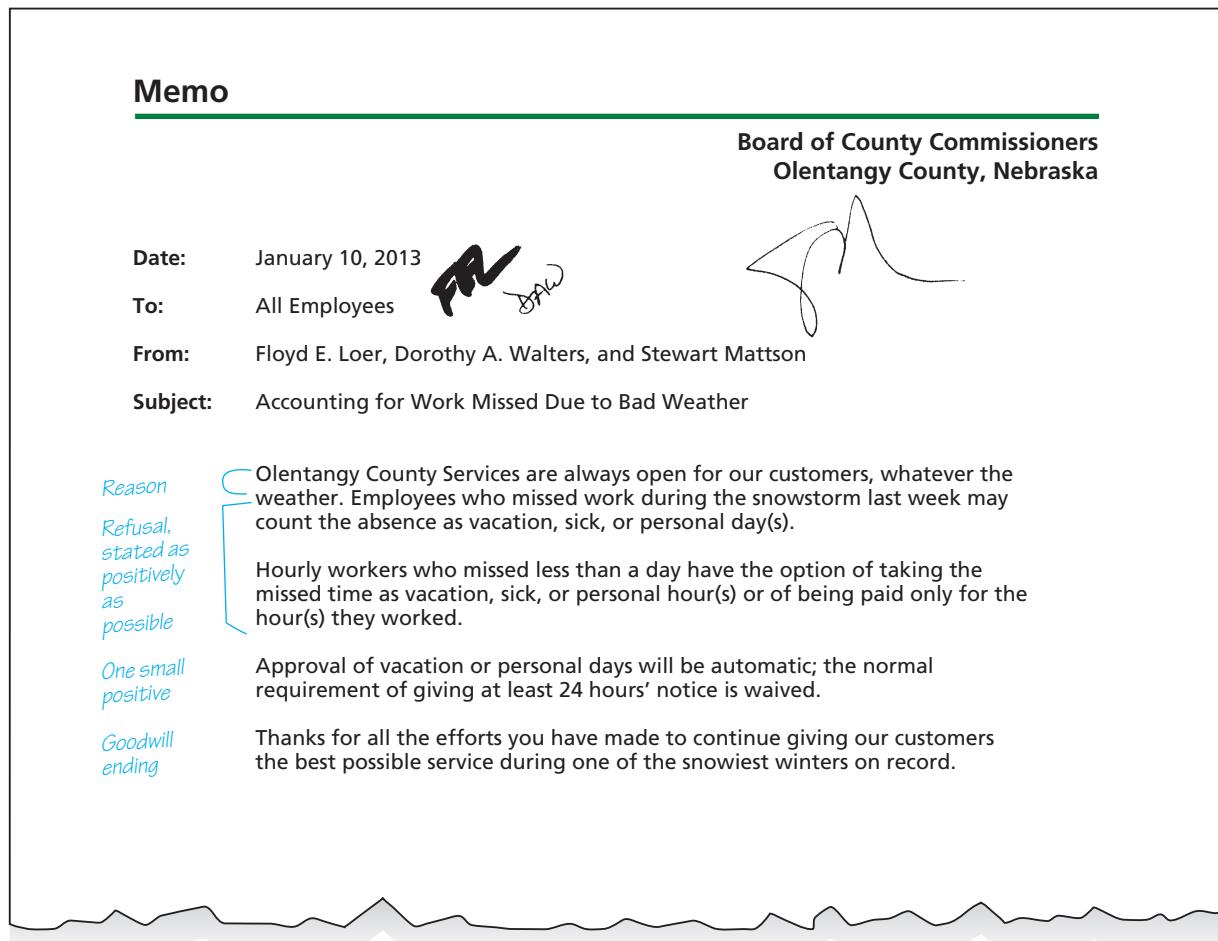

A **buffer** is a neutral or positive statement that allows you to delay the negative. Recent research suggests that buffers do not make readers respond more positively,³ and good buffers are very hard to write. However, in special situations, you may want to use a buffer.

Site to See

Go to
<http://researchnews.osu.edu/archive/nobuffer.htm>

for a summary of Kitty Locker’s research on negative messages.

Figure 11.6 A Negative Memo to Subordinates

To be effective, a buffer must put the reader in a good frame of mind, not give the bad news but not imply a positive answer either, and provide a natural transition to the body of the letter. The kinds of statements most often used as buffers are good news, facts and chronologies of events, references to enclosures, thanks, and statements of principle.

1. Start with any good news or positive elements the letter contains.

Starting Thursday, June 26, you'll have access to your money 24 hours a day at First National Bank.

Letter announcing that the drive-up windows will be closed for two days while automatic teller machines are installed

2. State a fact or provide a chronology of events.

As a result of the new graduated dues schedule—determined by vote of the Delegate Assembly last December and subsequently endorsed by the Executive Council—members are now asked to establish their own dues rate and to calculate the total amount of their remittance.

Announcement of a new dues structure that will raise most members' dues

 Instant Replay

Organizing Bad News to Superiors

1. Describe the problem.
2. Tell how it happened.
3. Describe the options for fixing it.
4. Recommend a solution and ask for action.

Instant Replay

Organizing Bad News to Peers and Subordinates

1. Describe the problem.
2. Present an alternative or compromise, if one is available.
3. If possible, ask for input or action.

3. Refer to enclosures in the letter.

Enclosed is a new sticker for your car. You may pick up additional ones in the office if needed. Please *destroy* old stickers bearing the signature of “L.S. LaVoie.”

Letter announcing increase in parking rental rates

4. Thank the reader for something he or she has done.

Thank you for scheduling appointments for me with so many senior people at First National Bank. My visit there March 14 was very informative.

Letter refusing a job offer

5. State a general principle.

Being fired from a job is usually the worst kind of message an employee can receive, but sometimes the reasons add insult to injury. When a yoga instructor gave a stern look to a Facebook employee texting in the middle of half-moon pose, she had no idea it would lead to her termination from the third-party contractor she worked for. Included in her termination letter was a complaint from the employee. Fourteen employees at the law offices of Elizabeth R. Wellborn were fired, allegedly for all wearing orange shirts on the same day. And employees have been let go after using social media to express their opinions, including a bartender who griped online about having to help waitresses serve food but not being allowed to share their tips.

Sources: Deanne Katz, "Yoga Teacher Fired for Telling Facebook Employee 'No Phones,'" July 13, 2012, <http://www.reuters.com/article/2012/07/13/tagblogsfindlawcom2012-legallyweird-idUS134598457920120713>; Eric Pfeiffer, (continued)

Good drivers should pay substantially less for their auto insurance. The Good Driver Plan was created to reward good drivers (those with five-year accident-free records) with our lowest available rates. A change in the plan, effective January 1, will help keep those rates low.

Letter announcing that the company will now count traffic tickets, not just accidents, in calculating insurance rates—a change that will raise many people's premiums

Buffers are hard to write. Even if you think the reader would prefer to be let down easily, use a buffer only when you can write a good one.

It's better *not* to use a buffer (1) if the reader may ignore a letter with a bland first paragraph, (2) if the reader or the organization prefers “bottom-line-first messages,” (3) if the reader is suspicious of the writer, or (4) if the reader “won't take *no* for an answer.”

What are the most common kinds of negative messages? LO 11-5

- *Rejections and refusals, disciplinary notices and negative performance appraisals, and layoffs and firings.*

Among the most difficult kinds of negative messages to write are rejections and refusals, disciplinary notices and negative performance appraisals, and layoffs and firings.

Rejections and Refusals

When you refuse requests from people outside your organization, try to use a buffer. Give an alternative if one is available. For example, if you are denying credit, it may still be possible for the reader to put an expensive item on layaway.

Politeness and length help. Graduating seniors at a southwestern university preferred rejection letters that addressed them as *Mr./Ms.* rather than calling them by

their first names, that said something specific about their good qualities, that phrased the refusal itself indirectly, and that were longer.⁴ An experiment using a denial of additional insurance found that subjects preferred a rejection letter that was longer, more tactful, and more personal. The preferred letter started with a buffer, used a good reason for the refusal, and offered a sales promotion in the last paragraph. The finding held both for English-speaking U.S. subjects and for Spanish-speaking Mexican subjects.⁵

When you refuse requests within your organization, use your knowledge of the organization's culture and of the specific individual to craft your message. In some organizations, it may be appropriate to use company slogans, offer whatever help already-established departments can give, and refer to the individual's good work. In less personal organizations, a simple negative without embellishment may be more appropriate.

(continued)
"Law Firm Fires 14 Employees for Wearing Orange Shirts," March 19, 2012, <http://news.yahoo.com/blogs/sideshow/law-firm-fires-14-employees-wearing-orangesHIRTS-181404912.html>; and Kashmir Hill, "When You Can and Can't Fire Employees for Social Media Misbehavior," Forbes, September 25, 2011, <http://www.forbes.com/sites/kashmirhill/2011/08/25/when-you-can-and-can-t-fire-employees-for-social-media-misbehavior/>.

Disciplinary Notices and Negative Performance Appraisals

Present disciplinary notices and negative performance appraisals directly, with no buffer. A buffer might encourage the recipient to minimize the message's importance—and might even become evidence in a court case that the employee had not been told to shape up "or else." Cite quantifiable observations of the employee's behavior, rather than generalizations or inferences based on it. If an employee is disciplined by being laid off without pay, specify when the employee is to return.

Performance appraisals are discussed in detail in Module 12 on persuasive messages. Performance appraisals will be persuasive when they are designed to help a basically good employee improve. But when an employee violates a company rule or fails to improve after repeated appraisals, the company may discipline the employee or build a dossier to support firing him or her.

Layoffs and Firings

Information about layoffs and firings is normally delivered orally but accompanied by a written statement explaining severance pay or unemployment benefits that may be available. The written statement should start either with the reason or with the decision itself. A buffer would not be appropriate.

If a company is in financial trouble, management needs to communicate the problem clearly long before it is necessary to lay anyone off. Sharing information and enlisting everyone's help in finding solutions may make it possible to save jobs. Sharing information also means that layoff notices, if they become necessary, will be a formality; they should not be new information to employees.

Before you fire someone, double-check the facts. Make sure the employee has been told about the problem and that he or she will be fired if the problem is not corrected. Give the employee the real reason for the firing. Offering a face-saving reason unrelated to poor performance can create legal liabilities. But avoid broadcasting the reason to other people: to do so can leave the company liable to a defamation suit.⁶

Harvard College received kudos for the softer tone of its rejection letters to applicants, which included statements like, "Past experience suggests that the particular college a student attends is far less important than what the student does to develop his or her strengths and talents over the next four years."

Source: "Rejection: Some Colleges Do It Better than Others," *The Wall Street Journal*, April 29, 2009, B9.

Effective Buffers

To be effective, a buffer must put the reader in a good frame of mind, not give the bad news but not imply a positive answer either, and provide a natural transition to the body of the letter.

How can I apply what I've learned in this module? **LO 11-6**

- Plan your activities and answer the PAIBOC questions.

Before you tackle the assignments for this module, examine the following problem. Figure 11.7 lists the necessary activities. As in Module 10, the PAIBOC questions probe

Delivering bad news is especially tough when it comes to firing someone. Jonathan A. Segal suggests avoiding common phrases like “We had no choice but to terminate your employment”—justifications that may actually anger the employee.

Source: Jonathan A. Segal, “10 Things Not to Say When Firing an Employee,” *BusinessWeek*, November 17, 2009, http://www.businessweek.com/managing/content/nov2009/ca2009119_982182.htm.

A problem for Denmark’s Lego Group, makers of the wildly popular blocks and play sets, may be that too many of the company’s toys are marketed to boys at the expense of girls and thus send a negative message. Critics observe that of the 545 offerings from the company, almost all cater to concepts traditionally associated with boys: trains, rockets, helicopters, and spaceships. Said Peggy Orenstein, author of *Cinderella Ate My Daughter*, a satirical look at how the toy industry exploits the “princess phase” for girls, “They might as well have a No Girls Allowed Sign.” Gender stereotyping aside, the company’s solution is to introduce more toys aimed specifically at girls, including “American Girl Dolls” and “Lego Friends,” or kits that let girls choose from multiple scenarios while building and socializing with each other.

Figure 11.7 Allocating Time in Writing a Negative Memo (Your time may vary.)

Memo denying matching funds. Total time: 3 hours

Planning	1 hour
Understand the situation. Answer the PAIBOC questions (◀◀ Module 1). Think about document design (◀◀ Module 5). Organize the message.	
Writing	1/2 hour
Draft the memo.	
Revising	1½ hours
Reread draft. Measure draft against PAIBOC questions and checklist for negative messages (Figure 11.10). Revise draft. Ask for feedback. Revise draft based on feedback. Edit to catch grammatical errors. Run spell-check. Proof by eye. Initial memo. Put in interoffice mail.	

the basic points required for a solution. Study the two sample solutions to see what makes one unacceptable and the other one good. The checklist at the end of the module in Figure 11.10 can help you evaluate a draft.

Problem

You’re Director of Employee Benefits for a Fortune 500 company. Today, you received the following memo:

From: Michelle Jagtiani

Subject: Getting My Retirement Benefits

Next Friday will be my last day here. I am leaving [name of company] to take a position at another firm.

Please process a check for my retirement benefits, including both the deductions from my salary and the company’s contributions for the last three and a half years. I would like to receive the check by next Friday if possible.

You have bad news for Michelle. Although the company does contribute an amount to the retirement fund equal to the amount deducted for retirement from the employee’s paycheck, employees who leave with less than five years of employment get only their own contributions. Michelle will get back only the money that has been deducted from her

own pay, plus 4% interest compounded quarterly. Her payments and interest come to just over \$17,200; the amount could be higher depending on the amount of her last paycheck, which will include compensation for any unused vacation days and sick leave. Furthermore, because the amounts deducted were not considered taxable income, she will have to pay income tax on the money she will receive.

You cannot process the check until after her resignation is effective, so you will mail it to her. You have her home address on file; if she's moving, she needs to let you know where to send the check. Processing the check may take two to three weeks.

Write a memo to Michelle.

(continued)

Source: Brad Wieners, "Lego Is for Girls," *Bloomberg Businessweek*, December 14, 2011, <http://www.businessweek.com/print/article/21120-lego-is-for-girls>.

Analysis of the Problem

P What are your **purposes** in writing or speaking?

To tell her that she will get only her own contributions, plus 4% interest compounded quarterly; that the check will be mailed to her home address two to three weeks after her last day on the job; and that the money will be taxable as income.

To build goodwill so that she feels she has been treated fairly and consistently. To minimize negative feelings she may have.

To close the door on this subject.

A Who is (are) your **audience(s)**? How do the members of your audience differ from each other? What characteristics are relevant to this particular message?

Michelle Jagtiani. Unless she's a personal friend, I probably wouldn't know why she's leaving and where she's going.

There's a lot I don't know. She may or may not know much about taxes; she may or may not be able to take advantage of tax-reduction strategies. I can't assume the answers because I wouldn't have them in real life.

I What **information** must your message include?

When the check will come. The facts that the check will be based on her contributions, not her employer's, and that the money will be taxable income. How lump-sum retirement benefits are calculated. The fact that we have her current address on file but need a new address if she's moving.

B What reasons or reader **benefits** can you use to support your position?

Giving the amount currently in her account may make her feel she is getting a significant sum of money. Suggesting someone who can give free tax advice (if the company offers this as a fringe benefit) reminds her of the benefits of working with the company. Wishing her luck with her new job is a nice touch.

O What **objections** can you expect your reader(s) to have? What negative elements of your message must you deemphasize or overcome?

She is getting about half the amount she expected, because she gets no matching funds.

She might have been able to earn more than 4% interest if she had invested the money herself. Depending on her personal tax situation, she may pay more tax on the money as a lump sum than would have been due had she paid it each year as she earned the money.

C How will the **context** affect the reader's response? Think about your relationship to the reader, morale in the organization, the economy, the time of year, and any special circumstances.

The stock market has been doing poorly; 4% interest is pretty good.

Though more education typically translates into more income and higher job satisfaction, a recent study by GfK Custom Research North America suggests employees with the most education also experience the most workplace stress. Concerns about job security and dwindling workplace resources are affecting Americans with advanced degrees, leading to a rise in voluntary workplace turnover despite tough economic times. What seems like an obvious benefit can sometimes come with hidden detriments.

Source: Chad Brooks, "Best-Educated Americans Experience the Most Stress at Work," *Business News Daily*, June 14, 2011, <http://www.businessnewsdaily.com/work-related-stress-1403/>.

Figure 11.8 An Unacceptable Solution to the Sample Problem

April 20, 2013

To: Michelle Jagtiani
 From: Lisa Niaz *LN*
 Subject: Denial of Matching Funds

Give reason before refusal.

You cannot receive a check the last day of work and you will get only your own contributions, not a matching sum from the company, because you have not worked for the company for at least five full years.

Better to be specific

Your payments and interest come to just over \$17,200; the amount could be higher depending on the amount of your last paycheck, which will include compensation for any unused vacation days and sick leave. Furthermore, since the amounts deducted were not considered taxable income, you will have to pay income tax on the money you receive.

This is lifted straight from the problem. The language in problems is often negative and stuffy; information is disorganized.

The check will be sent to your home address. If the address we have on file is incorrect, please correct it so that your check is not delayed.

Negative

*How will reader know what you have on file?
 Better to give current address as you have it.*

Think about the situation, and use your own words to create a satisfactory message.

Discussion of the Sample Solutions

The solution in Figure 11.8 is not acceptable. The subject line gives a blunt negative with no reason or alternative. The first sentence has a condescending tone that is particularly offensive in negative messages. The last sentence focuses on what is being taken away rather than what remains. Paragraph 2 lacks you-attitude and is vague. The memo ends with a negative. There is nothing anywhere in the memo to build goodwill.

The solution in Figure 11.9, in contrast, is very good. The policy serves as a buffer and explanation. The negative is stated clearly but is buried in the paragraph to avoid overemphasizing it. The paragraph ends on a positive note by specifying the amount in the account and the fact that the sum might be even higher.

Figure 11.9 A Good Solution to the Sample Problem

April 20, 2013

To: Michelle Jagtiani
 From: Lisa Niaz 
 Subject: Receiving Employee Contributions from Retirement Accounts

Good to state reason in third-person to deemphasize negative

Employees who leave the company with at least five full years of employment are entitled both to the company contributions and the retirement benefit paycheck deductions contributed to retirement accounts. Those employees who leave the company with less than five years of employment will receive the employee paycheck contributions made to their retirement accounts.

Good to be specific

You now have \$17,240.62 in your account, which includes 4% interest compounded quarterly. The amount you receive could be even higher since you will also receive payment for any unused sick leave and vacation days.

Good to show how company can help

Because you now have access to the account, the amount you receive will be considered taxable income. Beth Jordan in Employee Financial Services can give you information about possible tax deductions and financial investments which can reduce your income taxes.

Good to be specific

The check will be sent to your home address on May 16. The address we have on file is 2724 Merriman Road, Akron, Ohio 44313. If your address changes, please let us know so you can receive your check promptly.

Positive

Good luck with your new job!

Forward-looking

Paragraph 3 contains the additional negative information that the amount will be taxable but offers the alternative that it may be possible to reduce taxes. The writer builds goodwill by suggesting a specific person the reader could contact.

Paragraph 4 tells the reader what address is in the company files (Michelle may not know whether the files are up-to-date), asks that she update it if necessary, and ends with the reader's concern: getting her check promptly.

The final paragraph ends on a positive note. This generalized goodwill is appropriate when the writer does not know the reader well.

Figure 11.10

**Checklist
for**

Negative Messages

- Is the subject line appropriate?
- If a buffer is used, does it avoid suggesting either a positive or a negative response?
- Is the reason, if it is given, presented before the refusal? Is the reason watertight, with no loopholes?
- Is the negative information clear?
- Is an alternative given if a good one is available? Does the message provide all the information needed to act on the alternative but leave the choice up to the reader?
- Does the last paragraph avoid repeating the negative information?
- Is tone acceptable—not defensive, but not cold, preachy, or arrogant either?

And, for all messages, not just negative ones,

- Does the message use you-attitude and positive emphasis?
- Is the style easy to read and friendly?
- Is the visual design of the message inviting?
- Is the format correct?
- Does the message use standard grammar? Is it free from typos?

Originality in a negative message may come from

- An effective buffer, if one is appropriate.
- A clear, complete statement of the reason for the refusal.
- A good alternative, clearly presented, which shows that you're thinking about what the reader really needs.
- Adding details that show you're thinking about a specific organization and the specific people in that organization.

Summary of Learning Objectives

- When you give bad news to superiors, use a subject line that focuses on solving the problem. (**LO 11-1**)
- When you write to peers and subordinates, put the topic (but not your action on it) in the subject line. (**LO 11-1**)
- Organize negative letters in this way: (**LO 11-2**)
 1. Give the reason for the refusal before the refusal itself when you have a reason that readers will understand and accept.
 2. Give the negative just once, clearly.
 3. Present an alternative or compromise, if one is available.
 4. End with a positive, forward-looking statement.
- Organize negative memos to superiors in this way: (**LO 11-2**)
 1. Describe the problem.
 2. Tell how it happened.
 3. Describe the options for fixing it.
 4. Recommend a solution and ask for action.
- When you must pass along serious bad news to peers and subordinates, use a variation of the pattern to superiors: (**LO 11-2**)
 1. Describe the problem.
 2. Present an alternative or compromise, if one is available.
 3. If possible, ask for input or action.
- When the bad news is less serious, use the pattern for negative letters unless your knowledge of the reader(s) suggests that another pattern will be more effective. (**LO 11-2**)
- A good reason must be watertight. Give several reasons only if all are watertight and are of comparable importance. Omit the reason for the refusal if it is weak or if it makes your organization look bad. (**LO 11-2**)
- Giving the reader an alternative or a compromise (**LO 11-2**)
 - Offers the reader another way to get what he or she wants.
 - Suggests that you really care about the reader and about helping to meet his or her needs.
 - Enables the reader to reestablish the psychological freedom you limited when you said *no*.
 - Allows you to end on a positive note and to present yourself and your organization as positive, friendly, and helpful.
- People may respond to limits by striking out in some perhaps unacceptable way. This effort to reestablish freedom is called **psychological reactance**. (**LO 11-2**)
- When you give an alternative, give the reader all the information he or she needs to act on it, but don't take the necessary

steps for the reader. Letting the reader decide whether to try the alternative allows the reader to reestablish a sense of psychological freedom. (LO 11-2)

- Thinking about the legal implications of what you say is particularly important in negative messages. (LO 11-3)
 - Think about how a reasonable person might interpret your words.
 - If that interpretation isn't what you mean, revise the passage so that it says what you mean.
- Use a buffer when the reader values harmony or when the buffer serves a purpose in addition to simply delaying the negative. A **buffer** is a neutral or positive statement that allows you to bury the negative message. Buffers must put the reader in a good

frame of mind, not give the bad news but not imply a positive answer either, and provide a natural transition to the body of the letter. (LO 11-4)

- The kinds of statements most often used as buffers are (1) good news, (2) facts and chronologies of events, (3) references to enclosures, (4) thanks, and (5) statements of principle. (LO 11-4)
- Rejections and refusals, disciplinary notices and negative performance appraisals, and layoffs and firings are the most common kinds of negative messages. (LO 11-5)
- Use the PAIBOC questions listed in Module 1 to examine the basic points needed for successful informative and positive messages. (LO 11-6)

Assignments for Module 11

Questions for Comprehension

- 11.1** How should a negative letter to customers or clients be organized? (LO 11-2)
- 11.2** Why is giving an alternative or a compromise, if one exists, a good idea? (LO 11-2)

- 11.3** How should a negative memo to a superior be organized? (LO 11-2)

- 11.4** What are the most common types of buffers? (LO 11-4)

Questions for Critical Thinking

- 11.5** How do you use positive emphasis in a negative message? (LO 11-2, LO 11-3)
- 11.6** How do you decide whether to give the negative directly or to buffer it? (LO 11-4)

- 11.7** How do specific varieties of negative messages adapt the basic pattern? (LO 11-5)

Exercises and Problems

11.8 Revising a Negative Message (LO 11-1 to LO 11-6)

Rewrite and reorganize the following negative message to make it more positive. Eliminate any sentences that are not needed.

Dear Renter:

Effective March 1, the rent for your parking space will go up \$10 a month. However, our parking lot is still not the most expensive in town.

Many of you have asked us to provide better snow and ice removal and to post signs saying that all spaces are rented so that a car can be towed if it parks in your space. Signs will be posted by March 1, and, if we get any more snow, Acme Company has contracted to have the lot cleared by 7 a.m.

Enclosed is a new parking sticker. Please hang it on your rearview mirror.

Sincerely,

A. E. Jackson

11.9 Rejecting Employees' Suggestions (LO 11-1 to LO 11-6)

For years, businesses have had suggestion programs, rewarding employees for money-saving ideas. Now your city government has adopted such a program. But not all of the suggestions are adopted. Today, you need to send messages to the following people. Because their suggestions are being rejected, they will not get any cash.

1. Diane Hilgers, secretary, mayor's office. Suggestion: Charge for 911 calls. Reason for rejection: "This would be a public relations disaster. We already charge for ambulance or paramedic trips; to charge just for the call will offend people. And it might not save money. It's a lot cheaper to prevent a burglary or murder than to track

- down the person afterward—to say nothing of the trauma of the loss or death. Bad idea.”
2. Steve Rieneke, building and grounds supervisor. Suggestion: Fire the city’s public relations specialists. Reason for rejection: “Positive attitudes toward city workers and policies make the public more willing to support public programs and taxes. We think this is money well spent.”
 3. Jose Rivera, accountant I. Suggestion: Schedule city council meetings during the day to save on light bills and staff overtime. Reason for rejection: “Having the meetings in the evening enables more citizens to attend.”

11.10 Telling the Boss about a Problem (LO 11-1 to LO 11-6)

In any organization, things sometimes go wrong. Tell your supervisor about a problem in your unit and recommend what should be done.

As Your Instructor Directs,

- a. Prepare notes for a meeting with your supervisor.

11.11 Responding to a Demand for a Refund (LO 11-1 to LO 11-6)

You are the regional manager of a movie theater chain.

Recently, you received this letter:

I want my money back! I paid \$9 to see *The Monster's Bride*, and because the screen was so dark, I could hardly see anything at all. Half the time, the screen was almost pitch black! Besides that, the movie was total garbage and nothing like the advertising suggested. And why did I have to sit through half an hour of trailers before the movie? You should pay me for wasting my time. You guys are a bunch of crooks.

Sincerely,

Glenn McCann

Because individual tastes are varied, your company does not offer refunds when a moviegoer dislikes a film, and trailers before the movie are standard.

However, your theaters recently went to the controversial policy of reducing power on the movie projector bulbs. Doing so cuts electricity costs and may prolong the life of the expensive bulbs. For most films, the difference in screen quality is negligible, but for films with

dark cinematography, like horror movies, some scenes are difficult to see.

- Though the tone of Mr. McCann’s letter offends you, he might have a valid point about the screen quality. Therefore, you are willing to offer him a 50% discount on his next ticket purchase.
- b. Write an e-mail message to your supervisor.
 - c. Write a memo to your supervisor.
 - d. Give an oral presentation on the problem.
 - e. Write a memo to your instructor explaining the problem, the corporate culture, and the reasons for your solution.

Write the messages.

11.12 A Difficult Negative Message—Taking Away Extra Pay (LO 11-1 to LO 11-6)

Your organization employs far more part-time than full-time workers. Part-timers are paid hourly, up to 15 hours per week, and full-timers are salaried under contract for 40 hours per week.

Both groups share many job responsibilities, though full-timers are also expected to take leadership roles that require their attendance in meetings, on committees, and at community programs. For part-timers, participation is voluntary. To encourage more part-timers to participate, though, one of your managers decided to start paying them extra for their attendance.

Now several full-timers are protesting the move. While they are sympathetic to paying part-timers for additional time, the full-timers note their duties often require them to spend more than 40 hours per week on the job. Because raises and promotions are tied to manager evaluations, they believe they are being pressured to participate without additional compensation. Paying

part-timers but not full-timers for extra time only exacerbates the situation.

The manager believes that part-timers are already underpaid for doing many of the same duties as full-timers, that full-timers should be grateful to have jobs with benefits, and that full-timers should be motivated by more than money to attend. The full-timers should be held to a higher standard as role models for the part-timers.

You checked with your Human Resources Department and found that because attendance by part-timers is voluntary, paying them extra is inappropriate. In addition, recent high-profile lawsuits for overtime pay have resulted in even salaried workers expecting compensation for work beyond 40 hours per week. Therefore, you must end the program started by the manager and find a way to reign in the extra hours full-timers may be working.

Write a memo informing all employees that the extra pay program will end in two weeks.

11.13 Announcing the Elimination of a Position (LO 11-1 to LO 11-6)

Your organization is facing a significant budget shortfall, and in addition to cuts in office supplies and the travel budget, your department must eliminate one position. Though you can make a case for keeping everyone in the department, you have no choice, and the only position that seems possible to cut is Robin's, the department secretary. After much deliberation, you decide to eliminate the position.

Now you must announce this decision to the department. You expect people to be troubled because Robin is a popular and hard worker and has been with the department for three years. There's more, though. Once Robin's position is eliminated, the work must still be done. That means the rest of the staff will have to help cover the phones, make their own copies, process their own paperwork, create files and archive them, and so forth. People are already used to typing their own correspondence, but they will also have to make sure copies are

properly filed. People will have to take turns sorting the mail. The list of Robin's duties goes on.

Write an e-mail message to the staff informing them that Robin's last day is in two weeks and that the changes to cover her work will go into effect then.

Hints:

- Think about the emotional impact losing a colleague can have on the department. How can you help soften the blow? What fears might people have about their own job security?
- Care must be taken to avoid the impression that Robin is being let go for any other reason than the budget. Keep in mind, however, that confidentiality issues may affect what you can say and how much.
- You like Robin and regret having to eliminate the position, but is it wise to criticize the company or appear irritated by the decision?

11.14 Telling Retirees They Must Switch to HMOs (LO 11-1 to LO 11-6)

Your company has traditionally provided health insurance not only to employees but also to retirees who have worked for the company for at least 20 years at the time of retirement.

Seven years ago, you cut costs for employee health insurance by switching from open-ended insurance to health maintenance organizations (HMOs). At that time, you kept open-ended insurance for retirees because your employees told you that retirees wanted to keep their current doctors. But the high cost of that program gives you no choice: to continue to insure retirees, you must hold down costs, and HMOs offer the best way of doing that.

Under the current plan, the retiree pays 20% of all costs (up to a yearly ceiling of \$10,000 and a lifetime ceiling of \$100,000) and you pay 80%. In an HMO, more costs will be covered. Routine doctors' visits, for example, charge only a \$10 co-payment. Most tests, such as mammograms, X-rays, and blood work, are covered 100%. Hospitalization is covered completely, and there's much less paperwork. By presenting one's card when one fills a prescription, one pays only the copayment, rather than having to pay the entire amount and then filing for partial reimbursement later.

The bad news for retirees is that they have to go to a physician listed with the HMO. If the current physician is not on the list, the retiree will have to switch doctors to retain benefits. Furthermore, the primary care physician must refer the patient to any other health care providers. That is, someone who wants to see a specialist or go to the emergency room must call the primary care physician

first. Primary care physicians always approve such referrals whenever they seem medically advisable, but the requirement does limit the patient's freedom. Further, since HMOs are paid a flat fee and therefore have an incentive to give care that costs less than that fee, some people fear that HMOs will be reluctant to prescribe expensive treatments, even when those treatments are essential.

Your company offers a choice of HMOs. Informational meetings will be held next month for retirees (and anyone else who wishes to attend) to explain the various options. Retirees must return a card within two months, indicating which plan they prefer. The card will be enclosed in the mailing. Anyone who does not return a card will be assigned a plan by the company.

As vice president for human resources, write a form letter to all retirees, explaining the change and telling them how to indicate which HMO they prefer.

Hints:

- Choose a business, government, or nonprofit organization that you know something about.
- About how many retirees do you have? What percentage are "young old" (under 80, in reasonably good health)? What percentage are "old old" (80 and over, sometimes with more serious health problems)?
- How well educated are your retirees? How easy will it be for them to understand the HMO options?
- What times would be convenient for the retirees to come to meetings? Should you have extra times for them, beyond those you've scheduled for employees?

11.15 Telling a Customer an Item Is No Longer Available (LO 11-1 to LO 11-6)

You manage the customer service department for an online company that sells discontinued and out-of-season items from department stores at a discount. Your web page operates 24 hours a day, and you frequently have sales to attract

customers to the site. Therefore, the items being offered and their prices can change without warning.

Recently, you received this e-mail message from a customer:

I'm a member of the National Teacher's Federation, which entitles me to a 15% discount on items ordered at your site. Last night, I tried to order a leather chaise lounge. I added the item to my shopping cart, but the discount was not applied. I tried again and got the same result. When I went to the "Online Help" link, an error message said the help function was unavailable. Therefore, I'm contacting you by e-mail.

Would you help me order the chaise with my discount? The item number is 234323ALC2. I'd like it in black, please.

The chaise is a college graduation gift for my daughter, and I've been searching for one like it for months. Right now, you're the only vendor who carries this chaise, so any help you can provide would be much appreciated!

Thank you.

Macy Bergman

You've researched Ms. Bergman's claim and found that she did try to order the chaise the previous evening. While you have no record that the Online Help function was unavailable, it has crashed before.

However, the chaise has already sold out. You can see from the time stamp that two were available when Ms. Bergman e-mailed. The last one sold an hour before you got her message. You've researched the history of the

11.16 Rejecting a Suggestion (LO 11-1 to LO 11-6)

Your company has a suggestion system that encourages workers to submit suggestions that will save the organization money or improve safety, customer service, or morale. If a suggestion is accepted that will save the company money, its proposer gets 10% of the estimated first year's savings. If a suggestion is accepted but will not save money, the proposer gets \$25. You chair the committee that makes the decisions.

Today, you must tell Wayne Andersen that the committee has rejected his suggestion to buy a second photocopying machine for the sales department. Wayne pointed out that the sales department occupies a whole floor, yet has only one copier. Although the copier is in the center of the room (by the coffee and vending machines), some people have to walk quite a distance to get to it. Of course, they often stop to talk to the people they pass. Wayne calculated how much time people waste walking to the copier and talking to co-workers multiplied by annual salaries compared to the shorter time needed to walk to one of two copiers, each located to serve half the floor. He calculated that the company could save the cost of a \$10,000 machine in just six months, with a further \$10,000 savings by the end of the first year.

No one on the committee liked Wayne's idea.

"I don't trust his numbers. After all, lots of people combine trips to the copier with a trip to get a cup of coffee or a cola. They'd do even more walking if they had to make two trips."

"He talks about people waiting in line to use the copier, but I'm in sales, and I know the copier really isn't used that much. Sure, there are some bottlenecks—especially when reports are due—but a lot of the time the machine just sits there."

11.17 Announcing Cost-Savings Measures (LO 11-1 to LO 11-6)

Your company has to cut costs but would prefer to avoid laying off workers. Therefore, you have adopted the following money-saving ideas. Some can be implemented immediately; some will be implemented at renewal dates. The company will no longer pay for

chaise and found that it is part of a discontinued line. You don't expect to get any more.

You can offer her a similar chair in brown leather and give her a coupon worth 5% off (on top of any other discount) on future orders. However, there is nothing you can do about the black leather chaise.

Write a response to Ms. Bergman.

"I'm worried about the economy. I don't think this is the time to spend money we don't have to spend."

"I guess his system would be more efficient. But the real savings comes not from less walking but from less talking. And I think we *want* people to talk to each other. Informal conversations are great for relieving stress, sharing ideas, and strengthening our loyalty to each other and to the company."

"I agree. I think our company is built on informal interchange and a sense that you don't have to account for every single minute. Our people are almost all on salary; they stay overtime without any extra pay. If someone wants to take a break and talk to someone, I think that's OK."

"Well, sometimes we do waste time talking. But his idea isn't really new. Lots of people think we could save money by buying more of every kind of equipment. Even if we get a copier, I don't think he should get any money."

You pointed out that even if a new copier didn't save as much money as Wayne predicted, it would shorten the lines when lots of people have copying to do. You suggested adopting his suggestion but reducing the estimated savings and therefore the award. But the committee rejected your compromise and the suggestion. As chair of the committee, you vote only to break a tie.

Write a message to Wayne, reporting the committee's decision.

Hints:

- What reason(s) should you give for the committee's decision?
- Should you tell Wayne that you disagreed with the majority?
- How can you encourage Wayne to continue to submit suggestions?

- Flowers at the receptionist's desk and in executive offices.
- Skyboxes for professional sporting events.
- Employees' dues for professional and trade organizations.
- Liquor at business meals.

Only essential business travel will be approved. The company will pay only for the lowest cost of air travel (coach, reservation 7 to 14 days in advance).

The company will no longer buy tables or blocks of tickets for charitable events and will not make any donations to charity until money is less tight.

11.18 Closing Bill-Payment Offices (LO 11-1 to LO 11-6)

For many years, City Gas & Electric had five suburban offices to which people could take their payments. On the first of the month following next month, you're closing these offices. On that date, 100 local merchants, such as grocers, will begin to accept utility payments. Closing the freestanding

Counters will be put on the photocopiers. People must have access numbers to make photocopies; personal photocopies will cost \$.10 a page.

As the chief financial officer, write a memo to all employees, explaining the changes.

11.19 Giving a Customer Less Credit than She Wants (LO 11-1 to LO 11-6)

Yang-Ming Lee applied for your Visa card, asking for a credit limit of \$15,000 and a separate card for her husband, Chad Hoang. Her credit references merit granting a credit card. But you generally give new customers only a \$7,500 limit, even when the family income is very high, as it is in this case. You might make an exception if your bank had a

previous relationship with the client, but no such relationship exists here. While you have no set policy for reviewing and raising credit limits, normally you would expect at least six months of paying the minimum amount promptly.

Write a letter to Ms. Lee, granting her a credit card with a \$7,500 limit.

11.20 Addressing an Allegation about Racism by Employees (LO 11-1 to LO 11-6)

You are the human resources director for Kelly Green's Midwest division. Two of your employees stand accused

of being racist toward a customer. In the customer's letter to you, she states,

Today I visited your Kelly Green apparel store in downtown Chicago. In what was probably the most disturbing experience of my life—and I'm a 45-year-old registered nurse—the male clerk decided to verbally attack me, saying, "I really hope you can speak English" and "I don't think someone like you can afford our merchandise." He said this soon after I entered the store.

When I went to try on the silk blouse I'd come to purchase, I heard him outside the dressing room chanting, "Ching chong, ching chong." There was also a female clerk on duty, and I heard them both laughing.

I've been shopping at that Kelly Green store for two years. I've never seen either employee before, and I've certainly never been treated there like this in the past. When my family emigrated to the United States from the Philippines 60 years ago, they met prejudice, but I don't think they could have imagined that in this day and age Americans would still be so pointlessly vicious to other Americans.

I'm not writing to you with the expectation of being compensated nor to threaten a lawsuit. I simply want you to know that you have employees whose idea of civility is deeply flawed. The clerks are young, and I hope you can use this experience to teach them a better understanding of the dignity all people deserve.

Thank you.

Lila Oranto

P.S. I'd still like to shop at Kelly Green, but I'll be driving 30 miles out of my way to avoid returning to that store.

You are understandably shocked by the letter, and your shock grows to dismay when you discover the surveillance video that could provide a visual record of the event has been anonymously erased.

The clerks in question, one a 19-year-old male and the other a 21-year-old female, were both hired at the same time and only a month before. But already the male clerk has been warned about arriving to work late twice, and the female clerk was involved in an argument with a customer over a return.

Kelly Green has a strong policy against discrimination of customers as well as employees, but other than the word of the customer, you have no conclusive proof that the

clerks behaved so inappropriately. They both deny the incident happened. The manager who ordinarily would have been in the store was on her way back from making the afternoon deposit at the bank. At the same time, you see no reason to disbelieve the customer, whose thoughtful tone in particular impresses you.

Your solution, although imperfect, is to document the alleged incident in both clerks' personnel files, along with a reprimand to everyone on duty that day for the surveillance video being erased. In addition to that, you are requiring that all employees in the store attend diversity training.

Write a letter to Ms. Oranto explaining what will be done.

Polishing Your Prose

Parallel Structure

Use parallel structure in lists, headings, and subheadings in documents by using the same grammatical form for ideas that have the same relationship in your sentence. Parallel structure is particularly important in business communication, whose bulleted, vertical lists make parallelism errors obvious.

Not parallel: Good reports are **factual, logical, and demonstrate clarity.**

It may be easier to see faulty parallelism by listing vertically parts that need to be parallel. Check to make sure each component fits with the words that introduce the list.

Not parallel: Good reports are
Factual
Logical
Demonstrate clarity

Parallel: Good reports are
Factual
Logical
Clear

Make sure all of the list is horizontal or vertical. Don't start a list horizontally and finish it vertically.

Incorrect: As department manager, **I supervised eight employees.**
• **Wrote the department budget.**
• **Presented our sales strategy to the board of directors.**

Correct: As department manager, **I supervised eight employees, wrote the department budget, and presented our sales strategy to the board of directors.**

Also correct: As department manager, **I**
• **Supervised** eight employees.
• **Wrote** the department budget.
• **Presented** our sales strategy to the board of directors.

Headings must be parallel throughout the document, but subheads need only be parallel to other subheads in the same section.

Not parallel: Should Ogden Industries Purchase Blue Chip International?
• **Short-Term Costs**
• **What Are Long-Term Gains?**

Parallel: Should Ogden Industries Purchase Blue Chip International?
• **Short-Term Costs**
• **Long-Term Gains**

In addition to grammatical parallelism, also check your sentences for logical parallelism.

Incorrect: The group ranges **from males and females to people in their 20s, 30s, and 40s.**

Better: We interviewed **men and women ranging in age from 20 to 50.**

Gender is one category; age is another.

Exercises

Rewrite the following sentences or headings to make them parallel.

1. Tanika sent copies of the memo to Accounting, the Public Relations Department, the folks in Marketing, and even Purchasing.
2. Some of the undeserved groups in the United States include African Americans, Chinese, Native Americans, and Mexicans.
3. Jayden e-mailed to let us know that customers in our south, north side, and western offices could use more supplies.
4. The awards committee includes Lucas, Mr. Guy Elizondo, Su Yen, Dan "the Man" Jeffries, and Kyle Abrahms.
5. When Esther came to fix the copier, she pointed out that it needed a new toner cartridge, one of those trays for paper, and the replacement of its keypad.
6. We're planning on traveling to Seattle; Columbus, Ohio; the capital of Michigan, and lovely and historic Charleston this year.
7. Make sure you order supplies for the strategic planning retreat: pens, paper, one of those giant notepads, some markers, Post-it Notes, some file folders, and that tape that is sticky on both sides.
8. The best supervisors
 - listen to employees,
 - are really good at valuing diversity in the workplace, and
 - they are moral.
9. Bailey, Valdez, and Shepherd expect to open sales offices in the following countries:
 - a. Brazil.
 - b. Beautiful Argentina.
 - Our neighbor to the south, Mexico.
 - El Salvador.
10. Issues to consider before making a final commitment:
 - a. How does the contract affect the bottom line?
 - b. When the contract will take effect.

Check your answers to the odd-numbered exercises at the back of the book.

Persuasive Messages

LEARNING OBJECTIVES

Module 12 shows you how to write successful persuasive messages. After completing the module, you should be able to

- | | |
|--|--|
| LO 12-1 Compare strategies for persuasive messages. | LO 12-5 Recognize techniques for more persuasive messages. |
| LO 12-2 Create subject lines for persuasive messages. | LO 12-6 Apply strategies for common ground solutions. |
| LO 12-3 Apply strategies for persuasive message organization. | LO 12-7 List common kinds of persuasive messages. |
| LO 12-4 Identify solutions for objections. | LO 12-8 Apply strategies for persuasive message analysis with PAIBOC. |

In the 21st century, businesses depend more and more on persuasion and “buy-in” to get quality work done. You can command people to make widgets. You can’t command people to be creative. And even if you’re making widgets, just going through the motions isn’t enough. You want people to make high-quality widgets while reducing scrap and other costs. Internal commitment is needed to make that happen.

External motivation doesn’t last. Some people will buy a certain brand of pizza if they have a “2 for the price of 1” coupon. But if the coupon expires, or if another company offers the same deal, customers may leave. In contrast, if customers like your pizza better—in other words, if they are motivated internally to choose it—then you may keep your customers even if another company comes in with a lower price.

When a group of students bullied school bus monitor Karen Huff Klein, going so far as to post videos online, they may have thought they were getting the last laugh. Cruel comments like "You're so ugly, your kids should kill themselves" were especially horrific to people who knew that Klein had lost a son to suicide 10 years earlier. After news of the attacks made national headlines, however, outraged and sympathetic donors contributed hundreds of thousands of dollars to a vacation fund set up for Klein. The students were punished. *Cyberbaiting*, a form of bullying where students provoke teachers and other authority figures and then post the results online, is on the rise now that cell phone cameras are so prolific. Bullying generates many results, including ones bullies may not anticipate. Remember, persuasive techniques can be used to any end—think about why you are using them in addition to how.

Sources: Susan Stump, "School Bus Monitor Doesn't Want 'Really Nasty' Kids Charged," *The Today Show*, June 21, 2012, http://today.msnbc.msn.com/id/47896993/ns/today-today_news/t/school-bus-monitor-doesnt-want-really-nasty-kids-charged/; and Susan Donaldson James, "Cyberbaiting on the Rise as Teacher Tantrums Posted to YouTube," *Good Morning America*, January 3, 2012, <http://gma.yahoo.com/cyberbaiting-rise-teacher-tantrums-posted-youtube-213036412.html>.

Persuasive messages include

- Orders and requests.
- Proposals and recommendations.
- Sales and fund-raising letters.
- Job application letters.
- Reports, if they recommend action.
- Efforts to change people's behavior, such as collection letters, criticisms or performance appraisals where you want the subordinate to improve behavior, and public-service ads designed to reduce drunken driving, drug use, and so on.

All persuasive messages have several purposes:

Primary Purposes:

- To have the reader act.
- To provide enough information so that the reader knows exactly what to do.
- To overcome any objections that might prevent or delay action.

Secondary Purposes:

- To build a good image of the writer.
- To build a good image of the writer's organization.
- To cement a good relationship between the writer and reader.
- To reduce or eliminate future correspondence on the same subject so the message doesn't create more work for the writer.

What is the best persuasive strategy? LO 12-1

► *It depends on how much and what kinds of resistance you expect.*

Four basic short-term strategies exist: direct request, problem-solving persuasion, sales,¹ and reward and punishment. This book will focus on the first two strategies. Rewards and punishment have limited use, in part because they don't produce permanent change and because they produce psychological reactance (◀◀ p. 169). For a major change—such as restoring public confidence in CPA firms and in the stock market—no single message will work. You will need a campaign with a series of messages, preferably from a variety of sources.

Use the **direct request pattern** when

- The audience will do as you ask without any resistance.
- You need a response only from the people who are willing to act.
- The audience is busy and may not read all the messages received.
- Your organization's culture prefers direct requests.

Use the **problem-solving pattern** when

- The audience is likely to object to doing as you ask.
- You need action from everyone.
- You trust the audience to read the entire message.
- You expect logic to be more important than emotion in the decision.

A strategy that works in one organization may not work somewhere else. James Suchan and Ron Dulek point out that Digital Equipment's corporate culture values no-holds-barred aggressiveness: "Even if opposition is expected, a subordinate should write a proposal in a forceful, direct manner."² In another organization with different cultural values, an employee who used a hard sell for a request antagonized the boss.³

Corporate culture (◀◀ p. 28) isn't written down; it's learned by imitation and observation. What style do high-level people in your organization use? When you show a draft

The Advertising Council creates public service ads. Here, an ad for the Arab American Institute uses emotional appeal to build a common ground and persuade people to reject hate.

Difficult situations arise when multiple stakeholders in an issue have different—perhaps contradictory—points of view. This website, created by faculty and graduate students at Rice University, presents documents, maps, and reports that led to a successful resolution.

to your boss, are you told to tone down your statements or to make them stronger? Role models and advice are two of the ways organizations communicate their cultures to newcomers.

Different ethnic and national cultures also have different preferences for gaining compliance. In one study, students who were native speakers of American English judged direct statements (“Do this”; “I want you to do this”) clearer and more effective than questions (“Could you do this?”) or hints (“This is needed”). Students who were native speakers of Korean, in contrast, judged direct statements to be *least* effective. In the Korean culture, the study’s authors claim, the more direct a request is, the ruder and therefore less effective it is.⁴

What is the best subject line for a persuasive message? LO 12-2

- For direct requests, use the request, the topic, or a question.
- For problem-solving messages, use a directed subject line or a reader benefit.

In a direct request, put the request, the topic of the request, or a question in the subject line.

Subject: Request for Updated Software

My copy of HomeNet does not accept the aliases for Magnus accounts.

“Don’t kill the messenger” could certainly apply to Maya society. Before being executed, the scribes of defeated kings often also had their fingers broken, a symbolic muting of their ability to “speak” persuasively on behalf of their leader.

Source: Jeff Grabmeier, “Among the Mayas, Writers for Defeated Kings Met a Cruel Fate,” *The Ohio State University Research News*, August 20, 2001, downloaded at <http://researchnews.osu.edu/archive/mayans.htm>.

Instant Replay

Use the **direct request** pattern when

- The audience will do as you ask without any resistance.
- You need a response only from the people who are willing to act.
- The audience is busy and may not read all the messages received.
- Your organization's culture prefers direct requests.

Use the **problem-solving** pattern when

- The audience is likely to object to doing as you ask.
- You need action from everyone.
- You trust the audience to read the entire message.
- You expect logic to be more important than emotion in the decision.

Subject: Status of Account #3548–003

Please get me the following information about account #3548–003.

Subject: Do We Need an Additional Training Session in October?

The two training sessions scheduled for October will accommodate 40 people. Last month, you said that 57 new staff accountants had been hired. Should we schedule an additional training session in October? Or can the new hires wait until the next regularly scheduled session in February?

When you have a reluctant reader, putting the request in the subject line just gets a quick *no* before you've had a chance to give all your arguments. One option is to use a **directed subject line** that makes your stance on the issue clear.⁵ In the following examples, the first is the most neutral. The remaining two increasingly reveal the writer's preference.

Subject: A Proposal to Change the Formula for Calculating Retirees' Benefits

Subject: Arguments for Expanding the Marysville Plant

Subject: Why Cassano's Should Close Its West Side Store

Another option is to use common ground or a reader benefit—something that shows readers that this message will help them.

Subject: Reducing Energy Costs in the New Orleans Office

Energy costs in our New Orleans office have risen 12% in the last three years, even though the cost of gas has fallen and the cost of electricity has risen only 5%.

Although your first paragraph may be negative in a problem-solving message, your subject line should be neutral or positive to show that you are solving a problem, not just reporting one.

Both directed subject lines and benefit subject lines can also be used as report titles.

How should I organize persuasive messages? LO 12-3

- *In direct requests, start with the request.*
- *In a problem-solving message, start with the problem you share.*

Start with the request only when you anticipate ready agreement, when you fear that a busy reader may not read a message whose relevance isn't clear, or when your organization's culture prefers direct requests.

(continued)

Writing Direct Requests

When you expect quick agreement, save the reader's time by presenting the request directly.

- Consider asking immediately for the information or service you want.** Delay the request if it seems too abrupt or if you have several purposes in the message.

- Give readers all the information and details they will need to act on your request.**

Number your questions or set them off with bullets so the reader can check to see that all of them have been answered.

In a claim (where a product is under warranty or a shipment was defective), explain the circumstances so that the reader knows what happened. Be sure to include all the relevant details: date of purchase, model or invoice number, and so on.

In more complicated direct requests, anticipate possible responses. Suppose you're asking for information about equipment meeting certain specifications. Explain which criteria are most important so that the reader can recommend an alternative if no single product meets all your needs. You may also want to tell the reader what your price constraints are and ask whether the item is in stock or must be special ordered.

- Ask for the action you want.** Do you want a check? A replacement? A catalogue? Answers to your questions? If you need an answer by a certain time, say so. If possible, show the reader why the time limit is necessary.

Figure 12.1 summarizes this pattern. Figure 12.2 illustrates the pattern as did the claim letter in Figure 9.4 (◀◀ p. 131). Note that direct requests do not contain reader benefits and do not need to overcome objections: They simply ask for what is needed.

Direct requests should be direct. Don't make the reader guess what you want.

Indirect request: Is there a newer version of the 2008 *Accounting Reference Manual*?

Direct request: If there is a newer version of the 2008 *Accounting Reference Manual*, please send it to me.

In some direct requests, your combination of purposes may suggest a different organization. For example, in a letter asking an employer to reimburse you for expenses after a job interview, you'd want to thank your hosts for their hospitality and cement the good impression you made at the interview. To do that, you'd spend the first several paragraphs talking about the trip and the interview. Only in the last third of the letter (or even in the postscript) would you put your request for reimbursement.

Similarly, in a letter asking about a graduate program, a major purpose might be to build a good image of yourself so that your application for financial aid would be viewed positively. To achieve that goal, provide information about your qualifications and interest in the field as well as ask questions.

(continued)

Source: Becky Quick, "Car Salesmen: Still Sexist, Still Stupid," CNN, February 28, 2012, <http://finance.fortune.com/2012/02/28/sexy-car-salesmen/>.

Even reasonable requests from credible sources can meet resistance. Appeals by the captain of a Continental Express jet diverted by weather to Rochester, Minnesota, to let her passengers enter the terminal went unheeded, stranding them for six hours aboard the cramped plane. The Transportation Security Administration (TSA) later blamed Mesaba Airlines, a subsidiary of Delta Air Lines. Its staff, the only ones on duty in the terminal at the time, believed because there were no TSA personnel available, passengers could not deplane. However, regulations allowed for passengers to be taken to a secure area.

Source: Joan Lowy, "Pilot Pleaded to Evacuate Stranded Passengers," August 21, 2009, http://news.yahoo.com/s/ap/20090821/ap_on_go_ca_st_pe/us_nightmare_flight.

Organizing Problem-Solving Messages

Use an indirect approach and the problem-solving pattern of organization when you expect resistance from your reader but can show that doing what you want will solve

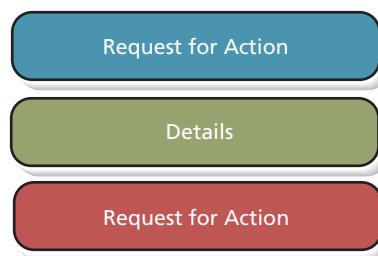

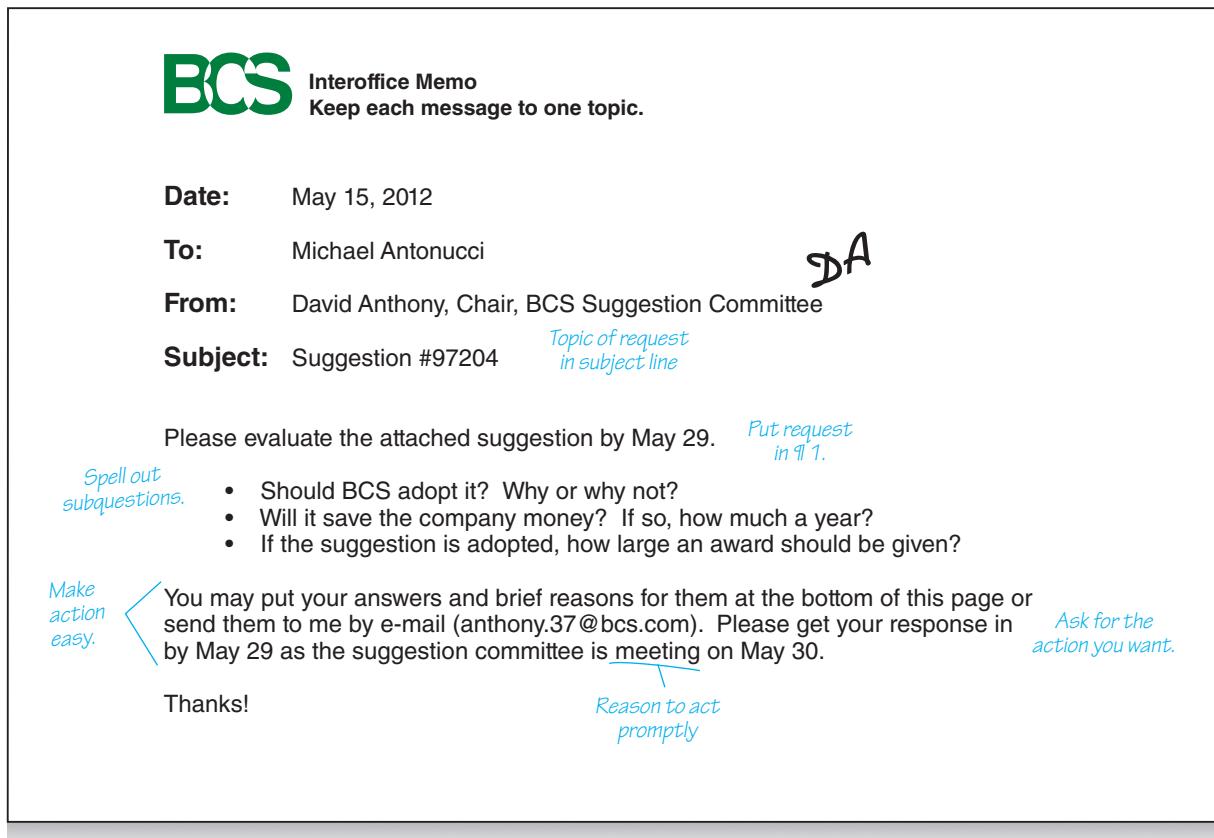

Figure 12.1 How to Organize a Direct Request

Figure 12.2 A Direct Request

a problem you and your reader share. This pattern allows you to disarm opposition by showing all the reasons in favor of your position before you give your readers a chance to say *no*.

1. **Describe the problem you both share (which your request will solve).** Present the problem objectively: Don't assign blame or mention personalities.
 2. **Give the details of the problem.** Be specific about the cost in money, time, lost goodwill, and so on. You have to convince readers that *something* has to be done before you can convince them that your solution is the best one.
 3. **Explain the solution to the problem.** If you know that the reader will favor another solution, start with that solution and show why it won't work before you present your solution.
- Present your solution without using the words *I* or *my*. Don't let personalities enter the picture; don't let the reader think he or she should say *no* just because you've had other requests accepted recently.
4. **Show that any negative elements (cost, time, etc.) are outweighed by the advantages.**
 5. **Summarize any additional benefits of the solution.** The main benefit—solving the problem—can be presented briefly since you described the problem in detail. However, if there are any additional benefits, mention them.
 6. **Ask for the action you want.** Often your reader will authorize or approve something; other people will implement the action. Give your reader a reason to act promptly, perhaps offering a new reader benefit. ("By buying now, we can avoid the next quarter's price hikes.")

Figure 12.3 How to Organize a Problem-Solving Persuasive Message

Instant Replay

Organizing a Direct Request

1. Consider asking for the information or service you want.
2. Give readers all the information or details they will need to act on your request.
3. Ask for the action you want.

Figure 12.3 summarizes the pattern. Figure 12.4 implements the pattern. Reader benefits can be brief in this kind of message because the biggest benefit comes from solving the problem.

How do I identify and overcome objections? LO 12-4

► *Talk to your audience. Then try these strategies.*

The easiest way to learn about objections your audience may have is to ask knowledgeable people in your organization or your town.

- **Phrase your questions nondefensively**, in a way that doesn't lock people into taking a stand on an issue: "What concerns would you have about a proposal to do *x*?" "Who makes a decision about *y*?" "What do you like best about [the supplier or practice you want to change]?"
- **Ask follow-up questions** to be sure you understand: "Would you be likely to stay with your current supplier if you could get a lower price from someone else? Why?"

People are likely to be most aware of and willing to share objective concerns such as time and money. They will be less willing to tell you that their real objection is emotional. Readers have a **vested interest** in something if they benefit directly from keeping things as they are. People who are in power have a vested interest in retaining the system that gives them their power. Someone who designed a system has a vested interest in protecting that system from criticism. To admit that the system has faults is to admit that the designer made mistakes. In such cases, you'll need to probe to find out what the real reasons are.

The best way to deal with an objection is to eliminate it. To sell Jeep Cherokees in Japan, Mitsuru Sato convinced Chrysler to put the driver's seat on the right side, to make an extra preshipment quality check, and to rewrite the instruction booklet in Japanese style, with big diagrams and cartoons.⁶

If an objection is false or based on misinformation, give the response to the objection without naming the objection. In a persuasive brochure, you can present responses with a "question/answer" format. When objections have already been voiced, you may want to name the objection so that your audience realizes that you are responding to that specific

President Barack Obama, dogged by rumors that he is not a U.S. citizen despite releasing in 2008 a certificate of live birth from Hawaii, did provide a copy of his long form birth certificate a few years later. Nonetheless, detractors continued to cast doubts, with billionaire Donald Trump going so far as to initially comment, "We have to see if it's real, if it's proper." While Trump added that he thought the document likely was real, others with a vested interest in another point of view insist it is a digitally altered fake.

Source: Rachel Rose Hartman, "White House Releases Obama Birth Certificate," April 27, 2011, http://news.yahoo.com/s/yblog_theticket/20110427/ts_yblog_theticket/white-house-releases-obama-birth-certificate.

Figure 12.4 A Problem-Solving Persuasive Message

Memorandum

February 15, 2013

To: All Staff Members

From: Melissa J. Gutridge *MJG*

Subject: Why We Are Implementing a New Sign-Out System

Directed subject line indicates action writer will ask for to solve the problem.

Shared problem

Specific example of problem

Solution presented impersonally

Additional reader benefit

Ask for action.

Successfully mainstreaming our clients into the community is very important, and daily interaction with the public is necessary. Our clients enjoy the times they get to go to the mall or out to lunch instead of remaining here all day. Recently, however, clients have been taken out on activities without a staff member's knowing where the client is and whom the client is with.

We need to know where all clients are at all times because social workers, psychologists, and relatives constantly stop by unannounced. Last week, Janet's father stopped by to pick her up for a doctor's appointment, and she was not here. No one knew where she was or whom she was with. Naturally her father was very upset and wanted to know what kind of program we were running. Staff members' not knowing where our clients are and whom they are with is damaging to the good reputation of our staff and program.

Starting Monday, February 25, a sign-out board will be located by Betty's desk. Please write down where you and the client are going and when you expect to be back. When signing out, help clients sign themselves out. We can turn this into a learning experience for our clients. Then when a social worker stops by to see someone who isn't here, we can simply look at the sign-out board to tell where the client is and when he or she will return.

Please help keep up the superb reputation you have helped Weststar earn as a quality center for adults with handicaps. Sign out yourself and clients at all times.

objection. However, to avoid solidifying the opposition, don't attribute the objection to your audience. Instead, use a less personal attribution: "Some people wonder . . ."; "Some citizens are afraid that . . ."

If real objections remain, try one or more of the following strategies to counter objections:

1. Specify how much time and/or money is required—it may not be as much as the reader fears.

Distributing flyers to each house or apartment in your neighborhood will probably take two afternoons.

If you can't overcome an objection, admit it. A potential client asked Evonne Weinhaus, "Do you really do anything new in your training?" She looked him in the eye and said, "No, I don't. I just add a twist." After a moment of silence, he said, "That's good. There is nothing new out there, and if you had said 'yes' this lunch would have been over immediately!" They talked about her approach and her "twist" on sales training. The potential client became a real client, signing up for 26 workshops.

2. Put the time and/or money in the context of the benefits they bring.

The additional \$152,500 will (1) allow The Open Shelter to remain open 24 rather than 16 hours a day, (2) pay for three social workers to help men find work and homes, and (3) keep the Neighborhood Bank open, so that men don't have to cash Social Security checks in bars and so that they can save up the \$800 they need to have up front to rent an apartment.

3. Show that money spent now will save money in the long run.

By replacing the boiler now, we'll no longer have to release steam that the overflow tank can't hold. Depending on how severe the winter is, we could save \$100 to \$750 a year in energy costs. If energy costs rise, we'll save even more.

4. Show that doing as you ask will benefit some cause or group the reader supports, even though the action may not help the reader directly.

By being a Big Brother or a Big Sister, you'll give a child the adult attention he or she needs to become a well-adjusted, productive adult.

5. Show the reader that the sacrifice is necessary to achieve a larger, more important goal to which he or she is committed.

These changes will mean more work for all of us. But we've got to cut our costs 25% to keep the plant open and to keep our jobs.

Instant Replay

Organizing a Problem-Solving Message

1. Describe a problem you both share (which your request will solve).
2. Give the details of the problem.
3. Explain the solution to the problem.
4. Show that any negative elements (cost, time, etc.) are outweighed by the advantages.
5. Summarize any additional benefits of the solution.
6. Ask for the action you want.

6. Show that the advantages as a group outnumber or outweigh the disadvantages as a group.

None of the locations is perfect. But the Backbay location gives us the most advantages and the fewest disadvantages.

7. Turn a disadvantage into an opportunity.

With the hiring freeze, every department will need more lead time to complete its own work. By hiring another person, the Planning Department could provide that lead time.

In 2009, Coca-Cola and IBM were the world's top two brands, translating into a value of \$68.73 billion and \$60.21 billion, respectively. A strong brand connotes intrinsic benefit to customers, and that can translate into increased credibility, along with more sales and customer loyalty. How brands are ranked, however, changes according to who is ranking them and how. On Facebook, the top brands for 2012 were Facebook, YouTube, and Coca-Cola, determined in part by the number of "likes" for each. Coca-Cola, for instance, has 41 million. But global research agency Millward Brown Optimor ranks Apple Inc. the number one brand, with a worth of \$183 billion.

Sources: Emily Fredrix, "Worlds 2 Most Valuable Brands: Coca-Cola, IBM," downloaded on September 17, 2009, at <http://finance.yahoo.com/news/Worlds-2-most-valuable-brands-apf-3039041815.html?x=0>; Tomio Geron, "Which Brands Get the Most Value on Facebook?" *Forbes*, May 10, 2012, <http://www.forbes.com/sites/tomiogeran/2012/05/10/beyond-likes-which-brands-get-the-most-value-on-facebook/>; and "The World's Top 20 Brands," *The Chicago Tribune*, May 22, 2012, <http://www.chicagotribune.com/business/ct-biz-world-biggest-brands-apr28,0,3878533.photogallery>.

What other techniques can make my messages more persuasive? LO 12-5

- *Build credibility and emotional appeal. Use the right tone, and offer a reason to act promptly.*

Persuasive messages—whether short-term or long-term—will be more effective if you build credibility and emotional appeal, use the right tone, and offer a reason to act promptly.

Build Credibility

Credibility is the audience's response to you as the source of the message. People are more easily persuaded by someone they see as expert, powerful, attractive, or trustworthy. A sexual abstinence program in Atlanta was effective in large part because the lessons on how to say *no* without hurting the other person's feelings were presented by teenagers slightly older than the students in the program. Adults would have been much less credible.⁷

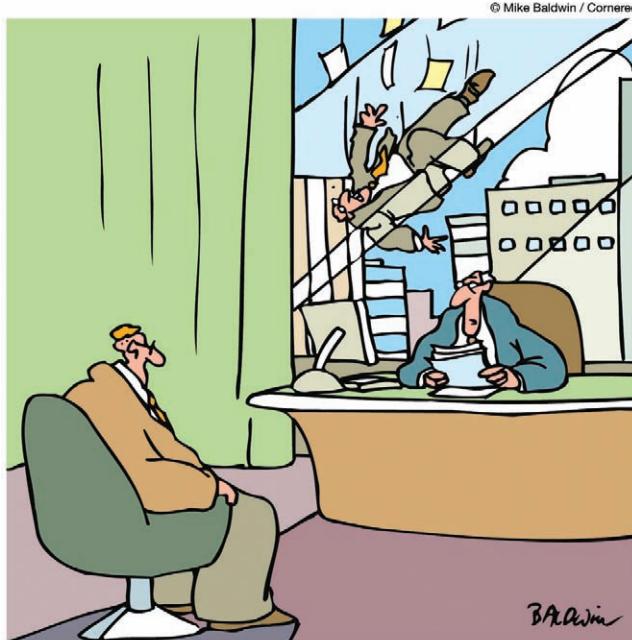

When you don't yet have the credibility that comes from being an expert or being powerful, build credibility by the language and strategy you use:

- **Be factual.** Don't exaggerate.
- **Be specific.** If you say "X is better," show in detail *how* it is better. Show the reader exactly where the savings or other benefits come from so that it's clear the proposal really is as good as you say it is.
- **Be reliable.** If you suspect that a project will take longer to complete, cost more money, or be less effective than you originally thought, tell your audience *immediately*. Negotiate a new schedule that you can meet.

Build Emotional Appeal

Emotional appeal means making the reader *want* to do what you ask. People don't make decisions—even business decisions—based on logic alone. J. C. Mathes and Dwight W. Stevenson cite the following example. During his summer job, an engineering student who was asked to evaluate his company's waste treatment system saw a way that the system could be redesigned to save the company more than \$200,000 a year. He wrote a report recommending the change and gave it to his boss. Nothing

Be sure to analyze all of your audiences carefully for the appropriate persuasive appeal. Tougher audiences require special consideration.

"Excellent proposal. Let's take it upstairs and see if it flies."

Reprinted with permission of CartoonStock.com, www.cartoonstock.com.

happened. Why not? His supervisor wasn't about to send up a report that would require him to explain why *he'd* been wasting more than \$200,000 a year of the company's money.⁸

Stories and psychological description (◀◀ p. 116) are effective ways of building emotional appeal. Emotional appeal works best when people want to be persuaded. Even when you need to provide statistics or numbers to convince the careful reader that your anecdote is a representative example, telling a story first makes your message more persuasive. Recent research suggests that stories are more persuasive because people remember them.⁹

Use the Right Tone

When you ask for action from people who report directly to you, you have several choices. Even orders ("Get me the Ervin file") and questions ("Do we have the third quarter numbers yet?") will work. When you need action from co-workers, superiors, or people outside the organization, you need to be more forceful but also more polite.

Avoiding messages that sound parental or preachy is often a matter of tone. Saying "Please" is a nice touch, especially to people on your level or outside the organization. Tone will also be better when you give reasons for your request.

- Parental:** Everyone is expected to comply with these regulations. I'm sure you can see that they are commonsense rules needed for our business.
- Better:** Even on casual days, visitors expect us to be professional. So leave the gym clothes at home!

When you write to people you know well, humor can work. Just make sure that the message isn't insulting to anyone who doesn't find the humor funny.

Product placement—where a company pays to have a name brand product highlighted to persuade audiences to use it—is nothing new to film and television, but songs, novels, video games, and music videos are among media increasingly featuring this type of promotion. It's big business. In 2008, *American Idol*'s 580 product placements were among those in network programming that generated billions in revenue. For 2012's *Skyfall*, the 23rd film in the official James Bond franchise, product placement stirred controversy, as fans were outraged at the possibility of the suave secret agent trading in his signature vodka martinis for a Heineken beer. But the move fit in with the producers' efforts to raise a record-setting \$45 million of the film's budget from advertisers. Of course, the 50-year series of films are no stranger to product placement, with everything from Rolex watches to Sony Ericsson phones to Aston Martin sports cars helping to whet consumers' appetites.

Building a Critical Skill

Building Common Ground LO 12-6

A common ground avoids the me-against-you of some persuasive situations and suggests that both you and your audience have a mutual interest in solving the problems you face. To find a common ground, we analyze the audience; understand their biases, objections, and needs; and identify with them so we can make them identify with us. This analysis can be carried out in a cold, manipulative way. It can also be based on a respect for and sensitivity to the audience's position.

Readers are highly sensitive to manipulation. No matter how much you disagree, respect your audience's intelligence. Try to understand why they believe or do something and why they may object to your position. If you can understand your readers' initial positions, you'll be more effective—and you won't alienate your readers by talking down to them.

The best common grounds are specific. Often a negative—a problem the reader will want to solve—makes a good common ground.

Weak common ground: This program has had some difficulty finding enough individuals to volunteer their services for the children. As a result, we are sometimes unable to provide the one-on-one mentoring that is our goal.

Improved common ground: On five Sundays in the last three months, we've had too few volunteers to provide one-on-one mentoring. Last Sunday, we had just two college students to take eight children to the Museum of Science and Industry.

Generalizations are likely to bore the reader. Instead, use the idea behind the generalization to focus on something the reader cares about.

Weak common ground: We all want this plant to be profitable.

Improved common ground: We forfeited a possible \$186,000 in profits last summer due to a 17% drop in productivity.

In your common ground, emphasize the parts of your proposal that fit with what your audience already does or believes. An employee of 3M wanted to develop laser disks. He realized that 3M's previous products were thin and flat: Scotch tape, Post-it Notes,TM magnetic tape. When he made his presentation to the group that chose new products for development, he held his prototype disk horizontally, so his audience saw a flat, thin object rather than a large, round, recordlike object. Making his project fit with the audience's previous experience was a subtle and effective emotional tool to make it easier for the audience to say yes.

Use audience analysis to evaluate possible common grounds. Suppose you want to install a system to play background music in a factory. To persuade management to pay for the system, a possible common ground would be increasing productivity. However, to persuade the union to pay for the system, you'd need a different common ground. Workers would see productivity as a way to get them to do more work for the same pay. A better common ground would be that the music would make the factory environment more pleasant.

When you want people to change their behavior, don't criticize them. Instead, show that you're on their side and that you and they have a mutual interest in solving a problem. Changing attitudes can be extremely difficult, but people can be receptive to changing behavior if they understand why.

Writing to superiors is trickier. You may want to tone down your request by using subjunctive verbs and explicit disclaimers that show you aren't taking a yes for granted.

Arrogant: Based on this evidence, I expect you to give me a new computer.

Better: If department funds permit, I would like a new computer.

Passive verbs and jargon sound stuffy. Use active imperatives—perhaps with “Please”—to create a friendlier tone.

Stuffy: It is requested that you approve the above-mentioned action.

Better: Please authorize us to create a new subscription letter.

Offer a Reason for the Reader to Act Promptly

The longer people delay, the less likely they are to carry through with the action they had decided to take. In addition, you want a fast response so you can go ahead with your own plans.

Request action by a specific date. Always give people at least a week or two: They have other things to do besides respond to your requests. Set deadlines in the middle of the month, if possible. If you say, “Please return this by March 1,” people will think, “I don’t need to do this till March.” Ask for the response by February 28 instead. If you can use a response even after the deadline, say so. Otherwise, people who can’t make the deadline may not respond at all.

Show why you need a quick response:

- **Show that the time limit is real.** Perhaps you need information quickly to use it in a report that has a due date. Perhaps a decision must be made by a certain date to catch the start of the school year, the holiday selling season, or an election campaign. Perhaps you need to be ready for a visit from out-of-town or international colleagues.
- **Show that acting now will save time or money.** If business is slow and your industry isn’t doing well, then your company needs to act now (to economize, to better serve customers) in order to be competitive. If business is booming and everyone is making a profit, then your company needs to act now to get its fair share of the available profits.
- **Show the cost of delaying action.** Will labor or material costs be higher in the future? Will delay mean more money spent on repairing something that will still need to be replaced?

Persuasion can be based on positive or negative appeals. Part I of this exhibition of World War II poster art presents positive appeals focusing on confidence, patriotism, and strength. Part II presents negative appeals: suspicion, fear, and hate.

What are the most common kinds of persuasive messages? LO 12-7

► *Orders, collection letters, performance appraisals, and letters of recommendation.*

Orders, collection letters, performance appraisals, and letters of recommendation are among the most common varieties of persuasive messages.

Orders

Orders may be written on forms, phoned in, or made by clicking boxes on the web. When you write an order,

- Be specific. Give model or page numbers, colors, finishes, and so forth.
- Tell the company what you want if that model number is no longer available.
- Double-check your arithmetic, and add sales tax and shipping charges.

Debt collectors are turning to social networking pages to track down debtors, and U.S. courts can also authorize attorneys to use MySpace and Facebook to serve legal documents.

Collection Letters

Most businesses find that phoning rather than writing results in faster payment. But as more and more companies install voice-mail systems, you may sometimes need to write letters when leaving messages doesn’t work.

Collection letters ask customers to pay (as they have already agreed to do) for the goods and services they have already received. Good credit departments send a series of letters. Letters in the series should be only a week or two apart. Waiting a month between letters implies you’re prepared to wait a long time—and the reader will be happy to oblige you!

Early letters are gentle, assuming that the reader intends to pay but has met with temporary reverses or has forgotten. However, the request should assume that the check

has been mailed but did not arrive. A student who had not yet been reimbursed by a company for a visit to the company's office put the second request in the P.S. of a letter refusing a job offer:

P.S. The check to cover my expenses when I visited your office in March hasn't come yet. Could you check to see whether you can find a record of it? The amount was \$490 (airfare \$290; hotel room \$185; taxi \$15).

If one or two early letters don't result in payment, call the customer to ask if your company has created a problem. It's possible you shipped something the customer didn't want or sent the wrong quantity. It's possible that the invoice arrived before the product and was filed and forgotten. It's possible that the invoice document is poorly designed, so customers set it aside until they can figure it out. If any of these situations apply, you'll build goodwill by solving the problem rather than arrogantly asking for payment.¹⁰

Middle letters are more assertive in asking for payment. Figure 9.2 (◀◀ p. 128) gives an example of a middle letter. Other middle letters offer to negotiate a schedule for repayment if the reader is not able to pay the whole bill immediately, may remind the reader of the importance of a good credit rating (which will be endangered if the bill remains unpaid), educate the reader about credit, and explain why the creditor must have prompt payment.

Unless you have firm evidence to the contrary, assume that readers have some legitimate reason for not yet paying. Even people who are "juggling" payments because they do not have enough money to pay all their bills or people who will put payment off as long as possible will respond more quickly if you do not accuse them. If a reader is offended by your assumption that he or she is dishonest, that anger can become an excuse to continue delaying payment.

Late letters threaten legal action if the bill is not paid. Under federal law, the writer cannot threaten legal action unless he or she actually intends to sue. Other regulations also spell out what a writer may and may not do in a late letter.

Many small businesses find that establishing personal relationships with customers is the best way to speed payment.

Jonathan A. Segal points out errors managers make when doing performance appraisals. Among them are stereotyping, one-sided dialogue, and using labels rather than behaviors. One, the "like me bias," is so problematic the U.S. Equal Employment Opportunity Commission created a task force to investigate its effect on the workplace. The bias occurs when managers unconsciously hire and then sometimes evaluate employees more favorably simply because they remind the managers of themselves.

Source: Jonathan A. Segal, "The Dirty Dozen Performance Appraisal Errors," *Bloomberg Businessweek*, January 14, 2011, http://www.businessweek.com/managing/content/jan2011/ca20110114_156455.htm.

Performance Appraisals

At regular intervals, supervisors evaluate, or appraise, the performance of their subordinates. In most organizations, employees have access to their files; sometimes they must sign the appraisal to show they've read it. The superior normally meets with the subordinate to discuss the appraisal.

Figure 12.5 shows a performance appraisal for a member of a student collaborative group.

As a subordinate, you should prepare for the appraisal interview by listing your achievements and goals. Where do you want to be in a year or five years? What training and experience do you need to reach your goals? Also think about any weaknesses. If you need training, advice, or support from the organization to improve, the appraisal interview is a good time to ask for this help.

Appraisals need to both protect the organization and motivate the employee. These two purposes conflict. Most of us will see a candid appraisal as negative; we need praise and reassurance to believe we're valued and can do better. But the praise that motivates someone to improve can come back to haunt the company if the person does not eventually do acceptable work. An organization is in trouble if it tries to fire someone whose evaluations never mention mistakes.

Figure 12.5 A Performance Appraisal

February 13, 2013

To: Barbara Buchanan

From: Brittany Papper **BAP**

Subject: Your Performance Thus Far in Our Collaborative Group

Overall evaluation

You have been a big asset to our group. Overall, our business communication group has been one of the best groups I have ever worked with, and I think that only minor improvements are needed to make our group even better.

Specific observations provide dates, details of performance

What You're Doing Well

You demonstrated flexibility and compatibility at our last meeting before we turned in our proposal on February 12 by offering to type the proposal since I had to study for an exam in one of my other classes. I really appreciated this because I really did not have the time to do it. I will definitely remember this if you are ever too busy with your other classes and cannot type the final report.

Other strengths

Another positive critical incident occurred February 5. We had discussed researching the topic of sexual discrimination in hiring and promotion at Midstate Insurance. As we read more about what we had to do, we became uneasy about reporting the information from our source who works at Midstate. I called you later that evening to talk about changing our topic to a less personal one. You were very understanding and said that you agreed that the original topic was a touchy one. You offered suggestions for other topics and had a positive attitude about the adjustment. Your suggestions ended my worries and made me realize that you are a positive and supportive person.

Specific recommendations for improvement

Your ideas are a strength that you definitely contribute to our group. You're good at brainstorming ideas, yet you're willing to go with whatever the group decides. That's a nice combination of creativity and flexibility.

Areas for Improvement

Two minor improvements could make you an even better member.

The first improvement is to be more punctual to meetings. On February 5 and February 8 you were about 10 minutes late. This makes the meetings last longer. Your ideas are valuable to the group, and the sooner you arrive the sooner we can share in your suggestions.

Specific behavior to be changed

The second suggestion is one we all need to work on. We need to keep our meetings positive and productive. I think that our negative attitudes were worst at our first group meeting February 5. We spent about half an hour complaining about all the work we had to do and about our busy schedules in other classes. In the future if this happens, maybe you could offer some positive things about the assignment to get the group motivated again.

Positive, forward-looking ending

Overall Compatibility

I feel that this group has gotten along very well together. You have been very flexible in finding times to meet and have always been willing to do your share of the work. I have never had this kind of luck with a group in the past and you have been a welcome breath of fresh air. I don't hate doing group projects any more!

Arguably, a good sales letter can be a work of art, and there are many approaches to writing one. Microsoft's Joanna L. Krotz offers 11 tips for writing effective sales letters, including building trust in the letter's opening, establishing credibility quickly, adding an incentive, and throwing in a call to action. Colorado State University offers advice at its open-access website, as well as examples of sales letters. Templates for sales letters are included with many word processing programs, but the best letters are created for specific audiences and situations. While there are many approaches to writing a sales letter, there is no single formula, but using the techniques for direct and indirect persuasion described in this module will help you.

Sources: Joanna L. Krotz, "How to Write an Effective Sales Letter: 11 Tips," downloaded on July 14, 2012, at http://www.microsoft.com/business/en-us/resources/marketing/customer-service-acquisition/how-to-write-an-effective-sales-letter-11-tips.aspx?fbid=G16G_TpfYbp; and "Writing Guide: Sales Letters," downloaded on May 3, 2012, at http://writing.colostate.edu/guides/documents/business_writing/business_letter/Sales_letter/.

Avoid labels, such as *wrong* and *bad*, and inferences. Instead, cite specific observations that describe behavior.

Inference: Sam is an alcoholic.

Vague observation: Sam calls in sick a lot. Subordinates complain about his behavior.

Specific observation: Sam called in sick a total of 12 days in the last two months.

Inference: Sam might be an alcoholic. He might also be having a reaction to a physician-prescribed drug; he might have a mental illness; he might be showing symptoms of a physical illness other than alcoholism. A supervisor who jumps to conclusions creates ill will, closes the door to solving the problem, and may provide grounds for legal action against the organization.

Be specific in an appraisal.

Too vague: Sue does not manage her time as well as she could.

Specific: Sue's first three weekly sales reports have been three, two, and four days late, respectively; the last weekly sales report for the month is not yet in.

Without specifics, Sue won't know that her boss objects to late reports. She may think she is being criticized for spending too much time on sales calls or for not working 80 hours a week. Without specifics, she might change the wrong things in a futile effort to please her boss.

Good supervisors try not only to identify the specific problems in subordinates' behavior but also in conversation to discover the causes of the problem. Does the employee need more training? Perhaps a training course or a mentor will help. Does he or she need to work harder? Then the supervisor needs to motivate the worker and help him or her manage distractions. Is a difficult situation causing the problem? Perhaps the situation can be changed. If it can't be changed, the supervisor and the company should realize that the worker is not at fault.

Appraisals are more useful to subordinates if they make clear which areas are most important and contain specific recommendations for improvement. No one can improve 17 weaknesses at once. Which two should the employee work on this month? Is getting in reports on time more important than increasing sales? The supervisor should explicitly answer these questions during the appraisal interview.

Phrase goals in specific, concrete terms. The subordinate may think that "considerable progress toward completing" a report may mean that the project should be 15% finished. The boss may think that "considerable progress" means 50% or 85% of the total work.

Letters of Recommendation

In an effort to protect themselves against lawsuits, some companies state only how long they employed someone and the position that person held. Such bare-bones letters have themselves been the target of lawsuits when employers did not reveal relevant negatives. Whatever the legal climate, there may be times when you want to recommend someone for an award or for a job.

Letters of recommendation must be specific. General positives that are not backed up with specific examples and evidence are seen as weak recommendations. Letters of recommendation that focus on minor points also suggest that the person is weak.

Figure 9.3 (◀ p. 129) is a letter of recommendation. Either in the first or the last paragraph, summarize your overall evaluation of the person. Early in the letter, perhaps in the first paragraph, show how well and how long you've known the person.

In the middle of the letter, offer specific details about the person's performance. At the end of the letter, indicate whether you would be willing to rehire the person and repeat your overall evaluation.

Experts are divided on whether you should include negatives. Some people feel that any negative weakens the letter. Other people feel that presenting but not emphasizing honest negatives makes the letter more convincing.

In many discourse communities, the words "Call me if you need more information" in a letter of recommendation mean "I have negative information that I am unwilling to put on paper. Call me, and I'll tell you what I really think."

How can I apply what I've learned in this module? LO 12-8

- Plan your activities, and answer the PAIBOC questions.

Before you tackle the assignments for this module, examine the following problem. Figure 12.6 lists the necessary activities. As in Modules 10 and 11, the PAIBOC questions probe the basic points required for a solution. Study the two sample solutions to see what makes one unacceptable and the other one good.¹¹ The checklists at the end of the module in Figures 12.9 and 12.10 can help you evaluate a draft.

Problem

In one room in the production department of Golden Electronics Company, employees work on computer monitors in conditions that are scarcely bearable due to the heat. Even when the temperature outside is only 75°, it is over 100° in the monitor room. In June, July, and August, 24 out of 36 workers quit because they couldn't stand the heat. This turnover happens every summer.

Blogger Brian Clark considers a sales letter used by *The Wall Street Journal* as the greatest such letter of all time. The letter's opening line is "On a beautiful late spring afternoon twenty-five years ago, two young men graduated from the same college." It goes on to detail how one would become a manager for a company while the other would become its president, connecting success to knowledge and knowledge to reading *The Wall Street Journal*. Clark states that the letter to date has generated an estimated \$2 billion in revenue.

Memo persuading the boss to approve a major expenditure. Total time: 6 hours	
Planning	1½ hours
Figure costs. Develop a common ground. Answer the PAIBOC questions (◀◀ Module 1). Think about document design (◀◀ Module 5). Organize the message.	
Writing	1 hour
Draft the memo.	
Revising	3½ hours
Reread draft. Measure draft against PAIBOC questions and the checklist for problem-solving persuasive messages (Figure 12.10). Revise draft. Ask for feedback. Revise draft based on feedback. Edit to catch grammatical errors. Run spell-check. Proof by eye. Initial memo. Give document to boss.	

In a far corner of the room sits a quality control inspector in front of a small fan (the only one in the room). The production workers, in contrast, are carrying 20-pound monitors. As production supervisor, you tried to get air-conditioning two years ago, before Golden acquired the company, but management was horrified at the idea of spending \$500,000 to insulate and air-condition the warehouse (it is impractical to air-condition the monitor room alone).

You're losing money every summer. Write a memo to Jennifer M. Kirkland, operations vice president, renewing your request.

Public challenges, promises, and guarantees to overcome objections can backfire.

Todd Davis, CEO of Lifelock, a personal fraud protection company, posted his Social Security number on the side of a van to promote confidence in his company's identity theft security. Twenty-five thieves then stole the number, with one using it for a \$500 loan.

Problems can occur from bashing competitors rather than improving your own company. Blockbuster's CEO Jim Keyes publicly criticized rival Netflix while comparing himself favorably to Apple's Steve Jobs. Soon after, Blockbuster filed for bankruptcy.

Source: "10 Promotional Stunts that Horribly Backfired," downloaded on August 3, 2009, at <http://finance.yahoo.com/career-work/article/107451/10-promotional-stunts-that-horribly-backfired.html?mod=career-leadership>; and Austin Carr, "The Startup Scarlet Letter," *Fast Company*, May 11, 2012, <http://www.fastcompany.com/1837096/thestartup-scarlet-letter>.

Analysis of the Problem

P What are your **purposes** in writing or speaking?

To persuade Kirkland to authorize insulation and air-conditioning. To build a good image of myself.

A Who is (are) your **audience(s)**? How do the members of your audience differ from each other? What characteristics are relevant to this particular message?

The operations vice president will be concerned about keeping costs low and keeping production running smoothly. Kirkland may know that the request was denied two years ago, but another person was vice president then; Kirkland wasn't the one who said no.

I What **information** must your message include?

The cost of the proposal. The effects of the present situation.

B What reasons or reader **benefits** can you use to support your position?

Cutting turnover may save money and keep the assembly line running smoothly. Experienced employees may produce higher-quality parts. Putting in air-conditioning would relieve one of the workers' main complaints; it might make the union happier.

O What **objections** can you expect your reader(s) to have? What negative elements of your message must you deemphasize or overcome?

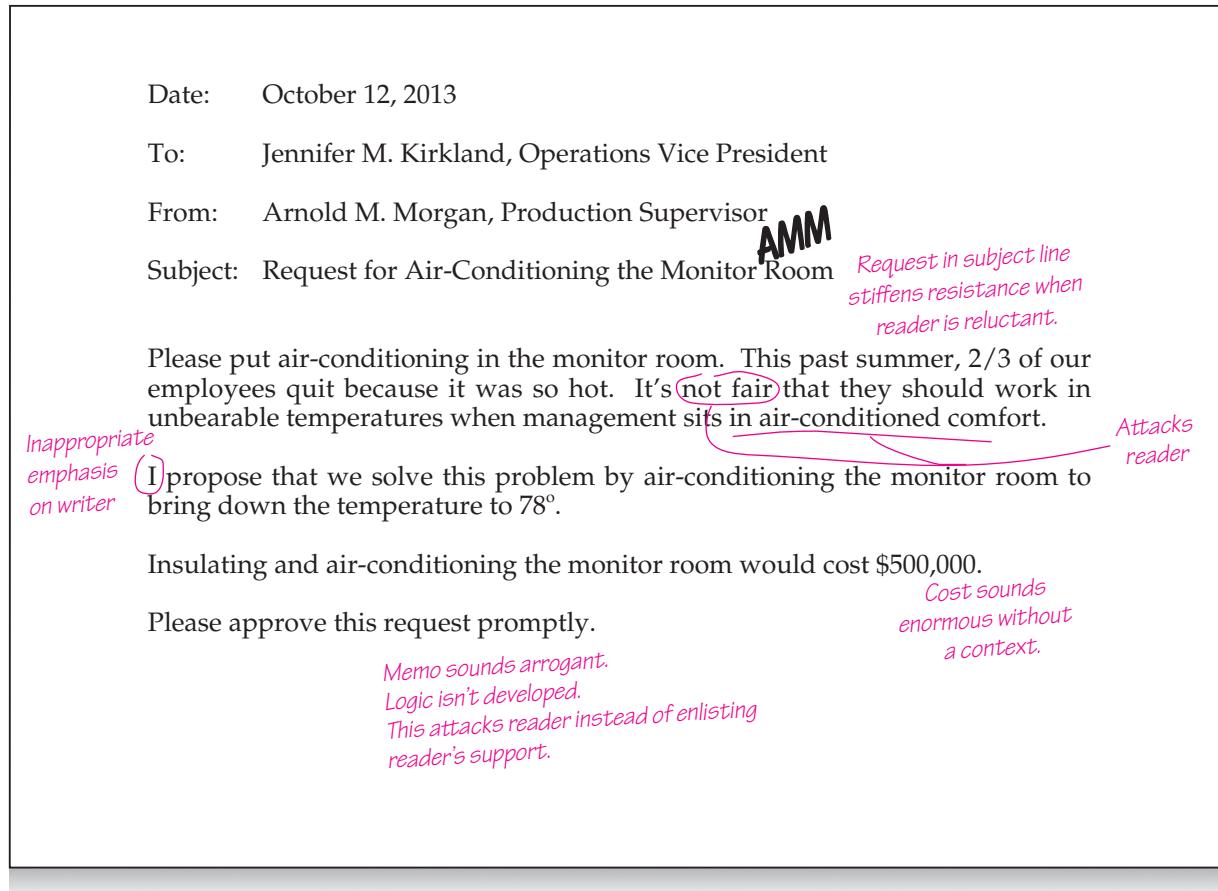

The cost. The time operations will be shut down while installation is taking place.

C How will the **context** affect the reader's response? Think about your relationship to the reader, morale in the organization, the economy, the time of year, and any special circumstances.

Prices on computer components are falling. The economy is sluggish; the company will be reluctant to make a major expenditure. Filling vacancies in the monitor room is hard—we are getting a reputation as a bad place to work. Summer is over, and the problem is over until next year.

Discussion of the Sample Solutions

Solution 1, shown in Figure 12.7, is unacceptable. By making the request in the subject line and the first paragraph, the writer invites a *no* before giving all the arguments. The writer does nothing to counter the objections that any manager will have to spending a great deal of money. By presenting the issue in terms of fairness, the writer produces defensiveness rather than creating a common ground. The writer doesn't use details or emotional appeal to show that the problem is indeed serious. The writer asks for fast action but doesn't show why the reader should act now to solve a problem that won't occur again for eight months.

Figure 12.7 An Unacceptable Solution to the Sample Problem

Solution 2, shown in Figure 12.8, is an effective persuasive message. The writer chooses a positive subject line. The opening sentence is negative, catching the reader's attention by focusing on a problem the reader and writer share. However, the paragraph makes it clear that the memo offers a solution to the problem. The problem is spelled out in detail. Emotional impact is created by taking the reader through the day as the temperature rises. The solution is presented impersonally. There are no *I*'s in the memo.

The memo stresses reader benefits: the savings that will result once the investment is recovered. The last paragraph tells the reader exactly what to do and links prompt action to a reader benefit. The memo ends with a positive picture of the problem solved.

Figures 12.9 and 12.10 provide checklists for direct requests and problem-solving persuasive messages.

Figure 12.8 A Good Solution to the Sample Problem

Date: October 12, 2013
 To: Jennifer M. Kirkland, Operations Vice President
 From: Arnold M. Morgan, Production Supervisor **AMM**
 Subject: Improving Summer Productivity

Shared problem

Golden forfeited a possible \$186,000 in profits last summer due to a 17% drop in productivity. That's not unusual: Golden has a history of low summer productivity. But we can reverse the trend and bring summer productivity in line with the rest of the year's.

Cause of problem

The problem starts in the monitor room. Due to high turnover and reduced efficiency from workers who are on the job, we just don't make as many monitors as we do during the rest of the year.

Additional reason to solve problem

Both the high turnover and reduced efficiency are due to the unbearable heat in the monitor room. Temperatures in the monitor room average 25° over the outside temperature. During the summer, when work starts at 8, it's already 85° in the tube room. By 11:30, it's at least 105°. On six days last summer, it hit 120°. When the temperatures are that high, we may be violating OSHA regulations.

Production workers are always standing, moving, or carrying 20-lb. monitors. When temperatures hit 90°, they slow down. When no relief is in sight, many of them quit.

We replaced 24 of the 36 employees in the monitor room this summer. When someone quits, it takes an average of five days to find and train a replacement; during that time, the trainee produces nothing. For another five days, the new person can work at only half speed. And even "full speed" in the summer is only 90% of what we expect the rest of the year.

More details about problem

Here's where our losses come from:

Normal production = 50 units a person each day (upd)	
Loss due to turnover:	
loss of 24 workers for 5 days =	6,000 units
24 at $\frac{1}{2}$ pace for 5 days =	3,000 units
Total loss due to turnover =	9,000 units
Loss due to reduced efficiency:	
loss of 5 upd \times 12 workers \times 10 days =	600 units
loss of 5 upd \times 36 \times 50 days =	9,000 units
Total loss due to reduced efficiency =	9,600 units
Total Loss =	18,600 units

According to the accounting department, Golden makes a net profit of \$10 on every monitor we sell. And, as you know, with the boom in computer sales, we sell every monitor we make. Those 18,600 units we don't produce are costing us \$186,000 a year.

Reader benefit in subject line

Good to show problem can be resolved

Shows detail- Set up like an arithmetic problem

Shows where numbers in paragraph 1 come from

Figure 12.8 A Good Solution to the Sample Problem

<p>Jennifer M. Kirkland</p> <p><i>Additional benefit</i></p> <p>Tells reader what to do</p>	<p>2</p>	<p>October 12, 2013</p> <p><i>Reason to act promptly</i></p>
<p>Bringing down the temperature to 78° (the minimum allowed under federal guidelines) from the present summer average of 112° will require an investment of \$500,000 to insulate and air-condition the warehouse. Extra energy costs for the air-conditioning will run about \$30,000 a year. We'll get our investment back in less than three years. Once the investment is recouped, we'll be making an additional \$150,000 a year—all without buying additional equipment or hiring additional workers.</p> <p>By installing the insulation and air-conditioning this fall, we can take advantage of lower off-season rates. Please authorize the Purchasing Department to request bids for the system. Then, next summer, our productivity can be at an all-time high.</p> <p><i>Ends on positive note of problem solved, reader enjoying benefit</i></p>		

Checklist for

Direct Requests

- If the message is a memo, does the subject line indicate the request? Is the subject line specific enough to differentiate this message from others on the same subject?
- Does the first paragraph summarize the request or the specific topic of the message?
- Does the message give all of the relevant information? Is there enough detail?
- Does the message answer questions or overcome objections that readers may have without introducing unnecessary negatives?
- Does the last paragraph ask for action? Does it give a deadline if one exists and a reason for acting promptly?

And, for all messages, not just direct requests,

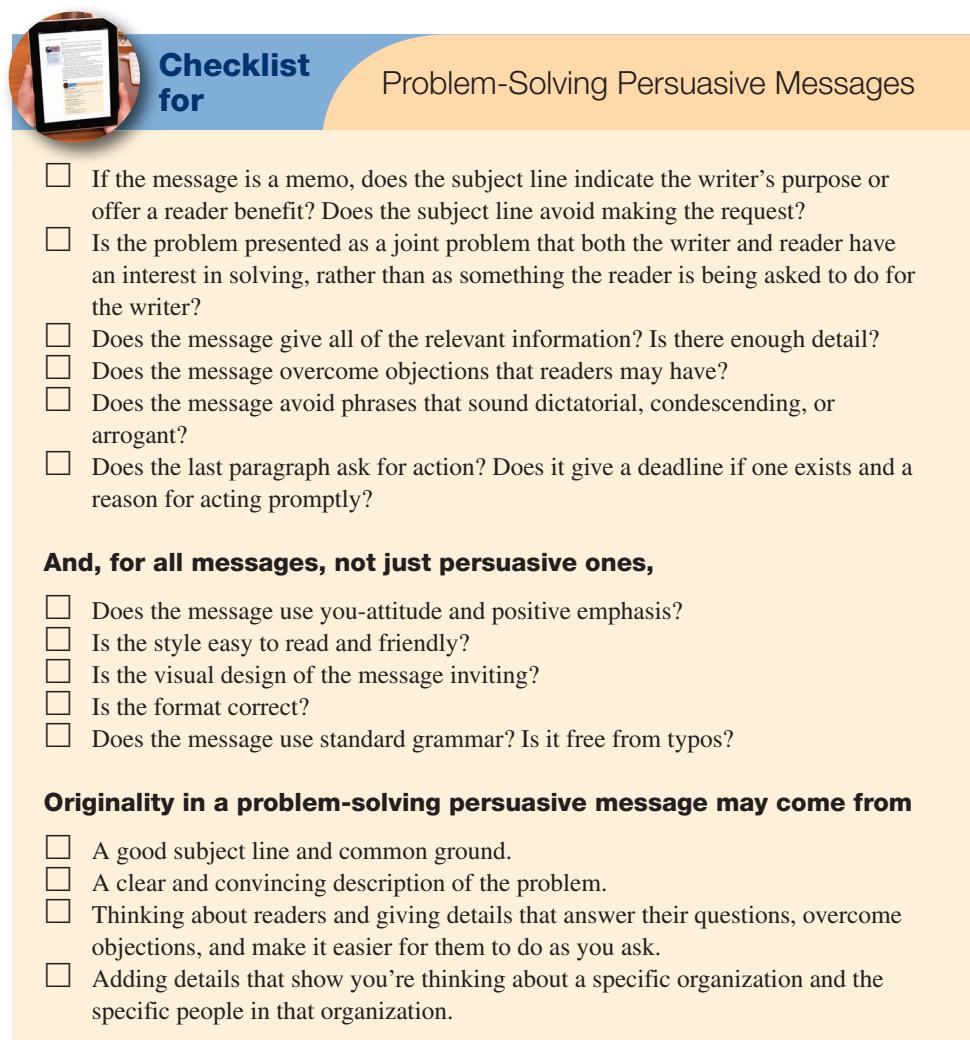

- Does the message use you-attitude and positive emphasis?
- Is the style easy to read and friendly?
- Is the visual design of the message inviting?
- Is the format correct?
- Does the message use standard grammar? Is it free from typos?

Originality in a direct request may come from

- Good lists and visual impact.
- Thinking about readers and giving details that answer their questions, overcome any objections, and make it easier for them to do as you ask.
- Adding details that show you're thinking about a specific organization and the specific people in that organization.

Figure 12.9

Figure 12.10

The figure shows a checklist titled "Checklist for Problem-Solving Persuasive Messages". It includes a small image of a tablet displaying a document. The checklist contains two sections: one for problem-solving persuasive messages and another for all messages.

Checklist for Problem-Solving Persuasive Messages

- If the message is a memo, does the subject line indicate the writer's purpose or offer a reader benefit? Does the subject line avoid making the request?
- Is the problem presented as a joint problem that both the writer and reader have an interest in solving, rather than as something the reader is being asked to do for the writer?
- Does the message give all of the relevant information? Is there enough detail?
- Does the message overcome objections that readers may have?
- Does the message avoid phrases that sound dictatorial, condescending, or arrogant?
- Does the last paragraph ask for action? Does it give a deadline if one exists and a reason for acting promptly?

And, for all messages, not just persuasive ones,

- Does the message use you-attitude and positive emphasis?
- Is the style easy to read and friendly?
- Is the visual design of the message inviting?
- Is the format correct?
- Does the message use standard grammar? Is it free from typos?

Originality in a problem-solving persuasive message may come from

- A good subject line and common ground.
- A clear and convincing description of the problem.
- Thinking about readers and giving details that answer their questions, overcome objections, and make it easier for them to do as you ask.
- Adding details that show you're thinking about a specific organization and the specific people in that organization.

Summary of Learning Objectives

- Use the **direct request pattern** when (**LO 12-1**)
 - The audience will do as you ask without any resistance.
 - You need a response only from the people who are willing to act.
 - The audience is busy and may not read all the messages received.
 - Your organization's culture prefers direct requests.
- Use the **problem-solving pattern** when (**LO 12-1**)
 - The audience is likely to object to doing as you ask.
 - You need action from everyone.
 - You trust the audience to read the entire message.
 - You expect logic to be more important than emotion in the decision.
- In a direct request, put the request, the topic of the request, or a question in the subject line. Do not put the request in the subject line of a problem-solving persuasive message. Instead, use a **directed subject line** that reveals your position on the issue or a reader benefit. Use a positive or neutral subject line even when the first paragraph will be negative. (**LO 12-2**)
- In a direct request, consider asking in the first paragraph for the information or service you want. Give readers all the information or details they will need to act on your request. In the last paragraph, ask for the action you want. (**LO 12-3**)
- Organize a problem-solving persuasive message in this way: (**LO 12-3**)
 1. Describe a problem you both share (which your request will solve).
 2. Give the details of the problem.
 3. Explain the solution to the problem.
 4. Show that any negative elements (cost, time, etc.) are outweighed by the advantages.
 5. Summarize any additional benefits of the solution.
 6. Ask for the action you want.
- Readers have a vested interest in something if they benefit directly from keeping things as they are. (**LO 12-4**)

- Use one or more of the following strategies to counter objections: **(LO 12-4)**
 - Specify how much time and/or money is required.
 - Put the time and/or money in the context of the benefits they bring.
 - Show that money spent now will save money in the long run.
 - Show that doing as you ask will benefit some group the reader identifies with or some cause the reader supports.
 - Show the reader that the sacrifice is necessary to achieve a larger, more important goal to which he or she is committed.
 - Show that the advantages as a group outnumber or outweigh the disadvantages as a group.
 - Turn the disadvantage into an opportunity.
- To make a message more persuasive, build **credibility** and **emotional appeal**, use the right tone and offer the reader a reason to act promptly. **(LO 12-5)**
- To encourage readers to act promptly, set a deadline. Show that the time limit is real, that acting now will save time or money, or that delaying action will cost more. **(LO 12-5)**
- The best common grounds are specific. Often, a negative—a problem the reader will want to solve—makes good common ground. **(LO 12-6)**
- In your common ground, emphasize the parts of your proposal that fit with what your audience already does or believes. **(LO 12-6)**
- Use audience analysis to evaluate possible common grounds. **(LO 12-6)**
- Rejections and refusals, disciplinary notices and negative performance appraisals, and layoffs and firings are the most common kinds of negative messages. **(LO 12-7)**
- Use the PAIBOC questions from Module 1 to analyze persuasive situations. **(LO 12-8)**

Assignments for Module 12

Questions for Comprehension

- 12.1** How do you decide whether to use a direct request or a problem-solving persuasive message? **(LO 12-1)**
- 12.2** How do you organize a problem-solving persuasive message? **(LO 12-3)**

- 12.3** How can you build credibility? **(LO 12-4)**
- 12.4** How do specific varieties of persuasive messages adapt the basic patterns? **(LO 12-7)**

Questions for Critical Thinking

- 12.5** What do you see as the advantages of positive and negative appeals? Illustrate your answer with specific messages, advertisements, or posters. **(LO 12-1)**
- 12.6** Is it dishonest to “sneak up on the reader” by delaying the request in a problem-solving persuasive message? **(LO 12-3)**

- 12.7** Think of a persuasive message (or a commercial) that did not convince you to act. Could a different message have convinced you? Why or why not? **(LO 12-4, LO 12-5)**

Exercises and Problems

12.8 Asking for Information for an Awards Ceremony (LO 12-1 to LO 12-8)

Your community organization recognizes people who have contributed to the community. Julio Moreno, the chief of police, sent you names and photos of four officers. But you need more information to introduce them and to write the press release you'll send the paper.

In your files, you find this letter used by the previous program chair:

Thank you for sending me the names of people to recognize. This will be very helpful. However, you did not give me enough information. I need more than just their names. Please give me more information. I want to know how long each person has worked for your organization. Do they have hobbies? (Provide information.) Supply the names of their spouses and children, if any. It would be helpful also to have the children's ages. Additionally, we plan to send special letters to the city council members whose constituents are being recognized. To this end, we need the name or number of the voting ward of each person. It would also be helpful to have the home address of each person because we want to invite both the person to be recognized and his or her spouse or guest to attend the ceremony. What exactly did the person do to deserve recognition? I anxiously await your response at your earliest convenience.

You know this letter is horrible. It's awkward and lacks you-attitude and positive emphasis. The questions aren't arranged or formatted effectively. It doesn't ask for action by a specific date.

12.9 Asking for the Right Information (LO 12-1 to LO 12-8)

In today's mail, your insurance agency received the following letter:

When I called last week to find out about insuring my boat, the clerk told me to include a recent photo. Here it is. Please send me a notice telling me that my boat is now insured—I want to take it out sailing!

The writer, Trevor Bishop, included a photo of himself.

Trevor misunderstood what the clerk said: what you need for insurance purposes is a photo of the boat, not its

12.10 Getting a Raise for a Deserving Employee (LO 12-1 to LO 12-8)

A memo from headquarters announces that the maximum merit increase (i.e., a raise when no promotion is involved) is 6%.

You've got a subordinate who, you feel, deserves a bigger raise. A year ago, Sheila Whitfield was promoted into the pre-label division of your packing department. She quickly became proficient in her duties—so much so that now others ask her for advice. You especially like her positive approach to solving problems. She sees obstacles as challenges and more often than not figures out ways to do what needs to be done within the constraints. On her own initiative, she started a program to make others in the company aware of the expense of labels and shipping to better control costs. The program has been very successful, and the company has saved

As Your Instructor Directs,

- Identify the problems in this letter.
- Rewrite the letter, adding information to make it clear and complete.

owner. Write to Mr. Bishop to ask for the photo you need—without making him feel stupid for having misunderstood what your clerk meant.

money while still using clear, informative labels with adequate packaging. She has excellent working relationships with label suppliers and her counterparts in other companies.

In her most recent performance appraisal, Sheila had 14 out of 21 boxes checked "Exceptional" (the other 7 were "commendable," the next highest category). Her overall ranking was "Exceptional." Indeed, the only two suggestions for improvement were minor ones: "(1) Continue to be aggressive, but temper the aggressiveness with diplomacy; (2) continue to expand responsibility in current position."

Write a memo to the Salary Compensation Committee recommending that an exception to the rules be made so that Sheila can be given an 8% raise.

12.11 Asking for a Raise or Reclassification (LO 12-1 to LO 12-8)

Do you deserve a raise? Should your job be reclassified to reflect your increased responsibilities (with more pay, of course)? If so, write a memo to the person with the authority to determine pay and job titles, arguing for what you want.

As Your Instructor Directs,

- Create a document or presentation to achieve the goal.
- Write a memo to your instructor describing the situation at your workplace and explaining your rhetorical choices (medium, strategy, tone, wording, graphics or document design, and so forth).

12.12 Writing Collection Letters (LO 12-1 to LO 12-8)

You have a small desktop publishing firm. Unfortunately, not all your clients pay promptly.

As Your Instructor Directs,

Write letters for one or more of the following situations.

- A \$450 bill for designing and printing a brochure for Juggles, Inc., a company that provides clowns and jugglers for parties, is now five weeks overdue. You've phoned twice, and each time the person who answered the phone promised to send you a check, but nothing has happened.
- A \$2,000 bill for creating a series of handouts for a veterinarian to distribute to clients is now 72 days overdue. This one is embarrassing: You lost track of the invoice, so you never followed up on the original (and only) bill.

c. A \$3,750 bill for designing and printing a series of 10 brochures for Creative Interiors, a local interior decorating shop, is three weeks past due. When you billed Creative Interiors, you got a note saying that the design was not acceptable and that you would not be paid until you redesigned it (at no extra charge) to the owner's satisfaction. The owner had approved the preliminary design on which the brochures were based; she did not explain in the note what was wrong with the final product. She's never free when you are; indeed, when you call to try to schedule an appointment, you're told the owner will call you back—but she never does. At this point, the delay is not your fault; you want to be paid.

- d. A \$100 bill for designing (but not actually creating) a brochure for a cleaning company that, according to its owner, planned to expand into your city may be difficult to collect. You got the order and instructions by mail and talked to the person on the phone but never met him.

12.13 Urging Employees to Handle Routine Calls Courteously (LO 12-1 to LO 12-8)

You are manager of the local power company. A recent survey had questions about recipients' attitudes toward the company. On the 7-point "friendly . . . unfriendly" scale, you came out at 2.1—with "1" being the lowest score possible.

The only contact most people have with the power company comes through monthly bills, ads, and phone calls. Many of these calls are about routine matters: whether people can delay payment, how to handle payment when they're away for extended periods of time, how to tell if there's a gas leak, how the budget payment system works. Workers answer these questions over and over and over. But the caller asks because he or she needs to know.

12.14 Persuading an Organization to Accept Student Interns (LO 12-1 to LO 12-8)

At City College, you have more would-be interns than internship positions. As Director of the Internship Program, you'd like to line up more companies to accept your students.

If your school already has an internship program, use the facts about it. If it doesn't, assume that internships

- Are open to students who have completed at least two courses in the area of the internship with grades of "B" or better.
- Can be paid or unpaid.
- Must involve substantive work supervised by someone in the organization.

12.15 Helping Students Use Credit Cards Responsibly (LO 12-1 to LO 12-8)

Your college, community college, or university is concerned that some students have high levels of credit card debt and may be using credit cards irresponsibly. Many students—especially those without full-time jobs—pay only part of the bill each month, thus compounding the original amount charged with interest rates that can be 18% annually, or even higher. Nationwide, 20% of students have credit card debt of more than \$10,000—and that doesn't count amounts owed for student loans. Excessive credit card debt makes it harder for a student to become financially independent; in extreme cases, students may have to drop out just to pay off the credit card debt.

As Your Instructor Directs,

- a. Create a message to urge students on your campus to use credit cards responsibly. Create a document that has the greatest chance of being read and heeded (not just dropped on the ground or in a trash can).
- b. Write a memo to your instructor explaining how and when the document would be distributed and why you've chosen the design you have. Show how your decisions fit the students on your campus.

You tried to call once since then (as much to try to talk him into having the brochures printed as to collect the \$100); the number was "no longer in service." You suspect the owner may no longer be in business, but you'd like to get your money if possible.

To the worker, the caller is just one more faceless voice; to the caller, the worker is the company.

Write a memo to your staff urging them to be patient and friendly when they answer questions.

Hints:

- In your town, does the power company have a monopoly, or do gas and electricity compete for customers? How might competition affect your message?
- What specifically do you want your staff to do? How could they achieve your general goals?
- How can the job be made more interesting for workers?

12.14 Persuading an Organization to Accept Student Interns (LO 12-1 to LO 12-8)

- Must involve at least 100 hours of onsite work experience during the term.

As Your Instructor Directs,

- a. Write a form letter that could be mailed to businesses, urging them to set up one or more internships.
- b. Pick an organization you know well. Write to a specific person urging him or her to set up internships in that organization.
- c. Write a news release about your school's need for more intern positions.

Hints:

- Suggest guidelines for responsible use of credit (limiting the number of credit cards, charging only what one can repay each month except in the case of an emergency, shopping around for a card with the lowest interest rate, and so forth). Suggest a way to test one's own credit savvy.
- Remind students that for continuing expenses, a loan will have a lower interest rate (and may not have to be repaid until after graduation).
- Some students may like the freebies they get with some credit cards (e.g., frequent flyer miles). How can you persuade these students that the freebies aren't worth charging more than they can pay off each month?
- Part of your audience already uses credit responsibly. Be sure the message doesn't offend these people.
- Some students in your audience may already know that they owe too much. What can students do if they already have too much debt?

12.16 Asking to Work at Home (LO 12-1 to LO 12-8)

The Industrial Revolution brought people together to work in factories, and now the Internet Age is making it possible for people to move their work back to their homes. Many kinds of collaboration and communication can take place electronically, so showing up at the office is not essential for getting the job done. Some employees enjoy the social interaction of the workplace. For others, the joy of seeing co-workers just does not make up for the time and discomfort of the daily commute.

Write a memo to your supervisor, requesting that you be allowed a flexible work arrangement in which you do some or all of your work at home. Consider your work requirements, and identify which of them do not require your physical presence. Explain how you will be able to

demonstrate that you work at least as effectively at home. Your supervisor will have to be able to justify this arrangement to his or her own boss.

Hints:

- Pick a business, government office, nonprofit agency, or educational institution that you know something about.
- For advice on making the case for working at home, visit www.workoptions.com, www.work-family.com, www.gilgordon.com, www.jala.com, and www.joannepratt.com.
- Will your organization be more persuaded by a dollars-and-cents comparison showing how much this benefit could save the company? Or would stories be more persuasive?

12.17 Persuading Employees to Keep Social Networking Sites Closed (LO 12-1 to LO 12-8)

Your company's regional vice president recently toured your department and was appalled by how many people had Facebook or other social networking sites open on their computers. In most cases, employees had social networking windows open alongside work-related tasks. Your department, which usually gets high marks, received a lower review from the vice president as a result.

While your company's policy is that only work-related sites should be opened on the job, managers and supervisors have been lax in enforcing the rule since work gets done and there have been no complaints. This latest turn of events, however, makes it necessary to remind

employees of the policy and penalties, such as written reprimands.

Some employees may be bothered by the reminder. They may feel they are able to effectively multitask and that the policy treats them like children. In addition, some employees are actually responsible for making sure updates about your company are tweeted and posted to the company's Facebook page newsfeed, so they should be allowed to have the sites open at any time.

Write an e-mail message to employees urging them to refrain from opening social networking sites unless doing so is work-related.

12.18 Handling a Sticky Recommendation (LO 12-1 to LO 12-8)

As a supervisor in a state agency, you have a dilemma. You received this e-mail message today:

From: John Inoye, Director of Personnel, Department of Taxation
 Subject: Need Recommendation for Peggy Chafez

Peggy Chafez has applied for a position in the Department of Taxation. On the basis of her application and interview, she is the leading candidate. However, before I offer the job to her, I need a letter of recommendation from her current supervisor.

Could you please let me have your evaluation within a week? We want to fill the position as quickly as possible.

Peggy has worked in your office for 10 years. She designed, writes, and edits a monthly statewide newsletter that your office puts out; she designed and maintains the department website. Her designs are creative; she's a hard worker; she knows a lot about computers.

However, Peggy is in many ways an unsatisfactory staff member. Her standards are so high that most people find her intimidating. Some find her abrasive. She's out of the office a lot. Some of that is required by her job (e.g., she takes the newsletters to the post office), but some people don't like the fact that she's out of the office so much. They also complain that she doesn't return voice-mail and e-mail messages.

You think managing your office would be a lot smoother if Peggy weren't there. You can't fire her: State employees' jobs are secure once they get past the initial six-month probationary period. Because of budget constraints, you can hire new employees only if vacancies are created by resignations. You feel that it would be pretty easy to find someone better.

If you recommend that John Inoye hire Peggy, you will be able to hire someone you want. If you recommend that John hire someone else, you may be stuck with Peggy for a long time.

As Your Instructor Directs,

- a. Write to John Inoye.
- b. Write a memo to your instructor listing the choices you've made and justifying your approach.

Hints:

- What are your options? Consciously look for more than two.
- Is it ethical to select facts or to use connotations so that you are truthful but still encourage John to hire Peggy? Is it certain that John would find Peggy's work as unsatisfactory as you do? If Peggy is hired and doesn't do well, will your credibility suffer? Why is your credibility important?

12.19 Addressing a Passenger Complaint about a Rude Flight Attendant (LO 12-1 to LO 12-8)

As director of customer relations for a major airline, you receive the following letter:

Recently, I took one of your flights from Portland, Oregon, to St. Louis, Missouri, Flight 2219. Though the flight itself was pleasant (and we even arrived a half hour early!) one of the attendants was rude. He addressed me in a less-than-friendly tone, thrust the cup holding my beverage in my face when serving me, and ran into my shoulder several times while speeding down the aisle for no particular reason. My wife and even the passenger seated next to me were shocked.

I don't know what I did to merit such treatment, but it seems to me that passengers deserve better. I should know. I'm a retired flight attendant from another airline.

Sincerely,

Tim Antilles

You investigate the situation and discover that there was only one male flight attendant on that flight, David. Usually assigned to your airline's regional carrier, which makes short trips on propeller-driven airplanes, he was a last-minute substitution for another attendant who took sick leave.

David has a brief yet spotless record with the airline, but Flight 2219 was on a much larger and more crowded airplane than he usually flies. He may have been overwhelmed

by the change. You want to discuss the matter with David before contacting Mr. Antilles, but David is on vacation for nine more days. Rather than leave Mr. Antilles waiting, you decide to contact him to express your concern and to let him know that you will follow up with David.

Write a letter to Mr. Antilles assuring him that the matter will be investigated.

12.20 Persuading Employees that a Security Camera Is Necessary (LO 12-1 to LO 12-8)

To save money, your company orders office supplies in bulk. Each department then gets its allotment of supplies, which are kept in a supply room for employees to access when needed. The room is locked at night, and only you and security guards have the key.

Large amounts of office supplies have been disappearing from your department's supply room for several months. It started with small items, such as pens, tape, and sticky notes. Now, staplers, calculators, and expensive poster and certificate frames are missing. You have no idea who is responsible, but the thefts appear to be happening during regular business hours. The total loss from the thefts is now more than \$1,000.

You tried having employees sign materials out on the honor system, but the thefts continued. Security recommends a hidden camera for the room, but the idea of "spying" on employees troubles you. You have agreed to a compromise: a security camera placed in plain view.

You believe the thefts are the work of one person and that the other 90 employees in your department are innocent. Therefore, the camera may offend people and harm employee morale.

Morale already has been down because the company has experienced profit losses the past two quarters due to increased competition. Rumors are spreading that some jobs will be transferred overseas and layoffs are imminent, though you have no solid information on management's plans. Your employees—many of whom have been with the company for more than 10 years—are apprehensive about their future with the company.

But the alternative is to allow the increasingly costly thefts to continue. You also want to avoid having to search employees and their belongings, the next step according to security if the camera fails to discourage the thief.

Write a memo to your employees explaining the need for the camera.

12.21 Asking an Instructor for a Letter of Recommendation (LO 12-1 to LO 12-8)

For a job, for a four-year school, or for graduate school, you need letters of recommendation.

As Your Instructor Directs,

- Assume that you've orally asked an instructor for a recommendation, and he or she has agreed to write one. "Write up something to remind me of what you've done in the class. Tell me what else you've done, too. And tell me what they're looking for. Be sure to tell me when the letter needs to be in and whom it goes to."
- Assume that you've been unable to talk with the instructor whose recommendation you want. Write asking for a letter of recommendation.

Hints:

- Be detailed about the points you'd like the instructor to mention.
- How well will this instructor remember you? How much detail about your performance in his or her class do you need to provide?
- Specify the name and address of the person to whom the letter should be written; specify when the letter is due. If there's an intermediate due date (e.g., if you must sign the outside of the envelope to submit the recommendation to law school), say so.

12.22 Recommending Investments* (LO 12-1 to LO 12-8)

Recommend whether your instructor should invest in a specific stock, piece of real estate, or other investment. As your instructor directs, assume your instructor has \$1,000, \$10,000, or \$100,000 to invest.

Hints:

- Pick a stock, property, or other investment you can research easily.

- What are your instructor's goals? Is he or she saving for a house? For retirement? For kids' college expenses? To pay off his or her own student loans?
- How much risk is your instructor comfortable with?
- Is your instructor willing to put time into the investment (as managing a rental house would require)?

*Based on an assignment created by Cathy Ryan, The Ohio State University.

12.23 Retrieving Your Image (LO 12-1 to LO 12-8)

As Director of Business Communication, you get this letter from Sharon Davis, a member of your college advisory board and a major donor:

(The next two inches of the letter are blocked out, and neither the signature nor typed name can be read.)

My bank received this letter from one of your soon-to-be graduates. It seems as though a closer look at writing skills is warranted.

To Whom It May Concern:

This is in reference to the loan solicitation that I received in the mail. This is the second offer that I am now inquiring about. The first offer sent to my previous address I did not respond. But after some careful thought and consideration I think it wise to consolidate my bills. Therefore I hope the information provided is sufficient to complete a successful application. I think the main purpose of this loan is to enable me to repair my credit history. I have had problems in the past because of job status as part-time and being a student. I will be graduating in June and now I do have a full-time job. I think I just need a chance to mend the past credit problems that I have had.

As Your Instructor Directs,

Write to

- a. The faculty who teach business communication, reminding them that the quality of student writing may affect fund-raising efforts.

- b. Ms. Davis, convincing her that indeed your school does make every effort to graduate students who can write.

12.24 Persuading Tenants to Pay the Rent (LO 12-1 to LO 12-8)

As the new manager of an apartment complex, this message is in the files:

ATTENTION!**DERELICTS**

If you are a rent derelict (and you know if you are) this communique is directed to you!

RENT IS DUE THE 5TH OF EACH MONTH AT THE LATEST!

LEASE HAS A 5-DAY GRACE PERIOD UNTIL THE 5TH OF THE MONTH NOT THE 15TH.

If rent is not paid in total by the 5th, you will pay the \$25.00 late charge. You will pay the \$25.00 late charge when you pay your late rent or your rent will not be accepted.

Half of you people don't even know how much you pay a month. Please read your lease instead of calling up to waste our time finding out what you owe per month! Let's get with the program so I can spend my time streamlining and organizing maintenance requests. My job is maintenance only.

RENT PAYMENT IS YOUR JOB!

If you can show up for a test on time, why can't you make it to the rental office on time or just mail it.

P.S. We don't take cash any longer due to a major theft.

This message is terrible. It lacks you-attitude and may even encourage people not to pay until the 5th.

Write to people who have been slow to pay in the past.

12.25 Writing a Performance Appraisal for a Member of a Collaborative Group (LO 12-1 to LO 12-8)

During your collaborative writing group meetings, record specific observations of both effective and ineffective things that group members do. Then evaluate the performance of the other members in your group. (If there are two or more other people, write a separate appraisal for each of them.)

In your first paragraph, summarize your evaluation. Then in the body of your memo, give specific details:

- What specifically did the person do in terms of the task? Brainstorm ideas? Analyze the information? Draft the text? Suggest revisions in parts drafted by others? Format the document or create visuals? Revise? Edit? Proofread? (In most cases, several people will have done each of these activities together. Don't overstate what any one person did.) What was the quality of the person's work?
- What did the person contribute to the group process? Did he or she help schedule the work? Raise or resolve conflicts? Make other group members feel valued and

12.26 Asking for a Job Description (LO 12-1 to LO 12-8)

Your organization has gone through a lot of changes, and you suspect that the original job descriptions used when people were hired are no longer accurate. So you'd like all employees to list their current job duties. You'd also like them to indicate which parts of their jobs they see as most important and how much time they spend on each part of the job.

Send a message to all employees asking for their job descriptions.

Hints:

- Pick a real business, government, or nonprofit group you know about.
- When is the next cycle of performance appraisals? Will these descriptions be used then?

included? Promote group cohesion? What roles did the person play in the group?

Support your generalizations with specific observations. The more observations you have and the more detailed they are, the better your appraisal will be.

As Your Instructor Directs,

- a. Write a midterm performance appraisal for one or more members of your collaborative group. In each appraisal, identify the two or three things the person should try to improve during the second half of the term.
- b. Write a performance appraisal for one or more members of your collaborative group at the end of the term. Identify and justify the grade you think each person should receive for the portion of the grade based on group process.
- c. Give a copy of your appraisal to the person about whom it is written.

- People will be reluctant to tell you they're spending lots of time on things that aren't important, and some people may honestly not know how they spend their time. How can you encourage accurate reporting? (If you ask people to keep logs for a week, be sure to also ask them if that week was typical—it may or may not be.)
- Some people will want to change their job descriptions—that is, to change their duties or the proportion of time they spend on each job task. Is that an option in your organization right now? If it isn't (or if it is an option for very few people), how can you make that clear to readers?

Polishing Your Prose

Expressing Personality

The words you choose can express personality in speech and writing. What personality do you want in your memos, letters, and reports? Friendly? Assertive? Bureaucratic? Threatening? Confident? These are just a few possibilities.

Consider the personality expressed by billionaire investment guru Warren Buffet in an annual report to the shareholders of Berkshire Hathaway, Inc.:

Given our gain of 34.1%, it is tempting to declare victory and move on. But last year's performance was no great triumph. Any investor can chalk up large returns when stocks soar, as they did in 1997. In a bull market, one must avoid the error of the preening duck that quacks boastfully after a torrential rainstorm, thinking that its paddling skills have caused it to rise in the world. A right-thinking duck would instead compare its position after the downpour to that of the other ducks in the pond.

So what's our duck rating for 1997? The table on the facing page shows that though we paddled furiously last year, passive ducks that simply invested in the S&P Index rose almost as fast as we did. Our appraisal of 1997's performance then: Quack.

How would you describe the personality of this narrator? Does he sound “folksy”? Fatherly? Grandfatherly? Educated? Confident? How do you know? How does his personality compare to your expectations for someone in the investment field? Someone who is wealthy? Is this someone you would like to know?

Personality is individual. However, we all have control over the words we choose to convey our personalities. To understand your own personality in communication, first see if you can understand the personalities that others convey. Then compare their words and tone to your own.

Exercises

Read the following passages. How would you characterize the narrative voice in each? Which voices seem appropriate for good business communication? Try using your own words to communicate the same basic message.

1. Don’t think. Don’t talk. Don’t even blink. Just do your job!
2. Per the discussion of the 10th and concerning the interested parties, we are establishing the continuance of the aforementioned procedural matters, as referenced by the undersigned in document A, subsection C, paragraphs 1 and 2.

3. What I can’t understand—I mean, beyond the fact that some college out there actually granted you a degree—is how that brain of yours actually managed to generate enough power to submit an application to this company in the first place. I mean, you may very well be a modern scientific miracle.
4. Oh, THANK YOU, THANK YOU, THANK YOU, for hiring me!! You WON’T be disappointed!!!!!!!!!
5. Yeah, thanks for shopping here.
6. BIF AISI BYTM LOL.
7. It’s like, you know, the whole thing, okay, and, you know, I’m really glad that we, okay, like, talked about it before we signed any, you know, contract.
8. This is so simple even a man can figure out how to do it.
9. You will no doubt be suitably impressed with the care in which I have completed this report. It is, if I may say so myself, the best work I have ever done.
10. *Yes, sir:* After all, we are after all here to serve customers like you, *sir*. It’s our job to make your shopping experience exceptional, *sir*. After all, no matter how outrageous, the customer is always right, *sir*.

Check your answers to the odd-numbered exercises at the back of the book.

E-Mail Messages, Web Writing, and Technology

LEARNING OBJECTIVES

Module 13 can help you to write more effectively with e-mail and for the web. After completing the module, you should be able to

- | | |
|--|--|
| LO 13-1 Apply strategies for e-mail message organization. | LO 13-5 Identify rules for “netiquette.” |
| LO 13-2 Create subject lines for e-mail messages. | LO 13-6 Apply strategies for e-mail attachment use. |
| LO 13-3 Apply strategies for e-mail message style and content. | LO 13-7 Apply strategies for writing on the web. |
| LO 13-4 Apply strategies for time management with e-mail and other tasks. | LO 13-8 Recognize other technologies for the web. |

Technology continues to change the way we work and the way we write. Not too long ago, a pen, typewriter, and telephone were the primary equipment for business communicators; then came word processors, fax machines, and e-mail. Today, we can choose from a host of tools that includes cell phones, web pages, videoconferencing, and instant messaging, each one ever increasing its features and benefits.

Because technology changes so rapidly, so do expectations for how and when to use it. A 21st-century communicator understands that adaptation is the key to staying current, and being open to learning new technologies is a must. Use Module 13 as a starting point, and expect change.

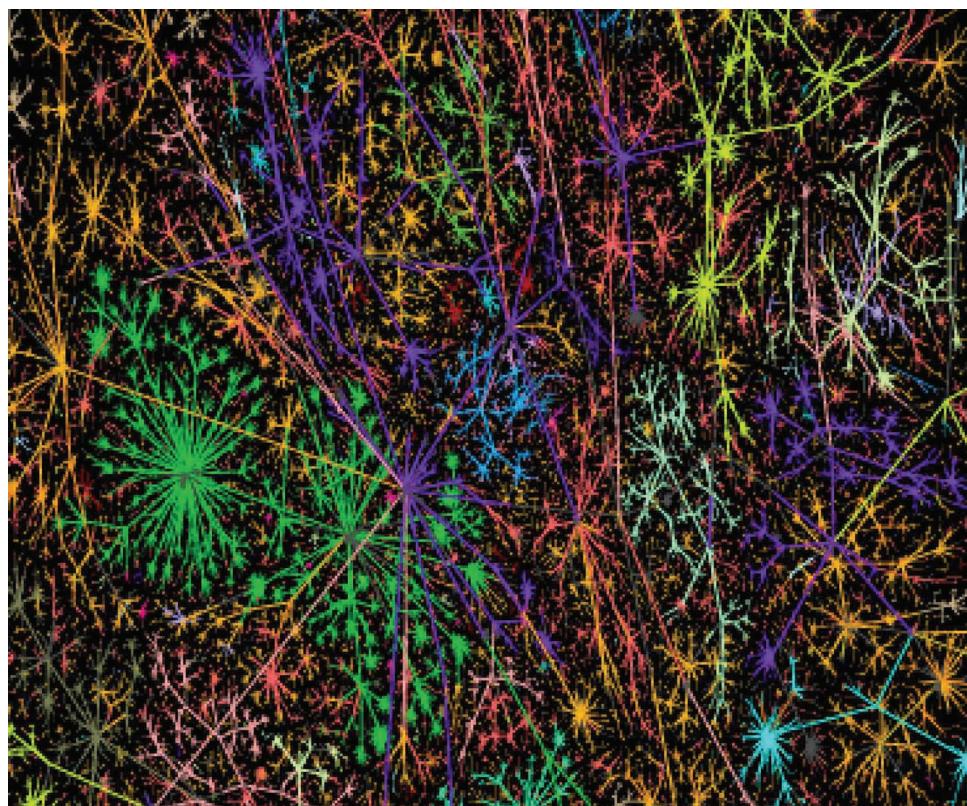

This map shows the shortest path taken by a test message sent in January 2002 from Somerset, New Jersey, to more than 120,000 registered Internet nodes. Each node may be one computer or many joined in a network. Each color represents a different service provider. In the decade since, the lines of digital communication have increased substantially.

While texting and using social networking pages are increasingly popular ways to communicate, e-mail remains a common tool in business. Avoid composing e-mails when you are upset. Treat e-mails as professionally as any business message by proofreading and checking for accuracy. Like your authors, Bill Husted recommends giving the reader enough information in any e-mail reply so the reader fully understands your response. If you're not including the original e-mail, at least specify relevant details: "I checked, and I'm free on Wednesday for the short interview" instead of "Wednesday is fine."

Andrew Rosen warns against over-relying on e-mail—use a different tool, for instance, if the message is urgent—and failing to use ordinary pleasantries, like a greeting at the beginning and a thank you at the end of the message.

Source: Husted, "Rules to Remember When Sending Your E-Mails," *The Columbus Dispatch*, September 7, 2009, http://www.dispatch.com/live/content/business/stories/2009/09/07/technobuddy_0907.ART_ART_09-07-09_A7_M7EVEH3.html?sid=101; and Andrew G. Rosen, "18 Common Work E-Mail Mistakes," January 18, 2011, <http://finance.yahoo.com/news/18-Common-Work-Email-usnews-1004018741.html?x=0>.

When you start a new job, you may have a short grace period before you have to write paper documents. But most employers will expect you to "hit the ground running" with e-mail. It's likely that you'll respond to—and perhaps initiate—e-mail messages during your very first week at work.

As you write e-mail messages, keep these guidelines in mind:

- Although e-mail feels informal, it is not private, as a conversation might be. Your employer may legally check your messages. And a message sent to one person can be printed out or forwarded to others without your knowledge or consent. Don't be indiscreet in e-mail.
- All the principles of good business writing still apply with e-mail. Remember your attitude (◀◀ p. 90) and positive emphasis (◀◀ p. 101). Use reader benefits (◀◀ p. 112) when they're appropriate. Use the pattern of organization that fits the purpose of the message.
- Because e-mail feels like talking, some writers give less attention to spelling, grammar, and proofreading. Many e-mail programs have spell-checkers; use them. Check your message for grammatical correctness and to be sure you've included all the necessary information.
- Reread and proofread your message before sending it.
- E-mail messages have to interest the reader in the subject line and first paragraph. If the message is longer than one screen, the first screen must interest the reader enough to make him or her continue. E-mail messages to people who report directly to you are easy because people will read anything from their supervisors. But writing to people who are not in a direct reporting relationship or to people outside your unit or organization takes more care.

How should I set up e-mail messages? LO 13-1

- Formats are still evolving.

Because there are so many different e-mail programs and formats, for the sake of the discussion here, focus on the general concepts they all share. Then, adapt them to your specific e-mail program.

Most e-mail programs prompt you to supply the various parts of the format. For example, a blank Eudora screen prompts you to supply the name of the person the message goes to and the subject line. *Cc* denotes computer copies; the recipient will see that these people are getting the message. *Bcc* denotes blind computer copies; the recipient does not see the names of these people. Most e-mail programs also allow you to attach documents from other programs. Thus you can send someone a document with formatting, drafts of PowerPoint slides, or the design for a brochure cover. The computer program supplies the date and time automatically. Some programs allow you to write a message now and program the future time at which you want it to be sent.

Some aspects of e-mail format are still evolving. In particular, some writers treat e-mail messages as if they were informal letters; some treat them as memos. Even though the e-mail screen has a “To” line (as do memos), some writers still use an informal salutation, as in Figure 13.1. The writer in Figure 13.1 ends the message with a signature block. You can store a signature block in the e-mail program and set the program to insert the signature block automatically. In contrast, the writer in Figure 13.2 omits both the salutation and his name. When you send a message to an individual or a group you have set up, the “From:” line will have your name and e-mail address. If you post a message to a group someone else has set up, such as a listserv, be sure to give at least your name and e-mail address at the end of your message, as some listservs strip out identifying information when they process messages.

Figure 13.1 A Basic E-Mail Message in Eudora (direct request)

The screenshot shows a window titled "Eudora" with a message composition screen. At the top, there's a toolbar with icons for file operations. Below the toolbar, the message header fields are displayed:

- To:** larenzor@artemis.com
- From:** Sacha Zevchik <zevchik.2@acme.com>
- Subject:** Please Protect Computers
- Cc:**
- Bcc:**
- Attached:**

Below the header, a text area contains the message body. The first line starts with "Roger--" followed by a signature. To the left of the signature, the text "No need to indent paragraphs." is written in blue. The signature itself is preceded by "Write your message below the line." in blue. The message body continues with "Just a reminder: when your workers install the ceiling insulation next week, be sure to have them put plastic sheeting over the desks and computers to protect them from sawdust, insulation, and debris." and "Thanks!"

At the bottom of the message, there's a signature block:

Sacha Zevchik
Administrative Assistant
Voice: 630-555-1000 ext. 117
Fax: 630-555-2391
E-Mail: zevchik.2@acme.com

Annotations in blue text provide additional context:

- "The writer can type in the e-mail address directly."
- "System puts in writer's name and e-mail address."
- "Write your message below the line."
- "The writer creates the signature block once, then can use it automatically. Some e-mail programs permit you to store several signature blocks with different levels of formality."

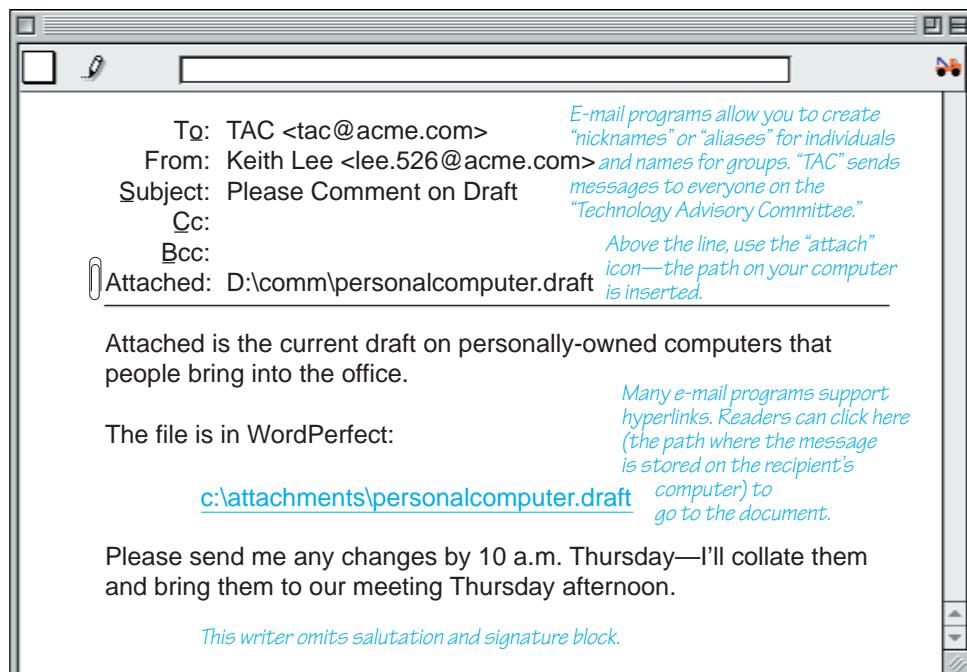

With smartphones now accounting for 54% of the U.S. cell phone market, options to check e-mail and the web continue to evolve and increase. More than half of the smartphones purchased today use the Android operating system.

Source: Nidhi Subbaraman, "Smartphone Sales on the Rise in the U.S., Half of Those Are Androids," *Fast Company*, July 13, 2012, <http://www.fastcompany.com/1842795/smartphone-sales-on-the-rise-in-the-us-half-of-those-are-androids>.

After one date and then ignored text and voice-mail messages, a rebuffed man tracked down the woman's e-mail address and sent her a 1,600-word screed on the matter. Among his assertions were that she must have found him physically attractive or she would have turned him down in the first place, that she gave all of the classic flirtatious "preening" signs, such as playing with her hair, and that she said, "It was nice to meet you" at the end of the date, an inconclusive statement that contributed to his confusion as to whether they had the potential for a serious relationship. Despite his requests for a second date, the only outcome was the e-mail message went viral on the Internet.

Source: Tara Kelly, "Investment Manager's Embarrassing e-mail Lands on Reddit, Goes Viral," December 9, 2011, http://www.huffingtonpost.com/2011/12/07/investment-manager-embarrassing-email_n_1135279.html.

Figure 13.2 An E-Mail Message with an Attachment (direct request)

When you hit “reply,” the e-mail program automatically uses “Re:” (Latin for *about*) and the previous subject. The original message is set off (see Figure 13.3). You may want to change the subject line to make it more appropriate for your message.

If you prepare your document in a word processor, use two-inch side margins to create short line lengths. If the line lengths are too long, they’ll produce awkward line breaks as in Figure 13.3. Use two- or three-space tab settings to minimize the wasted space on the screen.

What kinds of subject lines should I use for e-mail messages? **LO 13-2**

 Site to See

Go to www.ftc.gov/bcp/edu/pubs/consumer/alerts/alt127.shtm for tips on avoiding *phishing*, an Internet scam where e-mail or pop-up messages trick people into revealing personal information, such as bank account or Social Security numbers.

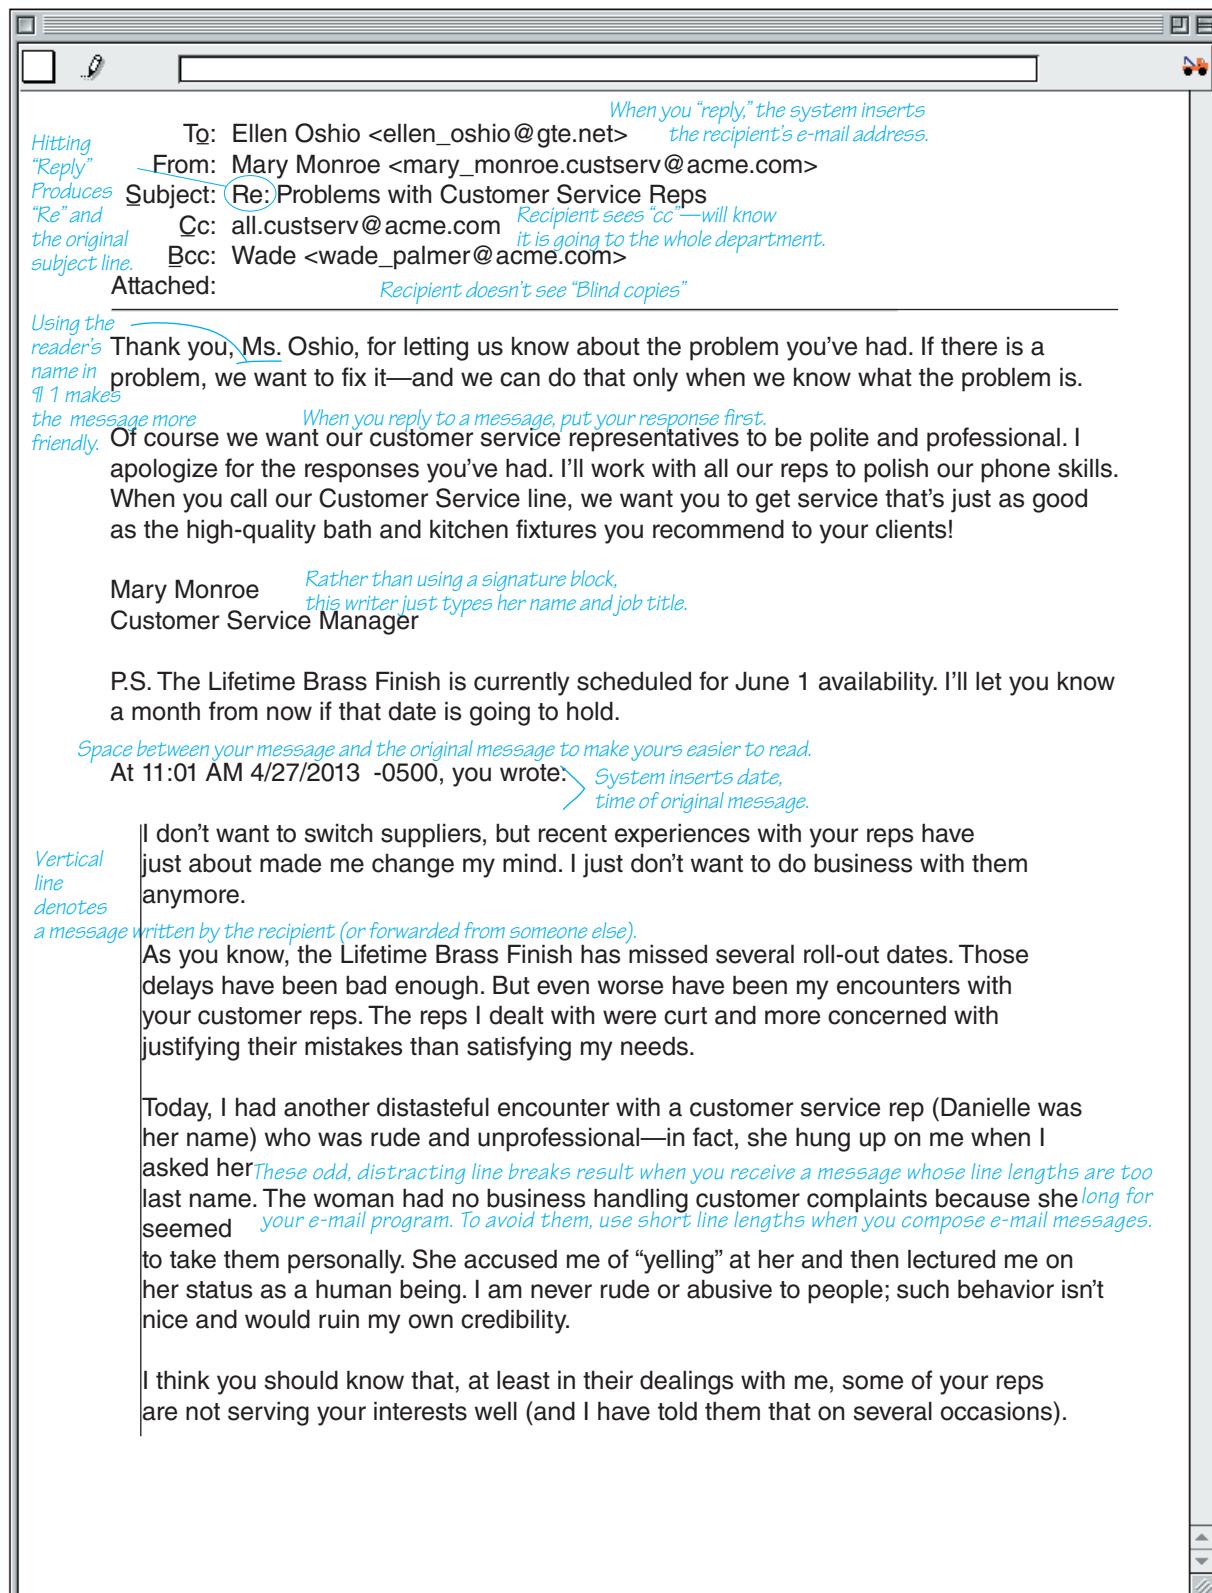

► *Be specific, concise, and catchy.*

Subject lines in e-mail are even more important than those in letters and memos because it’s so easy for an e-mail user to hit the Delete key. Subject lines must be specific, concise, and catchy. Many e-mail users get so many messages that they don’t bother reading messages if they don’t recognize the sender or if the subject doesn’t catch their interest.

Try to keep the subject line short. If that’s difficult, put the most important part into the first few words because some e-mail programs only show the first 28 characters of the subject line.

If your message is very short, you may be able to put it in the subject line. “EOM” (end of message) tells your reader that there is no additional information in the body of the message.

Subject: Will Attend 3 PM Meeting EOM
Subject: Need Password for Survey EOM

Figure 13.3 An E-Mail Reply with Copies (response to a complaint)

Communication technologies are only valuable if they solve problems better than more conventional options.

Keep Subject Lines Short	
Try to keep the subject line short. If that's difficult, put the most important part into the first few words because some e-mail programs only show the first 28 characters of the subject line.	

Subject Lines for Informative and Positive E-Mail Messages

If you have good news to convey, be sure it's in the subject line. Be as brief as you can.

The following subject lines would be acceptable for informative and good news e-mail messages:

- Subject: Travel Plans for Sales Meeting
- Subject: Your Proposal Accepted
- Subject: Reduced Prices During February
- Subject: Your Funding Request Approved

When you reply to a message, the e-mail system automatically creates a subject line “Re: [subject line of message to which you are responding].” If the subject line is good, that's fine. If it isn't, you may want to create a new subject line. And if a series of messages arises, create a new subject line. “Re: Re: Re: Question” is not an effective subject line.

Subject Lines for Negative E-Mail Messages

When you say “no” to an e-mail request, just hit “reply” and use “Re:” plus whatever the original subject line was for your response. When you write a new message, you will have to decide whether to use the negative in the subject line. The subject line should contain the negative when

- The negative is serious. Many people do not read all their e-mail messages. A neutral subject line may lead the reader to ignore the message.
- The reader needs the information to make a decision or act.
- You report your own errors (as opposed to the reader's).

Thus the following would be acceptable subject lines in e-mail messages:

- Subject: We Lost McDonald's Account
- Subject: Power to Be Out Sunday, March 12
- Subject: Error in Survey Data Summary

In other situations, a neutral subject line is acceptable.

Subject: Results of 360° Performance Appraisals

Subject Lines for Persuasive E-Mail Messages

The subject line of a persuasive e-mail message should make it clear that you're asking for something. If you're sure that the reader will read the message, something as vague as "Request" may work. Most of the time, it's better to be more specific.

Subject: Move Meeting to Tuesday?

Subject: Need Your Advice

Subject: Provide Story for Newsletter?

Subject: Want You for United Way Campaign

A study of more than 977 million e-mail messages by marketer MailerMailer found that shorter subject lines attract more clicks, and any subject line longer than 50 characters is a bad idea.

Source: Julian Sanction, "The Art of the E-Mail Subject Line," *Bloomberg Businessweek*, June 28, 2012, <http://www.businessweek.com/articles/2012-06-28/the-art-of-the-e-mail-subject-line/>.

Should I write e-mail messages the same way I write paper messages? LO 13-3

- *Negative and persuasive messages will be more direct.*

Readers read and reply to e-mail quite rapidly. Dealing with 80 to 100 messages in 20 or 30 minutes is normal. Write e-mail messages so that it's easy for readers to understand and act on them quickly. Writing messages so that the reader can deal with them quickly means taking time to plan, revise, and proofread, just as you do with paper messages. Figure 13.4 shows how a writer might allocate time in responding to a simple e-mail request. Figure 13.5 lists the activities needed for a more complex e-mail message.

Writing Positive and Informative E-Mail Messages

E-mail is especially appropriate for positive and informative messages. Figure 13.3 is an example of a positive response to a customer complaint.

Writing Negative E-Mail Messages

Major negatives, such as firing someone, should be delivered in person, not by e-mail. But e-mail is appropriate for many less serious negatives.

Figure 13.4 Allocating Time in Writing a Simple E-Mail Response (Your time may vary.)	
E-mail answering a simple question. Total time: 7 minutes	
Planning	2 minutes
Read the question.	
Gather any information necessary for reply.	
Plan the message.	
Writing	2 minutes
Draft the message.	
Revising	3 minutes
Reread draft.	
Make small changes.	
Run spell-check.	
Proof by eye.	
Send the message.	

A ploy to persuade customers to check out Toyota's Matrix auto instead became the focus of a \$10 million lawsuit. Amber Duick alleged she was terrified for five days after cryptic e-mail messages sent to her by "Sebastian Bowler"—who wrote he was fleeing the law and knew where she lived—began showing up. The fictitious character was created by global marketing firm Saatchi & Saatchi, which along with Toyota, claimed Duick had opted into participating in the campaign after clicking on a link in a personality test. But Duick's attorney disagreed, saying that the statement Duick signed electronically was "indecipherable" and said nothing about being stalked.

Figure 13.5 Allocating Time in Writing a Persuasive E-Mail Message (Your time may vary.)

Persuasive request with attachments. Total time: 3 hours

Planning	1 hour
Understand the situation. Answer the PAIBOC questions (◀◀ Module 1). Think about document design (◀◀ Module 5). Organize the message.	
Writing	½ hour
Draft the message and attachments.	
Revising	1½ hours
Reread draft. Measure draft against PAIBOC questions and checklist for problem-solving persuasive messages (◀◀ Figure 12.10). Revise draft and attachments. Ask for feedback. Revise draft based on feedback. Edit to catch grammatical errors. Run spell-check. Proof by eye. Send the message.	

Never write e-mail messages when you're angry. If a message infuriates you, wait till you're calmer before you reply—and even then, reply only if you must. Writers using e-mail are much less inhibited than they would be on paper or in person, sending insults, swearing, name-calling, and making hostile statements.¹ **Flaming** is the name given to this behavior. Flaming does not make you look like a mature, level-headed candidate for bigger things. And because employers have the right to read all e-mail, flaming—particularly if directed at co-workers, regulators, suppliers, or customers—may cause an employee to be fired.

In the body of the e-mail message, give a reason only if it is watertight and reflects well on the organization. Give an alternative, if one exists.

Edit and proofread your message carefully. An easy way for an angry reader to strike back is to attack typos or other errors.

Remember that e-mail messages, like any documents, can become documents in lawsuits. When an e-mail negative is hard to write, you may want to compose it offline so that you can revise it and even get feedback before you send the message.

Writing Persuasive E-Mail Messages

When you ask for something small or for something that is part of the reader's job duties to provide, your request can be straightforward. (See Figures 13.1 and 13.2.)

- In the body of the message, give people all the information they need to act.
- At the end of the message, ask for the action you want. Make the action as easy as possible, and specify when you need a response. You may want an immediate response now ("Let me know asap whether you can write a story for the newsletter so that I can save the space") and a fuller one later ("we'll need the text by March 4").

When you ask for something big or something that is not a regular part of that person's duties, the first paragraph must not only specify the request but also make the reader view it positively. Use the second paragraph to provide an overview of the evidence that the rest of the message will provide: Use audience analysis (◀◀ p. 19) to find a reason that will convince the reader to do as you ask. Everyone is busy, so you need to make the reader

Instant Replay

When Not to Use E-Mail

Major negatives, like firing someone, should be delivered in person, not by e-mail. But e-mail is appropriate for many less serious negatives.

Managing Your Time LO 13-4

Do you need more time? Welcome to the club! Although researchers claim we have more leisure hours than we did 25 years ago, most of us feel more overworked than ever. And the number of things you'll need to do will only increase as you assume more job responsibilities.

Managing your incoming e-mail is an essential skill for every office worker.

- Create folders, mailboxes, and filters. For example, most e-mail programs allow you to flag messages from your boss in a special color.
- Move items out of your inbox.
- Delete messages after you act on them.
- If you need to save messages, move them to folders on a specific topic or project.
- Create a “delete in 30 days” folder for items you’ll need briefly.
- Purge files periodically—at least once a month. (Once a week is better.)

Many workers benefit from managing all their activities (not just their e-mail) more efficiently. To manage your time, divide projects or incoming mail into three piles (real or imaginary). Put urgent items in the *A* pile, important items in the *B* pile, and other items in the *C* pile. Do the *A* items first. Most people find that they never get to their *C* piles.

At the end of the day, make a list of the two most important things you need to do the next day—and leave the paper where you’ll see it when you start work the next morning.

If you still don’t have enough time to get your *As* and most of your *Bs* done, you’re ready for a more systematic approach to time.

1. For at least a week, log how you spend your time. Record what you’re doing in 15-minute intervals.

2. Analyze your log to identify patterns, time obligations, time wasters, and frustrations. You may be surprised to find how much time you spend playing computer games. Or you may discover that answering e-mail takes an hour every morning—not the five minutes or so that you’d estimated.
3. Clarify your goals. What do you want to accomplish on the job and in your personal life? What intermediate steps (e.g., taking a course, learning a new skill, or sending out job applications) will you need to do to reach your goals?
4. Set short-term priorities. For the next month, what do you need to accomplish? In addition to goals for school and work, think also about building relationships, meeting personal obligations, and finding time to plan, to relax, and to think.
5. Ask for help or negotiate compromises. Maybe you and another parent can share babysitting so that you each have some time to yourselves. If your responsibilities at work are impossible, talk to your supervisor to see whether some of your duties can be transferred to someone else or whether you should stop trying to be excellent and settle for “good enough.” You won’t be willing or able to eliminate all your obligations, but sometimes dropping just one or two responsibilities can really help.
6. Schedule your day to reflect your priorities. You don’t necessarily have to work on every goal every day, but each goal should appear on your schedule at least three times a week. Schedule some time for yourself, too.
7. Evaluate your new use of time. Are you meeting more of your goals? Are you feeling less stressed? If not, go back to step 1 and analyze more patterns, obligations, time wasters, and frustrations to see how you can make the best use of the time you have.

want to do as you ask. Be sure to provide complete information that the reader will need to act on your request. Ask for the action you want.

Here's why we should do this.

Let me describe the project. Then, if you're willing to be part of it, I'll send you a copy of the proposal.

Major requests that require changes in values, culture, or lifestyles should not be made in e-mail messages.

According to a Pew Research Center study, 51% of Americans preferred vocal communication while only 31% preferred to be contacted via texts. The average adult sends about 10 texts a day but makes 12 phone calls. However, those numbers may differ according to age. An earlier survey by the Nielsen Company found the average 13- to 17-year-old sends and receives 3,339 texts a month, or more than 100 per day. People from ages 45 to 54 sent and received 323 texts a month.

What e-mail “netiquette” rules should I follow? LO 13-5

► Lurk before you leap.

E-mail communities develop their own norms. If possible, lurk a few days—read the messages without writing anything yourself—before you enter the conversation.

Follow these guidelines to be a good “netizen”:

- Never send angry messages by e-mail. If you have a conflict with someone, work it out face-to-face, not electronically.
- Use full caps only to emphasize a single word or two. Putting the whole message in caps is considered as rude as shouting.
- Send people only messages they need. Send copies to your boss or CEO only if he or she has asked you to.
- Find out how your recipient’s system works and adapt your messages to it. Most people would rather get a separate short message on each of several topics, so that the messages can be stored in different mailboxes. But people who pay a fee to download each message may prefer longer messages that deal with several topics.
- When you respond to a message, include only the part of the original message that is essential so that the reader understands your posting. Delete the rest. If the quoted material is long, put your response first, then the original material.
- When you compose a message in your word processor and call it up in e-mail, use short line lengths (set the right margin at 2.5" or 3"). That’s the way to avoid the awkward line breaks of Figure 13.3.

How and when should I use attachments? LO 13-6

► When the reader expects and needs them.

Any text document can be copied and pasted into the body of your e-mail message. Sending attachments makes the most sense when you send

- A long text document.
- A text document with extensive formatting.
- A nontext file (e.g., PowerPoint slides, html file, spreadsheet).

When you send an attachment, tell the reader what program it’s in (see Figure 13.2). Word-processing programs can generally open documents in earlier programs but not later ones.

A computer **virus** is a script that harms your computer or erases your data. You can get a virus through e-mail, and viruses can infect files that are “attached” to e-mail messages or that you download. To stay virus-free,²

- Install an antivirus program on your computer, and keep it up-to-date.
- Ask people who send you attachments to include their names in the document titles. Virus titles aren’t that specific.
- If you’re in doubt about an attachment, don’t open it.
- Forward e-mail messages only when you’re sure of the source and contents.

What style should I use when writing for the web? LO 13-7

► Use good business writing principles, but consider how people will interact with the text, too.

Good business writing style basics—being clear, concise, and complete—also work when writing for the web. Unless your page is designed for readers seeking highly technical

information, keep your style simple and conversational in tone, and use titles, headings, bulleted lists, and only necessary jargon. Draft your information using a word processor so you can edit and proofread carefully. Module 16 [▶▶ p. 272] provides more information on creating a good business style.

When drafting, think about how readers will use the information. Web surfers generally skim information, at least initially, so lengthy sentences, thick paragraphs, frequent downloads, and too many **hyperlinks**, or jumps to new pages, can discourage surfers from continuing. The same goes for unnecessary graphics or complex introductions that slow loading the page, especially for people using dial-up modems.

Because there is no hard data on how many hyperlinks are too many for readers, use your best judgment when you can't ask your audience directly. One way to check is to highlight hyperlinks in your draft. If they look like too many, they probably are. Consider making some links into buttons, putting links on a separate page, or folding the links' information into the body text. Cut unnecessary links.

Images should support the text. When you write titles and captions, consider telling a story [Module 25 ▶▶ p. 418].

John Morkes and Jakob Nielsen advocate creating “scannable text” to make Web pages accessible:³

- Highlight key words.
- Use meaningful, not clever, subheadings.
- Include bulleted lists.
- Use one idea per paragraph.
- Write in the “inverted pyramid” style of organization, with the main idea up front.
- Use half the word count of a printed page.
- Avoid “marketese,” or language that is extremely subjective and boastful.

In many organizations, the people who provide written “content” are different than the people who actually design the pages. Where possible, work with designers so that at each stage of the drafting process you can test what you've written for readability against the physical constraints of the layout. For instance, computer screens generally are wider but shallower than a printed page. If you write lengthy paragraphs or long document sections, readers may have to scroll more, which can create eyestrain, especially on monitors whose images seem to flicker due to slower refresh rates. **Frames**, or sections on the page, can organize text and reduce the need to scroll often. Module 5 [◀◀ pp. 78–79] provides information on designing effective screens.

Insist on a clean font, pleasing but contrasting colors, and text-supportive graphics rather than simply decorative ones. Keep in mind, too, that vision-impaired surfers can use the web better if you encourage a layout that accommodates them, such as one using descriptive text links that screen reader software such as Jaws can recognize.

As with any technology, the web is evolving, so expect rules to develop and change. In the meantime, keep a library of web pages you believe work as models, and where possible, test your web pages and content with people who will be using them.

Can I use blogging on the job? LO 13-7

- Yes, so long as you are professional.

Creating weblogs, or **blogging**, is an increasingly popular way of communicating on the web. Millions of bloggers post thoughts, images, and links in journal-like entries made available through the Internet and in such languages as Arabic, Chinese, English, French, German, Italian, Japanese, Portuguese, Korean, and Spanish.

Blogging is so popular, some businesses are turning to it to aid in recruiting employees, and CEOs are posting their own blogs in an effort to speak directly to customers and associates. A few people have managed to turn blogging into a career. But blogging

While blogging continues to be popular for many writers, it may be losing its appeal among younger people. According to the Internet and American Life Project at the Pew Research Center, blogging among people ages 12 to 17 fell by half from 2006 to 2009 and by two percentage points in 2010 over two years earlier for people ages 18 to 33. Many younger people prefer instead to use social networking sites like Facebook and Twitter.

Source: Verne G. Kopytoff, “Blogging by Young on Decline,” *The Columbus Dispatch*, March 1, 2011, <http://www.dispatch.com/live/content/life/stories/2011/03/01/blogging-by-young-on-decline.html?sid=101>.

Among the tips offered by Christine Erickson for using social networking tools to market a business are to see if a vanity URL is available, use social plug-ins wherever possible, and provide local content, such as a promotion at a nearby venue or messages customized to languages spoken in an area. A variety of apps exist to help business users, such as Hootsuite, which lets users publish once but distribute messages across multiple tools, such as Facebook, Twitter, LinkedIn, and Google+ .

Source: Christine Erickson, “9 Tips for Small Business Marketing on Facebook,” February 20, 2012, <http://mashable.com/2012/02/20/facebook-marketing-small-business/>.

Derogatory speech is obviously foolish, but posting it in the digital age invites far greater scrutiny than ever before. Recent faux pas include broadcaster Tony Bruno's tweet slamming San Francisco Giants pitcher Ramon Ramirez, originally from the Dominican Republic, as an "illegal alien." The baseless comment was similar to slurs from Mike Bacsik about "Mexicans in San Antonio" that got him fired. University of California at Los Angeles student Alexandra Wallace posted a video titled "Asians at the Library" that, among other things, mocked students calling relatives after the Japan Tsunami. Thousands of Facebook users decried the video, and Wallace later dropped out after reports of death threats. Soon after Amy Winehouse died, Microsoft angered people by tweeting that fans could honor the singer by buying her album from the company's Zune website.

in a professional setting is different than blogging in a personal one. For instance, many bloggers feel free to share deeply personal information about themselves or unflattering opinions about people in their lives or the companies they work for. To do so in a business situation might be considered inappropriate. In fact, some employees have been disciplined or fired for doing just that, such as programmer Mark Jen, whose complaints about the health care benefits and free food policy of his employer, Google, got him fired. Retired General Motors (GM) Vice Chairman Bob Lutz joined the growing ranks of top executives who are blogging; his FastLane Blog attracts both supporters and detractors of GM's vehicles, but Lutz's balanced responses have won him praise.⁴

Remember that if companies own or pay for computer resources, they may be entitled to access e-mail and blogs created by employees on their systems. In addition, blogs may be cached just like web pages, meaning that years after the fact someone may be able to access an otherwise nonexistent blog.

Websites such as blogger.com and businessblogconsulting.com provide information on creating blogs and how and where to post them. Search engines for blogs include Google Blog, Technorati, and Blogdigger.

To create a blog for business, Jeff Wuorio suggests these basics:⁵

- Identify your audience.
- Decide where your blog should live.
- Start talking.
- Get into the practice of "blog rolling," or linking to websites and other blogs.
- Emphasize keywords.
- Keep it fresh.
- Watch your traffic closely.

Can I use social networking tools for business situations? LO 13-7

► Yes, as long as you keep things professional.

Many **social networking tools** are now used by businesses and business professionals to communicate the latest news about themselves, products and services, or even available jobs. While being "plugged in" can provide a greater network of contacts to draw from than in more traditional settings, disclosing information of any kind on the web can expose people to unwanted attention. Choose carefully based on your comfort level.

Be professional when using social networking sites like Facebook or LinkedIn for business. Images, music, and text should be office-appropriate, and avoid criticizing co-workers or past or present employers. You can use social networking to connect with other professionals or even to look for a job.

Many users still blur the line between what is appropriate personally and professionally. A racy photo from a party might be fine with personal friends, but potential or current employers could feel otherwise. Recent awkward situations show the pitfalls of forgetting that the audience for social networking sites, as with blogging, may be larger than users appreciate. For example, after being diagnosed with depression, IBM's Natalie Blanchard began receiving sick leave payments. Months later, they abruptly stopped. She said when she called to find out why, her insurer, Manulife, explained Facebook photos of her having fun at a bar and on the beach showed she was ready to return to work.⁶

Remember, when using a social networking tool in business:

- Keep things professional. If it's inappropriate at work, it's inappropriate online. That includes comments, images, and music. (◀◀ Module 9 for tips on keeping a professional image.)
- Know who your online friends are, as well as who their friends are. Choose your friends wisely, and set your privacy controls accordingly.
- Know that once information is online, it might be possible to retrieve it again in the future, even after you've deleted items or the page.
- Read user agreements carefully. A site may, for instance, state that in exchange for letting you post, you agree to let it monitor communication or sell personal information to marketers.
- When in doubt, create two pages: one for personal friends and one for business ones.

Sites include tutorials or help functions to get started. Technology evolves quickly, meaning tools and techniques to use them can change at any time. Stay on top of changes by visiting sites often. Upgrade to the latest versions of software when warranted. Understand, too, that just as one tool becomes popular or fades into obscurity, several more are likely on the way.

Facebook and MySpace

Though they format information differently, facebook.com and myspace.com both let users create a page with personal information, such as name, photos, and biography. They also have the option to include sound or video, as well as to blog or link to one. Users can make the information public so that all visitors have access, or they can set the page to **private**, meaning only those given permission can view beyond a limited first page. With Facebook and MySpace, users link to **friends**, or specific users within the site's population. When new information is posted, friends can get updates and respond to comments left on their pages. Users can also join groups according to shared interests, such as their hobbies, college, or companies, becoming **fans**.

While basic services are free, there may be paid services available as well. Facebook, for instance, allows users to purchase advertising that targets specific audiences based on interests or affiliation. Users increasingly are turning to Facebook and MySpace to seek out jobs, either through postings or through communicating with their network of friends.

Spoke and LinkedIn

Spoke.com and linkedin.com were designed for traditional business networking purposes. As with their more personal counterparts, they let users supply information, such as profession and education; users may also post résumés, look for jobs, list past employers, or in some cases even ask the user community general questions, similar to features found on search engines. The advantage is that users are business professionals, and as this book goes to press, LinkedIn alone reports more than 160 million users, including job recruiters.

For an organization's social networking pages, also keep in mind:

- Update pages frequently—at least several times a week. Newsfeeds, in particular, must pique the interest of followers with timely information. Post new photos and images. Create events.
- Make one person responsible for updating the company page. Designate someone in a department to be the "point person."
- Consider carefully any decisions to run ads on the company page. Make sure ads and their sponsors match your organization's expectations.
- Understand the value of "word of mouth" advertising. Social networking sites thrive on it.
- Explore the features that social networking sites provide. Facebook, for instance, allows users to locate audiences based on general interests and style. You can also sponsor stories, run your own ads, and even schedule posts ahead of time.

Site to See

Go to

www.fansbuy.org/using-facebook-for-business/ for 20 tips on using Facebook in business. If it doesn't fit, move this Site to See to the column bottom on the next page, please.

According to a report by the Pew Internet and American Life Project, Latino- and Hispanic-Americans are embracing such web technology as social media faster than other groups in the U.S. For example, 54.2% of Hispanics online use Facebook compared to 47.7% for non-Latino blacks and 43% for non-Latino whites. U.S. Latinos and Hispanics also increasingly use smartphones rather than computers to access services.

Source: Adrian Carrasquillo, "How Latinos Will Use Social Media to Change the World," January 11, 2011, Fox News, <http://latino.foxnews.com/latino/lifestyle/2011/01/11/latinos-rule-social-media/>.

Cell phones have changed how people live their lives—as well as manners. "Loutish cell use is out of control," Microsoft's Joanna L. Krotz contends, and she suggests users never take calls during business meetings, stay at least 10 feet from anyone while talking, and never talk in enclosed public spaces, such as elevators or bathrooms. Things have gotten so bad that New York Philharmonic conductor Alan Gilbert stopped a performance of Mahler's Ninth Symphony until an audience member silenced his ringing phone—to the applause of outraged concertgoers. J. J. McCovey notes that businesses should create cell phone use policies for both legal and etiquette reasons. Among his recommendations are to make the vibrate function the workplace default, specify there

(continued)

Twitter

Twitter integrates computers and cell phones for sharing quick messages, or **tweets**. Snappy blurbs of 140 characters or fewer are the norm, and users can link to friends so that updates are in real time. Like his boss and other high-profile U.S. officials, former White House Press Secretary Robert Gibbs joined the ranks of those tweeting, which also included CEOs like Tony Hsieh and Steve Jobs and celebrities like Jay-Z, Miley Cyrus, and Britney Spears. Users can also find the latest headlines from organizations like CNN and Fox News. DePaul University even offers a class on twittering.⁷ The key to effective tweeting is to keep messages brief, timely, and catchy.

YouTube

Youtube.com revolutionized the way people create and access video on the web. Visitors can find everything from amateur skits and home movies to professional training videos, movie trailers, and even some films and television shows. Some professionals upload video résumés [▶▶ Module 28] to the site, which like most sites has a search function.

What other technologies use the Internet? LO 13-8

- *Fax, phone, instant messaging, and videoconferencing services are all available on the web.*

The Internet is making it possible for many services, such as fax and phone, to be handled through the web, sometimes at reduced cost compared to traditional means. Operating systems such as Windows 8 provide rudimentary fax capability.

Keep business tweets simple and professional. Messages must be 140 characters or less. If you have long web addresses to post, free sites like tinyurl.com can shorten them for you. Remember, too, that users are drawn to current information, so frequently tweeting relevant news is a good strategy to keep people following you.

Smartphones continue to evolve quickly in form and function, allowing users to talk, text, e-mail, surf the web, take photos and video, and more. These capabilities will continue to grow in number and sophistication, creating more features but also an ongoing learning curve for users. Many people are concerned about cell phone etiquette, as they are offended by interruptions and loud or inappropriate conversations in such spaces as theaters, classrooms, restaurants, houses of worship, and even restrooms.

Many companies now provide or subscribe to instant messaging services for employees, and companies such as Yahoo! and MSN have instant messaging features for general users. As with a telephone conversation, instant messaging requires people to respond quickly but also to think carefully about what they are going to say. Instant messages can be saved for future reference.

Videoconferencing sites like Skype are making it possible for people in different locations to meet “face-to-face” without ever leaving the office. Rising fuel costs and the drive for greater efficiency are making videoconferencing an attractive alternative to travel, but there are limitations. Cameras still produce two-dimensional images of limited scope, sound may be tinny, and video infrequently captures a person’s warmth or physical presence. People speaking into a camera must remember, too, that their movements appear opposite to people watching them—a gesture to the speaker’s right, for instance, will appear to the audience’s left.

New technologies are often attractive, but choose wisely which is appropriate for you. Remember that technology is only as valuable as it is useful.

(continued)

is no expectation of privacy on a business phone, and clarify content and language guidelines for business.

J. McCovey, “How to Create a Cell Phone Policy,” Inc., February 10, 2011, <http://www.inc.com/guides/how-to-create-a-cell-phone-policy.html>.

Summary of Learning Objectives

- Most e-mail programs prompt you to supply the various parts of the format. (**LO 13-1**)
- Some aspects of e-mail format are still evolving. In particular, some writers treat e-mail messages as if they were informal letters; some treat them as memos. (**LO 13-1**)
- If you prepare your document in a word processor, use two-inch side margins to create short line lengths. (**LO 13-1**)
- Subject lines for e-mail messages must be specific, concise, and catchy. (**LO 13-2**)
- If your message is short, you may be able to put it in the subject line. (**LO 13-2**)
- Create e-mail messages that people can read and act on quickly. (**LO 13-3**)
- E-mail is especially appropriate for positive and informative messages. Major negatives, however, should not be delivered by e-mail. (**LO 13-3**)
- Never write e-mail messages when you’re angry. (**LO 13-3**)
- **Flaming** is writing insulting or hostile e-mail messages. Avoid this behavior. (**LO 13-3**)
- When you ask in e-mail for something small or part of a reader’s job duties, your request can be straightforward. When you ask for something big or outside their normal job duties, let your first paragraph specify the request so the reader views it positively. Let the second paragraph provide an overview of the evidence the rest of the message will provide. (**LO 13-3**)
- Create folders, mailboxes, and filters to keep e-mail messages organized. (**LO 13-4**)
- Use time-saving efforts, such as reviewing time obligations and clarifying your goals, with other activities besides e-mailing. (**LO 13-4**)
- For good “netiquette,” in addition to avoiding flaming and writing e-mail messages when angry: (**LO 13-5**)
- Use full caps only to emphasize a single word or two.
- Send people only messages they need.
- Adapt your messages to the recipient’s system when possible. Include only the part of your original message needed by the reader when responding to a message.
- Sending attachments makes the most sense when you send (**LO 13-6**)
 - A long text document.
 - A text document with extensive formatting.
 - A nontext file.
- A computer **virus** is a script that harms your computer or erases data. You can get a virus through e-mail and through attachments. Use antivirus software as a defense. (**LO 13-6**)
- Use good business writing principles when writing for the web, but consider how people will interact with the text, too. Where possible, work with web page designers while writing, and test the page and content with people who will be using the page. (**LO 13-7**)
- If you blog on the job, keep it professional. Stay away from sharing deeply personal information about yourself or unflattering opinions about people in your life or the company you work for. (**LO 13-7**)
- You can use social networking sites in business so long as you keep things professional. (**LO 13-7**)
 - If it isn’t appropriate for work, it isn’t appropriate to post.
- Sites to consider using are MySpace, Facebook, Spoke, LinkedIn, Twitter, and YouTube. (**LO 13-7**)
- Fax, phone, instant messaging, and videoconferencing services are all available on the web. (**LO 13-8**)
- Remember, technology is only as valuable as it is useful. (**LO 13-8**)

Assignments for Module 13

Questions for Comprehension

- 13.1** How do subject lines for e-mail messages differ from those for paper messages? (**LO 13-2**)
- 13.2** Should e-mail messages use you-attitude, positive emphasis, and reader benefits? (**LO 13-3**)

Questions for Critical Thinking

- 13.4** Why should you be flexible when using different e-mail systems? (**LO 13-1**)
- 13.5** Why is e-mail better for informative and positive messages than for negative ones? (**LO 13-2**)
- 13.6** Why is it OK for your boss to send you a message with the subject line “To Do,” even though that wouldn’t

Exercises and Problems

13.8 Calming an Angry Co-worker (LO 13-1 to LO 13-3)

You’re a member of a self-managed team on a factory assembly line. When you check the team’s e-mail, you

- 13.3** What is flaming? (**LO 13-3, LO 13-5**)

- work when you need to ask a colleague to do something? (**LO 13-2**)
- 13.7** Why should negative and persuasive e-mail messages be more direct than their paper counterparts? (**LO 13-3**)

find this message from the factory’s Quality Assurance Manager:

Subject: Holes in Your Heads?
 Yesterday in the scrap bin I found a casting with three times too many holes in it.
 How could a machinist make such a mistake? What's going on?

The answer is simple. The extra holes come not from crazy machinists but from crafty ones. Your team uses old machines that aren’t computerized. When you make a part on those machines, you have to drill a test piece first to be sure that the alignment and size of the holes are correct. This testing has to be done every time you set

up for a new run. Your team has figured out that you can use less material by reusing the test piece until it resembles Swiss cheese, rather than throwing it away after a single testing. Your team is one of the most efficient in the plant, thanks to creative moves like this one. Write an e-mail response.

13.9 Announcing Holiday Diversity (LO 13-1 to LO 13-3)

Your organization has traditionally given employees several holidays off: New Year’s; Martin Luther King, Jr., Day; Independence Day; Veterans’ Day; Thanksgiving; and Christmas. Employees who celebrate other holidays (e.g., Good Friday, Yom Kippur, Ramadan, Chinese New Year, the Hindu holiday Diwali) have been able to take those days off with the consent of their supervisors. But some employees have complained that it is unfair to depend on the goodwill of supervisors. And now a few other employees have complained that people who honor other holidays are getting “extra” days off since they take those days in addition to the standard holidays.

Therefore, the executive committee of your organization has decided to allow employees any 10 days off for holidays; they will have to tell their supervisors which days they plan to take off. People will be asked in December which holidays they want to take off in the following year. People can change their minds during the year as long as

they have not yet taken off the full 10 holidays. Any religious, ethnic, or cultural holiday is acceptable. (Someone who wants to take off *Cinco de Mayo* or Bastille Day can do so.) Vacations, personal days off, and sick days are not affected by this policy.

As vice president for human resources, write an e-mail to all employees, announcing the new policy.

Hints:

- Pick a business, government, or nonprofit organization that you know something about.
- Will the office be “open” every day? If not, do all employees already have keys, or will they need to pick them up so they can get into the office to work days that few other people work?
- See www.holidayfestival.com for a list of holidays in various countries.
- Use your analysis from Problem 2.13.

13.10 Refusing to Pay an Out-of-Network Bill (LO 13-1 to LO 13-3)

Your employees’ health insurance allows them to choose from one of three health maintenance organizations (HMOs). Once the employee has selected an HMO, he or she must get all

medical care (except for out-of-state emergency care) from the HMO. Employees receive a listing of the doctors and hospitals affiliated with each HMO when they join the company and

pick an HMO. They get to choose again each October when they have a one-month “open enrollment period” to change to another of the three HMOs if they choose.

As director of employee benefits, you’ve received an angry e-mail from Alvin Reineke. Alvin had just received a statement from his HMO stating that it would not pay for the costs of his hernia operation two months ago at St. Catherine’s Hospital in your city. Alvin is furious: One of the reasons he accepted a job with your company six months ago was its excellent health care coverage. He feels the company lied to him and should pay for his (rather large) hospital bill because the HMO refuses to do so.

The HMO that Alvin had selected uses two hospitals, but not St. Catherine’s. When Alvin joined the company six months ago, he, like all new employees, received a thick booklet

explaining the HMO options. Perhaps he did not take the time to read it carefully. But that’s not your fault. Alvin can change plans during the next open enrollment, but even if he switched to an HMO that included St. Catherine’s, that HMO wouldn’t pay for surgery performed before he joined that HMO.

Write an e-mail message to Alvin giving him the bad news.

Hints:

- What tone should you use? Should you be sympathetic? Should you remind him that this is his own fault?
- Is there any help you can give Alvin (e.g., information about credit union short-term loans or even information about negotiating payment terms with the hospital)?
- What can you do to make Alvin feel that the company has not lied to him?

13.11 Saying No to the Boss (LO 13-1 to LO 13-3)

Today, you received the following e-mail message from your boss:

Subject: Oversee United Way

I’m appointing you to be the company representative to oversee United Way. You’ve done a good job the last three years, so this year should be a piece of cake!

It’s true that you know exactly what to do. The job wouldn’t be hard for you. But that’s just the problem. You wouldn’t learn anything, either. You’d rather have an assignment that would stretch you, teach you new skills, or enable you to interact with new people. Continuing to grow is your insurance of continued employability and mobility. Three upcoming projects in your division might offer growth:

13.12 Sending a Question to a Website (LO 13-1 to LO 13-3)

Send a question or other message that calls for a response to a website. You could

- Ask a question about a product.
- Apply for an internship or a job (assuming you’d really like to work there).
- Ask for information about an internship or a job.
- Ask a question about an organization or a candidate before you donate money or volunteer.
- Offer to volunteer for an organization or a candidate. You can offer to do something small and onetime (e.g., spend an afternoon stuffing envelopes, put up a yard sign), or you can, if you want to, offer to do something more time-consuming or even ongoing.

As Your Instructor Directs,

- a. Turn in a copy of your e-mail message and the response you received.
- b. Critique messages written by other students in your class. Suggest ways the messages could be clearer and more persuasive.

13.13 Suggesting a Change in Your Organization’s Communication Materials (LO 13-1 to LO 13-3)

Your organization has a web page, but its address isn’t on all your business communication materials (stationery, business cards, invoices, product packaging, brochures, catalogs, voice-mail announcements, e-mail signatures, promotional items such as pens, coffee cups, and mouse pads). Adding the URL would promote the website (and suggest that your organization is up-to-date).

creating videos for a “town meeting” for all employees to be held at the beginning of next quarter, creating an intranet for the company, or serving on the diversity committee. Any of these would be time-consuming, but no more time-consuming than running the United Way campaign.

Write to your boss, asking for something more challenging to do.

- c. Write a memo evaluating your message and the response, using the checklists for Modules 12 and 10, respectively. If you did not receive a response, did the fault lie with your message?
- d. Make an oral presentation to the class, evaluating your message and the response, using the checklists for Modules 12 and 10, respectively. If you did not receive a response, did the fault lie with your message?

Hints:

- Does the organization ask for questions or offers? Or will yours “come out of the blue”?
- How difficult will it be for the organization to supply the information you’re asking for or to do what you’re asking it to do? If you’re applying for an internship or offering to volunteer, what skills can you offer? How much competition do you have?
- What can you do to build your own credibility, so that the organization takes your question or request seriously?

As Your Instructor Directs,

- a. Identify the person in your organization with the power to authorize adding the URL to physical materials, and e-mail that person asking him or her to authorize this change.
- b. Write an e-mail to all employees, asking them to add the URL and a brief message promoting the organization to their e-mail signature blocks.

Hints:

- Pick a business, nonprofit, or government organization you know something about. What materials does it produce? Which lack the URL?
- Will the reader know you? Has your organization asked for suggestions, or will this come “out of the blue”?

- What should be done with materials already printed or manufactured that lack the web address? Should they be discarded, or used until they run out?
- Who in your organization has the authority to authorize this change?
- What exactly do you want your reader to do? What information does your reader need?

13.14 Asking for More Time and/or Resources (LO 13-1 to LO 13-3)

Today, the following message shows up in your e-mail inbox from your boss:

Subject: Fwd: Want Climate Report

This request has come down from the CEO. I'm delegating it to you. See me a couple of days before the board meeting—the first Monday of next month—so we can go over your presentation.

>I want a report on the climate for underrepresented groups in our organization. A presentation at >the last board of directors' meeting showed that while we do a good job of hiring women and >minorities, few of them rise to the top. The directors suspect that our climate may not be >supportive and want information on it. Please prepare a presentation for the next meeting. You'll >have 15 minutes.

Making a presentation to the company's board of directors can really help your career. But preparing a good presentation and report will take time. You can look at exit reports filed by human resources when people leave the company, but you'll also need to interview people—lots of people. And you're already working 60 hours a week on three

major projects, one of which is behind schedule. Can one of the projects wait? Can someone else take one of the projects? Can you get some help? Should you do just enough to get by? Ask your boss for advice—in a way that makes you look like a committed employee, not a slacker.

13.15 Addressing a Customer Complaint about a Coupon (LO 13-1 to LO 13-3)

As manager of consumer affairs for your company, you received the following e-mail message:

My name is Jan Hofbauer, and I recently visited one of your Kelly Green apparel stores in Denver. While I am a long-time customer who enjoys the many great styles you have to offer, I was dismayed by my experience.

I wanted to use a coupon I received via e-mail for 20% off any single item. But when I tried to use the coupon, I was told there were restrictions, including it only being applicable to regularly priced merchandise.

I explained to the manager that nowhere on the coupon was a statement to that effect. When she said the statement appears on the Kelly Green web page, I pointed out I wasn't on the Internet, I was in the store! She would not honor the coupon, but since I had spent 30 minutes of valuable time picking out the sweater, I purchased it anyway.

It's unfair to wait until after a customer has taken time out of her busy schedule to drive to the store to tell her of restrictions. If anything, this all seems like fraud. She should have honored the coupon.

What I want to know now is what are you going to do to keep me as a customer?

Jan Hofbauer

After further research, you discovered the coupon was sent as a promotion for the Kelly Green web page. In fact, in the e-mail message and on the coupon, a statement prominently indicates it is only good for use at the web page and that some restrictions apply. When customers click on the link to the web page, a statement further explaining

restrictions appears, including the coupon being for regularly priced items. Therefore, you don't feel it's appropriate to give Ms. Hofbauer a 20% credit on her Visa card.

However, you are willing to give her a 10% credit for being a loyal customer and for her troubles. Write an e-mail message to Ms. Hofbauer explaining your decision.

13.16 Requesting Your Firm Use Social Networking (LO 13-1 to LO 13-3, LO 13-7)

Your small but prestigious financial services firm has a web page that increasingly gets traffic and now you, the communications director, want to convince upper management to branch out to Facebook and Twitter pages. But several of the senior partners think that social networking sites are too trendy and informal and don't accurately reflect the firm's conservative culture. They would prefer that most communication with clients happens by phone, letter, or face to face, and though they are comfortable with e-mail, feel that it is best left for internal communication. You know that convincing the senior partners to adopt more modern strategies will be tough, but you also know the firm stands to lose its competitive edge in a rapidly changing world if they don't.

As your instructor directs,

- a. Identify the person or persons in the firm who might help you establish credibility on technical matters. What additional resources might help you to establish a claim that social networking will help the firm? What information might you collect that can further bolster your claims?

- b. Write an e-mail message to the senior partners requesting the firm use social networking. (Alternatively, write a paper message if you believe that e-mail is too informal.)

Hints:

- Consider the potential impacts. Clearly, the move to include social networking in marketing and communication efforts reflects a shift in organizational culture. How might you persuade people firmly invested in the status quo that changes are both necessary and beneficial? What objections might they have?
- Do research. Are there examples or case studies of similar organizations adopting social networking? What can you learn from their experiences that would be helpful in your message?
- Think creatively. Is there a way to test social networking out on a smaller scale with the firm before going "live" to clients?
- Consider company resources. What would be needed in terms of finances, training, equipment, and personnel to use social networking? If the needed resources are minimal, how might that make your appeal more attractive?

Polishing Your Prose

Making Nouns and Pronouns Agree

Pronouns must agree with the nouns to which they refer in two ways: (1) person and (2) number—singular or plural.

	Singular	Plural
First-person	I, my, mine, me, myself	we, our, us, ourselves
Second-person	you, your, yourself	you, your, our, ours, yourselves
Third-person	he, she, it, him, her, his, hers	they, their, them, themselves

Incorrect: In my internship, I learned that **you have to manage your time** wisely.

Correct: In my internship, I learned to **manage my time** wisely.

Incorrect: The **sales team** reached **their** goal.

Correct: The **sales team** reached **its** goal.

U.S. usage treats company names and the words *company* and *government* as singular nouns. In Great Britain and those countries using the British System, these nouns are plural and require plural pronouns:

Correct (U.S.): Nationwide Insurance **trains its** agents well.

Correct (U.K.): Lloyds of London **train their** agents well.

Exercises

Correct any noun–pronoun agreement errors, following U.S. style. Note that some sentences do not contain errors.

1. My college lowered their parking sticker costs about \$10 a year.
2. When Kelea and Shawn arrived together from Portland, she both decided to walk rather than take a shuttle to the airport hotel.

3. You have to mind your Ps and Qs, I discovered, if you're going to get ahead in this world.
4. The Building and Zoning Department got their act together and beat the Marketing Department in the final inning of the company softball game.
5. Victor said her greatest achievement was being selected as "Man of the Year" by the Rotary Club.
6. With few changes to their production model, Jacoby, Inc., expects to start manufacturing in a few weeks.
7. My mother told me that when she was a little girl, she learned you can't always believe what you hear.
8. Madison told me their purse got left in the restaurant—his smartphone was inside of it.
9. At Singh and Associates, I told my parents, I learned you have to do your best to get noticed.
10. The best things about Netflix is the way they make sure their procedures are easy to follow.

Check your answers to the odd-numbered exercises at the back of the book.

Unit 3 Cases for Communicators

The Real Price of a Cheap Flight

In July 2012, United Airlines began offering refunds to passengers who had taken advantage of a computer glitch to book flights to Hong Kong or other destinations in Asia that connected to the city in exchange for four frequent flier miles, plus government taxes. A business class seat on United to Hong Kong typically costs about \$8,500, or 120,000 frequent flier miles. First class is about \$2,000 more, or 20,000 miles.

Before United officials realized the error, people shared news of it on sites throughout the web, and though United won't confirm the final numbers, hundreds, if not thousands, of people bought tickets. However, United eventually stopped selling tickets and announced it wasn't honoring the tickets already sold. Refunds would instead be offered, though people who had already started their trip would be able to finish it.

Complicating the problem, the U.S. Department of Transportation (DOT) had recently enacted rules that prohibit airlines from increasing prices after consumers make their purchase, so some consumers complained that United was violating that rule. At heart is at what point the glitch appeared. Initially, purchasers were given the correct price. It was only after they actually went to the screen to book the fare that the error appeared.

Individual Activity

As the customer service director at United, you have received hundreds of e-mail messages from angry customers who thought they were booking the cheap flights to Hong Kong. In particular, many of them feel that United is ducking responsibility for the error and breaking the law by ignoring the DOT regulations. Write an e-mail message explaining to them that the initial screen at the point of purchase explained the correct amount customers would be charged and that by pressing "Book Flight Now" there, they were acknowledging the correct price, regardless of what showed up on the following screen. United regrets the error but sees it as an honest technical mistake rather than an attempt to avoid honoring a claim.

As you plan your correspondence, consider the following:

- What should my subject line convey?
- How can I organize the message in a positive, problem-solving way?
- Will I include reader benefits in the message?

As you evaluate your draft, consider these questions:

- Is my subject line specific, concise, and clear?
- Did I organize this message using the following pattern for positive messages?

Main Point
Details
Negatives
Reader Benefits
Goodwill Ending

- Did I use PAIBOC (Purpose, Audience, Information, Benefits, Objections, Context) to help me write a positive message?
- Did I successfully create you-attitude in this message?

Be sure to check your grammar and proofread the message by eye as well as by spell-check!

Group Activity

You want the Department of Transportation to understand that United operated in good faith when the computer glitch occurred, and you want to allay any concerns that similar problems will happen in the future. In particular, you want the DOT to know that once the company was aware of the error, the site was shut down and refunds were immediately processed. However, you have heard that some irate customers are lobbying the agency to consider legal action against United.

Your IT Department has provided a report on what went wrong. Maintenance on the web page was actually done by a third party, subcontracted through the department. Responsibility for making sure information on the site was current and correct was that company's, and there is an indemnity clause in the contract stating that United will not be held liable for any mistakes made by the third party. Regardless, however, of who ultimately is held fiduciarily responsible, the damage to United's reputation from a DOT investigation could be great and affect future sales.

Write a letter to DOT officials explaining the results of United's internal investigation and requesting that no further action be taken regarding whether United violated DOT regulations. Before you write the letter, discuss the following issues with your colleagues:

- What should the subject line convey, if anything?
- Which persuasive strategy—direct request or problem solving—is appropriate in this situation?
- Which of the following patterns is better?

Shared Problem
Details
Solution
Negatives
Reader Benefits
Request for Action
Or
Request of Action
Details
Request for Action

- What types of possible objections or responses are expected?
- What benefits, if any, could be highlighted?

Use your answers to these questions to draft the letter. Then work together with your group to craft the final language for this message.

As you write, ask these questions:

1. Did we include information to negate possible objections or responses to the message?
2. Did we follow the correct organization for the persuasive strategy we are using?
3. Did we use PAIBOC (Purpose, Audience, Information, Benefits, Objections, Context) to help us write a persuasive message?
4. Did we successfully create you-attitude in this letter?

Watchdog audiences like the DOT are key to the success of United, so be sure to think carefully about the tone of the letter. Remember, these folks have a stake in United's future, too!

Editing for Grammar
and Punctuation

Module 15

Choosing the Right
Word

Module 16

Revising Sentences
and Paragraphs

Module

14

Editing for Grammar and Punctuation

LEARNING OBJECTIVES

Module 14 focuses on solutions to common errors with grammar and punctuation. After completing the module, you should be able to

- | | |
|---|--|
| LO 14-1 Apply strategies for professional image creation with grammar and mechanics. | LO 14-5 Apply principles for punctuation use inside sentences. |
| LO 14-2 Apply principles for common grammatical error correction. | LO 14-6 Apply principles for source quotation. |
| LO 14-3 Apply principles for sentence error correction. | LO 14-7 Apply principles for number and date use. |
| LO 14-4 Evaluate situations for comma use. | LO 14-8 Apply standard proofreading marks throughout the writing process. |

With the possible exception of spelling, grammar is the aspect of writing that writers seem to find most troublesome. Faulty grammar is often what executives are objecting to when they complain that college graduates or MBAs “can’t write.”

The modules in this unit gather advice about grammar, punctuation, words, and sentence and paragraph revision. Many of these topics are also treated in the Polishing Your Prose sections at the end of each module. For a list, see the inside front cover.

Creating a Professional Image, 2 LO 14-1

Grammar and mechanics present a paradox. On the one hand, grammar and punctuation are the least important part of any message: The ideas and their arrangement matter far more.

On the other hand, many business leaders see good grammar and mechanics as essential to creating effective messages—and to demonstrating quality. The College Board's National Commission on Writing found 95.2% of survey respondents said spelling, punctuation, and grammar were "important" or "extremely important." Companies surveyed included American Express, Boeing, Ford Motor Company, IBM, J. P. Morgan Chase, MetLife, Pfizer, Sears, and Verizon Communications.

"In most cases, writing ability could be your ticket in . . . or it could be a ticket out," noted one participant, while another said of promotion, "You can't move up without writing skills."

Errors also create a negative image of the writer. Professor Larry Beason found that businesspeople judged the authors of errors to be not only poor writers but also poor businesspeople. Negative judgments included the following:

- Careless and hasty
- Uncaring (about reader or message)
- Problems with thinking and logic
- Not a detail person—what will you do with numbers?
- Poor oral communicator
- Uneducated

So grammar and punctuation can be the most important part of your message.

Occasionally, errors in grammar and punctuation hide the writer's meaning. More often, it's possible to figure out what the writer probably meant, but the mistake still sends the wrong message (and can be an excuse for a hostile reader or an opposing attorney).

Don't try to fix errors in your first and second drafts. The brain can't attend both to big ideas and to sentence-level concerns at the same time. But do save time to check your almost-final draft to eliminate any errors in grammar, punctuation, and word choice.

Most writers make a small number of grammatical errors repeatedly. Most readers care deeply about only a few grammatical points. Keep track of the feedback you get (from your instructors now, from your supervisors later) and put your energy into correcting the errors that bother the people who read what you write. A command of standard grammar will help you build the credible, professional image you want to create with everything you write.

Sources: Writing: A Ticket to Work . . . Or a Ticket Out: A Survey of Business Leaders, Report of The National Commission on Writing for America's Families, Schools, and Colleges, College Entrance Examination Board, September 2004; and Larry Beason, "Ethos and Error: How Business People React to Errors," CCC 53:1, September 2001.

What grammatical errors do I need to be able to fix? LO 14-2

► Learn how to fix these six errors.

Good writers can edit to achieve subject–verb and noun–pronoun agreement, to use the right case for pronouns, to avoid dangling and misplaced modifiers, and to correct parallel structure and predication errors.

Agreement

Subjects and verbs agree when they are both singular or both plural.

Incorrect: The **accountants** who conducted the audit **was** recommended highly.

Correct: The **accountants** who conducted the audit **were** recommended highly.

Subject–verb agreement errors often occur when other words come between the subject and the verb. Edit your draft by finding the subject and the verb of each sentence.

U.S. usage treats company names and the words *company* and *government* as singular nouns. British usage treats them as plural:

Correct (U.S.): State Farm Insurance trains its agents well.

Correct (Great Britain): Lloyds of London train their agents well.

Rutgers University Professor Jack Lynch sees attention to grammar as at least as much an issue of class warfare as it is of making communication understandable. Correcting a split infinitive—such as *Star Trek's* "to boldly go"—gives people "access to power," not because all grammarians agree that splitting an infinitive in English is wrong but because people in power may think it is.

Site to See

Go to

<http://grammar.quickanddirtytips.com/>
for Grammar Girl's tutorials on fixing common errors.

Use a plural verb when two or more singular subjects are joined by *and*.

Correct: Larry McGreevy **and I** are planning to visit the client.

Use a singular verb when two or more singular subjects are joined by *or, nor, or but*.

Correct: Either the shipping clerk **or** the superintendent **has** to sign the order.

When the sentence begins with *Here* or *There*, make the verb agree with the subject that follows the verb.

Correct: Here **is** the **booklet** you asked for.

Correct: There **are** the **blueprints** I wanted.

Note that some words that end in *s* are considered to be singular and require singular verbs.

Correct: A **series** of meetings **is** planned.

When a situation doesn't seem to fit the rules, or when following a rule produces an awkward sentence, revise the sentence to avoid the problem.

Problematic: The Plant Manager in addition to the sales representative (was, were?) pleased with the new system.

Better: The Plant Manager **and** the sales representative **were** pleased with the new system.

Problematic: None of us (is, are?) perfect.

Better: **All** of us **have** faults.

Errors in **noun–pronoun agreement** occur if a pronoun is of a different number or person than the word it refers to.

Incorrect: All **drivers** of leased **automobiles** are billed \$100 if damages to **his automobile** are caused by a collision.

Correct: All **drivers** of leased **automobiles** are billed \$100 if damages to **their automobiles** are caused by collisions.

Incorrect: A **manager** has only **yourself** to blame if things go wrong.

Correct: **As a manager, you** have only **yourself** to blame if things go wrong.

The following words require a singular pronoun:

everybody

everyone

nobody

each

neither

a person

either

Correct: **Everyone** should bring **his or her copy** of the manual to the next session on changes in the law.

If the pronoun pairs necessary to avoid sexism seem cumbersome, avoid the terms in this list. Instead, use words that take plural pronouns or use second-person *you*.

Each pronoun must refer to a specific word. If a pronoun does not refer to a specific term, add a word to correct the error.

Incorrect: We will open three new stores in the suburbs. **This** will bring us closer to our customers.

Correct: We will open three new stores in the suburbs. **This strategy** will bring us closer to our customers.

Hint: Make sure *this* and *it* refer to a specific noun in the previous sentence. If either refers to an idea, add a noun (“*this strategy*”) to make the sentence grammatically correct.

Use *who* and *whom* to refer to people and *which* to refer to objects. *That* can refer to anything: people, animals, organizations, and objects.

Correct: The new **Executive Director, who** moved here from Boston, is already making friends.

Correct: The **audit, which** we completed yesterday, shows that the original numbers are incorrect.

Correct: This confirms the **price that** I quoted you this morning.

There's only one English today, right? Not if you ask officials at the Voice of America, who have reduced conversational English to only 1,500 words, called "specialized English." Aerospace and Defense Simplified Technical English is used by the European aerospace industry to streamline communications, and some Christian missionaries practice Easy-English when abroad. These forms of "simple English" are designed to reduce problems with bad grammar and to make it easier to communicate with non-native speakers of English.

Source: J. David Goodman, "List of 'Special English' Words Increases," *The Columbus Dispatch*, January 2, 2008, downloaded at www.dispatch.com/live/content/life/stories/2008/01/02/1A_SIMPLE_ENGLISH.ART_ART_01-02-08_D1_CD8T4TT.html?sid=101.

www.iei.illinois.edu/grammarsafari/grammarsafari.html
Especially for ESL students, Grammar Safari helps you hunt grammar in real language.

Use a plural verb when two or more singular subjects are joined by *and*.

Correct: Larry McGreevy **and I** are planning to visit the client.

Use a singular verb when two or more singular subjects are joined by *or, nor, or but*.

Correct: Either the shipping clerk **or** the superintendent **has** to sign the order.

When the sentence begins with *Here* or *There*, make the verb agree with the subject that follows the verb.

Correct: Here **is** the **booklet** you asked for.

Correct: There **are** the **blueprints** I wanted.

Note that some words that end in *s* are considered to be singular and require singular verbs.

Correct: A **series** of meetings **is** planned.

When a situation doesn't seem to fit the rules, or when following a rule produces an awkward sentence, revise the sentence to avoid the problem.

Problematic: The Plant Manager in addition to the sales representative (was, were?) pleased with the new system.

Better: The Plant Manager **and** the sales representative **were** pleased with the new system.

Problematic: None of us (is, are?) perfect.

Better: **All** of us **have** faults.

Errors in **noun–pronoun agreement** occur if a pronoun is of a different number or person than the word it refers to.

Incorrect: All **drivers** of leased **automobiles** are billed \$100 if damages to **his automobile** are caused by a collision.

Correct: All **drivers** of leased **automobiles** are billed \$100 if damages to **their automobiles** are caused by collisions.

Incorrect: A **manager** has only **yourself** to blame if things go wrong.

Correct: **As a manager, you** have only **yourself** to blame if things go wrong.

The following words require a singular pronoun:

everybody

everyone

nobody

each

neither

a person

either

Correct: **Everyone** should bring **his or her copy** of the manual to the next session on changes in the law.

If the pronoun pairs necessary to avoid sexism seem cumbersome, avoid the terms in this list. Instead, use words that take plural pronouns or use second-person *you*.

Each pronoun must refer to a specific word. If a pronoun does not refer to a specific term, add a word to correct the error.

Incorrect: We will open three new stores in the suburbs. **This** will bring us closer to our customers.

Correct: We will open three new stores in the suburbs. **This strategy** will bring us closer to our customers.

Hint: Make sure *this* and *it* refer to a specific noun in the previous sentence. If either refers to an idea, add a noun (“*this strategy*”) to make the sentence grammatically correct.

Use *who* and *whom* to refer to people and *which* to refer to objects. *That* can refer to anything: people, animals, organizations, and objects.

Correct: The new **Executive Director, who** moved here from Boston, is already making friends.

Correct: The **audit, which** we completed yesterday, shows that the original numbers are incorrect.

Correct: This confirms the **price that** I quoted you this morning.

Case

Case refers to the grammatical role a noun or pronoun plays in a sentence. Figure 14.1 identifies the case of each personal pronoun.

Use **nominative** pronouns for the **subject** of a clause.

Correct: Shannon Weaver and I talked to the customer, **who** was interested in learning more about integrated software.

Use **possessive** pronouns to show who or what something belongs to.

Correct: Microsoft Office will exactly meet **her** needs.

Use **objective** pronouns as **objects** of verbs or prepositions.

Correct: When you send in the quote, thank **her** for the courtesy she showed Shannon and **me**.

Hint: Use *whom* when *him* would fit grammatically in the same place in your sentence.

I am writing this letter to (who/whom?) it may concern.

I am writing this letter to him.

Whom is correct.

Have we decided (who, whom?) will take notes?

Have we decided he will take notes?

Who is correct.

Use **reflexive** and **intensive** pronouns (the form with *self* or *selves*) to refer to or emphasize a noun or pronoun that has already appeared in the sentence.

Correct: I nominated **myself**.

Do not use reflexive pronouns as subjects of clauses or as objects of verbs or prepositions.

Incorrect: Elaine and **myself** will follow up on this order.

Correct: Elaine and **I** will follow up on this order.

Incorrect: He gave the order to Dan and **myself**.

Correct: He gave the order to Dan and **me**.

Note that the first-person pronoun comes after names or pronouns that refer to other people.

Forty-five percent of employers surveyed recently said they were increasing training to improve grammar and other skills in their employees. Confusion over rules, the informality of social networking, and valuing speed over accuracy may be culprits in why grammar skills suffer in the workplace.

Source: Sue Shellenbarger, "This Embarrasses You and I: Grammar Gaffes Invade the Office in an Age of Informal E-mail, Texting, and Twitter," *The Wall Street Journal*, June 19, 2012, <http://online.wsj.com/article/SB1000142405270230341040457746662919275448.html?KEYWORDS=grammar>.

Figure 14.1 The Case of the Personal Pronoun

	Nominative (subject of clause)	Possessive	Objective	Reflexive/ Intensive
<i>Singular</i>				
1st person	I	my, mine	me	myself
2nd person	you	your, yours	you	yourself
3rd person	he/she/it one/who	his/her(s)/its one's/whose	him/her/it one/whom	himself/herself/itself oneself/(no form)
<i>Plural</i>				
1st person	we	our, ours	us	ourselves
2nd person	you	your, yours	you	yourselves
3rd person	they	their, theirs	them	themselves

Dangling Modifier

Modifiers are words or phrases that give more information about the subject, verb, or object in a clause. A modifier **dangles** when the word it modifies is not actually in the sentence. The solution is to reword the modifier so that it is grammatically correct.

Incorrect: Confirming our conversation, the truck will leave Monday.

[The speaker is doing the confirming. But the speaker isn't in the sentence.]

Incorrect: At the age of eight, I began teaching my children about American business.

[This sentence says that the author was eight when he or she had children who could understand business.]

Correct a dangling modifier in one of these ways:

- Recast the modifier as a subordinate clause.

Correct: As I told you, the truck will leave Monday.

Correct: When they were eight, I began teaching my children about American business.

- Revise the main clause so its subject or object can be modified by the now-dangling phrase.

Correct: Confirming our conversation, I have scheduled the truck to leave Monday.

Correct: At the age of eight, my children began learning about American business.

Hint: Whenever you use a verb or adjective that ends in *-ing*, make sure it modifies the grammatical subject of your sentence. If it doesn't, reword the sentence.

Misplaced Modifier

A **misplaced modifier** appears to modify another element of the sentence than the writer intended.

Incorrect: Customers who complain often alert us to changes we need to make.

[Does the sentence mean that customers must complain frequently to teach us something? Or is the meaning that frequently we learn from complaints?]

Correct a misplaced modifier by moving it closer to the word it modifies or by adding punctuation to clarify your meaning. If a modifier modifies the whole sentence, use it as an introductory phrase or clause; follow it with a comma.

Correct: Often, customers who complain alert us to changes we need to make.

Parallel Structure

Items in a series or list must have the same grammatical structure.

Not parallel: In the second month of your internship, you will

1. Learn how to resolve customers' complaints.
2. Supervision of desk staff.
3. Interns will help plan store displays.

Parallel: In the second month of your internship, you will

1. Learn how to resolve customers' complaints.
2. Supervise desk staff.
3. Plan store displays.

Also parallel: Duties in the second month of your internship include resolving customers' complaints, supervising desk staff, and planning store displays.

Hint: When you have two or three items in a list (whether the list is horizontal or vertical), make sure the items are in the same grammatical form. Put lists vertically to make them easier to see.

Predication Errors

The predicate of a sentence must fit grammatically and logically with the subject.

In sentences using *is* and other linking verbs, the complement must be a noun, an adjective, or a noun clause.

Incorrect: The *reason* for this change *is because* the SEC now requires fuller disclosure.

Correct: The *reason* for this change *is that* the SEC now requires fuller disclosure.

Make sure that the verb describes the action done by or done to the subject.

Incorrect: Our *goals should begin* immediately.

Correct: *Implementing* our goals *should begin* immediately.

How can I fix sentence errors? LO 14-3

► Learn to recognize main clauses.

A **sentence** contains at least one main clause. A **main clause** is a complete statement. A **subordinate** or **dependent clause** contains both a subject and verb but is not a complete statement and cannot stand by itself. A phrase is a group of words that does not contain both a subject and a verb.

Main Clauses

Your order will arrive Thursday.

He dreaded talking to his supplier.

I plan to enroll for summer school classes.

Subordinate Clauses

if you place your order by Monday

because he was afraid the product would be out of stock

although I need to have a job

Phrases

With our current schedule

As a result

After talking to my adviser

A clause with one of the following words will be subordinate:

after if

although, though when, whenever

because, since while, as

before, until

Using the correct punctuation will enable you to avoid four major sentence errors: comma splices, run-on sentences, fused sentences, and sentence fragments.

Comma Splices

A **comma splice** or **comma fault** occurs when two main clauses are joined only by a comma (instead of by a comma and a coordinating conjunction).

Incorrect: The contest will start in June, *the* date has not been set.

Correct a comma splice in one of the following ways:

- If the ideas are closely related, use a semicolon rather than a comma. If they aren't closely related, start a new sentence.

Instant Replay

Dangling Modifiers

A modifier dangles when the word it modifies is not actually in the sentence.

Kyle Wiens, CEO of iFixIt and founder of Dozuki, requires all job applicants to take a grammar test. With a self-described “zero tolerance” for grammar errors, he notes that in his experience, sloppiness with writing corresponds to sloppiness in other job duties. How strict are his standards? “If you think a semicolon is a regular colon with an identity crisis, I will not hire you. If you scatter commas into a sentence with all the discrimination of a shotgun, you might make it to the foyer before we politely escort you from the building.”

Source: Kyle Wiens, “I Won’t Hire People Who Use Poor Grammar. Here’s Why,” *Harvard Business Review*, July 20, 2012, http://blogs.hbr.org/cs/2012/07/i_wont_hire_people_who_use_poor.html.

Many business professionals bemoan the errors they see as the result of the speed and informality of electronic communication for some people, whether they’re typos or grammatical issues like run-on sentences and sentence fragments. Yet, there may be trade-offs. A study of Twitter users showed that while they had 20% more grammatical errors than non-tweeting counterparts, they were only about half as likely to have spelling errors.

Source: Andy Jordan, “RT@gooseGrade: Twitterers Good at Spelling, Bad at Grammar. #whatwouldmomsay?” *The Wall Street Journal*, July 6, 2009, <http://blogs.wsj.com/digits/2009/07/06/rtgoosegrade-twitterers-good-at-spelling-bad-at-grammar-whatwouldmomsay/tab/article/>.

Correct: The contest will start in June; the exact date has not been set.

- Add a coordinating conjunction.

Correct: The contest will start in June, but the exact date has not been set.

- Subordinate one of the clauses.

Correct: Although the contest will start in June, the date has not been set.

Remember that you cannot use just a comma with the following transitions.

however	nevertheless
therefore	moreover

Instead, use a semicolon to separate the clauses or start a new sentence.

Incorrect: Computerized grammar checkers do not catch every error, however, they may be useful as a first check before an editor reads the material.

Correct: Computerized grammar checkers do not catch every error; however, they may be useful as a first check before an editor reads the material.

Run-On Sentences

A **run-on sentence** strings together several main clauses using *and*, *but*, *or*, *so*, and *for*. Run-on sentences and comma splices are “mirror faults.” A comma splice uses *only* the comma and omits the coordinating conjunction, while a run-on sentence uses *only* the conjunction and omits the comma. Correct a short run-on sentence by adding a comma. Separate a long run-on sentence into two or more sentences. Consider subordinating one or more of the clauses.

Incorrect: We will end up with a much smaller markup but they use a lot of this material so the volume would be high so try to sell them on fast delivery and tell them our quality is very high.

Correct: Although we will end up with a much smaller markup, volume would be high since they use a lot of this material. Try to sell them on fast delivery and high quality.

Fused Sentences

A **fused sentence** results when two or more sentences are *fused* or joined with neither punctuation nor conjunctions. To fix the error, add either punctuation or a conjunction.

Incorrect: The advantages of intranets are clear the challenge is persuading employees to share information.

Correct: The advantages of intranets are clear; the challenge is persuading employees to share information.

Also correct: Although the advantages of intranets are clear, the challenge is persuading employees to share information.

Sentence Fragments

In a **sentence fragment**, a group of words that is not a complete sentence is punctuated as if it were a complete sentence. Sentence fragments often occur when a writer thinks of additional detail that the reader needs. Fragments are acceptable in résumés and sales letters, but they’re rarely acceptable in other business documents.

Incorrect: Observing these people, I have learned two things about the program. The time it takes. The rewards it brings.

To fix a sentence fragment, either add whatever parts of the sentence are missing or incorporate the fragment into the sentence before it or after it.

Correct: Observing these people, I have learned that the program is time-consuming but rewarding.

Remember that clauses with the following words are not complete sentences. Join them to a main clause.

after	if
although, though	when, whenever
because, since	while, as
before, until	

Incorrect: We need to buy a new computer system. **Because our current system is obsolete.**

Correct: We need to buy a new computer system **because our current system is obsolete.**

Should I put a comma every place I'd take a breath? LO 14-4

► *No! Commas are not breaths.*

Some people have been told to put commas where they'd take breaths. That's bad advice. How often you'd take a breath depends on how big your lung capacity is, how fast and how loud you're speaking, and the emphasis you want. Commas aren't breaths. Instead, like other punctuation, they're road signs.

Punctuation marks are road signs to help readers predict what comes next (see Figure 14.2).

When you move from the subject to the verb, you're going in a straight line; no comma is needed. When you end an introductory phrase or clause, the comma tells readers the introduction is over and you're turning to the main clause. When words interrupt the main clause, like this, commas tell the reader when to turn off the main clause for a short side route and when to return.

What punctuation should I use inside sentences? LO 14-5

► *Use punctuation to make your meaning clear to your reader.*

The good business and administrative writer knows how to use the following punctuation marks: apostrophes, colons, commas, dashes, hyphens, parentheses, periods, and semicolons.

Apostrophe

1. Use an apostrophe in a contraction to indicate that a letter has been omitted.

We're trying to renegotiate the contract.

The 1990s were years of restructuring for our company.

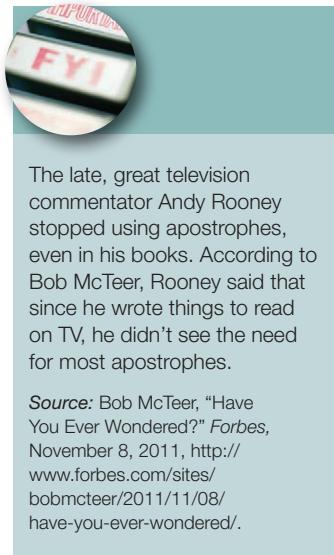

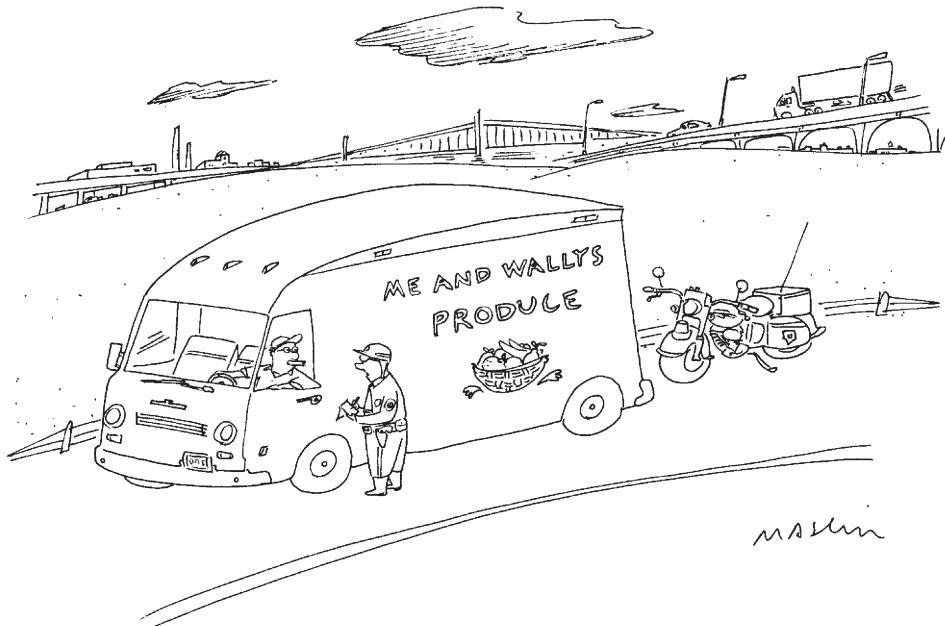

Figure 14.2 What Punctuation Tells the Reader

Mark	Tells the Reader
Period	We're stopping.
Semicolon	What comes next is closely related to what I just said.
Colon	What comes next is an example of what I just said.
Dash	What comes next is a dramatic example of or a shift from what I just said.
Comma	What comes next is a slight turn, but we're going in the same basic direction.

Using poor grammar is a crime to many readers.

"Sorry, but I'm going to have to issue you a summons for reckless grammar and driving without an apostrophe."

Instant Replay

Sentence Fragments

In a **sentence fragment**, a group of words that is not a complete sentence is punctuated as if it were a complete sentence.

- To indicate possession, add an apostrophe and an *s* to the word.

The **corporation's** home office is in Houston, Texas.

Apostrophes to indicate possession are especially essential when one noun in a comparison is omitted.

This **year's** sales will be higher than last **year's**.

When a word already ends in an *s*, add only an apostrophe to make it possessive.

The meeting will be held at New **Orleans'** convention center.

With many terms, the placement of the apostrophe indicates whether the noun is singular or plural.

Incorrect: The program should increase the **participant's** knowledge.

[Implies that only one participant is in the program.]

Correct: The program should increase the **participants'** knowledge.

[Many participants are in the program.]

Hint: Use *of* in the sentence to see where the apostrophe goes.

The figures of last year = last year's figures

The needs of our customers = our customers' needs

Possessive pronouns (e.g., *his*, *ours*) usually do not have apostrophes. The only exception is *one's*.

The company needs the goodwill of **its** stockholders.

His promotion was announced yesterday.

One's greatest asset is the willingness to work hard.

3. Use an apostrophe to make plurals that could be confused for other words.

I earned A's in all my business courses.

However, other plurals do not use apostrophes.

Colon

1. Use a colon to separate a main clause and a list that explains the last element in the clause. The items in the list are specific examples of the word that appears immediately before the colon.

Please order the following supplies:

Printer cartridges

Computer paper (20-lb. white bond)

Bond paper (25-lb., white, 25% cotton)

Company letterhead

Company envelopes.

When the list is presented vertically, capitalize the first letter of each item in the list. When the list is run in with the sentence, you don't need to capitalize the first letter after the colon.

Please order the following **supplies**: **printer** cartridges, computer paper (20-lb. white bond), bond paper (25-lb., white, 25% cotton), company letterhead, and company envelopes.

Do not use a colon when the list is grammatically part of the main clause.

Incorrect: The rooms will have coordinated decors in natural colors **such as**: eggplant, moss, and mushroom.

Correct: The rooms will have coordinated decors in natural colors **such as** eggplant, moss, and mushroom.

Correct: **The rooms will have coordinated decors in a variety of natural colors**: eggplant, moss, and mushroom.

If the list is presented vertically, some authorities suggest introducing the list with a colon even though the words preceding the colon are not a complete sentence.

2. Use a colon to join two independent clauses when the second clause explains or restates the first clause.

Selling is simple: Give people the service they need, and they'll come back with more orders.

Comma

1. Use commas to separate the main clause from an introductory clause, the reader's name, or words that interrupt the main clause. Note that commas both precede and follow the interrupting information.

R. J. **Garcia**, the new sales **manager**, comes to us from the Des Moines office.

While poor spelling and grammar may impede success, even great leaders have been known to exhibit lapses. A handwritten letter by President Abraham Lincoln recently drew scrutiny from modern readers, who noted such errors as an apostrophe inserted into the possessive pronoun "its" and an apostrophe missing in "nations" when meant possessively. Said Harold Holzer, an expert on the 16th U.S. President: "Lincoln was not the best speller in the world."

Source: "Lincoln Letter Shows Grammatical Errors," *The Times of India*, March 19, 2010, <http://timesofindia.indiatimes.com/world/us/Lincoln-letter-shows-grammatical-errors/articleshow/5699886.cms>.

Eats, Shoots & Leaves: The Zero Tolerance Approach to Punctuation by Lynne Truss explores with humor how improper punctuation mangles sentence meaning. The title came from a description of panda eating habits, but the misplaced comma suggests a more destructive event!

A misplaced comma cost cable television giant Rogers Communications more than \$2 million. The company thought it had an ironclad agreement with Aliant Telecom to use telecommunication poles for five years, but Aliant terminated the contract after only one year. A court upheld the move after ruling the errant comma changed the meaning of a contract clause, supporting Aliant's decision.

Source: William Loeffler, "Punctuation Errors Can Cost Jobs, Money, Esteem," *The Pittsburgh Tribune-Review*, September 20, 2009, http://www.pittsburghlive.com/x/pittsburghtrib/ae/more/s_643648.html.

A **nonessential clause** gives extra information that is not needed to identify the noun it modifies. Because nonessential clauses give extra information, they need extra commas.

Sue Decker, who wants to advance in the organization, has signed up for the company training program in sales techniques.

Do not use commas to set off information that restricts the meaning of a noun or pronoun. **Essential clauses** give essential, not extra, information.

Anyone who wants to advance in the organization should take advantage of on-the-job training.

Do not use commas to separate the subject from the verb, even if you would take a breath after a long subject.

Incorrect: Laws requiring anyone collecting \$5,000 or more on behalf of another person to be bonded, apply to schools and private individuals as well to charitable groups and professional fund-raisers.

Correct: Laws requiring anyone collecting \$5,000 or more on behalf of another person to be bonded apply to schools and private individuals as well to charitable groups and professional fund-raisers.

2. Use a comma after the first clause in a compound sentence if the clauses are long or if they have different subjects.

This policy eliminates all sick leave credit of the employee at the time of retirement, and payment will be made only once to any individual.

Do not use commas to join independent clauses without a conjunction. Doing so produces comma splices.

3. Use commas to separate items in a series. Using a comma before the *and* or *or* is not required by some authorities, but using a comma always adds clarity. The comma is essential if any of the items in the series themselves contain the word *and*.

The company pays the full cost of hospitalization insurance for eligible employees, spouses, and unmarried dependent children under age 23.

Dash

Use emdashes to emphasize a break in thought.

Ryertex comes in 30 grades—each with a special use.

To create a dash in Microsoft Word, type in a word, followed immediately by two hyphens and then a second word, with no space between the hyphens and the two words. Add a space after the second word and the hyphens instantly change to a dash.

Hyphen

1. Use a hyphen to indicate that a word has been divided between two lines.

For reimbursement, attach the original receipts for lodging, transportation, and registration fees.

Divide words at syllable breaks. If you aren't sure where the syllables divide, look up the word in a dictionary. When a word has several syllables, divide it after a vowel or between two consonants. Don't divide words of one syllable (e.g., *used*); don't divide a two-syllable word if one of the syllables is only one letter long (e.g., *acre*).

2. Use hyphens to join two or more words used as a single adjective.

Order five 10- or 12-foot lengths.

The computer-prepared Income and Expense statements will be ready next Friday.

The hyphen prevents misreading. In the first example, five lengths are needed, not lengths of 5, 10, or 12 feet. In the second example, without the hyphen, the reader might think that *computer* was the subject and *prepared* was the verb.

Parentheses

1. Use parentheses to set off words, phrases, or sentences used to explain or comment on the main idea.

For the thinnest Ryertex (.015") only a single layer of the base material may be used, while the thickest (10") may contain over 600 greatly compressed layers of fabric or paper. By varying the fabric used (cotton, asbestos, glass, or nylon) or the type of paper, and by changing the kind of resin (phenolic, melamine, silicone, or epoxy), we can produce 30 different grades.

Any additional punctuation goes outside the second parenthesis when the punctuation applies to the whole sentence. It goes inside when it applies only to the words in the parentheses.

Please check the invoice to see if credit should be issued. ([A copy of the invoice is attached.](#))

2. Use parentheses for the second of two numbers presented both in words and in figures.

Construction must be completed within [two \(2\)](#) years of the date of the contract.

Period

1. Use a period at the end of a sentence.
2. Use a period after some abbreviations. When a period replaces a person's name, leave one space after the period before the next word. In other abbreviations, no space is necessary.

[R. J. Tebeaux](#) has been named Vice President for Marketing.

The [U.S.](#) division plans to hire 300 new [M.B.A.s](#) in the next year.

The tendency is to reduce the use of punctuation. It would also be correct to write

The [US](#) division plans to hire 300 new [MBAs](#) in the next year.

Use the pattern your organization prefers.

Semicolon

1. Use semicolons to join two independent clauses when they are closely related.

We'll do our best to fill your order [promptly](#); however, we cannot guarantee a delivery date.

Using a semicolon suggests that the two ideas are very closely connected. Using a period and a new sentence is also correct but implies nothing about how closely related the two sentences are.

2. Use semicolons to separate items in a series when the items themselves contain commas.

The final choices for the new plant are El Paso, [Texas](#); Albuquerque, [New Mexico](#); Salt Lake City, [Utah](#); Eureka, [California](#); and Eugene, Oregon.

Hospital benefits are also provided for certain services such as diagnostic admissions directed toward a definite disease or [injury](#); normal maternity delivery, Caesarean-section delivery, or complications of [pregnancy](#); and in-patient admissions for dental procedures necessary to safeguard the patient's life or health.

Hint: A semicolon could be replaced by a period and a capital letter. It has a sentence on both sides.

What do I use when I quote sources? LO 14-6

- Quotation marks, square brackets, ellipses, and underlining or italics.

Quotation marks, square brackets, ellipses, and either underlining or italics are necessary when you use quoted material.

U.S. writers put periods and commas inside closing quotation marks; English writers put them outside the quotation marks. Spanish writers also put sentence-ending punctuation outside.

Source: Based on Complete Translation Services, "A History of Punctuation," www.completetranslation.com, downloaded July 23, 2005.

Quotation Marks

1. Use quotation marks around the names of brochures, pamphlets, and magazine articles.

Enclosed are 30 copies of our pamphlet “[Saving Energy](#).”

You’ll find articles like “[How to Improve Your Golf Game](#)” and “[Can You Keep Your Eye on the Ball?](#)” in every issue.

In U.S. punctuation, periods and commas go inside quotation marks. Colons and semicolons go outside. Question marks go inside if they are part of the material being quoted.

2. Use quotation marks around words to indicate that you think the term is misleading.

These “[pro-business](#)” policies actually increase corporate taxes.

3. Use quotation marks around words that you are discussing as words.

Forty percent of the respondents answered “[yes](#)” to the first question.

Use “[Ms.](#)” as a courtesy title for a woman unless you know she prefers another title.

It is also acceptable to underline or italicize words instead of using quotation marks. Choose one method and use it consistently.

4. Use quotation marks around words or sentences that you quote from someone else.

“[The Fog Index](#),” says its inventor, Robert Gunning, is “[an effective warning system against drifting into needless complexity](#).”

Square Brackets

Use square brackets to add your own additions to or changes in quoted material.

Senator Smith’s statement: “These measures will increase the deficit.”

Your use of Smith’s statement: According to Senator Smith, “These measures [[in the new tax bill](#)] will increase the deficit.”

The square brackets show that Smith did not say these words; you add them to make the quote make sense in your document.

Ellipses

Ellipses are spaced dots. In typing, use three spaced periods for an ellipsis. When an ellipsis comes at the end of a sentence, use a dot immediately after the last letter of the sentence for a period. Then add another three spaced dots.

1. Use ellipses to indicate that one or more words have been omitted in the middle of quoted material. You do not need ellipses at the beginning or end of a quote.

The Wall Street Journal notes that Japanese magazines and newspapers include advertisements for a “\$2.1 million home in New York’s posh Riverdale section . . . 185 acres of farmland [and] . . . luxury condos on Manhattan’s Upper East Side.”

2. In advertising and direct mail, use ellipses to imply the pace of spoken comments.

If you’ve ever wanted to live on a tropical island . . . cruise to the Bahamas . . . or live in a castle in Spain . . .

. . . you can make your dreams come true with Vacations Extraordinaire.

Underlining and Italics

1. Underline or italicize the names of newspapers, magazines, and books.

[The Wall Street Journal](#)

The Wall Street Journal

[Fortune](#)

Fortune

[The Wealth of Nations](#)

The Wealth of Nations

Titles of brochures and pamphlets are put in quotation marks.

2. Underline or italicize words to emphasize them.

Here's a bulletin that gives you, in handy chart form, *workable data* on over 50 different types of tubing and pipe.

You may also use boldface to emphasize words. Bolding is better than either underlining or italics because it is easier to read.

How should I write numbers and dates?

LO 14-7

► Usually, spell out numbers under 10 and at the beginning of sentences.

Spell out **numbers** from one to nine. Use figures for numbers 10 and over in most cases. Always use figures for amounts of money.

Spell out any number that appears at the beginning of a sentence. If spelling it out is impractical, revise the sentence so it does not begin with a number.

Fifty students filled out the survey.

In **2002**, euro notes and coins entered circulation.

When two numbers referring to different nouns follow each other, use words for the smaller number and figures for the larger number.

In **dates**, use figures for the day and year. The month is normally spelled out. Be sure to spell out the month in international business communication. U.S. usage puts the month first, so that *1/10/08* means *January 10, 2008*. European usage puts the day first, so that *1/10/08* means *October 1, 2008*. Modern punctuation uses a comma before the year only when you give both the month and the day of the month:

May 1, 2009

but

Summers 2004–07

August 2003

Fall 2006

No punctuation is needed in military or European usage, which puts the day of the month first: 13 July 2005. Do not add a space before or after the slash used to separate parts of the date: 10/03–5/07.

Use a dash to join inclusive dates.

March–August 2007 (or write out: **March to August 2007**)

05–08

1999–2009

Note that you do not need to repeat the century in the date that follows the dash: 2007–09. But do give the century when it changes: 1999–2008.

Typos can have stunning repercussions. In 2005, a typing error caused Mizuho Securities Co. to lose at least 27 billion yen, or \$225 million. The trader had meant to sell 1 share at 610,000 yen, or \$5,041, but inputted 610,000 shares at 1 yen, or less than a penny. Even top news outlets can slip. A CNN story on the search for Osama Bin Laden was mistakenly titled "Where's Obama?" resulting in multiple apologies to Senator Barack Obama, who later announced his candidacy for U.S. president.

And while many people complain about the high cost of cable TV, few expect to receive a bill like Daniel DeVirgillo's. "All I want to do is watch March Madness," the Ohioan said. The problem was Time Warner said he owed \$16.4 million in late charges.

Sources: "\$225 Mil. Typo: Not 610,000 Shares, Just One Please," *Chicago Sun-Times*, December 10, 2005, downloaded at http://findarticles.com/p/articles/mi_qn4155/is_20051210/ai_n15921111; Jennifer Millman, "Barack 'Osama'? CNN Says 'Sorry' for Botched Broadcast," *DiversityInc.*, January 3, 2007, downloaded at www.diversityinc.com/public/1096.cfm?sd=151; and Dave Larsen, "Time Warner Charges Wright-Patt Engineer \$16.4 Million for Cable," *Springfield News-Sun*, March 24, 2011, <http://www.springfieldnewssun.com/news/business/time-warner-charges-wright-patt-engineer-164-milli/nMqHp/>.

How do I mark errors I find in proofreading?

LO 8

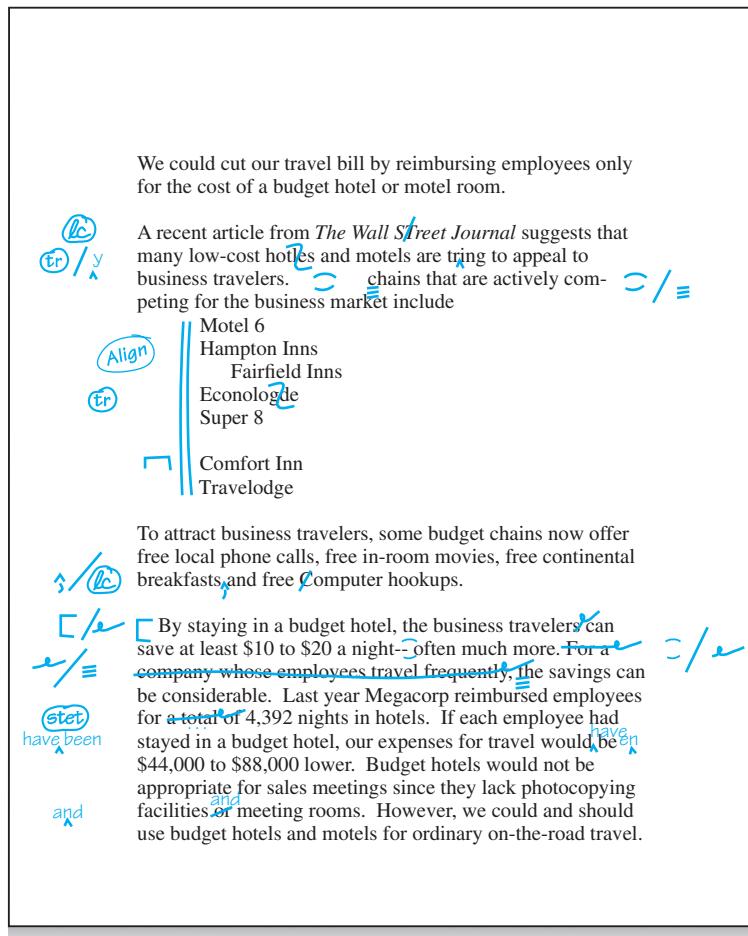

► Use these standard proofreading symbols.

Use the proofreading symbols in Figure 14.3 to make corrections when you no longer have access to a computer. Figure 14.4 shows how the symbols can be used to correct a typed text.

Figure 14.3 Proofreading Symbols

	delete		move to left
	insert a letter		move to right
	start a new paragraph here		move up
	stet (leave as it was before the marked change)		move down
	transpose (reverse)		leave a space
	lowercase (don't capitalize)		close up
	capitalize		align vertically

Figure 14.4 Marked Text

Assignments for Module 14

Questions for Comprehension

- 14.1 Why is it better to fix errors in grammar and punctuation only after you've revised for content, organization, and style? (LO 14-1 to LO 14-7)
- 14.2 What words make clauses subordinate and thus require more than a comma to join clauses? (LO 14-2)
- 14.3 What is parallel structure? When should you use it? (LO 14-2)
- 14.4 What is a sentence fragment? How do you fix it? (LO 14-3)

Questions for Critical Thinking

- 14.5** Consuela sees a lot of errors in the writing of managers at her workplace. If they don't know or don't care about correctness, why should she? (**LO 14-1**)
- 14.6** After surveying readers in her workplace (problem 14.15), Camilla finds that most of them are not bothered by errors in grammar and punctuation. Does that mean that she doesn't need to fix surface errors? (**LO 14-1**)

Exercises and Problems

14.8 Identifying Audience Concerns about Grammar (LO 14-1 to LO 14-7)

Most readers care passionately about only a few points of grammar. Survey one or more readers (including your boss, if you have a job) to find out which kinds of errors concern them. Use a separate copy of this survey for each reader.

Directions: Each of the following sentences contains some error. Please circle Y if the error bothers you a good bit; S if the error bothers you slightly; and N if you would not be bothered by the error (or perhaps even notice it).

- | | |
|--------------|--|
| Y S N | 1. She brought her secretary with her. |
| Y S N | 2. Him and Richard were the last ones hired. |
| Y S N | 3. Wanted to tell you that the meeting will be November 10. |
| Y S N | 4. Each representative should bring a list of their clients to the meeting. |
| Y S N | 5. A team of people from CSEA, Human Services, and Animal Control are preparing the proposal. |
| Y S N | 6. We cannot predict, how high the number of clients may rise. |
| Y S N | 7. He treats his clients bad. |
| Y S N | 8. She asked Darlene and I to give a presentation. |
| Y S N | 9. Update the directory by reviewing each record in the database and note any discrepancies. |
| Y S N | 10. He has gone to a lot of trouble to meet our needs. |
| Y S N | 11. She gave the report to Dan and myself. |
| Y S N | 12. I was unable to complete the report. Because I had a very busy week. |
| Y S N | 13. The benefits of an online directory are <ul style="list-style-type: none"> a. We will be able to keep records up-to-date; |

14.9 Making Subjects and Verbs Agree (LO 14-2)

Identify and correct the errors in the following sentences.

1. Corinne are going to tour the Hokaido facility in December.
2. We is planning to take the GMAT at the same time to simplify things.
3. While Lani Esposito were our first choice, she declined the job offer.

14.10 Using the Right Pronoun (LO 14-2)

Identify and correct the errors in the following sentences.

1. Bryan e-mailed Todd Winthrop at our Southfield office yesterday, but they didn't receive the message till Thursday.

- 14.7** Joe knows that his variety of English isn't the privileged variety, but he is afraid that using standard edited English will make him seem "uppity" to people in his home community. Should he try to use standard grammar and pronunciation? Why or why not? (**LO 14-1**)

- b. Access to the directory from any terminal with a modem in the county.
- c. Cost savings.

- | | |
|--------------|---|
| Y S N | 14. By making an early reservation, it will give us more time to plan the session to meet your needs. |
| Y S N | 15. She doesn't have no idea how to use the computer. |
| Y S N | 16. The change will not effect our service to customers. |
| Y S N | 17. Confirming our conversation, the truck will leave Monday. |
| Y S N | 18. The sessions will begin January 4 we will pass around a sign-up sheet early in December. |
| Y S N | 19. I will be unable to attend the meeting, however I will send someone else from my office. |
| Y S N | 20. It's too soon to tell how many proposals we will receive. |

Compare your responses with those of a small group of students.

- Which errors were most annoying to the largest number of readers?
- How much variation do you find in a single workplace? In a single type of business?

As Your Instructor Directs,

- a. Present your findings to the class in a short group report.
- b. Present your findings to the class in an oral presentation.

4. Tyler and Jorge is taking one of the pool cars to the regional meeting.
5. Ephraim reminded us that the first and third Wednesdays of the month are when timecards are due.

2. I, Ramon, and Paulette reserved a company car for the three-hour trip to Anaheim this afternoon.
3. We was wondering if anyone contacted the Finance Department to ask them for copies of our annual report.

4. If employees are in uniform, he should understand that he is representing the company, whether on duty or not.

14.11 Fixing Dangling and Misplaced Modifiers (LO 14-2)

Identify and correct the errors in the following sentences.

1. Eleanor reported there were two delayed flights at the staff meeting.
2. At the age of 15, my mom let me drive the car around the block for the first time.
3. Expressing herself with confidence, I was impressed with Lee's answers during the interview.

14.12 Creating Parallel Structure (LO 14-2)

Identify and correct the errors in the following sentences.

1. To narrow a web search,
 - Put quotation marks around a phrase when you want an exact term.
 - Many search engines have wild cards (usually an asterisk) to find plurals and other forms of a word.
 - Reading the instructions on the search engine itself can teach you advanced search techniques.
2. Men drink more alcoholic beverages than women.
3. Each issue of *Hospice Care* has articles from four different perspectives: legislative, health care, hospice administrators, and inspirational authors.
4. The university is one of the largest employers in the community, brings in substantial business, and the cultural impact is also big.

14.13 Correcting Sentence Errors (LO 14-3)

Identify and correct the errors in the following sentences.

1. You can expect our fleet cars to be in pristine working order you can also enjoy such amenities as cruise control, GPS tracking, and satellite radio.
2. Without filling out the appropriate requisition form, the disciplinary action report indicated that Kelly purchased two fax machines for the department.
3. Customers can order through the web page or they can order through our 1-800 number or they can order through traditional mail.

14.14 Providing Punctuation within Sentences (LO 14-5)

Provide the necessary punctuation in the following sentences. Note that not every box requires punctuation.

1. Office work□□ especially at your desk□□ can create back□ shoulder □neck□ or wrist strain.
2. I searched for □vacation□ and □vacation planning□ on Google and Alta Vista.
3. I suggest putting a bulletin board in the rear hallway□ and posting all the interviewer□s□ photos on it.
4. Analyzing audiences is the same for marketing and writing□ you have to identify who the audiences are□ understand how to motivate them□ and choose the best channel to reach them.
5. The more you know about your audience □who they are□ what they buy□where they shop□□the more relevant and effective you can make your ad.

5. Jeff Yee and me took a few moments to thank the marketing team for their great work on the December sales promotion.

4. With a broad smile on his face, we watched Alistair accept the Lifetime Achievement Award.
5. Thinking our plane would be delayed due to bad weather, the meeting was rescheduled to 3 p.m.

5. These three tools can help competitive people be better negotiators.

- Think win-win.
- It's important to ask enough questions to find out the other person's priorities, rather than jumping on the first advantage you find.
- Protect the other person's self-esteem.

These three questions can help cooperative people be better at negotiations.

- Can you developing a specific alternative to use if negotiation fails?
- Don't focus on the "bottom line." Spend time thinking about what you want and why you need it.
- Saying "You'll have to do better than that because . . ." can help you resist the temptation to say "yes" too quickly.

4. They spent the month visiting our satellite offices and meeting their staff. In Fort Wayne. In Lawrence. In Flint. And in Dayton.

5. Zane and me prepared the cover for the annual report and then we gave it to Nardos for review so she will let us know tomorrow if there are any revisions.

6. The city already has five□ two□hundred □bed hospitals.

7. Students run the whole organization□ and are advised by a Board of Directors from the community.

8. The company is working on three team□related issues□ interaction, leadership, and team size.

9. I would be interested in working on the committee□ however I have decided to do less community work so that I have more time to spend with my family.

10. □You can create your own future□□ says Frank Montaño□ □You have to think about it□ crystallize it in writing□ and be willing to work at it□ We teach a lot of goal□setting and planning in our training sessions□□

14.15 Fixing Errors in Grammar and Punctuation (LO 14-5)

Identify and correct the errors in the following passages.

- a. Company's are finding it to their advantage to cultivate their suppliers. Partnerships between a company and its suppliers can yield hefty payoffs for both company and supplier. One example is Bailey Controls, an Ohio headquartered company. Bailey make control systems for big factories. They treat suppliers almost like departments of their own company. When a Bailey employee passes a laser scanner over a bins bar code the supplier is instantly alerted to send more parts.
- b. Entrepreneur Trip Hawkins appears in Japanese ads for the video game system his company designed. "It plugs into the future!" he says in one ad, in a cameo spliced

into shots of U.S kids playing the games. Hawkins is one of several US celebrities and business people whom plug products on Japanese TV."

- c. Mid size firms employing between 100 and 1,000 people represent only 4% of companies in the U.S.; but create 33% of all new jobs. One observer attributes their success to their being small enough to take advantage of economic opportunity's agilely, but big enough to have access to credit and to operate on a national or even international scale. The biggest hiring area for midsize company's is wholesale and retail sales (38% of jobs), construction (20% of jobs), manufacturing (19% of jobs), and services (18% of jobs).

Polishing Your Prose

Matters on Which Experts Disagree

Any living language changes. New usages appear first in speaking. Here are five issues on which experts currently disagree:

1. Plural pronouns to refer to *everybody*, *everyone*, and *each*. Standard grammar says these words require singular pronouns: *his or her* rather than *their*.
2. Split infinitives. An infinitive is the form of a verb that contains *to*: *to understand*. An infinitive is **split** when another word separates the *to* from the rest of an infinitive: *to easily understand*, *to boldly go*. The most recent edition of the *Oxford English Dictionary* allows split infinitives. Purists disagree.
3. *Hopefully* to mean *I hope that*. *Hopefully* means "in a hopeful manner." However, a speaker who says "Hopefully, the rain will stop" is talking about the speaker's hope, not the rain's.
4. *Verbal* to mean *oral*. *Verbal* means "using words." Therefore, both writing and speaking are verbal communication. Nonverbal communication (for example, body language) does not use words.
5. Comma before *and*. In a series of three or more items, some experts require a comma after the next to last item (the item before the *and*); others don't.

Ask your instructor and your boss whether they are willing to accept the less formal usage. When you write to someone you don't know, use standard grammar and usage.

Exercises

Each of the following sentences illustrates informal usage.

- (a) Which would your instructor or your boss accept?
- (b) Rewrite each of the sentences using standard grammar and usage.

1. Hopefully, we can expand our marketing efforts to Canada in the next few months.
2. Max told us that everybody gets their chance eventually. The trick is to be ready to take it when it happens.
3. Though Gregory said he had a verbal agreement with Parker, Sandy reminded him that it should have been in writing.
4. He said it was more important to successfully serve customers than to simply sell products.
5. Sue Ellen wondered if the plan to quickly go to the supply store before the meeting would instead make them late.
6. The department's best employees are Kai, Paul, Giselle, Timothy, and Elizabeth.
7. While they had a verbal disagreement on the phone yesterday, they stayed professional and patched things up today.
8. Each manager should make sure their department has a box for the Operation Feed campaign.
9. Carolyn said she expects that the Purchasing, Public Relations, and Building Management Departments will each send their representatives to the meeting.
10. The fourth shipment got delayed in transit, but Jenny said hopefully everybody will get their order within 72 hours.

Check your answers to the odd-numbered exercises at the back of the book.

Module

15 Choosing the Right Word

LEARNING OBJECTIVES

Module 15 will help you to choose the right words for your business messages. After completing the module, you should be able to

- | | |
|---|--|
| LO 15-1 Recognize value in using the right words. | LO 15-4 Distinguish acceptable jargon from other types. |
| LO 15-2 Apply strategies for critical thinking in reading, writing, and beyond. | LO 15-5 Define words with similar sounds but different meanings. |
| LO 15-3 Explain principles for word definition. | |

The best word depends on context: the situation, your purposes, your audience, and the words you have already used. As you choose words,

1. Use words that are accurate, appropriate, and familiar.

Accurate words mean what you want to say.

Appropriate words convey the attitudes you want and fit well with the other words in your document.

Familiar words are easy to read and understand.

2. Use technical jargon only when it is essential and known to the reader. Eliminate business jargon.

Does using the right word really matter? LO 15-1

- *The right word helps you look good and get the response you want.*

Using the right word is part of the way you demonstrate that you're part of a discourse community (◀◀ p. 28). Using simple words is part of the way you create a friendly image of yourself and your organization. Using words that are part of standard edited English helps you build credibility and demonstrate your professionalism.

U.S. presidents, as well as presidential hopefuls, are known for sometimes choosing words poorly. When President George W. Bush declared the war against terrorism a "crusade," the word troubled many observers, who noted its connotation, especially in the Middle East, might be terrifying to more than just the nation's enemies. His successor, President Barack Obama, also got into trouble. "The private sector is doing fine" may have been his biggest gaffe, a statement made during his 2012 reelection campaign against Mitt Romney. Though supporters argued it was interpreted out of context, the comment seemed similar to one by Senator John McCain during the 2008 presidential campaign that drew sharp criticism from the Obama camp. Romney made Obama's phrase the cornerstone of TV commercials. Romney himself got into trouble with remarks to British interviewers that preparations, including security, for the 2012 Summer Olympics in London were "disconcerting." Tabloids had a field day, referring to the former governor and 2002 Winter Olympics chairman as "Mitt, the Twit." Even Prime Minister David Cameron was critical.

Source: Glen Johnson, "President Obama's 'Private Sector' Gaffe a Possible Window to Soul Like Other Recent Gaffes," *The Boston Globe*, June 11, 2012, <http://www.boston.com/politicalintelligence/2012/06/11/president-obama-private-sector-gaffe-possible-window-soul-like-other-recent-gaffes/mVfqps0bbcMa5nS2015fcP/story.html>; and Holly Bailey, "British Media Hammer Romney on Olympic Comments," July 26, 2012, <http://news.yahoo.com/blogs/ticket/british-media-hammer-romney-olympic-comments-103800909.html>.

Getting Your Meaning Across

When the words on the page don't say what you mean, the reader has to work harder to figure out your meaning. According to one report, "The western part of Ohio was transferred from Chicago to Cleveland."¹ In fact, Ohio did not move. Instead, a company moved responsibility for sales in western Ohio. Sometimes your audience can figure out what you mean. Sometimes, your meaning will be lost. Sometimes the wrong word can cause you to lose a lawsuit.

Denotation is a word's literal or dictionary meaning. Most common words in English have more than one denotation. The word *pound*, for example, means, or denotes, a unit of weight, a place where stray animals are kept, a unit of money in the British system, and the verb *to hit*. Coca-Cola spends an estimated \$20 million a year to protect its brand names so that *Coke* will denote only that brand and not just any cola drink.

When two people use the same word to mean, or denote, different things, **bypassing** occurs. For example, negotiators for Amoco and for the Environmental Protection Agency (EPA) used *risk* differently. At Amoco, *risk* was an economic term dealing with efficiency; for the EPA, the term "was a four-letter word that meant political peril or health risk."² Progress was possible only when they agreed on a meaning.

Accurate denotations can make it easier to solve problems. In one production line with a high failure rate, the largest category of defects was *missed operations*. At first, the supervisor wondered if the people on the line were lazy or irresponsible. But some checking showed that several different problems were labeled *missed operations*: parts installed backward, parts that had missing screws or fasteners, parts whose wires weren't connected. Each of these problems had different solutions. Using accurate words redefined the problem and enabled the production line both to improve quality and cut repair costs.³

Getting the Response You Want

Using the right word helps you shape the audience's response to what you say. **Connotation** means the emotional colorings or associations that accompany a word. A great many words carry connotations of approval or disapproval, disgust or delight. Words in the first column in the accompanying list suggest criticism; words in the second column suggest approval.

Negative Word

guess
nosy
haggle
fearful
nit-picking
obstinate
wishes-washy

Positive Word

assume
curious
negotiate
cautious
careful
firm
flexible

A supervisor can "tell the truth" about a subordinate's performance and yet write either a positive or a negative performance appraisal, based on the connotations of the words

The food industry continues to use words that are potentially misleading to consumers. For instance, if the label says “all natural,” consumers should be aware that there is no legal definition for what that means, and something that is “fat free” may, in fact, still be high in calories, especially if its principal ingredient is sugar.

Source: Charlotte Andersen, “Are You Falling for These Food Label Lies?” *Shape*, December 27, 2011, <http://www.shape.com/healthy-eating/diet-tips/are-you-falling-these-10-food-label-lies>.

Learning idioms, such as “I’m making the grade” and “She’s geeking on *Twilight*,” is challenging, especially to non-native speakers of English. To help people who learned English in India, China, the Czech Republic, and other countries adapt to American phrases, companies like English, Baby! and web-based programming like the Voice of America’s OMG! Meiyu reach out to millions of people who wish to understand the nuances of “eye gunk.” Among the words and phrases that trip up non-native speakers are “psyched,” “big deal,” and “hookup.”

Source: Alina Dizik, “Mastering the Finer Points of American Slang,” *The Wall Street Journal*, May 30, 2012, <http://online.wsj.com/article/SB10001424052702303610504577418660113838998.html>.

in the appraisal. Consider an employee who pays close attention to details. A positive appraisal might read, “Terry is a meticulous team member who takes care of details that others sometimes ignore.” But the same behavior might be described negatively: “Terry is hung up on trivial details.”

Advertisers carefully choose words with positive connotations. Expensive cars are never *used*; instead, they’re *preowned*, *experienced*, or even *preloved*. An executive for Rolls-Royce once said, “A Rolls never, never breaks down. Of course,” he added, with a twinkle in his eye, “there have been occasions when a car has failed to proceed.”⁴

Words may also connote status. Both *salesperson* and *sales representative* are nonsexist job titles. But the first sounds like a clerk in a store; the second suggests someone selling important items to corporate customers.

Use familiar words that are in almost everyone’s vocabulary. Try to use specific, concrete words. They’re easier to understand and remember.⁵ Short, common words sound friendlier.

Stuffy: Please give immediate attention to ensure that the pages of all reports prepared for distribution are numbered sequentially and in a place of optimum visibility.⁶

Simple: Please put page numbers on all reports in the top outer corner.

The following list gives a few examples of short, simple alternatives.

Formal and Stuffy

ameliorate
commence
enumerate
finalize
prioritize
utilize
viable option

Short and Simple

improve
begin
list
finish, complete
rank
use
choice

There are four exceptions to the general rule that “shorter is better.”

1. Use a long word if it is the only word that expresses your meaning exactly.
2. Use a long word or phrase if it is more familiar than a short word. *Send out* is better than *emit* and *a word in another language for a geographic place or area* is better than *exonym* because more people know the first item in each pair.
3. Use a long word if its connotations are more appropriate. *Exfoliate* is better than *scrape off dead skin cells*.
4. Use a long word if the discourse community prefers it.

Connotations may differ among cultures. Even within a culture, connotations may change over time. The word *charity* had acquired such negative connotations by the 19th century that people began to use the term *welfare* instead. Now, *welfare* has acquired negative associations. Most states have *public assistance* programs instead.

How positively can we present something and still be ethical? Referring to a product as *probiotic* is probably better than saying it’s infused with bacteria similar to those in your digestive system.⁷ *Pressure-treated lumber* sounds acceptable. But naming the product by

Prune

Dried Plum

Sales of prunes fell 14% from 1993 to 1999. To stop the slide, the California Prune Board decided to change the product’s name (and its own). To do so required approval from the U.S. Food & Drug Administration, which regulates food labels. Now you can’t buy prunes; you buy “dried plums.” By July 2001, sales had risen 5.5% over the previous 12-month period.⁸

Thinking Critically LO 15-2

Like many terms, **critical thinking** has more than one meaning.

In its most basic sense, critical thinking means using precise words and asking questions about what you read and hear.

Vague: This *Wall Street Journal* story discusses international business.

Precise: This *Wall Street Journal* story tells how Walmart plans to expand into Europe. challenges the claim that a U.S. company needs a native partner to succeed in international business. gives examples of translation problems in international business. compares and contrasts accounting rules in Europe and in Asia. tells how three women have succeeded in international business.

Questions about a *Wall Street Journal* story might include

- What information is the story based on? Did the reporter interview people on both sides of the issue?
- When was the information collected? Is it still valid?
- Does evidence from other newspapers and magazines and from your own experience tend to confirm or contradict this story?
- How important is this story? Does it call for action on your part?

Critical thinking is especially important to business in the 21st century, so much so that the narrow focus on traditional business skills in MBA programs earned criticism from management guru Warren Bennis. He noted, “They are teaching courses to middle managers when they need to prepare leaders.” To help students learn to think “out of the box,” some MBA programs now include courses in law, poetry, entrepreneurship, and biotechnology.

In a more advanced sense, critical thinking means the ability to identify problems, gather and evaluate evidence, identify and evaluate alternate solutions, and recommend or act on the best choice—while understanding that information is always incomplete and that new information might change one’s judgment of the “best” choice.

In its most advanced sense, critical thinking means asking about and challenging fundamental assumptions. For example, as companies shift from a domestic business model to a global

one, they must question whether their values fit into new marketplaces.

That’s what U.S. companies wishing to attract China’s youth market—whose annual incomes total \$40 billion—did, finding that while Chinese youth want to express themselves, images of extreme rebellion were distasteful to them.

“Chinese youth are not becoming Western. You don’t scrub away 5,000 years of Confucian values with a couple of ads for McDonald’s and Pepsi,” said Tom Doctoroff, a marketing expert and CEO in Shanghai.

Even as they dye their hair wild colors or get body piercings, Chinese youth are still concerned with values like good grades and pleasing their parents. So, American companies Coca-Cola, McDonald’s, and the National Basketball Association identified four “passion points” that aligned with Chinese value systems: music, fashion, sports, and technology. They created promotions that appealed to these passion points, using popular Chinese celebrities and athletes in socially acceptable presentations.

Coca-Cola alone saw sales increase in cyber cafés by 30%. Such benefits came from questioning the assumption that young people around the world assert their individuality in the same way and for the same reasons.

A study published in the *Journal of Personality and Social Psychology* found that men who rate themselves as disagreeable, stubborn, and difficult make more money than co-workers, an average of 18% more pay. Judged at face value, such a study suggests rewards for being mean in the workplace. But what is the explanation? Is it because the workplace values being mean? Or are mean men more assertive, and thus more likely to compete harder for raises and promotions? And what are the long-term effects? For instance, do mean men make more money in the short run but less over the course of their careers? Thinking critically about questions like these can lead to meaningful conclusions.

Sources: James Flanigan, “Makeover for MBA Programs,” www.latimes.com/business/la-fi-flan26june26,1,5147417.column, June 26, 2005; Normandy Madden, “Reaching China’s Youth: A Balancing Act,” *Advertising Age*, June 6, 2005, 14; and Liz Goodwin, “Mean Guys Finish First, at Least in Their Paychecks,” August 15, 2011, <http://news.yahoo.com/blogs/lookout/mean-guys-finish-first-least-paychecks-193159172.html>.

the material injected under pressure—*arsenic-treated lumber*—may lead the customer to make a different decision. Wood treated in this way even has been banned from most residential uses in the United States. We have the right to package our ideas attractively, but we have the responsibility to give the public or our superiors all the information they need to make decisions.

How do words get their meanings? LO 15-3

- Most meanings depend on usage.

Some dictionaries are *descriptive*, that is, their definitions describe the way people actually use words. In such a dictionary, the word *verbal* might be defined as *spoken, not written*, because many people use the word that way. In a *prescriptive* dictionary, words are defined as they are supposed to be used, according to a panel of experts. In such a dictionary, *verbal* would be defined as *using words*—which of course includes both writing and speaking. Check the introduction to your dictionary to find out which kind it is.

We learn meanings by context, by being alert and observant. Some terms will have a specialized meaning in a social or work group. We learn some meanings by formal and informal study: “generally accepted accounting principles” or what the trash can on an e-mail screen symbolizes. Some meanings are negotiated as we interact one-on-one with another person, attempting to communicate. Some words persist, even though the reality behind them has changed. In 9 of the 10 largest U.S. cities, so-called “minorities” are already in the majority.⁹ Some people are substituting the term *traditionally underrepresented groups* for *minorities*, but the old term is likely to remain in use for some time.

Some meanings are voted upon. Take, for example, the term *minority-owned business*. For years, the National Minority Supplier Development Council (NMSDC) has defined the term as a business at least 51% of whose owners were members of racial or ethnic minorities. But that made it hard for businesses to attract major capital or to go public, since doing so would give more ownership to European-American investors. In 2000, the NMSDC redefined *minority-owned business* as one with minority management and at least 30% minority ownership.¹⁰

Go to

www.sec.gov/pdf/handbook.pdf

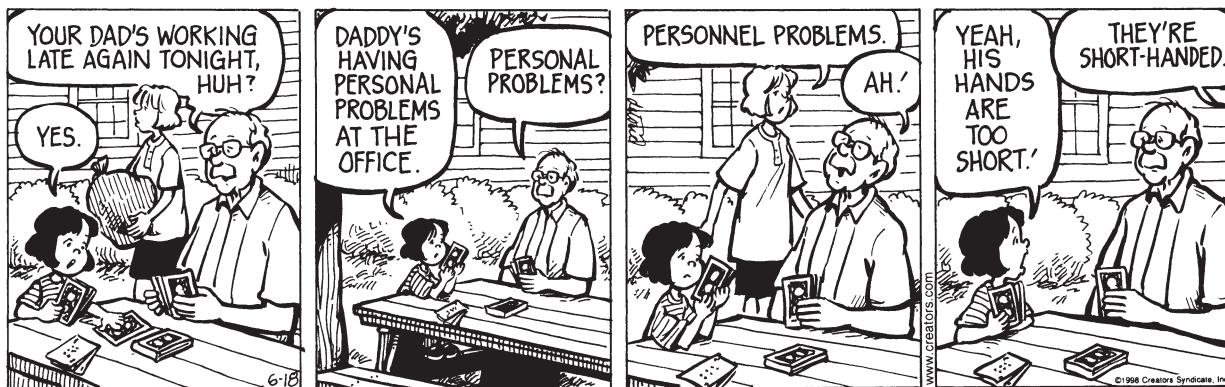

for the Security and Exchange Commission's *A Plain English Handbook*.

Is it OK to use jargon? LO 15-4

- If it's essential.

There are two kinds of **jargon**. The first kind of jargon is the specialized terminology of a technical field. *LIFO* and *FIFO* are technical terms in accounting; *byte* and *baud* are computer jargon; *scale-free* and *pickled and oiled* designate specific characteristics of steel. Using technical terms in a job application letter suggests that you're a peer who also is competent in that field. In other messages, use technical jargon only when the term is essential. Define the term when you're not sure whether the reader knows it.

Many words are easily confused.

By permission of Rick Detorie and Creators Syndicate, Inc.

If a technical term has a “plain English” equivalent, use the simpler term:

Jargon: Foot the average monthly budget column down to Total Variable Cost, Total Management Fixed Cost, Total Sunk Costs, and Grand Total.

Better: Add the figures in the average monthly budget column for each category to determine the Total Variable Costs, the Total Management Fixed Costs, and the Total Sunk Costs. Then add the totals for each category to arrive at the Grand Total.

The revision here is longer but better because it uses simple words. The original will be meaningless to a reader who does not know what *foot* means.

The second kind of jargon is **business jargon**, sometimes called **businessese**: *as per your request, enclosed please find, please do not hesitate*. If any of the terms in the first column of Figure 15.1 show up in your writing, replace them with more modern language.

Instant Replay

Use a long word when

1. It is the only word that expresses your meaning exactly.
2. It is more familiar than a short word.
3. Its connotations are more appropriate.
4. The discourse community prefers it.

What words confuse some writers? LO 15-5

► Words with similar sounds can have very different meanings.

Here's a list of words that are frequently confused. Master them, and you'll be well on the way to using the right word.

1. accede/exceed

accede: to yield

exceed: to go beyond, surpass

I **accede** to your demand that we not **exceed** the budget.

2. accept/except

accept: to receive

except: to leave out or exclude; but

I **accept** your proposal **except** for point 3.

Please do not hesitate	Omit	Omit negative words.
Pursuant to	According to; or omit	<i>Pursuant</i> does not mean <i>after</i> . Omit legal jargon in any case.
Said order	Your order	Omit legal jargon.
This will acknowledge receipt of your letter.	Omit—start your response	If you answer a letter, the reader knows you got it.
Trusting this is satisfactory, we remain	Omit	Eliminate <i>-ing</i> endings. When you are through, stop.

- Octoberfest is held in September.
- The Big 10 has 12 teams.
- The principal ingredient in sweetbread is neither sugar nor bread but the cooked pancreas or thymus of a young animal, usually a calf.

Site to See

Go to

www.wsu.edu/~brians/errors

for an even longer list of errors (and words that may sound wrong but are really right).

3. access/excess

- access: the right to use; admission to
excess: surplus

As supply clerk, he had **access** to any **excess** materials.

4. adept/adopt

- adept: skilled
adopt: to take as one's own

She was **adept** at getting people to **adopt** her ideas.

5. advice/advise

- advice: (noun) counsel
advise: (verb) to give counsel or advice to someone

I asked him to **advise** me but I didn't like the **advice** I got.

6. affect/effect

- affect: (verb) to influence or modify
effect: (verb) to produce or cause; (noun) result

He hoped that his argument would **affect** his boss' decision, but so far as he could see, it had no **effect**.

The tax relief **effected** some improvement for the citizens whose incomes had been affected by inflation.

7. affluent/effluent

- affluent: (adjective) rich, possessing in abundance
effluent: (noun) something that flows out

Affluent companies can afford the cost of removing pollutants from the **effluents** their factories produce.

8. a lot/allot

- a lot: many (informal)
allot: divide or give to

A lot of players signed up for this year's draft. We **allotted** one first-round draft choice to each team.

9. amount/number

- amount: (use with concepts that cannot be counted individually but can only be measured)
number: (use when items can be counted individually)

It's a mistake to try to gauge the **amount** of interest he has by the **number** of questions he asks.

10. are/our

- are: (plural linking verb)
our: belonging to us

Are we ready to go ahead with **our** proposal?

11. assure/ensure/insure

- assure: to give confidence, to state confidently
ensure: to make safe (figuratively)
insure: to make safe, often by paying a fee against possible risk

I **assure** you that we **ensure** employees' safety by hiring bodyguards.

The pianist **insured** his fingers against possible damage.

12. attributed/contributed

- attributed: was said to be caused by
contributed: gave something to

The rain probably **contributed** to the accident, but the police officer **attributed** the accident to driver error.

Instant Replay

Two Kinds of Jargon

Technical jargon includes words that have specific technical meanings. Use this kind of jargon in job application letters. Avoid other technical jargon unless it's essential. **Business jargon** or **businessese** are words that do not have specialized meanings. Never use these terms.

13. between/among

- between: (use with only two choices)
 among: (use with more than two choices)

This year the differences **between** the two candidates for president are unusually clear.

I don't see any major differences **among** the candidates for city council.

14. cite/sight/site

- cite: (verb) to quote
 sight: (noun) vision, something to be seen
 site: (noun) real or virtual location

She **cited** the old story of the building inspector who was depressed by the very **sight** of the **site** for the new factory.

15. complement/compliment

- complement: (verb) to complete, finish; (noun) something that completes
 compliment: (verb) to praise; (noun) praise

The **compliment** she gave me **complemented** my happiness.

16. compose/comprise

- compose: make up, create
 comprise: consist of, be made up of, be composed of

The city council is **composed** of 12 members. Each district **comprises** an area 50 blocks square.

17. confuse/complicate/exacerbate

- confuse: to bewilder
 complicate: to make more complex or detailed
 exacerbate: to make worse

Because I missed the first 20 minutes of the movie, I didn't understand what was going on. The **complicated** plot **exacerbated** my **confusion**.

18. describe/prescribe

- describe: list the features of something, tell what something looks like
 prescribe: specify the features something must contain

The law **prescribes** the priorities for making repairs. His report describes our plans to comply with the law.

19. discreet/discrete

- discreet: tactful, careful not to reveal secrets
 discrete: separate, distinct

I have known him to be **discreet** on two **discrete** occasions.

20. do/due

- do: (verb) act or make
 due: (adjective) scheduled, caused by

The banker said she would **do** her best to change the **due** date.

Due to the computer system, the payroll can be produced in only two days for all 453 employees.

21. elicit/illicit

- elicit: (verb) to draw out
 illicit: (adjective) not permitted, unlawful

The reporter could **elicit** no information from the Senator about his **illicit** love affair.

While spell-checkers are getting better at finding mistakes, they still typically get tripped up by homonyms, or words that sound alike, and correctly spelled words that are being used incorrectly. Watch out for "affect" instead of "effect," for instance, or saying "I would of" instead of "I would have." Word processing programs have customizable features to help. Microsoft Word, for instance, can use multiple dictionaries so foreign or technical words can be checked for different kinds of writing projects. One way to check for homonyms is to exclude them from the dictionary so they are flagged every time. Grammar checkers may also catch some of these types of errors, but the best final step is still to know the correct words and phrases and review documents manually for errors.

Source: Kaboodle.com, "11 Common Spelling Errors Spell Check Won't Catch," April 16, 2012, <http://shine.yahoo.com/work-money/11-common-spelling-errors-spell-check-won-8217-172300248.html>; Helen Bradley, "10 Spelling Checker Secrets for Microsoft Word," *PC World*, March 13, 2012, http://www.pcworld.com/businesscenter/article/251766/10_spelling_checker_secrets_for_microsoft_word.html.

With foreclosure imminent, some homeowners found a three-word phrase to stave off banks and lending companies: *Produce the note*. Many mortgages had been bundled and sold during the real estate boom, sometimes repeatedly, and not every company claiming ownership of a mortgage had the documentation to prove it. As a result, homeowners slowed or stopped foreclosure or even convinced lenders to renegotiate the mortgage.

Source: Mitch Stacy, "Homeowner's Rallying Cry: Produce the Note," *The San Francisco Chronicle*, February 17, 2009, <http://www.sfgate.com/cgi-bin/article.cgi?f=/n/a/2009/02/17/national/a120919S63.DTL>.

While *fast food* may not imply *romance* to many people, it did for customers participating in White Castle's Valentine's Day experience at select locations. To date, nearly 4,000 couples have enjoyed the holiday trimmings at 157 of the chain's 419 locations, and one couple even wed in a Louisville, KY, restaurant. The cake was shaped like a "slider" hamburger.

22. eminent/immanent/imminent

- eminent: distinguished
immanent: dwelling within tangible objects
imminent: about to happen

The **eminent** doctor believed that death was **imminent**. The **eminent** minister believed that God was **immanent**.

23. fewer/less

- fewer: (use for objects that can be counted individually)
less: (use for objects that can be measured but not counted individually)

There is **less** sand in this bucket; there are probably **fewer** grains of sand, too.

24. forward/foreword

- forward: ahead
foreword: preface, introduction

The author looked **forward** to writing the **foreword** to the book.

25. good/well

- good: (adjective, used to modify nouns; as a noun, means something that is good)
well: (adverb, used to modify verbs, adjectives, and other adverbs)

Her words "**Good** work!" told him that he was doing **well**.

He spent a great deal of time doing volunteer work because he believed that doing **good** was just as important as doing **well**.

26. i.e./e.g.

- i.e.: (*id est*—that is) introduces a restatement or explanation of the preceding word or phrase
e.g.: (*exempli gratia*—for the sake of an example; for example) introduces one or more examples

Although he had never studied Latin, he rarely made a mistake in using Latin abbreviations, **e.g.**, *i.e.*, *etc.*, because he associated each with a mnemonic device (*i.e.*, a word or image used to help one remember something). He remembered *i.e.* as *in effect*, pretended that **e.g.** meant *example given*, and used *etc.* only when *examples to continue* would fit.

27. imply/infer

- imply: suggest, put an idea into someone's head
infer: deduce, get an idea out from something

She **implied** that an announcement would be made soon. I **inferred** from her smile that it would be an announcement of her promotion.

28. it's/its

- it's: it is, it has
its: belonging to it

It's clear that a company must satisfy **its** customers to stay in business.

29. lectern/podium

- lectern: raised stand with a slanted top that holds a manuscript for a reader or notes for a speaker
podium: platform for a speaker or conductor to stand on

I left my notes on the **lectern** when I left the **podium** at the end of my talk.

30. lie/lay

- lie: to recline; to tell a falsehood (never takes an object)
lay: to put an object on something (always takes an object)

He was **laying** the papers on the desk when I came in, but they aren't lying there now.

31. loose/lose

loose: not tight
 lose: to have something disappear

If I **lose** weight, this suit will be **loose**.

32. moral/morale

moral: (adjective) virtuous, good; (noun: morals) ethics, sense of right and wrong
 morale: (noun) spirit, attitude, mental outlook

Studies have shown that coed dormitories improve student **morale** without harming student **morals**.

33. objective/rationale

objective: goal
 rationale: reason, justification

The **objective** of the meeting was to explain the **rationale** behind the decision.

34. personal/personnel

personal: individual, to be used by one person
 personnel: staff, employees

All **personnel** will get new **personal** computers by the end of the year.

35. possible/possibly

possible: (adjective) something that can be done
 possibly: (adverb) perhaps

It is **possible** that we will be able to hire this spring. We can choose from **possibly** the best graduating class in the past five years.

36. precede/proceed

precede: (verb) to go before
 proceed: (verb) to continue; (noun: proceeds) money

Raising the money must **precede** spending it. Only after we obtain the funds can we **proceed** to spend the **proceeds**.

37. principal/principle

principal: (adjective) main; (noun) person in charge; money lent out at interest
 principle: (noun) basic truth or rule, code of conduct

The Prince, Machiavelli's **principal** work, describes his **principles** for ruling a state.

38. quiet/quite

quiet: not noisy
 quite: very

It was **quite** difficult to find a **quiet** spot anywhere near the floor of the stock exchange.

39. regulate/relegate

regulate: control
 relegate: put (usually in an inferior position)

If the federal government **regulates** the size of lettering on county road signs, we may as well **relegate** the current signs to the garbage bin.

40. residence/residents

residence: home
 residents: people who live in a building

The **residents** had different reactions when they learned that a shopping mall would be built next to their **residence**.

Consider how words can be presented in headlines, on signage, and anywhere else. Company and domain names may run together, for instance, creating unexpected results. Some rumors about problems are true. Snopes.com, which investigates the authenticity of urban legends, verifies that Italy's Powergen indeed found itself with powergenitalia.com when it created a website, and Experts Exchange, a site for computer programmers, initially could be found at expertsexchange.com.

Source: Downloaded on January 27, 2008, at www.snopes.com/business/names/domains.asp.

If you misspell a popular web address, what are your chances of landing on a site owned by a “typo-squatter”? One in 14. According to research by McAfee, the security software company, typo-squatters capitalize on poor typists, taking them to similar-sounding websites that feature clickable ads. Companies can earn nearly a quarter with each click. Harvard University’s Tyler Moore and Benjamin Edelman estimate that if 60% of such sites have advertising supplied by Google, the company could earn \$497 million a year.

Source: Dan Kaplan, “McAfee: Typo-Squatters Cashing In on Website Misspellings,” November 20, 2007, downloaded at <http://www.securecomputing.net.au/news/65384,mcafee-typosquatters-cashing-in-on-website-misspellings.aspx>; and Jim Giles, “Typos May Earn Google \$500m a Year,” *New Scientist*, February 2010, <http://www.newscientist.com/article/dn18542-typos-may-earn-google-500m-a-year.html>.

What do Mark Twain, Charles Darwin, Theodore Roosevelt, and Ed Rondthaler have in common? Each has wanted to reform the spelling of words in English, using a more phonetic basis. Says Rondthaler, a 102-year-old who has championed the case for decades: “We have 42 different sounds in English, and we spell them 400 different ways.”

Source: Rebecca Dana, “National Spelling Bee Brings Out Protesters Who R Thru with Through,” *The Wall Street Journal*, May 30, 2008, A1.

41. respectfully/respectively
respectfully: with respect
respectively: to each in the order listed

When I was introduced to the queen, the prime minister, and the court jester, I bowed respectfully, shook hands politely, and winked, respectively.

42. role/roll

- | | |
|-------|--|
| role: | part in a play or script, function (in a group) |
| roll: | (noun) list of students, voters, or other members; round piece of bread; |
| | (verb) move by turning over and over |

While the teacher called the roll, George—in his role as class clown—threw a roll he had saved from lunch.

43. simple/simplistic

- | | |
|-------------|------------------------------|
| simple: | not complicated |
| simplistic: | watered down, oversimplified |

She was able to explain the proposal in simple terms without making the explanation sound simplistic.

44. stationary/stationery

- | | |
|-------------|-------------------|
| stationary: | not moving, fixed |
| stationery: | paper |

During the earthquake, even the stationery was not stationary.

45. their/there/they’re

- | | |
|----------|-------------------|
| their: | belonging to them |
| there: | in that place |
| they’re: | they are |

There are plans, designed to their specifications, for the house they’re building.

46. to/too/two

- | | |
|------|---|
| to: | (preposition) function word indicating proximity, purpose, time, etc. |
| too: | (adverb) also, very, excessively |
| two: | (adjective) the number 2 |

The formula is too secret to entrust to two people.

47. unique/unusual

- | | |
|----------|-------------------|
| unique: | sole, only, alone |
| unusual: | not common |

I believed that I was unique in my ability to memorize long strings of numbers until I consulted *Guinness World Records* and found that I was merely unusual: Someone else had equaled my feat in 1997.

48. verbal/oral

- | | |
|---------|---------------------|
| verbal: | using words |
| oral: | spoken, not written |

His verbal skills were uneven: His oral communication was excellent, but he didn’t write well. His sensitivity to nonverbal cues was acute: He could tell what kind of day I had just by looking at my face.

Hint: Oral comes from the Latin word for mouth, *os*. Think of Oral-B Toothbrushes: For the mouth.

Verbal comes from the Latin word for word, *verba*. Nonverbal language is language that does not use words (e.g., body language).

49. whether/weather

whether: (conjunction) used to introduce possible alternatives

weather: (noun) atmosphere: wet or dry, hot or cold, calm or storm

We will have to see what the **weather** is before we decide **whether** to hold the picnic indoors or out.

50. your/you're

your: belonging to you

you're: you are

You're the top candidate for promotion in **your** division.

Summary of Learning Objectives

- **Denotation** is a word's literal or dictionary meaning. (**LO 15-1**)
- **Bypassing** occurs when two people use the same word to mean, or denote, different things. (**LO 15-1**)
- **Connotation** means the emotional colorings or associations that accompany a word. (**LO 15-1**)
- Generally, short words are better. But use a long word when (**LO 15-1**)
 1. It is the only word that expresses your meaning exactly.
 2. It is more familiar than a short word.
 3. Its connotations are more appropriate.
 4. The discourse community prefers it.
- In its most basic sense, **critical thinking** means using precise words and asking questions about what you read and hear. (**LO 15-2**)
- In a more advanced sense, critical thinking means the ability to identify problems, gather and evaluate evidence, identify and evaluate alternate solutions, and recommend or act on the best choice. (**LO 15-2**)
- Some dictionaries are *descriptive*, meaning their definitions describe the way people actually use words. *Prescriptive* dictionaries define words the way a panel of experts say they should be used. (**LO 15-3**)
- We also learn meanings through context and formal and informal study. Some meanings are voted upon by groups, such as professional or regulatory organizations. (**LO 15-3**)
- **Jargon** is acceptable if it is essential, such as necessary technical terms. Avoid **business jargon**, or **businessese**, which includes trite phrases like *as per your request* and *please do not hesitate*. (**LO 15-4**)
- Words that sound similar to each other but have different meanings often confuse people. These words include *accept/except*, *affect/effect*, *discreet/discrete*, *forward/foreword*, *it's/its*, *loose/lose*, *personal/personnel*, *principal/principle*, *quiet/quite*, *respectfully/respectively*, *their/there/they're*, and *to/too/two*. (**LO 15-5**)
- Other words that seem similar and are frequently confused include *between/among*, *fewer/less*, *good/well*, and *verbal/oral*. (**LO 15-5**)

Assignments for Module 15

Questions for Comprehension

- 15.1** What is the difference between *denotation* and *connotation*? (**LO 15-1**)
15.2 What is *bypassing*? (**LO 15-1**)

- 15.3** Why are short, simple words generally best? (**LO 15-1**)
15.4 What are the two kinds of jargon? Which is OK to use at times? (**LO 15-4**)

Questions for Critical Thinking

- 15.5** If you were going to buy a new dictionary, would you want a descriptive or a prescriptive one? Why? (**LO 15-3**)
15.6 Why is it desirable to use technical jargon in a job letter and a job interview? (**LO 15-4**)

- 15.7** How can you avoid confusing words that sound or seem similar? (**LO 15-5**)

Exercises and Problems

15.8 Identifying Words with Multiple Denotations (LO 15-1)

- a. Each of the following words has several denotations. How many do you know? How many does a good dictionary list?

browser link sample

- b. List five words that have multiple denotations.

15.9 Explaining Bypassing (LO 15-1)

Show how bypassing is possible in the following examples.

- a. France and Associates: Protection from Professionals

- b. We were not able to account for the outstanding amount of plastic waste generated each year.
- c. I scanned the résumés when I received them.

15.10 Evaluating Connotations (LO 15-1)

- a. Identify the connotations of each of the following metaphors for a multicultural nation.

melting pot
mosaic

tapestry
garden salad
stew

- b. Which connotations seem most positive? Why?

15.11 Evaluating the Ethical Implications of Connotations (LO 15-1)

In each of the following pairs, identify the more favorable term. Is its use justified? Why or why not?

1. wastepaper recovered fiber
2. feedback criticism

3. scalper ticket reseller
4. budget spending plan
5. caviar fish eggs

15.12 Correcting Errors in Denotation and Connotation (LO 15-1)

Identify and correct the errors in the following sentences.

1. Louie speaks pretty good English for a guy from the south side.
2. I literally exploded with joy when I found out I got the job.
3. Thank goodness Carl, the senior vice president, is older than dirt and has the memory of an elephant.

4. For a woman, JoAnn is remarkably stable—she might just have what it takes for management.
5. Marti estimated the air fare would be \$324.34 for a roundtrip flight to Spokane. She said we could rent a car and drive instead for about \$231.41.

15.13 Using Connotations to Shape Response (LO 15-1)

Write two sentences to describe each of the following situations, one with positive words, the other with negative words.

1. Lee talks to co-workers about subjects other than work, such as last weekend's ball game.

2. Lee spends a lot of time sending e-mail messages and monitoring e-mail newsgroups.
3. As a supervisor, Lee rarely gives specific instructions to subordinates.

15.14 Choosing Levels of Formality (LO 15-1, LO 15-3)

Identify the more formal word in each pair. Which term is better for most business documents? Why?

1. adapted to geared to
2. befuddled confused

3. assistant helper
4. pilot project testing the waters
5. cogitate think

15.15 Identifying Jargon (LO 15-4)

How many of these business jargon terms do you know?

1. Sticky website
2. Alpha geek

3. Road warrior
4. E-tailer
5. Bottom-fish

15.16 Eliminating Jargon and Simplifying Language (LO 15-5)

Revise these sentences to eliminate jargon and to use short, familiar words. You may need to rewrite or add information.

1. With regard to the aforementioned letter of July the 15th, we expect to expedite your order to ship not later than July 21.
2. Jordyn fully appreciates your understanding with regards to the penultimate and ultimate recommendations for your consideration.

3. Your affirmation via signature will conclude all manner of business regarding this transaction.
4. Per your request, please find enclosed the listing of the required nomenclature for the project headings.
5. Proffering the appropriate renumeration for services rendered assists in securing the most adroit and capable person for our employ.

15.17 Choosing the Right Word (LO 15-1 to LO 15-5)

Choose the right word for each sentence.

1. We were waiting for (their/there) fax to come through.
2. A good manager is always aware of the (moral/morale) of his or her employees.
3. (Are/Our) best practices are described on the company web page.

4. Many of the Boca Raton (residence/residents), Lani told us, want to move in by the fifth day of the month their lease begins.
5. It was (quiet/quite) surprising to see Tyree's name missing from the list of Haller-Jacobs Award nominees.

6. We have to be careful not to (loose/lose) the Philmore Company contract because our first-quarter performance will be based on it.
7. When Andre asked me to write the (forward/foreword) to the book, I was honored—he's been my mentor since the day I started working here.

15.18 Choosing the Right Word (LO 15-1 to LO 15-5)

Choose the right word for each sentence.

1. (Their/There/They're) thinking that it's a good idea to hire a consultant to help us plan the festival.
2. While writing his report, Ahmed (implied/inferred) from the data that the next big trend will focus on 3D technology.
3. I asked Jennifer where the slides were, and she said she found them (laying/lying) on the conference table.
4. Tom pointed out we could expect (fewer/less) turbulence in the marketplace this year, as the economy seems to be stabilizing.
5. Though the (amount/number) of typos was small, they were enough to make his résumé seem poor compared to the competition.

15.19 Choosing the Right Word (LO 15-1 to LO 15-4)

Choose the right word for each sentence.

1. The letter said (are/our) books showed we (are/our) in good financial health.
2. Arthur is one of the (principals/principles) at the firm, and as such, he has a duty to oversee operations.
3. (Whether/Weather) we expect to need it or not, it's a good idea to have liability insurance.
4. A (unique/unusual) characteristic of our chroming process is the one-of-a-kind, durable finish.
5. Three attorneys (compose/comprise) the legal team that is reviewing the contracts presented to us by Hynek and Associates.
6. Though it was (implied/inferred) in the proposal that the project could be completed with a minimum of expense,

8. According to Bridget, the decline in sales can be (attributed/contributed) to an overall dip in the economy.
9. Chelsea Lomax stepped right up to the (lectern/podium) and gave the best speech I've ever heard.
10. (Between/Among) you and me, I think the proposal needs a lot more work before we can submit it.

6. When Eliza.beth (accepted/excepted) the position, she said she would be happy to help train her replacement before leaving.
7. Xian submitted a request for additional (personal/personnel) to help with getting our phone system installed by January 10.
8. If managers get questions from staff regarding downsizing—(i.e.,e.g.,) which employees will be laid off?—they should direct those employees to the HR Department.
9. The obvious (affects/effects) of having high employee morale are lower turnover, decreased accidents, and better productivity.
10. Make sure that you get the agreement in writing; our legal counsel stresses that a(n) (oral/verbal) agreement is too informal.

Phoebe says we would be wise to budget for several thousand dollars more anyway.

7. Christina pointed out (its/it's) likely that we will see orders pick up the closer we get to the December holidays.
8. Of the many (moral/morale) (principals/principles) that guide our decision making, considering our customers' welfare is the most important.
9. Perhaps (to/too/two) much attention was given to the technical details of the project when more could have been paid to the overall (objective/rationale).
10. Slapping his hand on the (lectern/podium) for emphasis, Brin Maxwell said we could (lose/loose) customers if we (precede/proceed) rashly in our expansion into other markets.

Polishing Your Prose

Run-On Sentences

A sentence with too many ideas, strung together by coordinating conjunctions that lack the required commas, is a *run-on*. (Remember that coordinating conjunctions such as *and*, *or*, and *but* need a comma to connect independent clauses.)

Run-ons confound readers because there are too many ideas competing for attention and because the missing commas make the ideas harder to follow. The effect is similar to listening to a speaker who does not pause between sentences—where does one point begin and another end?

Test for run-ons by looking for more than two main ideas in a sentence and a lack of commas with coordinating conjunctions:

We installed the new computers this morning **and** they are running fine **but** there weren't enough computers for everyone **so** we are going to purchase more on Wednesday **and** we will install them **and** then the department will be fully operational.

Count the number of things going on in this sentence. Where are the commas?

Fix a run-on in one of three ways:

1. For short run-ons, add the missing commas:

Incorrect: The purchasing department sent order forms **but** we received too few **so** we are requesting more.

Correct: The purchasing department sent order forms, **but** we received too few, **so** we are requesting more.

2. Rewrite the sentence using subordination:

Correct: Because we received too few order forms, **we** are requesting more from the purchasing department.

3. For longer run-ons, break the run-on into two or more sentences, add missing commas, and subordinate where appropriate.

Correct: We installed the new computers this morning. **They** are running fine, **but** because there weren't enough computers for everyone, **we** are going to purchase more on Wednesday. **When** we install them, the department will be fully operational.

Exercises

Fix the following run-on errors.

1. Jessica went to college in Texas but her sister stayed in Indiana and attended a local private university.
2. Many of our employees would trade vacation days for shorter work hours in general but we're not sure that the central office would approve of the idea.
3. George said he was going to be late for the meeting but Charlene said she would be there on time so let's plan still getting together at 1 p.m.

4. A few of the employees nearing retirement age want us to hold planning seminars but we don't really have the space for it so please ask someone in HR to locate a room at a conference center.
5. Tucker wants to know if he should stay later tonight but I haven't heard from Andy yet and Paulette told me she would call back in a few minutes.
6. Nabil purchased the stock at the expected price and the order went through but we later got a call from the broker about it.
7. The letter traveled to several offices before it got to me and I only just read it so it may take me a while to consider what it says so you might want to come back in an hour.
8. Joe Dunleavy said he would submit the proposal to the Atlanta office but Karlie DelVechhio thinks it makes more sense to run it past Kevin Green in Legal first and Miranda Kang, who just got her law degree from DePaul, agrees.
9. While St. Augustine was my first choice, I really like Tampa and I found a terrific place to live that is close to the beach but it is very affordable and I think I'm really going to like it here!
10. The Bergerons and the Shimedas said they would be attending the awards dinner but Lou Carlisle said his wife has another commitment so he is attending alone and that means we will need to make sure we have the correct number of seats.

Check your answers to the odd-numbered exercises at the back of the book.

Revising Sentences and Paragraphs

LEARNING OBJECTIVES

Module 16 will help you to make sentences and paragraphs even better. After completing the module, you should be able to

- | | |
|---|--|
| LO 16-1 Define good style in business messages. | LO 16-4 Apply strategies for sentence revision. |
| LO 16-2 Demonstrate appropriate tone in business messages. | LO 16-5 Apply strategies for paragraph revision. |
| LO 16-3 Differentiate rules from writing habits and conventions. | LO 16-6 Synthesize style with organizational culture. |

Revising sentences and paragraphs can make the difference between a not-so-great document and a really effective paper or e-mail message.

In your first round of revision (◀◀ p. 60), when you focus on content and clarity, you'll add, expand, modify, and perhaps delete sentences and paragraphs. In the second round of revision, as you focus on organization and layout, you change the order of sentences and paragraphs to make them flow better or to put earliest the reader benefit (◀◀ p. 112) that will appeal to most readers. The third round of revision focuses on sentences and paragraphs, as you improve style and tone. In *editing*, you'll again check sentences, this time for grammatical corrections (◀◀ Module 14).

An arrogant style often backfires. A college student's summer job application circulated to Nomura, Goldman Sachs, Morgan Stanley, PricewaterhouseCoopers, and others. At heart was the hubris of the writer, who boasted about sometimes irrelevant accomplishments even as job seekers scrambled to find work: "I am unequivocally the most unflaggingly hard worker I know, and I love self-improvement. I have always felt that my time should be spent wisely, so I continuously challenge myself . . . I decided to redouble my effort by placing out of two classes, taking two honors classes, and hold two part-time jobs. That semester I achieved a 3.93, and in the same time I managed to bench double my bodyweight and do 35 pull-ups."

(continued)

What is “good” style? LO 16-1

► *It's both businesslike and friendly.*

Good business and administrative writing sounds like a person talking to another person. Unfortunately, much of the writing produced in organizations today seems to have been written by faceless bureaucrats rather than by real people.

The style of writing that has traditionally earned high marks in college essays and term papers is arguably more formal than good business and administrative writing. (See Figure 16.1.) However, many professors also like term papers that are easy to read and use good visual impact.

Most people have several styles of talking, which they vary instinctively depending on the audience. Good writers have several styles, too. A memo to your boss complaining about the delays from a supplier will be informal, perhaps even chatty; a letter to the supplier demanding better service will be more formal.

Keep the following points in mind as you choose a level of formality for a specific document:

- Use a friendly, informal style for someone you've talked with.
- Avoid contractions, slang, and even minor grammatical lapses in paper documents to people you don't know. Abbreviations are OK in e-mail messages if they're part of the group's culture.
- Pay particular attention to your style when you have to write uncomfortable messages: when you write to people you fear or when you must give bad news. Reliance on nouns rather than on verbs and a general deadening of style increase when people are under stress or feel insecure.¹ Confident people are more direct. Edit your writing so that you sound confident, whether you feel that way or not.

Good business style allows for individual variation. Depending on the audience and situation, humor may be acceptable.

Figure 16.1 Different Levels of Style

Feature	Conversational Style	Good Business Style	Traditional Term Paper Style
Formality	Highly informal	Conversational; sounds like a real person talking	More formal than conversation would be, but retains a human voice
Use of contractions	Many contractions	OK to use occasional contractions	Few contractions, if any
Pronouns	Uses <i>I</i> , first- and second-person pronouns	Uses <i>I</i> , first- and second-person pronouns	First- and second-person pronouns kept to a minimum
Level of friendliness	Friendly	Friendly	No effort to make style friendly
How personal	Personal; refers to specific circumstances of conversation	Personal; may refer to reader by name; refers to specific circumstances of readers	Impersonal; may generally refer to readers but does not name them or refer to their circumstances
Word choice	Short, simple words; slang	Short, simple words but avoids slang	Many abstract words; scholarly, technical terms
Sentence and paragraph length	Incomplete sentences; no paragraphs	Short sentences and paragraphs	Sentences and paragraphs usually long
Grammar	Can be ungrammatical	Uses standard edited English	Uses standard edited English
Visual impact	Not applicable	Attention to visual impact of document	No particular attention to visual impact

Using the Right Tone LO 16-2

Business writing should be businesslike and friendly. But what exactly does it mean to be “friendly”? Well, it depends. It depends on whom you’re dealing with, the culture of your workplace, and even the part of the country where you work.

In the past 50 years, social distance in the United States has decreased. In many, perhaps most, workplaces, most people call each other by their first names, whatever their age or rank. But even in cultures that pride themselves on their egalitarianism, differences in status do exist. When you’re a newcomer in an organization, when you’re a younger person speaking to someone older, or when you’re a subordinate speaking to a superior, you’re wise to show your awareness of status in the tone you use.

Tone (◀◀ p. 106) is the implied attitude of the speaker or writer toward what the words say. We’re usually experts on tone of voice, especially the tones of other people’s voices who don’t seem to respect us. But sometimes it’s harder for us to hear the lack of respect in our own voices as we talk or write to others.

If you’re the boss, it’s probably OK to e-mail your subordinates, “Let me know when you’re free next week for a meeting.” But if you’re a subordinate trying to line up people on your own level or higher up, politeness pays: “Would you be able to meet next week? Could you let me know what times you have free?”

The difficulty, of course, is that norms for politeness, like those for friendliness, can differ from organization to organization, from group to group, and even in different parts of the country and of the world (◀◀ p. 107). Furthermore, the same words that seem polite and friendly coming from a superior to a subordinate can seem pushy or arrogant coming from a subordinate to a superior. “Keep up the good work!” is fine coming from your boss. It isn’t, however, something you would say *to* your boss.

As in other communication situations, you have to analyze the situation rhetorically. Who are your audiences (◀◀ p. 20)? What are your purposes? How do other people in the organization talk and write? What kind of response do you get? If a customer winces when you return her credit card and say, “Have

Dr. Johnnetta B. Cole was president of Bennett College for Women and now chairs the college’s Johnnetta B. Cole Global Diversity & Inclusion Institute. Part of her success comes from matching her tone to her audience and the situation. A “force of nature,” as peer Antonia Hernandez describes her, Dr. Cole has a demeanor that is “dignified but down to earth.” She is pictured here with students Lauren Chanel Thomas, Alissa Johnson, and Ashley Shanelle Cobb.

Sources: “Dr. Johnnetta B. Cole, Keynote Speaker for the 2012 WCTF Conference,” downloaded on July 28, 2012, at <http://www.cew.umich.edu/dr-johnnetta-b-cole-keynote-speaker-2012-wctf-conference>; and C. Stone Brown, “‘Sister’ Chair of the Board,” *Diversity Inc.*, February 2006.

a nice day, Mary,” maybe she doesn’t appreciate being called by her first name. Talk to your peers in the organization about communication. What seems to work? What doesn’t? And talk to a superior you trust. How do you come across? If you’re creating the image you want to create, good. But if people think that you’re rude, stuck-up, or arrogant, they may be reacting to your tone. A tone that worked for you in some situations in the past may need to be changed if you’re to be effective in a new workplace or a new organization.

Are there rules I should follow? LO 16-3

- Most “rules” are really guidelines.

Some “rules” are grammatical conventions. For example, standard edited English requires that each sentence has a subject and verb and that they agree. Business writing normally demands standard grammar, but exceptions exist. Promotional materials such as brochures, advertisements, and sales and fund-raising letters may use sentence fragments to gain the effect of speech.

Site to See

Go to

www.larseighner.com/workshop/faq/qa050162.html

Lars Eighner explains how to think of better verbs.

Other "rules" may be conventions adopted by an organization so that its documents will be consistent. For example, a company might decide to capitalize job titles (*Production Manager*), even though grammar doesn't require the capitals, or always to use a comma before *and* in a series, even though a sentence can be grammatical without the comma. A different company might make different choices.

Still other "rules" are attempts to codify "what sounds good." "Never use *I*" and "use big words" are examples of this kind of "rule." These "rules" are half-truths and must be applied selectively, if at all. Think about your audience (◀◀ p. 20), the discourse community (◀◀ p. 28), your purposes, and the situation. If you want the effect produced by an impersonal style and polysyllabic words, use them. But use them only when you want the distancing they produce.

To improve your style,

- Get a clean page or screen, so that you aren't locked into old sentence structures.
- Try WIRMI: *What I Really Mean Is.*² Then write the words.
- Try reading your draft out loud to someone sitting at a comfortable personal distance. If the words sound stiff, they'll seem stiff to a reader, too.
- Ask someone else to read your draft out loud. Readers stumble because the words on the page aren't what they expect to see. The places where that person stumbles are places where your writing can be better.
- Read widely and write a *lot*.
- Use the eight techniques in the next two sections.

What should I look for when I revise sentences? LO 16-4

► Try these six techniques.

At the sentence level, six kinds of revisions will help make your writing easy to read.

1. Use Active Verbs Most of the Time

"Who does what" sentences with active verbs make your writing more forceful.

A verb is **active** if the grammatical subject of the sentence does the action the verb describes. A verb is **passive** if the subject is acted upon. Passives are usually made up of a form of the verb *to be* plus a past participle. *Passive* has nothing to do with *past*. Passives can be past, present, or future:

were received	(in the past)
is recommended	(in the present)
will be implemented	(in the future)

To spot a passive, find the verb. If the verb describes something that the grammatical subject is doing, the verb is active. If the verb describes something that is being done to the grammatical subject, the verb is passive.

Active

- The customer received 500 widgets.
I recommend this method.
The state agencies will implement the program.

Passive

- Five hundred widgets were received by the customer.
This method is recommended by me.
The program will be implemented by the state agencies.

Verbs can be changed from active to passive by making the direct object (in the oval) the new subject (in the box). To change a passive verb to an active one, you must

make the agent ("by _____" in < >) the new subject. If no agent is specified in the sentence, you must supply one to make the sentence active.

Active

The plant manager approved the request.

The committee will decide next month.

[You] send the customer a letter informing her about the change.

Passive

The request was approved by the plant manager.

A decision will be made next month. **No agent in sentence.**

A letter will be sent informing the customer of the change. **No agent in sentence.**

If the sentence does not have a direct object in its active form, no passive equivalent exists.

Active

I would like to go to the conference.

The freight charge will be about \$1,400.

The phone rang.

No Passive Exists

Passive verbs have at least three disadvantages:

1. If all the information in the original sentence is retained, passive verbs make the sentence longer. Passives take more time to understand.³
2. If the agent is omitted, it's not clear who is responsible for doing the action.
3. When many passive verbs are used, or when passives are used in material that has a lot of big words, the writing can be boring and pompous.

Passive verbs are desirable in these situations:

- Use passives to emphasize the object receiving the action, not the agent.

Your order was shipped November 15.

The customer's order, not the shipping clerk, is important.

- Use passives to provide coherence within a paragraph. A sentence is easier to read if "old" information comes at the beginning of a sentence. When you have been discussing a topic, use the word again as your subject even if that requires a passive verb.

The bank made several risky loans in the late 1990s. These loans were written off as "uncollectible" in 2004.

Using *loans* as the subject of the second sentence provides a link between the two sentences, making the paragraph as a whole easier to read.

- Use passives to avoid assigning blame.

The order was damaged during shipment.

An active verb would require the writer to specify *who* damaged the order. The passive here is more tactful.

2. Use Verbs to Carry the Weight of Your Sentence

Put the weight of your sentence in the verb. When the verb is a form of the verb *to be*, revise the sentence to use a more forceful verb.

- Weak:** The financial advantage of owning this equipment instead of leasing it **is** 10% after taxes.
Better: Owning this equipment rather than leasing it **will save** us 10% after taxes.

Revision helps to avoid problems, so review documents carefully. ESPN apologized for using a racial slur in a headline critiquing the performance of basketball sensation Jeremy Lin. While the term has additional meanings, its racial connotation was obvious to readers. Olympian Lolo Jones tweeted from the 2012 Summer Games that Americans should do well in "da gun shooting competition." The comment may have seemed less insensitive had it not followed on the heels of a deadly mass shooting in Colorado that made world headlines barely a week before. Look beyond words, too. An online ad for French clothier La Redoute was taken down after audiences noticed the nude man in the background of a beach scene. Even though many French people are comfortable with nudity on public beaches, they were appalled to see it in an ad selling clothes to children.

Sources: "ESPN Sorry for Offensive Headline on Lin Story," *The Seattle Times*, February 18, 2012, http://seattletimes.nwsource.com/html/sports/2017540845_apbknknickslinheadline.html; Chris Chase, "Lolo Jones Thinks Americans Should Do Well in 'Da Gun Shooting Competition,'" July 28, 2012, <http://sports.yahoo.com/blogs/olympics-fourth-place-medal-lolo-jones-thinks-americans-well-da-gun-shooting-181436042--oly.html>; and Piper Weiss, "The NSFW Kid's Clothing Ad: French Fashion Company's Major Faux Pas," January 6, 2012, <http://shine.yahoo.com/fashion/nsfw-kids-clothing-ad-french-fashion-companys-major-174800986.html>.

Better verbs make sentences more forceful and up to 25% easier to read.

Sources: E. B. Coleman, "The Comprehensibility of Several Grammatical Transformations," *Journal of Applied Psychology* 48, no. 3 (1964): 186–90; and Keith Raynor, "Visual Attention in Reading: Eye Movements Reflect Cognitive Processes," *Memory and Cognition* 5 (1977): 443–48.

Nouns ending in *-ment*, *-ion*, and *-al* often hide verbs.

make an adjustment	adjust
make a payment	pay
make a decision	decide
reach a conclusion	conclude
take into consideration	consider
make a referral	refer
provide assistance	assist

Use verbs to present the information more forcefully.

Weak: We **will** perform an **investigation** of the problem.

Better: We **will** **investigate** the problem.

Weak: **Selection** of a program **should be based** on the client's needs.

Better: **Select** the program that best **fits** the client's needs.

3. Tighten Your Writing

Writing is **wordy** if the same idea can be expressed in fewer words. Unnecessary words increase typing time, bore your reader, and make your meaning more difficult to follow, since the reader must hold all the extra words in mind while trying to understand your meaning.

Good writing is tight. Tight writing may be long because it is packed with ideas. In Modules 6–8, we saw that revisions to create you-attitude and positive emphasis and to develop reader benefits were frequently *longer* than the originals because the revision added information not given in the original.

Sometimes you may be able to look at a draft and see immediately how to tighten it. When wordiness isn't obvious, try the following strategies for tightening your writing.

- Eliminate words that say nothing.
- Use gerunds (the *-ing* form of verbs) and infinitives (the *to* form of verbs) to make sentences shorter and smoother.
- Combine sentences to eliminate unnecessary words.
- Put the meaning of your sentence into the subject and verb to cut the number of words.

The purpose of eliminating unnecessary words is to save the reader's time, not simply to see how few words you can use. You aren't writing a telegram, so keep the little words that make sentences complete. (Incomplete sentences are fine in lists where all the items are incomplete.)

The following examples show how to use these methods.

a. Eliminate Words that Say Nothing

Cut words that are already clear from other words in the sentence. Substitute single words for wordy phrases.

Wordy: Keep this information **on file** for future reference.

Tighter: Keep this information **for reference**.

or: File this information.

Wordy: Ideally, it would be best to put the billing ticket just below the screen and above the keyboard.

Tighter: If possible, put the billing ticket between the screen and the keyboard.

Phrases beginning with *of*, *which*, and *that* can often be shortened.

Wordy: the question **of most importance**

Tighter: the **most important** question

Wordy: the estimate **which is enclosed**

Tighter: the **enclosed** estimate

Sentences beginning with *There are* or *It is* can often be tighter.

Wordy: **There are** three reasons for the success of the project.

Tighter: **Three reasons explain** the project's success.

Instant Replay

Ways to Improve Style

- Get a clean page or screen.
- Try WIRMI: What I Really Mean Is.
- Read your draft out loud to someone sitting at a comfortable personal distance.
- Ask someone else to read your draft out loud. Revise passages where readers stumble.
- Read widely and write a lot.

Instant Replay

Active and Passive Verbs

If the verb describes something that the grammatical subject is doing, the verb is active. If the verb describes something that is being done to the grammatical subject, the verb is passive.

- Wordy:** It is the case that college graduates advance more quickly in the company.
Tighter: College graduates advance more quickly in the company.

Check your draft. If you find unnecessary words, eliminate them.

b. Use Gerunds and Infinitives to Make Sentences Shorter and Smoother

A **gerund** is the -*ing* form of a verb; grammatically, it is a verb used as a noun. In the sentence, “Running is my favorite activity,” *running* is the subject of the sentence. An **infinitive** is the form of the verb which is preceded by *to*: *to run* is the infinitive.

In the revision below, a gerund (*purchasing*) and an infinitive (*to transmit*) tighten the revision.

- Wordy:** A plant *suggestion has been made where they would purchase* a fax machine *for the purpose of transmitting* test reports between plants.
Tighter: The plant suggests *purchasing* a fax machine *to transmit* test reports between plants.

Even when gerunds and infinitives do not greatly affect length, they often make sentences smoother and more conversational.

c. Combine Sentences to Eliminate Unnecessary Words

In addition to saving words, combining sentences focuses the reader’s attention on key points, makes your writing sound more sophisticated, and sharpens the relationship between ideas, thus making your writing more coherent.

Wordy: I conducted this survey by telephone on Sunday, April 21. I questioned two groups of juniors and seniors—male and female—who, according to the Student Directory, were still living in the dorms. The purpose of this survey was to find out why some juniors and seniors continue to live in the dorms even though they are no longer required by the university to do so. I also wanted to find out if there were any differences between male and female juniors and seniors in their reasons for choosing to remain in the dorms.

Tighter: On Sunday, April 21, I phoned male and female juniors and seniors living in the dorms to find out (1) why they continue to live in the dorms even though they are no longer required to do so, and (2) whether men and women had the same reasons for staying in the dorms.

d. Put the Meaning of Your Sentence into the Subject and Verb to Cut the Number of Words

Put the core of your meaning into the subject and verb of your main clause. Think about what you *mean* and try saying the same thing in several different ways. Some alternatives will be tighter than others. Choose the tightest one.

Wordy: The *reason* we are recommending the computerization of this process *is because it will reduce* the time required to obtain data and will *give us* more accurate data.

Better: We are *recommending* the computerization of this process because it will *save time* and *give* us more accurate data.

Tight: Computerizing the process *will give* us more accurate data more quickly.

Wordy: The *purpose* of this letter *is* to indicate that *if we are unable* to mutually benefit from our seller/buyer relationship, with satisfactory material and satisfactory payment, then *we have no alternative other than* to sever the relationship. In other words, *unless the account is handled* in 45 days, *we will have to change* our terms to a permanent COD basis.

Better: A good buyer/seller *relationship depends* upon satisfactory material and satisfactory payment. You can continue to charge your purchases from us only if *you clear* your present balance in 45 days.

4. Vary Sentence Length and Sentence Structure

Readable prose mixes sentence lengths and varies sentence structure. Most sentences should be 20 words or fewer. A really short sentence (under 10 words) can add punch to your prose. Really long sentences (over 30 or 40 words) are danger signs.

You can vary sentence patterns in several ways. First, you can mix simple, compound, and complex sentences. **Simple sentences** have one main clause:

We will open a new store this month.

LinkedIn’s Nicole Williams notes that buzzwords like “creative” and “dynamic” are among the most-used buzzwords on the social networking site, making it harder for potential employers to see what makes a person stand out from the crowd. “It’s okay to use some common language,” Williams says, “but if everyone is ‘creative,’ the word becomes null and void.” She recommends showing creativity rather than simply using the word. Other common buzzwords on the site include “track record” and “extensive experience.”

Source: Diane Stafford, “Buzzwords Won’t Motivate Hires,” *The Columbus Dispatch*, December 25, 2011, <http://www.dispatch.com/content/stories/business/2011/12/25/buzzwords-wont-motivate-hires.html>.

Wordiness

Writing is **wordy** if the same idea can be expressed in fewer words.

Site to See

Go to

www.bartleby.com/141/index.html

for the online version of Strunk and White’s classic *Elements of Style*.

Compound sentences have two main clauses joined with *and*, *but*, *or*, or another conjunction. Compound sentences work best when the ideas in the two clauses are closely related.

We have hired staff, and they will complete their training next week.

We wanted to have a local radio station broadcast from the store during its grand opening, but the DJs were already booked.

Complex sentences have one main and one subordinate clause; they are good for showing logical relationships.

When the stores open, we will have balloons and specials in every department.

Because we already have a strong customer base in the northwest, we expect the new store to be just as successful as the store in the City Center Mall.

You can also vary sentences by changing the order of elements. Normally, the subject comes first.

We will survey customers later in the year to see whether demand warrants a third store on campus.

To create variety, occasionally begin the sentence with some other part of the sentence.

Later in the year, we will survey customers to see whether demand warrants a third store on campus.

To see whether demand warrants a third store on campus, we will survey customers later in the year.

Use these guidelines for sentence length and structure:

- Always edit sentences for tightness. Even a 10-word sentence can be wordy.
- When your subject matter is complicated or full of numbers, make a special effort to keep sentences short.
- Use long sentences

To show how ideas are linked to each other.

To avoid a series of short, choppy sentences.

To reduce repetition.

- Group the words in long and medium-length sentences into chunks that the reader can process quickly.⁴
- When you use a long sentence, keep the subject and verb close together.

Let's see how to apply the last three principles.

Use Long Sentences to Show How Ideas Are Linked to Each Other, to Avoid a Series of Short, Choppy Sentences, and to Reduce Repetition

The following sentence is hard to read not simply because it is long but also because it is shapeless. Just cutting it into a series of short, choppy sentences doesn't help. The best revision uses medium-length sentences to show the relationship between ideas.

Too long: It should also be noted in the historical patterns presented in the summary that though there were delays in January and February which we realized were occurring, we are now back where we were about a year ago, and that we are not off line in our collect receivables as compared to last year at this time, but we do show a considerable over-budget figure because of an ultraconservative goal on the receivable investment.

Choppy: There were delays in January and February. We knew about them at the time. We are now back where we were about a year ago. The summary shows this. Our present collect receivables are in line with last year's. However, they exceed the budget. The reason they exceed the budget is that our goal for receivable investment was very conservative.

Better: As the summary shows, although there were delays in January and February (of which we were aware), we have now regained our position of a year ago. Our present collect receivables are in line with last year's, but they exceed the budget because our goal for receivable investment was very conservative.

Energy and enthusiasm are good. Add standard grammar and accuracy to create good sentences.

By permission of Rick Detorie and Creators Syndicate, Inc.

Group the Words in Long and Medium-Length Sentences into Chunks

The “better” revision above has seven chunks. In the following list, the chunks starting immediately after the numbers are main clauses. The chunks that are indented are subordinate clauses and parenthetical phrases.

1. As the summary shows,
2. although there were delays in January and February
3. (of which we were aware),
4. we have now regained our position of a year ago.
5. Our present collect receivables are in line with last year’s,
6. but they exceed the budget
7. because our goal for receivable investment was very conservative.

The first sentence has four chunks: an introductory phrase (1), a subordinate clause (2) with a parenthetical phrase (3), followed by the main clause of the first sentence (4). The second sentence begins with a main clause (5). The sentence’s second main clause (6) is introduced with *but*, showing that it will reverse the first clause. A subordinate clause explaining the reason for the reversal completes the sentence (7). At 27 and 24 words, respectively, these sentences aren’t short, but they’re readable because no chunk is longer than 10 words.

Any sentence pattern will get boring if it is repeated sentence after sentence. Use different sentence patterns—different kinds and lengths of chunks—to keep your prose interesting.

Keep the Subject and Verb Close Together

Often, you can move the subject and verb closer together if you put the modifying material in a list at the end of the sentence. For maximum readability, present the list vertically.

Hard to read: Movements resulting from termination, layoffs and leaves, recalls and reinstates, transfers in, transfers out, promotions in, promotions out, and promotions within are presently documented through the Payroll Authorization Form.

Smoother: The following movements are documented on the Payroll Authorization Form: termination, layoffs and leaves, recalls and reinstates, transfers in and out, and promotions in, out, and within.

Still better: The following movements are documented on the Payroll Authorization Form:

- Termination.
- Layoffs and leaves.
- Recalls and reinstates.
- Transfers in and out.
- Promotions in, out, and within.

Instant Replay
Sentence Length and Sentence Structure
Readable prose mixes sentence lengths and varies sentence structure. Most sentences should be 20 words or fewer.

Sometimes you will need to change the verb and revise the word order to put the modifying material at the end of the sentence.

- Hard to read:** The size sequence **code** that is currently used for sorting the items in the NOSROP lists and the composite stock list **is** not part of the online file.
- Smoothen:** The online **file does not contain** the size sequence code that is currently used for sorting the items in the composite stock lists and the NOSROP lists.

5. Use Parallel Structure

Words or ideas that share the same logical role in your sentence must also be in the same grammatical form. Parallelism is also a powerful device for making your writing smoother and more forceful. (See Figure 16.2.) Note the parallel portions in the following examples.

- Faulty:** I interviewed **juniors and seniors and athletes**.
- Parallel:** I interviewed **juniors and seniors**. In each rank, I interviewed **athletes and nonathletes**.
- Faulty:** Errors can be checked **by reviewing** the daily exception report or **note** the number of errors you uncover when you match the lading copy with the file copy of the invoice.
- Parallel:** Errors can be checked **by reviewing** the daily exception report or **by noting** the number of errors you uncover when you match the lading copy with the file copy of the invoice.
- Also Parallel:** To check errors, **note**
1. **The number** of items on the daily exception report.
 2. **The number** of errors discovered when the lading copy and the file copy are matched.

Note that a list in parallel structure must fit grammatically into the umbrella sentence that introduces the list.

Eliminate repeated words in parallel lists. (See Figure 16.3.)

Figure 16.2 Use Parallelism to Tighten Your Writing

Faulty

Parallel

Figure 16.3 Eliminate Repeated Words in Parallel Lists

Wordy

Tight

6. Put Your Readers in Your Sentences

Use second-person pronouns (*you*) rather than third-person (*he, she, one*) to give your writing more impact. *You* is both singular and plural; it can refer to a single person or to every member of your organization.

Third-person: Funds in a participating *employee's* account at the end of each six months will automatically be used to buy more stock unless a “Notice of Election Not to Exercise Purchase Rights” form is received from the *employee*.

Second-person: Once *you* begin to participate, funds in *your* account at the end of each six months will automatically be used to buy more stock unless *you* turn in a “Notice of Election Not to Exercise Purchase Rights” form.

Be careful to use *you* only when it refers to your reader.

Incorrect: My visit with the outside sales rep showed me that *your schedule* can change quickly.

Correct: My visit with the outside sales rep showed me that *schedules* can change quickly.

What should I look for when I revise paragraphs? LO 16-5

► *Check for topic sentences and transitions.*

Paragraphs are visual and logical units. Use them to chunk your sentences.

1. Begin Most Paragraphs with Topic Sentences

A good paragraph has **unity**; that is, it discusses only one idea, or topic. The **topic sentence** states the main idea and provides a scaffold to structure your document. Topic sentences are not essential, but your writing will be easier to read if you make the topic sentence explicit and put it at the beginning of the paragraph.⁵

Hard to read (no topic sentence): In fiscal 2003, the company filed claims for a refund of federal income taxes of \$3,199,000 and interest of \$969,000 paid as a result of an examination of the company’s federal income tax returns by the Internal Revenue Service (IRS) for the years 1999 through 2002. It is uncertain what amount, if any, may ultimately be recovered.

Better (paragraph starts with topic sentence): **The company and the IRS disagree about whether the company is liable for back taxes.** In fiscal 2003, the company filed claims for a refund of federal income taxes of \$3,199,000 and interest of \$969,000 paid as a result of an examination of the company’s federal income tax returns by the Internal Revenue Service (IRS) for the years 1999 through 2002. It is uncertain what amount, if any, may ultimately be recovered.

A good topic sentence forecasts the structure and content of the paragraph.

Plan B also has economic advantages.

(Prepares the reader for a discussion of B’s economic advantages.)

We had several personnel changes in June.

(Prepares the reader for a list of the month’s terminations and hires.)

Employees have complained about one part of our new policy on parental leaves.

(Prepares the reader for a discussion of the problem.)

When the first sentence of a paragraph is not the topic sentence, readers who skim may miss the main point. Move the topic sentence to the beginning of the paragraph. If the paragraph does not have a topic sentence, you will need to write one. If you can’t think of a single sentence that serves as an “umbrella” to cover every sentence, the paragraph lacks unity. To solve the problem, either split the paragraph into two, or eliminate the sentence that digresses from the main point.

The best topic sentences have a you-attitude. They reflect the reader’s interests and feelings.

If you are selling an idea to management, this means your topic sentences will emphasize the business benefits of your idea. Managers will want to know whether your idea will add to sales or cut costs. The details following your topic sentence should tell how your idea will provide these benefits. If possible, test your idea ahead of time, so you can back up your statement with facts, not just opinions.

If you are selling an idea to employees, each topic sentence should focus on benefits to them. For example, if you are writing about a new computer system, the order clerk will want to know how it will make the work easier or improve his or her performance. The clerk is less interested in financial statistics like inventory turnover and gross profits.

The same principles apply to answering objections. If an employee objects to a change by saying, “I’ve never done that before,” a wise supervisor might reply, “Exactly. It’s an opportunity to gain experience.”

Source: Based on Ted Pollock, “How to Sell an Idea,” *Supervision*, June 2003, downloaded from Infotrac at <http://web2.infotrac.galegroup.com>.

Organizations can choose what is acceptable as content, too. Facebook, for instance, deleted venerable *Chicago Tribune* film critic Roger Ebert’s page. A controversial tweet by Ebert ruminating about

2. Use Transitions to Link Ideas

Transition words and sentences signal the connections between ideas to the reader. Transitions tell whether the next sentence continues the previous thought or starts a new idea; they can tell whether the idea that comes next is more or less important than the previous thought. Figure 16.4 lists some of the most common transition words and phrases.

How does organizational culture affect style? LO 16-6

► *Different cultures may prefer different styles.*

Different organizations and bosses may legitimately have different ideas about what constitutes good writing. If the style the company prefers seems reasonable, use it. If the style doesn't seem reasonable—if you work for someone who likes flowery language or wordy paragraphs, for example—you have several choices.

- **Use the techniques in this module.** Sometimes seeing good writing changes people's minds about the style they prefer.
- **Help your boss learn about writing.** Show him or her this book or the research cited in the notes to demonstrate how a clear, crisp style makes documents easier to read.
- **Recognize that a style may serve other purposes than communication.** An abstract, hard-to-read style may help a group forge its own identity. James Suchan and Ronald Dulek have shown that Navy officers preferred a passive, impersonal style because they saw themselves as followers. An aircraft company's engineers saw wordiness as the verbal equivalent of backup systems. A backup is redundant but essential to safety, because parts and systems do fail.⁶ When big words, jargon, and wordiness are central to a group's self-image, change will be difficult, since changing style will mean changing the corporate culture.
- **Ask.** Often the documents that end up in files aren't especially good. Later, other workers may find these documents and imitate them, thinking they represent a corporate standard. Bosses may in fact prefer better writing.

Building a good style takes energy and effort, but it's well worth the work. Good style can make every document more effective; good style can help make you the good writer so valuable to every organization.

Site to See

Go to

[www.gray-area.org/
Research/Ambig/](http://www.gray-area.org/Research/Ambig/)

for a collection of ambiguous and often funny sentences from ads, church bulletins, and insurance forms. (Scroll down past the long first page.)

Summary of Learning Objectives

- Good style in business and administrative writing is less formal, more friendly, and more personal than the style usually used for term papers. (**LO 16-1**)
- A good tone is businesslike, friendly, and polite. (**LO 16-2**)
- To create a good tone, analyze communication situations rhetorically: (**LO 16-2**)
 - Who are your audiences?
 - What are your purposes?
 - How do other people in the organization talk and write?
 - What kind of response did you get?
- To improve your style, (**LO 16-3**)
 - Get a clean page or screen, so that you aren't locked into old sentence structures.
 - Try WIRMI: *What I Really Mean Is*. Then write the words.
 - Try reading your draft out loud to someone sitting at a comfortable personal distance. If the words sound stiff, they'll seem stiff to a reader, too.
 - Ask someone else to read your draft out loud. Readers stumble because the words on the page aren't what they expect to see. The places where that person stumbles are places where your writing can be better.
 - Write a lot.
- As you write and revise sentences, (**LO 16-4**)
 1. Use active verbs most of the time. Active verbs are better because they are shorter, clearer, and more interesting.
 2. Use verbs to carry the weight of your sentence.
 3. Tighten your writing. Writing is **wordy** if the same idea can be expressed in fewer words.
 - a. Eliminate words that say nothing.
 - b. Use gerunds and infinitives to make sentences shorter and smoother.
 - c. Combine sentences to eliminate unnecessary words.
 - d. Put the meaning of your sentence into the subject and verb to cut the number of words.
 4. Vary sentence length and sentence structure.
 5. Use parallel structure. Use the same grammatical form for ideas that have the same logical function.
 6. Put your readers in your sentences.
- As you write and revise paragraphs, (**LO 16-5**)
 1. Begin most paragraphs with topic sentences so that readers know what to expect in the paragraph.
 2. Use transitions to link ideas.
- Different organizations and bosses may legitimately have different ideas about what constitutes good writing. (**LO 16-6**)

Assignments for Module 16

Questions for Comprehension

- 16.1** What problems do passive verbs create? When are passive verbs desirable? (**LO 16-4**)
- 16.2** List two ways to tighten your writing. (**LO 16-4**)

Questions for Critical Thinking

- 16.5** Would your other instructors like the style you're learning to use in this class? (**LO 16-1**)
- 16.6** Can a long document be tight rather than wordy? (**LO 16-1 to LO 16-3**)

Exercises and Problems

16.8 Changing Verbs from Passive to Active (**LO 16-4**)

Identify the passive verbs in the following sentences and convert them to active verbs. In some cases, you may need to add information to do so. You may use different words as long as you retain the basic meaning of the sentence. Remember that imperative verbs are active, too.

1. The car was driven by Lloyd to the airport.
2. A phone call was made by Penelope to the home office.

16.9 Using Better Verbs (**LO 16-4**)

Revise each of the following sentences to use better verbs.

1. Many of our customers receive the benefits of being a preferred member.
2. Employees who have more than nine months with the company will start to accrue vacation time.

- 16.3** What is parallel structure? (**LO 16-4**)
- 16.4** How do topic sentences help readers? (**LO 16-5**)

- 16.7** Ask a trusted friend or colleague how your tone comes across in classes and at work. If other people find you shy on the one hand or arrogant on the other, what changes in your tone could you make? (**LO 16-2**)

3. Whenever possible, vacations should be taken by employees during summer months.
4. When Deidre calls, she should be told to bring copies of the annual report with her to the meeting.
5. A complete list of all of the attendees was compiled by the Public Relations Office.
3. If Nabil stops by, do be sure to inquire if he plans to participate in the “Race for the Cure” on Saturday.
4. There are a variety of important decisions to be considered carefully before making a purchase.
5. It is extremely doubtful that the sales figures will see an improvement before the end of the quarter.

16.10 Reducing Wordiness (LO 16-4)

1. Eliminate words that say nothing. You may use different words.
 - a. Employees who were just hired and are therefore defined as novice employees by the company should take steps to ensure that they attend a mandatory training session that is required of all novice employees.
 - b. *Bloomberg Businessweek* magazine printed in its pages a very, very good magazine article on how company executives who work at businesses are currently finding innovative and creative solutions to problems that they encounter with regularity on the job and in the workplace these days.
 - c. Employees who come to work on time and ready to work are generally viewed as more professional than employees who don't come to work on time and are not ready to work. Employees who don't come to work on time and are not ready to work are often seen as unprofessional, which means that they are less professional than other employees. Professional employees are more likely to be hired, valued, and promoted than unprofessional employees. Therefore, it's better to be a professional employee rather than an unprofessional employee.
2. Use gerunds and infinitives to make these sentences shorter and smoother.
 - a. Customers who want participation in this month's online promotion may find a review of our preregistration process helpful.

16.11 Improving Parallel Structure (LO 16-4)

Revise each of the following sentences to create parallelism.

1. The county will benefit from implementing flextime.
 - Offices will stay open longer for more business.
 - Staff turnover will be lower.
 - Easier business communication with states in other time zones.
 - Increased employee productivity.
2. Newsletters enhance credibility, four times as many people read them as read standard ad formats, and allow soft-sell introduction to prospective customers.

16.12 Putting Readers in Your Sentences (LO 16-4)

Revise each of the following sentences to put readers in them. As you revise, use active verbs and simple words.

1. Proofreading a résumé carefully is vital to ensure that typos are corrected.
2. Working beyond the expected 40 hours per week is allowable, and overtime compensation will be received.

16.13 Editing Sentences to Improve Style (LO 16-4)

Revise these sentences to make them smoother, less wordy, and easier to read. Eliminate jargon and repetition. Keep the information; you may reword or reorganize it. If the original is not clear, you may need to add information to write a clear revision.

- b. The production of better but cheaper goods often makes a company more competitive in the sales of merchandise in the marketplace.
- c. Whitney said the receipt of company-paid medical insurance is a benefit that many parents today are in consideration of while engaged in the decision process of the acceptance of a job offer.
3. Combine sentences to show how ideas are related and to eliminate unnecessary words.
 - a. Michael supervises the archives department. Michael also supervises the data processing department. As supervisor of both departments, Michael has responsibility for the company's archiving and data processing services and oversees 14 employees.
 - b. Our employees want our customers to have a positive experience shopping in our store. Our employees are trained to provide good customer service. Our customers expect to have a positive experience shopping in our store. Because both our employees and our customers want the same thing, we have the highest customer satisfaction rating of any store in the company.
 - c. The communications department plans to stop printing the company newsletter and instead offer it on the intranet. The format for the newsletter will be the same, but instead of it being printed on paper, it will be available in electronic form. Employees may print a copy of the newsletter or simply read it online. By ceasing to print the newsletter on paper and instead offer it on the intranet, the communications department expects to save several thousand dollars each year.
3. When you leave a voice-mail message,
 - Summarize your main point in a sentence or two.
 - The name and phone number should be given slowly and distinctly.
 - The speaker should give enough information so the recipient can act on the message.
 - Tell when you'll be available to receive the recipient's return call.
3. Annual self-reviews are to be completed by December 12, and meetings with managers are to be scheduled by December 30.
4. Employee friends and family members may use the company gym provided employees preregister them.
5. Staff may attend the training program provided staff obtain permission from a supervisor.
1. The report that was completed by the finance department organizes essential information in a quite unsatisfactory manner.
2. Few of our customers who are most valued seek to obtain goods and services from another vendor, but we must remain ever vigilant in the business environment to better

ensure that these such customers continue in their loyal efforts with our establishment.

3. Per your inquiry, Carla Meier is quite possibly the best and finest member of our staff that we have every had the distinct pleasure to have known and worked with.
4. Following are distinct reasons to retain your current policy with Interstate Insurance:
 - Convenient claims submissions.
 - An agent who is fully prepared to help you to the fullest.
 - web page.

16.14 Using Topic Sentences (LO 16-5)

Make each of the following paragraphs more readable by opening each paragraph with a topic sentence. You may be able to find a topic sentence in the paragraph and move it to the beginning. In other cases, you'll need to write a new sentence.

1. At Disney World, a lunch put on an expense account is “on the mouse.” McDonald’s employees “have ketchup in their veins.” Business slang flourishes at companies with rich corporate cultures. Memos at Procter & Gamble are called “reco’s” because the model P&G memo begins with a recommendation.
2. The first item on the agenda is the hiring for the coming year. George has also asked that we review the agency

16.15 Writing Paragraphs (LO 16-5)

Write a paragraph on each of the following topics.

1. Discuss your ideal job.
2. Summarize a recent article from a business magazine or newspaper.
3. Explain how technology is affecting the field you plan to enter.
4. Explain why you have or have not decided to work while you attend college.

5. Planning meetings will be held during next month at different dates and times. These meetings will help us to plan for the upcoming conversion to a revised HR system. Meeting times to devise the plan will be as follows:
May 3, 2–3 PM
May 10, 2–3 PM
May 17, 2–3 PM

goals for the next fiscal year. We should cover this early in the meeting since it may affect our hiring preferences. Finally, we need to announce the deadlines for grant proposals, decide which grants to apply for, and set up a committee to draft each proposal.

3. Separate materials that can be recycled from your regular trash. Pass along old clothing, toys, or appliances to someone else who can use them. When you purchase products, choose those with minimal packaging. If you have a yard, put your yard waste and kitchen scraps (excluding meat and fat) in a compost pile. You can reduce the amount of solid waste your household produces in four ways.
 5. Write a profile of someone who is successful in the field you hope to enter.
- As Your Instructor Directs,*
1. Label topic sentences, active verbs, and parallel structure.
 2. Edit a classmate’s paragraphs to make the writing even tighter and smoother.

Polishing Your Prose

Commas in Lists

Use commas in lists to separate items:

At the office supply store, I bought pens, stationery, and three-ring binders.

Commas show distinctions between items in a list. Technically, the comma before the coordinating conjunction, such as *and* or *or*, is optional, but the additional comma always adds clarity. Use commas consistently throughout your document. Missing or improperly placed commas confuse readers:

We bought the following items for the staff lounge: television cabinet computer desk refrigerator and microwave oven.

Does *television* describe *cabinet* or is it a separate item? Is *computer* *desk* one item? Or are *computer* and *desk* two separate things? Inserting commas makes the distinction clear:

We bought the following items for the staff lounge: television, cabinet, computer, desk, refrigerator, and microwave oven.

Semicolons replace commas in lists where the items themselves contain commas:

Our company has plants in Blue Ridge, Kentucky; Boise, Idaho; and Saganaw, Michigan.

Exercises

Use commas to make these lists clearer.

1. The best years for our stock were 1995 2004 2010 and 2012.
2. Raises for directors supervisors and managers will be 2.3 2.5 and 2.2 percent, respectively.

3. We've got enough time to tour three of the region's cities, so choose from Nome Alaska Dearborn Michigan Gary Indiana Chicago Illinois or Lexington Kentucky.
4. David said that we need pens pencils erasers notepads folders paperclips note cards and name tags for the strategic planning retreat.
5. I can see that when Juan takes charge in April, we can expect to see profit increases in May June July and August.
6. Sunny forwarded the itinerary for the trip: Xiu will be flying from 9 a.m. till 11:45 a.m. Thursday Alexis will be flying from 10:15 a.m. till 11:25 a.m. on Friday and Jocelyn will be flying from 1 p.m. till 2:35 p.m. on Saturday.

7. Because we only have enough money in the budget for one attendee, we'll have to select Eve Gail Dominic or Lynetta to go.
8. The guest list includes Rick Keri Meyer Tonee Calvin Esteban Christopher Marguerite and Benjamin.
9. Our international division wants the board to tour Kyoto Japan Beijing China Berne Switzerland Mainz Germany and Toronto Canada.
10. So we are prepared for emergencies, the pool cars should have flares gloves blankets warning signs tire pressure gauges portable air compressors and prepaid cell phones.

Check your answers to the odd-numbered exercises at the back of the book.

Unit 4 Cases for Communicators

With the Best of Intentions

The State of Ohio paid a contractor to create and place a road sign above a well-traveled stretch of northern interstate highway. The problem is that the sign misspelled "north" in big white letters as "NORHT."

Though the contractor will replace the sign, the error was reported in one of the region's top newspapers, *The Cleveland Plain Dealer*, and picked up by news outlets around the country. Ohio, a state hit hard by the economic downturn of the past few years, has sought to project a 21st-century image to attract business. The typo doesn't exactly communicate that message.

For now, the contractor has placed an overlay on the typo and corrected the spelling. But the damage to the state's image may be harder to fix. State officials also want to know who approved the sign, which could have proven a distracting safety hazard, before it was placed. They also want to assure taxpayers that the state's beleaguered funds are being spent responsibly.

Individual Activity

Imagine you are the special assistant to the director of the Ohio Department of Transportation (ODOT). Your task is to write a letter to the entire department outlining why errors like these must be prevented in the future.

In your letter, explain the importance of good writing, focusing on editing and proofreading skills. Be sure to include at least three specific points describing how poor writing can affect the perceptions of the writer and the validity of the document and how mistakes can have real consequences for people. Use examples of bad writing for illustration.

As you draft, use WIRMI—What I Really Mean Is—to craft your basic idea. When you're finished, read the draft out loud. Think about these questions as you polish your letter:

- Did I use active verbs most of the time?
- Did I use verbs to carry the weight of my sentences?
- Did I include any words that mean nothing or send the wrong message?
- Can I tighten my writing by combining sentences or using gerunds and infinitives?
- Did I vary sentence length and structure?
- Did I use parallel structure?

- Did I begin most paragraphs with strong topic sentences?
- Did I use transitions to link ideas?

Be sure to carefully edit and proofread your final draft.

Group Activity

Note: To prepare for this group activity, print a new version of your draft, omitting all punctuation and formatting. The end result should be one block of text without any clear sentence or paragraph structure. Then, divide the members of the group into pairs.

The ODOT director has asked to see a copy of the letter you intend to send to the department. Unfortunately, your computer crashes. You recover the document, but it lacks formatting and punctuation. You are pressed for time, but you don't want to give your superior this draft.

Exchange your unformatted draft with your partner. Carefully read through theirs. Using the correct proofreading marks, note where the punctuation and paragraph breaks should go.

Before you return the draft to its author, ask yourself the following questions:

- Did I use the correct proofreading marks?
- Does my edited version of the letter make sense and read smoothly?

Give the edited version of the letter back to your partner. Examine your own draft, now copyedited by your partner, and compare it to your original version. As you do, ask yourself the following questions:

- How does the edited version compare to my draft?
- Are the sentence and paragraph breaks the same?
- Has the meaning or emphasis been changed?
- Did my partner identify any errors (e.g., word usage or punctuation) in my draft?

Note all differences in meaning and structure that you find.

As a group, share your findings. Discuss the ways in which grammar and punctuation affected meaning and structure. What does this experience tell you about the importance of proper grammar and punctuation in business documents?

Module

17 Listening

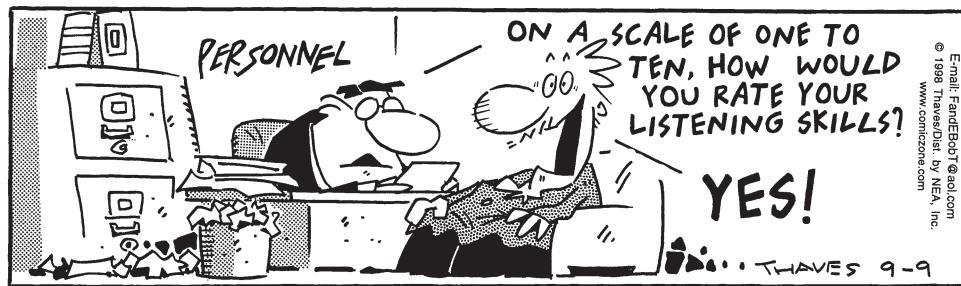

LEARNING OBJECTIVES

Module 17 explores the crucial role of listening in business, sharing ways to enhance your own skills. After completing the module, you should be able to

- | | |
|---|--|
| LO 17-1 Explain good listening strategies for the workplace. | LO 17-4 Recognize value in leadership through listening. |
| LO 17-2 Apply strategies for active listening. | LO 17-5 Recognize value in active listening during disagreements. |
| LO 17-3 Apply techniques for acknowledgment responses. | |

Listening is the form of communication we practice most often. Yet because we rarely have formal training in it, it may be the one that we do most poorly. Listening is even more crucial on the job than it is in classes, but it may also be more difficult. Because people routinely listen—to voices, to music, to nature—they can overestimate their skills, and the classroom experience is more structured than many work situations.

Polish your listening skills. You'll need them on the job as well as in your personal life.

Psychologist Susan Krauss Whitbourne wonders if technology is affecting our expectations for stimulation while listening. She notes that the average listener traditionally requires a shift in stimulation after about 20 minutes, but "with rapid-fire messages coming everywhere from Facebook to Twitter to push notifications from online games, many people require a shift in stimulation after perhaps as short as 20 seconds." There's even a name for the blank expression when not listening: screen-saver face.

Source: Susan Krauss Whitbourne, "11 Ways That Active Listening Can Help Your Relationships," *Psychology Today*, March 13, 2012, <http://www.psychologytoday.com/blog/fulfillment-any-age/201203/11-ways-active-listening-can-help-your-relationships>.

- In class you're encouraged to take notes. But you can't whip out a notepad every time your boss speaks.
- Many classroom lectures are well organized, with signposts (►► Module 20) and repetition of key points to help hearers follow. But conversations usually wander. A key point about when a report is due may be sandwiched in among statements about other due dates for other projects.
- In a classroom lecture, you're listening primarily for information. In interchanges with friends and co-workers, you need to listen for feelings, too. Feelings of being rejected or overworked need to be dealt with as they arise. But you can't deal with a feeling unless you are aware of it.

As Module 2 explains (◀◀ p. 23), to receive a message, the receiver must first perceive the message, then decode it (that is, translate the symbols into meaning), and then interpret it. In interpersonal communication, **hearing** denotes perceiving sounds. **Listening** means decoding and interpreting them correctly.

What do good listeners do? LO 17-1

- They consciously follow four practices.

Good listeners pay attention, focus on the other speaker(s) in a generous way rather than on themselves, avoid making assumptions, and listen for feelings as well as for facts.

Pay Attention

Good listening requires energy. You have to resist distractions and tune out noise (◀◀ p. 24), whether the rumble of a truck going by or your own worry about whether your parking meter is expiring.

Some listening errors happen because the hearer wasn't paying enough attention to a key point. After a meeting with a client, a consultant waited for the client to send her more information that she would use to draft a formal proposal to do a job for the client. It turned out that the client thought the next move was up to the consultant. The consultant and the client had met together, but they hadn't remembered the same facts.

To avoid listening errors caused by inattention,

- Before the meeting, anticipate the answers you need to get. Make a mental or paper list of your questions. When is the project due? What resources do you have? What is the most important aspect of this project from the other person's point of view? During a conversation, listen for answers to your questions.
- At the end of the conversation, check your understanding with the other person. Especially check who does what next.
- After the conversation, write down key points that affect deadlines or how work will be evaluated.

Listening is a vital skill in foreign language acquisition. The University of Ottawa's Larry Vandergrift found that when students learning French were taught specific listening skills, they "significantly outperformed" the other classmates in comprehension. The study's results were similar to that of one in Singapore, where Chinese students learning English reported increased motivation and confidence.

Source: Annie Murphy Paul, "The Power of Smart Listening," *Time*, December 7, 2011, <http://ideas.time.com/2011/12/07/the-power-of-smart-listening/>.

Most people speak at about 125 words per minute, even though we can think at 400–600 words per minute. This difference in rates leaves plenty of opportunity for us to be thinking when we should be listening. Some of us make matters worse by exposing ourselves to dangerous noise levels. For instance, a study shows that two out of five high school students surveyed listen to MP3 players at volumes that put them at risk for hearing loss. At the highest volume, the decibel level is comparable to that of a jet taking off.

Meyer, "Listening for the Total Message," *Success*, March 27, 2008, downloaded at <http://www.succesmagazine.com/Listening-for-the-Total-Message/PARAMS/article/158/channel/211#>; and Marianne Favro, "iPod Hearing Loss Concerns: A Budding Problem," March 20, 2006, downloaded at <http://www.nbc11.com/health/8150122/detail.html>.

Site to See

Go to

www.esl-lab.com

ESL/EFL speakers can practice listening to English conversations at Randall's ESL Cyber Listening Lab.

Focus on the Other Speaker(s) in a Generous Way

Some people listen looking for flaws. They may focus on factors other than the substance of the talk: "What an ugly tie." "She sounds like a little girl." "There's a typo in that slide." Or they may listen as if the discussion were a war, listening for points on which they can attack the other speaker. "Ah hah! You're wrong about *that!*"

Good listeners, in contrast, are more generous. They realize that people who are not polished speakers may nevertheless have something to say. Rather than pouncing on the first error they hear and tuning out the speaker while they wait impatiently for their own turn to speak, good listeners weigh all the evidence before they come to judgment. They realize that they can learn something even from people they do not like.

To avoid listening errors caused by self-absorption,

- Focus on the substance of what the speaker says, not his or her appearance or delivery.
- Spend your time evaluating what the speaker says, not just planning your rebuttal.
- Consciously work to learn something from every speaker.

Avoid Making Assumptions

Many listening errors come from making faulty assumptions. In 1977, when two Boeing 747 jumbo jets ran into each other on the ground in Tenerife, the pilots seem to have heard the control tower's instructions. The KLM pilot was told to taxi to the end of the runway, turn around, and wait for clearance. But the KLM pilot assumed he didn't need to follow the order to wait. The Pan Am pilot assumed that *his* order to turn off at the "third intersection" meant the third *unblocked* intersection. He didn't count the first blocked ramp, so he was still on the main runway when the KLM pilot ran into his plane at 186 miles an hour. The planes exploded in flames; 576 people died.¹

In contrast, asking questions can provide useful information. Magazine advertising account representative Beverly Jameson received a phone call from an ad agency saying that a client wanted to cancel the space it had bought. Jameson saw the problem as an opportunity: "Instead of hearing 'cancel,' I heard, 'There's a problem here—let's get to the root of it and figure out how to make the client happy.'" Jameson met with the client, asked the right questions, and discovered that the client wanted more flexibility. She changed some of the markets, kept the business, and turned the client into a repeat customer.²

To avoid listening errors caused by faulty assumptions,

- Don't ignore instructions you think are unnecessary. Before you do something else, check with the order giver to see if in fact there is a reason for the instruction.
- Consider the other person's background and experiences. Why is this point important to the speaker? What might he or she mean by it?
- Paraphrase what the speaker has said, giving him or her a chance to correct your understanding.

Listen for Feelings as Well as Facts

Sometimes, someone just needs to blow off steam, to vent (►► p. 302). Sometimes, people just want to have a chance to fully express themselves; "winning" or "losing" may not matter. Sometimes, people may have objections that they can't quite put into words.

To avoid listening errors caused by focusing solely on facts,

- Consciously listen for feelings.
- Pay attention to tone of voice, facial expression, and body language (◀◀ p. 42).
- Don't assume that silence means consent. Invite the other person to speak.

Elizabeth Gonzalez-Gann founded Jan-Co Janitorial and routinely listens to input from family members, many of whom are employees. She is pictured here with partner and brother, Fernando Gonzalez. Said Monica Lozano, president and CEO of *La Opinion* newspaper, Latina entrepreneurs such as Gonzalez-Gann may be “more collaborative, better listeners, better organized, and more strategic,” which partially accounts for their growing success in traditionally male-dominated fields. Gonzalez-Gann’s current pursuits include the Diet of Hope weight loss program.

Sources: Mark Fitzgerald, “Rompiendo Barreras,” *American Demographics*, November 2003; and “Migrant Worker Turned National Business Leader Shares Aspects of Success, Faith, Love,” downloaded on July 29, 2012, at <http://blog.beliefnet.com/palabrasquefortalecen/2011/09/migrant-worker-turned-national-business-leader-shares-aspects-of-success-faith-love.html>.

Research suggests innocent people tend to be more nervous under police questioning than guilty ones. With a rehearsed alibi in mind, liars may appear composed. In contrast, innocent people may fidget, as well as provide up to 30% more detail—even if they recall some facts incorrectly.

Source: Dina Temple-Raston, “Spotting Lies: Listen, Don’t Look,” *NPR*, August 14, 2009, <http://www.npr.org/templates/story/story.php?storyId=111809280>.

What is active listening? LO 17-2

- Feeding back the literal meaning, the emotional content, or both.

In **active listening**, receivers actively demonstrate that they’ve heard and understood a speaker by feeding back either the literal meaning or the emotional content or both. Other techniques in active listening are asking for more information and stating one’s own feelings.

Five strategies create active responses:

- **Paraphrase the content.** Feed back the meaning in your own words.
- **Mirror the speaker’s feelings.** Identify the feelings you think you hear.
- **State your own feelings.** This strategy works especially well when you are angry.
- **Ask for information or clarification.**
- **Offer to help solve the problem.**

Instead of simply mirroring what the other person says, many of us immediately respond in a way that analyzes or attempts to solve or dismiss the problem.

People with problems need first of all to know that we hear that they’re having a rough time. Figure 17.1 lists some of the responses that block communication. Ordering and interrogating tell the other person that the speaker doesn’t want to hear what he or she has to say. Preaching attacks the other person. Minimizing the problem suggests that the other person’s concern is misplaced. Even advising shuts off discussion. Giving a quick answer minimizes the pain the person feels and puts him or her down for not seeing (what is to us) the obvious answer. Even if it is a good answer from an objective point of view, the other person may not be ready to hear it. And sometimes, the off-the-top-of-the-head solution doesn’t address the real problem.

Active listening takes time and energy. Even people who are skilled active listeners can’t do it all the time. Furthermore, as Thomas Gordon and Judith Gordon Sands point out, active listening works only if you genuinely accept the other person’s ideas and feelings. Active listening can reduce the conflict that results from miscommunication, but it alone cannot reduce the conflict that comes when two people want apparently inconsistent things or when one person wants to change someone else.³

Instant Replay

Hearing and Listening

Hearing denotes perceiving sounds. **Listening** means decoding and interpreting them correctly.

To make it clear that you’re listening,

- Make eye contact with the speaker.
- Don’t do unrelated paperwork.
- Avoid body language (like looking at your watch or shuffling papers) that suggests that you want the conversation to end.

Source: William G. Pagonis, “Leadership in a Combat Zone,” *Harvard Business Review*, December 2001, 113.

Bernie Ferrari groups bad listeners into a variety of archetypes: Grouches, Pretenders, Opinionators, Answer Men, and so forth. One, the Preambler, prefers to use lead-ins and questions as tools to give speeches. He cites the appearance of *The Daily Show's* Jon Stewart on CNN's *Crossfire*—where he chastised the show's debate platform as theater for the two hosts to vent political views—as an outing of the Preambler method.

Figure 17.1 Blocking Responses versus Active Listening

Blocking Response	Possible Active Response
Ordering, threatening "I don't care how you do it. Just get that report on my desk by Friday."	Paraphrasing content "You're saying that you don't have time to finish the report by Friday."
Preaching, criticizing "You should know better than to air the department's problems in a general meeting."	Mirroring feelings "It sounds like the department's problems really bother you."
Interrogating "Why didn't you tell me that you didn't understand the instructions?"	Stating one's own feelings "I'm frustrated that the job isn't completed yet, and I'm worried about getting it done on time."
Minimizing the problem "You think that's bad. You should see what I have to do this week."	Asking for information or clarification "What parts of the problem seem most difficult to solve?"
Advising "Well, why don't you try listing everything you have to do and seeing which items are most important?"	Offering to help solve the problem together "Is there anything I could do that would help?"

Source: The 5 responses that block communication are based on a list of 12 in Thomas Gordon and Judith Gordon Sands, *P.E.T. in Action* (New York: Wyden, 1976), 117–18.

How do I show people that I'm listening to them? LO 17-3

- Acknowledge their comments in words, nonverbal symbols, and actions.

Active listening is a good way to show people that you are listening. Referring to another person's comment is another way: "I agree with Diana that. . . ."

Acknowledgment responses—nods, *uh huh's*, smiles, frowns—also help carry the message that you're listening. However, listening responses vary in different cultures. Research has found that European Americans almost always respond nonverbally when they listen closely, but that African Americans respond with words rather than nonverbal cues. This difference in response patterns may explain the fact that some European Americans think that African Americans do not understand what they are saying. For example, in the mid-1970s, studies showed that white counselors repeated themselves more often to black clients than to white clients.⁴ Similarly, black supervisors may want verbal feedback when they talk to white subordinates who only nod.

The mainstream U.S. culture shows attention and involvement by making eye contact, leaning forward, and making acknowledgment responses. However, as Module 3 shows (◀◀ p. 43), some cultures show respect by looking down. In a multicultural workforce, you won't always know whether a colleague who listens silently as you talk agrees with what you say or disagrees violently but is too polite to say so. The best thing to do is to observe the behavior, without assigning a meaning to it: "You aren't saying much." Then let the other person speak.

Of course, if you go through the motions of active listening but then act with disrespect, people will not feel as though you have heard them. Acting on what people say is necessary for people to feel completely heard.

Can I use these techniques if I really disagree with someone? LO 17-5

- Yes!

Most of us do our worst listening when we are in highly charged emotional situations, such as talking with someone with whom we really disagree, getting bad news,

Instant Replay

Four Habits of Good Listeners

Good Listeners

- Pay attention.
- Focus on the other speaker(s) in a generous way.
- Avoid making assumptions.
- Listen for feelings as well as for facts.

Test your listening skills.

Leading by Listening LO 17-4

D. Michael Abrashoff knows a lot about the value of listening. He now is an author and leadership development consultant, but until January 1999, Abrashoff commanded the *U.S.S. Benfold*, a \$1 billion warship in the U.S. Navy. Abrashoff practiced what he called “grassroots leadership”; seeing the ship through the eyes of the crew.

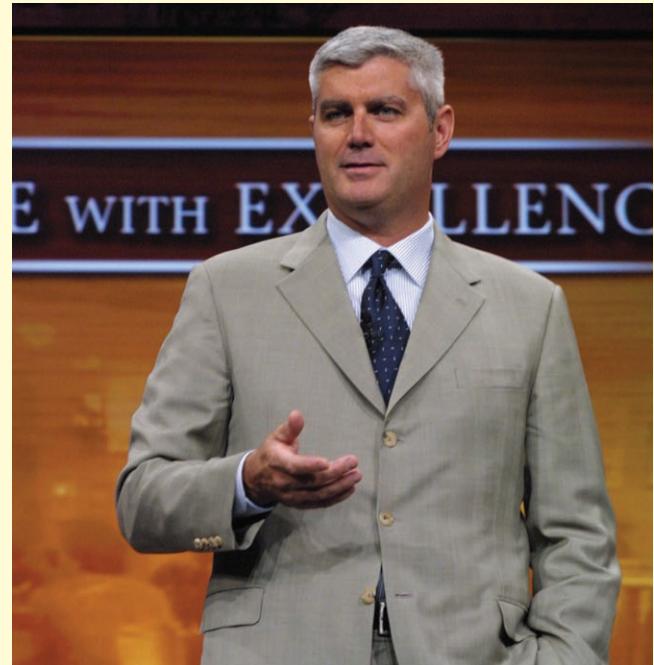

“Soon after arriving at this command . . . I realized that my job was to listen aggressively . . . I decided to interview five people a day . . . ask[ing] three simple questions: What do you like most about the *Benfold*? What do you like least? What would you change if you could? . . .

“I tackled the most demoralizing things first—like chipping and painting. Because ships sit in salt water and rust, . . . my youngest sailors—the ones I wanted most to connect with—were spending entire days sanding down rust and repainting the ship. It was a huge waste of physical effort.” Abrashoff had all the metal parts replaced with stainless steel and then painted with a rust inhibitor. “The entire process cost just \$25,000, and that paint job is good for 30 years. The kids haven’t picked up a paintbrush since. And they’ve had a lot more time to learn their jobs. . . .

“A lot of them wanted to go to college. But most of them had never had a chance to take the SAT. So I posted a sign-up sheet to see how many would take the test if I could arrange it. Forty-five sailors signed up. I then found an SAT administrator through our base in Bahrain and flew him out to the ship to give the test. That was a simple step for me to take, but it was a big deal for morale. . . .

“Most ships report several family problems during every deployment, and most of those problems result from lack of communication. I created an AOL account for the ship and set up a system for sending messages daily through a commercial satellite. That way, sailors can check in with their families, take part in important decisions, and get a little peace of mind.”

In the Navy as a whole, only 54% of sailors sign up for a third tour of duty. Under Abrashoff’s command, 100% of career sailors

signed on for an additional tour. Because recruiting and training cost the Navy at least \$100,000 a sailor, Abrashoff estimates that the *Benfold*’s retention rate saved the Navy \$1.6 million in 1998. Meanwhile, *Benfold* sailors were promoted at twice the rate of the Navy’s average. Sailors were so productive that in fiscal 1998 the *Benfold* returned \$600,000 of its \$2.4 million maintenance budget and \$800,000 of its \$3 million repair budget to the Navy.

Sources: www.glsworld.com, downloaded on July 2, 2012; “The Most Important Thing a Captain Can Do Is to See the Ship from the Eyes of the Crew,” *Fast Company*, April 1999, 114–26; and “Fast Pack 2000,” *Fast Company*, March 2000, 248.

or being criticized. At work, you need to listen even to people with whom you have major conflicts.

At a minimum, good listening enables you to find out why your opponent objects to the programs or ideas you support. Understanding the objections to your ideas is essential if you are to overcome those objections.

Good listening is crucial when you are criticized, especially by your boss. You need to know which areas are most important and exactly what kind of improvement counts. Otherwise, you might change your behavior in a way that wasn’t valued by your organization.

Listening can do even more. Listening to people is an indication that you’re taking them seriously. If you really listen to the people you disagree with, you show that you respect them. And taking that step may enable them to respect you and listen to you.

Instant Replay

Strategies for Active Listening

- Paraphrase the content.
- Mirror the speaker’s feelings.
- State your own feelings.
- Ask for information or clarification.
- Offer to help solve the problem.

Summary of Learning Objectives

- Good listeners pay attention, focus on the other speaker(s) rather than on themselves, avoid making assumptions, and listen for feelings as well as for facts. (**LO 17-1**)
- To avoid listening errors caused by inattention, (**LO 17-1**)
 - Be conscious of the points you need to know and listen for them.
 - At the end of the conversation, check your understanding with the other person.
 - After the conversation, write down key points that affect deadlines or how work will be evaluated.
- To avoid listening errors caused by self-absorption, (**LO 17-1**)
 - Focus on what the speaker says, not his or her appearance or delivery.
 - Spend your time evaluating what the speaker says, not just planning your rebuttal.
 - Consciously work to learn something from every speaker.
- To reduce listening errors caused by misinterpretation, (**LO 17-1**)
 - Don't ignore instructions.
 - Consider the other person's background and experiences. Why is this point important to the speaker?
 - Paraphrase what the speaker has said, giving him or her a chance to correct your understanding.
- To avoid listening errors caused by focusing solely on facts, (**LO 17-1**)
 - Consciously listen for feelings.
 - Pay attention to tone of voice, facial expression, and body language.
- Don't assume that silence means consent. Invite the other person to speak.
- In **active listening**, receivers actively demonstrate that they've heard and understood a speaker by feeding back either the literal meaning or the emotional content or both. To do this, hearers can (**LO 17-2**)
 - Paraphrase the content.
 - Mirror the speaker's feelings.
 - State your own feelings.
 - Ask for information or clarification.
 - Offer to help solve the problem.
- Show people you're listening through acknowledgment responses, such as nods or *uh huh's*. (**LO 17-3**)
- Ethnic and cultural norms may dictate what are common or appropriate acknowledgment responses. Observe and be sensitive. (**LO 17-3**)
- D. Michael Abrashoff's experiences while commanding the *U.S.S. Benfold* show the value of leading by listening. His efforts increased morale, with 100% of his career sailors requesting an additional tour with him, and due to increased efficiency, Abrashoff returned more than a million dollars budgeted for his ship's repair and maintenance to the Navy. (**LO 17-4**)
- Good listening enables you to find out why your opponent objects to the programs or ideas you support. It can also help opponents realize you're taking them seriously and respect them. (**LO 17-5**)

Assignments for Module 17

Questions for Comprehension

17.1 What do good listeners do? (**LO 17-1**)

17.2 What is active listening? (**LO 17-2**)

17.3 How do different ethnic and cultural norms affect acknowledgment responses? (**LO 17-3**)

Questions for Critical Thinking

17.4 Why do people sometimes make assumptions rather than listen carefully? (**LO 17-1**)

17.5 How do you show that you are listening? (**LO 17-1 to LO 17-3**)

17.6 What are the people and circumstances in your life where you find it most difficult to listen? Why do you find it difficult? (**LO 17-1 to LO 17-3**)

17.7 Think of a time when you really felt that the other person listened to you, and a time when you felt unheard. What are the differences in the two situations? (**LO 17-1 to LO 17-3**)

Exercises and Problems

17.8 Identifying Responses that Show Active Listening (**LO 17-2**)

Which of the following responses show active listening?
Which block communication?

1. Comment: Whenever I say something, the group ignores me.

Responses:

- a. That's because your ideas aren't very good. Do more planning before group meetings.
- b. Nobody listens to me, either.
- c. You're saying that nobody builds on your ideas.

2. Comment: I've done more than my share of work on this project. But the people who have been freeloading are going to get the same grade I worked so hard to earn.

Responses:

- a. Yes, we all get the same grade.
- b. Are you afraid we won't do well on the assignment?
- c. It sounds like you feel resentful.

3. Comment: My parents are going to kill me if I don't have a job lined up at the end of this term.

Responses:

- a. You know they're exaggerating. They won't really kill you.

17.9 Practicing Active Listening (LO 17-2)

Go around the room. In turn, let each student complain about something (large or small) that really bothers him or her. Then the next student(s) will

- a. Offer a statement of limited agreement that would buy time.

17.10 Interviewing Workers about Listening (LO 17-2, LO 17-3)

Interview a worker about his or her on-the-job listening. Possible questions to ask include the following:

- Whom do you listen to as part of your job? Your superior? Subordinates? (How many levels down?) Customers or clients? Who else?
- How much time a day do you spend listening?
- What people do you talk to as part of your job? Do you feel they hear what you say? How do you tell whether or not they're listening?
- Do you know of any problems that came up because someone didn't listen? What happened?

17.11 Reflecting on Your Own Listening (LO 17-2, LO 17-3)

Keep a listening log for a week. Record how long you listened, what barriers you encountered, and what strategies you used to listen more actively and more effectively. What situations were easiest? Which were most difficult? Which parts of listening do you need to work hardest on?

As Your Instructor Directs,

17.12 Reflecting on Acknowledgment Responses (LO 17-3)

Join at least three conversations involving people from more than one culture. What acknowledgment responses do you observe? Which seem to yield the most positive results? If possible, talk to the other participants about what verbal and nonverbal cues show attentive listening in their cultures.

As Your Instructor Directs,

- b. Can you blame them? I mean, you've been in school for six years. Surely you've learned something to make you employable!
- c. If you act the way in interviews that you do in our class, I'm not surprised. Companies want people with good attitudes and good work ethics.

- b. Paraphrase the statement.

- c. Check for feelings that might lie behind the statement.
- d. Offer inferences that might motivate the statement.

- What do you think prevents people from listening effectively? What advice would you have for someone on how to listen more accurately?

As Your Instructor Directs,

- a. Share your information with a small group of students in your class.
- b. Present your findings orally.
- c. Present your findings in a memo to your instructor.
- d. Join with other students to present your findings in a group report or presentation.

- a. Share your information with a small group of students in your class.
- b. Present your findings orally.
- c. Present your findings in a memo to your instructor.
- d. Join with other students to present your findings in a group report or presentation.

- a. Share your information with a small group of students in your class.
- b. Present your findings orally.
- c. Present your findings in a memo to your instructor.
- d. Join with other students to present your findings in a group report or presentation.

Polishing Your Prose

Combining Sentences

Combining sentences is a powerful tool to make your writing tighter and more forceful.

When too many sentences in a passage have fewer than 10 words and follow the same basic pattern, prose is **choppy**. Choppy prose seems less unified and either robot-like or frenzied in tone. Combining short sentences to create longer, flowing ones can eliminate this problem.

Choppy: I went to the office supply store. I purchased a computer, a fax machine, and a laser printer. I went to

my office. I installed the equipment. I became more efficient.

Better: At the office supply store, I purchased a computer, a fax machine, and a laser printer. After installing the equipment, I became more efficient.

Combine sentences in one of four ways.

1. Use **transitions:** words and phrases that signal connections between ideas. Common transitions are *first*, *second*, *third*,

finally, in addition, likewise, for example, however, on the other hand, nevertheless, because, therefore, before, after, then, while, and in conclusion.

Choppy: Neil drove the truck to the warehouse. Charlie loaded it with cement. Phil supervised the work.

Better: First, Neil drove the truck to the warehouse. Then Charlie loaded it with cement while Phil supervised the work.

2. Rewrite sentences using **subordinate clauses**. A clause with one of the following words will be subordinate: *after, although, though, because, or since*.

Better: After Neil drove the truck to the warehouse, Charlie loaded it with cement. Phil supervised the work.

3. Join simple sentences with **coordinating conjunctions**, like *and, but, or or*. These conjunctions can also function as transitional words. Be sure to use the comma before the conjunction when combining two independent clauses.

Better: Neil drove the truck to the warehouse, Charlie loaded it with cement, and Phil supervised the work.

4. Create a **list** using commas and coordinating conjunctions.

Choppy: Sam put our old files in the storeroom. Sam placed extra copies of the company telephone directory in the storeroom. Sam put boxes of three-ring binders in the storeroom.

Better: Sam put old files, extra copies of the telephone directory, and boxes of three-ring binders in the storeroom.

Exercises

Combine the following sentences to make them easier to read.

1. We're going to reorganize the department. John and Talia used to do media relations. John is going to keep doing media relations. Talia is joining our web development team. Seydina used to do market research. Seydina will now do long-range planning. Anthony will also do media relations. Anthony was our summer intern. He's now working with the department full time. That leaves Russ, Deb, Alexi, and Caroline. Russ, Alexi, and Caroline will stay in market research. Deb will work with Talia on web development.
2. A lot of people are blogging. They're blogging for personal reasons. They're blogging for professional reasons. Many blog for both reasons. Many blogs look very professional. Many do not. Some blogs have photos. Some have music. Some have video. The writing can be quite good. The writing

can be quite bad. The blogs are harmless in most cases. Sometimes the blogs are insulting or downright malicious. Sometimes the blogs seem libelous. There are millions of blogs on the Internet. It seems that people will have to take the good with the bad blogs.

3. I got a new cell phone. It has Internet capability. It has Bluetooth. I can even store video and TV shows on it. It has a 2 MPX camera. I would be lost without my new cell phone. It has a full-color screen. It has a projector. I bought it to replace the old one. That phone had fewer capabilities. It did not have a projector. It did not have WiFi connectivity. It worked, but it was two years old. I wanted more features, so I bought a new one. This is the latest technology. I got it last week. I ordered it online. The battery recharges wirelessly. Of course, I can text with it, too. It works as a phone. I'd be lost without my cell phone!
4. Excelsior Communications is the premier communication consulting firm in the Boca Raton area. Excelsior Communications has been in business for 23 years. Twenty-three years ago, CEO Wendy Althaus founded Excelsior Communications in Boca Raton. Wendy Althaus worked for such companies as Paramount Pictures, Hilton Hotels, and Nationwide Insurance before founding Excelsior Communications. Wendy Althaus founded the firm with the express intent of working with clients in the travel and tourism industries. Excelsior has a staff of more than 20 communication, publications, media relations, and web development specialists. These 20 specialists are all college educated. Some of these specialists have master's degrees. Two specialists have Ph.D.s. Wendy Althaus also has a Ph.D.
5. I began my career working in packaging for Van Eyck Industries and then took a junior position in logistics. I worked for two years with Van Eyck Industries. The junior position in logistics was with a company called Evergreen Plastics. I worked for Evergreen Plastics for four years. At Van Eyck, I spent most of my time on the assembly line, operating hydraulic and boxing equipment. At Evergreen Plastics, I started as an assembly line supervisor but was offered a position with logistics within a year. I took that position in logistics. At Evergreen Plastics, I helped to plan and coordinate the delivery of finished product to more than 100 stores and other businesses throughout the state. Another part of my job was to plan and coordinate the delivery of the recyclables to make product.

Check your answers to the odd-numbered exercises at the back of the book.

Working and Writing in Teams

LEARNING OBJECTIVES

Module 18 provides advice on making your experiences working and writing in teams fun and productive. After completing the module, you should be able to

- | | |
|---|---|
| LO 18-1 Identify message types for the group's attention. | LO 18-4 Apply strategies for conflict resolution. |
| LO 18-2 Classify roles for group members. | LO 18-5 Apply strategies for co-authorship of documents. |
| LO 18-3 Apply strategies for leadership without arrogance. | |

Teamwork is crucial to success in an organization. Some teams produce products, provide services, or recommend solutions to problems. Other teams—perhaps in addition to providing a service or recommending a solution—also produce documents. **Interpersonal communication** is communication between people. Interpersonal skills such as listening (◀◀ Module 17) and dealing with conflict are used in one-on-one conversations, in problem-solving groups, and in writing groups. These skills will make you more successful on the job, in social groups, and in community service and volunteer work. In writing groups, careful attention to both the group process and the writing process (◀◀ Module 4) improves both the final product and members' satisfaction with the group.

Teams are often most effective when they explicitly adopt ground rules. Figure 18.1 lists some of the most common ground rules used by workplace teams.

There may, in fact, be hidden costs to being on a large team. The Wharton School's Jennifer Mueller found that while larger teams were typically more productive, individual members of smaller groups had better overall experiences. Stress, disaffection, and limited resources contributed to problems in larger groups. Said Mueller of a respondent's view of working with a large team: "One person referred to the experience as a 'death march.'"

Source: Knowledge@Wharton, "The Unexpected Costs of Collaboration," *Time*, January 19, 2012, <http://business.time.com/2012/01/19/the-unexpected-costs-of-collaboration/>.

After an explosion blew out the side of their spacecraft during a 1970 moon shot, Apollo 13 astronauts teamed up with Houston ground control specialists in a desperate race against time to save the three-man crew. Among their many tasks: jury-rigging a carbon dioxide filter from such parts as mismatched canisters, flight manuals, and duct tape. Instructions were radioed to the crew after Houston engineers built a similar device. The drama of flawless teamwork under high duress played out on live television.

Source: "Apollo 13: The Real Story," *Dateline NBC*, April 11, 2010.

Figure 18.1 Possible Group Ground Rules

- Start on time; end on time.
- Come to the meeting prepared.
- Focus comments on the issues.
- Avoid personal attacks.
- Listen to and respect members' opinions.
- NOSTUESO (No One Speaks Twice Until Everybody Speaks Once)
- If you have a problem with another person, tell that person, not everyone else.
- Everyone must be 70% comfortable with the decision and 100% committed to implementing it.
- If you agree to do something, do it.
- Communicate immediately if you think you may not be able to fulfill an agreement.

Sources: Nancy Schullery and Beth Hoger, "Business Advocacy for Students in Small Groups," Association for Business Communication Annual Convention, San Antonio, November 9–11, 1998; "An Antidote to Chronic Cantankerousness," *Fast Company*, February/March 1998, 176; John Grossmann, "We've Got to Start Meeting Like This," *Inc.*, April 1998, 70; Gary Dessler, *Winning Commitment*, quoted in *Team Management Briefings*, preview issue (September 1998), 5; and 3M Meeting Network, "Groundrules and Agreements," www.3M.com/meetingnetwork/readingroom/meetingguide_grndrules.html (July 25, 2005).

What kinds of messages should groups attend to? LO 18-1

► *Different messages are appropriate at different points in a group's development.*

Group messages fall into three categories:

- **Informational** messages focus on content: the problem or challenge, data, and possible solutions.
- **Procedural** messages focus on method and process. How will the group make decisions? Who will do what? When will assignments be due?
- **Interpersonal** messages focus on people, promoting friendliness, cooperation, and group loyalty.

Different messages dominate during the various stages of group development. During **orientation**, when members meet and begin to define their task, groups need to develop some sort of social cohesiveness and to develop procedures for meeting and acting. Interpersonal and procedural comments reduce the tension that exists in a new group. Insistence on information in this first stage can hurt the group's long-term productivity.

During **formation**, conflicts almost always arise when the group chooses a leader and defines the problem. Successful leaders make the procedure clear so that each member knows what he or she is supposed to do. Interpersonal communication is needed to resolve the conflict that surfaces during this phase. Successful groups analyze the problem carefully before they begin to search for solutions.

Coordination is the longest phase, during which most of the group's work is done. While procedural and interpersonal comments help maintain direction and friendliness, most of the comments need to deal with information. Good information is essential to a good decision. Conflict occurs as the group debates alternate solutions.

In **formalization**, the group seeks consensus. The success of this phase determines how well the group's decision will be implemented. In this stage, the group seeks to forget earlier conflicts.

Designers for Ford Motor Company collaborate on group projects with colleagues around the world. When a team in one area of the world completes work for the day, the documents are passed along to the next group, which is just starting the workday.

What roles do people play in groups? LO 18-2

- *Roles can be positive or negative.*

Positive roles and actions that help the group achieve its task goals include the following:¹

- **Seeking information and opinions.** Asking questions, identifying gaps in the group's knowledge.
- **Giving information and opinions.** Answering questions, providing relevant information.
- **Summarizing.** Restating major points, pulling ideas together, summarizing decisions.
- **Evaluating.** Comparing group process and products to standards and goals.
- **Coordinating.** Planning work, giving directions, and fitting together contributions of group members.

Positive roles and actions that help the group build loyalty, resolve conflicts, and function smoothly include the following:

- **Encouraging participation.** Demonstrating openness and acceptance, recognizing the contributions of members, calling on quieter group members.
- **Relieving tensions.** Joking and suggesting breaks and fun activities.
- **Checking feelings.** Asking members how they feel about group activities and sharing one's own feelings with others.

Among the behaviors Jim Collins notes of "teams on the way down" are "members seek as much credit as possible for themselves, yet do not enjoy the confidence and admiration of their peers," while in "teams on the way up," each team member "credits other people for success, yet enjoys the confidence and admiration of his or her peers."

Source: Jim Collins, "The Dynamics of Leadership—Team Behavior" (excerpt), *BusinessWeek*, May 25, 2009. http://www.businessweek.com/magazine/content/09_21/b4132026793275.htm.

Site to See

Go to

<http://www.nsba.org/sbot/toolkit/LeadTeams.html>

For the National School Boards Association's tutorial on developing successful teams.

- **Solving interpersonal problems.** Opening discussion of interpersonal problems in the group and suggesting ways to solve them.
- **Listening actively.** Showing group members that they have been heard and that their ideas are being taken seriously (◀◀ p. 291).

Negative roles and actions that hurt the group's product and process include the following:

- **Blocking.** Disagreeing with everything that is proposed.
- **Dominating.** Trying to run the group by ordering, shutting out others, and insisting on one's own way.
- **Clowning.** Making unproductive jokes and diverting the group from the task.
- **Withdrawing.** Being silent in meetings, not contributing, not helping with the work, not attending meetings.

Some actions can be positive or negative depending on how they are used. Criticizing ideas is necessary if the group is to produce the best solution, but criticizing every single idea raised without ever suggesting possible solutions blocks a group. Jokes in moderation can defuse tension and make the group more fun. Too many jokes or inappropriate jokes can make the group's work more difficult.

According to Florida State University researchers, employees with abusive supervisors were much more likely to hide, slack off, hand in sloppy work, and take sick leave when healthy than those with more benevolent ones. Abuse includes berating, ignoring e-mails, and putting down workers in front of others. Employees with kinder bosses were three times more likely to proactively fix problems and approach supervisors with helpful ideas. A Gallop Poll of a million workers found that bad bosses are the top reason for quitting a job, and a 2011 poll conducted by Harris Interactive for the American Psychological Association found that nearly 50% of workers say they don't feel valued on the job.

Source: Jeanna Bryner, "Abused Workers Fight Back by Slacking Off," October 8, 2007, downloaded at http://news.yahoo.com/s/livescience/20071008/sc_livescience/abusedworkersfightbackbyslackingoff; and Douglas LaBier, "The Lowdown on Abusive Bosses and Unhealthy Management," June 6, 2011, http://www.huffingtonpost.com/douglas-labier/the-lowdown-on-abusive-bosses_b_887157.html.

Leadership in Groups

You may have noted that "leader" was not one of the roles listed earlier. Being a leader does *not* mean doing all the work yourself. Indeed, someone who implies that he or she has the best ideas and can do the best work is likely playing the negative roles of blocking and dominating.

Effective groups balance three kinds of leadership, which parallel the three group dimensions:

- **Informational leaders** generate and evaluate ideas and text.
- **Interpersonal leaders** monitor the group's process, check people's feelings, and resolve conflicts.
- **Procedural leaders** set the agenda, make sure that everyone knows what's due for the next meeting, communicate with absent group members, and check to be sure that assignments are carried out.

While it's possible for one person to do all of these responsibilities, in many groups, the three kinds of leadership are taken on by three (or more) different people. Some groups formally or informally rotate or share these responsibilities, so that everyone—and no one—is a leader.

Several studies have shown that people who talk a lot, listen effectively, and respond nonverbally to other members in the group are considered to be leaders.²

Leaders can encourage groups to make fair decisions. For instance, someone in the group usually brings up an idea's flaws. For balance, John Tropman recommends that leaders also call upon an "angel's advocate" to speak up for the idea's positive aspects.³

Characteristics of Successful Student Groups

A case study of six student groups completing class projects found that students in successful groups were not necessarily more skilled or more experienced than students in less successful groups. Instead, successful and less successful groups communicated differently in three ways.⁴

1. In the successful groups, the leader set clear deadlines, scheduled frequent meetings, and dealt directly with conflict that emerged in the group. In less successful groups,

Leading Without Being Arrogant LO 18-3

Sometimes when groups form, no one wants to “lead.” Perhaps that’s because we’ve seen “leaders” who seemed dictatorial, implied that no one else’s work would be up to their high standards, and generally antagonized the people unfortunate enough to have to work with them.

You don’t have to be arrogant to be a leader. Here are some things that you can do to get your group started on the right track.

- **Smile.** Get to know the other members of your group as individuals. Invite members to say something about themselves, perhaps what job they’re hoping to get and one fact about their lives outside school.
- **Share.** Tell people about your own work style and obligation, and ask others to share their styles and obligations. Savvy group members play to each other’s strengths and devise strategies for dealing with differences. The earlier you know what those differences are, the easier it will be to deal with them.
- **Suggest.** “Could we talk about what we see as our purposes in this presentation?” “One of the things we need to do is. . . .” “One idea I had for a project is. . . .” Presenting your ideas as suggestions gets the group started without suggesting that you expect your views to prevail.
- **Think.** Leaders look at the goal and identify the steps needed to get there. “Our proposal is due in two weeks. Let’s list the tasks we need to do in order to write a rough draft.”
- **Volunteer.** Volunteer to take notes or to gather some of the data the group will need or to prepare the charts after the data are in. Volunteer not just for the fun parts of the job (such as surfing the web to find visuals for your PowerPoint presentation) but also for some of the dull but essential work, such as proofreading.
- **Ask.** Bring other people into the conversation. Learn about their knowledge, interests, and skills so that you’ll have as much as possible to draw on as you complete your group projects.

members had to ask the leader what they were supposed to be doing. The less successful groups met less often, and they tried to pretend that conflicts didn’t exist.

2. The successful groups listened to criticism and made important decisions together. Perhaps as a result, everyone in the group could articulate the group’s goals. In the less successful groups, a subgroup made decisions and told other members what had been decided.
3. The successful groups had a higher proportion of members who worked actively on the project. The successful groups even found ways to use members who didn’t like working in groups. For example, one student who didn’t want to be a “team player” functioned as a “freelancer” for her group, completing assignments by herself and giving them to the leader. The less successful groups had a much smaller percentage of active members and each had some members who did very little on the final project.

Rebecca Burnett has shown that student groups produce better documents when they disagree over substantive issues of content and document design. The disagreement does not need to be angry: A group member can simply say, “Yes, and here’s another way we could do it.” Deciding among two (or more) alternatives forces the proposer to explain the rationale for an idea. Even when the group adopts the original idea, considering alternatives rather than quickly accepting the first idea produces better writing.⁵

Kimberly Freeman found that the students who spent the most time meeting with their groups had the highest grades—on their individual as well as on group assignments.⁶

Peer Pressure and Groupthink

Groups that never express conflict may be experiencing groupthink. **Groupthink** is the tendency for groups to put such a high premium on agreement that they directly or indirectly punish dissent.

Positive Roles in Groups

Task Roles

- Seeking information and opinions
- Giving information and opinions
- Summarizing
- Evaluating
- Coordinating

Interpersonal Roles

- Encouraging participation
- Relieving tensions
- Checking feelings
- Solving interpersonal problems
- Listening actively

Author and self-professed introvert Susan Cain believes that while some teamwork is fine and offers a stimulating way to exchange ideas, introverts may suffer, in particular from the pressures of groupthink. She notes the achievements of creative introverts like Apple's Steve Wozniak and physicist Sir Isaac Newton, who seemed to do their best work alone. Cain, who opposes eliminating teamwork from the workplace, nonetheless points out "it's one thing to associate with a group in which each member works autonomously on his piece of the puzzle; it's another to be corralled into endless meetings or conference calls conducted in offices that afford no respite from the noise and gaze of co-workers."

Source: Susan Cain, "The Rise of the New Groupthink," *The New York Times*, January 13, 2012, <http://www.nytimes.com/2012/01/15/opinion/sunday/the-rise-of-the-new-groupthink.html?pagewanted=allC>.

Three Kinds of Group Leadership

Informational leaders generate and evaluate ideas and text. **Interpersonal** leaders monitor the group's process, check people's feelings, and resolve conflicts. **Procedural** leaders set the agenda, make sure that everyone knows what's due for the next meeting, communicate with absent group members, and check to be sure that assignments are carried out.

Groups that "go along with the crowd" and suppress conflict ignore the full range of alternatives, seek only information that supports the positions they already favor, and fail to prepare contingency plans to cope with foreseeable setbacks. A business suffering from groupthink may launch a new product that senior executives support but for which there is no demand. Student groups suffering from groupthink turn in inferior documents.

The best correctives to groupthink are to

- Consciously search for additional alternatives.
- Test assumptions against those of a range of other people.
- Encourage disagreement, perhaps even assigning someone to be "devil's advocate."
- Protect the right of people in a group to disagree.

How should we handle conflict? LO 18-4

► Get at the real issue, and repair bad feelings.

Conflicts will arise in any group of intelligent people who care about the task. Yet many of us feel so uncomfortable with conflict that we pretend it doesn't exist. However, unacknowledged conflicts rarely go away: they fester, making the next interchange more difficult.

To reduce the number of conflicts in a group,

- Make responsibilities and ground rules clear at the beginning.
- Discuss problems as they arise, rather than letting them fester till people explode.
- Realize that group members are not responsible for each others' happiness.

Meeting expert John Tropman recommends that controversial items be handled at two different meetings. The first meeting is a chance for everyone to air a point of view about the issue. After a cooling-off period, a second meeting is held where the group reaches a decision.⁷

Figure 18.2 suggests several possible solutions to conflicts that student groups often experience. Often the symptom arises from a feeling of not being respected or appreciated by the group. Therefore, many problems can be averted if people advocate for their ideas in a positive way. As Nancy Schullery and Beth Hoger point out, the best time to advocate for an idea is when the group has not yet identified all possible options, seems dominated by one view, or seems unable to choose among solutions. A tactful way to advocate for the position you favor is to recognize the contributions others have made, to summarize, and then to hypothesize: "What if . . . ?" "Let's look six months down the road." "Let's think about x."⁸

Steps in Conflict Resolution

Dealing successfully with conflict requires attention to both the issues and to people's feelings. This five-step procedure will help you resolve conflicts constructively.

1. Make Sure that the People Involved Really Disagree

Sometimes someone who's under a lot of pressure may explode. But the speaker may just be **venting** anger and frustration; he or she may not in fact be angry at the person who receives the explosion. One way to find out if a person is just venting is to ask, "Is there something you'd like me to do?"

2. Check to See that Everyone's Information Is Correct

Sometimes different conversational styles (◀◀ p. 45) or cultural differences (◀◀ p. 40) create apparent conflicts when in fact no real disagreement exists. During a negotiation

Figure 18.2 Troubleshooting Group Problems

Symptom	Possible Solutions
We can't find a time to meet that works for all of us.	<ul style="list-style-type: none"> a. Find out why people can't meet at certain times. Some reasons suggest their own solutions. For example, if someone has to stay home with small children, perhaps the group could meet at that person's home. b. Assign out-of-class work to "committees" to work on parts of the project. c. Use e-mail to share, discuss, and revise drafts.
One person just criticizes everything.	<ul style="list-style-type: none"> a. Ask the person to follow up the criticism with a suggestion for improvement. b. Talk about ways to express criticism tactfully. "I think we need to think about x" is more tactful than "You're wrong." c. Value criticism about ideas and writing (not about people). Ideas and documents need criticism if we are to improve them.
People in the group don't seem willing to disagree. We end up going with the first idea suggested.	<ul style="list-style-type: none"> a. Appoint someone to be a "devil's advocate." b. Brainstorm so you have several possibilities to consider. c. After an idea is suggested, have each person in the group suggest a way it could be improved. d. Have each person in the group write a draft. It's likely the drafts will be different, and you'll have several options to mix and match. e. Talk about good ways to offer criticism. Sometimes people don't disagree because they're afraid that other group members won't tolerate disagreement.
I seem to be the only one in the group who cares about quality.	<ul style="list-style-type: none"> a. Find out why other members "don't care." If they received low grades on early assignments, stress that good ideas and attention to detail can raise grades. Perhaps the group should meet with the instructor to discuss what kinds of work will pay the highest dividends. b. Volunteer to do extra work. Sometimes people settle for something that's just OK because they don't have the time or resources to do excellent work. They might be happy for the work to be done—if they don't have to do it. c. Be sure that you're respecting what each person can contribute. Group members sometimes withdraw when one person dominates and suggests that he or she is "better" than other members.
One person isn't doing his or her fair share.	<ul style="list-style-type: none"> a. Find out what is going on. Is the person overcommitted? Does he or she feel unappreciated? Those are different problems you'd solve in different ways. b. Do things to build group loyalty. Get to know each other as writers and as people. Sometimes, do something fun together. c. Encourage the person to contribute. "Mary, what do you think?" "Jim, which part of this would you like to draft?" Then find something to praise in the work. "Thanks for getting us started." d. If someone misses a meeting, assign someone else to bring the person up to speed. People who miss meetings for legitimate reasons (job interviews, illness) but don't find out what happened may become less committed to the group. e. Consider whether strict equality is the most important criterion. Sometimes the best group product results from letting people do different amounts of "work." f. Even if you divide up the work, make all decisions as a group: what to write about, which evidence to include, what graphs to use, what revisions to make. People excluded from decisions become less committed to the group.

between a U.S. businessman and a Balinese businessman, the Balinese man dropped his voice and lowered his eyes when he discussed price. The U.S. man saw the low voice and breaking of eye contact as an indication of dishonesty. But the Balinese believe that it is rude to mention price specifically. He was embarrassed, but he wasn't lying.⁹

Similarly, misunderstanding can arise from faulty assumptions. A U.S. student studying in Colombia quickly learned that only cold water was available for his evening shower. Since his host family washed dinner dishes in cold water, he assumed that the family didn't have hot water. They did. Colombians turn off the water heater in the morning after everyone has bathed; washing later in the day is done with cold water. He could have had hot water for his showers if he had taken them in the morning.¹⁰

Human Resources consultant Roberta Matuson points out that conflict can be an opportunity for fresh ideas. She asks businesspeople, “Do you think such innovative products like smartphones would exist if no one in the room challenged the idea that a phone could be used for more than just making and receiving calls?”

Source: Roberta Matuson, “How to Confront Without Conflict,” *FastCompany*, February 4, 2010, <http://www.fastcompany.com/blog/roberta-matuson/management-escalator/how-confront-without-conflict>.

3. Discover the Needs Each Person Is Trying to Meet

Sometimes determining the real needs makes it possible to see a new solution. The **presenting problem** that surfaces as the subject of dissension may or may not be the real problem. For example, a worker who complains about the hours he’s putting in may in fact be complaining not about the hours themselves but about not feeling appreciated. A supervisor who complains that the other supervisors don’t invite her to meetings may really feel that the other managers don’t accept her as a peer. Sometimes people have trouble seeing beyond the presenting problem because they’ve been taught to suppress their anger, especially toward powerful people. One way to tell whether the presenting problem is the real problem is to ask, “If this were solved, would I be satisfied?” If the answer is *no*, then the problem that presents itself is not in fact the real problem. Solving the presenting problem won’t solve the conflict. Keep probing until you get to the real conflict.

4. Search for Alternatives

Sometimes people are locked into conflict because they see too few alternatives. In *Decide and Conquer*, Stephen Robbins calls this common shortcoming the limited-search error: Wishing to simplify a complicated process, group members generate alternatives only if the ones already mentioned are unacceptable. Therefore, for significant decisions, groups need a formal process to identify alternatives thoroughly.¹¹

Diverse alternatives can lead to better solutions. At one data-entry company, productivity fell because female employees took time off to visit their children at day care. Men on the board wanted to solve the problem by “docking” pay. The one woman on the board proposed installing software to let mothers check on their children online. That solved the problem.¹²

5. Repair Bad Feelings

Conflict can emerge without anger and without escalating the disagreement, as the next section shows. But if people’s feelings have been hurt, the group needs to deal with those feelings to resolve the conflict constructively. Only when people feel respected and taken seriously can they take the next step of trusting others in the group.

Responding to Criticism

Conflict is particularly difficult to resolve when someone else criticizes or attacks us directly. When we are criticized, our natural reaction is to defend ourselves—perhaps by counterattacking. The counterattack prompts the critic to defend him- or herself. The conflict escalates; feelings are hurt; issues become muddied and more difficult to resolve.

Just as resolving conflict depends upon identifying the needs each person is trying to meet, so dealing with criticism depends upon understanding the real concern of the critic. Constructive ways to respond to criticism and get closer to the real concern include

- Paraphrasing.
- Checking for feelings.
- Checking inferences.
- Buying time with limited agreement.

Paraphrasing

To **paraphrase**, repeat in your own words the verbal content of the critic’s message. The purposes of paraphrasing are (1) to be sure that you have heard the critic accurately, (2) to let the critic know what his or her statement means to you, and (3) to communicate the feeling that you are taking the critic and his or her feelings seriously.

Criticism: You guys are stonewalling my requests for information.

Paraphrase: You think that we don't give you the information you need quickly enough.

Checking for Feelings

When you check the critic's feelings, you identify the emotions that the critic seems to be expressing verbally or nonverbally. The purposes of checking feelings are to try to understand (1) the critic's emotions, (2) the importance of the criticism for the critic, and (3) the unspoken ideas and feelings that may actually be more important than the voiced criticism.

Criticism: You guys are stonewalling my requests for information.

Feeling check: You sound pretty angry.

Always *ask* the other person if you are right in your perception. Even the best reader of nonverbal cues is sometimes wrong.

Checking for Inferences

When you check the inferences you draw from criticism, you identify the implied meaning of the verbal and nonverbal content of the criticism, taking the statement a step further than the words of the critic to try to understand *why* the critic is bothered by the action or attitude under discussion. The purposes of checking inferences are (1) to identify the real (as opposed to the presenting) problem and (2) to communicate the feeling that you care about resolving the conflict.

Criticism: You guys are stonewalling my requests for information.

Inference: Are you saying that you need more information from our group?

Inferences can be faulty. In the above interchange, the critic might respond, "I don't need *more* information. I just think you should give it to me without my having to file three forms in triplicate every time I want some data."

Buying Time with Limited Agreement

Buying time is a useful strategy for dealing with criticisms that really sting. When you buy time with limited agreement, you avoid escalating the conflict (as an angry statement might do) but also avoid yielding to the critic's point of view. To buy time, restate the part of the criticism that you agree to be true. (This is often a fact, rather than the interpretation or evaluation the critic has made of that fact.) *Then let the critic respond, before you say anything else.* The purposes of buying time are (1) to allow you time to think when a criticism really hits home and threatens you, so that you can respond to the criticism rather than simply react defensively, and (2) to suggest to the critic that you are trying to hear what he or she is saying.

Criticism: You guys are stonewalling my requests for information.

Limited agreement: It's true that the cost projections you asked for last week still aren't ready.

DO NOT go on to justify or explain. A "Yes, but . . ." statement is not a time-buyer.

Could social media actually be contributing to loneliness? At a time when arguably more opportunities to connect with people exist than before, research suggests people in general are getting lonelier. In 1950, for instance, less than 10% of U.S. households had only one person, but that number increased to 27% by 2010. A study by the American Association of Retired Persons found 35% of adults older than 45 were chronically lonely, more than double the number a decade earlier. In Australia, where half the population uses Facebook, a study found that lonely people are inclined to spend more time on Facebook and that there is a significant correlation between Facebook use and narcissism. "Passive consumption" of Facebook, where people only scan others' walls, correlates to depression and feelings of disconnectedness, according to a Carnegie-Mellon University study. Though there is yet to be a definitive answer, the case of Yvette Vickers, a former Playboy playmate and actress, may offer insight. The 83-year-old was found mummified after nearly a year, still seated in front of her powered-up computer.

Source: Stephen Marche, "Is Facebook Making Us Lonely?" *The Atlantic*, May 2012, <http://www.theatlantic.com/magazine/archive/2012/05/is-facebook-making-us-lonely/8930/>.

Responding to Criticism

Constructive ways to respond to criticism and get closer to the real concern include paraphrasing, checking for feelings, checking inferences, and buying time with limited agreement.

You-Attitude in Conflict Resolution

You-attitude (◀◀ Module 6) means looking at things from the audience's point of view, respecting the audience, and protecting the audience's ego. The *you* statements that many people use when they're angry attack the audience; they do not illustrate you-attitude. Instead, substitute statements about your own feelings. In conflict, *I* statements show good you-attitude!

Lacks you-attitude: You never do your share of the work.

You-attitude: I feel that I'm doing more than my share of the work on this project.

Lacks you-attitude: Even you should be able to run the report through a spell checker.

You-attitude: I'm not willing to have my name on a report with so many spelling errors. I did lots of the writing, and I don't think I should have to do the proofreading and spell-checking, too.

Want to build a stronger team? Join Bayer, FedEx Ground, the Pittsburgh City Police, and other organizations that have turned to hip hop. In addition to learning team-building skills, the Hip-Hop On L.O.C.K. program brings businesspeople together to ply their artistic and creative skills and perform community service.

Source: Shawn Graham, "Forget Paintball; Hip Hop Is the Freshest Exercise in Team Building," *Fast Company*, <http://www.fastcompany.com/1780114/build-highly-functioning-teams-through-lyrics>.

Working with virtual teams requires special attention, as "digital nomads" may be out of the office most or all of the time. McKinsey Consulting expects the growth of video and web conferencing to top 20% in the next five years, so preparing to adapt makes sense. Boland T. Jones, chief executive of PGi, a virtual meetings company, suggests making video conferences a must, using engaging conferencing tools, using blog posts and texting, and employing Facebook and Twitter, especially for friending and status updates.

Source: Boland T. Jones, "Five Tips for Managing Digital Nomads," *Bloomberg Businessweek*, July 22, 2011, <http://www.businessweek.com/management/five-tips-for-managing-digital-nomads-07222011.html>.

How can we create the best co-authored documents? LO 18-5

- *Talk about your purposes and audience(s).*
- *Discuss drafts and revisions as a group.*

Whatever your career, it is likely that some of the documents you produce will be written with a group. Lisa Ede and Andrea Lunsford found that 87% of the 700 professionals in seven fields who responded to their survey sometimes wrote as members of a team or a group.¹³ Collaboration is often prompted by one of the following situations:

- The task is too big or the time is too short for one person to do all the work.
- No one person has all the knowledge required to do the task.
- A group representing different perspectives must reach a consensus.
- The stakes for the task are so high that the organization wants the best efforts of as many people as possible; no one person wants the sole responsibility for the success or failure of the document.

Collaborative writing can be done by two people or by a much larger group. The group can be democratic or run by a leader who makes decisions alone. The group may share or divide responsibility for each of the stages in the writing process (◀◀ p. 60).

Research in collaborative writing is beginning to tell us about the strategies that produce the best writing. Rebecca Burnett found that student groups that voiced disagreements as they analyzed, planned, and wrote a document produced significantly better documents than those that suppressed disagreement, going along with whatever was first proposed.¹⁴ A case study of two collaborative writing teams in a state agency found that the successful group distributed power equally, worked to soothe hurt feelings, and was careful to involve all group members. In terms of writing process, the successful group understood the task as a response to a rhetorical situation, planned revisions as a group, saw supervisors' comments as legitimate, and had a positive attitude toward revision.¹⁵

Ede and Lunsford's detailed case studies of collaborative teams in business, government, and science create an "emerging profile of effective collaborative writers": "They are flexible; respectful of others; attentive and analytical listeners; able to speak and write clearly and articulately; dependable and able to meet deadlines; able to designate and share responsibility, to lead and to follow; open to criticism but confident in their own abilities; ready to engage in creative conflict."¹⁶

Leading means more than being the boss. It means inspiring people to work together for solutions.

"If we can just get beyond this 'I'm the boss' mentality and concentrate on a simple 'What I say goes' outlook, I think this will all work out."

www.cartoonbank.com.

Planning the Work and the Document

Collaborative writing is most successful when the group articulates its understanding of the document's purposes and audiences and explicitly discusses the best way to achieve these rhetorical goals. Businesses schedule formal planning sessions for large projects to set up a time line specifying intermediate and final due dates, meeting dates, who will attend each meeting, and who will do what. Putting the plan in writing reduces misunderstandings during the project.

When you plan a collaborative writing project,

- Make your analysis of the problem, the audience, and your purposes explicit so you know where you agree and where you disagree.
- Plan the organization, format, and style of the document before anyone begins to write to make it easier to blend sections written by different authors.
- Consider your work styles and other commitments. A writer working alone can stay up all night to finish a single-authored document. But members of a group need to work together to accommodate each other's styles and to enable members to meet other commitments.
- Build some leeway into your deadlines. It's harder for a group to finish a document when one person's part is missing than it is for a single writer to finish the last section of a document on which he or she has done all the work.

Students creating health care apps at Florida Atlantic University presented a group business plan in lieu of a final exam. The students represented four academic disciplines—business, anthropology, engineering, and graphic arts—and combined their areas of expertise. One, Mark Anthony Burgarelli, used his anthropology knowledge to study his group's dynamics and is now working for an advertising agency doing market research.

Source: Nancy Dahlberg, "FAU Students Team Up to Develop Mobile Apps," *The Miami Herald*, July 15, 2012, <http://www.miamiherald.com/2012/07/15/2897006/fau-students-team-up-to-develop.html>.

Composing the Drafts

Most writers find that composing alone is faster than composing in a group. However, composing together may reduce revision time later, since the group examines every choice as it is made.

When you draft a collaborative writing project,

- Use word processing to make it easier to produce the many drafts necessary in a collaborative document.
- If the quality of writing is crucial, have the best writer(s) draft the document after everyone has gathered the necessary information.

Medical innovations and teamwork, even in the violent chaos of combat, are helping U.S. service people reach a survivability rate of 95% in Afghanistan if they get medical help quickly. That involves everyone from other soldiers and Marines to battlefield medics to air and ground vehicle crews to surgical teams at base hospitals working and communicating in concert to help the wounded. The rate is higher than in any previous war fought by the United States.

Source: Alan Cullison, "On Distant Battlefields, Survival Odds Rise Sharply," *The Wall Street Journal*, April 2, 2010, http://online.wsj.com/article/SB10001424052748704655004575114623837930294.html?mod=WSJ_hpp_RIGHTInDepthCarousel.

Revising the Document

Revising a collaborative document requires attention to content, organization, and style. The following guidelines can make the revision process more effective:

- Evaluate the content and discuss possible revisions as a group. Brainstorm ways to improve each section so the person doing the revisions has some guidance.
- Recognize that different people favor different writing styles. If the style satisfies the demands of standard English and the conventions of business writing, accept it even if you wouldn't say it that way.
- When the group is satisfied with the content of the document, one person—probably the best writer—should make any changes necessary to make the writing style consistent throughout.

Editing and Proofreading the Document

Because writers' mastery of standard English varies, a group document needs careful editing and proofreading.

- Have at least one person check the whole document for correctness in grammar, mechanics, and spelling and for consistency in the way that format elements, names, and numbers are handled.
- Run the document through a spell-checker if possible.
- Even if you use a computerized spell-checker, at least one human being should proofread the document too.

Making the Group Process Work

When you create a coauthored document,

- Give yourselves plenty of time to discuss problems and find solutions. Purdue students who are writing group reports spend six to seven hours a week outside class in group meetings—not counting the time they spend gathering information and writing their drafts.¹⁷
- Take the time to get to know group members and to build group loyalty. Group members will work harder and the final document will be better if the group is important to members.
- Be a responsible group member. Attend all the meetings; carry out your responsibilities.
- Be aware that people have different ways of experiencing reality and of expressing themselves.
- Because talking is “looser” than writing, people in a group can think they agree when they don’t. Don’t assume that because the discussion went smoothly, a draft written by one person will necessarily be acceptable.

Summary of Learning Objectives

- Effective groups balance informational leadership, interpersonal leadership, and procedural leadership. (**LO 18-1**)
- A case study of six student groups completing class projects found that students in successful groups had leaders who set clear deadlines, scheduled frequent meetings, and dealt directly with conflict that emerged in the group; and had an inclusive decision-making style, and a higher proportion of members who worked actively on the project. (**LO 18-2**)
- Students who spent the most time meeting with their groups got the highest grades. (**LO 18-2**)
- **Groupthink** is the tendency for groups to put such a high premium on agreement that they directly or indirectly punish dissent. The best correctives to groupthink are to consciously search for additional alternatives, to test one’s assumptions against those of a range of other people, and to protect the right of people in a group to disagree. (**LO 18-2**)
- To lead without being arrogant and get your group started on track, remember to smile, share, suggest, think, volunteer, and ask. (**LO 18-3**)
- To resolve conflicts, first make sure that the people involved really disagree. Next, check to see that everyone’s information is correct. Discover the needs each person is trying to meet. The **presenting problem** that surfaces as the subject of dissension may or may not be the real problem. Search for alternatives. (**LO 18-4**)
- Constructive ways to respond to criticism include paraphrasing, checking for feelings, checking inferences, and buying time with limited agreement. (**LO 18-4**)
- Use statements about the speaker’s feelings to own the problem and avoid attacking the audience. In conflict, *I* statements are good you-attitude! (**LO 18-4**)
- **Collaborative writing** means working with other writers to produce a single document. Writers producing a joint document need to pay attention not only to the basic steps in the writing process but also to the processes of group formation and conflict resolution. (**LO 18-5**)

Assignments for Module 18

Questions for Comprehension

- 18.1** What are the three kinds of group leadership? (**LO 18-1**)
18.2 What is groupthink? (**LO 18-2**)
18.3 How do you use you-attitude during conflict? (**LO 18-4**)

- 18.4** What strategies produce the best coauthored documents? (**LO 18-5**)

Questions for Critical Thinking

- 18.5** Why are so many people so afraid of conflict in groups? What can a group do to avoid groupthink? (**LO 18-1, LO 18-2**)
18.6 Why is it better for groups to deal with conflicts, rather than just trying to ignore them? (**LO 18-1, LO 18-2**)

- 18.7** What is the most successful group or team you’ve been part of? What made it effective? (**LO 18-1 to LO 18-5**)

Exercises and Problems

18.8 Keeping a Journal about a Group (LO 18-1 to LO 18-5)

As you work in a collaborative writing group, keep a journal after each group meeting.

- What happened?
- What roles did you play in the meeting?
- What conflicts arose? How were they handled?
- What strategies could you use to make the next meeting go smoothly?
- Record one observation about each group member.

In 18.9 through 18.13, assume that your group has been asked to recommend a solution.

18.9 Recommending Whether to Keep the Skybox (LO 18-1 to LO 18-5)

Assume that your small group comprises the executive committee of a large company that has a luxury football skybox. (Depending on the stadium, a skybox for a professional football team may cost as little as \$100,000 a year or 10 times that much. A portion—perhaps up to 30%—of the cost may be deductible as a business expense.) The CEO says, “Times are tight. We need to reevaluate whether we should retain the skybox.”

As Your Instructor Directs,

- a. Send e-mail messages to group members laying out your initial point of view on the issue and discussing the various options.
- b. Meet as a group to come to a consensus.
- c. As a group, answer the message.
- d. Write a memo to your instructor telling how satisfied you are with
 1. The decision your group reached.
 2. The process you used to reach it.
- e. Write a memo describing your group’s dynamics (18.15).

18.10 Recommending a Policy on Student Entrepreneurs (LO 18-1 to LO 18-5)

Assume that your small group comprises the officers in student government on your campus. You receive this e-mail from the dean of students:

Write a group response recommending whether to keep the skybox and supporting your recommendation.

Hints:

- Agree on a company to use for this problem.
- Does having a skybox match the values in the company’s mission statement? If you keep the skybox, who should have priority in using it?
- How is the company doing financially? Is it laying off workers?

Write a group report recommending what (if anything) your campus should do for student entrepreneurs and supporting your recommendation.

As you know, campus policy says that no student may use campus resources to conduct business-related activities. Students can’t use college e-mail addresses for business. They can’t post business web pages on the college server.

On the other hand, a survey conducted by the Kauffman Center for Entrepreneurial Leadership showed that 7 out of 10 teens want to become entrepreneurs.

Should campus policy be changed to allow students to use college e-mail addresses for business? (And then what happens when our network can’t carry the increased e-mail traffic?) Please recommend what support (if any) should be given to student entrepreneurs.

Hints:

- Does your campus offer other support for entrepreneurs (courses, a business plan competition, a start-up incubator)? What should be added or expanded?

- Is it realistic to ask alumni for money to fund student start-ups?
- Are campus e-mail, phone, and delivery services funded by tax dollars? If your school is a public institution, do state or local laws limit business use?

18.11 Answering an Ethics Question (LO 18-1 to LO 18-5)

Assume that your small group comprises your organization’s ethics committee. You receive the following anonymous note:

Determine the best solution to the problem. Then write a message to all employees stating your decision and building support for it.

People are routinely using the company letterhead to write letters to members of Congress, senators, and even the president stating their positions on various issues. Making their opinions known is of course their right, but doing so on letterhead stationery implies that they are speaking for the company, which they are not.

I think that the use of letterhead for anything other than official company business should be prohibited.

18.12 Responding to an Employee Grievance (LO 18-1 to LO 18-5)

Assume that your small group comprises the labor-management committee at the headquarters of a chain of grocery stores. This e-mail arrives from the vice president for human resources:

Write a group response recommending whether to change the policy and supporting your recommendation.

As you know, company policy requires that employees smile at customers and make eye contact with them. In the past nine months, 12 employees have filed grievances over this rule. They say they are being harassed by customers who think they are flirting with them. A produce clerk claims customers have propositioned her and followed her to her car. Another says "Let me decide who I am going to say hello to with a big smile." The union wants us to change the policy to let workers not make eye contact with customers, and to allow workers to refuse to carry groceries to a customer's car at night. My own feeling is that we want to maintain our image as a friendly store that cares about customers, but that we also don't want to require behavior that leads to harassment. Let's find a creative solution.

18.13 Answering an Inquiry about Photos (LO 18-1 to LO 18-5)

You've just been named vice president for diversity, the first person in your organization to hold this position.

Today, you receive this memo from Sheila Lathan, who edits the employee newsletter.

Subject: Photos in the Employee Newsletter

Please tell me what to do about photos in the monthly employee newsletter. I'm concerned that almost no single issue represents the diversity of employees we have here.

As you know, our layout allows two visuals each month. One of those is always the employee of the month (EM). In the last year, most of those have been male and all but two have been white. What makes it worse is that people want photos that make them look good. You may remember that Ron Olmos was the EM two months ago; in the photo he wanted me to use, you can't tell that he's in a wheelchair. Often the EM is the only photo; the other visual is often a graph of sales or something relating to quality.

Even if the second visual is another photo, it may not look balanced in terms of gender and race. After all, 62% of our employees are men and 78% are white. Should the pictures try to represent those percentages? The leadership positions (both in management and in the union) are even more heavily male and white. Should we run pictures of people doing important things, and risk continuing the imbalance?

I guess I could use more visuals, but then there wouldn't be room for as many stories—and people really like to see their names in print. Plus, giving people information about company activities and sales is important to maintaining goodwill. A bigger newsletter would be one way to have more visuals and keep the content, but with the cost-cutting measures we're under, that doesn't look likely.

What should I do?

As Your Instructor Directs,

- Work in a small group with other students to come up with a recommendation for Sheila.
- Write a memo responding to her.

- Write an article for the employee newsletter about the photo policy you recommend and how it relates to the company's concern for diversity.

18.14 Creating Brochures (LO 18-1 to LO 18-5)

In a collaborative group, create a series of brochures for an organization and present your design and copy to the class in a group oral presentation. Your brochures should work well as a series but also be capable of standing alone if a reader picks up just one. They should share a common visual design and be appropriate for your purposes and audience. You may use sketches rather than photos or finished drawings. Text, however, should be as it will appear in the final copy.

As you prepare your series, talk to a knowledgeable person in the organization. For this assignment, as long as the

person is knowledgeable, he or she does not have to have the power to approve the brochures.

In a manila folder, turn in

- Two copies of each brochure.
- A copy of your approved proposal (►► Module 21).
- A narrative explaining (a) how you responded to the wishes of the person in the organization who was your contact and (b) five of the choices you made in terms of content, visuals, and design and why you made these choices.

18.15 Analyzing the Dynamics of a Group (LO 18-1 to LO 18-5)

Analyze the dynamics of a task group of which you are a member. Answer the following questions:

1. Who was the group's leader? How did the leader emerge? Were there any changes in or challenges to the original leader?
2. Describe the contribution each member made to the group, and the roles each person played.
3. Did any members of the group officially or unofficially drop out? Did anyone join after the group had begun working? How did you deal with the loss or addition of a group member, both in terms of getting the work done and in terms of helping people work together?

As you answer the questions,

- Be honest. You won't lose points for reporting that your group had problems or did something "wrong."
- Show your knowledge of good group dynamics. That is, if your group did something wrong, show that you know what *should* have been done. Similarly, if your group worked well, show that you know *why* it worked well.
- Be specific. Give examples or anecdotes to support your claims.

4. What planning did your group do at the start of the project? Did you stick to the plan or revise it? How did the group decide that revision was necessary?
5. How did your group make decisions? Did you vote? Reach decisions by consensus?
6. What problems or conflicts arose? Did the group deal with them openly? To what extent did they interfere with the group's task?
7. Evaluate your group both in terms of its task and in terms of the satisfaction members felt. How did this group compare with other task groups you've been part of? What made it better or worse?

As Your Instructor Directs,

- a. Discuss these questions with the other group members.
- b. Present your findings orally to the class.
- c. Present your findings in an individual memo to your instructor.
- d. Join with the other group members to write a collaborative memo to your instructor.

Polishing Your Prose

Delivering Criticism

None of us likes to be told that our work isn't good. But criticism is necessary if people and documents are to improve.

Depending on the situation, you may be able to use one of these strategies:

1. Notice what's good as well as what needs work.

The charts are great. We need to make the text as good as they are.

I really like the builds you've used in the slides. We need to edit the bullet points so they're parallel.

2. Ask questions.

Were you able to find any books and articles, in addition to sources on the Internet?

What do you see as the most important revisions to make for the next draft?

3. Refer to the textbook or another authority.

The module on design says that italic type is hard to read. Our instructor told us that presentations should have just three main points.

4. Make statements about your own reaction.

I'm not sure what you're getting at in this section. I wouldn't be convinced by the arguments here.

5. Criticize what's wrong, without making global attacks on the whole document or on the writer as a person.

There are a lot of typos in this draft.

You begin almost every sentence with *um*.

Exercises

Rewrite each criticism to make it less hurtful. You may add or omit information as needed.

1. Reading your report reminds me of when I was a kid and my older brother used to spin me around and around and around. I have that same disoriented feeling and sickness in my stomach right now.
2. I will say that after looking over your job application, I had a religious awakening. The fact that anyone ever hired you before makes me believe in miracles.
3. This isn't writing. It's typing.
4. My mother always told me to find at least one good thing to say about someone. Well, I like the font you used.
5. It's a testament to courage and indomitable spirit that a writer with your obvious challenges with the English language has managed to make it this far. Bravo, Shakespeare.
6. Let's look at it this way: If you were in my place, how could you, in good conscience, even consider letting someone with your obvious deficiencies in addition and subtraction have anything to do with writing a financial report?
7. Your writing is a case study on the failure of the modern education system. I'm surprised you got the staple in the right place.
8. Go back to sleep. We'll wake you up if we think there's anything useful you can contribute.
9. I would have to fix about half the spelling and grammar mistakes in this memo just to classify it as awful.
10. I've seen better use of syntax on a bathroom wall.

Check your answers to the odd-numbered exercises at the back of the book.

Module

19 Planning, Conducting, and Recording Meetings

LEARNING OBJECTIVES

The concepts in Module 19 can help make your meetings the most productive. After completing the module, you should be able to

- | | |
|---|---|
| LO 19-1 Apply strategies for good meeting plans. | LO 19-5 Explain techniques for effective meeting participation. |
| LO 19-2 Apply strategies for productive meetings. | LO 19-6 Select items for inclusion in meeting minutes. |
| LO 19-3 Apply strategies for good meeting decisions. | LO 19-7 Compose scripts for informal meetings with bosses. |
| LO 19-4 Apply strategies for business networking. | LO 19-8 Compare and contrast techniques for virtual meetings versus face-to-face ones. |

Meetings have always taken a large part of the average manager's week. The increased number of teams means that meetings are even more frequent.

Meetings can be highly engaging and productive—or they can make people wish they were somewhere else. A Microsoft survey found that employees globally are in meetings 5.6 hours a week; however, 69% of those employees think meetings are a waste of time.¹ Effectively planning and conducting meetings requires more than simply scheduling them and showing up. In the fast-paced 21st century, most employees have great demands on their time. They expect meetings to reflect that reality. Of course, there is a benefit to social interaction, too, but meetings must serve a greater purpose than just getting people together.

The first order of business is always to determine if a meeting is even necessary. Are there more efficient ways to communicate? Would an e-mail message suffice? If a meeting is necessary, consider options. Face-to-face meetings are still the norm, but increasingly, people are turning to online opportunities, using services like Skype and gotomeeting.com. They can hold telephone conferences. Even instant messaging allows people to “meet.”

Business, nonprofit, and government organizations hold several types of meetings.

- **Parliamentary meetings** are run under strict rules, like the rules of parliamentary procedure summarized in *Robert's Rules of Order*. Parliamentary meetings are often used by boards of directors and by legislative bodies such as the U.S. Congress and Senate, but they are rarely part of the day-to-day meetings common in most businesses and nonprofit organizations.
- **Regular staff meetings** are held to announce new policies and products, answer questions, share ideas, and motivate workers. For example, Microsoft Exchange Group's development team meets every morning to review daily software builds and to identify any issues that have come up in the last 24 hours. On Fridays, about 50 Google employees meet for a fast-paced hour to discuss ways to make Google searches better and choose which new ideas to take to the next level of development.² A financial services company holds quarterly town hall meetings for all employees, complete with staging, professional-quality videos, and question-and-answer sessions with the executive team.³
- **Team meetings** bring together team members to brainstorm, solve problems, and create documents. Meetings may be called on short notice when a problem arises that needs input from several people.
- **One-on-one meetings** are not always thought of as meetings, but they are perhaps the most common meetings of all. Employees talk by the water cooler or the refrigerator or ride up an elevator together. One person walks into another's office or cubicle to ask a question. A supervisor stops by a line worker to see how things are going and to "manage by walking around." These highly informal meetings can be crucial to your being seen as promotable.

Other kinds of meetings also are held. Many companies hold sales meetings for their sales staff. Conventions bring together workers in the same field from many different employers. Retreats allow a small group to get away for team building, brainstorming, or long-range planning.

Any of these meetings may be supported with computers. Allstate and McKinsey & Co. are among the organizations that key in comments on a computer hooked up to a large overhead projector for all the participants to see: "People literally see themselves being heard. Related comments are identified, linked, and edited on screen. The digressions and tangents quickly become apparent." The resulting document can be posted on the company intranet for further discussion and comments.⁴

Other organizations use group support software. Each person sits at a workstation. Participants key in their own brainstorming ideas and comments. People can vote by ranking items on a 1-to-10 scale; the software calculates the averages.⁵

Speakerphones and conference calls allow people in different locations to participate in the same conversation. Online meetings, such as those hosted by WebEx (www.webex.com), allow you to bring together five other participants for a simultaneous e-mail conversation in your own private chat room. Some computer systems support video as well as data or audio transmissions. Videoconferences provide high-quality video and audio transmissions.

The length and purposes of the meeting, the number of people who attend, the budget, and the available technology all affect outcomes. However, a number of principles apply to almost all meetings.

Give crayons and construction paper to employees for quiet reflection? Let negative speakers be subject to squirt gun retaliation from colleagues around the table? Todd Barr recommends swapping laptops for tablet PCs and using Penultimate tablet software in place of the whiteboard. Apps like IdeaFlight can also help. These may seem unusual actions, but they are among creative ways managers are making business meetings more participatory and less tedious.

www.parlipro.org/
to learn how to use
parliamentary procedures.

What planning should precede a meeting? LO 19-1

- Identify the purpose(s) and create an agenda.

Meetings can have at least six purposes:

- To share information.
- To brainstorm ideas.

Site to See

Go to

www.businessballs.com/meetings.htm

See advice on how to run better meetings, as well as links to resources.

- To evaluate ideas.
- To make decisions.
- To create a document.
- To motivate members.

When meetings combine two or more purposes, it's useful to make the purposes explicit.

For example, in the meeting of a university senate or a company's board of directors, some items are presented for information. Discussion is possible, but the group will not be asked to make a decision. Other items are presented for action; the group will be asked to vote. A business meeting might specify that the first half hour will be time for brainstorming, with the second half hour devoted to evaluation.

Intel's agendas also specify *how* decisions will be made. The company recognizes four different decision-making processes:

- Authoritative (the leader makes the decision alone).
- Consultative (the leader hears group comments, but then makes the decision alone).
- Voting (the majority wins).
- Consensus (discussion continues until everyone can "buy into" the decision).⁶

Specifying how input will be used makes expectations clear and focuses the conversation.

Once you've identified your purposes, think about how you can make them happen. Perhaps participants will need to receive and read materials before the meeting. Perhaps people should bring drafts to the meeting so that creating a document can go more quickly.

For team meetings called on short notice, the first item of business is to create an agenda. This kind of agenda can be informal, simply listing the topics or goals.

For meetings with more lead time, distribute an agenda several days before the meeting. (*Agenda* is Latin for "to be done.") If possible, give participants a chance to comment and revise the agenda in response to those comments. A good agenda indicates

- The time and place of the meeting.
- Whether each item is presented for information, for discussion, or for a decision.
- Who is sponsoring or introducing each item.
- How much time is allotted for each item.

See Figure 19.1 for an example.

Many groups put first routine items on which agreement will be easy. Schedule controversial items early in the meeting, when people's energy level is high, and to allow enough time for full discussion. Giving a controversial item only half an hour at the end of the day or evening makes people suspect that the leaders are trying to manipulate them.

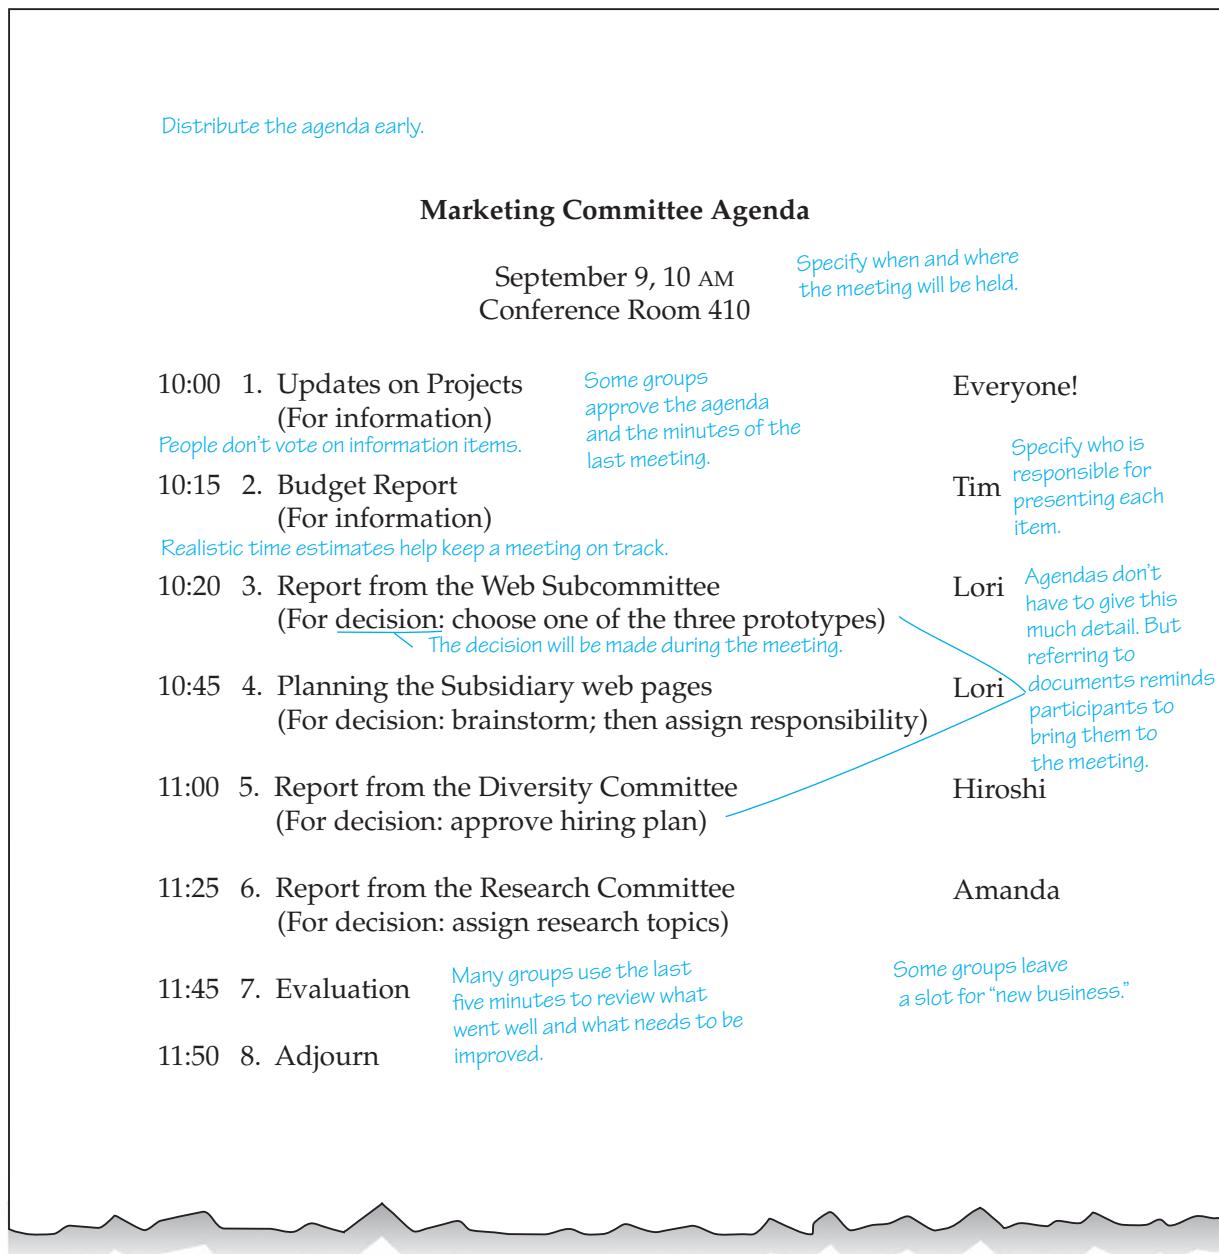

One study of CEOs finds that they work an average of 55 hours a week and spend 18 of those hours in meetings. Robert Cowen, CEO of Lionbridge Technologies, Inc., says he is constantly communicating with staff and clients, though rarely more than 15 minutes at a time. "I don't know when I'm not in a meeting," Cowen says.

Source: Rachel Emma Silverman, "Where's the Boss? Trapped in a Meeting," *The Wall Street Journal*, February 14, 2012, <http://online.wsj.com/article/SB10001424052970204642604577215013504567548.html>.

To make meetings more fun, the Burrell Communications Group uses giant blue, red, and yellow "relaxation balls" instead of chairs.

Figure 19.1 Sample Meeting Agenda

If you're planning a long meeting, for example, a training session or a conference, recognize that networking is part of the value of the meeting. Allow short breaks at least every two hours and generous breaks twice a day so participants can talk informally to each other. If participants will be strangers, include some social functions so they can get to know each other. If they will have different interests or different levels of knowledge, plan concurrent sessions on different topics or for people with different levels of expertise.

Allow for creativity and fun. Each Best Buy store chooses its own way to start monthly staff meetings. The Best Buy in Boca Raton, Florida, opens each 7:30 AM meeting with a talent show.⁷

To help keep meeting-goers on track, consultant Samir Penkar brings chocolates. Whenever someone starts rambling, he hands them one, in one case repeating the process six times until the offending employees learned to stick to the agenda. Corporate trainer Dana Brownlee puts an Elmo doll on the conference table during meetings. "Anytime anybody in the session thinks we're getting off track, pick up the Elmo doll," she advises. That way, people can express frustration without actually interrupting speakers.

Source: Sue Shellenbarger, "Meet the Meeting Killers," *The Wall Street Journal*, May 15, 2012, <http://online.wsj.com/article/SB10001424052702304192704577404434001058726.html>.

You may want to leave five minutes at the end of the meeting to evaluate it. What went well? What could be better? What do you want to change next time?

When I'm in charge, how do I keep the meeting on track? LO 19-2

- *Pay attention both to task and to process.*

Your goal as chair is to help participants deal with the issues in a way that is both timely and adequately thorough.

- If many people are new to the group, make the ground rules explicit. Possible team ground rules were presented in Figure 18.1 (◀◀ p. 298). Ground rules for a larger meeting might cover whether it is acceptable to check e-mail during the meeting and whether people must stay for the whole meeting or can drop in and out.
- Introduce the person who introduces each issue, recognize people who want to speak, and remind the group of its progress: "We're a bit behind schedule. Let's try to get through the committee reports quickly."
- Be prepared to summarize issues to shape the discussion when the issues are complex or when members have major disagreements: "We're really talking about two things: whether the change would save money and whether our customers would like it. Does it make sense to keep those two together, or could we talk about customer reaction first, and then deal with the financial issues?"
- If the issue is contentious, ask that speakers for and against a recommendation alternate. If no one remains on one side, then the discussion can stop.
- Pay attention to people and process as well as to task. In small groups, invite everyone to participate.
- If conflict seems to be getting out of hand, focus on ways the group could deal with conflict (◀◀ Module 18) before getting back to the substantive issues.
- If the group doesn't formally vote, summarize the group's consensus after each point so that everyone knows what decision has been made and who is responsible for implementing or following up on each item.

What decision-making strategies work well in meetings? LO 19-3

- *Try the standard agenda or dot planning.*

Probably the least effective decision-making strategy is to let the person who talks first, last, loudest, or most determine the decision. Voting is quick but may leave people in the minority unhappy with and uncommitted to the majority's plan. Coming to consensus takes time but results in speedier implementation of ideas. Two strategies that are often useful in organizational groups are the standard agenda and dot planning.

The **standard agenda** is a seven-step process for solving problems.

1. Understand what the group has to deliver, in what form, by what due date. Identify available resources.
2. Identify the problem. What exactly is wrong? What question(s) is the group trying to answer?
3. Gather information, share it with all group members, and examine it critically.
4. Establish criteria. What would the ideal solution include? Which elements of that solution would be part of a less-than-ideal but still acceptable solution? What legal, financial, moral, or other limitations might keep a solution from being implemented?

Instant Replay

Agenda

A good agenda indicates

- The time and place of the meeting.
- Whether each item is presented for information, for discussion, or for a decision.
- Who is sponsoring or introducing each item.
- How much time is allotted for each item.

Networking LO 19-4

Getting to know people within and beyond your own organization helps you build a network of contacts, colleagues, and friends.

In your own organization, reach out to people. Within a professional context, get to know people socially by going to lunch or joining in on company-sponsored events. Commit to meeting at least one new person a week—more if you’re in a large organization. Seek out people within your area or department as well as those outside it.

Join community organizations. If your company is active in charitable or community events, volunteer. Take a course at a local college or community center. Remember, too, trade and service organizations related to your field. Organizations such as the Society for Technical Communication and the American Marketing Association hold meetings and sponsor conferences where professionals can meet.

Remember that the purpose of networking is both social and professional; therefore, have fun, but treat networking as a work-related task.

Purdue University gives tips for networking in both small and large group settings:

- **Be prepared.** Define what you need and what you are trying to accomplish by networking.
- **Be targeted.** Identify potential prospects: family members, friends, faculty, neighbors, classmates, alumni, bosses, co-workers, and community associates.
- **Be professional.** Ask your prospects for advice—not for a job. Start off the encounter with a handshake, eye contact, and a smile.
- **Be patient.** Stay politely persistent with your leads and build momentum.
- **Be focused on quality—not quantity.** In a large group setting, circulate and meet people, but don’t try to talk to

everyone. It’s better to have a few meaningful conversations than 50 hasty introductions.

- **Be referral-centered.** Expand your network by obtaining additional referrals each time you meet someone new.
- **Be proactive.** Stay organized and track your networking meetings.
- **Be dedicated to networking.** Make networking part of your long-term career plan.

If you’re too busy to network, Keith Ferrazzi recommends focusing on meeting people during things you already do, including mundane tasks like taking the car in for maintenance or going to the dentist.

The Internet also provides excellent opportunities to network through e-mail and listservs. To find the appropriate listserv, visit www.lsoft.com/catalist.html. As this book goes to press, that site links 50,742 public listservs on the web. Search engines like Yahoo! and Google also feature business-related groups, as does Facebook, MySpace, and LinkedIn. For more on social networking sites, [◀◀] Module 13.

Even large organizations are getting involved with networking through the Internet. *BusinessWeek* noted that Procter & Gamble, for instance, now gets 35% of new products from outside the company by tapping into external scientific networks on the web. Toymaker LEGO showed a new locomotive kit to only 250 people, but their “word of mouse” helped 10,000 units sell out in 10 days. It was the only marketing for the kit the company did.

Denham.), downloaded at <http://purdueplacementmanual.com/jobsearch/jobsearch-01.html>, July 25, 2005; Keith Ferrazzi, “No Time to Network” (Resource Center), *Fast Company*, downloaded at www.fastcompany.com/resources/networking/ferrazzi/071305.html, July 27, 2005; L-Soft, www.lsoft.com/catalist.html, July 20, 2005; and “The Cooperative Corporation,” *BusinessWeek*, June 20, 2005.

5. Generate alternate solutions. Brainstorm and record ideas for the next step.
6. Measure the alternatives against the criteria.
7. Choose the best solution.⁸

Dot planning offers a way for large groups to choose priorities quickly. First, the group brainstorms ideas, recording each on pages that are put on the wall. Then each individual gets two strips of three to five adhesive dots in different colors. One color represents high priority, the other lower priority. People then walk up to the pages and affix dots by the points they care most about. Some groups allow only one dot from one person on any one item; others allow someone who is really passionate about an idea to put all of his or her dots on it. As Figure 19.2 shows, the dots make it easy to see which items the group believes are most important.

	Site to See
Go to http://www.gotomeeting.com for GoToMeeting's web conferencing services.	

City Year, a national youth service organization, opens meetings with a show of hands. Conversations stop, all is quiet, and group members are engaged in a common action. Participants end each meeting by reaching their hands into the center to form a circle. Larger groups raise their hands high. This break marks the close of the meeting and unifies the group.

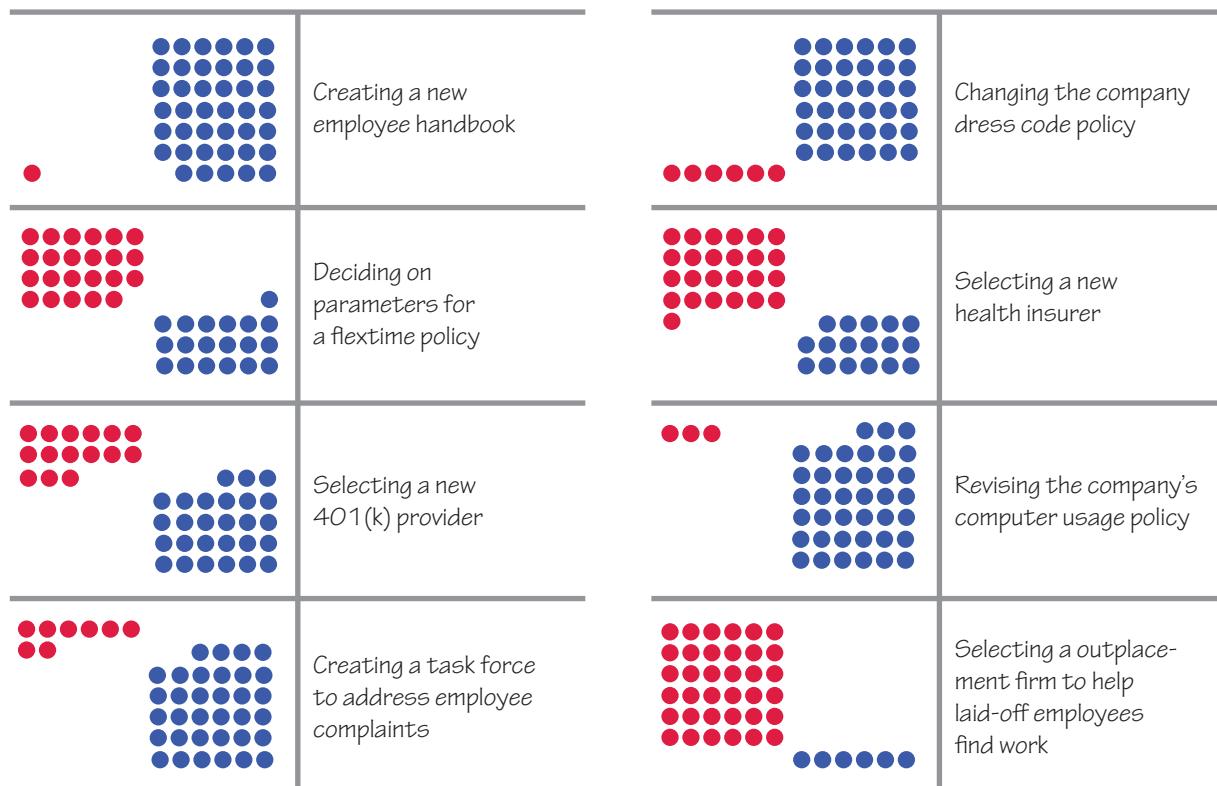

How can I be an effective meeting participant? LO 19-5

► Be prepared.

Take the time to prepare for meetings. Read the materials distributed before the meeting and think about the issues to be discussed. Bring those materials to the meeting, along with something to write on, and with, even if you're not the secretary.

Figure 19.2 Dot Planning Allows Groups to Set Priorities Quickly

The list below is a set of goals for a company's human resources department to tackle in the coming year. Here, red dots mean "high priority" and blue dots mean "low priority." The dot planning chart will help the HR department decide what to tackle first. One can see at a glance which items have widespread support and which are low priority.

In a small meeting, you'll probably get several chances to speak. Roger Mostwick and Robert Nelson found that the most influential people in a meeting are those who say something in the first five minutes of the meeting (even just to ask a question), who talk most often, and who talk at greatest length.⁹

In a large meeting, you may get just one chance to speak. Make notes of what you want to say so you can be succinct, fluent, and complete.

It's frustrating to speak in a meeting and have people ignore what you say. Here are some tips for being taken seriously.¹⁰

- Show that you've done your homework. Laura Sloate, who is blind, establishes authority by making sure her first question is highly technical: "In footnote three of the 10K, you indicate. . . ."
- Link your comment to the comment of a powerful person. Even if logic suffers a bit, present your comment as an addition, not a challenge. For example, say, "John is saying that we should focus on excellence, AND I think we can become stronger by encouraging diversity."
- Find an ally in the organization and agree ahead of time to acknowledge each other's contributions to the meeting, whether you agree or disagree with the point being made. Explicit disagreement signals that the comment is worth taking seriously: "Duane has pointed out . . . , but I think that. . . ."

Staying focused in meetings requires discipline, but some meetings can challenge anyone. Regular planning meetings at a nonprofit lasted as long as six hours, giving one participant the opportunity to knit an entire sweater.

Source: Claire Suddath, "M&Ms and Dirty Doodles: How to Survive a Boring Meeting," *Bloomberg Businessweek*, June 22, 2012, <http://www.businessweek.com/articles/2012-06-22/m-and-ms-and-dirty-doodles-how-to-survive-a-boring-meeting>.

What should go in meeting minutes? LO 19-6

- *Topics discussed, decisions reached, and who does what next.*

Meeting expert Michael Begeman suggests recording three kinds of information:

- Decisions reached.
- Action items, where someone needs to implement or follow up on something.
- Open issues—issues raised but not resolved.¹¹

Minutes of formal meetings indicate who was present and absent and the wording of motions and amendments as well as the vote. Committee reports are often attached for later reference. For less-formal meetings, brief minutes are fine. The most important notes are the decisions and assignments. Long minutes will be most helpful if assignments are set off visually from the narrative.

Site to See

Go to

www.federalreserve.gov/news-events/press/monetary/2012monetary.htm

The Federal Open Market Committee posts its minutes on the web.

We discussed whether we should switch from road to rail shipment.

Action: Sue will get figures on cost for the next meeting.

Action: Tyrone will survey current customers online to ask their opinions.

How can I use informal meetings with my boss to advance my career? LO 19-7

- *Plan scripts to present yourself positively.*

You'll see your supervisor several times a week. Some of these meetings will be accidental: you'll meet by the coffeepot or ride up the elevator together. Some of them will be deliberately initiated: your boss will stop by your workstation, or you'll go to your boss's office to ask for something.

Instant Replay

Decision-Making Strategies

The standard agenda is a seven-step process for solving problems.

Dot planning offers a way for large groups to choose priorities quickly.

Virtual meetings require special consideration. Ordinary noise—such as a phone ringing—can be an even greater distraction, and photos and images on a background wall can take attention away from the speaker. Think about clothing, too. Polycom vice president Gary Testa was on a video call with a consultant when the consultant stood up to answer a knock at the door. Out of his office and thinking himself mostly out of view, the consultant was wearing a dress shirt and tie but no pants.

Source: Sue Shellenbarger, "Pants Required: Attending Meetings When Working from Home," *The Wall Street Journal*, May 16, 2012, <http://blogs.wsj.com/atwork/2012/05/16/pants-required-attending-meetings-when-working-from-home/>.

Investor Bill Lee, who held 200 meetings at the St. Regis Hotel in San Francisco in 2011, had trouble coordinating with meeting-goers who were late. So, he helped create Twist, a smartphone app that tracks meeting-goers and texts them if someone is running behind. The app also creates a map showing their location.

Source: Ashley Vance, "How to Run Late for a Meeting in Style," *Bloomberg Businessweek*, July 18, 2012, <http://www.businessweek.com/articles/2012-07-18/how-to-run-late-for-a-meeting-in-style>.

You can take advantage of these meetings by planning for them. These informal meetings are often short. An elevator ride, for example, may last about three minutes. So plan 90-second scripts that you can use to give your boss a brief report on what you're doing, ask for something you need, or lay the groundwork for an important issue.

Planning scripts is especially important if your boss doesn't give you much feedback or mentoring. In this case, your boss probably doesn't see you as promotable. You need to take the initiative. Make statements that show the boss you're thinking about ways to work smarter. Show that you're interested in learning more so that you can be even more valuable to the organization.

Do virtual meetings require special consideration? LO 19-8

- Yes. Watch interpersonal communication.
- For important projects, build in some face-to-face meetings as well.

When you meet electronically rather than in person, you lose the informal interactions of going to lunch or chatting during a break. Those interactions not only create bonds, so that people are more willing to work together, but also give people a chance to work out dozens of small issues. Listening (◀◀ Module 17), teamwork, and the ability to resolve conflicts constructively (◀◀ Module 18) become even more crucial.

Meetings are more effective when they stay on track and encourage participation.

© Mike Baldwin / Cornered

"But before we move on, allow me to belabor the point even further..."

Reprinted with permission of CartoonStock.com, www.cartoonstock.com.

Be aware of the limitations of your channel. When you are limited to e-mail, you lose both tone of voice and body language. In addition, e-mail messages are often more brusque than comments in person (◀◀ Module 13). Audio messages provide tone of voice but not the nonverbal signals that tell you whether someone wants to make a comment or understands what you're saying. Even videoconferencing gives you only the picture in the camera's lens. With any of these technologies, you'll need to attend specifically to interpersonal skills.

Technical communicator Aimee Kratts recommends the following tips for making an international teleconference run smoothly:

- Distribute the agenda and other materials well in advance. The call may take place in the middle of the night in some countries. Participants at home may not have printers or even computers and may not be able to receive last-minute documents.
- Encourage speakers to use standard English with as little slang as possible. If you think participants have misunderstood each other, try to clarify.
- Ask for questions periodically.
- Ask for contributions from people who haven't spoken.
- Listen for disagreements. "I hear Raul saying X and Bertine saying Y. Is that right?"
- Encourage offline discussions on e-mail to follow up on topics.
- Call participants individually the next day to take the emotional temperature.
- Take and distribute written minutes.¹²

Since 2009, companies like Nutrisystem, Symantec, and Herman Miller have held at least one annual "e-meeting" for shareholders. Symantec eventually returned to physical meetings because, as board member Robert Miller put it, "some investors preferred to look members in the eye." The savings, however, can be great. Furniture maker Herman Miller saw the cost drop from a high of \$15,000 to just \$3,000 for its annual meeting.

Source: Joann S. Lublin, "Online Annual Meetings Begin to Click," *The Wall Street Journal*, November 14, 2011, <http://online.wsj.com/article/SB10001424052970203537304577032313764922458.html>.

Summary of Learning Objectives

- A good agenda indicates (**LO 19-1**)
 - The time and place of the meeting.
 - Whether each item is presented for information, for discussion, or for a decision.
 - Who is sponsoring or introducing each item.
 - How much time is allotted for each item.
- To make meetings more effective, (**LO 19-2**)
 - State the purpose of the meeting at the beginning.
 - Distribute an agenda that indicates whether each item is for information, for discussion, or for a decision, and how long each is expected to take.
 - Allow enough time to discuss controversial issues.
 - Pay attention to people and process as well as to the task at hand.
- If you don't take formal votes, summarize the group's consensus after each point. At the end of the meeting, summarize all decisions and remind the group who is responsible for implementing or following up on each item. (**LO 19-2**)
- The **standard agenda** is a seven-step process for solving problems. In **dot planning**, the group brainstorms ideas. Then each individual affixes adhesive dots by the points or proposals he or she cares most about. (**LO 19-3**)
- Treat networking as a work-related task, and seek people out in your organization and beyond. You can meet people in person or virtually through e-mail and the web, including with social networking sites like Facebook and LinkedIn. (**LO 19-4**)
- Take time to prepare for meetings. To be taken seriously, show you've done your homework, link your comment to the comment of a powerful person, and find an ally. (**LO 19-5**)
- Minutes should record (**LO 19-6**)
 - Decisions reached.
 - Action items, where someone needs to implement or follow up on something.
 - Open issues—issues raised but not resolved.
- Plan 90-second scripts so that if you have a chance for an informal meeting with your boss, you can make the most of the time. (**LO 19-7**)
- While they can be productive, electronic meetings can lack the informal interactions that create bonds and give people the chance to work out small issues. Be aware of limitations of channels, such as losing tone of voice and body language with e-mail. (**LO 19-8**)

Assignments for Module 19

Questions for Comprehension

- 19.1** What should go in an agenda? (**LO 19-1**)
19.2 What are the seven steps in the standard meeting agenda? (**LO 19-3**)
19.3 When would dot planning be most effective? (**LO 19-6**)
19.4 What should go in minutes of a meeting? (**LO 19-6**)

Questions for Critical Thinking

- 19.5** What is the best meeting you ever attended? What made it so effective? (**LO 19-1 to LO 19-4**)
19.6 What opportunities do you have to network? (**LO 19-4**)
19.7 In the groups of which you're a member (at school, at work, and in volunteer organizations), what kinds of comments are most valued in meetings? (**LO 19-5**)

Exercises and Problems

19.8 Writing an Agenda (LO 19-1)

Write an agenda for your next collaborative group meeting.

As Your Instructor Directs,

- a. Write a memo to your instructor, explaining the choices you made.

- b. Compare your agenda with the ones developed by others in your group. Use the agendas as drafts to help you create the best possible agenda.
c. Present your best agenda to the rest of the class in a group oral presentation.

19.9 Helping a Supervisor to Hold Better Meetings (LO 19-1 to LO 19-4)

You're the director for your organization's finance department. You receive the following message from several managers, all members of one of its key committees:

Terry, indeed, is a valued member of the department, which is why he was chosen to chair this important committee. His unwavering dedication and track record of

As you know, Terry is chair of our department's restructuring committee. We all like Terry and think he's a nice guy, but his meetings are insufferable. If you ask Terry a simple question, he responds with a rambling five-minute answer that only eventually addresses the question—and then goes on and on. Time seems irrelevant to him. A meeting with three agenda items takes two hours, and many of Terry's points could be better addressed in a simple e-mail.

A few members of the committee are fine with Terry's meetings, but the rest of us have other work to do. We don't dare ask him questions or open items to discussion anymore because we know we'll be there for the rest of the day. While we don't want Terry to get in trouble, something needs to be done about his meetings.

Don D'Amato

Hunter Blalock

Sherry Kane

Jasmine Mirzapour

Laura Yu

getting work done without error are what impress you most. But his long-winded approach may be silencing members of a committee that is seeking input from all of its members. Therefore, you've decided to share with Terry tips on ways to make meetings more streamlined.

As Your Instructor Directs,

- a. Write a script for a brief meeting with Terry suggesting ways to improve meetings.
b. Write a reply to the message thanking the committee members for bringing the matter to your attention.

19.10 Writing a Meeting Manual* (LO 19-1 to LO 19-4)

Create a manual for students' next term telling them how to have effective meetings as they work on collaborative projects.

*Adapted from Miles McCall, Beth Stewart, and Timothy Clipson, "Teaching Communication Skills for Meeting Management," 1998 *Refereed Proceedings*, Association for Business Communication Southwestern United States, ed. Marsha L. Bayless (Nacogdoches, TX), 68.

19.11 Taking Minutes (LO 19-6)

As Your Instructor Directs,

Have two or more people take minutes of each class or collaborative group meeting for a week. Compare the accounts of the same meeting.

- To what extent do they agree on what happened?
- Does one contain information missing in other accounts?
- Do any accounts disagree on a specific fact?
- How do you account for the differences you find?

19.12 Planning Scripts for Three-Minute Meetings (LO 19-7)

Create a script for a 90-second statement to your boss

1. Describing the progress on a project you're working on.
2. Providing an update on a problem the boss already knows about.
3. Telling about a success or achievement.
4. Telling about a problem and asking approval for the action you recommend.
5. Asking for resources you need for a project.
6. Asking for training you'd like to get.

7. Laying the groundwork for a major request you need to make.

As Your Instructor Directs,

- a. Discuss your scripts with a small group of other students.
- b. Present your script to the class.
- c. Write a memo to your instructor giving your script(s) and explaining the choices you have made in terms of content, arrangement, and word choice.

Polishing Your Prose

Hyphens and Dashes

Hyphens and dashes are forms of punctuation used within sentences.

Use a **hyphen** to

1. Join two or more words used as a single adjective.

Correct: Order five 10- or 12-foot lengths.

Here, hyphens prevent misreading. Five lengths are needed, not lengths of 5, 10, or 12 feet.

2. Indicate that a word has been divided between two lines.

Correct: Our biggest competitor announced plans to introduce new models of computers into the European market.

Divide words only at syllable breaks. If you aren't sure where the syllables break, look up the word in a dictionary. When a word has several syllables, divide it after a vowel or between two consonants.

3. Indicate a compound word, such as a noun or an adjective that requires two or more words to make sense.

Correct: We took a ride on the Merry-Go-Round.

Correct: She bought a two-line phone for her home office.

Experts may disagree as to which compound words require hyphens. In general, compound adjectives appearing before the noun they modify take hyphens while those appearing after do not.

Correct: The Asian-American market represents an untapped resource worth billions of dollars.

Correct: In December, we will unveil a line of vacation packages aimed at Asian Americans.

While many word-processing programs automatically hyphenate for you, knowing where and when to divide words is important for words the program may not recognize or for special cases. For instance, don't divide words of one syllable (e.g., *used*), and don't divide a two-syllable word if one of the syllables is only one letter long (e.g., *acre*).

Use a **dash** to

1. Emphasize a break in thought.

Correct: Despite our best efforts—which included sending a design team to Paris and increasing our promotional budget—sales are lagging.

Create a dash by typing the hyphen key twice. With some word processors, this "double hyphen" will automatically be replaced with a longer, single dash, which is acceptable.

Exercises

Supply necessary dashes or hyphens in the following sentences. If no punctuation is needed—if a space is correct—leave the box blank.

1. Mark told us he expects the shipment which was delayed because of the hurricane to arrive on Wednesday.
2. I was overwhelmed by the good news from Holly Dufresne we landed the \$11 million contract!
3. The year long project required Curtis, Shanna, and Alexander to travel throughout Asia and South America.
4. Though we expected Mary Ellen to accept the job offer, we were surprised when she turned us down actually, shocked is more like it.
5. While the electrical supply order was correct, we also needed two foot and three foot lengths of cord.
6. Maybe a half hour before the meeting close to 2:30, I think Kiana told us we had to find another meeting space because and she worded this very carefully the hotel was experiencing difficulties.
7. Though we are doing a good job of marketing to our European American customers, our Asian and African American customers could be served better.
8. Taylor Dunham wants us to submit a budget request by Friday and to expect significant increases in printing and shipping costs next year, as much as 10 % and 15 %, respectively.
9. There were seven or eight consultants at the IT meeting certainly a lot more than anyone expected when we scheduled the meeting last April.
10. Chuy advised us that our lease remember it expires on October 1 can be renewed but only with a two or four year contract.

Check your answers to the odd-numbered exercises at the back of the book.

Making Oral Presentations

20

LEARNING OBJECTIVES

While public speaking can be intimidating, Module 20 provides skills to deliver oral presentations comfortably and effectively. After completing the module, you should be able to

- | | |
|---|--|
| LO 20-1 Apply strategies for good presentation plans. | LO 20-5 Apply strategies for effective presentation delivery. |
| LO 20-2 Apply strategies for strong openers and closes. | LO 20-6 Explain techniques for audience question responses. |
| LO 20-3 Apply strategies for best vocal delivery. | LO 20-7 List guidelines for group presentations. |
| LO 20-4 Apply strategies for good presentation organization. | |

Making a good oral presentation is more than just good delivery: It also involves developing a strategy that fits your audience and purpose, having good content, and organizing material effectively. The choices you make in each of these areas are affected by your purposes, the audience, and the situation.

Giving a presentation is in many ways very similar to writing a message. The other modules in this book—on analyzing your audience, using you-attitude and positive emphasis, developing reader benefits, designing slides, overcoming objections, doing research, and analyzing data—remain relevant as you plan an oral presentation.

Site to See

Go to

www.brighthub.com/computing/windows-platform/articles/41661.aspx

for examples of PowerPoint presentations and other resources.

Oral presentations have the same three basic purposes that written documents have: to inform, to persuade, and to build goodwill. Like written messages, most oral presentations have more than one purpose.

Informative presentations inform or teach the audience. Training sessions in an organization are primarily informative. Secondary purposes may be to persuade new employees to follow organizational procedures, rather than doing something their own way, and to help them appreciate the organizational culture (◀◀ p. 28).

Persuasive presentations motivate the audience to act or to believe. Giving information and evidence is an important means of persuasion. Stories, visuals, and self-disclosure are also effective. In addition, the speaker must build goodwill by appearing to be credible and sympathetic to the audience's needs. The goal in many presentations is a favorable vote or decision. For example, speakers making business presentations may try to persuade the audience to approve their proposals, to adopt their ideas, or to buy their products. Sometimes the goal is to change behavior or attitudes or to reinforce existing attitudes. For example, a speaker at a meeting of factory workers may stress the importance of following safety procedures. A speaker at a church meeting may talk about the problem of homelessness in the community and try to build support for community shelters for the homeless.

Goodwill presentations entertain and validate the audience. In an after-dinner speech, the audience wants to be entertained. Presentations at sales meetings may be designed to stroke the audience's egos and to validate their commitment to organizational goals.

Make your purpose as specific as possible.

Weak: The purpose of my presentation is to discuss saving for retirement.

Better: The purpose of my presentation is to persuade my audience to put their 401(k) funds in stocks and bonds, not in money market accounts and CDs.

or: The purpose of my presentation is to explain how to calculate how much money someone needs to save in order to maintain a specific lifestyle after retirement.

Note that the purpose is *not* the introduction of your talk; it is the principle that guides your decisions as you plan your presentation.

Author Kathy Caprino finds many experts in their fields disappointing as public speakers, noting that knowing a topic and being able to communicate well about it are two different things. She has five cardinal rules for avoiding mistakes:

1. Meet the audience where they are.
2. Make a heartfelt human connection.
3. Show respect for the listener.
4. Inspire follow-up thinking/action.
5. Leave a lasting message of significance.

Source: Kathy Caprino, "Why so Many 'Experts' Are Terrible Speakers: Top 5 Public Speaking Mistakes," *Forbes*, November 16, 2011, <http://www.forbes.com/sites/kathycaprino/2011/11/16/why-so-many-experts-are-terrible-speakers-top-5-public-speaking-mistakes/2/>.

What decisions do I need to make as I plan a presentation? LO 20-1

► Choose your main point, the kind of presentation, and ways to involve the audience.

An oral presentation needs to be simpler than a written message to the same audience. Identify the one idea you want the audience to take home. Simplify your supporting detail so it's easy to follow. Simplify visuals so they can be taken in at a glance. Simplify your words and sentences so they're easy to understand.

James Kilts did this when he became CEO of Nabisco. Denise Morrison, a manager under Kilts, recalls that he described his vision in terms of three Ds: "He said he was delighted to be at Nabisco, disappointed about some things and determined to fix them." For Morrison, Kilts's message, conveyed in a calm, authoritative tone, was both memorable and motivational.¹

Presentation coach Jerry Weissman helped client David Angel simplify his description of his company:²

Too complicated: Information Storage Devices provides voice solutions using the company's unique, patented multilevel storage technique.

Simple: We make voice chips. They're extremely easy to use. They have unlimited applications. And they last forever.

Analyze your audience for an oral presentation just as you do for a written message. If you'll be speaking to co-workers, talk to them about your topic or proposal to find out what questions or objections they have. For audiences inside the organization, the biggest questions are often practical ones: Will it work? How much will it cost? How long will it take?³

Think about the physical conditions in which you'll be speaking. Will the audience be tired at the end of a long day of listening? Sleepy after a big meal? Will the group be large or small? The more you know about your audience, the better you can adapt your message to the audience.

Choosing the Kind of Presentation

Choose one of three basic kinds of presentations: monologue, guided discussion, or sales.

In a **monologue presentation**, the speaker speaks without interruption; questions are held until the end of the presentation, where the speaker functions as an expert. The speaker plans the presentation in advance and delivers it without deviation. This kind of presentation is the most common in class situations, but it's often boring for the audience. Good delivery skills are crucial, since the audience is comparatively uninvolved.

Linda Driskill suggests that **guided discussions** offer a better way to present material and help an audience find a solution it can "buy into." In a guided discussion, the speaker presents the questions or issues that both speaker and audience have agreed on in advance. Rather than functioning as an expert with all the answers, the speaker serves as a facilitator to help the audience tap its own knowledge. This kind of presentation is excellent for presenting the results of consulting projects, when the speaker has specialized knowledge, but the audience must implement the solution if it is to succeed. Guided discussions need more time than monologue presentations, but produce more audience response, more responses involving analysis, and more commitment to the result.⁴

A **sales presentation** is a conversation, even if the salesperson stands up in front of a group and uses charts and overheads. The sales representative uses questions to determine the buyer's needs, probe objections, and gain temporary and then final commitment to the purchase. Even in a memorized sales presentation, the buyer will talk at least 30% of the time. In a problem-solving sales presentation, the buyer may talk 70% of the time.

Adapting Your Ideas to the Audience

Measure the message you'd like to send against where your audience is now. If your audience is indifferent, skeptical, or hostile, focus on the part of your message the audience will find most interesting and easiest to accept.

Don't seek a major opinion change in a single oral presentation. If the audience has already decided to hire an advertising agency, then a good presentation can convince them that your agency is the one to hire. But if you're talking to a small business that has always done its own ads, limit your purpose. You may be able to prove that an agency can earn its fees by doing things the owner can't do and by freeing the owner's time for other activities. A second presentation may be needed to prove that an ad agency can do a *better* job than

Be careful of off-the-cuff remarks when giving a presentation, especially if they involve such faux pas as ethnic slurs. E. Gordon Gee, president of The Ohio State University and no stranger to controversy from his speeches, irked people when he likened trying to coordinate 18 Ohio State divisions to the Polish Army. The comment may have been meant as a humorous aside, but it shocked enough people for Gee to issue an apology. Said the Polish American Congress: "We are dismayed by the bigotry and ignorance expressed by the President of such a large and prominent American university."

Three Purposes

- **Informative presentations** inform or teach the audience.
- **Persuasive presentations** motivate the audience to act or to believe.
- **Goodwill presentations** entertain and validate the audience.

Most oral presentations have more than one purpose.

When was the last time you were hungry? Maybe you remember being hungry while you were on a diet, or maybe you had to work late at a lab and didn't get back to the dorm in time for dinner.

Speech about world hunger to an audience of college students

the small business could do on its own. Only after the audience is receptive should you try to persuade the audience to hire your agency rather than a competitor.

Make your ideas relevant to your audience by linking what you have to say to the audience's experiences and interests. Showing your audience members that the topic affects them directly is the most effective strategy. When you can't do that, at least link the topic to some everyday experience.

Planning Visuals and Other Devices to Involve the Audience

Even the experts can run into problems while giving a presentation. When Microsoft executive Kirill Tatarinov was unveiling a prototype of Windows 8 to a room of peers, his tablet computer froze. Like any good presenter, Tatarinov quickly recovered because he had a backup tablet in the event something like this happened. Anticipating problems—and having a plan—is always a good idea when preparing for an oral presentation.

Source: Mike Lingle, "Windows 8 Demo Teaches Us a Thing or Two About Presentations," March 20, 2012, http://www.presentationagency.com/sales_presentations/windows-8-demo-teaches-us-a-thing-or-two-about-presentations/#more-600.

Visuals can give your presentation a professional image. One study found that in an informative presentation, multimedia (PowerPoint slides with graphics and animation) produced 5% more learning than overheads made from the slides and 16% more learning than text alone. In a sales presentation by two banks, multimedia (PowerPoint slides with graphics, animation, and video) motivated 58% more students to choose that bank compared to overheads and 60% more compared to text alone. Although the two banks offered identical fees and services, students said that the bank represented by the multimedia presentation "was more credible, was more professional, and offered better services and fees."⁵

Use at least 18-point type for visuals you prepare with a word processor. When you prepare slides with PowerPoint, Corel, or another presentation program, use at least 24-point type for the smallest words.

Well-designed visuals can serve as an outline for your talk (see Figure 20.1), eliminating the need for additional notes. Don't try to put your whole talk on visuals. Visuals should highlight your main points, not give every detail.

Use these guidelines to create and show visuals for presentations:

- Make only one point with each visual. Break a complicated point down into several visuals.
- Give each visual a title that makes a point.
- Limit the amount of information on a visual. Use 35 words or less in seven lines or less; use simple graphs, not complex ones.
- Don't put your visual up till you're ready to talk about it. Leave it up until your next point; don't turn the projector or overhead off.
- Use animation schemes such as fades, zooms, and wipes to control the information displayed in a way that supports the main points. For example, in a sales presentation for Portola Packaging, a bar graph showing sales growth was redesigned to highlight the company's strong performance. Static-looking bars were replaced with upward-sloping arrows drawn from the initial sales level to the new, higher level. The presenter clicked the mouse once to display the graph title and labels; with the second mouse click, the arrows wiped upward, emphasizing the growth pattern.⁶

See Module 25 for information on how to present numerical data through visuals.

Visuals work only if the technology they depend on works. When you give presentations in your own office, check the equipment in advance. When you make a presentation in another location or for another organization, arrive early so that you'll have time not only to check the equipment but also to track down a service worker if the equipment isn't working. Be prepared with a backup plan to use if you're unable to show your slides or videotape.

Figure 20.1 PowerPoint Slides for an Informative Presentation

You can also involve the audience in other ways.

- A student giving a presentation on English–French business communication demonstrated the differences in U.S. and French handshakes by asking a fellow class member to come up to shake hands with her.
- Another student discussing the need for low-salt products brought in a container of Morton salt, a measuring cup, a measuring spoon, and two plates. As he discussed the body’s need for salt, he measured out three teaspoons onto one plate: the amount the body needs in a month. As he discussed the amount of salt the average U.S. diet provides, he continued to measure out salt onto the other plate, stopping only when he had 1½ pounds of salt—the amount in the average U.S. diet. The demonstration made the discrepancy clear in a way words or even a chart could not have done.⁷
- To make sure that his employees understood where money went, the CEO of a specialty printing shop in Algoma, Wisconsin, printed up \$2 million in play money and handed out big cards to employees marked *Labor, Depreciation, Interest*, and so forth. Then he asked each “category” to come up and take its share of the revenues. The action was more dramatic than a color pie chart could ever have been.⁸
- Another speaker who was trying to raise funds used the simple act of asking people to stand to involve them, to create emotional appeal, and to make a statistic vivid:

[A speaker] was talking to a luncheon club about contributing to the relief of an area that had been hit by a tornado. The news report said that 70% of the people had been killed or disabled. The room was set up with people at each round table. He asked three persons at each table to stand. Then he said, “. . . You people sitting are dead or disabled. You three standing have to take care of the mess. You’d need help, wouldn’t you?”⁹

 **Instant Replay**

Simplify
An oral presentation needs to be simpler than a written message to the same audience.

 **Site to See**

Go to
www.wilderpresentations.com/free-tools/before-after-slide-examples

Presentation expert Claudyne Wilder’s *before* and *after* slides show how to express ideas visually in PowerPoint.

Even the great Apple CEO Steve Jobs encountered technology woes during presentations. Halfway into his presentation during the June 2010 launch of the iPhone 4, Jobs lost his Internet connection and the demo came to a screeching halt. Eventually, Jobs realized the cause: Hundreds of attendees were also using the hall's Wi-Fi connection.

How can I create a strong opener and close? **LO 20-2**

- *Brainstorm several possibilities.*
- *The following four modes can help.*

The beginning and end of a presentation, like the beginning and end of a written document, are positions of emphasis. Use those key positions to interest the audience and emphasize your key point. You'll sound more natural and more effective if you talk from notes but write out your opener and close in advance and memorize them. (They'll be short: just a sentence or two.)

Brainstorm several possible openers for each of the four modes: startling statement, narration or anecdote, question, or quotation. The more you can do to personalize your opener for your audience, the better. Recent events are better than things that happened long ago; local events are better than events at a distance; people they know are better than people who are only names.

Startling Statement

Twelve of our customers have canceled orders in the past month.

This presentation to a company's executive committee went on to show that the company's distribution system was inadequate and to recommend a third warehouse located in the southwest.

Narration or Anecdote

When the salespeople for a company that sells storage of backed-up computer data give presentations to clients, they open by telling a story:

A consultant asked a group of people how many of them had [a backup plan]. One brave soul from a bank raised his hand and said, “I’ve got a disaster recovery plan—complete and ready to go into action. It’s real simple, just one page.” And the consultant asked, “A one-page disaster plan? What could you do if your computer center blew up, or flooded, or caught on fire? How could you recover with just a one-page disaster plan?” He said, “Well, it’s really very simple. It’s a two-step plan. First, I maintain my résumé up-to-date at all times. And second, I store a backup copy off-site.”¹⁰

A spoken poetry exercise got everyone’s attention, but perhaps not in the way that was intended. Visiting poets to the Horace Mann School told students to write words anonymously on index cards that would be read aloud at random. To the surprise of the 700 faculty and students in attendance, included were slurs against homosexuals and African Americans. The words had appeared in an earlier work by the poets but were meant to critique bigoted beliefs—out of context, they had a very different effect on many people in attendance. While school officials apologized for the event, one student, Esther Ademola, remarked: “Words and ideas were thrown around that I’ve heard expressed in hallways, classrooms, and the cafeteria. I personally have been subject to remarks much worse than those shared on stage.”

This humorous anecdote breaks the ice in introducing an uncomfortable subject: the possibility of a company losing valuable data. But it also points out that a variety of disasters are possible, many firms are unprepared, and the consequences are great.

Even better than canned stories are anecdotes that happened to you. The best anecdotes are parables that contain the point of your talk.

Question

Are you going to have enough money to do the things you want to when you retire?

This presentation to a group of potential clients discusses the value of using the services of a professional financial planner to achieve one’s goals for retirement.

Quotation

According to Towers Perrin, the profits of Fortune 100 companies would be 25% lower—they’d go down \$17 billion—if their earnings statements listed the future costs companies are obligated to pay for retirees’ health care.

This presentation on options for health care for retired employees urges executives to start now to investigate options to cut the future cost.

Your opener should interest the audience and establish a rapport. Some speakers use humor to achieve those goals. However, an inappropriate joke can turn the audience against the speaker. Never use humor that’s directed against the audience. In contrast, speakers who can make fun of themselves almost always succeed:

It’s both a privilege and a pressure to be here.¹¹

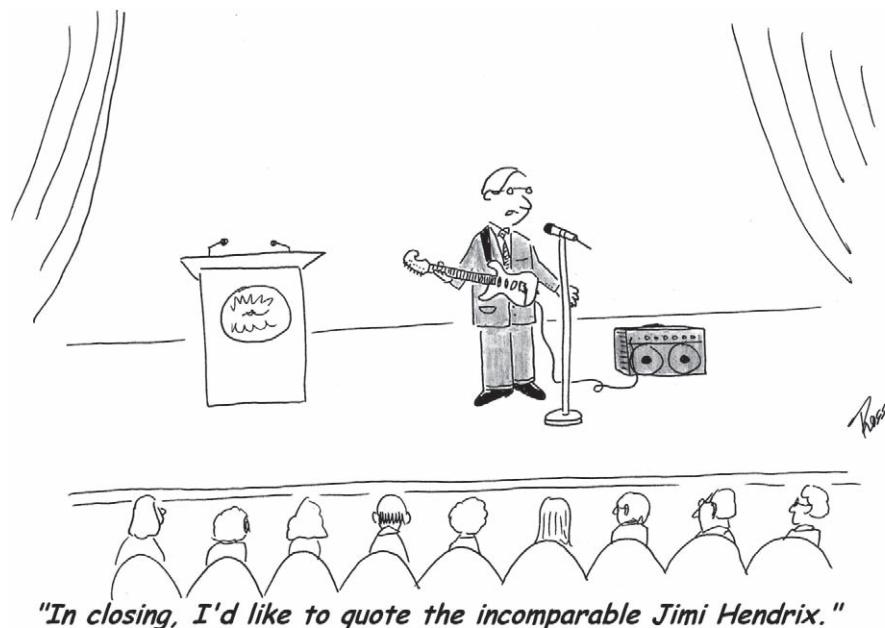

Humor isn’t the only way to set an audience at ease. Smile at audience members before you begin; let them see that you’re a real person and a nice one.

The end of your presentation should be as strong as the opener. For your close, you could do one or more of the following:

- Restate your main point.
- Refer to your opener to create a frame for your presentation.
- End with a vivid, positive picture.
- Tell the audience exactly what to do to solve the problem you’ve discussed.

The following close from a fund-raising speech combines a restatement of the main point with a call for action, telling the audience what to do.

Openers and closes in speeches should get the attention of your audience, but they should also be appropriate to the situation.

Reprinted with permission of CartoonStock.com, Pwww.cartoonstock.com.

Used appropriately, humor can work wonders in a speech. In his recent commencement address at Princeton University, Steve Carell spoke of the differences in interpersonal communication styles between his generation and the next. “When I was in college, I wouldn’t ‘text’ a girl to ask her out on a date. I would ask her, in person. One human being to another. And when she said ‘No,’ which she always did, I would suffer the humiliation and self-loathing that a young man needs for his, or her, personal growth.”

Source: Alexander Abad-Santos, “The Best Commencement Speeches of 2012,” *The Atlantic*, June 8, 2012, <http://www.theatlanticwire.com/national/2012/06/commencement-speeches-we-wish-we-had-graduation/53341/>.

Plain and simple, we need money to run the foundation, just like you need money to develop new products. We need money to make this work. We need money from you. Pick up that pledge card. Fill it out. Turn it in at the door as you leave. Make it a statement about your commitment . . . make it a big statement.¹²

Speaking to nonscientists about his challenging work in science, Mike Powell ended with this anecdote:

The final speaker at a medical conference [I] attended . . . walked to the lectern and said, “I am a 32-year-old wife and mother of two. I have AIDS. Please work fast.”¹³

The story drives home the human value of what scientists do.

When you write out your opener and close, be sure to use oral rather than written style. As you can see in the example, oral style uses shorter sentences and shorter, simpler words than writing does. Oral style can even sound a bit choppy when it is read by eye. Oral style uses more personal pronouns, a less varied vocabulary, and more repetition.

How should I organize a presentation? LO 20-4

► *Start with the main point. Often, one of five standard patterns will work.*

Most presentations use a direct pattern of organization, even when the goal is to persuade a reluctant audience. In a business setting, the audience members are in a hurry and know that you want to persuade them. Be honest about your goals, and then prove that your goal meets the audience’s needs too.

Finding Your Best Voice LO 20-3

A good voice supports and enhances good content. Your best voice will manipulate pitch, intonation, tempo, and volume. Sound energetic and enthusiastic.

Pitch

Pitch measures whether a voice uses sounds that are low (like the bass notes on a piano) or high. Low-pitched voices are usually perceived as being more authoritative, sexier, and more pleasant to listen to than are high-pitched voices. Most voices go up in pitch when the speaker is angry or excited; some people raise pitch when they increase volume. Women whose normal speaking voices are high may need to practice projecting their voices to avoid becoming shrill when they speak to large groups.

To find your best pitch, try humming. The pitch where the hum sounds loudest and most resonant is your best voice.

Intonation

Intonation marks variation in pitch, stress, or tone. Speakers who use many changes in pitch, stress, and tone usually seem more enthusiastic; often they also seem more energetic and more intelligent. Someone who speaks in a monotone may seem apathetic or unintelligent. Non-native speakers whose first language does not use tone, pitch, and stress to convey meaning and attitude may need to practice varying these voice qualities.

Avoid raising your voice at the end of a sentence, however. In English, a rising intonation signals a question. Therefore, speakers who end sentences on higher tones sound as though they're unsure of what they're saying.

Tempo

Tempo is a measure of speed. In a conversation, match your tempo to the other speaker's to build rapport. In a formal presentation, you'll need to speak more slowly and have longer pauses than in an informal conversation. Vary your tempo. Speakers who speak quickly and who vary their volume during the talk are more likely to be perceived as competent.

Volume

Volume is a measure of loudness or softness. Very soft voices, especially if they are also breathy and high-pitched, give the impression of youth and inexperience. People who do a lot of speaking to large groups need to practice projecting their voices so they can increase their volume without shouting.

Sources: George B. Ray, "Vocally Cued Personality Prototypes: An Implicit Personality Theory Approach," *Communication Monographs* 53, no. 3 (1986): 266–76; and Jacklyn Boice, "Verbal Impressions," *Selling Power*, March 2000, 69.

In a persuasive presentation, start with your strongest point, your best reason. If time permits, give other reasons as well and respond to possible objections. Put your weakest point in the middle so you can end on a strong note.

Often, one of five standard patterns of organization will work.

- **Chronological.** Start with the past, move to the present, and end by looking ahead.
- **Problem-Causes-Solution.** Explain the symptoms of the problem, identify its causes, and suggest a solution. This pattern works best when the audience will find your solution easy to accept.
- **Excluding alternatives.** Explain the symptoms of the problem. Explain the obvious solutions first and show why they won't solve the problem. End by discussing a solution that will work. This pattern may be necessary when the audience will find the solution hard to accept.
- **Pro-Con.** Give all the reasons in favor of something, and then those against it. This pattern works well when you want the audience to see the weaknesses in its position.
- **1-2-3.** Discuss three aspects of a topic. This pattern works well to organize short informative briefings. "Today I'll review our sales, production, and profits for the last quarter."

Early in your talk—perhaps immediately after your opener—provide an **overview of the main points** you will make.

Film critic Roger Ebert lost his voice to cancer. He later regained it—literally. Engineers at CereProc used recordings from DVD commentary tracks to reconstruct Ebert's voice electronically, letting him speak using a computer. Some may disagree with the solution, but to Ebert, it was another option for communicating.

Humor

An inappropriate joke can turn the audience against the speaker. Never use humor that's directed against the audience. In contrast, speakers who can make fun of themselves almost always succeed.

First, I'd like to talk about who the homeless in Columbus are. Second, I'll talk about the services The Open Shelter provides. Finally, I'll talk about what you—either individually or as a group—can do to help.

An overview provides a mental peg that hearers can hang each point on. It also can prevent someone missing what you are saying because he or she wonders why you aren't covering a major point that you've saved for later.¹⁴

Offer a clear signpost as you come to each new point. A **signpost** is an explicit statement of the point you have reached. Choose wording that fits your style. The following statements are four different ways that a speaker could use to introduce the last of three points:

Now we come to the third point: what you can do as a group or as individuals to help homeless people in Columbus.

So much for what we're doing. Now let's talk about what you can do to help.

You may be wondering, what can I do to help?

As you can see, The Open Shelter is trying to do many things. We could do more things with your help.

What are the keys to delivering an effective presentation? LO 20-5

► *Turn your fear into energy, look at the audience, and use natural gestures.*

Audience members want the sense that you're talking directly to them and that you care that they understand and are interested. They'll forgive you if you get tangled up in a sentence and end it ungrammatically. They won't forgive you if you seem to have a “canned” talk that you're going to deliver no matter who the listeners are or how they respond. You can convey a sense of caring to your audience by making direct eye contact and by using a conversational style.

Transforming Fear

Feeling nervous is normal. But you can harness that nervous energy to help you do your best work. As one student said, you don't need to get rid of your butterflies. All you need to do is make them fly in formation.

To calm your nerves as you prepare to give an oral presentation,

- Be prepared. Analyze your audience, organize your thoughts, prepare visual aids, practice your opener and close, check out the arrangements.
- Use only the amount of caffeine you normally use. More or less may make you jumpy.

- Avoid alcoholic beverages.
- Use positive emphasis (◀◀ Module 7). Instead of saying, “I’m scared,” try saying, “My adrenaline is up.” Adrenaline sharpens our reflexes and helps us do our best.

Just before your presentation,

- Consciously contract and then relax your muscles, starting with your feet and calves and going up to your shoulders, arms, and hands.
- Take several deep breaths from your diaphragm.

During your presentation,

- Pause and look at the audience before you begin speaking.
- Concentrate on communicating well.
- Use body energy in strong gestures and movement.

Using Eye Contact

Look directly at the people you’re talking to. In one study, speakers who looked more at the audience during a seven-minute informative speech were judged to be better informed, more experienced, more honest, and friendlier than speakers who delivered the same information with less eye contact.¹⁵ An earlier study found that speakers judged sincere looked at the audience 63% of the time, while those judged insincere looked at the audience only 21% of the time.¹⁶

The point in making eye contact is to establish one-on-one contact with the individual members of your audience. People want to feel that you’re talking to them. Looking directly at individuals also enables you to be more conscious of feedback from the audience so you can modify your approach if necessary.

Standing and Gesturing

Stand with your feet far enough apart for good balance, with your knees flexed. Unless the presentation is very formal or you’re on camera, you can walk if you want to. Some speakers like to come in front of the lectern to remove that barrier between themselves and the audience.

If you use slides or transparencies, stand beside the screen so you don’t block it.

Build on your natural style for gestures. Gestures usually work best when they’re big and confident.

Using Notes and Visuals

Unless you’re giving a very short presentation, you’ll probably want to use notes. Even experts use notes. The more you know about the subject, the greater the temptation to add relevant points that occur to you as you talk. Adding an occasional point can help to clarify something for the audience, but adding too many points will destroy your outline and put you over the time limit.

Put your notes on cards or on sturdy pieces of paper. Most speakers like to use 4-by-6-inch or 5-by-7-inch cards because they hold more information. Your notes need to be complete enough to help you if you go blank, so use long phrases or complete sentences. Under each main point, jot down the evidence or illustration you’ll use. Indicate where you’ll refer to visuals.

Look at your notes infrequently. Most of your gaze time should be directed to members of the audience. Hold your notes high enough so that your head doesn’t bob up and down like a yo-yo as you look from the audience to your notes and back again.

Fear of public speaking tops the list in the United States, with death at number two! But strategies exist to turn that fear into strength. Preston Ni reminds speakers to avoid equating public speaking with self-worth, and among the tips offered by Bakari Akil is to visualize success at doing it. Psychologist Sian Beilock recommends alleviating stress by practicing to perform well, putting worries down in writing so they are less likely to come up during the presentation, and distracting negative thoughts with positive ones.

Sources: Preston Ni, “Overcome the Top Fear in America: Reduce Public Speaking Nervousness,” *AsianWeek*, November 3, 2008, <http://www.asianweek.com/2008/11/03/overcome-the-top-fear-in-america-reduce-public-speaking-nervousness/>; Bakari Akil, “Public Speaking: When Running Is Not an Option,” *Psychology Today*, September 25, 2009, <http://www.psychologytoday.com/blog/communication-central/200909/public-speaking-when-running-is-not-option>; and Michelle Gerdes, “Fighting the Fear of Public Speaking,” *The Wall Street Journal*, August 8, 2011, <http://blogs.wsj.com/juggle/2011/08/08/fighting-the-fear-of-public-speaking/>.

Former vice-presidential candidate Sarah Palin piqued viewers’ curiosity—and faced some mockery—when she appeared to be reading crib notes from her palm during an interview. Known for her folksy delivery, the former Alaska governor, who hours earlier had criticized President Barack Obama for using teleprompters,

(continued)

(continued)

had “Energy, Budget cuts, Tax, Lift American Spirits” written on her hand, though “Budget” was crossed out.

Source: Mike Krumboltz, “Palin’s Palm Holds the Answers,” downloaded on February 9, 2010, at <http://buzz.yahoo.com/buzzlog/93375?fp=1>.

Handle questions carefully. The U.S. Supreme Court refused to reconsider the conviction of a man whose silence while being questioned by police was later used as evidence against him in a manslaughter trial. Patrick Canella had agreed to waive his right to remain silent and answered some of the questions posed to him but was mum on potentially incriminating issues. Prosecutors argued that rather than Canella’s silence, it was his “willingness to talk to the police and the fact that he gave an incomplete and inaccurate exculpatory statement” that helped to convict him.

Source: Warren Richey, “Can Silence Before an Arrest Be Used at Trial? Supreme Court Refuses Case,” *The Christian Science Monitor*, February 21, 2012, <http://www.csmonitor.com/USA/Justice/2012/0221/Can-silence-before-an-arrest-be-used-at-trial-Supreme-Court-refuses-case>.

Overviews and Signposts

Immediately after your opener, provide an **overview of the main points** you will make. Offer a clear signpost as you come to each new point. A **signpost** is an explicit statement of the point you have reached.

If you have lots of visuals and know your topic well, you won’t need notes. Put the screen to the side so you won’t block it. Face the audience, not the screen. With transparencies, you can use color marking pens to call attention to your points as you talk. Show the entire visual at once: Don’t cover up part of it. If you don’t want the audience to read ahead, prepare several visuals that build up. In your overview, for example, the first visual could list your first point, the second the first and second, and the third all three points.

Keep the room lights on if possible; turning them off makes it easier for people to fall asleep and harder for them to concentrate on you.

How should I handle questions from the audience? LO 20-6

- *Anticipate questions that might be asked. Be honest.*
- *Rephrase biased or hostile questions.*

Prepare for questions by listing every fact or opinion you can think of that challenges your position. Treat each objection seriously and try to think of a way to deal with it. If you’re talking about a controversial issue, you may want to save one point for the question period, rather than making it during the presentation. Speakers who have visuals to answer questions seem especially well prepared.

During your presentation, tell the audience how you’ll handle questions. If you have a choice, save questions for the end. In your talk, answer the questions or objections that you expect your audience to have. Don’t exaggerate your claims so that you won’t have to back down in response to questions later.

During the question period, don’t nod your head to indicate that you understand a question as it is asked. Audiences will interpret nods as signs that you agree with the questioner. Instead, look directly at the questioner. As you answer the question, expand your focus to take in the entire group. Don’t say, “That’s a good question.” That response implies that the other questions have been poor ones.

If the audience may not have heard the question or if you want more time to think, repeat the question before you answer it. Link your answers to the points you made in your presentation. Keep the purpose of your presentation in mind, and select information that advances your goals.

If a question is hostile or biased, rephrase it before you answer it. “You’re asking whether. . . .” Or suggest an alternative question: “I think there are problems with both the positions you describe. It seems to me that a third solution which is better than either of them is. . . .”

Occasionally someone will ask a question that is really designed to state the speaker’s own position. Respond to the question if you want to. Another option is to say, “I’m not sure what you’re asking” or even “That’s a clear statement of your position. Let’s move to the next question now.” If someone asks about something that you already explained in your presentation, simply answer the question without embarrassing the questioner. No audience will understand and remember 100% of what you say.

If you don’t know the answer to a question, say so. If your purpose is to inform, write down the question so you can look up the answer before the next session. If it’s a question to which you think there is no answer, ask if anyone in the room knows. When no one does, your “ignorance” is vindicated. If an expert is in the room, you may want to refer questions of fact to him or her. Answer questions of interpretation yourself.

At the end of the question period—or at the end of your talk, if there are no questions—take two minutes to summarize your main point once more. (This can be a restatement of your close.) Questions may or may not focus on the key point of your talk. Take advantage of having the floor to repeat your message briefly and forcefully.

What are the guidelines for group presentations? **LO 20-7**

► *In the best presentations, voices take turns within each point.*

Plan carefully to involve as many members of the group as possible in speaking roles.

The easiest way to make a group presentation is to outline the presentation and then divide the topics, giving one to each group member. Another member can be responsible for the opener and the close. During the question period, each member answers questions that relate to his or her topic.

In this kind of divided presentation, be sure to

- Plan transitions.
- Enforce time limits strictly.
- Coordinate your visuals so that the presentation seems a coherent whole.
- Practice the presentation as a group at least once; more is better.

The best group presentations are even more fully integrated: together, the members of the group

- Write a very detailed outline.
- Choose points and examples.
- Create visuals.

Then, *within* each point, speakers take turns. This presentation is most effective because each voice speaks only a minute or two before a new voice comes in. However, it works only when all group members know the subject well and when the group plans carefully and practices extensively.

Whatever form of group presentation you use, be sure to introduce each member of the team to the audience at the beginning of the presentation and to use the next person's name when you change speakers: "Now, Jason will explain how we evaluated the web pages." Pay close attention to who is speaking. If other members of the team seem uninterested in the speaker, the audience gets the sense that that speaker isn't worth listening to.

Nick Morgan advocates rehearsing presentations—"People who 'wing it' usually betray their lack of preparation in their body language"—but recommends avoiding more than one rehearsal on the day of the presentation.

He notes that stage actors often rehearse for weeks, so there's good reason for public speakers to rehearse a lot.

Source: Nick Morgan, "When Is Rehearsing a Presentation a Bad Idea?" *Forbes*, March 8, 2012, <http://www.forbes.com/sites/nickmorgan/2012/03/08/when-is-rehearsing-a-presentation-a-bad-idea/>.

Summary of Learning Objectives

- An oral presentation needs to be simpler than a written message to the same audience. **(LO 20-1)**
- In a **monologue presentation**, the speaker plans the presentation in advance and delivers it without deviation. In a **guided discussion**, the speaker presents the questions or issues that both speaker and audience have agreed on in advance. Rather than functioning as an expert with all the answers, the speaker serves as a facilitator to help the audience tap its own knowledge. A **sales presentation** is a conversation using questions to determine the buyer's needs, probe objections, and gain provisional and then final commitment to the purchase. **(LO 20-1)**
- Adapt your message to your audience's beliefs, experience, and interests. **(LO 20-1)**
- Use the beginning and end of the presentation to interest the audience and emphasize your key point. **(LO 20-1)**
- Using visuals makes a speaker seem more prepared, more interesting, and more persuasive. **(LO 20-1)**
- Ways to open or close a presentation include using a startling statement, narration or anecdote, question, or quotation. **(LO 20-2)**
- A good voice supports and enhances good content. To find your best voice, focus on pitch, intonation, tempo, and volume. Sound energetic and enthusiastic. **(LO 20-3)**
- Use a direct pattern of organization. Put your strongest reason first. **(LO 20-4)**
- Limit your talk to three main points. Early in your talk—perhaps immediately after your opener—provide an **overview of the main points** you will make. Offer a clear signpost as you come to each new point. A **signpost** is an explicit statement of the point you have reached. **(LO 20-4)**
- To calm your nerves as you prepare to give an oral presentation, **(LO 20-5)**
 - Be prepared. Analyze your audience, organize your thoughts, prepare visual aids, practice your opener and close, check out the arrangements.
 - Use only the amount of caffeine you normally use.
 - Avoid alcoholic beverages.
 - Relabel your nerves. Instead of saying, "I'm scared," try saying, "My adrenaline is up." Adrenaline sharpens our reflexes and helps us do our best.

Just before your presentation,

- Consciously contract and then relax your muscles, starting with your feet and calves and going up to your shoulders, arms, and hands.
- Take several deep breaths from your diaphragm.

During your presentation,

- Pause and look at the audience before you begin speaking.
- Concentrate on communicating well.
- Use body energy in strong gestures and movement.
- Convey a sense of caring to audience members by making direct eye contact with them and by using a conversational style. **(LO 20-5)**

- Treat questions as opportunities to give more detailed information than you had time to give in your presentation. Link your answers to the points you made in your presentation. **(LO 20-6)**
- Repeat the question before you answer it if the audience may not have heard it or if you want more time to think. Rephrase hostile or biased questions before you answer them. **(LO 20-6)**
- The best group presentations result when the group writes a very detailed outline, chooses points and examples, and creates visuals together. Then, within each point, voices trade off. **(LO 20-7)**

Assignments for Module 20

Questions for Comprehension

- 20.1** How are monologue presentations, guided discussions, and sales presentations alike and different? **(LO 20-1)**
- 20.2** What are the four modes for openers? **(LO 20-2)**

- 20.3** What does maintaining eye contact and smiling do for a presentation? **(LO 20-5)**

Questions for Critical Thinking

- 20.4** If you use presentation software, will you automatically have strong visuals? **(LO 20-1)**
- 20.5** Why should you plan a strong close, rather than just saying, “Well, that’s it”? **(LO 20-2)**

- 20.6** Why does an oral presentation have to be simpler than a written message to the same audience? **(LO 20-2)**
- 20.7** What are the advantages and disadvantages of using humor? **(LO 20-2)**

Exercises and Problems

20.8 Making a Short Oral Presentation (LO 20-1 to LO 20-7)

As Your Instructor Directs,

Make a short (2- to 5-minute) presentation, with three to eight slides, on one of the following topics:

- a. Explain how what you’ve learned in classes, in campus activities, or at work will be useful to the employer who hires you after graduation.
- b. Profile someone who is successful in the field you hope to enter and explain what makes him or her successful.
- c. Describe a specific situation in an organization in which communication was handled well or badly.
- d. Make a short presentation based on another problem in this book.

1.8 Discuss three of your strengths.

2.13 Analyze your supervisor.

11.10 Tell your boss about a problem in your unit and recommend a solution.

26.10 Explain one of the challenges (e.g., technology, ethics, international competition) that the field you hope to enter is facing.

26.11 Profile a company you would like to work for and explain why you think it would be a good employer.

29.10 Explain your interview strategy.

20.9 Making a Longer Oral Presentation (LO 20-1 to LO 20-7)

As Your Instructor Directs,

Make a 5- to 12-minute presentation on one of the following. Use visuals to make your talk effective.

- a. Show why your unit is important to the organization and either should be exempt from downsizing or should receive additional resources.
- b. Persuade your supervisor to make a change that will benefit the organization.
- c. Persuade your organization to make a change that will improve the organization’s image in the community.
- d. Persuade classmates to donate time or money to a charitable organization. (Read Module 12.)

e. Persuade an employer that you are the best person for the job.

f. Use another problem in this book as the basis for your presentation.

2.10 Analyze a discourse community.

2.11 Analyze an organization’s corporate culture.

13.9 Announcing Holiday Diversity

23.10 Summarize the results of a survey you have conducted.

24.9 Summarize the results of your research.

20.10 Making a Group Oral Presentation (LO 20-1 to LO 20-7)

As Your Instructor Directs,

Make a 5- to 12-minute presentation using visuals. Use another problem in this book as the basis for your presentation.

- 3.12 Show how cultural differences can lead to miscommunication.
- 5.14 Evaluate the design of three web pages.

- 12.22 Recommend an investment for your instructor.
- 18.10 Recommend a policy on student entrepreneurs.
- 18.14 Present brochures you have designed to the class.
- 24.9 Summarize the results of your research.
- 29.8 Share the advice of students currently on the job market.

Polishing Your Prose

Choosing Levels of Formality

Some words are more formal than others. Generally, business messages call for a middle-of-the-road formality, not too formal, but not so casual as to seem sloppy.

Formal and stuffy	Short and simple
ameliorate	improve
commence	begin, start
enumerate	list
finalize	finish, complete
prioritize	rank
utilize	use
viable option	choice
Sloppy	Casual
goofed up	confused
diss	criticize
guess	assume
haggle	negotiate
nosy	curious
wishy-washy	indecisive, flexible

What makes choosing words so challenging is that the level of formality changes depending on your purposes, the audience, and the situation. What's just right for a written report will be too formal for an oral presentation or an advertisement. The level of formality that works in one discourse community may be inappropriate for another.

Listen to the language that people in your discourse community use. What words seem to have positive connotations? What words persuade? As you identify these terms, use them in your own messages.

Exercises

Choose the better word or phrase in each pair of square brackets for written documents. Justify your choice.

1. The meeting with Cochran, Weiss, and Landon went very well, and what we must do now is [finalize/complete] our bid specs.
2. Jade Henry [ameliorated/improved] our chances of getting the contract by submitting an excellent proposal.
3. The first thing I noticed about Nanda is that she is skilled at [haggling/negotiation].
4. Until our offer is accepted, we should be [wishes-washy/flexible] with our schedule.
5. Franz let us know that he is willing to give us [viable options/choices] for which program to use.
6. Our [nosy/curious] neighbor stopped by to see the new signage and was more than happy to [criticize/diss] our hard work.
7. I'm pleased that Dalton [enumerated/listed] the executives who will be attending the meeting in Olathe, but I'm concerned that he may have [prioritized/ranked] them inappropriately.
8. We should carefully [consider/think about] the qualities we want in an office [employee/staffer], especially if we plan to [proffer/offer] a job to anyone.
9. Before anyone [expunges/erases] old files, Gary told us, they should [have/possess] a good reason to not [keep/retain] them.
10. Karen Ling [said/pronounced] that we are to [help/assist] customers [ascertain/figure out] what they [want/desire] and where it [is/exists] in the store.

Check your answers to the odd-numbered questions at the back of the book.

Unit 5 Cases for Communicators

The Charismatic Communicator

We tend to think that people are naturally charismatic, but researchers decided to put that belief to the test. A team of scientists from the University of Lausanne Business School took

managers from a large Swiss company and divided them into two groups. One group received a training course in charisma and the other did not.

The course consisted of a lecture on the principles of charismatic leadership. It also included watching videos, including scenes from popular films like *Dead Poets Society*, and presentations, and giving them a feedback report. Before the training and

Source: Mark van Vugt, "Can Charisma Be Taught?" *Psychology Today*, May 5, 2012, <http://www.psychologytoday.com/blog/naturally-selected/201205/can-charisma-be-taught>.

several months after, the managers were assessed by co-workers on how charismatic they were. They improved significantly.

A second study videotaped MBA students before and after the training. The results, once again, showed improvement.

The researchers believe a variety of learnable qualities help to make a person more charismatic. These include using metaphors and anecdotes, displaying moral conviction, and setting high expectations for yourself and others. Communicating confidence and using rhetorical questions also help. Nearly all of the identified qualities involve improved communication, meaning that being a better communicator may translate into being more charismatic.

Individual Activity

Imagine you are the director of training at a large corporation. You have been given the task of developing an unconventional training plan for 50 sales employees to improve interpersonal communication and, thus, charisma. The plan should include group exercises designed to develop trust, encourage participation, and relieve tension among group members. The training could take place in a location of your choice that will complement the goals of your unconventional training plan and will take up a regular workday.

Create an agenda for your plan. Consider the following topics as you organize your day of training:

- What aspects of interpersonal communication are important to address?
- What interpersonal communication problems could develop between employees and customers?
- What are some creative ways to address these problems?
- What roles do people play in groups?
- In which kind of role-playing exercises could the group address problems?
- What are some exercises the group could do to learn how to work together effectively?
- What kind of group activity would address the importance of listening?

Group Activity

Your group has been asked to write a 500-word essay on how unconventional training can be used to teach stronger teamwork skills. As a team, create and polish this document.

Plan the work and document as a group. In this process, discuss the following questions:

- What is the purpose of this document?
- Who is the audience?
- What organization, format, and style should the essay have?

Once the planning is done, begin drafting the essay together.

Next, evaluate the content and discuss possible revisions as a group. If your discussions stall over questions of style, remember that business writing can embrace different styles but the document should have a unified voice.

With a solid revision in hand, you are ready to edit and proofread. This stage might be very important because of the writing styles and levels of expertise involved. Be sure to have at least one person check the document for grammar, mechanics, accuracy, and completeness.

After you have completed the document, discuss the following questions as a team:

- Did the majority of team members work actively on the project?
- Can you identify the positive roles and actions demonstrated during the writing process? (For example, did anyone encourage participation?)
- Can you identify any negative roles and actions demonstrated during the writing process? (For example, did a group member attempt to dominate the group?)
- Can you identify an informational leader, interpersonal leader, and procedural leader in your group?

Finally, reflect as a group on the issue of conflict. Did conflict arise during the project? If so, did you work as a team to identify the source and type of conflict and then follow the appropriate steps to resolve the issue?

Proposals and Progress Reports

LEARNING OBJECTIVES

Module 21 describes how to write successful proposals and progress reports. After completing the module, you should be able to

- LO 21-1** Define reports in the workplace.
- LO 21-2** Estimate time for business proposal writing.
- LO 21-3** Identify sections for business proposal organization.

- LO 21-4** Identify “hot buttons” for business proposal strategies and beyond.
- LO 21-5** Identify sections for progress report organization.

Reports provide the information that people in organizations need to make plans and solve problems.

Writing any report includes five basic steps:

1. Define the problem.
2. Gather the necessary information.
3. Analyze the information.
4. Organize the information.
5. Write the report.

After reviewing the varieties of reports, this module focuses on the first step. Module 22 discusses the second and third steps. Modules 23 and 24 illustrate the fourth and fifth steps.

Other modules that are useful for writing reports are Modules 12, 18, 20, and 25.

What is a “report”? LO 21-1

- Many different kinds of documents are called reports.

In some organizations, a report is a long document or a document that contains numerical data. In others, one- and two-page memos are called *reports*. In still others, *reports* consist of PowerPoint slides printed out and bound together. A short report to a client may use a letter format. **Formal reports** contain formal elements such as a title page, a transmittal, a table of contents, and a list of illustrations. **Informal reports** may be letters and memos or even computer printouts of production or sales figures.

Reports can just provide information, both provide information and analyze it, or provide information and analysis to support a recommendation (see Figure 21.1). Reports can be called **information reports** if they collect data for the reader, **analytical reports** if they interpret data but do not recommend action, and **recommendation reports** if they recommend action or a solution.

Feasibility studies often reveal surprising information. A UBS study noted that a plan to fund a \$975 million stadium for the Minnesota Vikings mostly with public dollars was a bad idea because “independent academic research studies consistently conclude that new stadiums and arenas have no measurable effect on the level of real income or employment in the metropolitan areas in which they are located.” Those words echo findings in Mark Perryman’s *Why the Olympics Aren’t Good for Us and How They Can Be*, which chronicles bust periods after the Olympics are over, noting in particular how Greece faced a \$784 million cost to maintain crumbling facilities after the 2004 games. The price tag of potential accidents from shale gas extraction was calculated by a group of Yale University economics graduates to be \$250 million annually—against the estimated \$100 billion in yearly economic benefits.

What should I do before I write a proposal? LO 21-2

- Finish at least one-fourth of your research!

As Figure 21.2 suggests, before you draft a proposal, you not only need to do the analysis that you’d do for any message, but you also need to complete part of your research—usually about one-fourth of the total research you’ll need to do for a class project. You’ll use this research both to define the problem your report will discuss and to identify the topics you’ll investigate. Fortunately, if these parts of the proposal are well written, they can be used with minor changes in the report itself.

Narrow your problem. For example, “improving the college experiences of international students studying in the United States” is far too broad. First, choose one college or university. Second, identify the specific problem. Do you want to increase the social interaction between U.S. and international students? Help international students find housing? Increase the number of ethnic grocery stores and restaurants? Third, identify

Figure 21.1 Three Levels of Reports

Reports Can Provide
Information only
<ul style="list-style-type: none"> • Sales reports (sales figures for the week or month). • Quarterly reports (figures showing a plant’s productivity and profits for the quarter).
Information plus analysis
<ul style="list-style-type: none"> • Annual reports (financial data and an organization’s accomplishments during the past year). • Audit reports (interpretations of the facts revealed during an audit). • Make-good or pay-back reports (calculations of the point at which a new capital investment will pay for itself).
Information plus analysis plus a recommendation
<ul style="list-style-type: none"> • Feasibility reports evaluate two or more alternatives and recommend which alternative the organization should choose. • Justification reports justify the need for a purchase, an investment, a new personnel line, or a change in procedure. • Problem-solving reports identify the causes of an organizational problem and recommend a solution.

for sample recommendation reports from the Centers for Disease Control.

The London Business School's John W. Mullins believes that a good business plan starts with a well-defined problem that is supported by convincing evidence gathered from many credible sources. He cites Nike's revolutionary shoe designs as having addressed the real problems of runners: injuries like shin splints and sprained ankles. He also argues for using you attitude: "A Me-First plan sends a clear signal that the writer's priorities are misplaced. What matters more than great technology or a great idea is the problem or pain that the new solution or technology resolves."

Source: John W. Mullins, "Why Business Plans Don't Deliver," *The Wall Street Journal*, June 15, 2012, <http://online.wsj.com/article/SB1000142405297020483030457413501980701202.html>.

Figure 21.2 Allocating Time in Writing a Proposal (Your time may vary.)

Proposal to write a report studying alternative dispute resolution. Total time: 30 hours

Planning

Read the Request for Proposal (RFP).

15 hours

Gather necessary materials (costs, bios of personnel, etc.).

Identify and narrow the problem.

Complete preliminary research.

Talk to people about the issue.

Prepare a bibliography and read as many of the sources as possible.

Construct a questionnaire.

Identify the topics you'll investigate for the report.

Answer the PAIBOC questions (◀◀ Module 1).

Think about document design (◀◀ Module 5).

Organize the message.

Writing

5 hours

Draft the proposal.

Revising

10 hours

Reread draft.

Measure draft against PAIBOC questions and RFP.

Revise draft.

Ask for feedback.

Revise draft based on feedback.

Edit to catch grammatical errors.

Run spell-check.

Proof by eye.

Initial a memo proposal; sign a letter proposal.

Make the necessary copies and distribute.

the specific audience that would have the power to implement your recommendations. Depending on the topic, the audience might be the Office of International Studies, the residence hall counselors, a service organization on campus or in town, a store, or a group of investors.

How you define the problem shapes the solutions you find. For example, suppose that a manufacturer of frozen foods isn't making money. If the problem is defined as a marketing problem, the researcher may analyze the product's price, image, advertising, and position in the market. But perhaps the problem is really that overhead costs are too high due to poor inventory management, or that an inadequate distribution system doesn't get the product to its target market. Defining the problem accurately is essential to finding an effective solution.

Once you've defined your problem, you're ready to write a purpose statement. The purpose statement goes both in your proposal and in your final report. A good **purpose statement** makes three things clear:

- The organizational problem or conflict.
- The specific technical questions that must be answered to solve the problem.
- The rhetorical purpose (to explain, to recommend, to request, to propose) the report is designed to achieve.

The following purpose statements have all three elements.

Current management methods keep the elk population within the carrying capacity of the habitat, but require frequent human intervention. Both wildlife conservation specialists and the public would prefer methods that controlled the elk population naturally. This report will compare the current short-term management techniques (hunting, trapping and transporting, and winter feeding) with two long-term management techniques, habitat modification and the reintroduction of predators. The purpose of this report is to recommend which techniques or combination of techniques would best satisfy the needs of conservationists, hunters, and the public.

www.sba.gov/category/navigation-structure/startng-managing-business/startng-business/how-write-business-plan

for the Small Business Association's tips on writing proposals.

When banner ads on web pages first appeared in 1994, the initial response, or “click-through” rate, was about 10%. However, as ads have proliferated on web pages, the click-through rate has dropped sharply. Rather than assuming that any banner ad will be successful, we need to ask, What characteristics do successful banner ads share? Are ads for certain kinds of products and services or for certain kinds of audiences more likely to be successful on the web? The purpose of this report is to summarize the available research and anecdotal evidence and to recommend what Leo Burnett should tell its clients about whether and how to use banner ads.

Report Audience: Leo Burnett Advertising Agency

To write a good purpose statement, you must understand the basic problem and have some idea of the questions that your report will answer. Note, however, that you can (and should) write the purpose statement before researching the specific alternatives the report will discuss.

What should go in a proposal? LO 21-3

- *What you're going to do, how and when you'll do it, and evidence that you'll do it well.*

Proposals suggest a method for finding information or solving a problem.¹ (See Figure 21.3.)

Figure 21.3 Relationship among Situation, Proposal, and Final Report

Company's Current Situation	The Proposal Offers to	The Final Report Will Provide
We don't know whether we should change.	Assess whether change is a good idea.	Insight, recommending whether change is desirable.
We need to/want to change, but we don't know exactly what we need to do.	Develop a plan to achieve desired goal.	A plan for achieving the desired change.
We need to/want to change, and we know what to do, but we need help doing it.	Implement the plan, increase (or decrease) measurable outcomes.	A record of the implementation and evaluation process.

Source: Adapted from Richard C. Freed, Shervin Freed, and Joseph D. Romano, *Writing Winning Proposals: Your Guide to Landing the Client, Making the Sale, Persuading the Boss* (New York: McGraw-Hill, 1995), 21.

What constitutes a business plan can differ according to audience. Some organizations, such as the New York Public Library and the Rice Alliance for Technology and Entrepreneurship, are letting people “twitpitch” business plans in 140 characters or less. Of course, there can be drawbacks. “Take control of your money before Bernie does. Join the revolt and get easy to use tools to grow your 401K/IRA” was an award-winning tweet on Fundrevolt . . . for Bernie Madoff. Investment manager Sam Hogg argues that business startups are better off building concepts rather than writing business plans. He quotes boxer Mike Tyson: “Everybody has a plan, until they get punched in the face.” In the fast-paced world of 21st century business, Hogg believes that demonstrating talent rather than a written plan is important.

Sources: Lora Kolodny, “Can You Write a Business Plan with Fewer Than 140 Characters?” *The New York Times*, April 15, 2010, <http://boss.blogs.nytimes.com/2010/04/15/can-you-write-a-business-plan-with-fewer-than-140-characters/>; and Sam Hogg, “3 Reasons to Skip the Business Plan,” *Entrepreneur*, July 22, 2012, <http://www.entrepreneur.com/article/223837>.

Purpose Statements

A good **purpose statement** makes three things clear:

- The organizational problem or conflict.
- The specific technical questions that must be answered to solve the problem.
- The rhetorical purpose the report is designed to achieve.

Many business schools hold contests for budding entrepreneurs to pitch their million-dollar ideas as class projects. The contests involve writing business plans and presenting them to judges, with cash prizes of up to \$20,000 for winners. However, many ideas never make it to execution. Observes Janet Strimaitis, managing director of Babson College's Arthur M. Blank Center for Entrepreneurship: "You can write a beautiful 50-page business plan without ever talking to a potential customer." And some highly successful businesses failed to earn the top spot in contests. LendingTree, for instance, took second place at the University of Virginia in 1997 and Akamai Technology was only a finalist at the Massachusetts Institute of Technology in 1998. A good business plan, of course, is just a potential foundation for a business. The rest is a combination of talent, tenacity, timing, and luck.

Source: Melissa Korn, "Entrepreneur Contests Take Practical Turn," *The Wall Street Journal*, February 2, 2012, <http://online.wsj.com/article/SB10001424052970203920204577196813674180138.html>.

As Donna Kienzler points out, proposals have two goals: to get the project accepted and to get you accepted to do the job. Proposals must stress reader benefits and provide specific supporting details.² Attention to details—including good visual impact and proofreading—helps establish your professional image and suggests that you'd give the same care to the project if your proposal is accepted.

To write a good proposal, you need to have a clear view of the problem you hope to solve and the kind of research or other action needed to solve it. A proposal must answer the following questions convincingly:

- What problem are you going to solve?
- How are you going to solve it?
- What exactly will you provide for us?
- Can you deliver what you promise?
- What benefits can you offer?
- When will you complete the work?
- How much will you charge?

Government agencies and companies often issue Requests for Proposals, known as **RFPs**. Follow the RFP exactly when you respond to a proposal. Competitive proposals are often scored by giving points in each category. Evaluators look only under the heads specified in the RFP. If information isn't there, the proposal gets no points in that category.

Proposals for Class Research Projects

A proposal for a student report usually has the following sections:

1. In your first paragraph (no heading), summarize in a sentence or two the topic and purposes of your report.
2. **Problem.** What organizational problem exists? What is wrong? Why does it need to be solved? Is there a history or background that is relevant?
3. **Feasibility.** Are you sure that a solution can be found in the time available? How do you know?
4. **Audience.** Who in the organization would have the power to implement your recommendation? What secondary audiences might be asked to evaluate your report? What audiences would be affected by your recommendation? Will anyone serve as a gatekeeper, determining whether your report is sent to decision makers? What watchdog audiences might read the report?

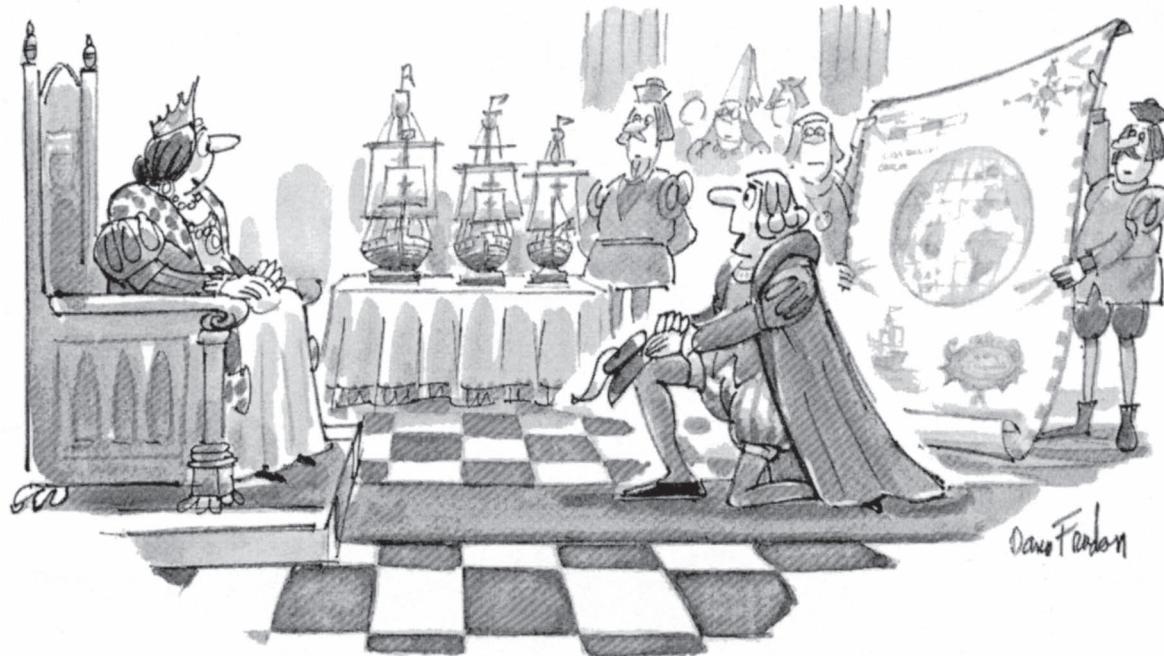

For each of these audiences and for your initial audience (your instructor), give the person's name, job title, and business address and answer the following questions:

- What is the audience's major concern or priority?
- What will the audience see as advantages of your proposal? What objections, if any, is the reader likely to have?
- How interested is the audience in the topic of your report?
- How much does the audience know about the topic of your report?

List any terms, concepts, equations, or assumptions that one or more of your audiences may need to have explained. Briefly identify ways in which your audiences may affect the content, organization, or style of the report.

5. **Topics to Investigate.** List the questions and subquestions you will answer in your report, the topics or concepts you will explain, the aspects of the problem you will discuss. Indicate how deeply you will examine each of the aspects you plan to treat. Explain your rationale for choosing to discuss some aspects of the problem and not others.
6. **Methods/Procedure.** How will you get answers to your questions? Whom will you interview or survey? What published sources will you use? What websites will you consult? Give the full bibliographic references.

Make your proposal persuasive by using benefits that your audience finds important.

"Your Majesty, my voyage will not only forge a new route to the spices of the East but also create over three thousand new jobs."

Copyright © Dana Fradon/The New Yorker Collection, www.cartoonbank.com.

Your Methods section should clearly indicate how you will get the information needed to answer the questions in the Topics to Investigate section.

7. **Qualifications/Facilities/Resources.** Do you have the knowledge and skills needed to conduct this study? Do you have adequate access to the organization? Do you have access to any equipment you will need to conduct your research (computer, books, etc.)? Where will you turn for help if you hit an unexpected snag?

You'll be more convincing if you have already scheduled an interview, checked out books, or printed out online sources.

8. **Work Schedule.** List both the total time you plan to spend on and the date when you expect to finish each of the following activities:

- Gathering information
- Analyzing information
- Preparing the progress report
- Organizing information
- Writing the draft
- Revising the draft
- Preparing the visuals
- Editing the draft
- Proofreading the report

Organize your work schedule either in a chart or in a calendar. A good schedule provides realistic estimates for each activity, allows time for unexpected snags, and shows that you can complete the work on time.

9. **Call to Action.** In your final section, indicate that you'd welcome any suggestions your instructor may have for improving the research plan. Ask your instructor to approve your proposal so that you can begin work on your report.

Figure 21.4 shows a student proposal for a long report using online and library research.

A business plan is a special kind of proposal. Young Money offers several articles on creating business plans, as well as other resources.

Figure 21.4 Proposal for a Student Group Report Using Online and Library Research

October 28, 2012

To: Steve Kaczmarek
AA CC HD
From: Anwar Abbe, Candice Call, Heather Driscoll, Tony Yang

In subject line ① indicate that this is a proposal
② specify the kind of report
③ specify the topic.

Subject: Proposal to Study the Feasibility of an Alternative Dispute Resolution Program
for Shepherd Greene Industries

Spell out term the first time you use it, with the abbreviation in parentheses. Then you can use the abbreviation by itself.

Many private companies and government agencies use Alternative Dispute Resolution (ADR) programs to resolve disputes with employees. Adopting an ADR program would save time and money for Shepherd Greene. It would also help reinforce the company's application to manufacture parts for US Air Force combat aircraft.

MLA Style omits the periods in "US."

Summarize topic and purposes of report.

For our report, we plan to research the feasibility of an ADR program at Shepherd Greene. We hope to recommend a model ADR program for the company based on an existing program with demonstrated success.

Background

Triple-space (2 empty spaces).

Double-space (1 empty space) after heading before first paragraph.

Founded in 1958, Shepherd Greene Industries is primarily a manufacturer of engine components for civilian aircraft. Since 1997, the company has also produced engine components and wing mount assemblies for military reconnaissance aircraft. The company is privately held.

Bold headings.

Problem

Background gives your reader information needed to understand the problem.

Shepherd Greene wants an alternative to traditional court remedies, which have had mixed results for the company in the recent past. In 1999, an employee fired for poor attendance sued, claiming a manager had illegally altered her time cards. After two years in the courts, Shepherd Greene settled for an undisclosed amount. In 2004, two employees fired for failing on-the-job drug tests unsuccessfully sued the company to get their jobs back, appealing the case all the way to the State of Ohio Supreme Court. In 2009, a coalition of employees sued the company about a management structure that allegedly keeps black employees in low-level jobs. The suit is still pending.

These lawsuits take months or even years to work through the court systems, costing the company thousands of dollars, not including any settlement or judgment cost. Although outside attorneys are also hired, preparing these cases requires hundreds of staff hours and takes the legal staff away from its primary duty of reviewing bids and contracts with Shepherd Greene's customers and suppliers.

Shepherd Greene has another reason to change the way it handles employment disputes. The company has submitted a bid to the US Air Force to manufacture replacement parts for combat aircraft. In addition to adhering to strict manufacturing guidelines and having the highest security clearance, the successful company must demonstrate stability in its labor and management practices. Programs that minimize employee grievances thus would enhance Shepherd Greene's application.

If "Problem" section is detailed and well-written, you may be able to use it unchanged in your report.

Figure 21.4 Proposal for a Student Group Report Using Online and Library Research (*continued*)

Steve Kaczmarek 2 October 28, 2012

Feasibility *Convince your instructor that you have a backup plan if your original proposal proves unworkable.*

If our research supports creating an ADR program at Shepherd Greene, we will recommend one based on an existing model. If the research suggests an ADR program is inappropriate for Shepherd Greene, we will recommend the company stay with its current system for handling employee disputes. If our research is inconclusive, we will recommend Shepherd Greene revisit the topic in one year.

Topics to Investigate *Indicate what you'll discuss briefly and what you'll discuss in more detail. This list should match your audience's concerns.*

In our report, we will briefly discuss Shepherd Greene's recent litigation history and the general issues in litigating employee grievances. We will focus on the following questions:

- What is ADR?
- What organizations use ADR to handle employment disputes?
- How well does ADR work to resolve employment disputes?
- What model ADR programs seem worth imitating?
- What resources are required to create an ADR program?

If it is well-written, the "Topics to Investigate" section will become the "Scope" section of the report—with minor revisions.

Audiences *Identify the kinds of audience and the major concerns or priority of each.*

Several audiences have a stake in the findings of our research. Our primary audience is Mr. Richard Yang, Director of Legal Services at Shepherd Greene. He is a 17-year employee with the company and has the authority to submit a plan for ADR to Shepherd Greene's top management for approval. A former trial attorney and member of both the Ohio and New York Bar Associations, Mr. Yang favors reforms to help alleviate the glut of lawsuits in our nation's courts. He is especially interested in our group's ability to apply research to the field of law, as one of the group's members is his son and plans to attend law school.

Vary paragraph lengths to provide good visual impact.

You are our initial audience. Your concern is that we produce a report that is timely, logical, thorough, and well-written. You have told us that you have taken courses in business law and journalism law, so the report topic should interest you.

Secondary audiences for this proposal will include employees in Shepherd Greene's legal and human resources departments, the company's top executives, and union representatives. Each of these audiences must support an ADR program for it to succeed.

Methods *If you're writing a report based on library research, list 10–15 sources that look relevant. Give full bibliographic citations. Here, MLA Style is used.*

We will use library research and online research. The following materials on the web or in the Columbus State Community College Educational Resource Center appear to be useful:

Use hanging indents.

If possible, we will also use the library at nearby Ohio State University (OSU). The OSU system is one of the largest in the world and houses significantly more resources than does our own library. As students, we can request materials from the library through OHIOLINK; one of our group members is also a student there.

Bulleted list adds visual variety.

Qualifications and Resources *Cite knowledge and skills from other classes, jobs, and activities that will enable you to conduct the research and interpret your data.*

Here are the strengths we bring to this project:

- Anwar Abbe's knowledge of the manufacturing industry will help us better understand labor and management practices in such an environment. He is a second-year student in the Legal Studies Program and already holds a Bachelor's degree in chemistry from The National Somalian University. Anwar also worked for several years for a paint manufacturer in North Carolina.
- With nearly eight years of experience as a personnel clerk for Franklin County, Candice Call's familiarity with legal issues related to human resources will help us understand the workings of current labor law. She is a second-year student in the Human Resources Technology Program, where she had taken a labor relations course whose text talked briefly about ADR.
- Heather Driscoll's expert knowledge of PowerPoint will be invaluable to creating our oral presentation for this project. A second-year student in Multimedia Technology, she is also an expert at research on the web.
- Tony Yang's internship in Shepherd Greene's management program last summer will help our group understand the company's organizational culture. A junior from OSU who is taking business communication here, Tony is majoring in pre-law/English, plans to specialize in labor law, and has already completed a business law course at

Figure 21.4 Proposal for a Student Group Report Using Online and Library Research (continued)

Steve Kaczmarek 4 October 28, 2012

OSU. He is also the son of Richard Yang, the director of Shepherd Greene's legal department, and will have access to the company's legal and human resources staff.

Work Schedule

The following schedule will allow us to complete our report by the due date.

Activity	Responsibility	Total Time	Completion Date
Gathering Information	Anwar, Heather	25 hours	November 15
Preparing the Progress Report	Tony	3 hours	November 19
Analyzing Information	All	10 hours	November 22
Organizing Information	Anwar, Heather	5 hours	November 23
Planning the Draft/Visuals	All	8 hours	November 25
Drafting the Report/Visuals	Tony, Candice	15 hours	November 30
Planning Revisions	All	8 hours	December 2
Revising the Draft/Visuals	Tony, Candice	12 hours	December 7
Editing	Heather	7 hours	December 9
Proofreading	All	3 hours	December 10

Make items in list parallel.

Call to Action

With Shepherd Greene's legal costs increasing and its bid to the US Air Force under consideration, we urge you to accept this proposal. Let us know if you have suggestions for improving our project. Our team stands ready to begin its research immediately with your approval.

It's tactful to indicate you'll accept suggestions. End on a positive note.

Sales Proposals

To sell expensive goods or services, you may be asked to submit a proposal.

For everything you offer, show the reader benefits (◀◀ Module 8) of each feature, using you-attitude (◀◀ Module 6). Consider using psychological description (◀◀ p. 116) to make the benefits vivid.

Use language appropriate for your audience. Even if the buyers want a state-of-the-art system, they may not want the level of detail that your staff could provide; they may not understand or appreciate technical jargon (◀◀ p. 260).

With long proposals, provide a one-page cover letter. Organize the cover letter in this way:

1. Catch the reader's attention and summarize up to three major benefits you offer.
2. Discuss each of the major benefits in the order in which you mentioned them in the first paragraph.
3. Deal with any objections or concerns the reader may have.

Proposal for a Student Report

Include the following sections:

- Problem
- Feasibility
- Audience
- Topics to Investigate
- Methods
- Qualifications
- Work Schedule
- Call to Action

Building a Critical Skill

Identifying “Hot Buttons” LO 21-4

In a proposal, as in any persuasive document, it’s crucial that you deal with the audience’s “hot buttons.” **Hot buttons** are the issues to which your audience has a strong emotional response.

Study your audience’s preferences and motivations. For instance, older, or nontraditional, college students may have different hot buttons than typical 18-to-22-year-old students. Nontraditional students may want remedial skills courses, child or adult day care, 24-hour computer labs, and evening and weekend classes. They may challenge more what they hear in the classroom. Social activities important to traditional students may hold little interest for nontraditional ones. While many traditional students see the workplace as a destination, chances are nontraditional students are already there and have a different work ethic. Nontraditional students also may be more likely to choose a two-year rather than a four-year campus.

Hot buttons sometimes cause people to make what seems like an “illogical” decision—unless you understand the real priorities. A phone company lost a \$36 million sale to a university because it assumed that the university’s priority would be cost. Instead, the university wanted a state-of-the-art system. The university accepted a higher bid.

When Ernst & Young prepared a proposal to provide professional services to a major automotive company, a team of 15 subject-matter experts spent two intense days working one-on-one with client personnel to learn what issues they cared most

about. Reducing work and saving money were concerns, and Ernst & Young proposed redesigning the work to reduce costs and increase return on investment. The focus on value also enabled Ernst & Young to identify an opportunity related to but not part of the original RFP.

But even more important, spending time with the automotive company allowed Ernst & Young to see that a real “hot button” was that the competitor who held the current contract for services seemed to take the automotive company for granted. Ernst & Young exploited this hot button in two ways. First, the proposed work plan included steps to help stakeholders in the company buy into and support the project. Second, the form of the oral presentation of the proposal shouted, “We understand you.” Ernst & Young invited the decision makers to come to the Ernst & Young office in Columbus, Ohio, for the presentation. Personnel wore shirts with the company logo, mirroring the uniforms worn at the automotive company. The presentation took place on an office floor that had been designed to mimic the floor plan at the automotive company.

Not only providing logical evidence but also meeting emotional needs won Ernst & Young a seven-figure contract, with the possibility of even more work.

Sources: “Older Students Transforming Some Colleges,” July 15, 2005, downloaded at www.cnn.com/2005/EDUCATION/07/15/older.students.ap/; and James Lane to Kitty Locker, March 8, 1999.

Sales proposals must be relevant to discourse communities. Writer Geoffrey James points out engineers and accountants may see the return on investment differently. James maintains “the proposal must state the solution in terms that the customer understands and accepts. In order to provide value, the proposal must address the specific value system and concerns of each set of decision-makers.”

Source: Geoffrey James, “How to Write a Killer Sales Proposal,” CBS News, March 23, 2010, http://www.cbsnews.com/8301-505183_162-28549012-10391735/how-to-write-a-killer-sales-proposal/.

4. Mention other benefits briefly.
5. Ask the reader to approve your proposal and provide a reason for acting promptly.

Proposals for Funding

If you need money for a new or continuing public service project, you may want to submit a proposal for funding to a foundation, a corporation, a government agency, or a religious agency. In a proposal for funding, stress the needs your project will meet and show how your project helps fulfill the goals of the organization you are asking to fund it. Every funding source has certain priorities; most post lists of the projects they have funded in the past.

Figuring the Budget and Costs

A good budget is crucial to making the winning bid. Ask for everything you need to do a quality job. Asking for too little may backfire, leading the funder to think that you don’t understand the scope of the project.

Read the RFP to find out what is and isn’t fundable. Talk to the program officer and read successful past proposals to find out

- What size projects will the organization fund in theory?
- Does the funder prefer making a few big grants or many smaller grants?
- Does the funder expect you to provide in-kind or matching funds from other sources?

Think about exactly what you'll do and who will do it. What will it cost to get that person? What supplies or materials will he or she need? Also think about indirect costs for using office space, about retirement and health benefits as well as salaries, about office supplies, administration, and infrastructure.

Make the basis of your estimates specific.

Weak: 75 hours of transcribing interviews	\$1,500
Better: 25 hours of interviews; a skilled transcriber can complete an hour of interviews in 3 hours; 75 hours @ \$20/hour	\$1,500

Without inflating your costs, give yourself a cushion. For example, if the going rate for skilled transcribers is \$20 an hour, but you think you might be able to train someone and pay only \$12 an hour, use the higher figure. Then, even if your grant is cut, you'll still be able to do the project well.

What should go in a progress report? LO 21-5

► *What you've done, why it's important, and what the next steps are.*

When you're assigned to a single project that will take a month or more, you'll probably be asked to file one or more progress reports. A progress report reassures the funding agency or employer that you're making progress and allows you and the agency or employer to resolve problems as they arise. Different readers may have different concerns. An instructor may want to know whether you'll have your report in by the due date. A client may be more interested in what you're learning about the problem. Adapt your progress report to the needs of the audience.

Progress reports can do more than just report progress. You can use progress reports to

- **Enhance your image.** Provide details about the number of documents you've read, people you've surveyed, or experiments you've conducted to create a picture of a hardworking person doing a thorough job.
- **Float trial balloons.** Explain, "I could continue to do X [what you approved]; I could do Y instead [what I'd like to do now]." The detail in the progress report can help back up your claim. Even if the idea is rejected, you don't lose face because you haven't made a separate issue of the alternative.
- **Minimize potential problems.** As you do the work, it may become clear that implementing your recommendations will be difficult. In your regular progress reports, you can alert your boss or the funding agency to the challenges that lie ahead, enabling them to prepare psychologically and physically to act on your recommendations.

Christine Barabas's study of the progress reports in a large research and development organization found that poor writers tended to focus on what they had done and said very little about the value of their work. Good writers, in contrast, spent less space writing about the details of what they'd done but much more space explaining the value of their work for the organization.³

Subject lines for progress reports are straightforward. Specify the project on which you are reporting your progress.

Subject: Progress on Developing a Marketing Plan for TCBY

Subject: Progress on Group Survey on Campus Parking

After his proposal to direct James Bond film was turned down by producer Albert R. Broccoli, Steven Spielberg met with friend George Lucas to go over an idea for a globe-trotting action film with an American twist. The result was *Raiders of the Lost Ark* (since renamed *Indiana Jones and the Raiders of the Lost Ark*), the highest-grossing film of 1981 and the first of four movies about the intrepid but fallible archaeologist.

Source: Jim Windolf, "Keys to the Kingdom," *Vanity Fair*, February 2008, downloaded at www.vanityfair.com/culture/features/2008/02/indianajones200802.

Site to See

Go to
<http://schools.nyc.gov/Accountability/tools/report/default.htm>

to see progress reports on New York City schools.

Apple's annual Supplier Responsibility Report, which chronicles progress in its work with a global network of companies, showed improvements in areas like underage labor violations. At 27 pages, the 2012 report details audits for 97% of its suppliers, finding 6 active and 13 historical instances of underage labor at five facilities, down considerably over previous years. The report also notes two explosions, both in China, which killed 4 people and collectively injured 78. The reports date back to 2007 when, prompted by allegations of worker abuse, Apple began to more closely scrutinize supplier practices.

Source: Phillip Michaels, "Apple Unveils Supplier Names with 2012 Responsibility Report," *Macworld*, January 13, 2012, http://www.macworld.com/article/1164815/apple_unveils_supplier_names_with_2012_responsibility_report.html.

If you are submitting weekly or monthly progress reports on a long project, number your progress reports or include the time period in your subject line. Include dates for the work completed since the last report and to be completed before the next report.

Make your progress report as positive as you honestly can. You'll build a better image of yourself if you show that you can take minor problems in stride and that you're confident of your own abilities.

Negative: I have not **deviated markedly** from my schedule, and I feel that I will have **very little trouble** completing this report by the due date.

Positive: I am **back on schedule and expect to complete my report by the due date.**

Progress reports can be organized in three ways: to give a chronology, to specify tasks, or to support a recommendation.

Chronological Progress Reports

The following pattern of organization focuses on what you have done and what work remains.

1. **Summarize your progress in terms of your goals and your original schedule.** Use measurable statements.

Poor: My progress has been **slow**.

Better: The research for my report is **about one-third complete**.

2. **Under the heading Work Completed, describe what you have already done.** Be specific, both to support your claims in the first paragraph and to allow the reader to appreciate your hard work. Acknowledge the people who have helped you. Describe any serious obstacles you've encountered and tell how you've dealt with them.

Poor: I have found many articles about Procter & Gamble on the web. I have had a few problems finding how the company keeps employees safe from chemical fumes.

Better: On the web, I found Procter & Gamble's home page, its annual report, and mission statement. No one whom I interviewed could tell me about safety programs specifically at P&G. I have found seven articles about ways to protect workers against pollution in factories, but none mentions P&G.

3. **Under the heading Work to Be Completed, describe the work that remains.** If you're more than three days late (for school projects) or two weeks late (for business projects) submit a new schedule, showing how you will be able to meet the original deadline. You may want to discuss "Observations" or "Preliminary Conclusions" if you want feedback before writing the final report or if your reader has asked for substantive interim reports.
4. **Either express your confidence in having the report ready by the due date or request a conference to discuss extending the due date or limiting the project.** If you are behind your original schedule, show why you think you can still finish the project on time.

The student progress report in Figure 21.5 uses this pattern of organization.

Site to See

Go to

www.who.int/hiv/pub/progress_report2011/en/index.html

for current and past World Health Organization progress reports on the global HIV/AIDS fight.

Task Progress Reports

In a task progress report, organize information under the various tasks you have worked on during the period. For example, a task progress report for a group report project might use the following headings:

Finding Background Information on the Web and in Print

Analyzing Our Survey Data

Working on the Introduction of the Report and the Appendices

Under each heading, the group could discuss the tasks it has completed and those that remain.

Figure 21.5 A Student Chronological Progress Report

<p><i>¶ 1: Summarize results in terms of purpose, schedule.</i></p> <p><i>Be very specific about what you've done.</i></p> <p><i>Show how you've overcome minor problems.</i></p> <p><i>Specify the work that remains.</i></p>	<p>April 29, 2013</p> <p>To: Kitty O. Locker</p> <p>From: David G. Bunnel DGB</p> <p>Subject: Progress on CAD/CAM Software Feasibility Study for the Architecture Firm, Patrick and Associates, Inc.</p> <p>I have obtained most of the information necessary to recommend whether CADAM or CATIA is better for Patrick and Associates, Inc. (P&A). I am currently analyzing and organizing this information and am on schedule.</p> <p>Work Completed <i>Underline headings or bold.</i></p> <p>To learn how computer literate P&A employees are, I interviewed a judgment sample of five employees. My interview with Bruce Ratekin, the director of P&A's Computer-Aided Design (CAD) Department on April 15 enabled me to determine the architectural drafting needs of the firm. Mr. Ratekin also gave me a basic drawing of a building showing both two- and three-dimensional views so that I could replicate the drawing with both software packages.</p> <p>I obtained tutorials for both packages to use as a reference while making the drawings. First, I drew the building using CADAM, the package designed primarily for two-dimensional architectural drawings. I encountered problems with the isometric drawing because there was a mistake in the manual I was using; I fixed the problem by trying alternatives and finally getting help from another CADAM user. Next, I used CATIA, the package whose strength is three-dimensional drawings, to construct the drawing. I am in the process of comparing the two packages based on these criteria: quality of drawing, ease of data entry (lines, points, surfaces, etc.) for computer experts and novices, and ease of making changes in the completed drawings. Based on my experience with the packages, I have analyzed the training people with and without experience in CAD who would need to learn to use each of these packages.</p> <p>Work to Be Completed</p> <p>Making the drawings has shown that neither of the packages can do everything that P&A needs. Therefore, I want to investigate the feasibility of P&A's buying both packages.</p> <p>As soon as he comes back from an unexpected illness that has kept him out of the office, I will meet with Tom Merrick, the CAD systems programmer for The Ohio State University, to learn about software expansion flexibility for both packages as well as the costs for initial purchase, installation, maintenance, and software updates. After this meeting, I will be ready to begin the first draft of my report.</p> <p>Whether I am able to meet my deadline will depend on when I am able to meet with Mr. Merrick. Right now, I am on schedule and plan to submit my report by the June 10th deadline.</p> <p><i>Indicate changes in purpose, scope, or recommen- dations.</i></p> <p><i>Progress report is a low-risk way to bring the readers</i></p> <p><i>End on a positive note.</i></p>
--	---

Recommendation Progress Reports

Recommendation progress reports recommend action: increasing the funding for a project, changing its direction, canceling a project that isn't working. When the recommendation will be easy for the reader to accept, use the Direct Request pattern of organization from Module 12 (◀ p. 191). If the recommendation is likely to meet strong resistance, the Problem-Solving pattern (◀ pp. 191–193) may be more effective.

Summary of Learning Objectives

- **Information reports** collect data for the reader; **analytical reports** present and interpret data; **recommendation reports** recommend action or a solution. (**LO 21-1**)
 - A good purpose statement must make three things clear: (**LO 21-2**)
 - The organizational problem or conflict.
 - The specific technical questions that must be answered to solve the problem.
 - The rhetorical purpose (to explain, to recommend, to request, to propose) the report is designed to achieve.
 - A proposal must answer the following questions: (**LO 21-3**)
 - What problem are you going to solve?
 - How are you going to solve it?
 - What exactly will you provide for us?
 - Can you deliver what you promise?
 - When will you complete the work?
 - How much will you charge?
 - In a proposal for a class research project, use the following headings: (**LO 21-3**)
 - Problem
 - Feasibility
 - Audience
 - Topics to Investigate
 - Methods
 - Qualifications
 - Work Schedule
 - Call to Action
 - Use the following pattern of organization for the cover letter for a sales proposal. (**LO 21-3**)
1. Catch the reader's attention and summarize up to three major benefits you offer.
 2. Discuss each of the major benefits in the order in which you mentioned them in the first paragraph.
 3. Deal with any objections or concerns the reader may have.
 4. Mention other benefits briefly.
 5. Ask the reader to approve your proposal and provide a reason for acting promptly.
- In a proposal for funding, stress the needs your project will meet. Show how your project helps fulfill the goals of the organization you are asking to fund it. (**LO 21-3**)
 - Hot buttons are issues to which your audience has a strong emotional response. Identify hot buttons by studying your audience's preferences and motivations. Then, use the information to help shape your appeals to the audience. What may seem illogical at first may, in fact, reveal what the audience's priorities are. (**LO 21-4**)
 - To focus on what you have done and what work remains, organize a progress report in this way: (**LO 21-5**)
 1. Summarize your progress in terms of your goals and your original schedule.
 2. Under the heading "Work Completed," describe what you have already done.
 3. Under the heading "Work to Be Completed," describe the work that remains.
 4. Either express your confidence in having the report ready by the due date or request a conference to discuss extending the due date or limiting the project.
 - Use positive emphasis in progress reports to create an image of yourself as a capable, confident worker. (**LO 21-5**)

Assignments for Module 21

Questions for Comprehension

- 21.1** What three components belong in a purpose statement? (**LO 21-2**)
- 21.2** What is an RFP? (**LO 21-3**)

Questions for Critical Thinking

- 21.4** In the budget for a proposal, why isn't it to your advantage to try to ask for the smallest amount of money possible? (**LO 21-3**)
- 21.5** What should you do if you have information you want to put in a proposal that the RFP doesn't call for? (**LO 21-3**)

Exercises and Problems

21.8 Writing a Proposal for a Student Report (LO 21-3)

Write a proposal to your instructor to do the research for a formal or informal report. (See Problems 23.9, 23.10, 23.11, 24.8, 24.9, and 24.10.)

The headings and the questions in the section titled "Proposals for Class Research Projects" are your RFP;

- 21.3** How does the RFP relate to the organization of the proposal? (**LO 21-3**)

- 21.6** How can you learn your audience's hot buttons? (**LO 21-4**)
- 21.7** How do you decide whether to write a chronological, task, or recommendation progress report? (**LO 21-5**)

be sure to answer every question and to use the headings exactly as stated in the RFP. Exception: Where alternate heads are listed, you may choose one, combine the two ("Qualifications and Facilities"), or treat them as separate headings in separate categories.

21.9 Writing a Chronological Progress Report (LO 21-5)

Write a memo summarizing your progress on your report.

In the introductory paragraph, summarize your progress in terms of your schedule and your goals. Under a heading titled “Work Completed,” list what you have already done. (This is a chance to toot your own horn: If you have solved problems creatively, say so! You can also describe obstacles you’ve encountered that you have not yet solved.) Under “Work to Be Completed,” list what you still have to do. If you are more than two days behind the schedule you submitted with your proposal, include

21.10 Writing a Task Progress Report (LO 21-5)

Write a memo summarizing your progress on your report in terms of its tasks.

As Your Instructor Directs,

21.11 Writing a Chronological Progress Report for a Group Report (LO 21-5)

Write a memo to your instructor summarizing your group’s progress.

In the introductory paragraph, summarize the group’s progress in terms of its goals and its schedule, your own progress on the tasks for which you are responsible, and your feelings about the group’s work thus far.

Under a heading titled “Work Completed,” list what has already been done. Be most specific about what you yourself have done. Describe briefly the chronology of group activities: number, time, and length of meetings; topics discussed and decisions made at meetings.

If you have solved problems creatively, say so! You can also describe obstacles you’ve encountered that you

a revised schedule, listing the completion dates for the activities that remain.

In your last paragraph, either indicate your confidence in completing the report by the due date or ask for a conference to resolve the problems you are encountering.

As Your Instructor Directs,

Send the e-mail or paper progress report to

- a. The other members of your group.
- b. Your instructor.

Send the e-mail or paper progress report to

- a. The other members of your group.
- b. Your instructor.

have not yet solved. In this section, you can also comment on problems that the group has faced and whether or not they’ve been solved. You can comment on things that have gone well and have contributed to the smooth functioning of the group.

Under “Work to Be Completed,” list what you personally and other group members still have to do. Indicate the schedule for completing the work.

In your last paragraph, either indicate your confidence in completing the report by the due date or ask for a conference to resolve the problems you are encountering.

Polishing Your Prose

Mixing Verb Tenses

Normally, verb tenses within a sentence, paragraph, and document should be consistent.

Incorrect: I went to the store yesterday. There, I will buy a new computer, desk, and bookcase. Afterward, I assemble everything and arrange my new home office.

Correct: I went to the store yesterday. There, I bought a new computer, desk, and bookcase. Afterward, I assembled everything and arranged my new home office.

When you have to mix tenses in a document, do so appropriately. The reader must understand the relationship between time and action throughout your document:

Incorrect: By the time you get to the meeting, I drop off the package at FedEx.

Correct: By the time you get to the meeting, I will have dropped off the package at FedEx.

The correct example uses *future perfect tense* to indicate action that has not yet occurred, but will prior to your getting to the meeting (expressed in *simple present tense*).

In general, stick to simple verb tenses in business communication. Standard edited English prefers them. Unless you must indicate specifically when one action takes place with respect to another, the simple tenses work fine.

- Use present tense in résumés and job application letters to describe current job duties; use it in persuasive documents when you want the reader to feel close to the action.
- Use past tense in résumés and job application letters to describe previous job duties; use it in correspondence and reports when action has already occurred.
- Use future tense in messages to describe action that still needs to be completed—in a progress report, any remaining activities; in a résumé or job application letter, when you will graduate from college or complete a job certification program.

Exercises

Fix the verb tense errors in the following sentences.

1. Cason takes the Graduate Record Examination at Sinclair Community College this past Wednesday.

2. Norm gains 38 years of experience working with a diverse range of clients in South and Central America.
3. Prior to working with Locke, Crane, and Bischoff, Natalie will have worked for Microsoft in Redmond, Washington.
4. If we took a plane to Louisville next Friday, we arrived on Saturday afternoon.
5. Doubtless, Jeannie will say at the meeting last week, our customers expect the best in service.
6. After I get home from the sales meeting in Sarasota, I gave you a call.
7. Riana Tilden was vice president of OCSEA in 2015, at which time Denny Chang will become president.
8. George, Deron, and Elissa were planning a surprise party for Alekanekelo on Friday. Let them know if you can attend.
9. Once I pass my last three classes at Michigan State University, I received my Masters in Public Administration.
10. As you saw from my résumé, I will have many experiences from previous jobs that make me an excellent candidate for this position.

Check your answers to the odd-numbered exercises at the back of the book.

Finding, Analyzing, and Documenting Information

LEARNING OBJECTIVES

Module 22 describes how to collect, analyze, and cite information effectively. After completing the module, you should be able to

- | | |
|--|--|
| LO 22-1 Apply strategies for print and online information searches. | LO 22-4 Identify respondents for surveys and interviews. |
| LO 22-2 Apply strategies for web page evaluation. | LO 22-5 Analyze information from research. |
| LO 22-3 Apply strategies for survey and interview question use. | LO 22-6 Practice common citation styles for research documentation. |

Research for a report may be as simple as getting a computer printout of sales for the last month; it may involve finding online or published material or surveying or interviewing people. **Secondary research** retrieves information that someone else gathered. Library research and online searches are the best-known kinds of secondary research. **Primary research** gathers new information. Surveys, interviews, and observations are common methods for gathering new information for business reports.

Arguably, research is more important today than ever before. Organizations want reasonable assurances that new ventures will work, governments want to know the best way to use public dollars, and investors want to know that the companies they own are being managed well. Good research helps.

There are many information resources available today—so much so, the amount can be overwhelming. The web has made it possible to find information quickly and efficiently, but the problem is that some of that information is unreliable. It's critical that researchers rely on reputable sources, and that often means looking at who did the research and how, and not just how recent it is or how easy it was to find. The Building a Critical Skill box in this module can help you determine what are good sources.

Site to See

www.learnwebskills.com/search/main.html

Debbie Flanagan offers a useful tutorial on web search strategies. Try the web scavenger hunt to test your search sophistication.

Splunk is the first “Big Data” company to go public. It specializes in scouring vast amounts of data and mining it for useful information. In particular, fields like health care can benefit from Big Data mining. When Microsoft Research scientist Eric Horvitz and his colleagues analyzed 300,000 emergency room (ER) visits, for instance, they discovered that if a patient stayed in the ER past 14 hours, they were more likely to be readmitted. With 20% of patients released from American hospitals needing to be readmitted within a month, the cost to Medicare alone for inefficiency is \$17 billion annually.

How can I find information online and in print? LO 22-1

- Learn how to do keyword searches.

Keywords are the terms that the computer searches for in a database or on the web. The *ABI/Inform Thesaurus* lists synonyms and the hierarchies in which information is arranged in various databases.

At the beginning of a search, use all the synonyms and keywords you can think of. For example, the report on alternative dispute resolution (►►Module 24) used the following search terms:

alternative dispute resolution

ADR

mediation

arbitration

employee grievances

Skim several of the first sources you find; if they use additional or different terms, search for these new terms as well.

Use a Boolean search (Figure 22.1) to get fewer but more useful hits. For example, to study the effect of the minimum wage on employment in the restaurant industry, you might specify

(minimum wage) *and* (restaurant *or* fast food) *and*
(employment rate *or* unemployment)

Without *and*, you’d get articles that discuss the minimum wage in general, articles about every aspect of *restaurants*, and every article that refers to *unemployment*, even though many of these would not be relevant to your topic. The *or* calls up articles that use the term *fast food* but not *restaurant*. An article that used the phrase *food service industry* would be eliminated unless it also used the term *restaurant*.

Use a computer to search for print as well as online sources. Include paper as well as online sources in your research. Information in many periodicals is checked before it goes to print; papers in scholarly journals are reviewed by experts before they are accepted. Thus, print sources are often more credible than web pages, which anyone can post.

Figures 22.2, 22.3, and 22.4 list some of the many resources available.

According to a research report by the Joint Center for Political and Economic Studies, college-educated African Americans and Hispanic Americans making more than \$50,000 annually are the fastest growing segment of Internet users. When it comes to broadband use, 94 percent of African Americans and 98 percent of Hispanic Americans with college degrees are online.

Technology is revolutionizing access to data and research. One particular widget—a small computer program that enhances existing web applications—compiled data on the victims of the Haitian earthquake from among many. With thousands of people missing or dead from the quake, Google's Person Finder widget created a portal for users searching for victims.

Source: Andy Carvin, "Using Google's Haiti Missing Persons Widget," *NPR*, January 17, 2010, http://www.npr.org/blogs/inside/2010/01/using_google_haiti_missing_pe.html.

Using the Internet for Research LO 22-2

Most research projects today include the Internet. However, don't rely solely on the Internet for research. Powerful as it is, the Internet's just one tool. Your public or school library, experts in your company, journals and newspapers, and even information in your files are others.

Finding Web Pages

Use root words to find variations. A root word such as *stock* followed by the plus sign (*stock +*) will yield *stock*, *stocks*, *stockmarket*, and so forth.

Use quotation marks for exact terms. If you want only sites that use the term "business communication," put quotes around the term.

Uncapitalize words. Capitalizing words limits your search to sites where the word itself is capitalized; if the word doesn't have to be capitalized, don't.

Some search engines group related sites based on keywords. Look for these links at the top of your search engine.

If you get a broken or dead link, try shortening the URL. For example, if www.mirror.com/newinfo/index.html no longer exists, try www.mirror.com. Then check the site map to see whether it has the page you want.

Evaluating Web Pages

Anyone can post a website, and no one may check the information for accuracy or truthfulness. By contrast, many print

sources, especially academic journals, have an editorial board that reviews manuscripts for accuracy and truthfulness. The review process helps ensure that information meets high standards.

For a list of websites about evaluating information, see http://www.vuw.ac.nz/staff/alastair_smith/EVALN/EVALN.HTM

Use reputable sources. Start with sites produced by universities and established companies or organizations. Be aware, however, that such organizations are not going to post information that makes them look bad. To get "the other side of the story," you may need to monitor listservs or access pages critical of the organization. (Search for "consumer opinion" and the name of the organization.)

Look for an author. Do individuals take "ownership" of the information? What are their credentials? How can you contact them with questions? Remember that ".edu" sites could be from students not yet expert on a subject.

Check the date. How recent is the information?

Check the source. Is the information adapted from other sources? If so, try to get the original.

Compare the information with other sources. Internet sources should complement print sources. If facts are correct, you'll likely find them recorded elsewhere.

How do I write questions for surveys and interviews? LO 22-2

- Test your questions to make sure they're neutral and clear.

A **survey** questions a large group of people, called **respondents** or **subjects**. The easiest way to ask many questions is to create a **questionnaire**, a written list of questions that people fill out. Figure 22.5 shows an example of a questionnaire. An **interview** is a structured conversation with someone who will be able to give you useful information. Surveys and interviews can be useful only if the questions are well designed.

Phrase questions in a way that won't bias the response. Avoid questions that make assumptions about your subjects. The question "Does your spouse have a job outside the home?" assumes that your respondent is married.

Use words that mean the same thing to you and to the respondents. Words like *often* and *important* mean different things to different people. Whenever possible, use more objective measures:

Vague: Do you use the web often?

Better: How many hours a week do you spend on the web?

 ② tell how the information will be used.

Survey on Internships

Please answer the following questions and return the completed survey to the person who gave it to you. All information will be confidential and used only for a class project examining the feasibility of establishing an internship program for a particular business.

1. Major _____

2. Rank: First Year _____
 Sophomore _____
 Junior _____
 Senior _____

Start with easy-to-answer questions.

3. How important it is to you to have one or more internships before you graduate?
 ___ Very important
 ___ Somewhat important
 ___ Not important

Put directions in parentheses to separate them from the question itself.

4. Did you have an internship last summer?
 ___ Yes ___ No (Skip to Question 6.)

Branch questions allow readers to skip questions.

5. What were the most beneficial aspects of your internship? (Check all that apply.)
 ___ Work related to my major
 ___ Likely to get a job offer/got a job offer
 ___ Chance to explore my interests
 ___ Made connections
 ___ Worked with clients
 ___ Looks good on my résumé
 ___ Other (Please explain.)

6. How much money did you make last summer? (Approximate hourly rate, before taxes)

Give readers information they need to understand your question.

Check here if you did not make any money last summer.

7. For next summer, could you afford to take an unpaid internship?
 ___ Yes ___ No

8. For next summer, could you afford to take an internship paying only the minimum wage?
 ___ Yes ___ No

9. How important is each of the following criteria in choosing whether to accept a specific internship?
 Very Some Not
 impt. impt. impt.

a. Money	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Make sure to break up the lines. Leaving an extra space makes it more likely that the respondent will check the right line.</i>
b. Prestige of company	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c. Location near where you live now	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
d. Quality of mentoring	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
e. Building connections	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
f. Chance of getting a job with that company	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
g. Gaining experience	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

10. How interested are you in a career in managed care?
 ___ Very interested
 ___ Somewhat interested
 ___ Not interested

11. Could you take a job in Cleveland next summer?
 ___ Definitely
 ___ Maybe
 ___ No

12. Have you heard of FFI Rx Managed Care?
 ___ Yes
 ___ No

13. I invite any other comments you would like to make regarding internships.
Using columns gets the survey on one side, saving money in copying and eliminating the problem of people missing questions on the back. But it leaves almost no room to write in comments.

Thank you for taking the time to answer this survey. Please return it to the person who gave it to you.

Repeat where to turn in or mail completed surveys.

Closed questions have a limited number of possible responses. **Open questions** do not lock the subject into any sort of response. Figure 22.6 gives examples of closed and open questions. The second question in Figure 22.6 is an example of a Likert-type scale. Closed questions are faster for subjects to answer and easier for researchers to score. However, since all answers must fit into chosen categories, they cannot probe the complexities of a

Poor questions yield poor data.

SHOE-NEW BUSINESS © 1999 MacNelly. Distributed by King Features Syndicate.

subject. You can improve the quality of closed questions by conducting a pretest with open questions to find categories that matter to respondents.

When you use multiple-choice questions, make sure that only one answer fits in any one category. In the following example of overlapping categories, a person who worked for a company with exactly 25 employees could check either *a* or *b*. The resulting data would be unreliable.

Figure 22.6 Closed and Open Questions

Closed Questions

Are you satisfied with the city bus service? (yes/no)

How good is the city bus service?

Excellent 5 4 3 2 1 Terrible

Indicate whether you agree or disagree with each of the following statements about city bus service:

A D The schedule is convenient for me.

A D The routes are convenient for me.

A D The drivers are courteous.

A D The buses are clean.

Rate each of the following improvements in the order of their importance to you (1 = most important, 6 = least important)

Buy new buses.

Increase non-rush-hour service on weekdays.

Provide earlier and later service on weekdays.

Increase service on weekends.

Buy more buses with wheelchair access.

Provide unlimited free transfers.

Open Questions

How do you feel about the city bus service?

Tell me about the city bus service.

Why do you ride the bus? (or, Why don't you ride the bus?)

What do you like and dislike about the city bus service?

How could the city bus service be improved?

Tough as it might be to fathom, the U.S. Food and Drug Administration (FDA) is finally requiring tobacco companies to reveal what actually is in cigarettes. Drug companies for years have had to reveal product formulas, but 2010 was the first year the FDA asked tobacco companies to do likewise. Among ingredients in cigarettes are cocoa and menthol for flavor, but up to 4,000 chemicals, including 60 known carcinogens, may be present. The Centers for Disease Control and Prevention estimate 443,000 deaths, or nearly 1 in 5 deaths, are attributable annually to smoking-related diseases.

Source: "What's in a Cigarette? FDA to Study Ingredients," January 18, 2010, <http://www.cbsnews.com/stories/2010/01/18/ap-business/main6111057.shtml>; and "Smoking and Tobacco Use Factsheet," Centers for Disease Control, downloaded on February 16, 2010, http://www.cdc.gov/tobacco/data_statistics/fact_sheets/health_effects/effects_cig_smoking/.

Research can reveal unusual or counterintuitive findings. Babies born in the fall are more likely to reach age 100 than those born at other times of the year. A study at The Ohio State University found that the more debt college students have, the higher their self-esteem. Asian Americans once led the U.S. in household wealth—with a median of \$168,103 in 2005—but dropped behind European Americans a few years later because of the housing market implosion. Whites now top the list, with a median household wealth of \$113,149, more than 20 times the median net worth of African Americans and 18 times that of Latino and Hispanic Americans.

Sources: Catherine de Lange, "Autumn Babies More Likely to Hit 100," *NewScientist*, July 12, 2012, <http://www.newscientist.com/article/dn22054-autumn-babies-more-likely-to-hit-100.html>; Liz Goodwin, "The More Debt College Students Have, the Higher Their Self Esteem," June 16, 2011, [http://news.yahoo.com/s/yblog_thelookout/the-more-debt-college-students-have-the-higher-their-self-esteem](http://news.yahoo.com/s/yblog_thelookout/20110616/us_yblog_thelookout/the-more-debt-college-students-have-the-higher-their-self-esteem); and Hope Yen, "Wealth Gap Widens Between Whites, Minorities," July 26, 2011, <http://news.yahoo.com/wealth-gap-widens-between-whites-minorities-040224418.html>.

Overlapping categories:

Indicate the number of full-time employees in your company on May 16:

- a. 0–25
- b. 25–100
- c. 100–500
- d. over 500

Discrete categories

Indicate the number of full-time employees in your company on May 16:

- a. 0–25
- b. 26–100
- c. 101–500
- d. over 500

Branching questions direct different respondents to different parts of the questionnaire based on their answers to earlier questions.

10. Have you talked to an academic adviser this year?

yes no
(if "no," skip to question 14.)

Use closed multiple-choice questions for potentially embarrassing topics. Seeing their own situation listed as one response can help respondents feel that it is acceptable. However, very sensitive issues are perhaps better asked in an interview, where the interviewer can build trust and reveal information about himself or herself to encourage the interviewee to answer.

Generally, put early in the questionnaire questions that will be easy to answer. Put questions that are harder to answer or that people may be less willing to answer (e.g., age and income) near the end of the questionnaire. Even if people choose not to answer such questions, you'll still have the rest of the survey filled out.

If subjects will fill out the questionnaire themselves, pay careful attention to the physical design of the document. Use indentations and white space effectively; make it easy to mark and score the answers. Include a brief statement of purpose if you (or someone else) will not be available to explain the questionnaire or answer questions. Pretest the questionnaire to make sure the directions are clear. One researcher mailed out a two-page questionnaire without pretesting it. Twenty-five respondents didn't answer the questions on the back of the first page.¹

How do I decide whom to survey or interview? LO 22-4

- Use a random sample for surveys, if funds permit.
- Use a judgment sample for interviews.

The **population** is the group you want to make statements about. Depending on the purpose of your research, your population might be all *Fortune* 1000 companies, all business students at your college, or all consumers.

Defining your population correctly is crucial to getting useful information. For example, Microscan wanted its sales force to interview "customer defectors." At first, salespeople

assumed that a “defector” was a former customer who no longer bought anything at all. By that definition, very few defectors existed. But then the term was redefined as customers who had stopped buying *some* products and services. By this definition, quite a few defectors existed. And the fact that each of them had turned to a competitor for some of what they used to buy from Microscan showed that improvements—and improved profits—were possible.²

Because it is not feasible to survey everyone, you select a sample. If you take a true random sample, you can generalize your findings to the whole population from which your sample comes. In a **random sample**, each person in the population theoretically has an equal chance of being chosen. When people say they did something *randomly* they often mean *without conscious bias*. However, unconscious bias exists. Someone passing out surveys in front of the library will be more likely to approach people who seem friendly and less likely to ask people who seem intimidating, in a hurry, much older or younger, or of a different race, class, or sex. True random samples rely on random digit tables, generated by computers and published in statistics texts and books such as *A Million Random Digits*.

A **convenience sample** is a group of respondents who are easy to get: students who walk through the student center, people at a shopping mall, workers in your own unit. Convenience samples are useful for a rough pretest of a questionnaire. However, you cannot generalize from a convenience sample to a larger group.

A **judgment sample** is a group of people whose views seem useful. Someone interested in surveying the kinds of writing done on campus might ask each department for the name of a faculty member who cared about writing, and then send surveys to those people. Judgment samples are often good for interviews, where your purpose is to talk to someone whose views are worth hearing.

The response rate—the percentage of people who respond—can differ according to the kind of survey used. According to figures researchers have reported to the Marketing Research Association, telephone surveys averaged 18% (31% when researchers worked from a list), door-to-door surveys averaged 53%, face-to-face surveys in malls and other

Since going public in 2012, Facebook has received greater scrutiny than ever before. One revelation is that as much as 8.7% of the site's billion users may be fakes or duplicates, determined by the company after an internal audit reported to the Security and Exchange Commission. A company called Limited Run stopped advertising on Facebook after it claimed that as many as 80% of the clicks it received on Facebook ads came from bots, or web robots, rather than people.

Source: Tim Sprinkle, “The 7 Ugly Truths About Facebook,” August 3, 2012, <http://finance.yahoo.com/blogs/the-exchange/7-ugly-truths-facebook-180418410.html>.

Sharon Lee's marketing firm, Look-Look, ferrets out youth trends. Her sources include nearly 10,000 14- to 30-year-old volunteers who upload photos, send e-mail reports, and use the firm's message boards.

Estimates of how much digital data is consumed annually are as high as 9.57 zettabytes, or a stack of books 5.6 billion miles high and stretching from Earth to Neptune more than 20 times. The determination was made by University of California at San Diego scientists, who crunched numbers from the world's 27 million business computer servers. However, since the estimates use 2008 totals, the most recent year they were available, the number could be significantly higher. Such staggering sums may mean little to the average person. When reporter Brian X. Chen asked passersby in Brooklyn to define a megabyte, people spoke in terms of practicality. Said Miranda Popkey, "It's a measure of how much information you store. If there are too many of them, I can't send my e-mail attachment." For the record, a megabyte is 1,000 kilobytes, or about one minute of a downloaded song.

Sources: Catharine Smith, "This Is How Much Information the World Consumes Each Year," April 7, 2011, http://www.huffingtonpost.com/2011/04/06/world-information-consumption_n_845806.html; and Brian X. Chen, "A Ballooning Megabyte Budget," *The New York Times*, April 8, 2012, <http://www.nytimes.com/2012/04/09/technology/how-to-budget-megabytes-becomes-more-urgent-for-users.html?pagewanted=all>.

locations averaged 38%, and web surveys averaged 34%. Good researchers follow up, contacting nonrespondents at least once and preferably twice to try to persuade them to participate in the survey.³

How should I analyze the information I've collected? **LO 22-5**

► *Look for answers to your research questions, patterns, and interesting nuggets.*

As you analyze your data, look for answers to your research questions and for interesting nuggets that may not have been part of your original questions but emerge from the data. Such stories can be more convincing in reports and oral presentations than pages of computer printouts.

Understanding the Source of the Data

If your report is based upon secondary data from library and online research, look at the sample, the sample size, and the exact wording of questions to see what the data actually measure. For instance, many polls in the 2004 presidential race showed Americans were closely divided in their choice of a candidate—so close that the difference often was within the margin of error. Thus, pollsters could not confidently say whether President George W. Bush or Senator John Kerry was in the lead. Because the few points of difference between candidates could have been mere chance, pollsters then had to find sample sizes large enough to make poll results meaningful.

Identify the assumptions used in analyzing the data. When Nielsen Media Research estimates the number of people who view television stations, it must make assumptions: how well its People Meter actually tracks whether people are watching and how best to count groups that are hard to measure.

Nielsen recently reported that 18- to 34-year-old males are watching less television, in part because they spend more time with videogames and DVDs. However, television networks complained that the company was underreporting this group's viewing. For example, they said, Nielsen was not counting young people who leave for college, and its sample did not include homes with TiVo or other personal video recorders. Thus, the networks, Nielsen, and advertisers disagree about whether young men are losing interest in television programming.⁴

Evaluating online sources, especially web pages, can be difficult, since anyone can post pages on the web or contribute comments to chat groups. Check the identity of the writer: Is he or she considered an expert? Can you find at least one source printed in a respectable newspaper or journal that agrees with the web page? If a comment appeared in chat groups, did others in the group support the claim? Does the chat group include people who could be expected to be unbiased and knowledgeable? Especially when the issue is controversial, seek out opposing views.

Analyzing Numbers

Many reports analyze numbers—either numbers from databases and sources or numbers from a survey you have conducted.

If you've conducted a survey, your first step is to transfer the responses on the survey form into numbers. For some categories, you'll assign numbers arbitrarily. For example, you might record men as "1" and women as "2"—or vice versa. Such assignments don't matter, as long as you're consistent throughout your project. In these cases, you can report the number and percentage of men and women who responded to your survey, but you can't do anything else with the numbers.

When you have numbers for salaries or other figures, start by figuring the average, or mean, the median, and the range. The **average** or **mean** is calculated by adding up all the figures and dividing by the number of samples. The **median** is the number that is exactly in the middle. When you have an odd number of observations, the median will be the middle number. When you have an even number, the median will be the average of the two numbers in the center. The **range** is the high and low figures for that variable.

Finding the average takes a few more steps when you have different kinds of data. For example, it's common to ask respondents whether they find a feature "very important," "somewhat important," or "not important." You might code "very important" as "3," "somewhat important" as "2," and "not important" as "1." To find the average in this kind of data,

1. For each response, multiply the code by the number of people who gave that response.
2. Add up the figures.
3. Divide by the total number of people responding to the question.

For example, suppose you have surveyed 50 people about the features they want in a proposed apartment complex.

The average gives an easy way to compare various features. If the party house averages 2.3 while extra parking for guests is 2.5, you know that your respondents would find extra parking more important than a party house. You can now arrange the factors in order of importance:

Table 4. "How Important Is Each Factor to You in Choosing an Apartment?"

$n = 50$; 3 = "Very Important"

Extra parking for guests	2.5
Party house	2.3
Pool	2.2
Convenient to bus line	2.0

Often it's useful to simplify numerical data: round it off and combine similar elements. Then you can see that one number is about 2½ times another. Charting it can also help you see patterns in your data. Look at the raw data as well as at percentages. For example, a 50% increase in shoplifting incidents sounds alarming—but an increase from two to three shoplifting incidents sounds well within normal variation.

Analyzing Words

If your data include words, try to find out what the words mean to the people who said them. Respondents to Whirlpool's survey of 180,000 households said that they wanted "clean refrigerators." After asking more questions, Whirlpool found that what people really wanted were refrigerators that *looked* clean, so the company developed models with textured fronts and sides to hide finger-prints.⁵ Also try to measure words against numbers. When he researched possible investments, Peter Lynch found that people in mature industries were pessimistic, seeing clouds. People in immature industries saw pie in the sky, even when the numbers weren't great.⁶

Look for patterns. If you have library sources, on which points do experts agree? Which disagreements can be explained by early theories or numbers that have now changed? By different interpretations of the same data? Having different values and criteria? In your interviews and surveys, what patterns do you see?

- Have things changed over time?
- Does geography account for differences?
- What similarities do you see?

With \$1.44 being the average savings per coupon and assuming it takes a minute to clip it, shoppers are saving at the rate of \$86.40 per hour, tax-free. Saving \$25 a week will net \$1,200 a year, or more than \$100,000 over a typical lifetime.

Source: Brett Arends, "Doing the Math on Coupons," February 11, 2010, <http://customsites.yahoo.com/financiallyfit/finance/article-108816-4123-3-how-to-save-100-in-an-hour?ywaad=ad0035>.

Three Kinds of Samples

In a **random sample**, each person in the population has an equal chance of being chosen. A **convenience sample** is a group of respondents who are easy to get. A **judgment sample** is a group of people whose views seem useful.

With the world watching, Greek triple jumper Paraskevi Papachristou tweeted a racist joke that got her expelled from the 2012 Summer Games. A week later, Swiss soccer player Michel Morganella tweeted racist and threatening messages against South Koreans and was likewise sent packing. Both later apologized, but Papachristou was initially defiant. Measure the impact of words carefully, especially those hurled at other people and at their expense.

(continued)

(continued)

American businesses spent \$125.9 billion on employee training in 2009 alone, but little research exists on what the return on investment is for much of the training. For "tangible" workshops, where specific skills are taught in areas like sales and product knowledge, measuring results is easier than in "intangible" workshops, where broader skills are taught in areas like leadership and team effectiveness. More than 90% of Fortune 500 CEOs surveyed said they are most interested in learning the business impact of employee training, but less than 10% saw that currently happening in their company.

Source: Gary M. Stern, "Company Training Programs: What Are They Really Worth?" *Fortune*, May 27, 2011, <http://management.fortune.cnn.com/2011/05/27/company-training-programs-what-are-they-really-worth/>.

Analyzing Numbers

The **average** or **mean** is calculated by adding up all the figures and dividing by the number of samples. The **median** is the number that is exactly in the middle. The **range** is the high and low figures for that variable.

- What differences do you see?
- What confirms your hunches?
- What surprises you?

Checking Your Logic

Don't confuse causation with correlation. **Causation** means that one thing causes or produces another. **Correlation** means that two things happen at the same time. One might cause the other, but both might be caused by a third.

For example, suppose that you're considering whether to buy cell phones for everyone in your company, and suppose that your surveys show that the people who currently have cell phones are, in general, more productive than people who don't use cell phones. Does having a cell phone lead to higher productivity? Perhaps. But perhaps productive people are more likely to push to get cell phones from company funds, while less productive people are more passive. Perhaps productive people earn more and are more likely to be able to buy their own cell phones if the organization doesn't provide them.

Consciously search for at least three possible causes for each phenomenon you've observed and at least three possible solutions for each problem. The more possibilities you brainstorm, the more likely you are to find good options. In your report, mention all of the possibilities; discuss in detail only those that will occur to readers and that you think are the real reasons and the best solutions.

When you have identified patterns that seem to represent the causes of the problem or the best solutions, check these ideas against reality. Can you find support in the quotes or in the numbers? Can you answer counterclaims? If you can, you will be able to present evidence for your argument in a convincing way.

If you can't prove the claim you originally hoped to make, modify your conclusions to fit your data. Even when your market test is a failure, you can still write a useful report.

- Identify changes that might yield a different result (e.g., selling the product at a lower price might enable the company to sell enough units).
- Discuss circumstances that may have affected the results.
- Summarize your negative findings in progress reports to let readers down gradually and to give them a chance to modify the research design.
- Remember that negative results aren't always disappointing to the audience. For example, the people who commissioned a feasibility report may be relieved to have an impartial outsider confirm their suspicions that a project isn't feasible.⁷

How should I document sources? LO 22-6

- Use MLA or APA format.

The two most widely used formats for endnotes and bibliographies in reports are those of the Modern Language Association (MLA) and the American Psychological Association (APA). Figure 22.7 shows the MLA and APA formats for books, government documents, journal and newspaper articles, online sources, and interviews. In 2009, MLA Style changed to include such terms as "Print," "Web," or "E-mail" in documentation, and it no longer requires URLs to be included.

In a good report, sources are cited and documented smoothly and unobtrusively. **Citation** means attributing an idea or fact to its source **in the body of the report**: for example, "According to the 2000 Census . . ." or "Jane Bryant Quinn argues that. . ." Citing sources demonstrates your honesty, enhances your credibility, and protects you from charges of plagiarism. **Documentation** means providing the bibliographic information readers would need to go back to the original source. Note that citation and documentation are used in addition to quotation marks. If you use the source's exact words, you'll use

Figure 22.7 MLA and APA Formats for Documenting Sources

As of 2009, MLA Style no longer requires URLs in documentation. However, indicate the basic type of publication.

APA Style

APA internal citation gives the author's last name and the date of the work in parentheses in the text. A comma separates the author's name from the date (Gilsdorf & Leonard, 2001). The page number is given only for direct quotations (Cross, 2001, p. 74). If the author's name is used in the sentence, only the date is given in parentheses. A list of REFERENCES gives the full bibliographic documentation, arranging the entries alphabetically by the first author's last name.

In titles of articles and books capitalize only Article in a Periodical **comma** **last name first** **Year (period outside parenthesis).** **No quotes around title of article**

Gilsdorf, J., & Leonard, D. (2001). Big stuff, little stuff: A decennial measurement of executives' and academics' reactions to questionable usage elements. *The Journal of Business Communication*, 38, 439-475. **no "pp."** when journal has a volume number **Italicize volume.** Capitalize all major words in title of journal, magazine, or newspaper.

① first word, ② first word of subtitle, ③ proper nouns. McCartney, S. (2000, December 27). Why a baseball superstar's megacontract can be less than it seems. *The Wall Street Journal*, p. B1, B3. Separate discontinuous pages with comma and space.

Article in an Edited Book Ampersands join names of co-authors, co-editors. Editors' names have last names last.

No punctuation

the name of the person you're citing and quotation marks in the body of the report; you'll indicate the source in parentheses and a list of References or Works Cited. If you put the source's idea into your own words, or if you condense or synthesize information, you don't need quotation marks, but you still need to tell whose idea it is and where you found it.

Indent long quotations on the left and right to set them off from your text. Indented quotations do not need quotation marks; the indentation shows the reader that the passage is a quote. Because many readers skip quotes, always summarize the main point of the quotation in a single sentence before the quotation. End the sentence with a colon, not a period, because it introduces the quote.

Interrupt a quotation to analyze, clarify, or question it.

Use square brackets around words you add or change to clarify the quote or make it fit the grammar of your sentence. Omit any words in the original source that are not essential for your purposes. Use ellipses (spaced dots) to indicate omissions.

for advice on how to use APA and MLA citation styles.

Summary of Learning Objectives

- **Keywords** are the terms that the computer searches for in a database or on the web. At the beginning of a search, use all of the synonyms and keywords you can think of. Skim several of the first sources you find; if they use additional or different terms, search for these other terms as well. (**LO 22-1**)
- To decide whether to use a website as a source in a research project, evaluate the site's authors, objectivity, information, and revision date. (**LO 22-2**)
- A **survey** questions a large group of people, called **respondents or subjects**. A **questionnaire** is a written list of questions that people fill out. An **interview** is a structured conversation with someone who will be able to give you useful information. (**LO 22-3**)
- **Closed questions** have a limited number of possible responses. **Open questions** do not lock the subject into any sort of response. **Branching questions** direct different respondents to different parts of the questionnaire based on their answers to earlier questions. (**LO 22-3**)
- In a **random sample**, each person in the population theoretically has an equal chance of being chosen. Only in a random sample is the researcher justified in inferring that the results from the sample are also true of the population from which the sample comes. A **convenience sample** is a group of subjects who are easy to get. A **judgment sample** is a group of people whose views seem useful. (**LO 22-4**)
- **Causation** means that one thing causes or produces another. **Correlation** means that two things happen at the same time. One might cause the other, but both might be caused by a third. (**LO 22-5**)
- **Citation** means attributing an idea or fact to its source in the body of the report. Documentation means providing the bibliographic information readers would need to go back to the original source. (**LO 22-6**)

Assignments for Module 22

Questions for Comprehension

- 22.1** What is the difference between open and closed questions? (**LO 22-3**)
- 22.2** What is the difference between the mean and the median? (**LO 22-5**)
- 22.3** What is the difference between correlation and causation? (**LO 22-5**)

Questions for Critical Thinking

- 22.4** How do you decide whether a website is an acceptable source for a report? (**LO 22-2**)
- 22.5** Why do you need to know the exact way a question was phrased before using results from the study as evidence? (**LO 22-3**)
- 22.6** Why should you test a questionnaire with a small group of people before you distribute it? (**LO 22-3**)
- 22.7** Why should you look for alternate explanations for your findings? (**LO 22-5**)

Exercises and Problems

22.8 Evaluating websites (**LO 22-2**)

Evaluate seven websites related to the topic of your report. For each, consider

- Author(s)
- Objectivity
- Information
- Revision date

22.9 Evaluating Survey Questions (**LO 22-3**)

Evaluate each of the following questions. Are they acceptable as they stand? If not, how can they be improved?

- a. Questionnaire on grocery purchases.
 1. Do you *usually* shop at the same grocery store?
 - a. Yes
 - b. No

Based on these criteria, which sites are best for your report? Which are unacceptable? Why?

As Your Instructor Directs,

- a. Share your results with a small group of students.
- b. Present your results in a memo to your instructor.
- c. Present your results to the class in an oral presentation.
2. How much is your average grocery bill?
 - a. Under \$25
 - b. \$25–50
 - c. \$50–100
 - d. \$100–150
 - e. Over \$150

- b. Survey on technology
 - 1. Would you generally welcome any technological advancement that allowed information to be sent and received more quickly and in greater quantities than ever before?
 - 2. Do you think that all people should have free access to all information, or do you think that information should somehow be regulated and monitored?

c. Survey on job skills

How important are the following skills for getting and keeping a professional-level job in U.S. business and industry today?

22.10 Designing Questions for an Interview or Survey (LO 22-3)

Submit either a one- to three-page questionnaire or questions for a 20- to 30-minute interview AND the information listed below for the method you choose.

Questionnaire

1. Purpose(s), goal(s)
2. Subjects (who, why, how many)
3. How and where to be distributed
4. Rationale for order of questions, kinds of questions, wording of questions

Interview

1. Purpose(s), goal(s)
2. Subject (who and why)
3. Proposed site, length of interview
4. Rationale for order of questions, kinds of questions, wording of questions, choice of branching or follow-up questions

As Your Instructor Directs,

- a. Create questions for a survey on one of the following topics:
 - Survey students on your campus about their knowledge of and interest in the programs and activities sponsored by a student organization.
 - Survey workers at a company about what they like and dislike about their jobs.

	Low				High
Ability to communicate	1	2	3	4	5
Leadership ability	1	2	3	4	5
Public presentation skills	1	2	3	4	5
Selling ability	1	2	3	4	5
Teamwork capability	1	2	3	4	5
Writing ability	1	2	3	4	5

- Survey people in your community about their willingness to pay more to buy products using recycled materials and to buy products that are packaged with a minimum of waste.
- Survey students and faculty on your campus about whether adequate parking exists.
- Survey two groups on a topic that interests you.

- b. Create questions for an interview on one of the following topics:

- Interview an international student about the form of greetings and farewells, topics of small talk, forms of politeness, festivals and holidays, meals at home, size of families, and roles of family members in his or her country.
- Interview the owner of a small business about the problems the business has, what strategies the owner has already used to increase sales and profits and how successful these strategies were, and the owner's attitudes toward possible changes in product line, decor, marketing, hiring, advertising, and money management.
- Interview someone who has information you need for a report you're writing.

Using MLA Style

Using MLA requires two steps: gathering all the information you need and then applying it correctly. MLA documentation uses

- The full names of all authors; the full names of editors of an edited book.
- The title and subtitle (if any).
- The title of the edited book or journal, for articles within books and journals.
- For books: city of publication (with state if not well known), publisher, and year of publication.

- For articles in popular periodicals: the date of publication, in as much detail as the periodical gives, and the page on which the article starts.
- For articles in scholarly periodicals: the volume and year and beginning and ending page numbers.
- The specific page(s) on which you find the fact(s) you cite or the sections you quote.

Using MLA Style requires that you look closely at the order of words and at punctuation marks. For example, when you use a

Polishing Your Prose

short quote (39 words or fewer), the period of your sentence goes outside the parentheses with the page number. In a long indented quote (40 words or more), the parentheses with the page number follows the period at the end of the sentence.

In 2009, MLA Style changed to include such terms as “Print,” “Web,” or “E-mail” in documentation, and it no longer requires URLs to be included. For more details on how to use MLA Style, see Figure 22.7 or <http://owl.english.purdue.edu/owl/>.

Exercises

Identify and correct the errors in MLA format in the following Works Cited items.

Short Reports

LEARNING OBJECTIVES

Module 23 can help you to write the best short reports. After completing the module, you should be able to

- | | |
|---|---|
| LO 23-1 Select patterns for short business report organization. | LO 23-3 Apply principles for good business report style. |
| LO 23-2 Apply strategies for short business report organization. | LO 23-4 Apply strategies for specific and polite question use. |

Whenever you have a choice, write a short report rather than a long one. Never put information in reports just because you have it or just because it took you a long time to find it. Instead, choose the information that your reader needs to make a decision. Should you need to write a longer report, however, the types of reports described here could still be used and expanded. Module 24 provides the key principles for writing a long report.

One report writer was asked to examine a building that had problems with heating, cooling, and air circulation. The client who owned the building wanted quick answers to three questions: What should we do? What will it cost? When will it pay for itself? The client wanted a three-page report with a seven-page appendix showing the payback figures.¹ When Susan Kleimann studied reply forms for a hotel, its managers said they didn't want to read a report. So Kleimann limited the "report" to an executive summary with conclusions and recommendations. Everything else went into appendixes.²

Short reports normally use letter or memo format.

Do different kinds of reports use different patterns of organization? LO 23-1

► Yes. *Work with the readers' expectations.*

Informative, feasibility, and justification reports will be more successful when you work with the readers' expectations for that kind of report.

<http://www.nwcdc.coop/Resources/OBCFeasibilityReport.pdf>

for a copy of the Northwest Co-Operative Development Center's Feasibility Report on biodiesel fuel production and distribution.

General Motors (GM) decided to stop advertising with Facebook after it could no longer justify the cost. According to GM, the third-biggest U.S. advertiser across all media, paid ads on Facebook seemed to have had little impact on car purchases. Kia Motors Corporation also questioned the effectiveness of Facebook ads, but like Subaru, it plans to keep advertising with the company.

Source: Sharon Terlep, Suzanne Vranica, and Shayndi Raice, "GM Says Facebook Ads Don't Pay Off," *The Wall Street Journal*, May 16, 2012, <http://online.wsj.com/article/SB10001424052702304192704577406394017764460.html>.

Informative and Closure Reports

An **informative** or **closure report** summarizes completed work or research that does not result in action or recommendation.

Informative reports often include the following elements:

- **Introductory paragraph** summarizing the problems or successes of the project.
- **Chronological account** of how the problem was discovered, what was done, and what the results were.
- **Concluding paragraph** with suggestions for later action. In a recommendation report, the recommendations would be based on proof. In contrast, the suggestions in a closure or recommendation report are not proved in detail.

Figure 23.1 presents this kind of informative report.

Feasibility Reports

Feasibility reports evaluate several alternatives and recommend one of them. (Doing nothing or delaying action can be one of the alternatives.)

Feasibility reports normally open by explaining the decision to be made, listing the alternatives, and explaining the criteria. In the body of the report, each alternative will be evaluated according to the criteria. Discussing each alternative separately is better when one alternative is clearly superior, when the criteria interact, and when each alternative is indivisible. If the choice depends on the weight given to each criterion, you may want to discuss each alternative under each criterion.

Whether your recommendation should come at the beginning or the end of the report depends on your reader. Most readers want the "bottom line" up front. However, if the reader will find your recommendation hard to accept, you may want to delay your recommendation till the end of the report when you have given all your evidence.

Justification Reports

Justification reports recommend or justify a purchase, investment, hiring, or change in policy. If your organization has a standard format for justification reports, follow that format. If you can choose your headings and organization, use this pattern when your recommendation will be easy for your reader to accept:

1. **Indicate what you're asking for and why it's needed.** Because the reader has not asked for the report, you must link your request to the organization's goals.
2. **Briefly give the background of the problem or need.**
3. **Explain each of the possible solutions.** For each, give the cost and the advantages and disadvantages.
4. **Summarize the action needed to implement your recommendation.** If several people will be involved, indicate who will do what and how long each step will take.
5. **Ask for the action you want.**

Figure 23.1 An Informative Memo Report Describing How Local Government Solved a Problem

JEFFERSON COUNTY COMMISSIONERS

April 20, 2013

Use your organization's culture to decide whether to list titles.

To: Doug Perrin, Human Resources Director

Informal short reports use letter or memo format.

From: Tamalyn Sykes, Staff Training and Development Manager *TS*

Subject: Workplace Violence Awareness Training at the Commissioners' Office

First paragraph summarizes main points.

Three months ago, the Commissioners' Office began to offer workplace violence awareness training to all 1,200 Jefferson County employees under its direct authority. The program was held to reduce employee concerns about the possibility of a hostage situation similar to the one in October at the State Workers' Compensation building next to the county courthouse.

Purpose and scope of report.

In this report, I will explain the need for the program, as well as its structure and cost.

Triple-space before heading.

Capitalize first letter of major words in heading.

Need for Workplace Violence Awareness Training

Talking heads tell reader what to expect in each section.

On October 11, 2010, county employees were shocked to learn of a hostage situation at the State Workers' Compensation building. A 41-year-old man, frustrated that his final benefits appeal had been rejected and facing home foreclosure, walked into a 15th-floor office with a handgun and took five people hostage. He demanded to see the account manager who had denied his original claim.

Reason training is needed.

When the account manager stepped out of her office, she was shot twice by the man, who then turned the gun on himself. Both died. Later, questions abounded: How could the man have entered the building with a handgun? What could have been done to prevent violence? What emergency procedures were in place to protect staff? Why did building security fail to respond soon enough to prevent violence?

Specific impact on organization.

In the weeks that followed, many county employees expressed concern to supervisors that they felt vulnerable—after all, if it happened next door, it could happen here. Calls to the county's Employee Assistance Program for counseling tripled. Supervisors also noted drops in employee attendance; one supervisor reported that half of her staff called off work the week after the shooting.

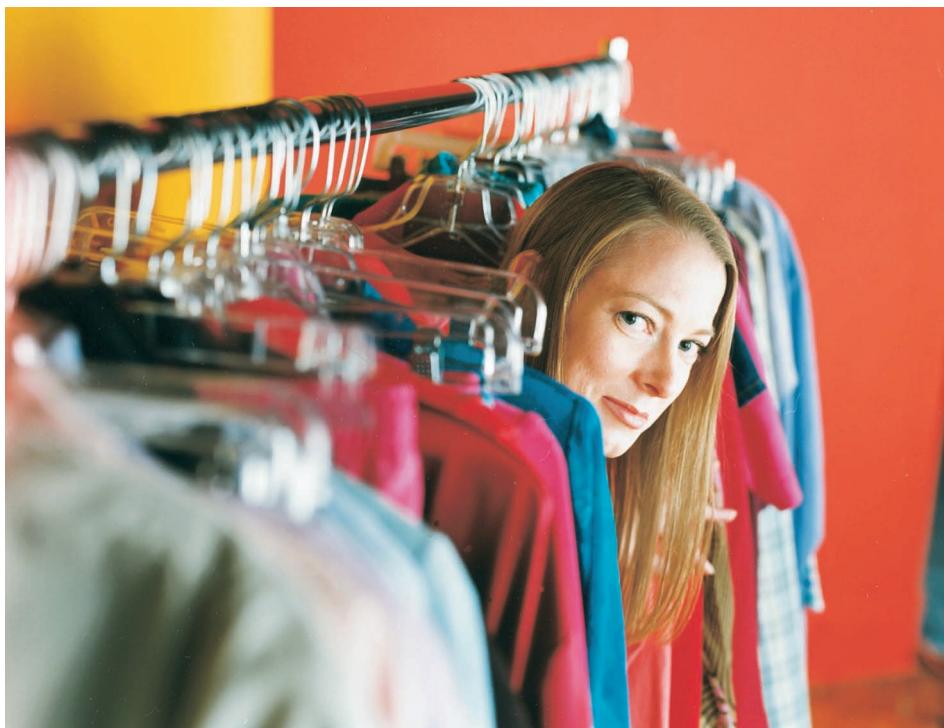

Figure 23.1 An Informative Memo Report Describing How Local Government Solved a Problem (*continued*)

Short subject (or reader's name)	Page number	Date
Workplace Violence Awareness Training	2	April 20, 2013
<i>Bold headings.</i>		
Structure and Cost of Training		
<p>At the November 20 General Session, the Commissioners approved a proposal to initiate workplace violence awareness training to address employee concerns. I then wrote and published the requisite RFP for services, and three training organizations responded with bids. New Horizons Training Services submitted the lowest and best bid.</p> <p>The Commissioners hired New Horizons to provide 11 training sessions for 100–150 persons each. Sessions were held in the courthouse auditorium twice weekly starting January 7. While managers were allowed to schedule employees for sessions at their discretion, training was mandatory for all 1,200 employees. Employees on vacation or sick leave were required to attend a special “make-up” training session held at New Horizons’ headquarters in March.</p> <p>The two-and-a-half-hour training sessions consisted of three parts:</p> <ul style="list-style-type: none"> • A one-hour video on general issues related to workplace violence. • A one-hour panel discussion led by New Horizons’ staff and featuring members of the county’s security department and crisis management team (videotaped for the make-up session.) • A half-hour question-and-answer session that included a written evaluation of the program. <p>At the end, the county’s “Action Plan” booklet for dealing with workplace violence was distributed. The plan includes emergency telephone numbers, evacuation procedures, an overview of public safety measures at the courthouse, and directions on what to do in a hostage situation.</p> <p>The total cost for the sessions was \$11,500: \$1,000 for each session at the courthouse and \$500 for the make-up session held at New Horizons’ headquarters.</p> <p>Employee feedback about the program was overwhelmingly positive.</p>		

Double-space between paragraphs.

Indented lists provide visual variety.

Be sure to double-check numbers.

Alissa Kozuh analyzes the words customers type in on the search feature at www.nordstrom.com. She's found five patterns; customers key in particular items ("shoes"), trends ("leopard prints"), departments from the bricks-and-mortar stores ("Brass Plum," the juniors department), designer names, and special occasions ("prom"). The changes she suggested for the site based on her research increased web sales 32%.

If the reader will be reluctant to grant your request, use this variation of the problem-solving pattern described in Module 12:

1. **Describe the organizational problem (which your request will solve).** Use specific examples to prove the seriousness of the problem.
2. **Show why easier or less expensive solutions will not solve the problem.**
3. **Present your solution impersonally.**
4. **Show that the disadvantages of your solution are outweighed by the advantages.**
5. **Summarize the action needed to implement your recommendation.** If several people will be involved, indicate who will do what and how long each step will take.
6. **Ask for the action you want.**

How much detail you need to give in a justification report depends on your reader's knowledge of and attitude toward your recommendation and on the corporate culture. Many organizations expect justification reports to be short—only one or two pages. Other organizations may expect longer reports with much more detailed budgets and a full discussion of the problem and each possible solution.

What are the basic strategies for organizing information? LO 23-2

- Try one of these seven patterns.

Seven basic patterns for organizing information are useful in reports:

1. Comparison/contrast.
2. Problem-solution.
3. Elimination of alternatives.
4. General to particular or particular to general.

Site to See

Go to

sustainability/reporting/
current_reporting.htm](http://www.siemens.com/sustainability/en/sustainability/reporting/current_reporting.htm)

for a copy of Siemens' 2011 Sustainability Report.

Younger people today are weighing the pros and cons of whether to own or rent a wide variety of consumer goods, going beyond housing to include the furniture in it. Even the traditional auto purchase or lease is competing with hourly auto rentals by companies like Zipcar, part of a \$1.8 billion annual industry. There are advantages and disadvantages to each, and the Center for Housing Policy's Jeffrey Lubell points out the opportunity cost of renting instead of buying: "What you are seeing is a delay in all the kinds of decisions that require a long-term financially stable future.

Source: Caroline Fairchild, "Recession Generation Opts to Rent Not Buy Houses to Cars," August 8, 2012, <http://www.bloomberg.com/news/2012-08-08/recession-generation-opts-to-rent-not-buy-houses-to-cars.html>.

5. Geographic or spatial.
6. Functional.
7. Chronological.

Any of these patterns can be used for a whole report or for only part of it.

1. Comparison/Contrast

Comparison/contrast takes up each alternative in turn, discussing strengths and weaknesses. Feasibility studies usually use this pattern.

A variation of the divided pattern is the **pro and con pattern**. In this pattern, under each specific heading, give the arguments for and against that alternative.

Whatever information comes second will carry more psychological weight. This pattern is least effective when you want to deemphasize the disadvantages of a proposed solution, for it does not permit you to bury the disadvantages between neutral or positive material.

A report recommending new plantings for a university quadrangle uses the pro and con pattern:

Advantages of Monocropping

High Productivity

Visual Symmetry

Disadvantages of Monocropping

Danger of Pest Exploitation

Visual Monotony

2. Problem-Solution

Identify the problem; explain its background or history; discuss its extent and seriousness; identify its causes. Discuss the factors (criteria) that affect the decision. Analyze the advantages and disadvantages of possible solutions. Conclusions and recommendations can go either first or last, depending on the preferences of your reader. This pattern works well when the reader is neutral.

A report recommending ways to eliminate solidification of a granular bleach during production uses the problem-solution pattern:

Recommended Reformulation for Vibe Bleach

Problems in Maintaining Vibe's Granular Structure

Solidifying during Storage and Transportation

Customer Complaints about "Blocks" of Vibe in Boxes

Why Vibe Bleach "Cakes"

Vibe's Formula

The Manufacturing Process

The Chemical Process of Solidification

Modifications Needed to Keep Vibe Flowing Freely

3. Elimination of Alternatives

After discussing the problem and its causes, discuss the *impractical* solutions first, showing why they will not work. End with the most practical solution.

Site to See

Go to

<http://164.109.37.240/pt/about/events/2012dbir/>

for the Verizon Business Risk Team's 2012 *Data Breach Investigations Report*, complete with recommendations.

This pattern works well when the solutions the reader is likely to favor will not work, while the solution you recommend is likely to be perceived as expensive, intrusive, or radical.

A report on toy commercials eliminates alternatives:

- The Effect of TV Ads on Children
- Camera Techniques Used in TV Advertisements
- Alternative Solutions to Problems in TV Toy Ads
 - Leave Ads Unchanged
 - Mandate School Units on Advertising
 - Ask the Industry to Regulate Itself
 - Give FCC Authority to Regulate TV Ads Directed at Children

Is earning a college degree a good alternative to just going straight into the workforce? According to a 2012 Georgetown University report, despite some majors being more employable than others, "extensive research, ours included, finds that a college degree is still worth it." *Hard Times, Not All College Degrees are Created Equal* states the unemployment rate for people without a college degree is more than double that of people with a degree.

Source: Lisa Manterfield, "College Degrees That Hiring Managers Love," downloaded on August 9, 2012, at http://education.yahoo.net/articles/degrees_with_job_potential.htm?kid=1MNC6.

4. General to Particular or Particular to General

General to particular starts with the problem as it affects the organization or as it manifests itself in general and then moves to a discussion of the parts of the problem and solutions to each of these parts. Particular to general starts with the problem as the audience defines it and moves to larger issues of which the problem is a part. Both are good patterns when you need to redefine the reader's perception of the problem in order to solve it effectively.

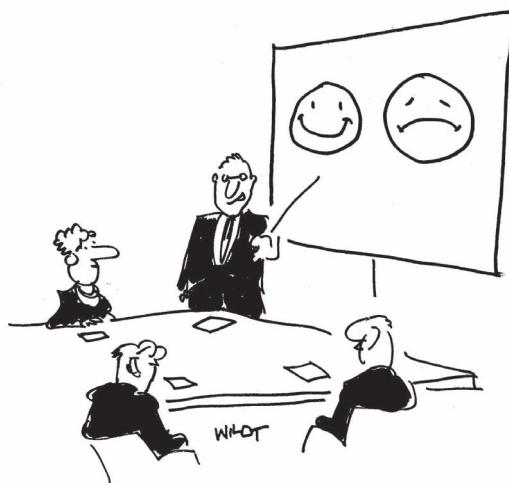

The directors of a student volunteer organization, VIP, have defined their problem as "not enough volunteers." After studying the subject, the writer is convinced that problems in training, the way work is structured, and campus awareness are responsible both for a high drop-out rate and a low recruitment rate. The general to particular pattern helps the audience see the problem in a new way:

- Why VIP Needs More Volunteers
- Why Some VIP Volunteers Drop Out
 - Inadequate Training
 - Feeling that VIP Requires too Much Time
 - Feeling that the Work Is too Emotionally Demanding
- Why Some Students Do Not Volunteer
 - Feeling that VIP Requires too Much Time
 - Feeling that the Work Is too Emotionally Demanding
 - Preference for Volunteering with Another Organization
 - Lack of Knowledge about VIP Opportunities
- How VIP Volunteers Are Currently Trained
- Time Demands on VIP Volunteers
- Emotional Demands on VIP Volunteers
- Ways to Increase Volunteer Commitment and Motivation
 - Improving Training
 - Improving the Flexibility of Volunteers' Hours
 - Providing Emotional Support to Volunteers
 - Providing More Information about Community Needs and VIP Services

5. Geographic or Spatial

In a geographic or spatial pattern, you discuss problems and solutions by units by their physical arrangement. Move from office to office, building to building, factory to factory, state to state, region to region, and so on.

In any form, good reports always provide enough details for audiences to make sound decisions.

"Sure, we can spend all day nitpicking specifics but aren't sweeping generalities so much more satisfying?"

Reprinted with permission of CartoonStock.com, www.cartoonstock.com.

With 60% of employers looking at credit reports for some or all job candidates, states are beginning to pass laws against the practice. California is among 7 states now banning companies from doing credit checks in some capacity, and 19 other states have legislation pending. Still, some research suggests a correlation between bad credit and on-the-job problems, with one study suggesting nearly a third of employees with self-reported credit problems stole, accepted bribes, or did other "counterproductive work behavior."

Source: Annamaria Andriotis, "Hire Hopes for Job Seekers with Dodgy Credit," *The Wall Street Journal: Smart Money*, February 3, 2012, <http://www.smartmoney.com/plan/careers/hire-hopes-for-job-seekers-with-dodgy-credit-1328036148030/>.

A sales report uses a geographic pattern of organization:

Sales Have Risen in the European Economic Community

Sales Have Fallen Slightly in Asia

Sales Are Steady in North America

6. Functional

In functional patterns, discuss the problems and solutions of each functional unit. For example, a report on a new plant might divide data into sections on the costs of land and building, on the availability of personnel, on the convenience of raw materials, and so forth. A government report might divide data into the different functions an office performed, taking each in turn.

A strategy report for a political party uses a functional pattern of organization:

Current Makeup of the Senate

Senate Seats Open in 2010

Seats Held by a Democratic Incumbent

Races in Which the Incumbent Has a Commanding Lead

Races in Which the Incumbent Is Vulnerable

Seats Held by a Republican Incumbent

Races in Which the Incumbent Has a Commanding Lead

Races in Which the Incumbent Is Vulnerable

Seats Where No Incumbent Is Running

7. Chronological

A chronological report records events in the order in which they happened or are planned to happen.

Many progress reports are organized chronologically:

Work Completed in October

Work Planned for November

Instant
Replay

Seven Ways to Organize Information

1. Comparison/contrast
2. Problem-solution
3. Elimination of alternatives
4. General to particular or particular to general
5. Geographic or spatial
6. Functional
7. Chronological

Should I use the same style for reports as for other business documents? LO 23-3

► Yes, with three exceptions

The advice about style in Modules 15 and 16 also applies to reports, with three exceptions:

1. **Use a fairly formal style, without contractions or slang.**
2. **Avoid the word *you*.** In a document to multiple audiences, it will not be clear who *you* is. Instead, use the company name.
3. **Include in the report all the definitions and documents needed to understand the recommendations.** The multiple audiences for reports include readers who may consult the document months or years from now. Explain acronyms and abbreviations the first time they appear. Explain the history or background of the problem. Add as appendixes previous documents on which you build.

The following points apply to any kind of writing, but they are particularly important in reports.

1. Say what you mean.
2. Tighten your writing.
3. Use blueprints, transitions, topic sentences, and headings to make your organization clear to your reader.

Let's look at each of these principles as they apply to reports.

1. Say What You Mean

Not-quite-right word choices are particularly damaging in reports, which may be skimmed by readers who know very little about the subject. Putting the meaning of your sentence in the verbs will help you say what you mean.

- Vague:** My report revolves around the checkout lines and the methods used to get price checks when they arise.
- Better:** My report shows how price checks slow checkout lines and recommends ways to reduce the number of price checks needed.

Sometimes you'll need to completely recast the sentence.

- Incorrect:** The first problem with the incentive program is that **middle managers do not use good interpersonal skills in implementing it. For example, the hotel chef openly ridicules the program.** As a result, the kitchen staff fear being mocked if they participate in the program.
- Better:** The first problem with the incentive program is that some **middle managers undercut it. For example, the hotel chef openly ridicules the program.** As a result, the kitchen staff fear being mocked if they participate in the program.

"Finely Textured Lean Beef," more commonly known as "pink slime," got the attention of consumers recently when it was revealed that the filler was in 70% of the ground beef sold at supermarkets. Once used only for dog food and cooking oils, pink slime comes from the most contaminated parts of the cow but is simmered and treated with ammonia gas to kill germs. Regardless of which term is more meaningful to people, if they've eaten a hamburger in the past few years, chances are they've sampled the filler.

Source: "Is Pink Slime in the Beef at Your Grocery Store?" ABC News, March 8, 2012, <http://abcnews.go.com/blogs/headlines/2012/03/is-pink-slime-in-the-beef-at-your-grocery-store/>.

Building a Critical Skill

Asking Specific and Polite Questions LO 23-4

Learning to ask the *right* question *the right way* is a critical skill in business. Good business communicators use specificity and politeness.

Specificity

Vague questions often result in vague or rambling answers. Therefore, make sure you ask the right question for the kind of answer you want. To get a short answer,

- Give simple choices:

When you work extra hours, would you prefer overtime pay or comp time (the same number of hours off)?

- Ask the real question.

Not: When do you want to meet?

But: Which day is best for you to meet?

- Ask for a quantifiable or measurable response, such as facts, dates, statistics, and so forth.

What percentage of our customers are repeat business?

When you want longer, more qualitative answers, make your question specific enough for your audience to understand what you're asking:

- Start with one of the five Ws or H: who, what, where, when, why, or how.
- Add concrete language that invites a qualified response:

What reservations do you have about my proposal?

Why do you want to work for this firm?

Politeness

Politeness is a matter of timing, tone, language, and culture (◀◀ Module 3). Remember that when and how you ask the question are almost as important as the question itself. To increase your chances of not offending anyone,

- **Use timing.** Don't assault people with questions the moment they arrive or get up to leave. If someone is upset, give him or her time to calm down. Avoid questions when it's obvious someone doesn't want to answer them.
- **Keep questions to a minimum.** Review all the resources at your disposal first to see if the answers are there.
- **Avoid embarrassing or provocative questions.** Even if you are comfortable discussing such issues, don't assume other people are.
- **Avoid language that implies doubt, criticism, or suspicion.**

Rude: You don't really think you can handle this project, do you?

Polite: How do you feel about managing this project?

- **Use you-attitude and empathy.** Try to look at situations from the other person's point of view, particularly if a conflict is involved.

Because culture affects the rules of politeness—and culture changes—keep abreast of what is and isn't acceptable in society. Remember that different cultures have different concepts of politeness.

2. Tighten Your Writing

Instant Replay

Report Style

Reports use the same style as other business documents, with three exceptions:

1. Reports use a more formal style than do many letters and memos.
2. Reports rarely use the word *you*.
3. Reports should be self-explanatory.

Eliminate unnecessary words, use gerunds and infinitives, combine sentences, and reword sentences to cut the number of words.

Wordy: Campus Jewelers' main objective is to increase sales. Specifically, the objective is to double sales in the next five years by becoming a more successful business.

Better: Campus Jewelers' objective is to double sales in the next five years.

3. Use Blueprints, Transitions, Topic Sentences, and Headings

Blueprints are overviews or forecasts that tell the reader what you will discuss in a section or in the entire report. Make your blueprint easy to read by telling the reader how many points there are and numbering them. In the following example, the first sentence in the revised paragraph tells the reader to look for four points; the numbers separate the four points clearly. This overview paragraph also makes a contract with readers, who now expect to read about tax benefits first and employee benefits last.

Paragraph without numbers: Employee Stock Ownership Programs (ESOPs) have **several** advantages. They provide tax benefits for the company. ESOPs also create tax benefits for employees and for lenders. They provide a defense against takeovers. In some organizations, productivity increases because workers now have a financial stake in the company's profits. ESOPs are an attractive employee benefit and help the company hire and retain good employees.

Revised paragraph with numbers: **Employee Stock Ownership Programs (ESOPs) provide four benefits.** **First**, ESOPs provide tax benefits for the company, its employees, and lenders to the plan. **Second**, ESOPs help create a defense against takeovers. **Third**, ESOPs may increase productivity by giving workers a financial stake in the company's profits. **Fourth**, as an attractive employee benefit, ESOPs help the company hire and retain good employees.

Transitions are words, phrases, or sentences that tell the reader whether the discussion is continuing on the same point or shifting points.

There are economic advantages, too.

(Tells the reader that we are still discussing advantages but that we have now moved to economic advantages.)

An alternative to this plan is . . .

(Tells reader that a second option follows.)

These advantages, however, are found only in A, not in B or C.

(Prepares reader for a shift from A to B and C.)

A **topic sentence** introduces or summarizes the main idea of a paragraph. Readers who skim reports can follow your ideas more easily if each paragraph begins with a topic sentence.

Hard to read (no topic sentence): Another main use of ice is to keep the fish fresh. Each of the seven kinds of fish served at the restaurant requires one gallon twice a day, for a total of 14 gallons. An additional 6 gallons a day are required for the salad bar.

Better (begins with topic sentence): **Twenty gallons of ice a day are needed to keep food fresh.** Of this, the biggest portion (14 gallons) is used to keep the fish fresh. Each of the seven kinds of fish served at the restaurant requires one gallon twice a day ($7 \times 2 = 14$). An additional 6 gallons a day are required for the salad bar.

Headings are single words, short phrases, or complete sentences that indicate the topic in each section. A heading must cover all of the material under it until the next heading. For example, *Cost of Tuition* cannot include the cost of books or of room and board. You can have just one paragraph under a heading or several pages. If you do have several pages between headings, you may want to consider using subheadings. Use subheadings only when you have two or more divisions within a main heading.

Topic headings focus on the structure of the report. As you can see from the following example, topic headings give very little information.

Disorganization in writing often causes problems for readers, but disorganization in general can cause problems in business. A survey of 18,000 executives by Express Employment Professionals found that more than half said they lose nine hours a week on the job due to a lack of organization. Disorganized employees who earn \$50,000 annually can cost companies \$11,000 a year in lost hours.

Source: Janis Petrini, "Business Leaders Lose Hours to Disorganization," July 7, 2012, <http://www.corpmagazine.com/management/human-resources/itemid/5887/business-leaders-lose-hours-to-disorganization>.

Recommendation

Problem

Situation 1

Situation 2

Causes of the Problem

Background

Cause 1

Cause 2

Recommended Solution

Talking heads, in contrast, tell the reader what to expect. Talking or informative heads, like those in the examples in this chapter, provide an overview of each section and of the entire report:

Recommended Reformulation for Vibe Bleach
 Problems in Maintaining Vibe's Granular Structure
 Solidifying during Storage and Transportation
 Customer Complaints about "Blocks" of Vibe in Boxes
 Why Vibe Bleach "Cakes"
 Vibe's Formula
 The Manufacturing Process
 The Chemical Process of Solidification
 Modifications Needed to Keep Vibe Flowing Freely

Headings must be **parallel** (◀◀ p. 74), that is, they must use the same grammatical structure. Subheads must be parallel to each other but do not necessarily have to be parallel to subheads under other headings.

Summary of Learning Objectives

- For **informative** or **closure reports**, include: (**LO 23-1**)
 - An introductory paragraph summarizing problems or successes.
 - A chronological account of how the problem was discovered, what was done, and what the results were.
 - A concluding paragraph with suggestions for action.
- For **feasibility reports**, include: (**LO 23-1**)
 - An opening with explanations of the decision to be made, alternatives, and criteria.
 - A body discussing each alternative.
 - A conclusion with a recommendation. The recommendation could also come at the beginning if that's where the reader wants it.
- For **justification reports**, include: (**LO 23-1**)
 - An indication of what you're asking for and why.
 - A brief discussion on the background of the problem.
 - An explanation for each possible solution.
 - A summary of the action needed to implement your recommendation.
 - A call for action.
- For reluctant readers, use a variation of the problem-solving pattern described in Module 12 for justification reports. (**LO 23-1**)
- **Comparison/contrast** takes up each alternative in turn. The **pro and con pattern** divides the alternatives and discusses the arguments for and against that alternative. A **problem-solving report** identifies the problem, explains its causes, and analyzes the advantages and disadvantages of possible solutions. **Elimination** identifies the problem, explains its causes, and discusses the least practical solutions first, ending with the one the writer favors. **General to particular** begins with the problem as it affects the organization or as it manifests itself in general, then moves to a discussion of the parts of the problem and solutions to each of these parts. **Particular to general** starts with specific aspects of the problem, then moves to a discussion of the larger implications of the problem for the organization. **Geographic or spatial** patterns discuss the problems and solutions by units. **Functional** patterns discuss the problems and solutions of each functional unit. (**LO 23-2**)
- Reports use the same style as other business documents, with three exceptions: (**LO 23-3**)
 1. Reports use a more formal style than do many letters and memos.
 2. Reports rarely use the word *you*.
 3. Reports should be self-explanatory.
- To create good report style, (**LO 23-3**)
 1. Say what you mean.
 2. Tighten your writing.
 3. Use blueprints, transitions, topic sentences, and headings.
- **Headings** are single words, short phrases, or complete sentences that cover all of the material under a heading until the next heading. **Informative** or **talking heads** tell the reader what to expect in each section. (**LO 23-3**)
- Learning to ask the right question the right way is a critical skill in business. Avoid vague questions. Give simple choices if you want a short answer and specific information if you want a longer answer. Be polite. Time your message for the appropriate moment, keep questions to a minimum, avoid embarrassing questions, and avoid language that implies doubt or criticism. Use you-attitude and empathy. (**LO 23-4**)

Assignments for Module 23

Questions for Comprehension

23.1 What are the seven basic patterns for organizing information? (**LO 23-1**)

23.2 What is a blueprint? (**LO 23-4**)

23.3 What is a talking head? (**LO 23-4**)

Questions for Critical Thinking

23.4 Why shouldn't you put all the information you have into a report? (**LO 23-1, LO 23-2**)

23.6 Why should you avoid *you* in reports? (**LO 23-4**)

23.5 Why do reports often use a more formal style than other business documents? (**LO 23-4**)

23.7 Why are topic sentences especially useful in reports? (**LO 23-4**)

Exercises and Problems

23.8 Explaining “Best Practices” (**LO 23-1 to LO 23-4**)

Write a report explaining the “best practices” of the unit where you work that could also be adopted by other units in your organization.

23.9 Recommending Action (**LO 23-1 to LO 23-4**)

Write a report recommending an action that your unit or organization should take. Address your report to the person who would have the power to approve your recommendation. Possibilities include

- Hiring an additional worker for your department.

- Making your organization more family friendly.
- Making a change that will make the organization more efficient.
- Making changes to improve accessibility for customers or employees with disabilities.

23.10 Writing Up a Survey (**LO 23-1 to LO 23-4**)

Survey two groups of people on a topic that interests you. Possible groups are men and women, people in business and in English programs, younger and older students, students and townspeople. Nonrandom samples are acceptable.

In your first paragraph, briefly summarize (not necessarily in this order) who conducted the experiment or survey, when it was conducted, where it was conducted, who the subjects were, what your purpose was, and what you found out.

As Your Instructor Directs,

In your **Purpose** section, explain why you conducted the survey. What were you trying to learn? Why did this subject seem interesting or important?

- a. Survey 40 to 50 people.
- b. Team up with your classmates. Survey 50 to 80 people if your group has two members, 75 to 120 people if it has three members, 100 to 150 people if it has four members, and 125 to 200 people if it has five members.
- c. Keep a journal during your group meetings and submit it to your instructor.
- d. Write a memo to your instructor describing and evaluating your group’s process for designing, conducting, and writing up the survey. (◀◀ See Module 18 on working and writing in groups.)

In your **Procedure** section, describe in detail *exactly* what you did.

In your **Results** section, first tell whether your results supported your hypothesis. Use both visuals and words to explain what your numbers show. (▶▶ See Module 25 on how to design visuals.) Process your raw data in a way that will be useful to your reader.

As you conduct your survey, make careful notes about what you do so you can use this information when you write up your survey. If you work with a group, record who does what.

In your **Discussion** section, evaluate your survey and discuss the implications of your results. Consider these questions:

1. Do you think a scientifically valid survey would have produced the same results? Why or why not?
2. Were there any sources of bias either in the way the questions were phrased or in the way the subjects were chosen? If you were running the survey again, what changes would you make to eliminate or reduce these sources of bias?
3. Do you think your subjects answered honestly and completely? What factors may have intruded? Is the fact that

Use complete memo format. Your subject line should be clear and reasonably complete. Omit unnecessary words such as “Survey of.” Your first paragraph serves as an introduction, but it needs no heading. The rest of the body of your memo will be divided into four sections with the following headings: Purpose, Procedure, Results, and Discussion.

- you did or didn't know them, were or weren't of the same sex relevant?
- What causes the phenomenon your results reveal? If several causes together account for the phenomenon, or if it is impossible to be sure of the cause, admit this. Identify possible causes and assess the likelihood of each.

23.11 Writing a Report Based on Your Knowledge and Experience (LO 23-1 to LO 23-4)

Write a report on one of the following topics.

- What should a U.S. or Canadian manager know about dealing with workers from _____ [you fill in the country or culture]? What factors do and do not motivate people in this group? How do they show respect and deference? Are they used to a strong hierarchy or to an egalitarian setting? Do they normally do one thing at once or many things? How important is clock time and being on time? What factors lead them to respect someone? Age? Experience? Education? Technical knowledge? Wealth? Or what? What conflicts or miscommunications may arise between workers from this culture and other workers due to cultural differences? Are people from this culture pretty similar in these beliefs and behaviors, or are there lots of variation?
- Describe an ethical dilemma encountered by workers in a specific organization. What is the background of the situation? What competing loyalties exist? In the past, how have workers responded? How has the organization

- What action should be taken?

The discussion section gives you the opportunity to analyze the significance of your survey. Its insight and originality lift the otherwise well-written memo from the ranks of the merely satisfactory to the ranks of the above-average and the excellent.

responded? Have "whistle-blowers" been rewarded or punished? What could the organization do to foster ethical behavior?

- Describe a problem or challenge encountered by an organization where you've worked. Show why it needed to be solved, tell who did what to try to solve it, and tell how successful the efforts were. Possibilities include

- How the organization is implementing work teams, downsizing, or a change in organizational culture.
- How the organization uses e-mail or voice mail, statistical process control, or telecommuting.
- How managers deal with stress, make ethical choices, or evaluate subordinates.
- How the organization is responding to changing U.S. demographics, the Americans with Disabilities Act, international competition and opportunities, or challenges from dot.com companies.

Polishing Your Prose

Being Concise

Being **concise** in business writing means using only necessary words to make your point, without sacrificing politeness or clarity. Wordy sentences may confuse or slow readers:

Wordy: All of our employees at Haddenfield and Dunne should make themselves available for a seminar meeting on the 5th of August, 2010, at 10 o'clock in the morning. Please make sure you come to the conference room on the 2nd Floor of the Main Complex.

Concise: Please plan to attend a seminar at 10 AM on August 5 in the Main Complex 2nd Floor conference room.

Being concise does not mean eliminating necessary information. Sometimes you'll have to write longer sentences to be clear.

Nor does tightening your writing mean using short, choppy sentences.

Choppy: We have a new copier. It is in the supply room. Use it during regular hours. After 5 PM, it will be shut down.

Concise: A new copier is available in the supply room for use before 5 PM.

Use Concrete Words.

Instead of vague nouns and verbs with strings of modifiers, use specifics.

Vague: The person who drops off packages talked about the subject of how much to charge.

Concrete: The delivery person discussed fees.

Avoid Vague or Empty Modifiers.

Words like *very*, *some*, *many*, *few*, *much*, *kind of/ sort of*, and *so forth* usually can be cut.

Cut Redundant Words or Phrases.

Don't say the same thing twice. *Cease and desist*, *first and foremost*, *the newest and latest*, *official company policy*, *24 stories tall*, *said out loud*, and *return the form back to me* are all redundant.

Avoid Unnecessarily Complex Constructions.

Instead of *the bid that won the contract*, use *the winning bid*.

Stick to Simple Verb Tenses.

Standard edited English prefers them. Instead of “I *have been attending* the University of Michigan” use “I *attend* the University of Michigan.” Instead of “By 2006, I *will have completed* my junior year” use “I *will be* a senior by 2006.”

Exercises

Rewrite the following sentences to make them concise.

1. It is very much in the best interest of our business, Sam Chen said out loud, to make our company's buildings at least three stories tall.
2. Please find attached the required and necessary paperwork forms to be completed by yourself at the earliest of your convenience.
3. Take this release to Andrea, please. Ask her to sign it. Bring it back to me. Get it back by 5 p.m.
4. There are a very many people who are kind of aware of the possibility that we may well decide to enter the Asian market.
5. Heather Ansel said out loud that she is planning to come to the event on March the 19th where our celebration for the year will be enjoyed at a formal dinner.

6. First and foremost it is of the utmost importance that we return the proofed copy to the people who are doing the graphic design as quickly as is humanly possible.
7. At about 11:34 a.m., Margaret Kim e-mailed to inform those of us working as a team on the project that we had been awarded a contractual obligation with Tanner, Dempsey, and Mihalek.
8. We should cease and desist at once all official company correspondence with the company that supplies our wholesale goods and services until we determine if it has complied with our official company policies and so forth.
9. I have been attending classes in the field of business at the community college which is local and close to the building at where I am currently employed and my office therein.
10. Derek stopped by at about 1:22 p.m. He wanted to discuss something. He was concerned about our merger with Addison, Plymouth and Partners. He thought we should do the due diligence again. Derek started some of the work. He is a very responsible executive.

Check your answers to the odd-numbered exercises at the back of the book.

Module

24

Long Reports

LEARNING OBJECTIVES

By following the advice in Module 24, you can develop strong skills for writing long reports. After completing the module, you should be able to

LO 24-1 Organize time for report writing.

LO 24-2 Apply strategies for report section writing.

LO 24-3 Compare and contrast formats and

styles for long reports.

Formal reports are distinguished from informal letter and memo reports by their length and by their components. A full formal report may (but does not have to) contain all of the following components:

Cover

Title Page

Letter of Transmittal

Table of Contents

List of Illustrations

Executive Summary

Report Body

Introduction (Usually has subheadings for Purpose and Scope; may also have Limitations, Assumptions, and Methods.)

Background/History of the Problem (Serves as a record for later readers of the report.)

Body (Presents and interprets data in words and visuals. Analyzes causes of the problem and evaluates possible solutions. Specific headings will depend on the topic of the report.)

Conclusions (Summarizes main points of report.)

Recommendations (Recommends actions to solve the problem. May be combined with Conclusions; may be put before body rather than at the end.)

References or Works Cited (Documents or sources cited in the report.)

Appendices (Provide additional materials that the careful reader may want: transcript of an interview, copies of questionnaires, tallies of all the questions, computer printouts, previous reports.)

I've never written anything so long. How should I organize my time? **LO 24-1**

- Write parts as soon as you can.
- Spend most of your time on sections that support your recommendations.

Figure 24.1 shows how you might allocate your time in writing a long report.

To use your time efficiently, think about the parts of the report before you begin writing. Much of the Introduction comes from your proposal with only minor revisions: Purpose, Scope, Assumptions, and Methods.

The bibliography from your proposal can form the first draft of your References or Works Cited.

Save a copy of your questionnaire or interview questions to use as an appendix. As you tally and analyze the data, prepare an appendix summarizing all the responses to your questionnaire, your figures and tables, and a complete list of References or Works Cited.

You can write the Title Page and the Letter of Transmittal as soon as you know what your recommendation will be.

Audiences will appreciate your organizing reports around the information they actually want and need.

"Then, once we solved the structural problems in the text, we went back and identified moments that cried out for a song."

Reprinted with permission of CartoonStock.com, www.cartoonstock.com.

Innovative annual reports include that of Austria Solar—the report's text and graphics are invisible until sunlight hits them. It was designed by Cosimo Moller, whose inspiration came when sunlight "was shining on my notepad and was reflected so intensely that I wasn't able to read my words anymore. So, the idea was born: Does it work the other way around?"

Analyzing report data helps organizations to strategize. Orbitz, for instance, found Apple users spend as much as 30% more per night on hotels than PC users, so anyone searching the site with a Mac gets pricier options. A lack of career coaching hinders corporate advancement for women, or so a report by consulting firm McKinsey and Company determined. Only 11 Fortune 500 CEOs are women, and better career coaching may help more ambitious executives. "By increasing the number of women who make it from middle management to the vice presidential level, corporations could vastly improve the odds for building diversity in top management," the report contends. Bain and Company found a third of colleges are on an unsustainable financial path. The firm's controversial study reviewed endowments and other assets, hit hard by the financial downturn of the past few years. Another conclusion? Administrative expenditures are also culprits. "In no other industry would overhead costs be allowed to grow at this rate—executives would lose their jobs," the report argues.

Figure 24.1 Allocating Time in Writing a Report (Your time may vary.)

Report recommending alternative dispute resolution. Total time: 80 hours

Planning	40 hours
Conduct research, following proposal.	
Evaluate and analyze data.	
Answer the PAIBOC questions (◀◀ Module 1).	
Think about document design (◀◀ Module 5).	
Organize the message.	
Writing	20 hours
Draft the report.	
Draft the visuals (▶▶ Module 25).	
Prepare appendixes.	
Draft PowerPoint slides.	
Revising	20 hours
Reread draft of report and visuals.	
Measure draft against PAIBOC questions, proposal, and principles of business communication.	
Revise draft.	
Ask for feedback on recommendations, report design, visuals, and slides.	
Revise draft based on feedback.	
Edit document, visuals, and slides to catch grammatical errors.	
Run spell-check.	
Proof by eye.	
Initial or sign.	
Make the necessary copies.	
Submit the report.	
Present results orally.	

After you've analyzed your data, write the Executive Summary, the Report Body, and the Conclusions and Recommendations. Prepare a draft of the table of contents and the list of illustrations.

When you write a long report, list all the sections (headings) that your report will have. Mark those that are most important to your reader and your proof, and spend most of your time on them. Write the important sections early. That way, you won't spend all your time on Background or History of the Problem. Instead, you'll get to the meat of your report.

How do I create each of the parts of a formal report? **LO 24-2**

► *Follow the example here.*

As you read each of the following sections, you may want to turn to the corresponding pages of the long report in Figure 24.2 to see how the component is set up and how it relates to the total report.

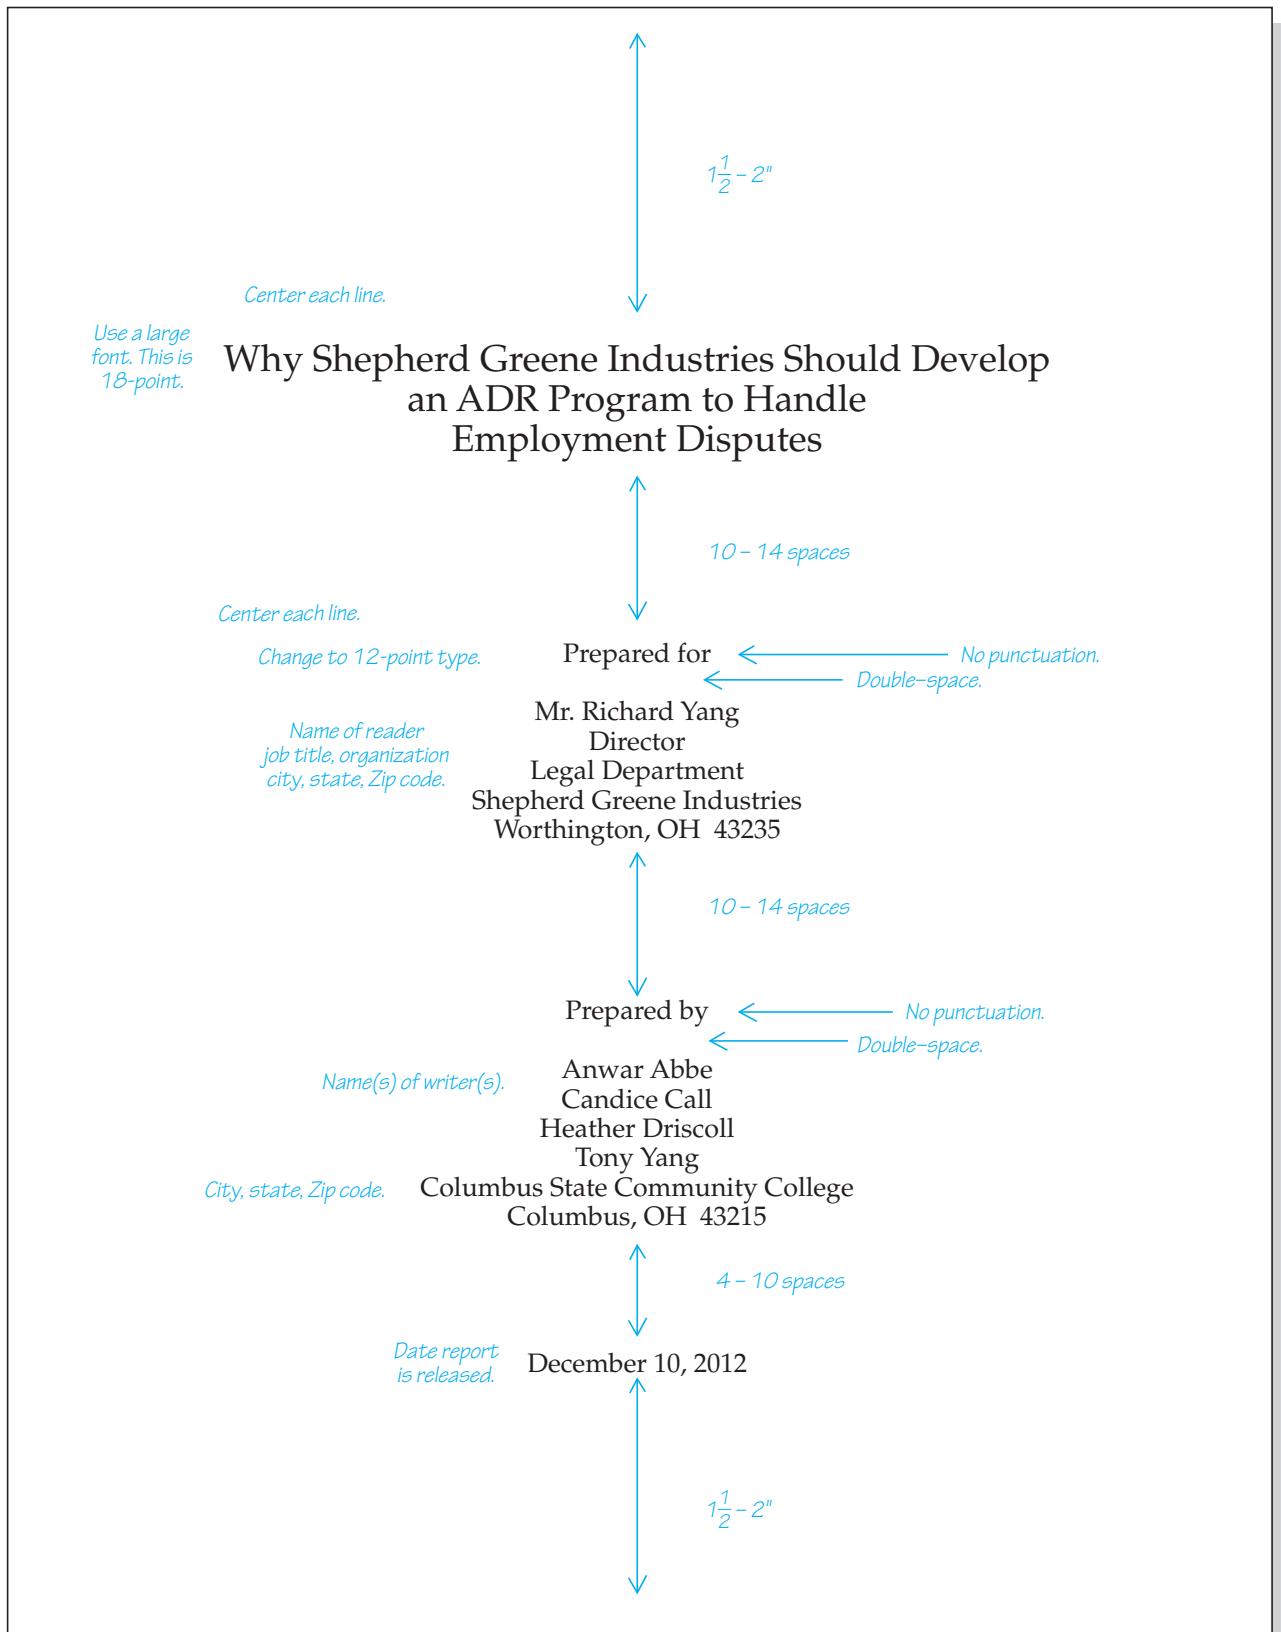

Figure 24.2 A Long Report

Figure 24.2 A Long Report (continued)

You may also design a letterhead for yourself, especially if you're assuming that you are doing the report as a consultant.

550 East Town Street
Apartment 201
Columbus, OH 43210
December 10, 2012

Mr. Richard Yang
Director
Legal Department
Shepherd Greene Industries
3241 Corporate Center Way
Worthington, OH 43235

This letter uses block format (see Figure 9.2). Modified block is also acceptable.

In paragraph 1, release the report. Note when and by whom the report was authorized. Note report's purpose.

Dear Mr. Yang:

Enclosed is the report you requested in October on whether Shepherd Greene Industries should adopt an Alternative Dispute Resolution (ADR) program. We believe it should. An ADR program can

- Clear our cluttered court system of cases which can be settled by other means.
- Reduce costs of litigating employee grievances.
- Reduce the amount of time required to settle disputes.
- Increase employee morale by involving employees in the dispute resolution process.

Shepherd Greene should conduct further research to determine which ADR plan to adopt, involve the union in deciding which plan to use, support the plan financially, and pilot the plan for a year.

The Air Force already uses ADR. Adopting an ADR program will both enhance the stability of Shepherd Greene's workforce and create another point of similarity between the Air Force and Shepherd Greene, making it easier for the Air Force to accept Shepherd Greene's bid to manufacture replacement parts for combat aircraft.

Give recommendations or thesis.

Thank people who helped you.

The information in this report came from print and online sources, as well as interviews with Richard Yang and Chuck Scanlon at Shepherd Greene. We appreciate the time they took from busy schedules to meet with us.

Thank the reader for the opportunity to do the research.

Thank you for the opportunity to conduct this research. We appreciate the chance to apply our knowledge to helping Shepherd Greene achieve its goal of reducing legal costs while providing an effective means to settle employee grievances.

Offer to answer questions about the report.

If you have any questions about this report, please ask!

Answers would be included in your fee, if any—no extra charge!

Sincerely,

Anwar Abbe

Figure 24.2 A Long Report (continued)

A running header is optional. Use the report title or a short modification of it.

Why Shepherd Greene Should Adopt ADR

Here, the running head and page numbers are one point size smaller than the text used for the body of the report.

Page 1

Start with introduction.

Introduction

Center first-level heads. This report uses bold (one point larger than body).

Many private companies and government agencies use Alternative Dispute Resolution (ADR) programs to resolve disputes with employees. Adopting an ADR program would save time and money for Shepherd Greene.

Problem

Shepherd Greene wants an alternative to traditional court remedies, which have had mixed results for the company in the recent past. In 1999, an employee fired for poor attendance sued, claiming a manager had illegally altered her time cards. After two years in the courts, Shepherd Greene settled for an undisclosed amount. In 2004, two employees fired for failing on-the-job drug tests unsuccessfully sued the company to get their jobs back, appealing the case all the way to the State of Ohio Supreme Court. In 2011, a coalition of employees sued the company about a management structure that allegedly keeps black employees in low-level jobs. The suit is still pending.

These lawsuits take months or even years to work through the court system, costing the company thousands of dollars, not including any settlement or judgment cost. Although outside attorneys are also hired, preparing these cases requires hundreds of staff hours and takes the legal staff away from its primary duty of reviewing bids and contracts with Shepherd Greene's customers and suppliers.

Shepherd Greene has another reason to change the way it handles employment disputes. The company has submitted a bid to the US Air Force to manufacture replacement parts for combat aircraft. In addition to adhering to strict manufacturing guidelines and having the highest security clearance, the successful company must demonstrate stability in its labor and management practices. Programs that minimize employee grievances thus would enhance Shepherd Greene's application.

Purpose and Scope

Give topics in the order in which you'll discuss them.

Rhetorical purpose

Vary paragraph lengths to provide good visual impact.

The purpose of this report is to recommend whether it is feasible for Shepherd Greene to adopt an Alternative Dispute Resolution program for employee disputes.

In this report, we will focus on how ADR can settle employee grievances, the savings in time and money from using ADR, the goodwill gained by using ADR, model ADR programs, and the resources required for Shepherd Greene to develop its own ADR program. We will briefly discuss the effect of using ADR on crowded court dockets and the potential for an ADR program at Shepherd Greene to succeed.

Assumptions

Tell what you discuss and how thoroughly you discuss each topic. Scope section should match report.

Our recommendation is based on three assumptions:

- The frequency and severity of employee grievances at Shepherd Greene will remain steady or rise.
- Legal costs will remain steady or rise.
- The time required to litigate cases in the courts will remain steady or rise.

Assumptions cannot be proven. But if they are wrong, the report's recommendation may no longer be valid.

Figure 24.2 A Long Report (*continued*)

Why Shepherd Greene Should Adopt ADR
If you use only library and online sources, you do not need a "Methods" section.

Limitations
If your report has limitations, state them.

This report depends almost entirely on print and online sources. Before adopting a specific ADR system, Shepherd Greene should talk with people experienced with ADR, such as faculty in the Dispute Resolution Program at The Ohio State University Moritz College of Law.

Criteria

These ideas could be presented in a paragraph. But the list provides visual variety and makes it easier for the reader to skim the page.

According to Shepherd Greene's Legal Department Director, Richard Yang, an ADR program must satisfy three criteria:

1. The program must reduce the time and money currently spent on legal remedies.
2. It must be possible to create and implement the program within the existing \$1.2 million annual operating budget for Shepherd Greene's Legal Department.
3. The program must be approved not only by Shepherd Greene's management but also by the employee union.

What ADR Is
Document your sources!

Triple-space (2 empty spaces) before new head. Double-space after head before paragraph.

West's *Legal Environment of Business* defines ADR as "any procedure or device for resolving disputes other than the traditional judicial process" (Cross and Miller 60). ADR includes negotiation, in which the parties simply work out a solution together; mediation, in which a third party helps the disputing parties reach an agreement; and arbitration, in which a third party determines a solution which the disputing parties must accept.

ADR is not limited to employer–employee disputes. Instead, ADR can be used for any dispute that might otherwise result in a lawsuit: as an alternative to divorce litigation, to resolve disputes between companies and customers or suppliers, or even to resolve disputes between states or countries.

Cross and Miller note that formal procedures for ADR have become increasingly common as lawsuits have become more expensive and time-consuming. The huge backlog of court cases means that years can elapse before a case comes to trial. In the early 1990s, Congress "required the federal court cases to develop a plan to cut court costs and reduce delay within the federal judicial system" (60). Today, only 5% to 10% of the lawsuits that are filed actually result in a trial; the rest are dismissed or settled out of court (59). *Period after parentheses when the quotation is short and not indented.*

ADR is now becoming sufficiently common that some writers have dropped the label "alternative" and simply discuss methods of "dispute resolution." Even people who keep the "A" sometimes redesignate it: Attorney General Janet Reno said the ADR stood for "Appropriate Dispute Resolution" (Senger). We will keep the "A" in ADR since the acronym is so widely known.

Using ADR to Resolve Employment Disputes

In essence, any program that allows an aggrieved employee and employer to settle claims without going to court qualifies as ADR. Thus, a simple discussion between the employee and management to arrive at a mutually agreeable solution to a problem that otherwise would go to court is ADR. Formal ADR programs can include mediation, arbitration, mini-trials, fact-finding, private judging, or summary-jury trials (Kelly 4).

Give page numbers for facts, not just quotes, in MLA Style.

Figure 24.2 A Long Report (*continued*)

Why Shepherd Greene Should Adopt ADR Page 3

Early Use of ADR in Employment Disputes

Using ADR to resolve disputes between employers and employees is not new. Michael R. Carrell and Christina Heavrin note that the first mention of labor arbitration "dates to a clause in the constitution of the Journeyman Cabinet-Makers of Philadelphia in 1829" while the "earliest recorded arbitration hearing occurred in 1865 when iron workers in Pittsburgh arbitrated their wages" (408). The United States Conciliation Service, part of the Department of Labor, began mediating and arbitrating labor disputes during World War I and continued to do so until after World War II, when it was replaced by Federal Mediation and Conciliation Service (Barrett 40-41).

Page number covers all sentences from citation to number.

Eileen Kelly notes that in 2001, the US Supreme Court upheld a company's right to require non-union applicants and employees to use arbitration to settle employee disputes (*Circuit City Stores, Inc. v. Adams*, 121 S. Ct. 1302). The decision sets a precedent for companies to require non-union employees to use ADR as a mandatory condition of employment. That is, by accepting a job, a candidate agrees not to sue the employer if a dispute arises but to submit to binding arbitration. The Supreme Court decision did not speak to unionized organizations. Presumably, if a union represents employees, the employer and the union must agree in advance to the conditions of ADR, such as binding arbitration (4).

Why ADR Has Become a Popular Way to Settle Employee Disputes

Two factors explain the growing interest in ADR to settle employee disputes: the drastic increase in the number of disputes, and the high costs of settling them with litigation.

In the 2000s, the number of lawsuits filed by employees against employers skyrocketed. As Katherine Stone reports, in 2006 more than twice as many employment discrimination cases were filed in federal courts as had been filed in 2000 (29). See Figure 1. Today, employment lawsuits comprise 15% of the load of cases in federal courts (Bedikian 33). *Refer to figures in your text.*

Figure 1

Employee Lawsuits against Employers Skyrocket *Tell a story with your figure title.*

Year	Cases Filed in Federal Court
1999	9,000
2000	8,500
2001	12,000
2002	12,000
2003	14,000
2004	15,000
2005	20,000
2006	21,000

Source of data: Stone 29-30

Provide a source for data when you get numbers but not the chart from someone else.

Figure 24.2 A Long Report (*continued*)

Why Shepherd Greene Should Adopt ADR

Page 4

Long quotations are indented, one inch; no quotation marks needed.

The cost of settling these cases also skyrocketed. As Katherine Stone reports, in the period 1989-90, plaintiffs began to win large judgments [. . . which] hit an all-time high in 1990. That year, plaintiffs who prevailed won an astounding *average* recovery of \$1,989,300. Of the 254 cases that went to juries, plaintiffs prevailed 38% of the time and recovered an *average* judgment of \$2,652,270. (29; emphasis in original)

The judgments Stone cites exclude legal fees.

Use square brackets for your changes in quoted text.

The period goes before the parenthesis when the quote is long and indented.

The amount losing companies had to pay increased further when, in 1991, Title VII was amended to allow the winning party to collect attorney fees from the losing party and to receive punitive damages as well as money for actual damages (Stone 29). Such fees help explain why Texaco recently paid \$176.1 million and Coca-Cola paid \$192.5 million to settle race discrimination cases (Kelly 4).

Clearly, it is in employers' interests to find ways to settle employee disputes without going to court.

Organizations Using ADR to Settle Employee Disputes

ADR is an increasingly popular form of dispute resolution. A 2007 survey of Fortune 1000 companies by PricewaterhouseCoopers and Cornell University found that 87% had used forms of ADR in the previous three years (Meade and Zimmerman 60). Companies using ADR include Alcoa, Anheuser-Busch, GE, Halliburton, Johnson & Johnson, Masco, McGraw-Hill, Science Applications International, Sears, UAL, and UBS Paine-Webber (Bresler 3; Longstreth 18; F. Phillips). *Use first initial when two or more authors share a last name.*

Acts passed by Congress in 1991 and 1996 and a Presidential Memorandum in 1998 directed all executive federal agencies to use ADR (Blanchard and McDade). The US Office of Personnel Management's website, *Alternative Dispute Resolution: A Resource Guide*, links to the ADR programs of 53 federal agencies, including the Air Force, Army, Navy, Defense Logistics Agency, National Aeronautics and Space Administration, and National Security Agency. *Use an acronym only if it will appear more than once; spell out names the first time you use them.*

ADR is not limited to disputes between individual employees and their employers. In the late 1990s, a "massive" sexual harassment suit brought against the Mitsubishi company was settled with the aid of a federal mediator (Senger).

Web source, so no page number.

Results of ADR Programs

ADR programs have a good record of resolving disputes while saving time and money and building goodwill.

Heading must cover everything under that heading until the next head or subhead at that level.

Resolving Disputes

Begin most paragraphs with topic sentences.

ADR programs work. Of the 13,000 disputes mediated in the US Postal Service's ADR program from 1998 to 2001, 61% were settled; of those, 94% were settled without any cash settlement (Bedikian 33). The Air Force's award-winning ADR program resolves 75% of the disputes which use ADR. Some locations have even higher success rates: the Tinker Air Force base has an 85% success rate, and the Los Angeles Air Force base has a 100% success rate (Blanchard and McDade). A study of 20 large ADR programs by the CPR Institute found that "nearly all disputes submitted to systemic [sic] employment dispute programs are resolved by agreement, prior to the arbitration stage" (F. Phillips). *Use square brackets for anything you add in quote. Sic indicates that the error is in the original.*

List points in the order in which you'll discuss them.

Figure 24.2 A Long Report (*continued*)

<p>Why Shepherd Greene Should Adopt ADR</p> <p>A Northeastern University survey finds that disputes that do not settle fall into two groups: the “Jackpot Syndrome,” where plaintiffs are seeking only money, and situations where it is simply not in the financial interests of one party to settle (G. Phillips 66). Shepherd Greene Legal Department Director Richard Yang believes that the company has yet to encounter an aggrieved employee who fits these conditions.</p> <p>Clearing Court Dockets</p> <p>Since 1960, the number of lawsuits (of all types) in the United States has tripled, but the number of judges and courts has not changed significantly (Cross and Miller 59). The resulting bottleneck contributes to the slow passage of cases through the legal system. As we have seen, employment lawsuits comprise 15% of the load of cases in federal courts (Bedikian 33). If most or all of these cases were resolved through alternate means, court dockets would be less clogged.</p> <p>Saving Time</p> <p>Instead of taking months or years, ADR can settle disputes in as little as a day. According to Jeffrey M. Senger, Deputy Senior Counsel for Alternative Dispute Resolution in the US Department of Justice, at the US Postal Services “the average mediation takes just four hours, and 81 percent of mediated cases are closed without a formal complaint being filed.”</p> <p><i>This quote comes from the web and has no page number.</i></p> <p>Saving Money</p> <p>The legal costs saved by adopting ADR are substantial. The Air Force estimated that before adopting ADR, it spent \$1,795 to process each informal discrimination complaint and \$16,372 to process formal complaints (Blanchard and McDade). The US Postal Service estimated that a “simple” complaint cost at least \$5,000 to process, while a “complicated” complaint that goes “all the way through the end of the process” costs \$77,000 (Senger). Anastasia Kelly, General Counsel of Sears, estimated that “each litigated case with an employee costs between \$50,000 and \$75,000” in legal fees. Indeed, before its adoption of an ADR system in 2002, Sears—a company “[w]ith more than 300,000 employees and high turnover rate” spent “more legal dollars on battling its own people than anything else” (Longstreth 18). GE estimates that its Early Dispute Resolution program saves \$15 million a year and that the savings continue to increase each year (Paquin, Victor, and Villarreal 24).</p> <p><i>Quote when the words of the source are memorable.</i></p> <p>Formal ADR systems often employ third-party mediators or arbitrators. Hourly fees run about \$150–\$250 an hour (Meade and Zimmerman 61). A 2000 Northeastern University survey found median costs of \$2,750 for mediation and \$11,800 for arbitration (G. Phillips 65). <i>Not every idea needs a source. Use your knowledge of people and of business.</i></p> <p>Because disputes are settled outside the legal system, it is easier to find creative, non-monetary solutions. Even when the solution does involve money, it is likely to cover only actual damages, not punitive ones. Other sources for savings may also exist: “As an incentive [to adopt ADR], at least one major national insurance company offers a refund in deductibles of up to \$25,000 for companies that adopt employment programs” (Meade and Zimmerman 61).</p> <p>Building Goodwill</p> <p>The 2007 Cornell Survey found that resolutions reached thorough ADR maintain more goodwill than would be possible with litigation:</p>	<p>Page 5</p> <p><i>Use talking heads. Note how much more informative this is than “Advantages.”</i></p> <p><i>Second-level heads are flush with the left margin and bolded. Triple-space before new head; double-space after.</i></p> <p><i>Quote when the source is especially credible.</i></p> <p><i>Begin most paragraphs with topic sentences.</i></p> <p><i>Quote when you can't think of any better words than those in the source.</i></p>
---	---

Figure 24.2 A Long Report (*continued*)

Why Shepherd Greene Should Adopt ADR

Quote to give the exact wording of survey questions so reader can interpret data accurately.

Page 6

No extra space above or below quote.

81% of the respondents say their corporations used mediation because it provides “a more satisfactory process” than litigation; 66% say it provides more “satisfactory settlements”; and 59% say it preserves good relationships. (qtd. in G. Phillips 65)

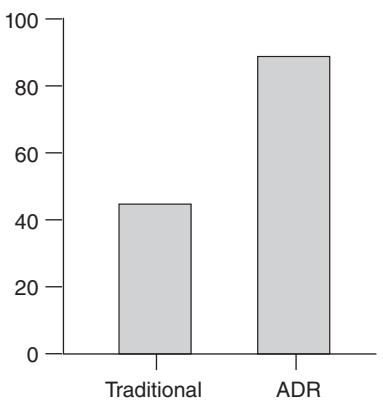

Employees of the US Postal Service who participated in ADR programs were overwhelmingly satisfied with “the amount of control, respect, and fairness of the process.” Indeed, the satisfaction rate was twice as high as satisfaction with traditional adversarial systems (see Figure 2). Employees and managers reported equal levels of satisfaction (Senger).

Figure 2

Use a second font for figures.

Satisfaction Doubles with ADR

Percent Satisfied
(US Postal Service)

Make sure bars are of equal width.

Source of data: Senger

Quote when the source is especially credible for the point you want to make.

Simply having a forum to air disagreements helps. After a study in 1997, the Equal Employment Opportunity Commission (EEOC) concluded that *Use ellipses in square brackets when you omit words.*

a sizable number of disputes [. . .] may not involve discrimination at all. They reflect, rather, basic communications problems in the workplace. Such issues may be brought into the EEO process as a result of a perception that there is no other forum available to air general workplace concerns. (qtd. in Blanchard and McDade)

The source of the quote and where you found it.

Even when the ADR process finds that the employee’s concern was justified, mediation makes it possible to resolve issues positively. Roger Blanchard and Joe McDade report the example of a case of alleged racism in the US Air Force:

Indent long quotes 1".

[D]uring the mediation, it became clear that management regarded the Asian female GS-12 as a skilled and talented worker. Accordingly, as part of the mediated settlement, the Air Force agreed to temporarily detail her into a GS-13 position for which she was qualified. Her subsequent superior performance resulted in her being competitively selected for the GS-13 position when it became vacant. Had this case not resulted in a settlement, the Air Force could have paid compensatory damages and attorneys [sic] fees; office morale and productivity would have suffered greatly; and most importantly, the Air Force would likely have lost the services of a talented employee.

Web source, so no page number.

Figure 24.2 A Long Report (*continued*)

10pt Why Shepherd Greene Should Adopt ADR Page 7

12pt. Model ADR Programs

11pt. Many models of ADR programs exist. Some have three to five stages, from informal consultation to formal mediation and arbitration; others have only one “stage” that is empowered to do whatever is necessary to resolve the dispute, including hiring mediators or arbitrators. Some organizations use different kinds of structures for different kinds of complaints. For example, some federal agencies use a fact-finding team of a man and a woman to investigate allegations of sexual harassment (Bedikian 33). The best programs focus not simply on avoiding litigation but on resolving conflicts by identifying and resolving the underlying problem that led to the dispute (Bedikian 33; Paquin, Victor, and Villarreal 24). As a result, good programs reduce the number of future disputes.

One of the most detailed programs reported in the literature is the one developed by Science Applications International Corporation (SAIC), a high-tech company that employs 40,000 workers. SAIC’s four-stage ADR program allows employees to “take their grievances to a committee of both workers and management that investigates and delivers a binding decision” (Bresler 3). According to the company, more than 90% of disputes are resolved in initial meetings between workers and managers, long before formal mediation or arbitration is necessary.

According to Samuel Bresler, SAIC’s corporate vice president and western regional director of human resources, SAIC’s program uses the following four steps:

Step 1: The employee presents an oral or written complaint to management through a hotline or the Ethics Committee. The complaint travels upward through the management structure; if a mutually agreeable resolution is unobtainable (10% of SAIC claims), the process moves to Step 2.

Step 2: The employee documents the claim in detail, and management drafts a response. Both documents are sent to a five-person committee that reviews the documentation and interviews witnesses, if any. The committee consists of

- An employee representative,
- A non-management representative from a large employee focus group,
- The Senior Vice President of Human Resources, who also chairs the committee,
- A senior-level executive from the area where the dispute occurred, and
- A mid-level manager from division operations or a group manager from an area outside the dispute.

The committee recommends a solution. If the employee rejects the solution, the claim may move to Step 3 or 4.

Step 3: A third-party mediator steps in to negotiate a settlement between the parties in dispute. The employee must pay a \$50 filing fee, and both sides may consult attorneys. Because the mediator can only recommend a solution, the employee may reject it and move to Step 4.

Step 4: An arbitrator reviews the claim and makes a final, binding decision. The employee must pay a \$150 filing fee. (4)

SAIC’s ADR program is cost-effective, empowers the employee at each step of the process, and has demonstrated a high success rate.

Vertical lists provide visual variety.

Figure 24.2 A Long Report (*continued*)

<p>Why Shepherd Greene Should Adopt ADR</p> <p><i>Name items in the order in which you'll discuss them.</i></p> <p>Resources Required to Create an ADR Program</p> <p>Fewer resources are required for ADR than for traditional litigation. Meeting space, training in ADR, financial support, and management and labor participation are the essentials.</p> <p>Meeting space is available on site at Shepherd Greene. The employee union at Shepherd Greene, the National Fraternal Order of Aviation Workers, Local 111, has also offered meeting space at its union hall in nearby Gahanna, Ohio. Union president Chuck Scanlon noted that this space would be available free to discuss any ADR issue related to Shepherd Greene workers.</p> <p>ADR works best when all supervisors and managers are trained in conflict resolution. One-shot training sessions may not be enough; long-term training and the opportunity to debrief after resolutions will improve resolution skills. While this training has a cost, both in hiring a consultant and releasing people from work duties to attend, it will more than pay for itself. Indeed, GE's estimated \$15 million savings came not from implementing an ADR program but from refining an existing program to try to resolve potential issues before they resulted in conflicts (Paquin, Victor, and Villarreal 24).</p> <p>Financial support is needed to pay for the cost of the training, the time of the person or people who run the ADR system, the time released for workers and managers to sit on peer review committees, and the fees for hiring outside mediators and arbitrators. While some up-front work will be needed to set up and publicize a system, once it is in place, running it should be no more time-consuming than running the current grievance system. Requiring the employee to pay a filing fee for a mediator or arbitrator reduces the company's costs. Most of these costs will be heaviest during planning and the first year of the program. Most organizations find that successful ADR systems not only resolve disputes without litigation but also make it possible to improve work conditions so that fewer disputes arise in the future.</p> <p>Support from both management and labor is essential. In general, Shepherd Greene has good management-labor relations, with joint teams already functioning in many areas. ADR would fit well with the "team" culture of the organization. Union president Chuck Scanlon believes that the company union will be receptive to an ADR program, provided that union representation on any review panels equals that of the Shepherd Greene management.</p> <p><i>Conclusions repeat points made in the report. Recommendations are actions the readers should take.</i></p> <p>Conclusions and Recommendations</p> <p>Our research suggests that an ADR program at Shepherd Greene would resolve employee disputes more economically and quickly while building goodwill. The resources needed to start an ADR program at Shepherd Greene are well within budget guidelines, and the union is receptive. Finally, a model from a high-tech environment exists on which to base the Shepherd Greene ADR program.</p> <p>1. Do Further Research to Determine Which ADR Plan to Use.</p> <p>We were able to get detailed information only about SAIC's plan. While the plan seems workable and SAIC, like Shepherd Greene, is a high-tech company, Shepherd Greene should learn about additional plans before proposing one. The two best sources seem to be the faculty in the Dispute Resolution Program at The Ohio State University Moritz College of Law, since it is right in town, and the US Air Force, since Shepherd Greene hopes to do business with it.</p> <p><i>Some companies ask for Conclusions and Recommendations at the beginning of reports.</i></p>	<p>Page 8</p>
---	---------------

Figure 24.2 A Long Report (*continued*)

<p>Why Shepherd Greene Should Adopt ADR</p> <p><i>Numbering the issues makes it easy for readers to discuss them.</i></p> <p>2. Involve the Union in Deciding Which ADR Plan to Use.</p> <p>The union, its president believes, is receptive to ADR. To make implementation as smooth as possible, union representatives should be involved in researching additional ADR plans and recommending one. The more “buy-in” union members feel in the details of a specific ADR plan, the more quickly it will be approved and the more smoothly implementation will go.</p> <p>3. Support ADR Financially.</p> <p>An ADR program will require start-up funds for</p> <ul style="list-style-type: none"> ● Release time for personnel as they research additional ADR plans. ● ADR training. ● Publicizing the program. <p><i>Use standard, not gimmicky, bullets.</i></p> <p>Once the program is up and running, continuing funds will be needed for</p> <ul style="list-style-type: none"> ● Release time for the person who administers the ADR plan. ● Release time for personnel as they meet to resolve disputes. ● Ongoing ADR training. ● Funds to hire mediators and arbitrators. <p>While these items are not free, their cost is likely to be much less than the amount Shepherd Greene is currently spending to deal with employee grievances.</p> <p>Asking employees who seek mediators and arbitrators to pay part of the cost of hiring these people, as SAIC does, is reasonable and would reduce the cost to the company.</p> <p>4. Pilot the Program for a Year.</p> <p>The initial agreement should specify that the ADR Plan Shepherd Greene adopts will be tested for one year. At the end of that period, both Shepherd Greene management and union officials should review the success of the program and decide whether to continue. Should the two parties be unable to agree, the program should automatically be discontinued—and an agreement to that effect should be in place before the pilot begins. While several organizations now have experience with ADR, many different specifics are possible. It will be easier to get a program started if people know that it can be modified (or even disbanded) later as Shepherd Greene gains experience with ADR.</p> <p><i>Because many readers turn to the “Recommendations” first, provide a brief rationale for each. The ideas in this section must be logical extensions of the points made and supported in the body of the report.</i></p>	<p>Page 9</p>

Page numbers of essay in edited book.

Title Page

The Title Page of a report contains four items: the title of the report, whom the report is prepared for, whom it is prepared by, and the release date. Sometimes title pages also contain a brief summary of the contents of the report; some title pages contain decorative artwork.

The title of the report should be as informative as possible.

Poor title: New Office Site

Better title: Why Dallas Is the Best Site for the New Info.com Office

Large organizations that issue many reports may use two-part titles to make it easier to search for reports electronically. For example, U.S. government report titles first give the agency sponsoring the report, then the title of that particular report.

Site to See

Go to

www.nasa.gov/pdf/536766main_Education-Recommendation-Report_Final.pdf

for a copy of the NASA Education Recommendation Report.

Small Business Administration: Management Practices Have Improved for the Women's Business Center Program

Small Business Administration: Steps Taken to Better Manage Its Human Capital, but More Needs to Be Done

Small Business: SBA Could Better Focus Its 8(a) Program to Help Firms Obtain Contracts

In many cases, the title will state the recommendation in the report: "Why the United Nations Should Establish a Seed Bank." However, the title should omit recommendations when

- The reader will find the recommendations hard to accept.
- Putting all the recommendations in the title would make it too long.
- The report does not offer recommendations.

If the title does not contain the recommendation, it normally indicates what problem the report tries to solve.

Letter or Memo of Transmittal

Use a memo of transmittal if you are a regular employee of the organization for which you prepare the report; use a letter if you are not. The transmittal has several purposes: to transmit the report, to orient the reader to the report, and to build a good image of the report and of the writer.

Organize the transmittal in this way:

1. Tell when and by whom the report was authorized and the purpose it was to fulfill.
 2. Summarize your conclusions and recommendations.
 3. Indicate minor problems you encountered in your investigation and show how you surmounted them. Thank people who helped you.
 4. Point out additional research that is necessary, if any.
 5. Thank the reader for the opportunity to do the work and offer to answer questions.
- Even if the report has not been fun to do, expressing satisfaction in doing the project is expected.

Site to See

Go to

www.grida.no/wrr/

Tables of Contents for web reports can have search boxes and clickable links for chapter titles and headings, as does this United Nations report on the state of the world's poor.

Table of Contents

In the Table of Contents, list the headings exactly as they appear in the body of the report. If the report is shorter than 25 pages, list all the headings. In a very long report, list the two or three highest levels of headings.

Building a Critical Skill

Choosing a Long Report Format and Style LO 24-3

The problem-solving report format described in this module—or some version of that format—is common in business, but many other types of long reports exist in the workplace. Their formats and style can vary greatly according to purpose, as well as the organization and discourse community.

For instance, corporate annual reports typically are printed on glossy stock, filled with color photos, charts, and graphs, and focused on information important to investors, such as financial statistics. They may have dozens of pages and often are “perfect bound,” like a slick magazine or book. Many nonprofit organizations produce annual reports that share these characteristics, but others may choose fewer colors and pages, as well as saddle stitch or other kinds of binding.

Reports on large-scale engineering projects, like highway repair efforts or technology research and development, are frequently heavy on words, including jargon, but relatively light on visuals, which may be only the most technical of diagrams. They may have hundreds of pages and be bound in three-ring binders. Likewise, a government report on tax law revisions or a farm subsidy program might be dense with text. Plain covers and paper stock closer to copy bond are typical.

Text in reports may be arranged in single or multiple columns and feature a drop cap—an enlarged letter at the beginning of an opening paragraph—and pull quotes—portions of

body text repeated and set apart graphically from the rest. In general, reports have a formal writing style, but depending on the audience and purpose, some reports may use breezier prose.

With so many possibilities, how do writers settle on the appropriate format and style? Here are tips:

- Start with PAIBOC [◀◀ p. 12].
- Review past reports that share a similar audience and purpose. If these reports worked, use them as models. Your organization probably has reports on file; if not, start one. Many organizations also now publish reports online, and some public and college libraries keep copies of government and annual reports. Use research techniques [◀◀ Module 22] to locate them.
- Consult texts on report writing, experts in your organization, or professional writers and graphic designers.
- Test your draft, where possible, with audiences similar to ones that will read your report.

The more specialized the report, the more likely experienced staff will write it. Egalitarian organizations and those striving to do more with less, however, may expect even novice writers to participate. As with any writing project, plan your task carefully—and treat it as an opportunity to learn and grow.

List of Illustrations

Report visuals comprise both tables and figures. **Tables** are words or numbers arranged in rows and columns. **Figures** are everything else: bar graphs, pie charts, maps, drawings, photographs, computer printouts, and so forth. Tables and figures are numbered independently, so you may have both a “Table 1” and a “Figure 1.” In a report with maps and graphs but no other visuals, the visuals are sometimes called “Map 1” and “Graph 1.” Whatever you call the illustrations, list them in the order in which they appear in the report; give the name of each visual as well as its number.

See Module 25 for information about how to design and label visuals.

for downloadable copies of Nationwide Mutual Insurance Company & Affiliated Company's financial reports.

Executive Summary

An **Executive Summary** tells the reader what the document is about. It summarizes the recommendation of the report and the reasons for the recommendation.

To write an executive summary, you must know the report's recommendations and support.

1. In the first paragraph, identify the report's recommendations or main point (thesis). Often the problem can be stated quite briefly: “To market life insurance to mid-40s urban professionals, Interstate Fidelity Insurance should. . . .” Provide background on the problem only if needed to explain the goal of the recommendations.

2. In the body, identify the major supporting points for your argument. Include all the information decision makers will need. Make the summary clear as a stand-alone document.
3. If you have conducted surveys or interviews, briefly describe your methods.

Introduction

The **Introduction** of the report contains a statement of purpose and scope and may include all the parts in the following list.

- **Purpose.** Identify the organizational problem the report addresses, the technical investigations it summarizes, and the rhetorical purpose (to explain, to recommend).
- **Scope.** Identify the topics the report covers. For example, Company XYZ is losing money on its line of radios. Does the report investigate the quality of the radios? The advertising campaign? The cost of manufacturing? The demand for radios? If the report was authorized to examine only advertising, then one cannot fault the report for not considering other factors.
- **Limitations.** Limitations make the recommendations less valid or valid only under certain conditions. Limitations usually arise because time or money constraints haven't permitted full research. For example, a campus pizza restaurant considering expanding its menu may not have enough money to take a random sample of students and townspeople. Without a random sample, the writer cannot generalize from the sample to the larger population. Many recommendations are valid only for a limited time. For example, a store wants to know what kinds of clothing will appeal to college men. The recommendations will remain in force only for a short time: Three years from now, styles and tastes may have changed.
- **Assumptions.** Assumptions are statements whose truth you assume and which you use to support your conclusions and recommendations. If they are wrong, the conclusion will be wrong too. For example, recommendations about what cars appeal to drivers ages 18 to 34 would be based on assumptions both about gas prices and about the economy. If gas prices radically rose or fell, the kinds of cars young adults wanted would change. If a major recession occurred, people wouldn't be able to buy new cars.
- **Methods.** Tell how you chose the people for a survey, focus groups, or interviews and how, when, and where they were interviewed. Omit Methods if your report is based solely on library and online research. Instead, simply cite your sources in the text and document them in References or Works Cited. See Module 22 for details.

Background or History

Even though the current audience for the report probably knows the situation, reports are filed and consulted years later. These later audiences will need the background to understand the options that are possible.

Two hospitals in Columbus, Ohio, had helicopter services that were each losing money. They commissioned a feasibility study to see whether the two services could merge. The report found that a merger was feasible. The resulting service, MedFlight, is profitable. Here, a MedFlight helicopter team transports the survivor of an automobile accident.

Report Titles

Normally, the title of the report should give the recommendation. Omit the recommendations when

- The reader will find the recommendations hard to accept.
- Putting all the recommendations in the title would make it too long.
- The report does not offer recommendations.

If the title does not contain the recommendation, it normally indicates what problem the report tries to solve.

 for sample reports and
 reporting tools provided by the
 National Institutes for Health.

In some cases, the History may cover many years. For example, a report recommending that a U.S. hotel chain open hotels in Vietnam will probably give the history of that country for at least the last hundred years. In other cases, the Background or History is much briefer, covering only a few years or even just the immediate situation.

Conclusions and Recommendations

Conclusions summarize points made in the body of the report; **Recommendations** are action items that would solve or partially solve the problem. Number the recommendations to make them easy to discuss. If the recommendations will seem difficult or controversial, give a brief rationale after each recommendation. If they'll be easy for the audience to accept, simply list them without comments or reasons. The recommendations will also be in the Executive Summary and perhaps in the title and the transmittal.

Summary of Learning Objectives

- To use your time efficiently, think about the parts of the report before you begin writing. (**LO 24-1**)
- Much of the introduction will come from your proposal, with only minor revisions: Purpose, Scope, Assumptions, and Methods. (**LO 24-1**)
- The bibliography from your proposal can form the first draft of your References or Works Cited. (**LO 24-1**)
- You can write the Title Page and the Letter of Transmittal as soon as you know what your recommendation will be. After you've analyzed your data, write the Executive Summary, the Report body, and the Conclusions and Recommendations. (**LO 24-1**)
- The Title Page contains the title of the report, whom the report is prepared for, whom it is prepared by, and the release date. (**LO 24-2**)
- The title of a report should contain the recommendation unless (**LO 24-2**)
 - The reader will find the recommendations hard to accept.
 - Putting all the recommendations in the title would make it too long.
 - The report does not offer recommendations.
- If the report is shorter than 25 pages, list all the headings in the Table of Contents. In a long report, pick a level and put all the headings at that level and above in the Contents. (**LO 24-2**)
- Organize the transmittal in this way: (**LO 24-2**)
 1. Release the report.
 2. Summarize your conclusions and recommendations.
 3. Mention any points of special interest. Indicate minor problems you encountered in your investigation and show how you surmounted them. Thank people who helped you.
- Point out additional research that is necessary, if any.
- Thank the reader for the opportunity to do the work and offer to answer questions.
- The **Introduction** of the report contains a statement of Purpose and Scope. The **Purpose** statement identifies the organizational problem the report addresses, the technical investigations it summarizes, and the rhetorical purpose (to explain, to recommend). The **Scope** statement identifies the topics the report covers. The Introduction may also include **Limitations**, problems or factors that limit the validity of the recommendations; **Assumptions**, statements whose truth you assume, and which you use to prove your final point; and **Methods**, an explanation of how you gathered your data. (**LO 24-2**)
- A **Background** or **History** section is included because reports are filed and may be consulted years later. (**LO 24-2**)
- **Conclusions** summarize points made in the body of the report; **Recommendations** are action items that would solve or partially solve the problem. (**LO 24-2**)
- Many different styles and formats for long reports exist. (**LO 24-3**)
- To choose a good format, consider the report's purpose, the organization, and the discourse community. Analyze the situation with PAIBOC, review past reports that share a similar audience and purpose, and consult texts on report writing, experts in your organization, or professional writers and designers. Test your draft where possible with audiences similar to the one for your report. (**LO 24-3**)

Assignments for Module 24

Questions for Comprehension

- 24.1** What parts of the report come from the proposal, with some revision? (**LO 24-1**)
- 24.2** How do you decide whether to write a letter or memo of transmittal? (**LO 24-1**)
- 24.3** How should you organize a transmittal? (**LO 24-2**)
- 24.4** What goes in the Executive Summary? (**LO 24-2**)

Questions for Critical Thinking

- 24.5** How do you decide what headings to use in the body of the report? (**LO 24-1, LO 24-3**)
- 24.6** How do you decide how much background to provide in a report? (**LO 24-2**)

Exercises and Problems

As Your Instructor Directs,

Turn in the following documents for Problems 24.8 through 24.10:

- a. The approved proposal
 - b. Two copies of the report, including
- Cover
Title Page
Letter or Memo of Transmittal
Table of Contents

24.8 Writing a Feasibility Study (**LO 24-1 to LO 24-3**)

Write an individual or group report evaluating the feasibility of two or more alternatives. Explain your criteria clearly, evaluate each alternative, and recommend the best course of action.

1. Is it feasible for your school to build additional parking spaces for students? Where should this parking be? How will it be funded?
2. Is it feasible for a local restaurant to offer delivery service to your campus? Will there be an extra charge?

24.9 Writing a Library Research Report (**LO 24-1 to LO 24-3**)

Write an individual or group library research report.

1. **Choosing a Hospital.** As part of your job in human resources, you write articles for your company's quarterly newsletter to help employees get the most out of their benefits. Your boss has asked you to research the topic of choosing a good hospital. He shows you an article that says health care is most effective at hospitals that are fully staffed with nurses, but he isn't sure how your company's employees can get data about staffing levels at local hospitals. "See if you can set up some kind of information source," he says. Write a report that recommends how employees can gather information about hospitals. If you think the company will need to set up a source of this information, also recommend to your boss a way of doing this. Start with Laura Johannes, "Serious Health Risks Posed by Lack of Nurses," *The Wall Street Journal*, May 30, 2002, D1, D3.
2. **Advertising on the Internet.** You work on a team developing a marketing plan to sell high-end sunglasses. Your boss is reluctant to spend money for online advertising because she has heard that the money is mostly wasted. Also, she associates the ads with spam, which she detests. Recommend whether the company should devote some of its advertising budget to online ads. Include samples of online advertising that support your recommendation. To start, read Heather Green, "Online Ads Take Off—Again," *BusinessWeek*, May 5, 2003, 75.
3. **Improving Job Interview Questions.** Turnover among the sales force has been high, and your boss believes the problem is that your company has been

- 24.7** How much evidence do you need to provide for each recommendation? (**LO 24-2**)

List of Illustrations

Executive Summary

Body (Introduction, all information, recommendations). Your instructor may specify a minimum length, a minimum number or kind of sources, and a minimum number of visuals.

References or Works Cited

Appendices, if useful or relevant

- c. Your notes and rough drafts.

3. Is it feasible for your school to offer free space for student web pages? Will content be monitored? By whom?
4. Is it feasible for the local transit service to offer free rides to students?
5. With your instructor's permission, choose your own topic.

hiring the wrong people. You are part of a team investigating the problem, and your assignment is to evaluate the questions used in job interviews. Human resource personnel use tried-and-true questions like "What is your greatest strength?" and "What is your greatest weakness?" The sales manager has some creative alternatives, such as asking candidates to solve logic puzzles and seeing how they perform under stress by taking frequent phone calls during the interview. You are to evaluate the current interviewing approaches and propose changes where they would improve hiring decisions. Start by reading William Poundstone, "Beware the Interview Inquisition," *Harvard Business Review*, May 2003, 18–19.

4. **Making College Affordable.** The senator you work for is concerned about fast-rising costs of a college education. Students say they cannot afford their tuition bills. Colleges say they are making all the cuts they can without compromising the quality of education. In order to propose a bill that would help make college affordable for those who are qualified to attend, the senator has asked you to research alternatives for easing the problem. Recommend one or two measures the senator could include in a bill for the Senate to vote on. Start with William C. Symonds, "Colleges in Crisis," *BusinessWeek*, April 28, 2003, 72–79; and Aaron Bernstein, "A British Solution to America's College Tuition Problem?" *BusinessWeek*, February 9, 2004, 72–73.
5. With your instructor's permission, choose your own topic.

24.10 Writing a Recommendation Report (LO 24-1 to LO 24-3)

Write an individual or group recommendation report.

1. **Recommending Courses.** What skills are in demand in your community? What courses at what levels should the local college offer?
2. **Improving Sales and Profits.** Recommend ways a small business can increase sales and profits. Focus on one or more of the following: the products or services it offers, its advertising, its decor, its location, its accounting methods, its cash management, or any other aspect that may be keeping the company from achieving its potential. Address your report to the owner of the business.
3. **Improving Customer Service.** Evaluate the service in a local store, restaurant, or other organization. Are customers made to feel comfortable? Is workers' communication helpful, friendly, and respectful? Are workers

knowledgeable about products and services? Do they sell them effectively? Write a report analyzing the quality of service and recommending ways to improve.

4. **Evaluating a Potential Employer.** What training is available to new employees? How soon is the average entry-level person promoted? How much travel and weekend work are expected? Is there a "busy season," or is the workload consistent year-round? What is the corporate culture? Is the climate nonracist and nonsexist? How strong is the company economically? How is it likely to be affected by current economic, demographic, and political trends? Address your report to a college placement office; recommend whether it should encourage students to work at this company.
5. With your instructor's permission, choose your own topic.

Polishing Your Prose

Improving Paragraphs

Good paragraphs demonstrate unity, detail, and variety.

The following paragraph from a sales letter illustrates these three qualities:

The best reason to consider a Schroen Heat Pump is its low cost. Schroen Heat Pumps cost 25% less than the cheapest competitor's. Moreover, unlike the competition, the Schroen Heat Pump will pay for itself in less than a year in energy savings. That's just 12 months. All of this value comes with a 10-year unlimited warranty—if anything goes wrong, we'll repair or replace the pump at no cost to you. That means no expensive repair bills and no dollars out of your pocket.

A paragraph is **unified** when all its sentences focus on a single idea. As long as a paragraph is about just one idea, a topic sentence expressing that idea is not required. However, a topic sentence makes it easier for the reader to skim the document. (Essays use a *thesis statement* for the central idea of the entire document.) Sentences throughout the paragraph should support the topic sentence or offer relevant examples.

Transitions connect. Common transitions are *and*, *also*, *first*, *second*, *third*, *in addition*, *likewise*, *similarly*, *for example* (e.g.), *for instance*, *indeed*, *to illustrate*, *namely*, *specifically*, *in contrast*, *then*, and *on the other hand*.

Detail makes your points clearer and more vivid. Use concrete words, especially strong nouns and verbs and adjectives and adverbs, that say what you mean. Avoid redundancies.

Variety is expressed first in sentence length and patterns and second in the number of sentences in each paragraph. Most sentences in business writing should be 16 to 20 words, but an occasional longer or very short sentence gives punch to your writing.

The basic pattern for sentences is subject/verb/object (SVO): *Our building supervisor sent the forms*. Vary the SVO pattern by changing the order, using transitions and clauses, and combining sentences.

Also vary paragraph length. First and last paragraphs can be quite short. Body paragraphs will be longer. Whenever a paragraph runs eight typed lines or more, think about dividing it into two paragraphs.

Exercises

Rewrite the following paragraphs to improve unity, detail, and variety.

1. Barbara Gillespie-Kim joins our Web Development Department after more than 10 years working with Lerner and Thorpe Associates in San Jose, California. There, she led several project teams, including those specializing in web development, market research, and customer relations. Please welcome her aboard. She received her B.A. in English from San Jose State University and her M.A. in Interdisciplinary Studies from California State University, Los Angeles. She started as a technical writer at Lerner and Thorpe, which is a technology consulting firm specializing in helping companies use the Internet. She graduated summa cum laude from San Jose State and with a perfect GPA from San Jose State University. While at Lerner and Thorpe Associates, Barbara worked

closely with clients throughout the west coast, as far away as Seoul, South Korea; Jakarta, Indonesia; and Osaka, Japan. She speaks Korean fluently and, in her words, “just enough Japanese and Indonesian to embarrass myself!” She specialized in technical writing in her bachelor’s program at California State and in a combination of multimedia design, web page development, and graphic design at San Jose State.

2. The Heat Ray features three settings to let you control how much heat you want and where. The price is only \$39.99. The Heat Ray is an exciting new product from JKL Products. The Heat Ray is made from anodized aluminum and high-grade plastic. The Heat Ray has a two-year warranty on all parts. It is made in the USA. The Heat Ray features a rotating element

that has two speeds. It is UL listed and automatically shuts off if tipped over. The Heat Ray is available in stores throughout the United States. The Heat Ray features a collapsible stand that can be extended to three feet. Its secret is the parabolic dish that amplifies the heating coils. For more information on the Heat Ray, go to www.heatray2012.com. The Heat Ray has a remote control and an LED control panel that can be programmed. The Heat Ray uses the latest in infrared technology to deliver a continuous stream of warmth on those chilly nights. The parabolic dish is covered with a wire mesh that keeps pets and people from contact with the heating element.

Check your answers to the odd-numbered exercises at the back of the book.

Module

25

Using Visuals

LEARNING OBJECTIVES

Module 25 focuses on how to use visuals effectively and ethically. After completing the module, you should be able to

- | | |
|---|---|
| LO 25-1 Identify stories for business visuals. | LO 25-5 Apply principles for accurate and ethical visuals. |
| LO 25-2 Select visuals for stories. | LO 25-6 Synthesize visuals with text. |
| LO 25-3 Apply principles for good design. | LO 25-7 Prepare print visuals for use in presentations. |
| LO 25-4 Apply principles for effective color and clip art use. | |

We live in an increasingly visual age. While organizations continue to adapt to the changing technologies that help us to use and present images, the mainstays of visuals in business documents remain charts, graphs, and clip art.

Charts and graphs help make numbers meaningful and thus help communicate your points in oral presentations, memos, letters, reports, and meetings. This module shows you how to turn data into charts and graphs. See Module 5 for a discussion of designing slides for oral presentations and Module 20 for a discussion of other aspects of good oral presentations.

Care must be taken when using clip art and other images. In particular, be aware that the same image may have different connotations for people. Review the principles in Modules 2 and 3 on audience and culture, respectively.

Use visuals only for points you want to emphasize

"It looks much worse when you see the big picture."

FARCUS® is reprinted with permission from LaughingStock Licensing Inc., Ottawa, Canada. All Rights Reserved.

We're using visual abilities in innovative ways. A technology being developed by Dr. Jean Lorenceau of the Université Pierre et Marie Curie in Paris makes it possible for people to write using eye movements, which are then translated into cursive letters on a computer screen. While the technology can have widespread applications, it may prove especially beneficial for individuals who have been injured or are challenged by degenerative diseases, such as ALS.

Source: Bruce Geryk, "New Technology Lets People Write Just with Their Eyes," ABC News, July 26, 2012, <http://news.yahoo.com/technology-lets-people-write-just-eyes-151217619--abc-news-wellness.html>.

In your rough draft, use visuals

- **To see that ideas are presented completely.** A table, for example, can show you whether you've included all the items in a comparison.
- **To find relationships.** For example, charting sales on a map may show that all the sales representatives who made quota have territories on the East or the West Coasts. Is the central United States suffering a recession? Is the product one that appeals to coastal lifestyles? Is advertising reaching the coasts but not the central states? Even if you don't use the visual in your final document, creating the map may lead you to questions you wouldn't otherwise ask.

In the final presentation or document, use visuals

- **To make points vivid.** Readers skim memos and reports; a visual catches the eye. The brain processes visuals immediately. Understanding words—written or oral—takes more time.
- **To emphasize material** that might be skipped if it were buried in a paragraph.
- **To present material more compactly and with less repetition** than words alone would require.
- **To focus on information that decision makers need.**

The number of visuals you need depends on your purposes, the kind of information, and the audience. You'll use more visuals when you want to show relationships and to persuade, when the information is complex or contains extensive numerical data, and when the audience values visuals.

Your chart is only as good as the underlying data. Check to be sure that your data come from a reliable source (◀◀ Module 22).

Increasingly, businesses are turning to more visual ways for employees to work out their ideas and explain them to peers. Visual note taking includes doodling and sketching to help spur creativity, using anything from paper and whiteboards to writable glass and sophisticated computer setups. Regardless of the technology used, "the hand is the easiest way to get something down," says Facebook communication designer Everett Katigbak.

Source: Rachel Emma Silverman, "Doodling for Dollars: Firms Try to Get Gadget-Obsessed Workers to Look Up—and Sketch Ideas," *The Wall Street Journal*, April 24, 2012, <http://online.wsj.com/article/SB10001424052702303978104577362402264009714.html?KEYWORDS=powerpoint+presentation>.

When former Washington Governor Gary Locke stopped to get his own coffee at a Seattle airport, he had no idea he would become a media sensation. The photo, taken by businessman ZhaoHui Tang, was posted to the Chinese social media network Sina Weibo, where it was viewed and reposted thousands of times. “This is something unbelievable in China,” Tang said. “Even for low-ranking officials, we don’t do things for ourselves. Someone goes to buy the coffee for them. Someone carries their bags for them.” Locke, the first Chinese-American ambassador to China, was also wearing a backpack. The story told by the photo helped to fuel his enormous celebrity in the most-populated country in the world.

Site to See

Go to

www.quintura.com

Quintura is a search engine that returns results in more visual form, rather than just a list of links. The user enters a topic, and then Quintura builds a “cloud” of the results. Keywords in different colors and sizes represent the relevance of different topics. To see details, the user clicks on a word.

What are stories, and how do I find them? LO 25-1

- *A story is something that is happening, according to the data.*
- *To find stories, look for relationships and changes.*

Every visual should tell a story. Stories can be expressed in complete sentences that describe something that happens or changes. The sentence can also serve as the title of the visual.

Not a story: U.S. Sales, 1999–2011

Possible stories: Forty Percent of Our Sales Were to New Customers.
Growth Was Greatest in the South.
Sales Increased from 1999 to 2011.

Stories that tell us what we already know are rarely interesting. Instead, good stories may

- Support a hunch you have.
- Surprise you or challenge so-called “common knowledge.”
- Show trends or changes you didn’t know existed.
- Have commercial or social significance.
- Provide information needed for action.
- Be personally relevant to you and the audience.

To find stories,

1. **Focus on a topic** (starting salaries, who likes rock music, and so forth).
2. **Simplify the data** on that topic and convert the numbers to simple, easy-to-understand units.
3. **Look for relationships and changes.** For example, compare two or more groups: Do men and women have the same attitudes? Look for changes over time. Look for items that can be seen as part of the same group. For example, to find stories about TV ads, you might group ads in the same product category—ads for cars, for food, for beverages.

When you think you have a story, test it against all the data to be sure it’s accurate.

Some stories are simple straight lines: “Sales Increased.” But other stories are more complex, with exceptions or outlying cases. Such stories will need more nuanced titles to do justice to the story. And sometimes the best story arises from the juxtaposition of two or more stories. In Figure 25.1, the *U.S. Bureau of Labor Statistics* used two **paired graphs** to tell a story. Individually, the graphs tell simple stories. Together, however, they tell an interesting story. Automotive workers earned more than nonautomotive workers, despite the recent trends of steady or declining compensation costs.

Gene Zelazny points out that the audience should be able to *see* what the message *says*:

Does the chart support the title; and does the title reinforce the chart? So if I *say* in my title that “sales have increased significantly” I want to *see* a trend moving up at a sharp angle. If not, if the trend parallels the baseline, it’s an instant clue that the chart needs more thinking.¹

Almost every data set allows you to tell several stories. You must choose the story you want to tell. Dumps of uninterpreted data confuse and frustrate your audience; they undercut the credibility and goodwill you want to create.

Does it matter what kind of visual I use? LO 25-2

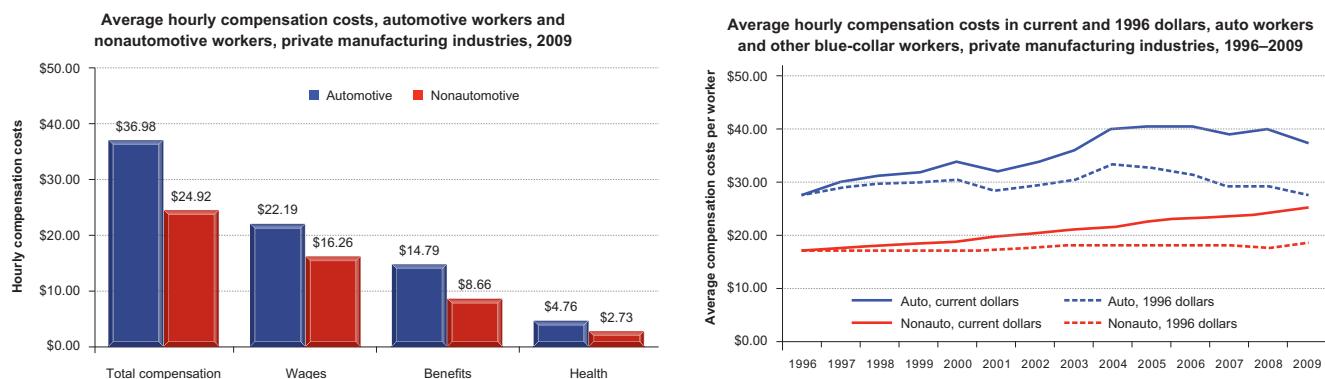

- *Yes! The visual must match the kind of story.*

Visuals are not interchangeable. Choose the visual that best matches the purpose of presenting the data.

- Use **tables** when the reader needs to be able to identify exact values. (See Figure 25.2a.)
- Use a chart or graph when you want the reader to focus on relationships.²
 - To compare a part to the whole, use a **pie chart**. (See Figure 25.2b.)
 - To compare one item to another item, or items over time, use a **bar chart** or a **line graph**. (See Figures 25.2c and 25.2d.)

Figure 25.1 Paired Graphs Tell a Complex Story

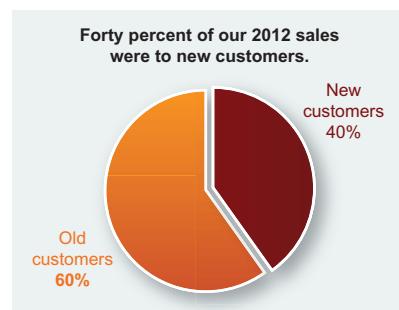

Source: U.S. Bureau of Labor Statistics, April 2011.

**Figure 25.2** Choose the Visual to Fit the Story

U.S. sales reach \$44.5 million.

	2010	2011	2012
Northeast	10.2	10.8	11.3
South	7.6	8.5	10.4
Midwest	8.3	6.8	9.3
West	11.3	12.1	13.5
Totals	37.4	38.2	44.5

Millions of dollars

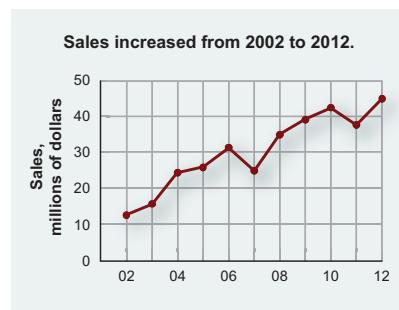

a. Tables show exact values.

b. Pie charts compare a component to the whole.

c. Bar charts compare items or show distribution or correlation.

d. Line charts compare items over time or show distribution or correlation.

Websites like Pinterest—where users post and link to visuals—are gaining traction, especially with women, so much so that many businesses are now “pinning.” Sevently, a maker of custom T-shirts, and Cakestyle, which makes wardrobe suggestions for women, are among companies heavily promoting their efforts on Pinterest. Other image-based sites include Visually, which helps users create infographics, and Flickr, which allows users to post photos and sponsors a contest to tell a story visually—in five frames. Flickr has 7.2 billion uploaded photos.

What design conventions should I follow? LO 25-3

► Check your visuals against the lists that follow.

Every visual should contain six components:

1. A title that tells the story that the visual shows.
2. A clear indication of what the data are. For example, what people *say* they did is not necessarily what they really did. An estimate of what a number will be in the future differs from numbers in the past that have already been measured.
3. Clearly labeled units.
4. Labels or legends identifying axes, colors, symbols, and so forth.

Sources: John Brandon, “9 Tips: Boost Your Business with Pinterest,” Inc., December 20, 2011, <http://www.inc.com/john-brandon/9-tips-boost-your-business-pinterest.html>; and Donna Tam, “iPhone Stays No. 1 in Flickr Popularity,” June 27, 2012, http://news.cnet.com/8301-1023_3-57462099-93/iphone-stays-no-1-in-flickr-popularity/.

5. The source of the data, if you created the visual from data someone else gathered and compiled.
6. The source of the visual, if you reproduce a visual someone else created.

Formal visuals are divided into tables and figures. **Tables** are numbers or words arranged in rows and columns; **figures** are everything else. In a document, formal visuals have both numbers and titles—for example, “Figure 1. The Falling Cost of Computer Memory, 2008–2013.” In an oral presentation, the title is usually used without the number: “The Falling Cost of Computer Memory, 2008–2013.” The title should tell the story so that the audience knows what to look for in the visual and why it is important. Informal or **spot** visuals are inserted directly into the text; they do not have numbers or titles.

Instant Replay

How to Find Stories

- 1. Focus on a topic.
- 2. Simplify the data.
- 3. Look for relationships and changes.

Instant Replay

Tables and Figures

Tables are numbers or words arranged in rows and columns; **figures** are everything else. In a document, formal visuals have both numbers (Figure 1) and titles. In an oral presentation, the title is usually used without the number.

Tables

Use tables only when you want the audience to focus on specific numbers. Graphs convey less specific information but are always more memorable.

- Round off to simplify the data (e.g., 35% rather than 35.27%; 34,000 rather than 33,942).
- Provide column and row totals or averages when they’re relevant.
- Put the items you want readers to compare in columns rather than in rows to facilitate mental subtraction and division.
- When you have many rows, screen alternate entries or double-space after every five entries to help readers line up items accurately.

Pie Charts

Pie charts force the audience to measure area. Research shows that people can judge position or length (which a bar chart uses) much more accurately than they judge area. The data in any pie chart can be put in a bar chart.³ Therefore, use a pie chart only when you are comparing one segment to the whole. When you are comparing one segment to another segment, use a bar chart, a line graph, or a map—even though the data may be expressed in percentages.

- Start at 12 o’clock with the largest percentage or the percentage you want to focus on. Go clockwise to each smaller percentage or to each percentage in some other logical order.
- Make the chart a perfect circle. Perspective circles distort the data.
- Limit the number of segments to five or seven. If your data have more divisions, combine the smallest or the least important into a single “miscellaneous” or “other” category.
- Label the segments outside the circle. Internal labels are hard to read.

Instant Replay

The Six Components of Every Visual

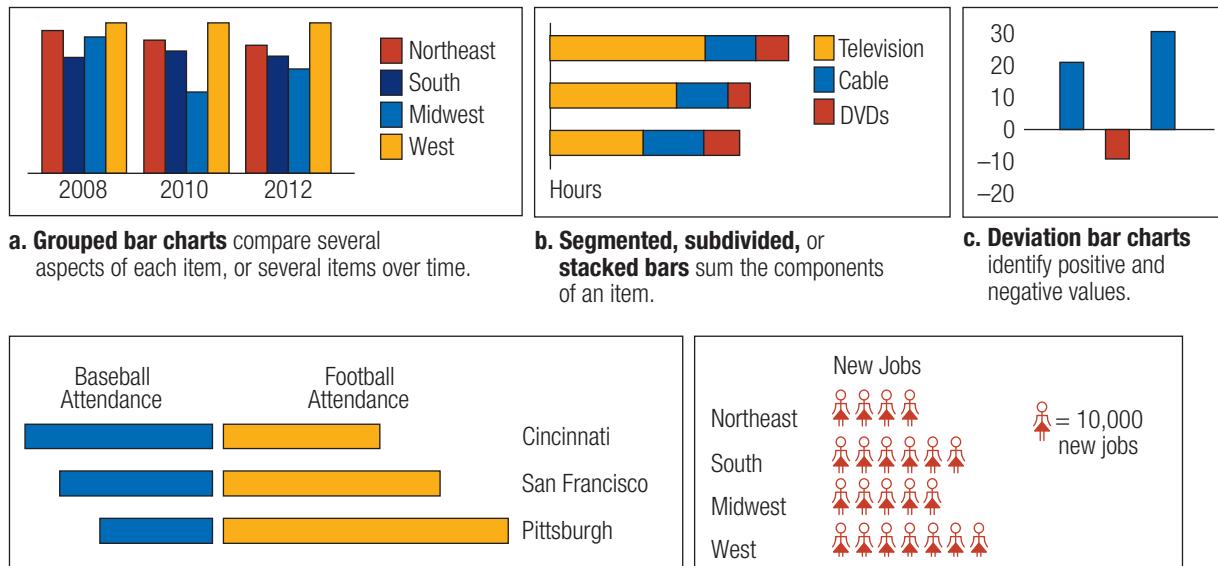

1. A title that tells the story that the visual shows.
2. A clear indication of what the data are.
3. Clearly labeled units.
4. Labels or legends identifying axes, colors, symbols, and so forth.
5. The source of the data, if you created the visual from data someone else gathered and compiled.
6. The source of the visual, if you reproduce a visual someone else created.

Bar Charts

Bar charts are easy to interpret because they ask people to compare distance along a common scale, which most people judge accurately. Bar charts are useful in a variety of situations: to compare one item to another, to compare items over time, and to show correlations. Use horizontal bars when your labels are long; when the labels are short, either horizontal or vertical bars will work.

- Order the bars in a logical or chronological order.
- Put the bars close enough together to make comparison easy.
- Label both horizontal and vertical axes.
- Put all labels inside the bars or outside them. When some labels are inside and some are outside, the labels carry the visual weight of longer bars, distorting the data.
- Make all the bars the same width.
- Use different colors for different bars only when their meanings are different: estimates as opposed to known numbers, negative as opposed to positive numbers.
- Avoid using perspective. Perspective makes the values harder to read and can make comparison difficult.

Several varieties of bar charts exist. See Figure 25.3 for examples.

Figure 25.3 Varieties of Bar Charts

- **Grouped bar charts** allow you to compare either several aspects of each item or several items over time. Group together the items you want to compare. Figure 25.3a shows sales were highest in the West. If we wanted to show how sales had changed over time in each region, the bars should be grouped by region, not by year.
- **Segmented, subdivided, or stacked bars** sum the components of an item. It's hard to identify the values in specific segments; grouped bar charts are almost always easier to use.
- **Deviation bar charts** identify positive and negative values, or winners and losers.
- **Paired bar charts** show the correlation between two items.
- **Histograms or pictograms** use images to create the bars.

Line Graphs

Line graphs are also easy to interpret. Use line graphs to compare items over time, to show frequency or distribution, and to show correlations.

- Label both horizontal and vertical axes.
- When time is a variable, put it on the horizontal axes.
- Avoid using more than three different lines on one graph. Even three lines may be too many if they cross each other.
- Avoid using perspective. Perspective makes the values harder to read and can make comparison difficult.

Can I use color and clip art? LO 25-4

- Use color carefully.
- Avoid decorative clip art in memos and reports.

Color makes visuals more dramatic, but it creates at least two problems. First, readers try to interpret color, an interpretation that may not be appropriate. Second, meanings assigned to colors differ depending on the audience's national background and profession.

Connotations for color vary from culture to culture (◀ p. 45). Blue suggests masculinity in the United States, criminality in France, strength or fertility in Egypt, and villainy in Japan. Red is sometimes used to suggest danger or *stop* in the United States; it means *go* in China and is associated with festivities. Red suggests masculinity or aristocracy in

MTV finally acknowledged what fans had noted for years: The network that pioneered showing music videos had all but stopped showing music videos. Thus, the colorful logo appears now without "Music Television" as part of its design, a better recognition of its programming.

Source: Scott Collins, "MTV Drops 'Music Television' from Official Logo," *The Los Angeles Times*, February 13, 2010, <http://articles.latimes.com/2010/feb/13/entertainment-la-et-branding13-2010feb13>.

Taste may be relative, but sensitivity is key to producing inoffensive visuals. British Petroleum (BP), whose ruptured oil pipeline caused perhaps the worst human-made ecological disaster in Gulf of Mexico history, is no stranger to accidents. Nonetheless, in 2002, its risk management specialists compared in a cost-benefit analysis the safe housing of refinery employees to the "Three Little Pigs" nursery rhyme, complete with swine-adorned diagrams. The cheeky tone was noted by observers when the report surfaced during a lawsuit against BP for a 2005 Texas City refinery explosion. Most of the 15 workers killed there were in trailers, an option the 2002 report showed was 10 times cheaper than blast-resistant housing.

Sources: Brett Michael Dykes, "Old BP Document Calculates Worth of Human Life with 'Three Little Pigs' Diagram," May 25, 2010, http://news.yahoo.com/s/ynews/20100525/bs_ynews/ynews_bs2240; and Outzen, Rick, "BP's Shocking Memo," The Daily Beast, downloaded on May 25, 2010, at <http://www.thedailybeast.com/blogs-and-stories/2010-05-25/shocking-bp-memo-and-the-oil-spill-in-the-gulf/full/>.

France, death in Korea, blasphemy in some African countries, and luxury in many parts of the world. Yellow suggests caution or cowardice in the United States, prosperity in Egypt, grace in Japan, and femininity in many parts of the world.⁴

These general cultural associations may be superseded by corporate, national, or professional associations. Some people associate blue with IBM or Hewlett-Packard and red with Coca-Cola, communism, or Japan. People in specific professions learn other meanings for colors. Blue suggests *reliability* to financial managers, *water* or *coldness* to engineers, and *death* to health care professionals. Red means *losing money* to financial managers, *danger* to engineers, but *healthy* to health care professionals. Green usually means *safe* to engineers, but *infected* to health care professionals.⁵

These various associations suggest that color is safest with a homogenous audience that you know well. In an increasingly multicultural workforce, color may send signals you do not intend. When you do use color in visuals, Thorell and Smith suggest these guidelines:⁶

- Use no more than five colors when colors have meanings.
- Use glossy paper to make colors more vivid.
- Be aware that colors on a computer screen always look brighter than the same colors on paper because the screen sends out light.

In any visual, use as little shading and as few lines as are necessary for clarity. Don't clutter up the visual with extra marks. When you design black and white graphs, use shades of gray rather than stripes, wavy lines, and checks to indicate different segments or items.

In memos and reports, resist the temptation to make your visual "artistic" by turning it into a picture or adding clip art. **Clip art** is predrawn images that you can import into your newsletter, sign, or graph. A small drawing of a car in the corner of a line graph showing the number of miles driven is acceptable in an oral presentation or a newsletter, but out of place in a written report.

Edward Tufte uses the term **chartjunk** for decorations that at best are irrelevant to the visual and at worst mislead the reader.⁷ Turning a line graph into a highway to show miles driven makes it harder to read: it's hard to separate the data line from lines that are merely decorative. If you use clip art, be sure that the images of people show a good mix of both sexes, various races and ages, and various physical conditions (◀◀ p. 54).

What else do I need to check for? LO 25-5

► Be sure that the visual is accurate and ethical.

Always double-check your visuals to be sure that the information is accurate. However, many visuals have accurate labels but misleading visual shapes. Visuals communicate quickly; audiences remember the shape, not the labels. If the reader has to study the labels to get the right picture, the visual is unethical even if the labels are accurate.

Figure 25.4 is distorted by chartjunk and dimensionality. In an effort to make the visual interesting, the artist used an image of a pushpin rather than simple bars. By using a pushpin rather than a bar, the chart makes it difficult to compare the numbers. The number represented by the tallest figure is not quite 34 times as great as the number represented by the shortest figure, yet the tallest figure takes up more than 34 times as much space and appears even bigger than that. Two-dimensional figures distort data by multiplying the apparent value by the width as well as by the height—four times for every doubling in value. Perspective graphs are especially hard for readers to interpret and should be avoided.⁸

Even simple bar and line graphs may be misleading if part of the scale is missing, or **truncated**. Truncated graphs are most acceptable when the audience knows the basic data set well. For example, graphs of the stock market almost never start at zero; they are routinely truncated. This omission is acceptable for audiences who follow the market closely.

Since part of the scale is missing in truncated graphs, small changes seem like major ones. Figure 25.5 shows three different truncated graphs of U.S. unemployment data.

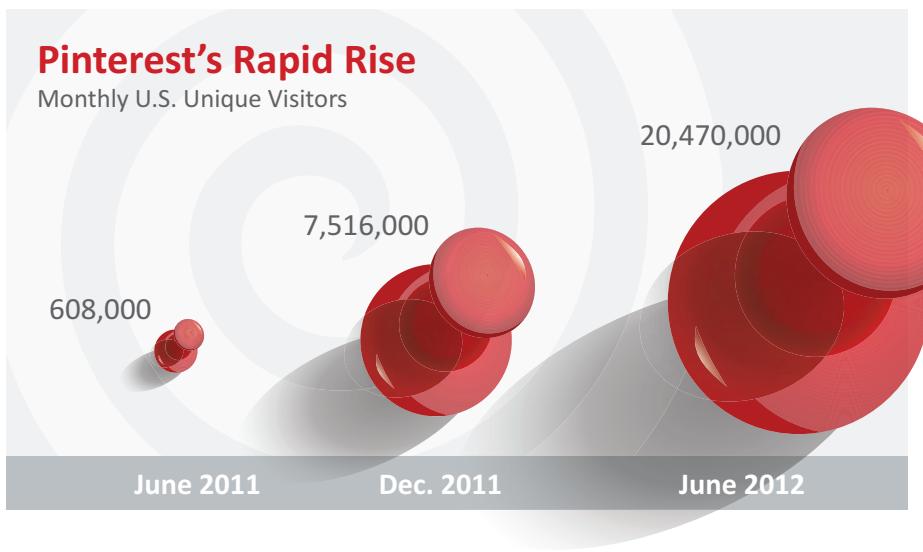

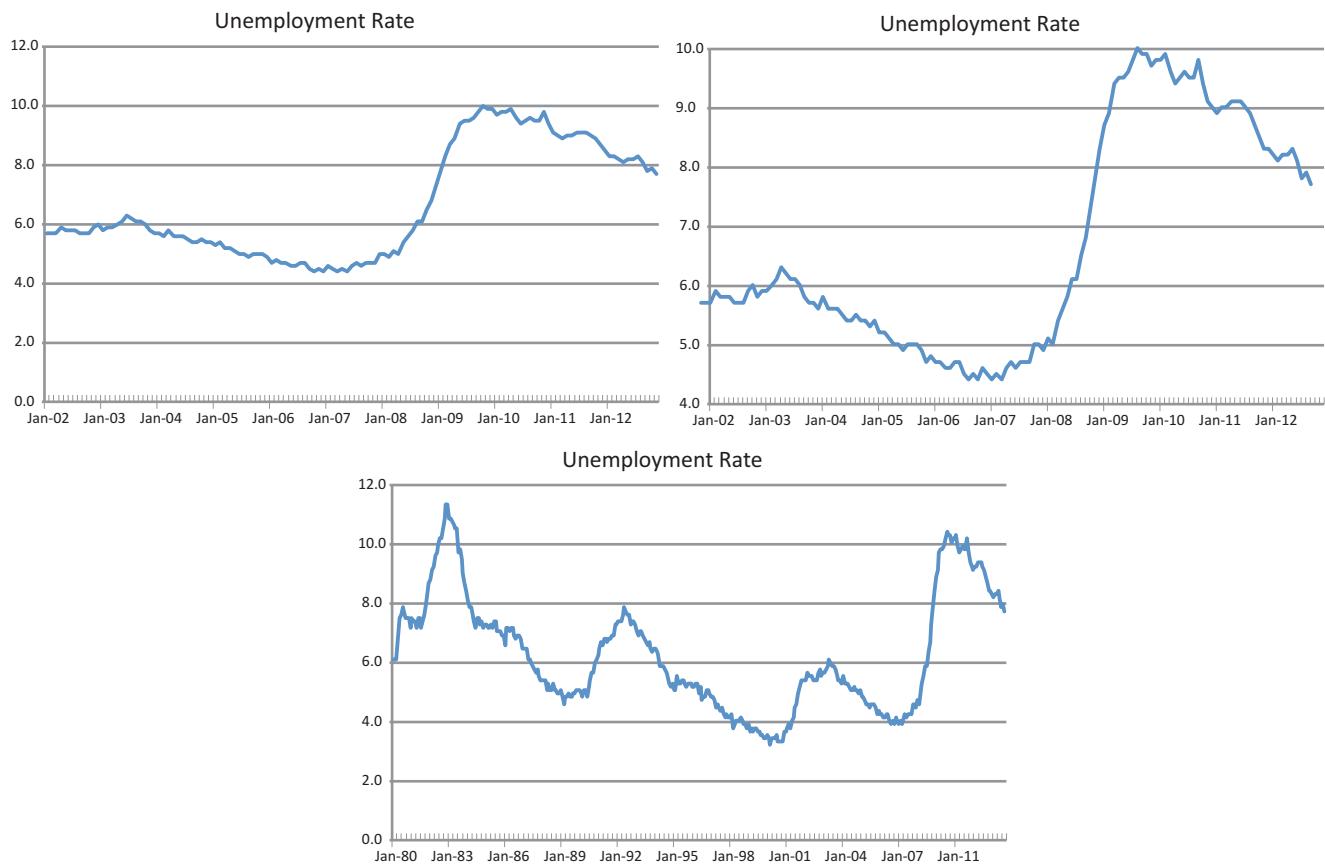

Figure 25.4 Chartjunk and Dimensions Distort Data

Building a Critical Skill

Integrating Visuals into Your Text LO 25-6

Refer to every visual in your text. Normally give the table or figure number in the text but not the title. Put the visual as soon after your reference as space and page design permit. If the visual must go on another page, tell the reader where to find it:

As Figure 3 shows (p. 10), . . .

(See Table 2 on page 3.)

Summarize the main point of a visual *before* you present the visual itself. Then when readers get to it, they'll see it as confirmation of your point.

Weak: Listed below are the results.

Better: As Figure 4 shows, sales doubled in the last decade.

How much discussion a visual needs depends on the audience, the complexity of the visual, and the importance of the point it makes. If the material is new to the audience, you'll

need a fuller explanation than if similar material is presented to this audience every week or month. Help the reader find key data points in complex visuals. If the point is important, discuss its implications in some detail. In contrast, one sentence about a visual may be enough when the audience is already familiar with the topic and the data, when the visual is simple and well designed, and when the information in the visual is a minor part of your proof.

When you discuss visuals, spell out numbers that are used as the first word of a sentence. If spelling out the number or year is cumbersome, revise the sentence so it does not begin with a number.

Correct: Forty-five percent of the cost goes to pay wages and salaries.

Correct: In 2002, euro notes and coins entered circulation.

The proliferation of corporate logos—on hats, cups, shoes, T-shirts, and billboards—presents tricky situations in venues where licensing to specific companies limits what can be done. For the 2012 Olympics in London, organizers had to clarify what items might be banned from display. So, a single person wearing a Pepsi T-shirt when Coca Cola is an official sponsor might be allowed in while a group of people wearing the same T-shirt might be asked to leave, the latter being defined as “ambush marketing.”

Source: Jill Lawless, “Pepsi or Coke? Olympic Brand Rules Sow Confusion,” *Bloomberg Businessweek*, July 20, 2012, <http://www.businessweek.com/ap/2012-07-20/olympic-brand-restrictions-sow-confusion>.

The second graph shows the trend in unemployment from January 2002 to January 2012. The curve rises from below the first level of the graph to the sixth, resembling a 95% increase. But a closer look at the numbers shows the increase from 4.5% to 10%. The period chosen for the vertical axis is truncated. The truncated scale on the vertical axis again makes the changes appear larger. The third graph takes a longer view (back to 1980) and puts the percentages on a scale starting at zero. On this scale, the changes in the unemployment rate seem less dramatic, and the recent increase looks as if it could be part of a regular pattern. Starting with 1980, the graph shows that the latest unemployment rate is significantly lower than it was in January 1983.

An annual report disguised losses by using a negative base.⁹ Because readers expect zero to be the base, they’re almost certain to misread the visual. Labels may make the visual literally “accurate,” but a visual is unethical if someone who looks at it quickly is likely to misinterpret it.

Data can also be distorted when the context is omitted. As Tufte suggests, a drop may be part of a regular cycle, a correction after an atypical increase, or a permanent drop to a new, lower plateau.

To make your visuals more accurate,

- Differentiate between actual and estimated or projected values.
- When you must truncate a scale, do so clearly with a break in the bars or in the background.
- Avoid perspective and three-dimensional graphs.
- Avoid combining graphs with different scales.
- Use images of people carefully in histograms to avoid sexist, racist, or other exclusionary visual statements.

Can I use the same visuals in my document and my presentation? **LO 25-7**

- Only if the table or graph is simple.

For presentations, simplify paper visuals. To simplify a complex table, divide it into several visuals, cut out some of the information, round off the data even more, or present the material in a chart rather than a table.

Visuals for presentations should have titles but don't need figure numbers. Do know where each visual is so that you can return to one if someone asks about it during the question period. Decorative clip art is acceptable in oral presentations as long as it does not obscure the story you're telling with the visual.

Summary of Learning Objectives

- Pick data to tell a story, to make a point. To find stories, **(LO 25-1)**
 1. Focus on a topic.
 2. Simplify the data.
 3. Look for relationships and changes.
- **Paired graphs** juxtapose two or more simple stories to create a more powerful story. **(LO 25-1)**
- Use **tables** when the reader needs to be able to identify exact values. **(LO 25-2)**
- Use a chart or graph when you want the reader to focus on relationships. **(LO 25-2)**
- To compare a part to the whole, use a **pie chart**. **(LO 25-2)**
- To compare one item to another item, or items over time, use a **bar chart** or a **line graph**. **(LO 25-2)**
- The best visual depends on the kind of data and the point you want to make with the data. **(LO 25-2)**
- Every visual should contain six components: **(LO 25-3)**
 1. A title that tells the story that the visual shows.
 2. A clear indication of what the data are. For example, what people say they did is not necessarily what they really did. An estimate of what a number will be in the future differs from numbers in the past that have already been measured.
 3. Clearly labeled units.
 4. Labels or legends identifying axes, colors, symbols, and so forth.
- The source of the data, if you created the visual from data someone else gathered and compiled.
- The source of the visual, if you reproduce a visual someone else created.
- Color makes visuals more dramatic, but it creates at least two problems. First, readers try to interpret color, an interpretation that may not be appropriate. Second, meanings assigned to colors differ depending on the audience's national background and profession. Visuals must present data correctly. **Chartjunk** denotes decorations that are at best irrelevant and at worst mislead the reader. **(LO 25-4)**
- Truncated graphs omit part of the scale and visually mislead readers. Perspective graphs and graphs with negative bases mislead readers. **(LO 25-5)**
- Refer to every visual in your text. **(LO 25-6)**
- Summarize the main point of a visual before you present the visual itself. **(LO 25-6)**
- Analyze your audience to decide how much discussion you need. **(LO 25-6)**
- When you discuss visuals, spell out numbers that fall at the beginning of sentences. **(LO 25-6)**
- For presentations, simplify paper visuals. **(LO 25-7)**
- To simplify a complex table, divide it into several visuals, cut out some of the information, round off the data even more, or present the material in a chart rather than a table. **(LO 25-7)**
- Visuals for presentations should have titles but don't need figure numbers. **(LO 25-7)**

Assignments for Module 25

Questions for Comprehension

- 25.1** How can you find stories in data? **(LO 25-1)**
25.2 What is the difference between a table and a figure? **(LO 25-2)**

- 25.3** What is chartjunk? **(LO 25-4)**

Questions for Critical Thinking

- 25.4** Why does each visual need to tell a story? **(LO 25-1)**
25.5 Why are charts more memorable than tables? **(LO 25-1)**
25.6 When is chartjunk most likely to be acceptable? Why? **(LO 25-4)**

- 25.7** When is a truncated scale most likely to be acceptable? **(LO 25-5)**

Exercises and Problems

25.8 Identifying Stories (LO 25-1)

Of the following, which are stories?

1. Computer Use
2. Computer Prices Fall
3. More Single Parents Buy Computers than Do Any Other Group

25.9 Matching Visuals with Stories (LO 25-1)

What visual(s) would make it easiest to see each of the following stories?

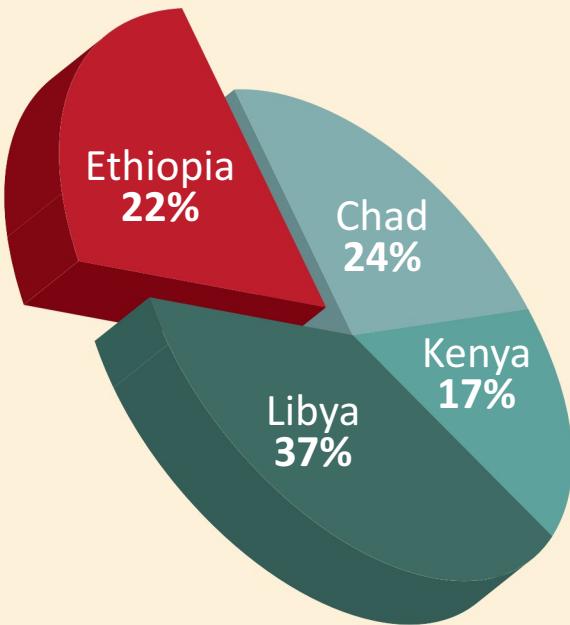

1. Canada buys 20% of U.S. exports.
2. Undergraduate enrollment rises, but graduate enrollment declines.
3. Open communication ranks number one in reasons to take a job.

25.10 Evaluating Visuals (LO 25-1 to LO 25-5)

Evaluate each of the following visuals.

- Is the visual's message clear?
- Is it the right visual for the story?
- Is the visual designed appropriately? Is color, if any, used appropriately?

1.

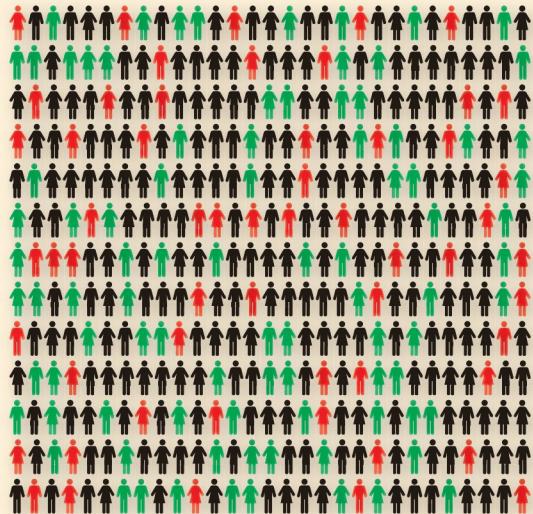

4. Where Your Tax Dollars Go
5. Sixty Percent of Tax Dollars Pay Entitlements, Interest

4. Companies with fewer than 200 employees created a larger percentage of new jobs than did companies with more than 5,000 employees.
5. Men are more likely than women to see their chances for advancement as good.

- Is the visual free from *chartjunk*?
- Does the visual distort data or mislead the reader in any way?

2.

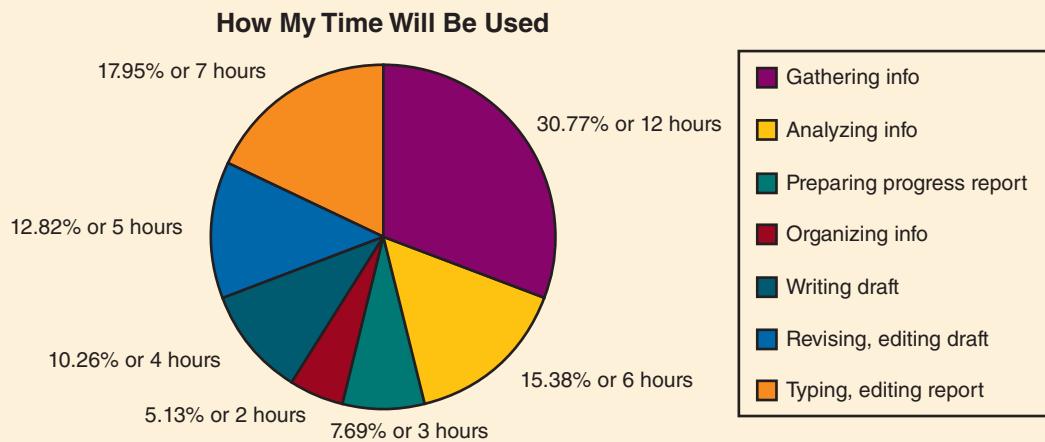

Number of Lottery Participants

Key

- In-state participants
- Out-of-state participants
- State of residence unknown

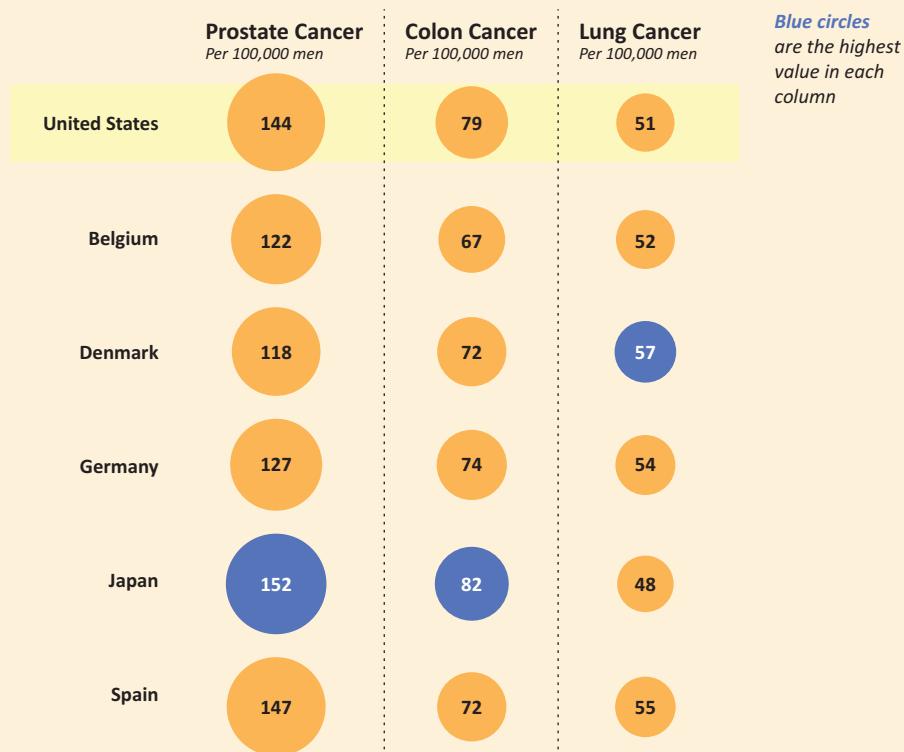

3.

4.

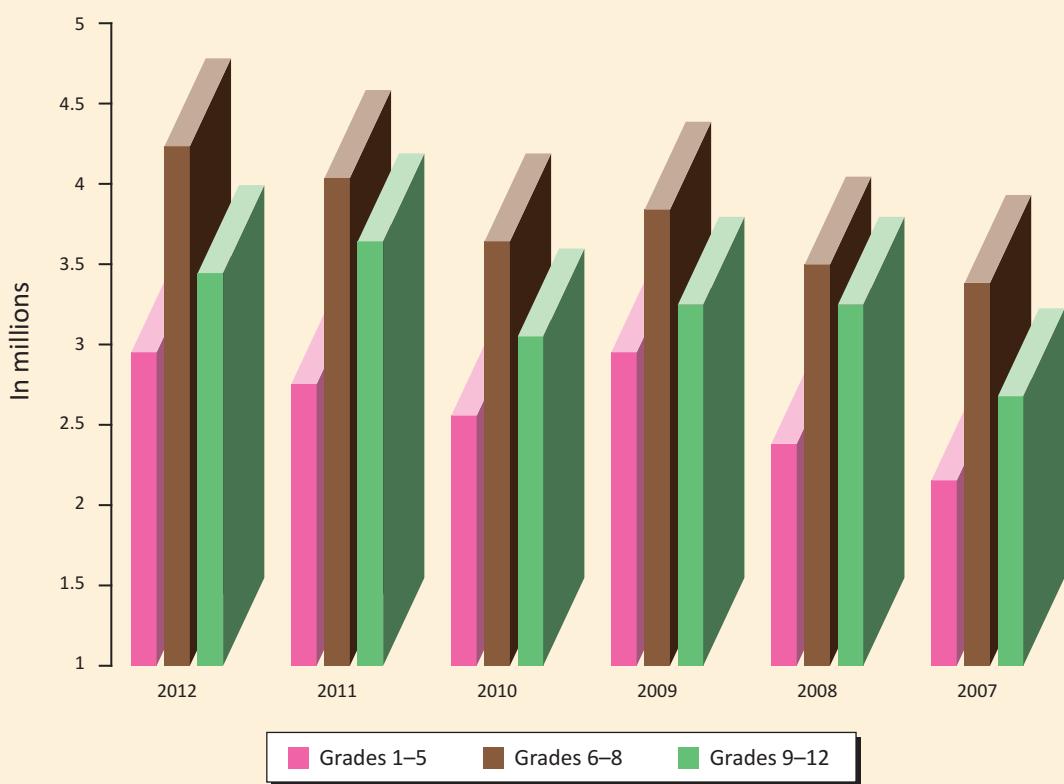

5.

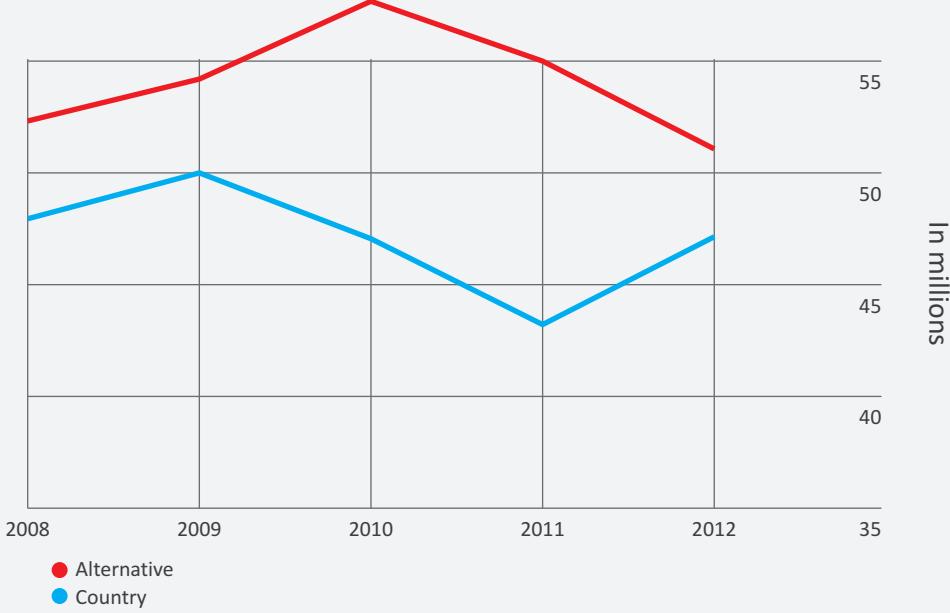

6.

Students Enrolled in After-School Programs

7.

Alternative and Country Album Sales

25.11 Interpreting Data (LO 25-1 to LO 25-5)

As Your Instructor Directs,

- Identify at least six stories in one or more of the following data sets.
- Create visuals for three of the stories.
- Write a memo to your instructor explaining why you chose these stories and why you chose these visuals to display them.

- Write a memo to some group that might be interested in your findings, presenting your visuals as part of a short report. Possible groups include pet stores, career counselors, and financial advisers.
- Brainstorm additional stories you could tell with additional data. Specify the kind of data you would need.

1.

Celebrities, 2004					
Power Rank	Name	Pay Rank	Web Rank	Press Rank	TV Rank
1	Mel Gibson	1	3	6	5

From "The Asian Population: 2000," <http://www.census.gov/prod/2002pubs/c2kbr01-16.pdf>.

-Represents zero.

¹The total of 10,019,405 respondents categorized as reporting only one Asian group in this table is lower than the total of 10,019,410 shown in Table PCT5 (U.S. Census Bureau, Census 2000 Summary File 1 100-Percent Data, see factfinder.census.gov). This table includes more detailed groups than PCT5. This means that, for example, an individual who reported "Pakistani and Nepalese" is shown in this table as reporting two or more Asian groups. However, that same individual is categorized as reporting a single Asian group in PCT5 because both Pakistani and Nepalese are part of the larger Other specified Asian group.

²The numbers by detailed Asian group do not add to the total population. This is because the detailed Asian groups are tallies of the number of Asian responses rather than the number of Asian respondents. Respondents reporting several Asian groups are counted several times. For example, a respondent reporting "Korean and Filipino" would be included in the Korean as well as the Filipino numbers.

³Includes respondents who checked the "Other Asian" response category on the census questionnaire or wrote in a generic term such as "Asian" or "Asiatic."

25.12 Graphing Data from the Web (LO 25-1 to LO 25-5)

Find data on the web about a topic that interests you. Sites with data include

American Demographics Archives: www.inside.com/default.csp?entity=American Demo

Catalyst: www.catalystwomen.org/press_room/factsheets.htm

FEDSTATS (links to U.S. government agencies): www.fedstats.gov

Food and Nutrition Information Center: www.nal.usda.gov/fnic/etext/000056.html

U.S. Census Bureau E-Stats: www.census.gov/eos/www/ebusiness614.htm

White House Briefing Room (economic issues): www.whitehouse.gov/fsbr/esbr.html

As Your Instructor Directs,

- Identify at least seven stories in the data.
- Create visuals for three of the stories.
- Write a memo to your instructor explaining why you chose these stories and why you chose these visuals to display them.
- Write a memo to some group that might be interested in your findings, presenting your visuals as part of a short report.
- Print out the data and include it with a copy of your memo or report.

Polishing Your Prose

Writing Subject Lines and Headings

Subject lines are the title of a letter, memo, or e-mail message. Headings within a document tell the reader what information you will discuss in that section.

Good subject lines are specific, concise, and appropriate for your purposes and the response you expect from the reader. Subject lines are required in memos, optional in letters.

- Put in good news if you have it.
- If information is neutral, summarize it.
- Use negative subject lines if the reader might not read the message, needs the information to act, or if the negative is your error.
- In a request that is easy for the reader to grant, put the subject of that request or a direct question in the subject line.
- When you must persuade a reluctant reader, use a common ground, a reader benefit, or a directed subject line that makes your stance on the issue clear.

Headings are single words, short phrases, or complete sentences that indicate the topic in a document section. Headings must be parallel—that is, they must use the same grammatical structure—and must cover all the information until the next heading.

The most useful headings are **talking heads**, which sum up the content of the section.

Weak: Problem

- Cause 1

Unit 6 Cases for Communicators

Waterless Wonder!

In countries like Jordan, where water is in short supply, Nader Atmeh hopes to help conserve the precious resource with Keenwash, the waterless car wash business he founded with his sons. Keenwash uses a nontoxic spray-on solution that is almost entirely biodegradable. It is mixed and bottled at a factory in Amman, Jordan, and emulsifies dirt, making it easy to be wiped off with a cloth. With the typical car wash using 50 gallons of water per vehicle, the water savings amounts to hundreds of thousands of gallons annually.

Though waterless car washes have been around in the United States for years, they have yet to catch on in Jordan. Atmeh, In fact, got the idea for Keenwash while visiting a waterless car wash in Dallas in 2003. But while testing U.S. products in his native country, he was unimpressed. That led the pharmacist and cosmetics and household cleaning product manufacturer to develop his

own formula. Atmeh founded his company in 2008 and to date has cleaned 35,000 cars.

Keenwash is expanding to other markets. There are now five franchises in Saudi Arabia, and one each in Bahrain, Kuwait, Oman, and the West Bank. Hassan Atmeh, one of Nader’s sons, is hoping to sell 250 franchises in Egypt.

Individual Assignment

Imagine that you work in the marketing department at Waterless Car Wash of America (WCWA), a company with car washes in

Source: Nick Leiber, “Keenwash: A Waterless Car Wash from the Middle East,” *Bloomberg Businessweek*, June 16, 2011, http://www.businessweek.com/magazine/content/11_26/b4234046583125.htm.

several states on the East Coast that wishes to expand westward. It's web accounts manager presents an opportunity to write an online questionnaire to gather critical data about potential franchisees' demographics and their desire to open a WCWA franchise in the Midwest or Southwest.

The questionnaire, which will be put on WCWA's website, will appear immediately after visitors log in with their user name and password. Potential franchisees can bypass filling out the questionnaire, but they will continue to see it on return visits until they fill it out. Return visitors who have completed the questionnaire will not see it a second time.

Your manager has created a list of 10 general question areas for the questionnaire.

1. How did you learn about WCWA's website?
2. Did WCWA's business model convince you to apply for a franchise?
3. Have you ever used a WCWA car wash?
4. If not, do you intend to visit one? When?
5. How many of these people have been using a WCWA car wash already?
6. If you have used a WCWA car wash before, how many times have you used one?
7. If you have used a WCWA car wash before, what do you think of the quality of its service?
8. What previous experience do you have in business?
9. Will you require assistance in securing financing for a franchise?
10. What makes you most interested in a WCWA franchise?

Before you begin writing the questionnaire, consider these points:

- What type of questions should I write—open or closed?
- Who is the population for this questionnaire?

- Is my sample a random sample, a convenience sample, or a judgment sample?
- How does the sample type affect my ability to generalize my findings?

As you write the questionnaire, ask yourself the following questions:

- Are my questions phrased in such a way as to be neutral and clear?
- Have I made any inappropriate assumptions in my questions?
- Am I using branching questions where appropriate?
- Have I structured the questionnaire so that easier questions come before harder questions?
- Do my questions cover the necessary points as outlined by my manager?
- Have I used indentations and white spaces effectively?

Make the questionnaire clear, concise, and easy to tabulate.

Group Activity

WCWA has now gathered the required demographic and viewing habit information, and discussions have already begun about the future. Some executives believe that the questionnaire program should be ended, while others think it should be extended indefinitely as part of the overall promotional approach for WCWA's franchising program.

You and your colleagues in the marketing department have been asked to present a recommendation report to executives on this very issue. You know that the campaign has done well, but you are not sure if it has generated enough interest to warrant its continuation.

With other members of your group, brainstorm questions whose answers will guide your writing of the report. For each question, brainstorm one or more possible stories the data might tell and which kind of visual would best tell that story.

Researching Jobs

LEARNING OBJECTIVES

By using the principles discussed in Module 26, you can improve your chances of finding the right job for you. After completing the module, you should be able to

- | | |
|---|---|
| LO 26-1 Know yourself for successful job hunts. | LO 26-4 Apply strategies for information interviews. |
| LO 26-2 Know companies for successful job hunts. | LO 26-5 Apply strategies for tapping into the hidden job market. |
| LO 26-3 Recognize signs for staying with or leaving a job. | LO 26-6 Assess weaknesses for stronger job application appeals. |

Perhaps you already have a job waiting for you; perhaps your skills are in such demand that employers will seek you out. If, however, the job picture is more murky, the modules in this unit will help you find your way.

Globalization has expanded the labor pool, and finding—and keeping—a job in a tight economy can be tricky. Some job applicants are going to extremes, using gimmicks to get attention or boasting of accomplishments rather than explaining how they can help employers. Such tactics usually fail, and when they do, show poor audience analysis. Spare yourself embarrassment by doing your research on potential employers carefully and thoroughly.

To increase opportunities, start the job search process *before* you graduate, and the sooner the better. Seek internships, for instance, and talk with professors and others in your field to establish contacts for information interviews. Network with LinkedIn, Facebook, and other social media. Join campus organizations that may point you to career opportunities. Take extra classes to enhance skills. Volunteer. The goal is to put your name and face “out there.” Get as much experience related to your field as you can.

Of course, no strategy guarantees a job. The reality is that some college graduates never find work in their field, and that has always been true, even in better economic times. A college degree can give you an edge in the competition, but fortune and persistence also come into play. You increase your chances, however, by employing as many strategies as possible.

The most successful job hunting method, claims Richard Bolles, hasn't changed:

Do thorough homework on yourself. Know your best skills, in order of priority. Know the fields in which you want to use those skills. Talk to people who have those kinds of jobs. Find out whether they're happy, and how they found their jobs. Then choose the places where you want to work, rather than just those places that have advertised openings. Thoroughly research these organizations before approaching them. Seek out the person who actually has the power to hire you for the job that you want. Demonstrate to that person how you can help the company with its problems. Cut no corners; take no shortcuts. That method has an 86% success rate.¹

What do I need to know about myself to job hunt? LO 26-1

► Your knowledge, skills, abilities, interests, and values.

Each person could do several jobs happily. Personality and aptitude tests can tell you what your strengths are, but they won't say, "You should be a ____ ." You'll still need to answer questions like these:

- What achievements have given you the most satisfaction? *Why* did you enjoy them?
- Would you rather have firm deadlines or a flexible schedule? Do you prefer working alone or with other people? Do you prefer specific instructions and standards for evaluation or freedom and uncertainty? How comfortable are you with pressure? Are you willing to "pay your dues" for several years before you are promoted? How much challenge do you want?
- Are you willing to take work home? To travel? How important is money to you? Prestige? Time to spend with family and friends?
- Where do you want to live? What features in terms of weather, geography, and cultural and social life do you see as ideal?
- Is it important to you that your work achieve certain purposes or values, or do you see work as "just a way to make a living"? Are the organization's culture and ethical standards important to you?

Once you know what is most important to you, analyze the job market to see where you could find what you want. For example, Peter's greatest interest is athletics, but he isn't good enough for the pros. Studying the job market might suggest several alternatives. He could teach sports and physical fitness as a high school coach or a corporate fitness director. He could cover sports for a newspaper, a magazine, a TV station, or the web. He could go into management or sales for a professional sports team, a health club, or a company that sells sports equipment. He could create or manage a sports web page.

According to a survey by CompTIA, while about 97% of people between ages 13 and 24 say they like technology, only 18% of them expressed strong interest in a career in information technology. Opportunities in that field are expected to grow by 22% by 2020, translating to more than 750,000 jobs. That figure dovetails with *U.S. News and World Report's* ranking of the 25 best jobs. Registered nurse tops that list, but software developer is second, with database administrator, web developer, computer systems analyst, and computer programmer also making the top 10.

Source: Jada Graves, "The 25 Best Jobs of 2012," *U.S. News and World Reports*, February 27, 2012, <http://money.usnews.com/money/careers/articles/2012/02/27/the-best-jobs-of-2012>.

What do I need to know about companies that might hire me? LO 26-2

► As much as you can!

To adapt your letter to a specific organization and to shine at the interview, you need information both about the employer and about the job itself. You'll need to know

- **What the job itself involves.** Notebooks at campus placement offices often have fuller job descriptions than appear in ads. Talk to friends who have graduated recently to learn what their jobs involve. Conduct information interviews to learn more about opportunities that interest you.

A survey of more than 800,000 U.S. job seekers by CareerBuilder found that half said that location was a top factor in deciding whether or not to apply for a job, while a tenth said they decided not to go through with an application because it was too long, often because applicants must answer questions in addition to providing a cover letter and résumé.

(continued)

Building a Critical Skill

Choosing Whether to Stay or Go

LO 26-3

When your job is OK, it's often hard to know whether to stay or move. After all, you know all the flaws of your current situation. Any new job will have its own flaws, but you probably don't know them and certainly don't know all of them. To decide on the basis of the pluses and minuses you know, therefore, is illogical. You need a better way to compare the job you know to the one that is only a possibility.

William Morin offers a seven-question quiz. Are the following statements true or false for you?

1. Your boss likes you and advocates for you in the organization.
2. Your boss is doing well.
3. You've been promoted in the last two years.
4. Your pension plan, 401(k), and other benefits are vested (or are near vesting) and growing.
5. The company is doing well and can grow further.
6. You're getting better-than-average raises. (Average for white-collar workers is about 3.5% a year in good years.)
7. Your boss has mentioned within the last year that you are valued and he or she sees where you might be headed in the organization.

If most of these statements are true for you, Morin says, you should stay where you are.

Professor John Sullivan offers a different set of questions to evaluate your current job and new possibilities:

1. Do you love the work? The ideal job is one you'd want to do even if you were rich.
2. Do you have a great mentor? Your career will soar if you do.

3. Do you have opportunities to learn a lot fast? No job is forever. But if you keep learning cutting-edge skills, you'll always be employable.
4. Does the job encourage rapid change? Change encourages growth. And growth keeps you employable and promotable.
5. Is the company an employer of choice (EOC, for whom everyone wants to work) or a fun place to work (FPW)? If you're with an EOC, you get an "impeccable pedigree that will prove invaluable" the next time you're on the job market. And an FPW is its own reward.

The job with the most "yes" responses wins.

Jeanne Sahadi knew she'd been on the job too long when after her grandmother asked if she wanted more bread, Sahadi burst into tears. Stress and countless hours on the job had finally taken their toll and spilled over to her private life.

To determine if it's time to leave, career coach and psychologist Dory Hollander recommends looking for these telltale signs:

- You have a lot on your mind, just not work.
- Things change, not to your advantage.
- Your boss takes you for granted.
- You pigeonhole yourself.
- Your mood ranges from angry to angrier.
- You feel awful.

Go to

<http://www.hiremymom.com>

for job opportunities working out of the home.

For Internet job hunting, niche job boards are often more useful than general ones. When telecommunications manager Ross Quam decided to leave the U.S. Marines, he got no nibbles from generalist job boards such as Monster.com and America's Job Bank. But when he posted his résumé on Telecomcareers.net, he got three job offers.

- **The name and address of the person who should receive the letter.** To get this information, check the ad or the web or call the organization. An advantage of calling is that you can find out whether a woman prefers *Ms.* or *Mrs.*
- **What the organization does and at least four or five facts about it.** Knowing the organization's larger goals enables you to show how your specific work will help the company meet its goals. Useful facts include
 - Market share.
 - Competitive position.
 - New products, services, or promotions.
 - The kind of computer or manufacturing equipment the company uses.
 - Plans for growth or downsizing.
 - Challenges the organization faces.
 - The corporate culture (◀◀ p. 28).

The directories listed in Figure 26.1 provide information including net worth, market share, principal products, and the names of officers and directors. Ask your librarian to identify additional directories. To get specific financial data (and to see how the organization presents itself to the public), get the company's annual report on the web. (Note: Only companies whose stock is publicly traded are required to issue annual reports. In this day of mergers and buyouts, many companies are owned by other companies. The parent company may be the only one to issue an annual report.) Many company websites provide information about training programs and career paths for new hires. To learn about new products, plans for growth, or solutions to industry challenges, read business newspapers such as *The Wall Street Journal* or *The Financial Post*; business magazines such as *Fortune*, *Bloomberg Businessweek*, and *Forbes*; and trade journals. Each of these has indexes listing which companies are discussed in a specific issue. A few of the trade journals available are listed in Figure 26.2.

The Internet has much of this information, including information about corporate culture and even anonymous statements from employees. Figure 26.3 lists some of the best sites. Check professional listservs and electronic bulletin boards. Employers sometimes post specialized jobs on them: They're always a good way to get information about the industry you hope to enter.

Should I do information interviews? LO 26-4

- *They'll help any job hunter. They're crucial if you're not sure what you want to do.*

In an **information interview** you talk to someone who works in the area you hope to enter to find out what the day-to-day work involves and how you can best prepare to enter that field. You do not ask for a job. However, an information interview can

In 2011, 1.5 million bachelor's degree holders under the age of 25 were jobless or underemployed—that's 53.6% compared to 41% in 2000. The job market showed little change in the prospects for graduates in 2012, though demand for workers continued to be strong in science, education, and health fields. Among the college majors most likely to find jobs appropriate to their education level were nursing, education, and accounting. In 2012, however, employers in other fields were scrambling to find applicants. Jeff Silver, CEO of Coyote Logistics, cited 300,000 open trucker jobs in the U.S., and a recent survey by ManpowerGroup ranked the toughest positions to fill, with skilled trades like plumber and electrician at the top. Also on the list were IT, mechanic, and engineering jobs. The biggest problem? Too few applicants with the necessary skills.

Dick Bolles' useful site identifies five ways to use the Internet, explains how to make contacts (whether you already have the name of a person or not), and offers advice about career and personality tests.

Experts say even as the economy improves, prospects in some job fields will not. These include manufacturing and construction, the latter of which accounted for more than 1.6 million jobs lost since 2008. Secretaries, mail clerks, and other white-collar support staff may see their ranks thinned by technology in the workplace.

- Let you know whether or not you'd like the job.
- Give you specific information that you can use to present yourself effectively in your résumé and application letter.
- Create a good image of you in the mind of the interviewer so he or she thinks well of you when openings arise.

In an information interview, you might ask the following questions:

- Tell me about the papers on your desk. What are you working on right now?
- How do you spend your typical day?
- Have your duties changed a lot since you first started working here?
- What do you like best about your job? What do you like least?
- What do you think the future holds for this kind of work?

- How did you get this job?
- What courses, activities, or jobs would you recommend to someone who wanted to do this kind of work?

To set up an information interview, phone or write a letter. If you do write, phone the following week to set up a specific time.

Getting more education is a good idea for future opportunities, but some degrees pay off better than others. According to *Forbes*, Physician's Assistant is the best master's degree to earn, with a mid-career median pay of \$97,000 and projected growth of 30% by 2020. Other degrees on the list include Economics, Computer Science, and Occupational Therapist. The worst master's degree? Library and Information Science. The list was based on salary and employment outlook. However, the job that women find the most satisfying is college professor, which typically requires a master's degree or higher, and median salaries can range from \$59,000 to \$94,000 depending on the field.

What is the “hidden job market”? How do I tap into it? **LO 26-5**

- *The “hidden market” is composed of jobs that are never advertised.*
- *Referral interviews and prospecting letters can help you find it.*

A great many jobs are never advertised—and the number rises the higher up the job ladder you go. Over 60% of all new jobs come not from responding to an ad but from networking with personal contacts.² Some of these jobs are created especially for a specific person. These unadvertised jobs are called **the hidden job market**. Referral interviews, an organized method of networking, offer the most systematic way to tap into these jobs. Schedule **referral** interviews to learn about current job opportunities in your field. Sometimes an interview that starts out as an information interview turns into a referral interview.

A referral interview should give you information about the opportunities currently available in your town in the area you’re interested in, refer you to other people who can tell you about job opportunities, and enable the interviewer to see that you could make a contribution to his or her organization. Therefore, the goal of a referral interview is to put you face-to-face with someone who has the power to hire you: the president of a small company, the division vice president or branch manager of a big company, the director of the local office of a state or federal agency.

Start by scheduling interviews with people you know who may know something about that field—professors, co-workers, neighbors, friends. Call your alumni office to get the names and phone numbers of alumni who now work where you would like to work. Your purpose in talking to them is (ostensibly) to get advice about improving your résumé and about general job-hunting strategy and (really) to get **referrals** to other people. In fact, go into the interview with the names of people you’d like to talk to. If the interviewee doesn’t suggest anyone, say, “Do you think it would be a good idea for me to talk to _____?”

Then, armed with a referral from someone you know, you call Mr. or Ms. “Big” and say, “So-and-so suggested I talk with you about job-hunting strategy.” If the person says, “We aren’t hiring,” you say, “Oh, I’m not asking *you* for a job. I’d just like some advice from a knowledgeable person about the opportunities in banking [or desktop publishing, or whatever] in this city.” If this person does not have the power to create a position, you seek more referrals at the end of *this* interview. (You can also polish your résumé, if you get good suggestions.)

Even when you talk to the person who could create a job for you, you *do not ask for a job*. But to give you advice about your résumé, the person has to look at it. When a powerful person focuses on your skills, he or she will naturally think about the problems and needs in that organization. When there’s a match between what you can do and what the organization needs, that person has the power to create a position for you.

Some business people are cynical about information and referral interviewing. Prepare as carefully for these interviews as you would for an interview when you know the organization is hiring. Think in advance of good questions; know something about the general field or industry; try to learn at least a little bit about the specific company.

Always follow up information and referral interviews with personal thank-you letters. Use specifics to show that you paid attention during the interview, and enclose a copy of your revised résumé.

According to Elance, a website for freelancers, 40% of young professionals use social media to get jobs, and according to LinkUp, a job search engine, 20% use smartphones for job searches. Free apps include BusyBee, CareerBliss, and Real-Time Jobs.

Source: Dan Schawbel, “5 Clever Ways to Get a Job Using Social Media,” June 19, 2011, <http://mashable.com/2011/06/19/get-job-using-social-media/>.

New Jersey is the first U.S. state to make it illegal to post job ads that prevent unemployed workers from applying. Because unemployment is not a protected status, legal experts say, the practice is not universally banned. Michigan and New York are considering similar laws, as is Congress.

Source: Catherine Rampell, "Don't Apply Unless You Have a Job, Ads Say," *The Columbus Dispatch*, July 26, 2011, http://www.dispatch.com/live/content/national_world/stories/2011/07/26/dont-apply-unless-you-have-a-job-ads-say.html?sid=101.

Workers making \$40,000 to \$80,000 annually represent the majority of labor costs for many companies. In difficult economic times, they may be most vulnerable to downsizing as companies look to cut costs. Upgrading skills and education can help insulate against the threat, but some jobs in this income range are already in high demand: biomedical engineers, financial examiners, and network systems and data communication analysts. Among jobs in declining demand are fabric menders, semiconductor processors, and postal mail sorters and processing machine operators.

Source: Ruth Mantell, "Your Well-Paid, Middle-Class Job Is in Danger," June 16, 2011, <http://finance.yahoo.com/career-work/article/112950/middle-class-jobs-danger-marketwatch>.

What do I do if I've got a major weakness? LO 26-6

- *Address the employer's fears, calmly and positively.*

Some job hunters face special problems. This section gives advice for six common problems.

"All My Experience Is in My Family's Business"

In your résumé, simply list the company you worked for. For a reference, instead of a family member, list a supervisor, client, or vendor who can talk about your work. Because the reader may wonder whether "Jim Clarke" is any relation to "Clarke Construction Company," be ready to answer interview questions about why you're looking at other companies. Prepare an answer that stresses the broader opportunities you seek but doesn't criticize your family or the family business.

"I've Been Out of the Job Market for a While"

You need to prove to a potential employer that you're up-to-date and motivated. To do that,

- **Understand how work in your field may have changed.** For example, hospital workers now have many more acutely ill patients than they did 10 years ago.
- **Be active in professional organizations.** Attend meetings; read trade journals.
- **Learn the computer programs that professionals in your field use.**
- **Find out your prospective employer's immediate priorities.** If you can show you'll contribute from day one, you'll have a much easier sell. But to do that, you need to know what skills the employer is looking for, what needs the employer has.
- **Show how your at-home experience relates to the workplace.** Dealing with unpredictable situations, building consensus, listening, raising money, and making presentations are transferrable skills.
- **Create a portfolio of your work**—even if it's for imaginary clients—to demonstrate your expertise.³

"I Want to Change Fields"

Have a good reason for choosing the field in which you're looking for work. "I want a change" or "I need to get out of a bad situation" does not convince an employer that you know what you're doing.

Think about how your experience relates to the job you want. Jack is an older-than-average student who wants to be a pharmaceutical sales representative. He has sold woodstoves, served subpoenas, and worked on an oil rig. A chronological résumé makes his work history look directionless. But a skills résumé (► p. 452) could focus on persuasive ability (selling stoves), initiative and persistence (serving subpoenas), and technical knowledge (courses in biology and chemistry).⁴

Learn about the skills needed in the job you want. Learn the buzzwords of the industry.

"I Was Fired"

First, deal with the emotional baggage. You need to reduce negative feelings to a manageable level before you're ready to job hunt.

Second, try to learn from the experience. You'll be a much more attractive job candidate if you can show that you've learned from the experience—whether your lesson is improved work habits or that you need to choose a job where you can do work you can point to with pride.

Third, suggests Phil Elder, an interviewer for an insurance company, call the person who fired you and say something like this: "Look, I know you weren't pleased with the job I did at _____. I'm applying for a job at _____ now and the personnel director may call you to ask about me. Would you be willing to give me the chance to get this job so that I can try to do things right this time?" All but the hardest of heart, says Elder, will give you one more chance. You won't get a glowing reference, but neither will the statement be so damning that no one is willing to hire you.⁵

"I Don't Have Any Experience"

If you have six months or a year before you start to job hunt, you can get experience in several ways:

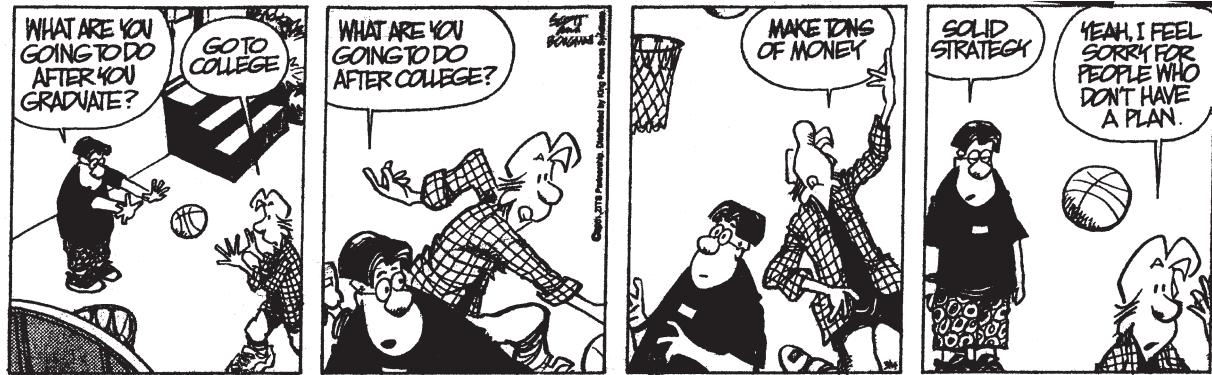

- **Take a fast-food job—and keep it.** If you do well, you'll probably be promoted to a supervisor within a year. Use every opportunity to learn about the management and financial aspects of the business.
- **Join a volunteer organization that interests you.** If you work hard, you'll quickly get an opportunity to do more: manage a budget, write fund-raising materials, and supervise other volunteers.
- **Freelance.** Design brochures, create web pages, do tax returns for small businesses. Use your skills—for free, if you have to at first.
- **Write.** Create a portfolio of ads, instructions, or whatever documents are relevant for the field you want to enter. Ask a professional—an instructor, a local business person, someone from a professional organization—to critique them. Volunteer your services to local fundraising organizations and small businesses.

Getting experience is particularly important for students with good grades. Pick something where you interact with other people so you can show you can work well in an organization.

If you're in the job market now, think carefully about what you've really done. Write sentences using the action verbs in Figure 27.6. Think about what you've done in courses, in volunteer work, in unpaid activities. Especially focus on skills in problem solving, critical thinking, teamwork, and communication. Solving a problem for a hypothetical firm in an accounting class, thinking critically about a report problem in business communication, working with a group in a marketing class, and communicating with people at the senior center where you volunteer are experience, even if no one paid you.

If you're not actually looking for a job but just need to create a résumé for this course, ask your instructor whether you may assume that you're graduating and add the things you hope to do between now and that time.

To reach your career goals, define them clearly, understand your strengths, and find information about employers.

ZITS © ZITS Partnership King Features Syndicate.

The 36.9 million Americans ages 55 to 64 have an unemployment rate of 6.6% and a net worth of \$162,000. By comparison, the 42.5 million people ages 20 to 29 have a 12.3% unemployment rate and \$294 billion in combined student loan debt. Experts disagree on which group needs help most in a bad economy. While older Americans may have a lower unemployment rate and higher net worth, younger workers may have fewer financial commitments and more time to recoup. In either case, workers are more likely to be competing against someone in their age bracket for jobs.

Source: Matthew Phillips, "Boomers and Millennials: Who's Got It Worse in the Workplace?" *Bloomberg Businessweek*, May 22, 2012, <http://www.businessweek.com/articles/2012-05-22/boomers-and-millennials-whos-got-it-worse-in-the-workplace>.

Instant Replay

The Hidden Job Market and Referral Interviews

Unadvertised jobs are called the **hidden job market**. Referral interviews, an organized method of networking, offer the most systematic way to tap into these jobs. Schedule **referral interviews** to learn about current job opportunities in your field.

“I’m a Lot Older than They Want”

A survey of 2,500 college students and new graduates found that 78% plan to work for their first employers for three years or fewer.⁶ You’re going to be working at least that long. The employer’s real fear is not that you’ll retire in just a year but that you won’t be flexible, up-to-date, or willing to be supervised by someone younger. To counter these fears,

- **Keep up-to-date.** Read trade journals; attend professional meetings.
- **Learn the computer programs your field uses.** Refer to technology in the résumé, job letter, and interview: “Yes, I saw the specifications for your new product on your website.”
- **Work with younger people,** in classroom teams, in volunteer work, or on the job. Be able to point to specific cases where you’ve learned from young people and worked well with them.
- **Use positive emphasis** (◀◀ p. 102). Talk about your ability to relate to older customers (who have so much disposable income), the valuable perspective you bring. Focus on fairly recent events, not ones from 20 years ago.
- **Show energy and enthusiasm** to counter the stereotype that older people are tired and ill.

Summary of Learning Objectives

- Know yourself before you job hunt. (**LO 26-1**)
 - What achievements have given you the most satisfaction?
 - Would you prefer deadlines or a flexible schedule?
 - Are you willing to “pay your dues” before being promoted?
 - Are you willing to take work home?
 - How important is money to you?
- Also know (**LO 26-2**)
 - What the job itself involves.
 - The name and address of the person who will receive your application letter.
 - What the organization does and at least four or five facts about it.
- Use directories, annual reports, recruiting literature, business periodicals, trade journals, and web pages to get information about employers and jobs to use in your letter. (**LO 26-2**)
- When choosing whether to stay at a job or leave, consider these sorts of questions: (**LO 26-3**)
 - Does your boss like you and advocate for you?
 - Is your boss doing well?
 - Have you been promoted in the last two years?
 - Are your pension plan and other benefits vested and growing?
 - Is the company doing well?
- Are you getting better-than-average raises?
- Has your boss within the past year mentioned that you are valued?
- In an **information interview**, you talk to someone who works in the area you hope to enter to find out about the job and the best way to prepare to enter the field. You do not ask for the job. (**LO 26-4**)
- In an information interview, you can ask these sorts of questions: (**LO 26-4**)
 - What are you working on right now?
 - How do you spend your typical day?
 - What do you like best about your job?
 - How did you get this job?
 - What courses, activities, or jobs would you recommend to someone who wants to do this kind of work?
- Information and referral interviews can help you tap into the **hidden job market**—jobs that are not advertised. In an **information interview** you find out what the day-to-day work involves and how you can best prepare to enter that field. **Referral interviews** are interviews you schedule to learn about current job opportunities in your field. (**LO 26-5**)
- If you have a major weakness, brainstorm a way to address the employer’s fears, calmly and positively. (**LO 26-6**)

Assignments for Module 26

Questions for Comprehension

- 26.1** What should you know about yourself before you apply for jobs? (**LO 26-1**)
- 26.2** What information should you try to learn about a company? (**LO 26-2**)

Questions for Critical Thinking

- 26.5** Why is it desirable to start thinking about jobs months—even years—before you’ll actually be on the market? (**LO 26-1**)
- 26.6** Why is it important to research the companies you want to apply to? (**LO 26-2**)

Exercises and Problems

26.8 Evaluating Career Websites* (**LO 26-2**)

Evaluate three or more websites for job hunters, considering the following questions:

- Is the site easy to navigate?
- Is it visually attractive?
- Are any ads unobtrusive?
- Is its advice good?

26.9 Networking (LO 26-2**)**

Write to a friend who is already in the workforce, asking about one or more of the following topics:

- Are any jobs in your field available in your friend’s organization? If so, what?
- If a job is available, can your friend provide information beyond the job listing that will help you write a more

26.10 Gathering Information about an Industry (LO 26-2** to **LO 26-4**)**

Use six recent issues of a trade journal to report on three to five trends, developments, or issues that are important in an industry.

As Your Instructor Directs,

- a. Share your findings with a small group of other students.
- b. Summarize your findings in a memo to your instructor.

26.11 Gathering Information about a Specific Organization (LO 26-2** to **LO 26-4**)**

Gather printed information about a specific organization, using several of the following methods:

- Check the company’s website.
- Read the company’s annual report.
- Pick up relevant information at the Chamber of Commerce.
- Read articles in trade publications and *The Wall Street Journal* or *The Financial Post* that mention the organization (check the indexes).
- Get the names and addresses of its officers (from a directory or from the web).
- Read recruiting literature provided by the company.

26.12 Conducting an Information Interview (LO 26-4**)**

Interview someone working in a field you’re interested in. Use the questions listed in the module or the shorter list here:

- 26.3** What is an information interview? (**LO 26-4**)
- 26.4** What is the hidden job market? (**LO 26-5**)

- 26.7** What is your biggest weakness as you prepare to job hunt? How could you minimize it? (**LO 26-6**)

- Does it let job hunters specify who may *not* see their posted résumés (e.g., the current employer)?
- Does it have any features that you don’t find in other career websites?

*Inspired by a problem written by Gary Kohut, University of North Carolina at Charlotte.

detailed, persuasive letter? (Specify the kind of information you’d like to have.)

- Can your friend suggest people in other organizations who might be useful to you in your job search? (Specify any organizations in which you’re especially interested.)

- c. Present your findings to the class.

- d. E-mail your findings to the other members of the class.
- e. Join with a small group of other students to write a report summarizing the results of this research.

As Your Instructor Directs,

- a. Share your findings with a small group of other students.
- b. Summarize your findings in a memo to your instructor.
- c. Present your findings orally to the class.
- d. E-mail your findings to the other members of the class.
- e. Join with a small group of other students to write a report summarizing the results of this research.

- How did you get started in this field?
- What do you like about your job?

- What do you dislike about your job?
- Can you give me names of three other people who could also give me information about this job?

As Your Instructor Directs,

- a. Share the results of your interview with a small group of other students.

- b. Write up your interview in a memo to your instructor.
- c. Present the results of your interview orally to the class.
- d. E-mail a summary of your interview to other members of your class.
- e. Write to the interviewee thanking him or her for taking the time to talk to you.

Polishing Your Prose

Using Details

Details are especially important in reader benefits (◀◀ Module 8), reports, résumés, and job application and sales letters. Customers or potential employers look for specific details to help them make

decisions, such as what makes your product better than the competition's or how your experience would help the reader. Here's an example:

I can bring more than ten years of advertising experience to Duncan, Fitzgerald, and Locke, the Midwest leader in print and broadcast advertising. My experience includes five years of broadcast sales in Chicago, where I generated more than \$19 million in revenue, as well as three years with Alvion and Daye, the leading outdoor advertising company in Indianapolis. For the first four years of my career, I also wrote advertising copy, including hundreds of local and regional radio spots for such diverse products as cookies, cat food, fishing tackle, and children's toys. I also wrote print pieces, including the entire 15-month campaign for Indiana-based "Uncle Bill's Electronics Bazaar," which increased sales by nearly 37% during that period.

Reader Benefits

What features or experiences make your product or service unique? Useful? Cost-effective?

Weak: *With the Stereobooster, your car will sound great.*

Better: *The Stereobooster safely gives your car audio system a full 30 watts per channel of sheer sound excitement, double that of other systems on the market—all for under \$50.*

The Five Senses

Describe sight, sound, taste, touch, and smell. Some sensations are so powerful that they immediately conjure up thoughts or emotions—the smell of fresh coffee, the sound of ocean waves, the feeling of sunlight against the skin.

Concrete Nouns and Verbs

Concrete nouns and verbs are better than more general nouns and verbs combined with adjectives and adverbs. For instance, *manager* and *15 months* are more concrete than *the person in charge* or *a while*. Concrete words make meaning clear and vivid:

Weak: *At my last job, I typed stuff.*

Better: *As a clerk typist II until July for Hughes and Associates, I typed hundreds of memos, letters, and reports.*

Increase your vocabulary by reading a variety of materials. Keep a dictionary and thesaurus handy. Do crossword puzzles or computer word games to practice what you know.

Adjectives and Adverbs that Count

Omit or replace vague or overused adjectives and adverbs: *some*, *very*, *many*, *a lot*, *kind/ sort of*, *partly*, *eventually*. Increasingly, novice writers are using *so* as an adjective, as in “He was so happy about the promotion.” Exactly how happy is this?

Conversational English, Not Jargon or Obscure Words

In general, choose the more conversational option over jargon or obscure words: *exit*, *typical*, or *second to last* rather than *egress*, *quintessential*, or *penultimate*.

Exercises

Add details to the following sentences.

1. We like Ann.
2. Ravi speaks several languages.
3. You should hire me for the job.
4. The customer service is really great.
5. Our Electricity Miser is a very good product.
6. I recommend Esteban for the job because he is so talented.
7. Bailey said she kind of expects us to be at the egress eventually.
8. The penultimate candidate for the position is the very highly qualified Charlotte Lewis.
9. Munahil told us she is so excited about the many job opportunities with the Oliver Kane Company.
10. By the time a person gets enough experience to be the quintessential employee, it is very likely that he or she will eventually realize that a lot of success depends on attitude.

Check your answers to the odd-numbered exercises at the back of the book.

Résumés

27

LEARNING OBJECTIVES

Module 27 details how to craft attractive, appropriate, and successful résumés. After completing the module, you should be able to

- | | | | |
|----------------|---|----------------|--|
| LO 27-1 | Demonstrate reasons for employers to read your résumé. | LO 27-5 | Compare similarities among résumé features. |
| LO 27-2 | Apply principles for résumé design with computers. | LO 27-6 | Apply principles for appropriate résumé length. |
| LO 27-3 | Select résumés for different situations. | LO 27-7 | Apply principles for electronic résumé design. |
| LO 27-4 | Contrast differences among résumé features. | LO 27-8 | Apply principles for video résumé design. |

A résumé is a persuasive summary of your qualifications for employment. If you're in the job market, having a résumé makes you look well organized and prepared. When you're employed, having an up-to-date résumé makes it easier to take advantage of opportunities that may come up for an even better job. If you're several years away from job hunting, preparing a résumé now will make you more conscious of what to do in the next two or three years to make yourself an attractive candidate. Writing a résumé is also an ego-building experience: the person who looks so good on paper is **you!**

Writing a résumé is not an exact science. If your skills are in great demand, you can violate every guideline here and still get a good job. But when you must compete against many applicants, these guidelines will help you look as good on paper as you are in person.

Know, too, that technology is changing how résumés look and are to be submitted. The traditional paper résumé remains the standard, but many companies now want résumés submitted electronically as an e-mail attachment. Some may want a paper résumé but in scannable form. This module provides advice on all three and more. Do your research and review job postings carefully to see what format is to be used. When in doubt, stick to traditional methods.

Figure 27.1 Allocating Time in Writing Résumé (Your time may vary.)

Chronological résumé with summary of qualifications. Total time: 12 hours

Planning

4 hours

Examine sample résumés to get a sense of options.

Collect details of job titles and duties, employment dates.

Brainstorm accomplishments using the action verbs in Figure 27.6
and the prompts in Figure 29.4.

Answer the PAIBOC questions (◀◀ Module 1).

Think about document design (◀◀ Module 5).

Organize the résumé.

Writing

4 hours

Draft the résumé.

Revising

4 hours

Reread draft.

Measure draft against PAIBOC questions and checklist for
résumés (Figure 27.10).

Revise draft.

Ask for feedback.

Revise draft based on feedback.

Edit to catch grammatical errors.

Run spell-check.

Proof by eye.

Duplicate.

College student Vanessa Hojda became an Internet sensation when she revealed she accidentally sent in place of her résumé a terrified photo of actor Nicolas Cage. While it's possible to recover from such errors, always check to make sure messages and their attachments are correct.

Source: Leslie Kwoh, "Nic Cage Photo: No Substitute for Résumé," *The Wall Street Journal*, July 11, 2012, [http://blogs.wsj.com/atwork/2012/07/11/terrifying-photo-of-nicolas-cage-is-no-substitute-for-a-resume/?](http://blogs.wsj.com/atwork/2012/07/11/terrifying-photo-of-nicolas-cage-is-no-substitute-for-a-resume/)
KEYWORDS=job+application.

Figure 27.1 lists the activities required to create a good résumé.

All job communications must be tailored to your unique qualifications. Adopt the wording or layout of an example if it's relevant to your own situation, but don't be locked into the forms in this book. You've got different strengths; your résumé will be different, too.

How can I encourage the employer to pay attention to my résumé? **LO 27-1**

► Show how your qualifications fit the job and the company.

Your résumé can be screened in two ways. If people do the reading, the employer will skim the résumés quickly, dividing the documents into two piles: "reject" and "maybe." In the first round, each résumé may get as little as 2.9 seconds of the reader's attention. Then the reader goes through the "maybe" pile again, weeding out more documents. If there are a lot of résumés (and some companies get 2,000 résumés a week), résumés may get only 10 to 30 seconds in this stage. After the initial pile has been culled to one-half or one-hundredth of the initial pile, the remaining documents will be read more carefully to choose the people who are invited for interviews.

Alternatively, your résumé may be electronically scanned into a job-applicant tracking system. Then the first set of cuts will be done by computer. The employer specifies the keywords from the job description, listing the knowledge, skills, and abilities that the ideal applicant would have. Sometimes personal characteristics (e.g., *hard worker, good writer, willing to travel*) may also be included. The employer receives the résumés that match the keywords, arranged with the most "hits" first. Then the employer decides who will be invited for interviews.

Using a Computer to Create Résumés LO 27-2

Even if you pay someone else to produce your résumé, *you must specify the exact layout.*

Print your résumé on a laser printer on high-quality 8½-by-11-inch paper (never legal size). White paper is standard; a very pale color is also acceptable.

Play with Layout and Design

Experiment with layout, fonts, and spacing to get an attractive résumé. Consider creating a letterhead that you use for both your résumé and your application letter. (See Figures 27.7 and 28.5.)

Use enough white space to make your résumé easy to read but not so much that you look as if you're padding. Center your name as the title of the document in 14-point (or bigger) type. Use 12-point for headings. To get more on a page, use 11-point type for the text. The default margins and tab settings probably are too big. Especially if you use the indented format, try a 0.8-inch left margin. Set tab settings at 0.3 inch rather than the standard 0.5 inch. Try rules (thin lines) or borders to see if you like their look.

Avoid Templates

Some services fit every résumé into a single template. Even if you have lots of volunteer work, you have to fit it all into an

inch-high space. But if you have no volunteer work, you still have that inch—glaringly empty. Using a standard template defeats the purpose of a good résumé: to make you look as good as possible.

Readers also may have seen the template many times before, making your résumé seem generic. Templates that come with word processors are especially familiar to readers.

If a placement service requires you to use a template, do so, but also create another résumé that looks good. Take a copy to each interview. Tell the interviewer, "I thought you might like to know a little more about me."

Proofread

Employers assume that the résumé represents your best work. Proofread carefully to be sure the document is perfect. Especially check

- Spelling of your college, your employers, and your references.
- Parallelism (◀◀ p. 74).
- Consistency (spell out all state names or use Postal Service abbreviations for all).
- Dates.
- Phone numbers, e-mail addresses, and URLs.

You need to have both a paper résumé that will look good to the human eye and a scanable résumé that will serve you well in a job-applicant tracking system. To increase the chances that a human being will pay attention to your résumé,

- Do more than just list what you've done. Show how it helped the organization. If possible, quantify: *increased sales 10%, saved the company \$13,000, supervised five people.*
- Emphasize achievements that
 - Are most relevant to the position for which you're applying.
 - Show your superiority to other applicants.
 - Are recent.
- Use the jargon and buzzwords of the industry and the organization.
- Include skills that are helpful in almost every job: ability to use computer programs, to write and speak well, to identify and solve problems, to work with others, to speak a second language.
- Design one résumé to appeal to the human eye and the second to be easily processed by an electronic scanner.
- Consider using a career objective with the employer's name.

These guidelines mean that you may need to produce several different résumés. But the more you adapt your résumé to a specific employer, the more likely it is that you will get a job with that employer.

According to a survey of 2,298 hiring managers, recent résumé gaffes included listing "phishing" as a hobby, specifying that the résumé could be sung to the tune of TV's "The Brady Bunch," and stating the candidate was "detail-oriented," an error in addition to spelling the company's name incorrectly. "To make dough" was one résumé's Career Objective statement.

Source: "CareerBuilder Releases Study of Most Outrageous Résumé Mistakes and Creative Techniques that Worked," July 11, 2012, <http://www.careerbuilder.com/share/aboutus/pressreleasesdetail.aspx?id=pr707&sd=7/11/2012&ed=07/11/2012>.

What kind of résumé should I use? LO 27-3

► Choose the kind that makes you look best.

Two basic kinds of résumés exist: chronological and skills. Figures 27.2 and 27.3 show chronological and skills résumés for the same candidate. A **chronological résumé** summarizes what you did in a timeline (starting with the most recent events and going backward in **reverse chronology**). It emphasizes degrees, job titles, and dates. It is the traditional résumé format. Figure 27.4 shows another chronological résumé. Use a chronological résumé when your education and experience show

- A logical preparation for the position for which you're applying.
- A steady progression leading to the present.

A **skills résumé** emphasizes the skills you've used, rather than the job in which or the date when you used them. Figures 27.3, 27.5, and 27.7 show skills résumés. Use a skills résumé when

- Your education and experience are not the usual route to the position for which you're applying.
- You're changing fields.
- You want to combine experience from paid jobs, activities or volunteer work, and courses to show the extent of your experience in administration, finance, speaking, and so forth.
- Your recent work history may create the wrong impression (e.g., it has gaps, shows a demotion, shows job-hopping, etc.).

Résumé is a French word meaning *summary*. To create the é (e with an acute accent), pull down the “Insert” menu to “Symbol.” Never use an apostrophe to replace the accent. However, it is acceptable to type *resume* without the accent marks.

Both kinds of résumés omit *I* and use sentence fragments punctuated as complete sentences. Complete sentences are acceptable if they are the briefest way to present information. *Me* and *my* are acceptable if they are unavoidable or if using them reduces wordiness. Both kinds of résumés can use bullet points. Both use details.

How do the two résumés differ? LO 27-4

► They handle Experience, Activities, and Volunteer Work differently.

A chronological résumé, like the one in Figure 27.4, uses separate categories for Experience, Activities, and Volunteer Work. Experience is organized by jobs, with the most recent job first. A skills résumé, like the ones in Figures 27.3, 27.5, and 27.7, replaces these three categories with headings of the skills needed for the job for which the job hunter is applying. Within each skill, items are listed in order of importance, combining paid and unpaid work (in classes, activities, and community groups). An Employment History section lists job titles, employers, city, state (no zip code), and dates.

Chronological Résumés

In a chronological résumé, include the following information for each job: position or job title, organization, city and state (no zip code), dates of employment, and other details, such as full- or part-time status, job duties, special responsibilities or the fact that you started at an entry-level position and were promoted. Include unpaid jobs and self-employment if they provided relevant skills (e.g., supervising people, budgeting, planning, persuading).

Normally, go back as far as the summer after high school. Include earlier jobs if you started working someplace before graduating from high school but continued working there after graduation. However, give minimal detail about high school jobs. If you worked full-time after high school, make that clear.

Figure 27.2 A Community College Student's Chronological Résumé

Chronological résumés emphasize degrees, dates, and job titles.

Richard A. Douglass 14-point type

Columbus, OH 43214
614-555-6437

Rick listed his cell phone number because that number was the best way to reach him.

Skills in Construction Management

Omit "I."

Make items in list parallel.

- Analyze and interpret all types of construction drawings and documents.
- Calculate material, labor, and equipment needed for a project.
- Use Gantt bar charts to organize complex construction projects.
- Analyze costs and productivity.
- Monitor safety and quality assurance.

Here, he combines skills he's learned in class projects and on the job.

Details and numbers would make this section stronger.

Experience with Construction Supplies and Equipment

Use bold and white space to emphasize points.

- **Sheet Goods.** Well-versed in materials for walls and siding, tile backing, and flooring—ceramic, vinyl, linoleum, hardwood floors.
- **Paint.** Extensive experience with paints, stains, varnishes, lacquers for interior and exterior surfaces, residential and commercial building. Experience with wallpaper and textures; limited experience with faux finishes.
- **Interior Trim.** Experience with all kinds of interior trim, specializing in window design, crown moldings, and fine interior trim.
- **Concrete.** Trouble-shooting residential and commercial problems; improving drainage.
- **Plumbing Supplies.** Thorough experience with backflow valves, pressure relief valves, and fire sprinkler systems.
- **Excavation.** Extensive experience in precision excavating using backhoe and tractors for residential and industrial remodeling and construction.

Construction Work Experience

Nine years of experience as a lead carpenter, crew foreman, and subcontractor.
Notable projects include

Good details

- Remodeling projects from 300 to 6,000 sq. ft.
- Building Friendly Ice Cream stores in Ohio, Indiana, New York, and Pennsylvania.
- Testing water systems and installing backflow valves, relief pressure valves, and fire sprinkler systems for industrial clients including Lockheed, Apple Computer, and San Jose State University.
- Building the first geothermal house in the Columbus area.

Skills résumés are often longer than chronological résumés. To keep the résumé to one page, Rick omits Work History and References.

Qualifications for Writing Creative Ads that Make People Remember the Product

- Created headlines and print ads for a variety of audiences.
- Persuaded team members, business owners, and lawyers to accept my ideas.
- Self-starter who sees a project through from start to finish.

Education

B.A. in Advertising, June 2012, The Ohio State University, Columbus, OH
Core courses: Copywriting, promotional strategies, magazine writing, graphics, media planning
Harvard University Writing Program, Summer 2008, Boston, MA

Experience Creating Ads

Led the team that developed the winning promotional strategy for Max & Erma's Restaurants.

- Developed idea for theme for a year's campaign of ads including Facebook and Twitter promotions.
- Wrote copy for radio spots, magazine ads, and billboards. One billboard ad had the headline "Multiple Choice" and boxes for burgers, chicken, and salads—with all the boxes checked.
- Presented creative strategy to Max & Erma's CEO and the Head of Advertising.
- Strategy won first place from among 17 proposals.

Wrote more than 15 ads for Copywriting class, including

- Ad for cordless phone: "Isn't It Time to Cut the Cord?"
- Slogan for Ohio University's Springfest Jamboree: "In Short, It Jams"
- Billboard for Columbus Boys' School: "Who Said It's Lonely at the Top?"

Created ads and revised menu for The Locker Room (restaurant).

Other Writing Experience

Wrote "Commuter Flights" (humor).
Tweeted dozens of promotions for North Market and Worthington Farmers Market.
Created more than 30 magazine articles as part of courses at Harvard University and Ohio State.
Researched and wrote legal briefs as part of course at Harvard.
Summarized research on \$7 million medical malpractice case for Garson and Associates.

Employment History

2008–12 Child care and house management, Worthington, OH. Part-time daily during school year.

Summer 2008 Maid, Harvard Student Agency, Boston, MA. Part-time while attending Harvard University Writing Program.

Summers 2005–07 Law Clerk, Garson and Associates, Cleveland, OH. Did independent case research used by the firm to win \$7 million malpractice out-of-court settlement for the client.

Reverse chronology

She varies the usual "Summary of Qualifications" to make it specific to the job. This really is Allyson's philosophy—and it's one an agency will appreciate.

Skills résumé allows her to combine experience from classes and life.

Details, wording demonstrate her ability.

Allyson chooses unusual bullets rather than the standard dots or squares. In a résumé for an ad agency, the bullets work.

A position of emphasis

Emphasizing a portfolio at LinkedIn encourages employers to visit her page.

Portfolio available at www.linkedin.com/in/allysonkarnes

Some employment experts suggest omitting jobs as an adult from more than 10 years ago, but unless you *know* that's what employers want, keep them. Many employers want to see continuity in your experiences, especially for upper-level jobs.

If as an undergraduate you've earned a substantial portion of your college expenses, say so in a separate sentence either under Experience or in the section on personal data. (Graduate students are expected to support themselves.)

These jobs paid 40% of my college expenses.

Paid for 65% of expenses with jobs, scholarships, and loans.

Use minimal detail about low-level jobs, perhaps not even listing each job separately.

1999–2005 Full-time homemaker.

2007–13 Various construction jobs to support family.

Use details when they help you. Tell how many people you trained or supervised, how much money you budgeted or raised. Describe the aspects of the job you did.

Too vague: Sales Manager, *The Daily Collegian*, University Park, PA, 2008–10. **Supervised staff; promoted ad sales.**

Good details: Sales Manager, *The Daily Collegian*, University Park, PA, 2008–10. **Supervised 22-member sales staff; helped recruit, interview, and select staff; assigned duties and scheduled work; recommended best performer for promotion. Motivated staff to increase paid ad inches 10% over previous year's sales.**

Verbs or gerunds (the *-ing* form of verbs) create a more dynamic image of you than do nouns, so use them on résumés that will be read by people. (Rules for scannable résumés to be read by computers come later in this module.) In the following revisions, nouns, verbs, and gerunds are in bold type.

Nouns: Chair, Income Tax Assistance Committee, Winnipeg, MB, 2007–08. Responsibilities: **recruitment** of volunteers; flyer **design, writing, and distribution** for **promotion** of program; **speeches** to various community groups and nursing homes to advertise the service.

Verbs: Chair, Income Tax Assistance Committee, Winnipeg, MB, 2007–08. **Recruited** volunteers for the program. **Designed, wrote, and distributed** a flyer to promote the program; **spoke** to various community groups and nursing homes to advertise the service.

Gerunds: Chair, Income Tax Assistance Committee, Winnipeg, MB, 2007–08. Responsibilities included **recruiting** volunteers for the program; **designing, writing, and distributing** a flyer to promote the program; and **speaking** to various community groups and nursing homes to advertise the service.

Note that the items in the list must be in parallel structure (◀◀ p. 74). Figure 27.6 lists action verbs that work well in résumés.

Chronological Résumés

A **chronological résumé** summarizes what you did in a timeline (starting with the most recent events, and going backward in **reverse chronology**). Use a chronological résumé when your education and experience

- Are a logical preparation for the position for which you're applying.
- Show a steady progression leading to the present.

According to IBM's Ed Struzik, as much as 90% of large companies use computerized applicant-tracking systems to weed out unwanted résumés. Starbucks, which received 7.6 million applications in 12 months, and Procter & Gamble, which got nearly a million applications for 2,000 job openings, both use such systems. To get past them, experts advise mimicking key words in job descriptions, visiting the company's website to better understand its culture, keeping the résumé format simple and streamlined, and not lying or exaggerating your claims. If you went to a college with a strong reputation—even only to take a continuing education class—be sure to include it.

Source: Lauren Weber, "Your Résumé Vs. Oblivion," *The Wall Street Journal*, January 24, 2012, <http://online.wsj.com/article/SB10001424052970204624204577178941034941330.html>.

Skills Résumés

Skills résumés use as headings the *skills* used in or the *aspects* of the job you are applying for, rather than the title or the dates of the jobs you've held (as in a chronological résumé). For entries under each skill, combine experience from paid jobs, unpaid work, classes, activities, and community service.

Use headings that reflect the jargon of the job for which you're applying: *logistics* rather than *planning* for a technical job; *procurement* rather than *purchasing* for a civilian job with the military. Figure 27.7 shows a skills résumé for someone who is changing fields. Marcella suggests that she already knows a lot about the field she hopes to enter by using its jargon for the headings.

Good résumés provide accurate details about what you've done, rather than exaggerate.

“Your accomplishments speak for themselves. Unfortunately for you I’m completely fluent in exaggeration.”

Objective *Put company's name in objective.*
To help create high-quality CD-ROM products in Metatec's New Media Solutions Division

Editing and Proofreading Experience

An extra half space creates good visual impact.

- Edited a textbook published by Simon and Schuster, revising with attention to format, consistency, coherence, document integrity, and document design.
- Proofed training and instructor's manuals, policy statements, student essays and research papers, internal documents, and promotional materials.
- Worked with authors in a variety of fields including English, communication, business, marketing, economics, education, history, sociology, biology, agriculture, computer science, law, and medicine to revise their prose and improve their writing skills by giving them oral and written feedback.

Writing Experience

Use bullets and bold type to add impact.

- Wrote training and instructor's manuals, web page copy, professional papers, and letters, memos, and reports.
- Co-authored the foreword to a forthcoming textbook (Fall 2013) from NCTE press.
- Contributed to a textbook forthcoming (Fall 2013) from Bedford Books/St. Martin's press.

Computer Experience

- Designed a web page using Dreamweaver (www.cohums.ohio-state.edu/english/People/Bracken.1/Sedgwick/)
- Learned and used a variety of programs on both Macintosh and PC platforms:

Word Processing and Spreadsheets	Dreamweaver
Microsoft Project	PageMaker
E-Mail	PowerPoint
Aspects (a form for online synchronous discussion)	<i>Computer experience is crucial for almost every job.</i>
Storyspace (a hypertext writing environment)	Specify the hardware and software you've worked with.

Other Business and Management Experience

- Developed policies, procedures, and vision statements.
- Supervised new staff members in a mentoring program.
- Coordinated program and individual schedules, planned work and estimated costs, set goals, and evaluated progress and results.
- Member of team that directed the nation's largest first-year writing program.

You need at least three headings related to the job in a skills résumé; six or seven is not uncommon. Give enough detail so the reader will know what you did. Put the most important category from the reader's point of view first.

A job description can give you ideas for headings. Possible headings and subheadings for skills résumés include

Administration	Communication
Alternates or subheadings:	Alternates or subheadings:
Coordinating	Conducting Meetings
Evaluating	Editing
Implementing	Fund-Raising
Negotiating	Interviewing
Planning	Speaking
Keeping Records	Negotiating
Scheduling	Persuading
Solving Problems	Proposal Writing
Budgeting	Report Writing
Supervising	

Many jobs require a mix of skills. Include the skills that you know will be needed in the job you want.

In a skills résumé, list your paid jobs under Employment History near the end of the résumé (see Figures 27.5 and 27.7). List only job title, employer, city, state, and dates. Omit details about what you did, since you will have already used them under Experience.

What parts of the two résumés are the same? LO 27-5

- *Career Objective, Summary of Qualifications, Education, Honors, and References.*

All résumés should have the necessary information to contact you and include an Education section. Many résumés today also include a Summary of Qualifications. Career Objective, Honors, and References are optional.

Contact Information

Provide the easiest and most relevant ways to contact you professionally. At minimum that includes a street address, phone number, and e-mail address, but many employers are also looking for LinkedIn or other social networking URLs. Use only business-friendly ones.

You may want to note a social networking URL elsewhere in the résumé if doing so is appropriate, such as discussing your Twitter page under Computer Skills or stating you have a portfolio available through LinkedIn at the end of the résumé.

Use both campus and permanent home contact information if you alternate during summers and vacations.

Summary of Qualifications

A section summarizing the candidate's qualifications seems to have first appeared in scanable résumés, where its keywords helped to increase the number of matches a résumé produced. But the section proved useful for human readers as well and now is a standard part of most résumés. The best summaries show your knowledge of the specialized terminology of your field and offer specific, quantifiable achievements.

Weak: Reliable

Better: Achieved zero sick days in four years with UPS.

Skills Résumés

Use a skills résumé when

- Your education and experience are not the usual route to the position.
- You're changing fields.
- You want to combine experience from paid jobs, activities and volunteer work, and courses.
- Your recent work history may create the wrong impression.

According to Hire Right, an employee background checker, 53% of job seekers' résumés contain inaccurate information, while 34% have outright lies. Exaggerating or putting false information on a résumé is a bad idea. Just ask Scott Thompson and Dave Edmondson, former CEOs of Yahoo! and RadioShack, respectively, who lost their jobs after lies were discovered.

Source: Cindy Krischer Goodman, "Lying on a Résumé a Really Bad Idea," *The Miami Herald*, May 15, 2012, <http://www.miamiherald.com/2012/05/15/lying-on-resume-a-really-bad-idea.html>.

Site to See

Go to

www.eresumes.com

eResumes & Resources provides extensive examples of keywords and web résumés.

Weak: Staff accountant
Better: Experience with Accounts Payable, Accounts Receivable, Audits, and Month-End Closings. Prepared monthly financial reports.

Weak: Presentation Skills
Better: Gave 20 individual and 7 team presentations to groups ranging from 5 to 100 people.

Your real accomplishments should go in the Summary section. Include as many keywords as you legitimately can. Terms suggested by Rebecca Smith appear in Figure 27.8; see her website for even more.

Education

Education can be your first major category if you've just earned (or are about to earn) a degree, if you have a degree that is essential or desirable for the position you're seeking, or if you can present the information briefly. Put Education later if you need all of page 1 for another category or if you lack a degree that other applicants may have.

Include summer school if you took courses to fit in extra electives or to graduate early but not if you were making up a course you flunked during the year. Include study abroad, even if you didn't earn college credits. If you got a certificate for international study, give the name and explain the significance of the certificate.

Highlight proficiency in foreign or computer languages by using a separate category.

Professional certifications can be listed under Education, under or after your name, or in a separate category.

Include your GPA only if it's good. Because grade point systems vary, specify what your GPA is based on: "3.4/4.0" means 3.4 on a 4.0 scale. If your GPA is under 3.0 on a 4.0 scale, use words rather than numbers: "B– average." If your GPA isn't impressive, calculate your average in your major and your average for your last 60 hours. If these are higher than your overall GPA, consider using them.

List in reverse chronological order (most recent first) each degree earned, field of study, date, school, city, state of any graduate work, short courses and professional certification courses, college, community college, or school from which you transferred.

B.S. in Personnel Management, June 2014, Georgia State University, Milledgeville, GA
 A.S. in Office Management, June 2013, Georgia Community College, Atlanta, GA

Figure 27.8 Keywords for Sample Jobs

Accountant	Hotel Manager	Human Resources Generalist	Marketing Director
Accounts payable	Hospitality management	EEO regulations	Strategic planning skills
Accounts receivable	Banquet sales	ADA	Market research
Audits	Marketing	Applicant screening	New product transition
G/L	Guest relations	Applicant tracking	Trade show management
Microsoft Excel	Employee training	401(K)	Competitive market analysis
Financial reports	Front office management	Merit pay program	Team skills
SEC filings	Occupancy rate	Training and development	Multiple priorities
Budget analysis	Guest services	Compensation	Direct marketing campaigns
Gross margin analysis	Convention management	Recruitment	Business models
Month-end closings	Reservations	Diversity	Marketing business plans

Source: Rebecca Smith, *Electronic Résumés & Online Networking: How to Use the Internet to Do a Better Job Search, Including a Complete, Up-to-Date Resource Guide* (Career Press, 1999), pp. 192–194.

To fill a page, you can also list selected courses, using short descriptive titles rather than course numbers. Use a subhead such as “Courses Related to Major” or “Courses Related to Financial Management” which will allow you to list all the courses (including psychology, speech, and business communication) that will help you in the job for which you’re applying. Don’t say “Relevant Courses,” as that implies that all your other courses were irrelevant.

Bachelor of Science in Management, May 2012, Illinois State University,

Normal, IL

GPA: 3.8/4.0

Courses Related to Management:

Personnel Administration

Business Decision-Making

Finance

International Business

Management I and II

Marketing

Accounting I and II

Legal Environment of Business

Business Report Writing

Business Speaking

Salutatorian, Niles Township East High School, June 2008, Niles, IL

A third option is to list the number of hours in various subjects, especially if the combination of courses qualifies you for the position for which you’re applying.

B.S. in Marketing, May 2009, California State University at Northridge

30 hours in Marketing

15 hours in Spanish

9 hours in Chicano/a Studies

A Microsoft survey revealed that 70% of recruiters said they rejected applicants because of what they found online about them, including posts on their Facebook pages. Reppler, a start-up that specializes in sanitizing social networking pages, surveyed 300 hiring managers and found 91% used social networking to screen job applicants. About half said they started Googling as soon as they got an application.

Source: Kashmir Hill, “What Prospective Employers Hope to See in Your Facebook Account: Creativity, Well-Roundedness, and ‘Chastity,’” *Forbes*, October 3, 2011, <http://www.forbes.com/sites/kashmirhill/2011/10/03/what-prospective-employers-hope-to-see-in-your-facebook-account-creativity-well-roundedness-chastity/>.

Career Objective

Career Objective statements should sound like the job descriptions an employer might use in a job listing. Keep your statement brief—two or three lines at most. Tell what you want to do, what level of responsibility you want to hold.

Ineffective career objective: To offer a company my excellent academic foundation in hospital technology and my outstanding skills in oral and written communication.

Better career objective: Selling state-of-the-art Siemens medical equipment.

Including the employer’s name in the objective is a nice touch.

Often you can avoid writing a Career Objective statement by putting the job title or field under your name.

Joan Larson Ooyen
Marketing

Terence Edward Garvey
Technical Writer

David R. Lunde
Corporate Fitness Director

Note that you can use the field you’re in even if you’re a new graduate. To use a job title, you should have some relevant work experience.

Honors and Awards

It’s nice to have the word Honors in a heading where it will be obvious even when the reader skims the résumé. If you have fewer than three and therefore cannot justify a

Because many companies forbid managers from discussing a past employee's job performance, getting a job reference that goes beyond dates of employment can be tough. One alternative, suggests Russ Jones of First Transitions, Inc., is to seek references from former managers and colleagues who now work elsewhere. Whatever the source, get permission before naming anyone as a reference.

Source: Perri Capell, "If a Boss Can't Talk, Where Do Candidates Get References?" *The Wall Street Journal*, downloaded at http://online.wsj.com/article/SB120577223045642093.html?mod=hp_us_leisure on March 19, 2008.

separate heading, consider using the heading Activities and Honors to get that important word in a position of emphasis.

Include the following kinds of entries in this category:

- Listings in recognition books (e.g., *Who's Who in the Southwest*).
- Academic honor societies. Specify the nature of Greek-letter honor societies so the reader doesn't think they're just social clubs.
- Fellowships and scholarships.
- Awards given by professional societies.
- Major awards given by civic groups.
- Varsity letters; selection to all-state or all-America teams; finishes in state, national, or Olympic meets. (These could also go under Activities but may look more impressive under Honors. Put them under one category or the other—not both.)

Omit honors such as "Miss Congeniality" that work against the professional image you want your résumé to create.

As a new graduate, try to put Honors on page 1. In a skills résumé, put Honors on page 1 if they're major (e.g., Phi Beta Kappa, Phi Kappa Phi). Save them till page 2 if Experience takes the whole first page.

References

Including references anticipates the employer's needs and removes a potential barrier to your getting the job. To make your résumé fit on one page, you can omit this category. However, include References if you're having trouble filling the page. Don't say "References Available on Request" because no job applicant is going to refuse to supply references. If you don't want your current employer to know you're job hunting, omit the category in the résumé and say in the letter, "If I become a finalist for the job, I will supply the names of current references."

When you list references, use three to five. Include at least one professor and at least one employer or advisor—someone who can comment on your work habits and leadership skills.

Always ask the person's permission to list him or her as a reference. Don't say, "May I list you as a reference?" Instead, say, "Can you speak specifically about my work?" Jog the person's mind by taking along copies of work you did for him or her and a copy of your current résumé. Tell the person what points you'd like him or her to stress in a letter. Keep your list of references up to date. If it's been a year or more since you asked someone, ask again—and tell the person about your recent achievements.

References the reader knows are by far the most impressive. In a skills résumé, choose references who can testify to your abilities in the most important skills areas.

A good résumé speaks to your skills and experiences and can help in creating discussion during the job interview.

What should I do if the standard categories don't fit? **LO 27-6**

- *Create new ones.*

Create headings that match your qualifications: Computer Skills, Military Experience, Foreign Languages, Summer and Part-Time Jobs, Marketing Experience, Achievements Related to Career Objective.

Education and Experience (if you use the latter term) always stand as separate categories, even if you have only one item under each head. Combine other headings so you have at least two long or three short items under each heading. For example, if you're in one honor society, two social clubs, and on one athletic team, combine them all under Activities and Honors.

If you have more than seven items under a heading, consider using subheadings. For example, a student who had a great many activities might divide them into Student Government, Other Campus Activities, and Community Service.

Put your strongest categories near the top and at the bottom of the first page. If you have impressive work experience, you might want to put that category first after your name, put Education in the middle of the page, and put your address at the bottom.

Instant Replay

Summary of Qualifications

In the first section of your résumé, summarize your strengths. Use the specialized terminology of your field and offer specific, quantifiable achievements.

Should I limit my résumé to just one page? **LO 27-6**

- *Not if you've got lots of qualifications.*

A one-page résumé is sufficient, but do fill the page. The average résumé is now two pages, according to career-planning consultant Marilyn Moats Kennedy. An experiment that mailed one-or two-page résumés to CPA firms showed that even readers who said they preferred short résumés were more likely to want to interview the candidate with the longer résumé.¹

If you do use more than one page, the second page should have at least 10 to 12 lines. Use a second sheet and staple it to the first so readers who skim see the staple and know there's more. Leave less important information for the second page. Put your name and "Page 2" or "Cont." on the second page. If the pages are separated, you want the reader to know who the qualifications belong to and that the second page is not your whole résumé.

How do I create a scannable résumé? **LO 27-7**

- *Take out all your formatting.*

Figure 27.9 is an example of a scannable résumé.

To increase the chances that the résumé is scanned correctly,

- Use a standard typeface: Helvetica, Futura, Optima, Times Roman, New Century Schoolbook, Courier, Univers, or Bookman.²
- Use 12- or 14-point type.
- Use a ragged right margin rather than full justification. Scanners can't always handle the extra spaces between words and letters that full justification creates.
- Don't italicize or underline words—even for titles of books or newspapers that grammatically require such treatment.
- Put the text in bold to make sure letters don't touch each other. Then remove the bold.
- Don't use lines, boxes, script, leader dots, or borders.
- Don't use two-column formats or indented or centered text.

- Put each phone number on a separate line.
- Use plenty of white space.
- Don't fold or staple the pages.
- Don't write anything by hand on your résumé.
- Send a laser copy. Stray marks defeat scanners.

Figure 27.9 A Scannable Résumé

Use 12- or 14-point type in a standard typeface.
Here, Times Roman is used.

Doing so creates extra spaces that confuse scanners.</i></p> <p><i>Omit bold and italics. Some scanners can handle bullets, but they aren't needed in a scannable résumé.</i></p>
---	--

To increase the number of matches or “hits,”

- Use a Keywords section under your name, address, and phone. In it, put not only degrees, job field or title, and accomplishments but also personality traits and attitude: *dependable, skill in time management, leadership, sense of responsibility*.³
- Use industry buzzwords and jargon, even if you’re redundant. For example, “web page design and HTML coding” will “match” either “Web” or “HTML” as a keyword.
- Use nouns. Some systems don’t handle verbs well.
- Use common headings such as Summary of Qualifications, Strengths, Certifications, and so forth, as well as Education, Experience, and so on.
- Use as many pages as necessary.
- Mention specific software programs (e.g., Lotus Notes) you’ve used.
- Be specific and quantifiable. “Managed \$2 million building materials account” will generate more hits than “manager” or “managerial experience.” Listing Microsoft Front Page as a skill won’t help as much as “Used Microsoft Front Page to design an interactive web page for a national fashion retailer, with links to information about style trends, current store promotions, employment opportunities, and an online video fashion show.”
- Join honor societies and professional and trade organizations, since they’re often used as keywords.⁴ Spell out Greek letter societies (the scanner will mangle Greek characters, even if your computer has them): “Pi Sigma Alpha Honor Society.” For English words, spell out the organization name; follow it with the abbreviation in

parentheses: “College Newspaper Business and Advertising Managers Association (CNBAM).” That way, the résumé will be tagged whether the recruiter searches for the full name or the acronym.

- Put everything in the résumé, rather than “saving” some material for the cover letter. While some applicant tracking systems can search for keywords in cover letters and other application materials, most only extract information from the résumé, even though they store the other papers. The length of the résumé doesn’t matter.

How should I prepare an online résumé? LO 27-7

- If an employer requests one, follow these guidelines.

Traditional paper résumés are still popular, but employers increasingly are requesting other forms, and hiring managers and recruiters now use e-mail for most of their correspondence. With the popularity of the web, you may want to post your résumé online. If you don’t know hypertext markup language (HTML), the behind-the-scenes programming that displays web pages in your browser, you can save your résumé as HTML in Word or WordPerfect. However, be aware that the HTML editors in word-processing programs create messy codes that computer programmers deplore. If you’re claiming the ability to code web pages as one of your skills and abilities, use real HTML, not the code created by Word or WordPerfect.

In your web résumé,

- Include an e-mail link at the top of the résumé under your name.
- Omit your street addresses and phone numbers. (A post office box is OK.) Employers who find your résumé on the web will have the technology to e-mail you.
- Consider having links under your name and e-mail address to the various parts of your résumé. Use phrases that give the viewer some idea of what you offer: e.g., *Marketing Experience*.
- Link to other pages that provide more information about you (a list of courses, a document you’ve written), but not to organizations (your university, an employer) that shift emphasis away from your credentials.
- Don’t be cute. Do be professional. Link to other pages you’ve created only if they convey the same professional image as your résumé.
- Put your strongest qualification immediately after your name and e-mail address. If the first screen doesn’t interest readers, they won’t scroll through the rest of the résumé.
- Specify the job you want. Recruiters scroll from top to bottom and should not have to search for this information.⁵
- Specify city and state for educational institutions and employers.
- Use lists, indentations, and white space to create visual variety.
- Most commercial and many university sites offer lists of applicants, with a short phrase after each name. Craft this phrase to convince the recruiter to click on your résumé.
- Proofread the résumé carefully.

Be prepared during the job interview to create HTML or Java text or provide an in-office writing sample. Firms know that candidates can get help with web pages and online portfolios and may want confirmation that the skills they represent indeed belong to the candidate.

Can I use a video résumé? LO 27-8

- Yes, if it’s appropriate for the situation and presents you in the best light.

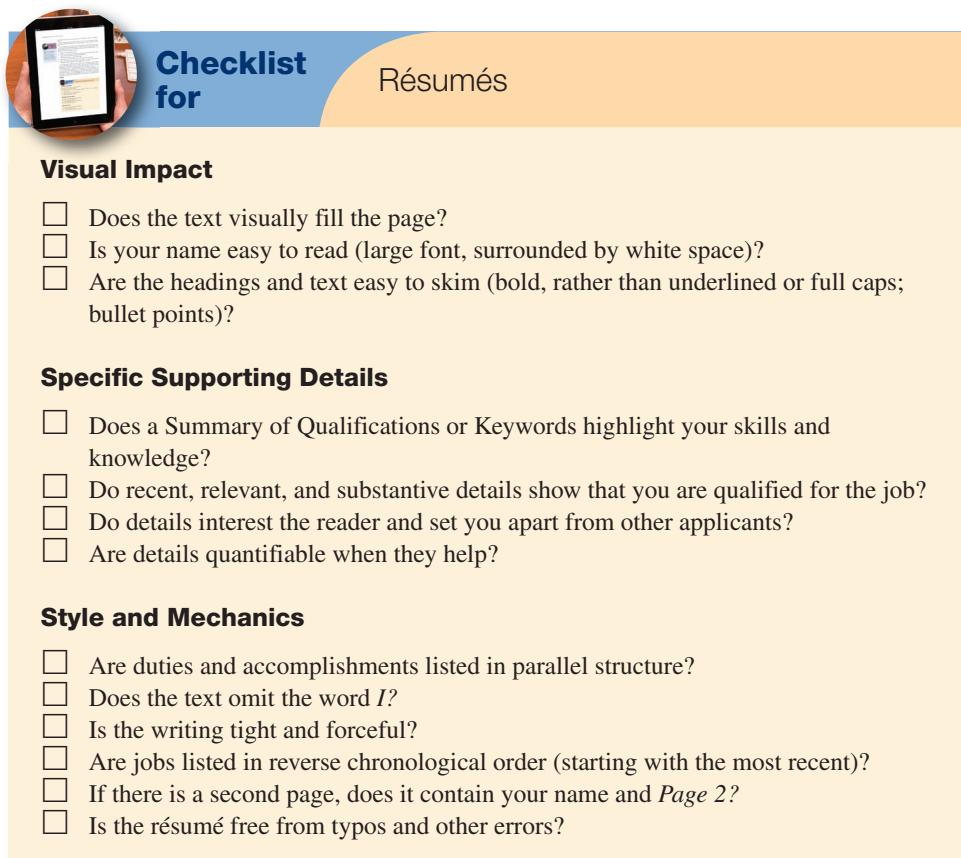

Video résumés can be powerful tools for reaching an audience. They let applicants use sight, sound, color, and motion to enhance appeals and demonstrate skills needed for the job. But video résumés also leave applicants vulnerable to discrimination or ridicule, as was the case for Aleksey Vayner, whose much-maligned “Impossible is Nothing” made the

If you send your résumé in an e-mail message, consider these guidelines for etiquette:

- Use a personal e-mail account, not your employer’s. Google, Yahoo!, and Hotmail provide free e-mail accounts.
- Avoid silly or cryptic e-mail addresses that might be screened out by anti-spam software. Instead of bubbles@yahoo.com, use yourname@yahoo.com.
- Omit your street address and phone number, writing “Confidential Résumé” in their place, if you are concerned about your e-mail being read by a third party.
- Send individual, targeted messages rather than mass mailings.
- Write a simple subject line—Résumé for Kate Sanchez, for instance.

If you send a résumé as an attachment, send one version in a popular word-processing format, such as Microsoft Word, and another as a text or rich text format so it can still be opened by other programs.

The graphic features a blue header bar with the text "Checklist for Résumés". To the left of the text is a circular icon containing a small image of a tablet displaying a résumé. The main body of the graphic is a light beige color and contains three sections: "Visual Impact", "Specific Supporting Details", and "Style and Mechanics", each with a list of items to check.

Visual Impact

- Does the text visually fill the page?
- Is your name easy to read (large font, surrounded by white space)?
- Are the headings and text easy to skim (bold, rather than underlined or full caps; bullet points)?

Specific Supporting Details

- Does a Summary of Qualifications or Keywords highlight your skills and knowledge?
- Do recent, relevant, and substantive details show that you are qualified for the job?
- Do details interest the reader and set you apart from other applicants?
- Are details quantifiable when they help?

Style and Mechanics

- Are duties and accomplishments listed in parallel structure?
- Does the text omit the word *I*?
- Is the writing tight and forceful?
- Are jobs listed in reverse chronological order (starting with the most recent)?
- If there is a second page, does it contain your name and *Page 2*?
- Is the résumé free from typos and other errors?

Figure 27.10 Checklist for Résumés

rounds on the Internet and included examples of ballroom dancing, downhill skiing, and bench pressing (hundreds of pounds)—all for a job in banking.⁶ Know, too, that we may overestimate our strengths on camera, as TV shows like *American Idol* have made audiences painfully realize!

When you have a choice, weigh the benefits of using video résumés against the risks. Many potential employers, for instance, can scan through dozens of paper résumés in the time it takes to view a single video résumé. Which résumé might they prefer? Consider using a video résumé if it's appropriate for the organization and job sought, such as one in entertainment, motivational speaking, or face-to-face sales—and if it's the best way to present you. Stick to traditional methods otherwise.

For a video résumé:

- Be professional in behavior and appearance (◀◀ Module 9, p. 130).
- Practice a few times before recording. (For tips on how to appear best on camera, ◀◀ Module 13, p. 231.)
- Introduce yourself, and then show why you're a strong candidate for the job by using you-attitude and positive emphasis, highlighting skills necessary for the job.
- Keep the video brief unless you know the employer wants a longer video, bearing in mind that because employers are usually busy or could be using slow Internet connections, a minute or two may be ideal.
- Use imagery and sound to enhance your presentation, but refrain from discordant edits, colors, music, and special effects.
- Record several versions using quality equipment, and select the version that presents you best.
- Where possible, test your video résumé with an audience similar to your target audience.
- Check your video résumé from time to time to make sure it downloads and plays correctly, especially as new versions of software reach the market.

You can e-mail video résumés directly to employers or post them on sites like youtube.com, facebook.com, workblast.com, hirevue.com, and mypersonalbroadcast.com. Check to see if fees are involved, and make certain any page hosting your video résumé presents you appropriately. You can also watch others' video résumés on these sites for inspiration.

Summary of Learning Objectives

- A résumé must fill at least one page. Use two pages if you have extensive activities and experience. (**LO 27-1**)
- Emphasize information that is relevant to the job you want, is recent (last three years), and shows your superiority to other applicants. (**LO 27-1**)
- To emphasize key points, put them in headings, list them vertically, and provide details. (**LO 27-2**)
- Experiment with layout, fonts, and spacing to get an attractive résumé. (**LO 27-2**)
- Avoid templates. Space will be limited, and readers will have seen them before. If you use a service that uses a template, create another résumé that looks good. Take it with you to interviews. (**LO 27-2**)
- Proofread carefully. (**LO 27-2**)
- Résumés use sentence fragments punctuated like complete sentences. Items in the résumé must be concise and parallel. Emphasize verbs and gerunds in a résumé that people will read. (**LO 27-3**)
- A **chronological résumé** summarizes what you did in a timeline (starting with the most recent events and going backward in **reverse chronology**). It emphasizes degrees, job titles, and dates. Use a chronological résumé when your education and experience (**LO 27-3**)
 - Are a logical preparation for the position for which you're applying.
 - Show a steady progression leading to the present.
- A **skills résumé** emphasizes the skills you've used, rather than the job in which, or the date when, you used them. Use a skills résumé when (**LO 27-3**)
 - Your education and experience are not the usual route to the position for which you're applying.
 - You're changing fields.
- You want to combine experience from paid jobs, activities or volunteer work, and courses to show the extent of your experience in administration, finance, speaking, and so forth.
- Your recent work history may create the wrong impression (e.g., it has gaps, shows a demotion, shows job-hopping, etc.).
- A chronological résumé uses separate categories for Experience, Activities, and Volunteer Work. Experience is organized by jobs, with the most recent job first. (**LO 27-4**)
- A skills résumé replaces these three categories with headings of the skills needed for the job for which the job hunter is applying. With each skill, items are listed in order of importance, combining paid and unpaid work. An Employment History section lists job titles, employers, city, state, and dates. (**LO 27-4**)
- Résumés commonly contain the applicant's name, address, phone number, education, and experience. Activities, honors, and references should be included if possible. (**LO 27-5**)
- To fill the page, list courses or list references vertically. (**LO 27-5**)
- Create headings that match your qualifications. Education and Experience always stand as separate categories. (**LO 27-6**)
- A one-page résumé is sufficient, but do fill the page. The average résumé is now two pages, according to consultant Marilyn Moats Kennedy. (**LO 27-6**)
- To create a scannable résumé, create a "plain vanilla" text using industry jargon, buzzwords, and acronyms. (**LO 27-7**)
- In a web résumé, omit street addresses and phone numbers, consider having links to parts of the résumé, and proofread carefully. (**LO 27-7**)
- A **video résumé** uses sight, sound, color, and motion to represent you. Only use a video résumé if it is appropriate for the situation and presents you in the best light. (**LO 27-8**)

Assignments for Module 27

Questions for Comprehension

- 27.1** How do you decide whether to use a chronological or a skills résumé? (**LO 27-3**)
- 27.2** In a chronological résumé, in what order do you list your experience? (**LO 27-4**)
- 27.3** Why should you think about dividing a section that has more than seven items? (**LO 27-5**)

Questions for Critical Thinking

- 27.4** Is it ethical to omit information that might hurt you, such as a low grade point average? (**LO 27-1**)
- 27.5** Should someone who is having trouble creating a good résumé pay a résumé service to create a document for him or her? (**LO 27-1, 27-2**)

- 27.6** Suppose you know that people with your qualifications are in great demand. Is there any reason for you to take the time to write a strong résumé? (**LO 27-1**)
- 27.7** What are the arguments for and against listing references on your résumé? (**LO 27-5**)

Exercises and Problems

27.8 Analyzing Your Accomplishments (**LO 27-1**)

List the 10 accomplishments that give you the most personal satisfaction.

These could be things that other people would not notice. They can be things you've done recently or things you did years ago.

Answer the following question for each accomplishment:

1. What skills or knowledge did you use?
2. What personal traits did you exhibit?

27.9 Remembering What You've Done (**LO 27-1**)

Use the following list to jog your memory about what you've done. For each, give three or four details as well as a general statement.

Describe a time when you

1. Used facts and figures to gain agreement on an important point.
2. Identified a problem faced by a group or organization and developed a plan for solving the problem.
3. Made a presentation or a speech to a group.
4. Responded to criticism.

27.10 Evaluating Career Objective Statements (**LO 27-1 to LO 27-3**)

None of the following career objective statements is effective. What is wrong with each statement as it stands? Which statements could be revised to be satisfactory? Which should be dropped?

1. To use my acquired knowledge of accounting to eventually own my own business.
2. A progressively responsible position as a MARKETING MANAGER where education and ability would have valuable application and lead to advancement.

27.11 Writing a Paper Résumé (**LO 27-1 to LO 27-5**)

Write a résumé on paper that you could mail to an employer or hand to an interviewer at an interview.

As Your Instructor Directs,

- a. Write a résumé for the field in which you hope to find a job.

3. What about this accomplishment makes it personally satisfying to you?

As Your Instructor Directs,

- a. Share your answers with a small group of other students.
- b. Summarize your answers in a memo to your instructor.
- c. Present your answers orally to the class.

5. Interested other people in something that was important to you and persuaded them to take the actions you wanted.

6. Helped a group deal constructively with conflict.
7. Demonstrated creativity.

As Your Instructor Directs,

- a. Identify which job(s) each detail is relevant for.
- b. Identify which details would work well on a résumé.
- c. Identify which details, further developed, would work well in a job letter.

3. To work with people responsibly and creatively, helping them develop personal and professional skills.

4. A position in international marketing which makes use of my specialization in marketing and my knowledge of foreign markets.

5. To design and maintain web pages.

- b. Write two different résumés for two different job paths you are interested in pursuing.

- c. Adapt your résumé to a specific company you hope to work for.

27.12 Writing a Scannable Résumé (**LO 27-7**)

Take the résumé you like best from Problem 27.11 and create a scannable version of it.

Polishing Your Prose

Proofreading

Wait until the final draft is complete to edit and proofread. There is no point in proofreading words and passages that might change. (Some writers claim to proofread documents while they're composing; this practice is like trying to mow the lawn and trim the hedges at the same time.)

Editing includes checking for you-attitude and positive emphasis, fixing any sexist or biased language, and correcting grammatical errors.

Proofreading means making sure that the document is free from typos. Check each of the following aspects.

Spelling. Scan for misspelled or misused words that spell-checkers don't catch: *not* instead of *now*, *you* instead of *your*, *its* instead of *it's*, *their* instead of *there* or *they're*, *one* instead of *won*, and so forth.

Consistency. Check abbreviations and special terms.

Names. Double-check the reader's name.

Punctuation. Make sure that parentheses and quotation marks come in pairs. Be on the lookout for missing or extra commas and periods.

Format. Look for errors in spacing, margins, and document design, especially if you compose your document on one computer and print it out at another. Use the correct format for citations—MLA, APA, Chicago, etc.

Numbers and dates. Double-check all numbers to make sure they add up. Make sure page numbers appear where they should

and are sequential. Do the same for tables of contents or appendices. Check dates.

How to proofread is as individual as writing style. Try these methods or invent your own:

- **Read the document from last word to first word** to catch spelling errors.
- **Read the document in stages**—first page, second page, third page—with plenty of “rest” in between so you are fresh for each page.
- **Read pages out of sequence** so you can concentrate on the characters on the page rather than the meaning.
- **Read the document aloud**, listening for awkward or incorrect phrasing.
- **Ask a friend to read the document aloud**, voicing punctuation, while you follow along with the original.

Whatever your approach, build time into the composing process for proofreading. If possible, finish the document a day or two before it's due to allow enough time. (If the document is a 100-page report, allow even more time.) If you're in a hurry, use a spell-checker, proof the document yourself, and ask a friend or colleague to proof it as well.

Exercises

Proofread the following passages.

1. August 20, 20072
W. W. Lyndhurst INC.
10002 Avenue of the Americas
New York, NY 21211

Mr. frank Sugarman
1201 North. 5th Stret.
Detroit, MN
Dear Mrs. Sugar:

Thanx for yore recent enquiry regarding you're recent order of July 17, 2001. AS you know, we at WW Lyndhurt, Ink, value you're satisfactory. Rest assure that a replacement part isn't on it's weigh.

Should you require anything else, please don't call me, at 1-80-555-1209?

Once again,
Incredulously,

Kevin corcoran

2.

Resumed for Kathy Jones

332 West Long Strt.
Columbus, OHIO 4321579
(614-555-8188)

Objectification

A management positive in fullfilament services where my skulls, expereince can be boast be used to help your company acheeve it's goals.

Relevent Experience:

2000 to Present Day: Ass. Manager for high-end sports equipt distributor. Responsiblly for checking new customers out.

1895-200: Owned and Operated Jones, Inc., a telephone order processing company for ladys apparel.

1997: Received a plague for Must Compromising Executive of the Year" from Columbus *Monthly* Magazine.

1998: Delivery addresses to local high school senior citizens on why accuracy it important in busyness.

Special Skills

Type 7 or more wrods per minute

Studied English all my life. Fluent in French.

Shot at local gun club.

Check your answers to the odd-numbered exercises at the back of the book.

Module

28 Job Application Letters

LEARNING OBJECTIVES

Module 28 describes how to write job application letters best suited to impress potential employers. After completing the module, you should be able to

- | | |
|---|--|
| LO 28-1 Select job application letters for different situations. | LO 28-5 Apply principles for T-letters. |
| LO 28-2 Contrast differences among job application letters. | LO 28-6 Apply principles for appropriate job application letter length. |
| LO 28-3 Compare similarities among job application letters. | LO 28-7 Apply principles for good job application letter tone. |
| LO 28-4 Examine methods for specific company targeting. | LO 28-8 Apply principles for e-mail job application letters. |

The purpose of a job application letter is to get an interview. If you get a job through interviews arranged by a campus placement office or through contacts, you may not need to write a letter. However, if you want to work for an organization that isn't interviewing on campus, or later when you change jobs, you probably will. Writing a letter is also a good preparation for a job interview because the letter is your first step in showing a specific company what you can do for it.

Technology is also changing how people are applying for jobs. Some organizations want a brief e-mail summarizing your qualifications for the job rather than a formal letter, with a résumé attached. Others simply want a résumé. Employers are free to choose what works best for them, so adapt accordingly. When a job application letter is called for, the skills in this module will help you to craft a good one in whatever form it takes.

In your letter, focus on

- Major requirements of the job for which you're applying.
- Points that separate you from other applicants.
- Points that show your knowledge of the organization.
- Qualities that every employer is likely to value: the ability to write and speak effectively, to solve problems, to get along with people.

Note that the advice in this book applies to job hunting in the United States. Conventions, expectations, and criteria differ from culture to culture: different norms apply in different countries. Even within the United States, different discourse communities (◀◀ p. 28) may have different preferences. For example, letters applying for sales jobs should be more aggressive than the examples in this module.

Every employer wants businesslike employees who understand professionalism. To make your application letter professional,

- Create your letter on a computer. Use a standard font (Times Roman, Palatino, Arial, or Helvetica) in 11- or 12-point type.
- Address your letter to a specific person. If the reader is a woman, call the office to find out what courtesy title (◀◀ p. 132) she prefers.
- Don't mention relatives' names. It's OK to use other names if the reader knows them and thinks well of them, if they think well of you and will say good things about you, and if you have permission to use their names.
- Omit personal information not related to the job.
- Unless you're applying for a creative job in advertising or web design, use a conservative style: few contractions, no sentence fragments, clichés, or slang.
- Edit the letter carefully and proof it several times to make sure it's perfect.

Figure 28.1 lists the activities involved in crafting a strong letter.

Website Gawker published a 3,000-word rejection letter sent out to 900 applicants for a writing position. Among the 42 tips the letter had were to use a one-paragraph e-mail "cover letter" explaining why the applicant was qualified, with the added caveat to "keep it short and sweet." After Shea Gunther's rejection letter was printed and received harsh criticism, he published a rebuttal on website Salon.

Source: Emma Carmichael, "Here's How to Condescend to 900 Job Applicants with a 3,000-Word Rejection Letter," March 26, 2012, <http://gawker.com/5896584/heres-how-to-condescend-to-900-job-applicants-with-a-3000-word-rejection-letter/>.

Figure 28.1 Allocating Time in Writing a Job Application Letter (Your time may vary.)

Letter responding to an announced job opening. Total time: 12 hours

Planning	6 hours
Read ad carefully.	
Check the web for company facts and culture.	
Identify knowledge, skills, and abilities from the résumé that are particularly relevant to this company and this job.	
Answer the PAIBOC questions (◀◀ Module 1).	
Think about document design (◀◀ Module 5).	
Organize the message.	
Writing	3 hours
Draft the letter.	
Revising	3 hours
Reread draft.	
Measure draft against PAIBOC questions, ad, and checklist for application letters (Figure 28.8).	
Revise draft.	
Ask for feedback on draft.	
Revise draft based on feedback.	
Edit document to catch grammatical errors.	
Run spell-check.	
Proof by eye.	
Sign letter; put in envelope with résumé, and mail.	

Some experts question whether the traditional job application cover letter is going away. At least one survey, though, by OfficeTeam found that 91% of more than 1,000 executives polled said cover letters were either somewhat or very valuable when evaluating a job candidate. "Although the job application process has increasingly moved online, the importance of a cover letter shouldn't be underestimated," says Robert Hosking, OfficeTeam's executive director. "It often is the first opportunity to make a positive impression on hiring managers."

Source: Luke Roney, "How to Write a Knock-'em-Dead Cover Letter," February 21, 2012, *U.S. News and World Report*, <http://money.usnews.com/money/blogs/outsidevoices-careers/2012/02/21/how-to-write-a-knock-em-dead-cover-letter>.

What kind of letter should I use? LO 28-1

- *It depends on whether the company has asked for applications.*

Two different hiring situations call for two different kinds of application letters. Write a **solicited letter** when you know that the company is hiring: you've seen an ad, you've been advised to apply by a professor or friend, you've read in a trade publication that the company is expanding. Sometimes, however, the advertised positions may not be what you want, or you may want to work for an organization which has not announced that it has openings in your area. Then you write a **prospecting letter** (as in prospecting for gold).

Prospecting letters help you tap into the hidden job market (◀◀ p. 443). In some cases, your prospecting letter may arrive at a company that has decided to hire but has not yet announced the job. In other cases, companies create positions to get a good person who is on the market. Even in a hiring freeze, jobs are sometimes created for specific individuals.

How are the two letters different? LO 28-2

- *They begin and end differently.*

When you know the company is hiring, organize your letter in this way:

1. State that you're applying for the job (phrase the job title as your source phrased it). Tell where you learned about the job (ad, referral, web). Briefly show that you have the major qualifications required by the ad: a degree, professional certification, job experience, and so forth. Summarize your other qualifications briefly in the same order in which you plan to discuss them in the letter. This **summary sentence** or **paragraph** then covers everything you will talk about and serves as an organizing device for your letter.

I have a good background in standard accounting principles and procedures and a working knowledge of some of the special accounting practices of the oil industry. This working knowledge is based on practical experience in the oil fields: I've pumped, tailed rods, and worked as a roustabout.

Let me put my creative eye, artistic ability, and experience to work for McLean Design.

2. Develop your major qualifications in detail. Be specific about what you've done; relate your achievements to the work you'd be doing in this new job. This is not the place for modesty!
3. Develop your other qualifications, even if the ad doesn't ask for them. (If the ad asks for a lot of qualifications, pick the most important three or four.) Show what separates you from the other applicants who will also answer the ad. Demonstrate your knowledge of the organization.
4. Ask for an interview; tell when you'll be available to be interviewed and to begin work. End on a positive, forward-looking note.

Figure 28.2 presents this pattern of organization visually. Figure 28.4 is an example of a solicited letter.

When you don't have any evidence that the company is hiring, you cannot use the pattern for solicited letters. Instead, organize your letter this way:

1. Catch the reader's interest.
2. Create a **bridge** between the attention-getter and your qualifications. Focus on what you know and can do. Because the employer is not planning to hire, he or she won't be impressed with the fact that you're graduating. Summarize your qualifications briefly in the same order in which you plan to discuss them in the letter. This **summary sentence** or **paragraph** then covers everything you will talk about and serves as an organizing device for your letter.

Figure 28.2 How to Organize a Solicited Job Letter

Figure 28.3 How to Organize a Prospecting Letter

Figure 28.4 A Solicited Letter

<p><i>Be specific about what you've done.</i></p> <p><i>Show how what you've done relates to what you could do in this job.</i></p> <p><i>Ask for an interview.</i></p>	<p>1636½ Highland Street Philadelphia, PA 43201 March 7, 2013</p> <p><i>Block format is a standard business format.</i></p> <p>Mr. John A. Addison, President and co-CEO Primerica 116 E. 8th Street New York, NY 21101</p> <p>Dear Mr. Addison:</p> <p><i>In ¶ 1, show you have the major qualifications listed in the ad.</i></p> <p>I am interested in the position of Regional Manager announced in the February 24 issue of <i>The New York Times</i>. I will receive an A.A.S. in Finance in May and already have a year's experience as a financial sales representative in Primerica's Philadelphia office.</p> <p>My program in Finance has given me the opportunity to focus on Family Financial Management. I have had the opportunity to take courses not only in investments but also in how families manage their resources and the financial stages that U.S. families typically go through. In one class, I had the opportunity to create an Excel spreadsheet to calculate how much a family needed to save to put two children through college, depending on the age of the children and the anticipated expense of college. Writing the spreadsheet gave me a "hands-on" feel for the need for investments over and above simply looking up figures on a chart.</p> <p>Financial selling is a highly competitive field. I am a competitor and have been all my life. While I was in high school, I created a business, hired a staff, and lined up clients. I know the value of training and hard work, and I look forward to the challenge of motivating Primerica's sales staff to do their best. In my landscape business, I delegated work and motivated my employees to do the high-quality jobs that my clients expected. My managerial experience running two businesses could help me become an efficient Regional Manager more quickly.</p> <p>In the last year, as a financial sales representative for Primerica, I've used my persuasive and sales skills to help clients develop financial plans, choose the best investment products to fit their needs, personalities, and lifestyles, and even recruited two clients to become Primerica representatives themselves. I'd like to continue this record of success in your New York office.</p> <p>Could we set up an appointment to discuss this possibility? I'll be in New York March 23–27 and would welcome the opportunity to talk about ways that I could put my experience and drive to work for you.</p> <p>Sincerely,</p> <p><i>Jerry A. Jackson</i></p> <p>Jerry A. Jackson</p> <p>Encl.: Résumé</p>

for dozens of articles on writing job application letters.

3. Develop your strong points in detail. Be specific. Relate what you've done in the past to what you could do for this company. Show that you know something about the company. Identify the specific niche you want to fill.
4. Ask for an interview and tell when you'll be available for interviews. (Don't tell when you can begin work.) End on a positive, forward-looking note.

Figure 28.3 presents this pattern visually. Figure 28.5 shows a prospecting letter.

The First Paragraph of a Solicited Letter

When you know that the firm is hiring, announcing that you are applying for a specific position enables the firm to route your letter to the appropriate person, thus speeding consideration of your application. Identify where you learned about the job: "the position of junior accountant announced in Sunday's *Dispatch*," "William Paquette, our placement director, told me that you are looking for . . ."

Note how the following paragraph picks up several of the characteristics of the ad:

- Ad:** Business Education Instructor at Shelby Adult Education. Candidate must possess a bachelor's degree in Business Education. Will be responsible for providing in-house training to business and government leaders. . . . Candidate should have at least six months' office experience. Prior teaching experience not required.
- Letter:** I am interested in your position in Business Education. I will receive a Bachelor of Science degree from North Carolina A & T University in December. I have two years' experience teaching word processing and computer accounting courses to adults and have developed leadership skills in the North Carolina National Guard.

Good word choices can help set your letter apart from the scores or even hundreds of letters the company is likely to get in response to an ad. The following first paragraph of a letter in response to an ad by Allstate Insurance Company shows a knowledge of the firm's advertising slogan and sets itself apart from the dozens of letters that start with "I would like to apply for . . ."

Taking a cue from advertising, Lynn Taylor suggests job seekers focus on their *unique selling proposition*, or USP, when crafting job application letters. The consultant cites famous advertising campaigns for products that cemented a USP in the minds of the public, such as Colgate Toothpaste's "It cleans your breath while it cleans your teeth." In a similar way, she says, job seekers should consider what USP would best describe them to employers.

Source: Lynn Taylor, "Winning a Job with Your USP," *BusinessWeek*, March 12, 2010, http://www.businessweek.com/managing/content/mar2010/ca2010038_552370.htm.

The Allstate Insurance Company is famous across the nation for its "Good Hands Policy." I would like to lend a helping hand to many Americans as a financial analyst for Allstate, as advertised in the *Chicago Tribune*. I have an Associate of Applied Science degree in Accounting from Harold Washington College, and I have worked with figures, computers, and people.

Note the last sentence forecasts the organization of the letter, preparing for paragraphs about the student's academic background and (in this order) experience with "figures, computers, and people."

First Paragraphs of Prospecting Letters

In a prospecting letter, asking for a job in the first paragraph is dangerous: unless the company plans to hire but has not yet announced openings, the reader is likely to throw the letter away. Instead, catch the reader's interest. Then in the second paragraph shift the focus to your skills and experience, showing how they can be useful to the employer.

Here are an effective first paragraph and the second paragraph of a letter applying to be a computer programmer for an insurance company:

Computers alone aren't the answer to demands for higher productivity in the competitive insurance business. Merging a poorly written letter with a database of customers just sends out bad letters more quickly. But you know how hard it is to find people who can both program computers and write well.

August 23, 2012

Mr. John Harrobin
 New Media Solutions
 Metatec Corporation
 7001 Metatec Boulevard
 Dublin, OH 43017

Dear Mr. Harrobin:

Putting a textbook on a CD-ROM saves paper but does nothing to take advantage of the many possibilities the CD-ROM environment provides. Yet it can be a real challenge to find people who write well, proof carefully, and understand multimedia design. You will see from my enclosed résumé that I have this useful combination of skills.

Rita Haralabidis tells me that Metatec needs people to design and develop high-quality CD-ROM products to meet business and consumer deadlines. Most of the writing and editing that I do is subject to strict standards and even stricter deadlines, and I know information is useful only if it is available when clients need it.

When I toured Metatec this spring, members of the New Media Solutions Group shared some of their work from a series of interactive CD-ROM textbooks they were developing in tandem with Harcourt Brace. This project sparked my interest in Metatec because of my own experience with evaluating, contributing to, and editing college-level textbooks.

As a program administrator at The Ohio State University, I examined dozens of textbooks from publishers interested in having their books adopted by the nation's largest First-Year Writing Program. This experience taught me which elements of a textbook--both content and design--were successful, and which failed to generate interest. Often, I worked closely with sales representatives to suggest changes for future editions. My own contributions to two nationally distributed textbooks further familiarized me with production processes and the needs of multiple audiences. My close contact with students convinces me of the need to produce educational materials that excite students, keep their attention, and allow them to learn through words, pictures, and sounds.

My communication and technology skills would enable me to adapt quickly to work with both individual clients and major corporations like CompuServe and The American Medical Association. I am a flexible thinker, a careful editor, a fluent writer, and, most importantly, a quick study. I will call you next week to find a mutually convenient time when we can discuss putting my talents to work for Metatec.

Sincerely,

Marcella G. Cope

Marcella G. Cope

Enclosed: Résumé

Marcella creates a "letterhead" that harmonizes with her résumé (see Figure 27.7).

Block format with justified margins lets Marcella get this letter on one page.

In a prospecting letter, open with a sentence which (1) will seem interesting and true to the reader and (2) provides a natural bridge to talking about yourself.

Shows knowledge of the company.

Shows she can meet company needs.

All of these terms fit Metatec's production of multi-media educational materials. Names specific clients, showing more knowledge of the company.

When you're changing fields, learning quickly is a real plus.

My education and training have given me this useful combination. I'd like to put my associate's degree in computer technology and my business experience writing to customers to work in State Farm's service approach to insurance.

The best job applications give the employer a sample of what you can do. Hector Palacios created a demo reel of animations to convince potential employers to hire him.

How to Organize a Solicited Letter

1. State that you're applying for the job, and tell where you learned about it. Summarize your qualifications in the order in which you plan to discuss them in the letter.
2. Develop your major qualifications in detail.
3. Develop your other qualifications. Show what separates you from the other applicants who will also answer the ad. Demonstrate your knowledge of the organization.
4. Ask for an interview. State when you can begin work. End on a positive, forward-looking note.

Last Paragraphs

In the last paragraph, indicate when you'd be available for an interview. If you're free any time, say so. But it's likely that you have responsibilities in class and work. If you'd have to go out of town, there may be only certain days of the week or certain weeks that you could leave town for several days. Use a sentence that fits your situation.

I am available for interviews any Wednesday or Friday.

I could come to Memphis for an interview March 17–21.

Should you wait for the employer to call you, or should you call the employer to request an interview? In a solicited letter, it's safe to wait to be contacted: You know the employer wants to hire someone, and if your letter and résumé show that you're one of the top applicants, you'll get an interview. However, for sales jobs, say that you'll call the employer—and do it! In a prospecting letter, also call the employer. Because the employer is not planning to hire, you'll get a higher percentage of interviews if you're aggressive. Don't, however, be rude. No one owes you a response. And when you do call, be polite to the person who answers the phone.

If you're writing a prospecting letter to a firm that's more than a few hours away by car, say that you'll be in the area the week of such-and-such and could stop by for an interview. Companies pay for follow-up visits, but not for first interviews. A company may be reluctant to ask you to make an expensive trip when it isn't yet sure it wants to hire you.

End the letter on a positive note that suggests you look forward to the interview and that you see yourself as a person who has something to contribute, not as someone who just needs a job.

I will call you on Wednesday, April 25, to schedule a time when we can talk.

I look forward to discussing with you ways in which I could contribute to The Limited's continued growth.

What parts of the two letters are the same? LO 28-3

- *The body paragraphs discussing your qualifications.*

In both solicited and prospecting letters you should

- Address the letter to a specific person.
- Indicate the specific position for which you're applying.

- Be specific about your qualifications.
- Show what separates you from other applicants.
- Show a knowledge of the company and the position.
- Refer to your résumé (which you would enclose with the letter).
- Ask for an interview.

Showing a Knowledge of the Position and the Company

If you could substitute another inside address and salutation and send out the letter without any further changes, it isn't specific enough. Use your knowledge of the position and the company to choose relevant evidence from what you've done to support your claims that you could help the company. (See Figures 28.4 and 28.5.)

One or two specific details usually are enough to demonstrate your knowledge. Be sure to use the knowledge, not just repeat it. Never present the information as though it will be news to the reader. After all, the reader works for the company and presumably knows much more about it than you do.

Separating Yourself from Other Applicants

Your knowledge of the company separates you from other applicants. You can also use course work, an understanding of the field, and experience in jobs and extracurricular events to show that you're unique.

- This student uses summer jobs and course work to set herself apart from other applicants:

A company as diverse as Monsanto requires extensive recordkeeping as well as numerous internal and external communications. Both my summer jobs and my course work prepare me to do this. As Office Manager for the steamboat *Julia Belle Swain*, I was in charge of most of the bookkeeping and letter writing for the company. I kept accurate records for each workday, and I often entered over 100 transactions in a single day. In business and technical writing I learned how to write persuasive letters and memos and how to present extensive data in reports in a simplified style that is clear and easy to understand.

- This student uses her sorority experience and knowledge of the company to set herself apart from other applicants in a letter applying to be assistant personnel manager of a multinational firm:

As a counselor for sorority rush, I was also able to work behind the scenes as well as with the prospective rushees. I was able to use my leadership and communication skills for group activities for 70 young women by planning numerous activities to make my group a cohesive unit. Helping the women deal with rejection was also part of my job. Not all of the rushees made final cuts, and it was the rush counselor who helped put the rejection into perspective.

This skill could be helpful in speaking to prospective employees wishing to travel to Saudi Arabia. Not all will pass the medical exams or make the visa application deadlines in time, and the assistant manager tells these people the news. An even more delicate subject to handle is conveying news of a death of a relative or employee to those concerned. My experience with helping people deal with small losses gives me a foundation to help others deal with more severe losses and deeper grief.

What Job Letters Must Do

In all job letters,

- Address the letter to a specific person.
- Indicate the specific position for which you're applying.
- Be specific about your qualifications.
- Show what separates you from other applicants.
- Show a knowledge of the company and the position.
- Refer to your résumé (which you would enclose with the letter).
- Ask for an interview.

Building a Critical Skill

Targeting a Specific Company in Your Letter LO 28-4

If your combination of skills is in high demand, a one-size-fits-all letter may get you an interview. But when you must compete against dozens—perhaps hundreds or even thousands—of applicants for an interview slot, you need to target your letter to the specific company. Targeting a specific company also helps you prepare for the job interview.

The web makes it easy to find information about a company. The following example shows how applicants could use information posted on the United Parcel Service (UPS) website on February 15, 2010.

Check for Facts about the Company

Like most corporate websites, www.ups.com has dozens of facts about the company. A computer network administrator might talk about helping to keep the company's 156,000 workstations connected through 11,500 servers working well. A web weaver could talk about supporting the 17 million page views and 18.5 million tracking requests on a daily basis that the site gets or about developing even the 5.7 petabytes of mainframe and Unix storage housed at the company's Mahwah, New Jersey, world headquarters. Someone in accounting might talk about being able to convert currency from the euro, the pound, the yuan, the won, or the yen into dollars and back again. Someone in human resources could talk about processing benefits for the 408,000 employees worldwide, keeping the company in *Fortune*'s 50 best companies for minorities or encouraging recruits to join what *Fortune* called "The World's Most Admired Company" in its industry.

Check News Releases and Speeches

A January 14, 2010, release notes that the company has established 101 new field stocking locations (FSL) in China and will use the UPS Post Sales Order Management System online to

place and track orders, access critical parts inventories, or determine the most optimal routing strategy to meet customer needs. A candidate knowledgeable about Chinese languages and culture could talk about the use of web-based platforms to keep the 89 key cities across China networked while the company expands there and elsewhere. (UPS also has more than 950 FSLs in 120 countries.) Several releases discuss UPS's commitment to going "green." Anyone interested in environmentally friendly business strategies could talk about helping UPS expand its efforts even further in meaningful ways, including reducing its carbon footprint, addressing recycling innovations, or continuing to expand its truck fleet powered by electricity and natural gas.

In a November 11, 2009, speech in Singapore, CEO Scott Davis said that creating a better business model for a new global economy involves three key components: reality, resources, and rules. He recognized the tremendous potential for growth in Asia, and an understanding that UPS must partner with new-generation global supply chains that are "predictable, visible, resilient, and environmentally responsible."

Check the Corporate Culture

Under "Careers," "Life at UPS" describes the company's facilities, benefits, and commitment to diversity and philanthropy. Reading about the active participation that UPS encourages may remind applicants to talk about their own work tutoring fifth graders or building houses for Habitat for Humanity, activities that demonstrate their fit with UPS. The use of the term *UPSiers* for employees suggests another way to identify with the company: Use that term once in the letter to suggest how close one is to being an insider. The ad campaign for brown suggests other ways to adapt a letter to the company: Talk about the "brown" character traits you share or your desire to "bleed brown."

Can I use T-letters? LO 28-5

- Yes, if the employer prefers them.

Some employers want T-letters, a cross between a traditional job application letter and a résumé. T-letters, like résumés, offer the advantage of skimming but with some of the narrative qualities of a letter. The T-letter format, though, may make it difficult to provide as much information as the job application letter and résumé combination, and not every employer prefers T-letters. When in doubt, use the more traditional methods described in this module and Module 27.

To create a T-letter, determine the duties of the job. Use a want ad or job description; if none is available, research the kinds of skills that are needed typically, focusing on key skills. Then create a two-column list, with the duties in one column and descriptions using

active verbs or gerunds of how you match what the employer wants in the other. Use bullets and organize your lists—a table format works nicely. Be sure to include details, especially with dollar amounts and other quantities that work in your favor.

What you say in the opening paragraph is determined by whether the letter is solicited or unsolicited. Follow the advice given in those sections of this module. Request an interview in the last paragraph, and end on a positive, forward-looking note. If you have enclosures, such as a résumé or work samples, note them at the end of the letter.

Make sure you give the appropriate contact information, including a telephone number or e-mail address. As with any job application, use quality paper stock and proofread carefully.

Figure 28.6 shows a format for a T-letter.

How long should my letter be? LO 28-6

- Use a full page.

A short letter throws away an opportunity to be persuasive; it may also suggest that you have little to say for yourself or that you aren't very interested in the job.

Without eliminating content, tighten each sentence (◀◀ p. 276) to be sure that you're using space as efficiently as possible. If your letter is still a bit over a page, use slightly smaller margins, a type size that's one point smaller, or justified proportional type to get more on the page.

However, if you need more than a page, use it. The extra space gives you room to be more specific about what you've done and to add details about your experience that separate you from other applicants. Employers don't *want* longer letters, but they will read them *if* the letter is well written and *if* the applicant established early in the letter that he or she has the credentials the company needs.

How do I create the right tone? LO 28-7

- Use you-attitude and positive emphasis.

You-attitude and positive emphasis help you sound assertive without being arrogant.

You-Attitude

Unsupported claims may sound overconfident, selfish, or arrogant. Create you-attitude (◀◀ p. 90) by describing exactly what you have done and by showing how that relates to what you could do for this employer.

Lacks you-attitude: An inventive and improvising individual like me is a necessity in your business.

You-attitude: Building a summer house-painting business gave me the opportunity to find creative solutions to challenges. At the end of the first summer, for example, I had nearly 10 gallons of exterior latex left, but no more jobs. I contacted the home economics teacher at my high school. She agreed to give course credit to students who were willing to give up two Saturdays to paint a house being renovated by Habitat for Humanity. I donated the paint and supervised the students. I got a charitable deduction for the paint and hired the three best students to work for me the following summer. I could put these skills in problem solving and supervising to work as a personnel manager for Burroughs.

Remember that the word *you* refers to your reader. Using *you* when you really mean yourself or “all people” can insult your reader by implying that he or she still has a lot to learn about business:

Since you're talking about yourself, you'll use *I* in your letter. Reduce the number of *I*'s by revising some sentences to use *me* or *my*.

Figure 28.6 A Solicited T-letter

<p>341 Kaumualii Street Honolulu, HI 96814 July 3, 2013</p> <p>Ms. Genevieve Gigot-Adler GDW Electronics Systems, Inc. 1174 West Alameda Street Suite 174 San Francisco, CA 94501</p> <p>Dear Ms. Gigot-Adler:</p> <p>The international sales consultant position described in your July 3 advertisement in <i>The San Francisco Examiner</i> sounds like an excellent match for my skills and experiences. Listed here are the key requirements for the position, as well as my qualifications for each of them.</p> <p><i>In a solicited letter, indicate how you learned of the job opening.</i></p> <p>Your Requirements</p> <ul style="list-style-type: none"> • Bachelor's Degree in Business Administration, Marketing, Advertising, or related field. • Excellent oral and written communication skills. • One year of management or supervisory experience. • Licensed with an excellent driving record and a willingness to travel. • Skill in a foreign language. <p><i>Center column headings or place them just to the left of the columns.</i></p> <p><i>Choose key skills to focus on. Use a want ad or job description as a guide.</i></p> <p><i>Note if you'll be in the area and can meet for an interview.</i></p> <p>I will be in the San Francisco area throughout August. Could we schedule an appointment to discuss how I might be of service to GDW Electronics Systems, Inc.? --	---

Develop a strong network of people to help you find jobs and to speak positively about you.

"Do you have any references besides Batman?"

Copyright © Mort Gerberg/The New Yorker Collection, www.cartoonbank.com.

Under my presidency, the Agronomy Club. . . .

Courses in media and advertising management gave me a chance to. . . .

My responsibilities as a summer intern included. . . .

In particular, avoid beginning every paragraph with *I*. Using prepositional phrases or introductory clauses will avoid beginning a sentence with *I*.

Positive Emphasis

Be positive. Don't plead ("Please give me a chance") or apologize ("I cannot promise that I am substantially different from the lot"). Most negatives should be omitted in the letter.

Avoid word choices with negative connotations (◀ p. 102). Note how the following revisions make the writer sound more confident.

Negative: I have learned an excessive amount about writing through courses in journalism and advertising.

Positive: Courses in journalism and advertising have taught me to recognize and to write good copy. My profile of a professor was published in the campus newspaper; I earned an "A" on my direct mail campaign for the American Dental Association to persuade young adults to see their dentist more often.

Excessive suggests that you think the courses covered too much—hardly an opinion likely to endear you to an employer.

The company wants an e-mail application.
What should I do? **LO 28-8**

► Compose a document in a word-processing program. Then paste it into your e-mail screen.

When you submit an e-mail letter (see Figure 28.7) with an attached résumé,

Figure 28.7 An E-Mail Application Letter

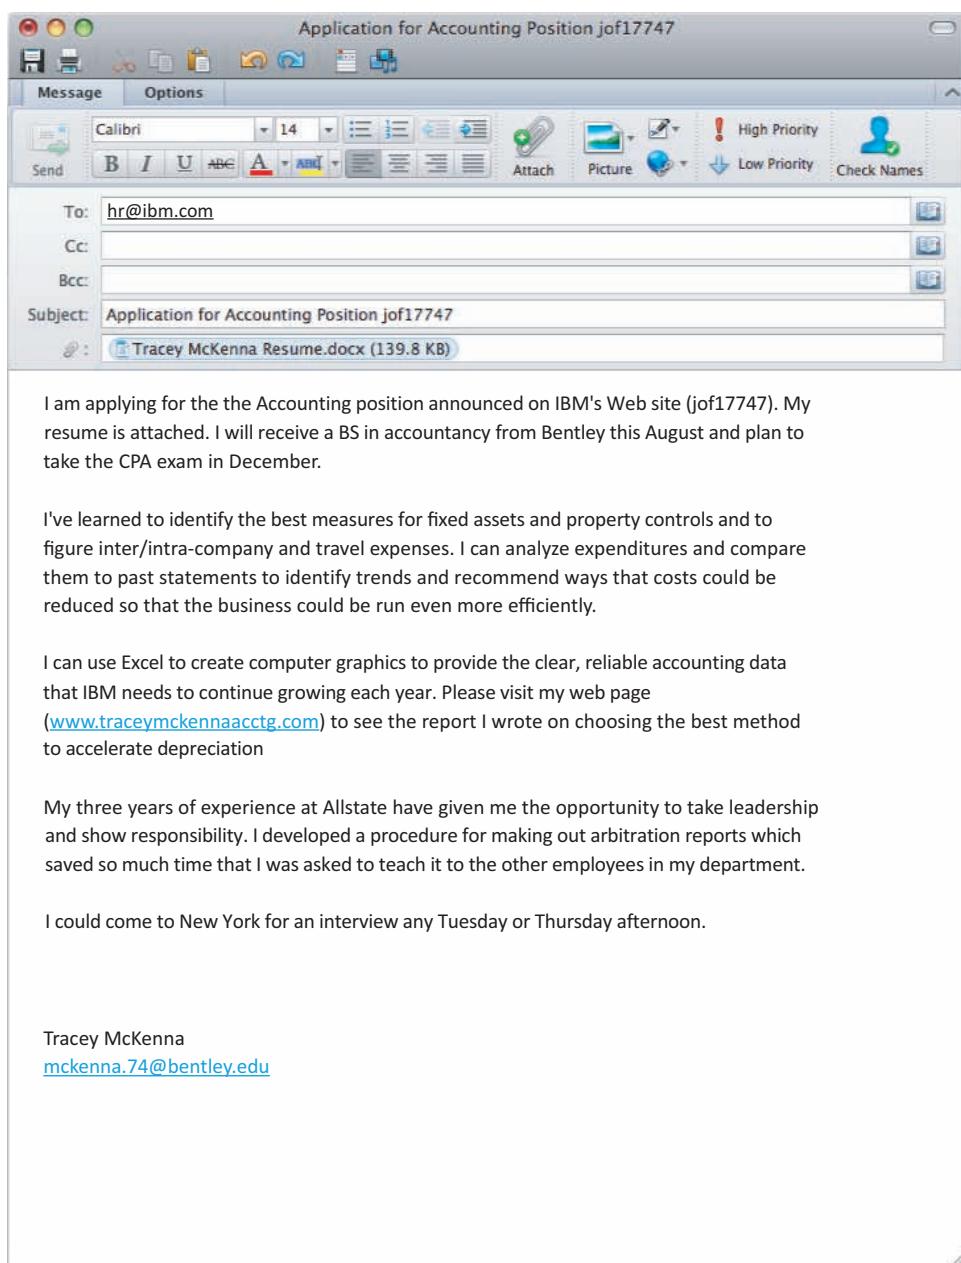

Put the job number in the subject line and in the first paragraph.
Attach your resume.

Omit salutation.

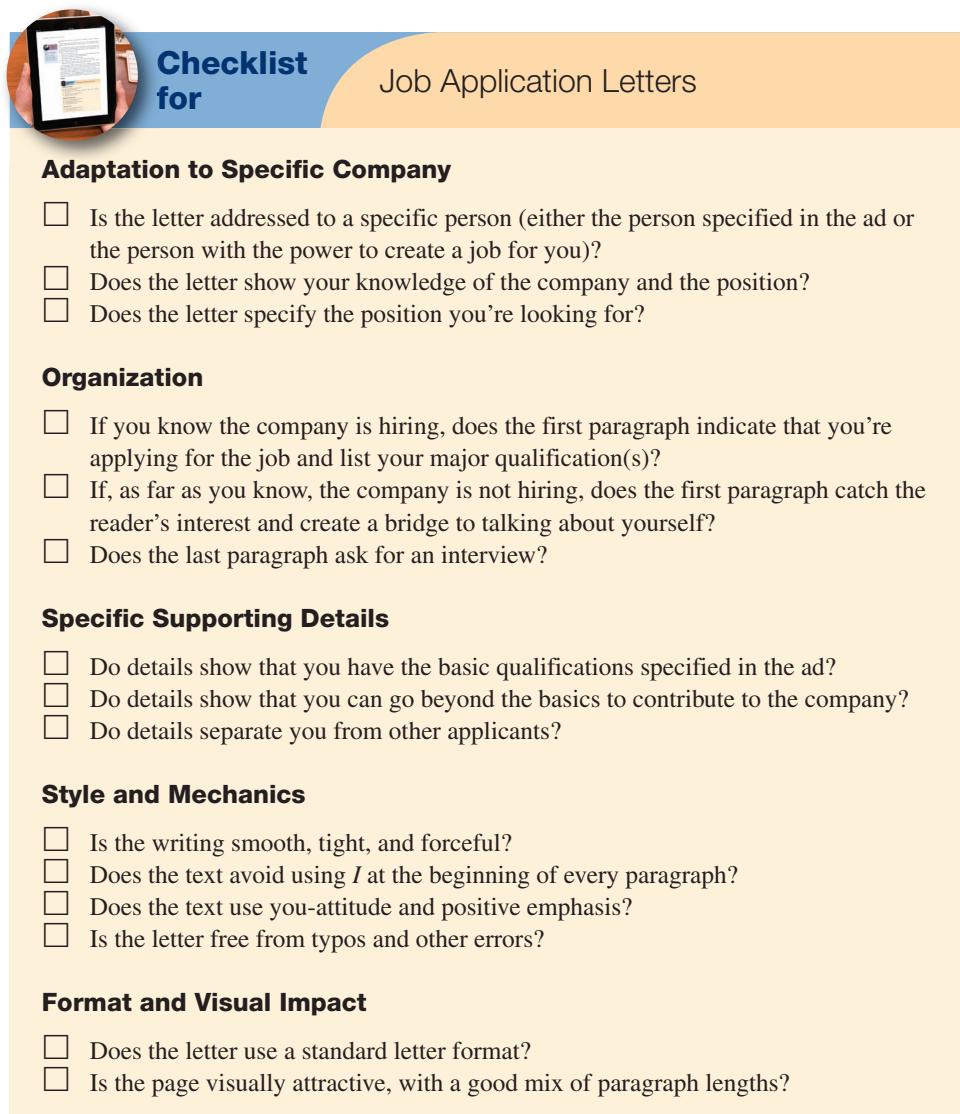

If you have a web page, list it to show that you're technologically savvy.

Add details about your experience that directly relate to information included in the ad you are responding to.

Repeat your name and e-mail address at the end of the message.

- Put the job number or title for which you're applying in your subject line and in the first paragraph.
- Prepare your letter in a word-processing program with a spell-checker to make it easier to edit and proof the document.
- Don't send anything in all capital letters.
- Don't use smiley faces or other emoticons.
- Put your name and e-mail address at the end of the message. Most e-mail programs put the "sender" information at the top of the screen, but a few don't, and you want the employer to know whose letter this is!

The graphic features a blue header bar with the text "Checklist for Job Application Letters". Below the header is a white sidebar containing a small icon of a tablet displaying a document. The main body is divided into several sections with headings and accompanying checklists:

- Adaptation to Specific Company**
 - Is the letter addressed to a specific person (either the person specified in the ad or the person with the power to create a job for you)?
 - Does the letter show your knowledge of the company and the position?
 - Does the letter specify the position you're looking for?
- Organization**
 - If you know the company is hiring, does the first paragraph indicate that you're applying for the job and list your major qualification(s)?
 - If, as far as you know, the company is not hiring, does the first paragraph catch the reader's interest and create a bridge to talking about yourself?
 - Does the last paragraph ask for an interview?
- Specific Supporting Details**
 - Do details show that you have the basic qualifications specified in the ad?
 - Do details show that you can go beyond the basics to contribute to the company?
 - Do details separate you from other applicants?
- Style and Mechanics**
 - Is the writing smooth, tight, and forceful?
 - Does the text avoid using *I* at the beginning of every paragraph?
 - Does the text use you-attitude and positive emphasis?
 - Is the letter free from typos and other errors?
- Format and Visual Impact**
 - Does the letter use a standard letter format?
 - Is the page visually attractive, with a good mix of paragraph lengths?

Figure 28.8 Checklist for Job Application Letters

Summary of Learning Objectives

- When you know that a company is hiring, send a **solicited job letter**. When you want a job with a company that has not announced openings, send a **prospecting job letter**. (**LO 28-1**)
- Organize a solicited letter in this way: (**LO 28-2**)
 - State that you're applying for the job and tell where you learned about the job (ad, referral, etc.). Briefly show that you have the major qualifications required by the ad. Summarize your qualifications in the order in which you plan to discuss them in the letter.
 - Develop your major qualifications in detail.
 - Develop your other qualifications. Show what separates you from the other applicants who will also answer the ad. Demonstrate your knowledge of the organization.
 - Ask for an interview; tell when you'll be available to be interviewed and to begin work. End on a positive, forward-looking note.
- Organize a prospecting letter in this way: (**LO 28-2**)
 - Catch the reader's interest.
 - Create a bridge between the attention-getter and your qualifications. Summarize your qualifications in the order in which you plan to discuss them in the letter.
 - Develop your strong points in detail. Relate what you've done in the past to what you could do for this company. Show that you know something about the company. Identify the specific niche you want to fill.
 - Ask for an interview and tell when you'll be available for interviews. End on a positive, forward-looking note.
- In both letters, you should (**LO 28-3**)
 - Address the letter to a specific person.
 - Indicate the specific position for which you're applying.
 - Be specific about your qualifications.
 - Show what separates you from other applicants.

- Show a knowledge of the company and the position.
- Refer to your résumé (which you would enclose with the letter).
- Ask for an interview.
- To target your letter to a specific company, check for facts about the company, check news releases and speeches, and check the corporate culture. (**LO 28-4**)
- Use a T-letter if the employer prefers it. List the job requirements and your qualifications in a two-column format. (**LO 28-5**)
- A short letter throws away the opportunity to be persuasive; it may also suggest that you have little to say for yourself or that you aren't very interested in the job. (**LO 28-6**)
- Tighten your writing, but if you need more than one page, use it. (**LO 28-6**)
- Use you-attitude by supporting general claims with specific examples and by relating what you've done to what the employer needs. Use positive emphasis to sound confident. (**LO 28-7**)
- When a company wants an e-mail letter, make the document as easy to access as possible. To do so, you should (**LO 28-8**)
 - Compose a document in a word-processing program and then paste it into your e-mail screen.
 - Tell what word-processing program your scannable résumé is saved in.
 - Put the job number or title for which you're applying in your subject line and in the first paragraph.
 - Avoid all capital letters and emoticons.
 - Put your name and e-mail address at the end of the message.

Assignments for Module 28

Questions for Comprehension

28.1 How should you organize a letter in response to an announced job opening? (**LO 28-2**)

Questions for Critical Thinking

28.3 Why is it important for you to separate yourself from other applicants? (**LO 28-1**)

28.4 Is it ethical for someone who isn't a good writer to hire someone to "ghostwrite" the letter for him or her? (**LO 28-1 to LO 28-5**)

28.5 Suppose that people with your qualifications are in great demand. Is there any reason for you to take the time to write a strong letter? (**LO 28-1 to LO 28-5**)

28.2 How should you organize a letter when the company has not announced openings? (**LO 28-2**)

28.6 Why should you *not* ask for a job in the first paragraph of a prospecting letter? (**LO 28-3**)

28.7 Why is a good writing style particularly important in a job application letter? (**LO 28-7**)

Exercises and Problems

28.8 Analyzing First Paragraphs of Prospecting Letters (LO 28-1, LO 28-2)

All of the following are first paragraphs in prospecting letters written by new graduates. Evaluate the paragraphs on these criteria:

- Is the paragraph likely to interest the reader and motivate him or her to read the rest of the letter?
 - Does the paragraph have some content that the student can use to create a transition to talking about his or her qualifications?
 - Does the paragraph avoid asking for a job?
1. Ann Gibbs suggested that I contact you.
 2. Each year, the Christmas shopping rush makes more work for everyone at Wieboldt's, especially for the Credit Department. While working for Wieboldt's Credit Department for three Christmas and summer vacations, the Christmas sales increase was just one of the credit situations I became aware of.
 3. Whether to plate a two-inch eyebolt with cadmium for a tough, brilliant shine or with zinc for a rust-resistant,

less expensive finish is a tough question. But similar questions must be answered daily by your salesmen. With my experience in the electro-plating industry, I can contribute greatly to your constant need of getting customers.

4. Prudential Insurance Company did much to help my college career, as the sponsor of my National Merit Scholarship. Now I think I can give something back to Prudential. I'd like to put my education, including a degree in finance from College, to work in your investment department.
5. Since the beginning of Delta Electric Construction Co. in 1997, the size and profits have grown steadily. My father, being a stockholder and vice president, often discusses company dealings with me. Although the company has prospered, I understand there have been a few problems of mismanagement. I feel with my present and future qualifications, I could help ease these problems.

or (d) below, your listing will be a copy. If you choose option (c), you will write the listing and can design your ideal job.

28.9 Writing a Solicited Letter (LO 28-1 to LO 28-4)

Write a letter of application in response to an announced opening for a full-time job that a new graduate could hold. **Turn in a copy of the listing.** If you use option (a), (b),

- a. Respond to an ad in a newspaper, in a professional journal, in the placement office, or on the web. Use an ad that specifies the company, not a blind ad. Be sure that you are fully qualified for the job.
 - b. Take a job description and assume that it represents a current opening. Use a directory to get the name of the person to whom the letter should be addressed.
 - c. If you have already worked somewhere, assume that your employer is asking you to apply for full-time work after graduation. Be sure to write a fully persuasive letter.
 - d. Respond to one of the listings below. Use a directory or the web to get the name and address of the person to whom you should write.
1. Pepsi-Cola is hiring an **assistant auditor**. Minimum 12 hours of accounting. Work includes analysis and evaluation of operating and financial controls and requires contact with many levels of company management. Extensive travel (50%) required through the United States, along with some international work. Effective written and oral communication skills a must, along with sound decision-making abilities. Locations: Los Angeles, Dallas, Atlanta, Philadelphia, Denver, Chicago. Refer to job FA-2534.
 2. Roxy Systems (Roxy.com) seeks **Internet Marketing Coordinators** to analyze online campaigns and put together detailed reports, covering ad impressions and

28.10 Writing a Prospecting Letter (LO 28-1 to LO 28-4)

Pick a company you'd like to work for and apply for a specific position. The position can be one that already exists or one that you would create if you could to match your unique blend of talents. Give your instructor a copy of the job description with your letter.

28.11 Writing a T-letter (LO 28-5)

Write a T-letter. You can respond to a want ad and write a solicited letter or choose a company you'd like to work for and write a prospecting letter. In either case, determine the key duties required for the job, and match your

28.12 Improving You-Attitude and Positive Emphasis in Job Letters (LO 28-7)

Revise each of these sentences to improve you-attitude and positive emphasis. You may need to add information.

1. I understand that your company has had problems due to the mistranslation of documents during international ad campaigns.
2. Included in my résumé are the courses in Finance which earned me a fairly attractive grade average.

Using You and I

You-attitude (◀◀ Module 6) means that you'll use lots of *you*'s in business messages. However, use *you* only when it refers to your reader. When you mean "people in general," use another term.

click-through rates. Must have basic understanding of marketing; be organized, creative, and detail-oriented; know Microsoft Excel; have excellent communication skills; and be familiar with the Internet. Send letter and resume to mike@roxy.com.

3. Bose Corporation seeks **public relations/communications administrative associate** (Job Code 117BD). Write, edit, and produce the in-house newsletter using desktop publishing software. Represent the company to external contacts (including the press). Provide administrative support to the manager of PR by scheduling meetings, preparing presentations, tabulating and analyzing surveys, and processing financial requests. Excellent organizational, interpersonal, and communication skills (both written and oral) required. Must be proficient in MS Office and Filemaker Pro.
4. The Limited is hiring **executive development program trainees**. After completing 10-week training programs, trainees will become assistant buyers. Prefer people with strong interest and experience in retailing. Apply directly to the store for which you want to work.
5. A local nonprofit seeks a **Coordinator of Volunteer Services**. Responsibilities for this full-time position include coordinating volunteers' schedules, recruiting and training new volunteers, and evaluating existing programs. Excellent listening and communication skills required.

Address your letter to the president of a small company, the area vice president or branch manager of a large company. Use directories or the web to get the name and address of the person with the power to create a job for you.

qualifications to them using description. Address the letter to the appropriate person at the organization; if you are prospecting, research the company to locate that individual.

28.13 Polishing Your Prose

3. I am looking for a position which gives me a chance to advance quickly.
4. Although short on experience, I am long on effort and enthusiasm.
5. I have been with the company from its beginning to its present unfortunate state of bankruptcy.

Polishing Your Prose

Incorrect: When I visited your office, I learned that *you* need to find a way to manage *your* e-mail.

Correct: When I visited your office, I saw the importance of managing *one's* e-mail.

Incorrect: Older customers may not like it if **you** call them by their first names.

Correct: Older customers may prefer **being called** by courtesy titles and their last names.

Omit **you** when it criticizes or attacks the reader.

Not you-attitude: **You** didn't turn **your** expense report in by the deadline.

You-attitude: **Expense reports are due by the fifth of each month. We have no record of receiving your report.**

When you talk about what you've done, use **I**.

Correct: In the past month, **I** have completed three audits.

In general, keep **I**'s to a minimum. They make you sound less confident and more self-centered.

Weak: I think that we would save money if we bought a copier instead of leasing it.

Better: We would save money by buying a copier instead of leasing it.

Weak: I want to be sure that I understand how I will be affected by this project.

Better: How will this project affect our unit?

When you write a document that focuses on you (such as a progress report or a job application letter), vary sentence structure so you don't begin every sentence with **I**.

Correct: This job gave me the opportunity to. . . .

Correct: As an intern, **I**. . . .

Correct: Working with a team, **I**. . . .

When you use a first-person pronoun as part of a compound subject or object, put the first-person pronoun last.

Correct: She asked you and me to make the presentation.

Correct: You, Kelly, and I will have a chance to talk to members of the audience before the dinner.

Be sure to use the right case. Omit the other part(s) of the compound to see the case you should use:

She asked me.

I will have a chance.

Use the same form when you restore the other words.

Exercises

Revise the following sentences to eliminate errors and improve the use of **you** and **I**.

1. If you think you're so smart, you do the report.
2. Though I and you can have very different viewpoints, I always feel we work well together.
3. Collette said that I and you need to make sure our travel requests are in by August 1.
4. Because you didn't make a reservation, our team will have to stay at a different hotel in Birmingham.
5. My boss, Guy Richards, doesn't like it if you call him by his first name.
6. I, Franco, Miranda, and Hamilton are taking the Victoria Clipper to Vancouver tomorrow.
7. Your error on the report almost cost us the account. Make sure you don't do it again.
8. You must always keep your customer in mind, I learned, if you are to be successful in this business.
9. When I and Cooper give the presentation at Bockner and Basche, we'll be giving it our all.
10. I personally approve this message about my company's commitment to service that I believe is critical to my company's success.

Check your answers to the odd-numbered exercises at the back of the book.

Job Interviews

LEARNING OBJECTIVES

Module 29 describes how best to prepare for successful job interviews. After completing the module, you should be able to

- | | |
|---|---|
| LO 29-1 Apply strategies for job interviews. | LO 29-5 Apply strategies for salary and benefits negotiations. |
| LO 29-2 Know details for consideration before job interviews. | LO 29-6 Apply strategies for behavioral and situational interview preparation. |
| LO 29-3 Know techniques for practice before job interviews. | LO 29-7 Apply strategies for phone and video interview preparation. |
| LO 29-4 Apply strategies for traditional interview question responses. | |

Job interviews are scary, even when you've prepared thoroughly. But when you are prepared, you can harness the adrenaline to work for you so that you put your best foot forward and get the job you want.

Know, too, that you should feel good about yourself for making it to the interview process. Because competition for a limited number of interview slots is often intense, being asked to interview at all is a positive sign that the organization is interested in you. The task ahead is to show why you are the best person for the job—to *shine*.

How to do that will depend on the potential employer and what you can anticipate will be expected of you.

In addition to job applicants having their social networking pages scrutinized by potential employers, some are also being asked at interviews to supply Facebook passwords, friend human resource managers, or log in to a company computer. Apps exist to allow companies to scan through a Facebook page if the applicant uses it to connect to the company site. The legality of such practices is being debated, but so far, no company has been prosecuted and desperate job seekers may be willing to supply the information. Said Robert Collins, a security guard who had to interview for his former job after his mother's passing sidelined him: "I needed my job to feed my family. I had to."

Source: Manuel Valdes and Shannon McFarland, "Job Seekers Getting Asked for Facebook Passwords," May 12, 2012, <http://finance.yahoo.com/news/job-seekers-getting-asked-facebook-passwords-071251682.html>.

Today many employers expect you to

- Be more assertive, but not to the point you're showing up at offices unannounced or having parents call on your behalf. One employer deliberately tells the company receptionist to brush off callers who ask about advertised openings. He interviews only those who keep calling and offer the receptionist reasons why they should be interviewed. (However, if you're rejected even after giving reasons, accept the rejection gracefully.)
- Follow instructions to the letter. The owner of a delivery company tells candidates to phone at a precise hour. Failing to do so means that the person couldn't be trusted to deliver packages on time.¹
- Participate in many interviews. Candidates for jobs with Electronic Arts, a maker of computer games, first answer questions online. Then they have up to five phone interviews—some asking candidates to solve problems or program functions. Candidates who get that far undergo "the gauntlet": three days of onsite interviewing.²
- Have one or more interviews by phone, computer, or video.
- Take one or more tests, including drug tests, psychological tests, aptitude tests, computer simulations, and essay exams where you're asked to explain what you'd do in a specific situation.
- Be approved by the team you'll be joining. In companies with self-managed work teams, the team has a say in who is hired.
- Provide—at the interview or right after it—a sample of the work you're applying to do. You may be asked to write a memo or a proposal, calculate a budget on a spreadsheet, or make a presentation.

Be nice to the receptionists and secretaries you speak to. Find out the person's name on your first call and use it on subsequent calls. "Thank you for being so patient. Can you tell me when a better time might be to try to get Mr. or Ms. X? I'll try again on [date]." Sometimes, if you call after 5 p.m., executives answer their own phones since clerical staff members have gone home.

If you get voice mail, leave a concise message with your name and phone number. Even if you've called 10 times, keep your voice pleasant. If you get voice mail repeatedly, call the main company number to speak with a receptionist. Ask whether the person you're trying to reach is in the building. If he or she is on the road, ask when the person is due in.

T or F "I love to help people cheer up and feel better."

T or F "I'd rather do things my own way than follow the rules."

T or F "I am good at taking charge of a group."

Technology is helping companies select job applicants for interviews. For example, retailers like Lowe's, Best Buy, and Finish Line use Unicru's online questionnaires with True/False statements to screen for management, dependability, customer service, and sales potential among workers. How might you answer these types of questions?

Why do I need an interview strategy? LO 29-1

- So that you can be proactive!

Develop an overall strategy based on your answers to these three questions:

1. **What about yourself do you want the interviewer to know?** Pick two to five points that represent your strengths for that particular job. These facts may be achievements, character traits (such as enthusiasm), experiences that qualify you for the job and separate you from other applicants, the fact that you really want to work for this company, and so on. For each strength, think of a specific action or accomplishment to support it. For example, be ready to give an example to prove that you're "hard working." Show how you helped an organization save money or serve customers better.
- Then at the interview, listen to every question to see if you could make one of your key points as part of your answer. If the questions don't allow you to make your points, bring them up at the end of the interview.
2. **What disadvantages or weaknesses do you need to minimize?** Expect that you may be asked to explain weaknesses or apparent weaknesses in your record: lack of experience, so-so grades, or gaps in your record.
3. **What do you need to know about the job and the organization to decide whether to accept this job if it is offered to you?**

According to researchers, plain people earn up to 10% less than people of average looks, who in turn earn up to 8% less than those considered good looking. Of course, beauty is in the eye of the beholder. Author Gordon Wainright says people can increase attractiveness through good posture, clothing, behavior, eye contact, and listening skills. Looks can hurt, too. In one study, people taken with Governor Sarah Palin's appearance correspondingly rated her lower in competence and intelligence than her competitors.

Sources: Kate Lorenz, "Do Pretty People Earn More?" downloaded on December 11, 2007, at <http://news.yahoo.com/s/politico/30276>.

What details should I think about? LO 29-2

- What you'll wear, what you'll take with you, and how to get there.

Inappropriate clothing or being late can cost you a job. Put enough time into planning details so you can move on to substantive planning.

What to Wear

Your interview clothing should be at least as formal as the clothing of the person likely to interview you. When the interview is scheduled, ask the person who invites you whether the company has a dress policy. If the dress is "casual," wear a shirt and a good-quality skirt or pants, not jeans.

If you're interviewing for a management or office job, wear a business suit. What kind of suit? If you've got good taste and a good eye for color, follow your instincts. If fashion isn't your strong point, read John Molloy's *New Dress for Success* (men's clothes) and *The New Woman's Dress for Success Book*. Perhaps the best suggestion in the books is his advice to visit expensive stores, noting details—the exact shade of blue in a suit, the number of buttons on the sleeve, the placement of pockets, the width of lapels—and then go to stores in your price range and buy a suit that has the details found on more expensive clothing.

For onsite interviews, show that you understand the corporate culture. Paul Capelli, former public relations executive at Amazon.com and now vice president of public relations at CNBC, suggests that applicants find out what employees wear "and notch it up one step":

If the dress is jeans and a T-shirt, wear slacks and an open collar shirt. . . . If it's slacks and an open collar shirt, throw on a sport coat. If it's a sport coat, throw on a suit. At least match it and go one step up, but don't go three steps down.³

Choose comfortable shoes. You may do a fair amount of walking during an onsite interview.

Take care of all the details. Check your heels to make sure they aren't run down; make sure your shoes are shined. Have your hair cut or styled conservatively. Jewelry and makeup should be understated. Personal hygiene must be impeccable. If you wear cologne or perfume, keep it to a minimum.

Research carefully an organization's dress code. Swiss bank UBS AG required female employees to wear skin-colored undergarments and advised them on how to apply makeup and fingernail polish. For men, the company required haircuts every month and specified how to tie their ties. After public scrutiny, many of the rules were revised.

Source: "Swiss Bank UBS Changes Much-Mocked Dress Code," January 17, 2011, http://news.yahoo.com/s/ap/20110117/ap_on_bi_ge_eu_switzerland_ubs_dress_code.

Bring work samples, résumé copies, and, of course, yourself to the interview, but think twice about anything detrimental, including emotional baggage. One candidate bad-mouthed a former boss, who she claimed "scared me emotionally." The candidate's reputation for being difficult eventually caught up with her. Other strange things to share are being in anger management for hitting a former co-worker, fighting with your spouse on the way to the interview, and having locked a mentally ill patient in a room to teach him a lesson.

Source: Kelly Eggers, "Ten Dumb Things Said During Job Interviews," *The Wall Street Journal*, March 15, 2012, <http://online.wsj.com/article/SB10001424052970204781804577272044012778530.html>.

What to Bring to the Interview

Bring extra copies of your résumé. If your campus placement office has already given the interviewer a data sheet, present the résumé at the beginning of the interview: "I thought you might like a little more information about me."

Bring something to write on and something to write with. It's OK to bring in a small notepad with the questions you want to ask on it.

Bring copies of your work or a portfolio: an engineering design, a copy of a memo you wrote on a job or in a business writing class, an article you wrote for the campus paper. You don't need to present these unless the interview calls for them, but they can be very effective.

Bring the names, addresses, and phone numbers of references if you didn't put them on your résumé. Bring complete details about your work history and education, including dates and street addresses, in case you're asked to fill out an application form.

If you can afford it, buy a briefcase to carry these items. At the start of your career, an inexpensive briefcase is acceptable.

Note-Taking

During or immediately after the interview, write down

- The name of the interviewer (or all the people you talked to, if it's a group interview or an onsite visit).
- What the interviewer seemed to like best about you.
- Any negative points or weaknesses that came up that you need to counter in your follow-up letter or phone calls.
- Answers to your questions about the company.
- When you'll hear from the company.

The easiest way to get the interviewer's name is to ask for his or her card. You may be able to make all the notes you need on the back of the card.

Some interviewers say that they respond negatively to applicants who take notes during the interview. However, if you have several interviews back-to-back or if you know your memory is terrible, do take brief notes during the interview. That's better than forgetting which company said you'd be on the road every other week and which interviewer asked that you get in touch with him or her.

Instant Replay

Interview Strategy

Plan an interview strategy based on these three questions:

1. What two to five facts about yourself do you want the interviewer to know?
2. What disadvantages or weaknesses do you need to overcome or minimize?
3. What do you need to know about the job and the organization to decide whether or not you want to accept this job if it is offered to you?

How to Get There

If you're going to a place you haven't been before, do a practice run at the same time of day your interview is scheduled for. Check out bus transfers or parking fees. On the day of the interview, leave early enough so that you'll get to the interview 15 minutes early. Use the extra time to check your appearance in the restroom mirror and to thumb through the company publications in the waiting room. If an accident does delay you, call to say you'll be late.

Should I practice before the interview?

LO 29-3

► *Absolutely!*

Your interviewing skills will improve with practice. Rehearse everything you can: put on the clothes you'll wear and practice entering a room, shaking hands, sitting down, and answering questions. Ask a friend to interview you. Saying answers out loud is surprisingly harder than saying them in your head.

Some campuses have videotaping facilities so you can watch your own sample interview. Videotaping is more valuable if you can do it at least twice; you can modify behavior the second time and check the tape to see whether the modification works.

How to Act

Should you “be yourself”? There’s no point in assuming a radically different persona. If you do, you run the risk of getting into a job that you’ll hate (though the persona you assumed might have loved it). On the other hand, all of us have several selves: we can be lazy, insensitive, bored, slow-witted, and tongue-tied, but we can also be energetic, perceptive, interested, intelligent, and articulate. Be your *best* self at the interview.

Interviews can make you feel vulnerable and defensive; to counter this, review your accomplishments—the things you’re especially proud of having done. You’ll make a better impression if you have a firm sense of your own self-worth.

Every interviewer repeats the advice that mothers often give: sit up straight, don’t mumble, look at people when you talk. It’s good advice for interviews. Be aware that many people respond negatively to smoking.

Office visits that involve meals and semisocial occasions call for sensible choices. When you order, choose something that’s easy and unmessy to eat. Watch your table manners. Eat a light lunch, with no alcohol, so that you’ll be alert during the afternoon. At dinner or an evening party, decline alcohol if you don’t drink or are underage. If you do drink, accept just one drink—you’re still being evaluated. Be aware that some people respond negatively to applicants who drink hard liquor.

According to a CareerBuilder survey, 70% of the 850 hiring managers polled said they’d experienced at least one weird, strange, or bizarre behavior during an interview that ruined the chances of the applicant getting a job offer.

Source: Joshua Bjerke, “How NOT to Act at a Job Interview,” March 26, 2012, <http://www.recruiter.com/i/how-not-to-act-at-a-job-interview/>.

Parts of the Interview

Every interview has an opening, a body, and a close.

In the **opening** (two to five minutes), good interviewers will try to set you at ease. Some interviewers will open with easy questions about your major or interests. Others open by telling you about the job or the company. If this happens, listen so you can answer later questions to show that you can do the job or contribute to the company that’s being described.

The **body** of the interview (10 to 25 minutes) is an all-too-brief time for you to highlight your qualifications and find out what you need to know to decide if you want to accept a second interview. Expect questions that allow you to showcase your strong points and questions that probe any weaknesses evident from your résumé. (You were neither in school nor working last fall. What were you doing?) Normally, the interviewer will also try to sell you on the company and give you an opportunity to raise questions.

Be aware of time so you can make sure to get in your key points and questions: “We haven’t covered it yet, but I want you to know that I . . .” “I’m aware that it’s almost 10:30. I do have some more questions that I’d like to ask about the company.”

In the **close** of the interview (two to five minutes), the interviewer will usually tell you what happens next: “We’ll be bringing our top candidates to the office in February. You should hear from us in three weeks.” One interviewer reports that he gives applicants his card and tells them to call him. “It’s a test to see if they are committed, how long it takes for them to call, and whether they even call at all.”⁴

Close with an assertive statement. Depending on the circumstances, you could say: “I’ve certainly enjoyed learning more about General Electric.” “I hope I get a chance to visit your Phoenix office. I’d really like to see the new computer system you talked about.” “This job seems to be a good match between what you’re looking for and what I’d like to do.”

<http://jobsearchtech.about.com/od/interviewtips/>

for links to resources on the web for successful job interviews.

Stress Interviews

A **stress interview** deliberately puts the applicant under stress. If the stress is physical (e.g., you’re given a chair where the light is in your eyes), be assertive: Move to another chair or tell the interviewer that the behavior bothers you.

Usually the stress is psychological. A group of interviewers fire rapid questions. A single interviewer probes every weak spot in the applicant’s record and asks questions that elicit negatives. If you get questions that put you on the defensive, **rephrase** them in less inflammatory terms, if necessary, and then **treat them as requests for information**.

According to the website Glassdoor, consulting firm McKinsey & Company apparently has the toughest interview process, asking such questions as “There are three products: tomatoes, luxury cars, T-shirts. What value added tax is applied to each product type?” and getting a 62% positive experience rating from interviewees. A job candidate at Boston Consulting Group found himself facing an interviewer who put his sockless feet up on the desk and ate a bowl of soup while talking. Stress interviews can be challenging, but research on the company and business market can help prepare applicants for them.

Source: Jacquelyn Smith, “The Companies that Give the Toughest Job Interviews,” *Forbes*, July 26, 2012, <http://www.forbes.com/sites/jacquelynsmith/2012/07/26/the-companies-that-give-the-toughest-job-interviews/>.

Trainer Scott Peek recommends job interviewees prepare themselves with a “verbal résumé,” or a two-minute oral presentation that addresses the “tell me about yourself” portion of the interview. The hardest part? Matching past experiences to the employer’s needs, for which research and you-attitude are crucial.

Source: Bill Zeeble, “What’s a Two-Minute Verbal Résumé?” *KERA News*, January 1, 2010, <http://www.publicbroadcasting.net/kera/news.newsmain/article/1/0/1603130/North.Texas/What%27s.a.Two-Minute.Verbal.Resume>.

Q: Why did you major in physical education? That sounds like a pretty Mickey Mouse major.

A: You’re asking whether I have the academic preparation for this job. I started out in physical education because I’ve always loved sports. I learned that I couldn’t graduate on time if I officially switched to business administration because the requirements were different in the two programs. But I do have 21 hours in business administration and 9 hours in accounting. And my sports experience gives me practical training in teamwork, motivating people, and management.

Respond assertively. The candidates who survive are those who stand up for themselves and who explain why indeed they *are* worth hiring.

Silence can also create stress. One woman walked into her scheduled interview to find a male interviewer with his feet up on the desk. He said, “It’s been a long day. I’m tired and I want to go home. You have five minutes to sell yourself.” Since she had planned the points she wanted to be sure interviewers knew, she was able to do this. “Your recruiting brochure said that you’re looking for someone with a major in accounting and a minor in finance. As you may remember from my résumé, I’m majoring in accounting and have had 12 hours in finance. I’ve also served as treasurer of a local campaign committee and have worked as a volunteer tax preparer through the Accounting Club.” When she finished, the interviewer told her it was a test: “I wanted to see how you’d handle it.”

Increasingly common is the variety of stress interview that asks you to do—on the spot—the kind of thing the job would require. An interviewer for a sales job handed applicants a ballpoint pen and said,

“Sell me this pen.” (It’s OK to ask who the target market is and whether this is a repeat or a new customer.) Candidates who make it through the first two rounds of interviews for sales jobs at Dataflex are invited to participate in a week’s worth of sales meetings, which start at 7 AM four times a week. The people who do participate—not merely attend—are the people who get hired.⁵ AT&T asks some applicants to deliver presentations or lead meetings. Massachusetts Mutual Life asked the finalists for a vice presidency to process memos and reports in a two-hour in-basket exercise and participate in several role plays.⁶

How should I answer traditional interview questions? LO 29-4

► *Choose answers that fit your qualifications and your interview strategy.*

As Figure 29.1 shows, successful applicants use different communication behaviors than do unsuccessful applicants. Successful applicants are more likely to use the company name during the interview, support their claims with specific details, and ask specific questions about the company and the industry. In addition to practicing the content of questions, try to incorporate these tactics.

The following questions frequently come up at interviews. Do some unpressured thinking before the interview so you’ll be able to come up with answers that are responsive, honest, and paint a good picture of you. Choose answers that fit your qualifications and your interview strategy. See Figures 29.2 and 29.3 for examples of the ways recruiters evaluate answers.

1. Tell me about yourself.

Don’t launch into an autobiography. Instead, state the things about yourself that you want the interviewer to know. Give specifics to prove each of your strengths.

2. What makes you think you’re qualified to work for this company? Or, I’m interviewing 120 people for 2 jobs. Why should I hire you?

This question may feel like an attack. Use it as an opportunity to state your strong points: your qualifications for the job, the things that separate you from other applicants.

Figure 29.1 The Communication Behaviors of Successful Interviewees

Behavior	Unsuccessful Interviewees	Successful Interviewees
Statements about the position	Had only vague ideas of what they wanted to do; changed “ideal job” up to six times during the interview.	Specific and consistent about the position they wanted; were able to tell why they wanted the position.
Use of company name	Rarely used the company name.	Referred to the company by name four times as often as unsuccessful interviewees.
Knowledge about company and position	Made it clear that they were using the interview to learn about the company and what it offered.	Made it clear that they had researched the company; referred to specific brochures, journals, or people who had given them information.
Level of interest, enthusiasm	Responded neutrally to interviewer’s statements: “OK,” “I see.” Indicated reservations about company or location.	Expressed approval of information provided by the interviewer nonverbally and verbally; “That’s great!” Explicitly indicated desire to work for this particular company.
Nonverbal behavior	Made little eye contact; smiled infrequently.	Made eye contact often; smiled.
Picking up on interviewer’s cues	Gave vague or negative answers even when a positive answer was clearly desired (“How are your math skills?”).	Answered positively and confidently—and backed up the claim with a specific example of “problem solving” or “toughness.”
Response to topic shift by interviewer	Resisted topic shift.	Accepted topic shift.
Use of industry terms and technical jargon	Used almost no technical jargon.	Used technical jargon: “point of purchase display,” “NCR charge,” “two-column approach,” “direct mail.”
Use of specifics in answers	Gave short answers—10 words or less, sometimes only one word; did not elaborate. Gave general responses: “fairly well.”	Supported claims with specific personal experiences, comparisons, statistics, statements of teachers and employers.
Questions asked by interviewee	Asked a small number of general questions.	Asked specific questions based on knowledge of the industry and the company. Personalized questions: “What would my duties be?”
Control of time and topics	Interviewee talked 37% of the interview time; initiated 36% of the comments.	Interviewee talked 55% of the total time, initiated subjects 56% of the time.

Sources: Based on research reported by Lois J. Einhorn, “An Inner View of the Job Interview: An Investigation of Successful Communicative Behaviors,” *Communication Education* 30 (July 1981), 217–28; and Robert W. Elder and Michael M. Harris, eds., *The Employment Interview Handbook* (Thousand Oaks, CA: Sage, 1999), 300, 303, 327–28.

3. What two or three accomplishments have given you the greatest satisfaction?

Pick accomplishments that you’re proud of, that create the image you want to project, and that enable you to share one of the things you want the interviewer to know about you. Focus not just on the end result, but on the problem-solving and thinking skills that made the achievement possible.

4. Why do you want to work for us? What is your ideal job?

Even if you’re interviewing just for practice, make sure you have a good answer—preferably two or three reasons you’d like to work for that company. If you don’t seem to be taking the interview seriously, the interviewer won’t take you seriously, and you won’t even get good practice.

5. What college courses did you like best and least? Why?

This question may be an icebreaker; it may be designed to discover the kind of applicant they’re looking for. If your favorite class was something outside your program, prepare an answer that shows that you have qualities that can help you in the job you’re applying for: “My favorite class was on the American novel. We got a

What Successful Interviewees Do

Successful applicants

- Know what they want to do.
- Use the company name in the interview.
- Have researched the company in advance.
- Back up claims with specifics.
- Use technical jargon.
- Ask specific questions.
- Talk more of the time.

Figure 29.2 Poor Responses to Behavioral Interview Questions

Source: Adapted from *Fast Company*, January 1999, 156.

Carolyn Murray (cmurray@wlgore.com), 37, a savvy recruiter at W. L. Gore & Associates, developers of GORE-TEX, pays little attention to a candidate's carefully scripted responses to her admittedly softball questions. Instead, she listens for a throwaway line that reveals the reality behind an otherwise benign reply. Herewith, Murray delivers a post-game analysis of how three job candidates whiffed during their interviews.

Question	Response	Evaluation
"Give me an example of a time when you had a conflict with a team member."	"Our leader asked me to handle all of the FedExing for our team. I did it, but I thought that FedExing was a waste of my time."	"At Gore, we work from a team concept. Her answer shows that she won't exactly jump when one of her teammates needs help."
"Tell me how you solved a problem that was impeding your project."	"One of the engineers on my team wasn't pulling his weight, and we were closing in on a deadline. So I took on some of his work."	"The candidate may have resolved the issue for this particular deadline, but he did nothing to prevent the problem from happening again."
"What's the one thing that you would change about your current position?"	"My job as a salesman has become mundane. Now I want the responsibility of managing people."	"He's not maximizing his current position. Selling is never mundane if you go about it in the right way."

Figure 29.3 Good Responses to Interview Questions

Source: Adapted from *Fast Company*, January 1999, 157.

As CEO of Motley Fool, a wildly popular investment Web site, **Erik Rydholm** (erikr@fool.com), 31, has little time for fooling around with undesirable job candidates. To streamline the interview process, he's come up with three questions that quickly separate the fools from the Fools.

Question	Response	Evaluation
"What does Foolishness mean to you? That's a great first question, one that separates those who get it from those who are clueless."	"One guy emphasized that we give people the power to gather investing information from many sources by visiting a single Web site."	"He understood that we're trying to revolutionize the way people lead their financial lives—by putting a lot of power at their disposal."
"Should the Motley Fool consider putting its name on mutual funds and selling a line of financial services?"	"He encouraged us to consider whether branding a fund would undercut our integrity and whether it even related to our core competencies."	"He understood that there's integrity to the Motley Fool brand, and he recognized the risk of undercutting that integrity."
"How does the Motley Fool succeed? That gets to the heart of how we can continue to capitalize on our current market share."	"One candidate argued that the Motley Fool is not a source—it's a service: We guide people through their investment decisions."	"He understood the difference between a 'source' and a 'service'—which made me confident that he could think distinctively for us."

Students coming from homes that appreciate in value are more likely to go to more expensive colleges than those in homes whose value remained unchanged, according to Cornell University's Michael Lovenheim. Ironically, students going to more expensive schools may have less debt. A Boston College graduate, for instance, carries less than \$20,000 in debt, compared to the \$22,900 national average.

Source: Erin Zlomek, "The Wealth Effect and College Choice," *Bloomberg Businessweek*, August 3, 2012, <http://www.businessweek.com/articles/2012-08-03/the-wealth-effect-and-college-choice>.

chance to think on our own, rather than just regurgitate facts; we made presentations to the class every week. I found I really like sharing my ideas with other people and presenting reasons for my conclusions about something."

6. Why are your grades so low?

If possible, show that the cause of low grades now has been solved or isn't relevant to the job you're applying for: "My father almost died last year, and my schoolwork really suffered." "When I started, I didn't have any firm goals. Once I discovered the program that was right for me, my grades have all been 'Bs' or better." "I'm not

good at multiple-choice tests. But you need someone who can work with people, not someone who can take tests.”

7. What have you read recently? What movies have you seen recently?

These questions may be icebreakers; they may be designed to probe your intellectual depth. The term you’re interviewing, read at least one book or magazine (regularly) and see at least one movie that you could discuss at an interview.

8. Show me some samples of your writing.

The year you’re interviewing, go through your old papers and select the best ones, retyping them if necessary, so you’ll have samples if you’re asked for them. Show interviewers essays, reports, or business documents, not poetry or song lyrics.

If you don’t have samples at the interview, mail them to the interviewer immediately after the interview.

9. Where do you see yourself in five years?

Employers ask this question to find out if you are a self-starter or if you passively respond to what happens. You may want to have several scenarios for five years from now to use in different kinds of interviews. Or you may want to say, “Well, my goals may change as opportunities arise. But right now, I want to. . .”

10. What are your interests outside work? What campus or community activities have you been involved in?

While it’s desirable to be well-rounded, naming 10 interests is a mistake: The interviewer may wonder when you’ll have time to work.

If you mention your fiancé, spouse, or children in response to this question (“Well, my fiancé and I like to go sailing”), it is perfectly legal for the interviewer to ask follow-up questions (“What would you do if your spouse got a job offer in another town?”), even though the same question would be illegal if the interviewer brought up the subject first.

11. What have you done to learn about this company?

An employer may ask this to see what you already know about the company (if you’ve read the recruiting literature, the interviewer doesn’t need to repeat it). This question may also be used to see how active a role you’re taking in the job search and how interested you are in this job.

12. What adjectives would you use to describe yourself?

Use only positive ones. Be ready to illustrate each with a specific example of something you’ve done.

13. What is your greatest strength?

Employers ask this question to give you a chance to sell yourself and to learn something about your values. Pick a strength related to work, school, or activities: “I’m good at working with people.” “I really can sell things.” “I’m good at solving problems.” “I learn quickly.” “I’m reliable. When I say I’ll do something, I do it.” Be ready to illustrate each with a specific example of something you’ve done.

14. What is your greatest weakness?

Use a work-related negative, even if something in your personal life really is your greatest weakness. Interviewers won’t let you get away with a “weakness” like being a workaholic or just not having any experience yet. Instead, use one of the following three strategies:

- Discuss a weakness that is not related to the job you’re being considered for and which will not be needed even when you’re promoted. End your answer with a positive that *is* related to the job:

[For a creative job in advertising:] I don’t like accounting. I know it’s important, but I don’t like it. I even hire someone to do my taxes. I’m much more interested in being creative and working with people, which is why I find this position interesting.

[For a job in administration:] I don’t like selling products. I hated selling cookies when I was a Girl Scout. I’d much rather work with ideas—and I really like selling the ideas that I believe in.

If you’re asked an illegal interview question, Rochelle Kaplan advises that you figure out what job-related concern it may mask and allay that concern.

Among the worst questions members of the Women’s Professional Network group on LinkedIn cited being asked were

- Would you rather fight a tiger or a shark?
- How many gas stations are located in the U.S.?
- I only brought you in because we need to interview some women for this position. Oh, and can you fill out that EEOC form on your way out?
- Would you feel comfortable attending functions in the all-white section of the city?

While some such questions may be legitimate ones for stress interviews, they come loaded with the potential to baffle or offend regardless. Some invite legal repercussions.

Source: Shlomo Sprung, “LinkedIn Users Share the 15 Most Ridiculous Interview Questions They’ve Ever Been Asked,” July 13, 2012, <http://www.businessinsider.com/the-worst-interview-questions-ever-asked-2012-7>.

Benefits, working conditions, and the work itself are just as important as salary in evaluating job offers.

"Of course, we don't have much of a retirement plan."

Essential Job Interview
English II has good advice for everyone.

b. Discuss a weakness that you are working to improve:

In the past, I wasn't a good writer. But last term I took a course in business writing that taught me how to organize my ideas and how to revise. I may never win a Pulitzer Prize, but now I'm a lot more confident that I can write effective reports and memos.

c. Discuss a work-related weakness:

I procrastinate. Fortunately, I work well under pressure, but a couple of times I've really put myself in a bind.

15. Why are you looking for another job?

Stress what you're looking for in a new job, not why you want to get away from your old one.

If you were fired, say so. There are four acceptable ways to explain why you were fired:

- You lost your job, along with many others, when the company downsized due to economic reasons.
- It wasn't a good match. Add what you now know you need in a job, and ask what the employer can offer in this area.
- You and your supervisor had a personality conflict. Make sure you show that this was an isolated incident, and that you normally get along well with people.
- You made mistakes, but you've learned from them and are now ready to work well. Be ready to offer a specific anecdote proving that you have indeed changed.

16. What questions do you have?

This gives you a chance to cover things the interviewer hasn't brought up; it also gives the interviewer a sense of your priorities and values. Don't focus on salary or fringe benefits. Better questions are

- What would I be doing on a day-to-day basis?
- What kind of training program do you have? If, as I'm rotating among departments, I find that I prefer one area, can I specialize in it when the training program is over?
- How do you evaluate employees? How often do you review them? Where would you expect a new trainee (banker, staff accountant) to be three years from now?
- What happened to the last person who had this job?

Negotiating Salary and Benefits

LO 29-5

The best time to negotiate for salary and benefits is after you have the job offer. Try to delay discussing salary early in the interview process, when you're still competing against other applicants.

Useful Sites for Negotiating Salary

www.wageweb.com

Detailed salary data for several fields

www.salary.com

Median, high, low salary data, searchable by job and city

www.datamasters.com

Cost of living in various cities

Prepare for salary negotiations by finding out what the going rate is for the kind of work you hope to do. Cultivate friends in the workforce to find out what they're making. If your campus has a placement office, ask what last year's graduates got. Check websites and trade journals for salaries, often segmented into entry-level, median, and high salaries and even by city. Research is crucial. Budgets for salaries among large companies may be stagnant or growing feebly. Consulting firm Mercer expects raises to average 2.9% in 2013, up slightly from 2.7% in both 2011 and 2012 but still below inflation.

If the interviewer asks you about your salary requirements before a job offer has been made, try this response: "I'm sure your firm can pay me what I'm worth." Then either ask about pay ranges or go back to your qualifications for the job. If the interviewer demands a response, give a range using specific increments based on your research: "I'd expect to make between \$37,300 and \$41,900." As you say this, *watch the interviewer*. If he or she has that blank look we use to hide dismay, you may have asked for much more than the company was planning to offer. Quickly continue, ". . . depending, of course, on fringe benefits and how quickly I could be promoted. However, salary isn't the most important criterion for me in choosing a job, and I won't necessarily accept the highest offer I get. I'm interested in going somewhere where I can get good experience and use my talents to make a real contribution."

The best way to get more money is to convince the employer you're worth it. During interviews, show what you can do that the competition can't. Work to redefine the position in the employer's eyes from a low-level, anybody-could-do-it job to a complex combination of duties that only someone with your particular mix of talents could do.

After you have the offer, begin negotiating salary and benefits. You're in the strongest position when (1) you've done your homework and know what the usual salary and benefits are and (2) you can walk away from this offer if it doesn't meet your needs. Again, avoid naming a specific salary. Don't say you can't accept less. Instead, Kate Wendleton suggests, say you "would find it difficult to accept the offer" under the terms first offered.

Negotiate a package, not just a starting salary. A company that truly can't pay any more money now might be able to review you for promotion sooner than usual, pay your moving costs, or give you a better job title. Some companies offer fringe benefits that may compensate for lower taxable income: use of a company car, reimbursements for education, child care or elder care subsidies, or help in finding a job for your spouse or partner. And think about your career, not just the initial salary. Sometimes a low-paying job that will provide superb experience will do more for your career (and your long-term earning prospects) than a high salary now with no room to grow.

Work toward a win-win solution. You want the employer to be happy that you're coming on board and to feel that you've behaved maturely and professionally.

Once you're on the job, learn to "sell yourself" when seeking a raise. Network to keep track of what your skills and experience are worth in the marketplace; update your résumé at least once a year. Stay abreast of changes in the marketplace, including the effects of globalization on jobs in your field. Deb Koen recommends this strategy for asking for a raise:

- Build a solid business case for yourself, focusing on your value in dollars.
- Analyze your manager's style to work with him or her for a productive negotiation.
- Know your bottom line, including what you want and what you might do if you don't get it.

Jason Fried of 37signals, a Chicago-based software firm, advises hiring managers to screen out interviewees who ask "how" questions in favor of those that ask "why" questions, which indicate independent thinking.

Source: "Hiring Tool Kit 2011: The Best and Worst Interview Questions," Inc., downloaded on August 11, 2012, at <http://www.inc.com/ss/best-and-worst-interview-questions#9>.

- How are interest rates (a new product from competitors, imports, demographic trends, government regulation, etc.) affecting your company?
- How would you describe the company's culture?
- This sounds like a great job. What are the drawbacks?

Increasingly, candidates are asking about work-life balance and about the control they'll have over their own work:

- Do people who work for you have a life off the job?
- If my job requires too much travel, can I change without doing serious damage to my career?
- What support can you offer my significant other?
- Do you offer flextime?
- How much pressure do you have to achieve your projects? How much freedom is there to extend a deadline?⁷

You won't be able to anticipate every question you may get. (One interviewer asked applicants, "What vegetable would you like to be?" Another asked, "If you were a cookie, what kind of cookie would you be?"⁸) Check with other people who have interviewed recently to find out what questions are being asked in your field.

How can I prepare for behavioral and situational interviews? **LO 29-6**

Raises are usually set as a percentage of your current salary. If you work for 40 years, getting an extra \$2,000 in salary on your first job could yield \$15,000 of extra income in compounded raises. Similarly, when you enter the job market can have a profound effect on your income. For example, Yale University's Lisa Kahn studied how white men fared with regard to the 1980s recession. In reviewing the numbers, she found that a man graduating in December 1982, when unemployment was 10.8%, averaged 23% less his first year out of college and 6.6% less 18 years later than a man graduating in May 1981, when unemployment was 7.5%. The difference in dollars? \$100,000.

Source: Christine Larson, "Why the Wage Gap?" *Executive Female*, April/May 2002, 27; and Sam Murray, "The Curse of the Class of 2009," *The Wall Street Journal*, May 9, 2009, <http://online.wsj.com/article/SB124181970915002009.html>.

► *Think about skills you've used that could transfer to other jobs.*

► *Learn as much as you can about the culture of the company you hope to join.*

Many companies are now using behavioral or situational interviews. **Behavioral interviews** ask the applicant to describe actual behaviors, rather than plans or general principles. Thus, instead of asking, "How would you motivate people?" the interviewer might ask, "Tell me what happened the last time you wanted to get other people to do something." Follow-up questions might include, "What exactly did you do to handle the situation? How did you feel about the results? How did the other people feel? How did your superior feel about the results?" In your answer,

- Describe the situation.
- Tell what you did.
- Describe the outcome.
- Show that you understand the implications of what you did and how you might modify your behavior in other situations.

For example, if you did the extra work yourself when a team member didn't do his or her share, does that fact suggest that you prefer to work alone? If the organization you're interviewing with values teams, you may want to go on to show why doing the extra work was appropriate in that situation but that you can respond differently in other situations.

Figure 29.4 lists common behavioral interview questions.

Situational interviews put you in a situation that allows the interviewer to see whether you have the qualities the company is seeking. For example, Southwest Airlines found that 95% of the complaints it received were provoked by only 5% of its personnel. When managers explored further, they found that these 5% of employees were self-centered. To weed out self-centered applicants, Southwest now puts several candidates into a room and asks each to give a five-minute speech on "Why I Want to Work with Southwest Airlines." But the interviewers watch the *audience* to hire the people who are pulling for other speakers to do well, as opposed to those who are only thinking about their own performance.⁹

Situational interviews may also be conducted using traditional questions but evaluating behaviors other than the answers. Greyhound hired applicants for its customer-assistance

Figure 29.4 Behavioral Interview Questions

- Describe a situation in which you
1. Created an opportunity for yourself in a job or volunteer position.
 2. Used writing to achieve your goal.
 3. Went beyond the call of duty to get a job done.
 4. Communicated successfully with someone you disliked.
 5. Had to make a decision quickly.
 6. Overcame a major obstacle.
 7. Took a project from start to finish.
 8. Were unable to complete a project on time.
 9. Used good judgment and logic in solving a problem.
 10. Worked under a tight deadline.
 11. Worked with a tough boss.
 12. Handled a difficult situation with a co-worker.
 13. Made an unpopular decision.
 14. Gave a presentation.
 15. Worked with someone who wasn't doing his or her share of the work.

center who made eye contact with the interviewer and smiled at least five times during a 15-minute interview.¹⁰

How can I prepare for phone or video interviews? **LO 29-7**

► *Practice short answers. Retape until you look good.*

Try to schedule phone interviews for home, not work, and for a time when things will be quiet. If a company wants to interview you on the spot, accept only if the timing is good. If it isn't, say so: "We just sat down to dinner. Could you call back in 30 minutes?" Then get your information about the company, ask the kids to be quiet, and get your thoughts in order.

To prepare for a phone interview,

- Tape yourself so you can make any adjustments in pronunciation and voice qualities.
- Practice short answers to questions. After giving a short answer in the interview, say, "Would you like more information?" Without a visual channel, you can't see the body language that tells you someone else wants to speak.

Two kinds of video interviews exist. The first kind is a live interview using videoconferencing equipment. For this kind of interview, use the same guidelines for a phone interview. In the second kind, the company sends a list of questions, asking the applicant to tape the responses.

If you're asked to prepare a videotape,

- Practice your answers.
- Tape the interview as many times as necessary to get a tape that presents you at your best.
- Be specific. Since the employer can't ask follow-up questions, you need to be detailed about how your credentials could help the employer.

For both interviews, smile when you talk to put more energy into your voice.

While virtual interviews through Skype and other tools are making it easier for companies and job applicants to connect, they're also creating problems. Recruiter Kelly Yang points out that early on, people seemed more professional with the technology, but she now sees other behaviors, such as connections becoming unstable during a tough question only to come back online minutes later—along with a perfect answer to the question. According to Yang, people are also checking out their teeth, applying makeup, adjusting bra straps, flipping their hair repeatedly, and even browsing the Internet or chatting with friends during interviews, all while being observed. One interviewee apparently had his parents just off camera holding up signs with answers.

Source: Kelly Yang, "Virtual Job Interview," *The New York Times*, November 3, 2011, <http://www.nytimes.com/2011/11/04/opinion/virtual-job-interview.html>.

Summary of Learning Objectives

- Develop an overall strategy based on your answers to these three questions: **(LO 29-1)**
 1. What two to five facts about yourself do you want the interviewer to know?
 2. What disadvantages or weaknesses do you need to overcome or minimize?
 3. What do you need to know about the job and the organization to decide whether or not you want to accept this job if it is offered to you?
- Wear a conservative business suit to the interview. **(LO 29-2)**
- Bring an extra copy of your résumé, something to write on and write with, and copies of your work to the interview. **(LO 29-2)**
- Record the name of the interviewer, what the interviewer liked about you, any negative points that came up, answers to your questions about the company, and when you'll hear from the company. **(LO 29-2)**
- Rehearse in advance everything you can. Ask a friend to interview you. If your campus has videotaping facilities, watch yourself on tape so you can evaluate and modify your interview behavior. **(LO 29-3)**
- Be your best self at the interview. **(LO 29-3)**
- Successful applicants know what they want to do, use the company name in the interview, have researched the company in advance, back up claims with specifics, use technical jargon, ask specific questions, and talk more of the time. **(LO 29-4)**
- As you practice answers to questions you may be asked, choose answers that fit your qualifications and your interview strategy. **(LO 29-4)**
- The best time to negotiate for salary and benefits is after you have the offer. **(LO 29-5)**
- Prepare for salary negotiations by finding out what the going rate is for the work you hope to do. **(LO 29-5)**
- Useful websites for salary information include www.wageweb.com, www.salary.com, and www.datamasters.com. **(LO 29-5)**
- **Behavioral interviews** ask the applicant to describe actual behaviors, rather than plans or general principles. **(LO 29-6)**
- To answer a behavioral question, describe the situation, tell what you did, describe the outcome, and show that you understand the implications of what you did and how you might modify that action in other situations. **(LO 29-6)**
- **Situational interviews** put you in a situation that allows the interviewer to see whether you have the qualities the company is seeking. **(LO 29-6)**
- For a phone interview, give short answers. Then ask, “Would you like more information?” **(LO 29-7)**
- If you answer questions on videotape, retape as many times as necessary to show your best self. **(LO 29-7)**

Assignments for Module 29

Questions for Comprehension

- 29.1** What three questions should form the basis for an interview strategy? **(LO 29-1)**
- 29.2** How do you use your interview strategy during an interview? **(LO 29-2)**
- 29.3** How do successful interviewees communicate? **(LO 29-4)**

Questions for Critical Thinking

- 29.4** What are your greatest strengths? How can you demonstrate them during an interview? **(LO 29-3, LO 29-4)**
- 29.5** What are your weaknesses? How will you deal with them if they come up during an interview? **(LO 29-3, LO 29-4)**
- 29.6** What are your options if you are asked what you believe is an illegal interview question? Which option seems best to you? Why? **(LO 29-3, LO 29-4)**
- 29.7** Is it unethical to practice answering interview questions, so that you come across as very poised at an interview? **(LO 29-3, LO 29-4)**

Exercises and Problems

29.8 Interviewing Job Hunters (LO 29-3, LO 29-4)

Talk to students at your school who are interviewing for jobs this term. Possible questions to ask them include

- What field are you in? How good is the job market in that field this year?

- What questions have you been asked at job interviews? Were you asked any stress or sexist questions? Any really oddball questions?
- What answers seemed to go over well? What answers bombed?

- Were you asked to take any tests (skills, physical, drugs)?
- How long did you have to wait after a first interview to learn whether you were being invited for an office visit? How long after an office visit did it take to learn whether you were being offered a job? How much time did the company give you to decide?
- What advice would you have for someone who will be interviewing next term or next year?

29.9 Interviewing an Interviewer (LO 29-3, LO 29-4)

Talk to someone who regularly interviews candidates for entry-level jobs. Possible questions to ask include the following:

- How long have you been interviewing for your organization? Does everyone on the management ladder at your company do some interviewing, or do people specialize in it?
- Do you follow a set structure for interviews? What are some of the standard questions you ask?
- What are you looking for? How important are (1) good grades, (2) leadership roles in extracurricular groups, or (3) relevant work experience? What advice would you give to someone who doesn't have one or more of these?
- What are the things you see students do that create a poor impression? Think about the worst candidate you've interviewed. What did he or she do (or not do) to create such a negative impression?

29.10 Preparing an Interview Strategy (LO 29-3, LO 29-4)

Based on your analysis for Problems 27.8 and 27.9, prepare an interview strategy.

1. List two to five things about yourself that you want the interviewer to know before you leave the interview.
2. Identify any weaknesses or apparent weaknesses in your record and plan ways to explain them or minimize them.

29.11 Preparing Answers to Behavioral Interview Questions (LO 29-4 to LO 29-6)

Answer the questions in Figure 29.4.

As Your Instructor Directs,

- a. Share your answers with a small group of other students.

29.12 Preparing Questions to Ask Employers (LO 29-4 to LO 29-6)

Prepare a list of questions to ask at job interviews.

1. Prepare a list of three to five general questions that apply to most employers in your field.
2. Prepare two to five specific questions for each of the three companies you are most interested in.

As Your Instructor Directs,

- a. Summarize your findings in a memo to your instructor.
- b. Report your findings orally to the class.
- c. Join with a small group of students to write a group report describing the results of your survey.

- What are the things that make a good impression? Recall the best student you've ever interviewed. Why did he or she impress you so much?
- How does your employer evaluate and reward your success as an interviewer?
- What advice would you have for someone who still has a year or so before the job hunt begins?

As Your Instructor Directs,

- a. Summarize your findings in a memo to your instructor.
- b. Report your findings orally to the class.
- c. Join with a small group of students to write a group report describing the results of your survey.
- d. Write to the interviewer thanking him or her for taking the time to talk to you.

3. List the points you need to learn about an employer to decide whether to accept an office visit or plant trip.

As Your Instructor Directs,

- a. Share your strategy with a small group of other students.
- b. Describe your strategy in a memo to your instructor.
- c. Present your strategy orally to the class.

- b. Present your answers in a memo to your instructor, and explain why you've chosen the examples you describe.

- c. Present your answers orally to the class.

As Your Instructor Directs,

- a. Share the questions with a small group of other students.
- b. List the questions in a memo to your instructor.
- c. Present your questions orally to the class.

Polishing Your Prose

Using a Dictionary

Like any tool, a dictionary has many uses. It shows how to spell words, defines them, details pronunciation, and sometimes, like a thesaurus, gives synonyms.

But using dictionaries can be challenging for non-native speakers of English. To look up words, you must first know their spelling, or at least be close enough. Definitions may have words the reader does not know, and several definitions may exist—which is the one you want? Slang terms may be missing, as well as idiomatic expressions.

Two different kinds exist. Most are *descriptive*, meaning they explain how words *are* used, including slang and other nonstandard usages. Other dictionaries are *prescriptive*, telling how editors think words *should* be used. For instance, “verbal” in a descriptive dictionary would mean spoken, not written words. “Verbal” in a prescriptive dictionary would mean using words.

The type of dictionary is usually shown in the introduction or preface.

Well-meaning foreign language dictionaries may prescribe words and phrases that are out of date or too formal.

Lastly, dictionaries come in all shapes and sizes. A portable pocket dictionary is unlikely to be as comprehensive as a 700-page college edition, which may be impractical for students to carry around.

Use these questions to evaluate a dictionary:

- Is it descriptive or prescriptive?
- Do the definitions make sense to you?

- Are common and uncommon terms in your field of study defined?
- Does your English instructor find it appropriate for the class?
- If you are using a foreign language dictionary, share some of the definitions with native speakers of English. Do they agree with the definitions?

Exercises

Compare and contrast the definitions of the following words in both prescriptive and descriptive dictionaries. Which definition for each do you prefer and why?

1. Bond
2. Pound
3. Tweet
4. Forward
5. Smart
6. Android
7. Market
8. Overnight
9. Raise
10. Promote

Check your answers to the odd-numbered exercises at the back of the book.

Follow-Up Letters and Calls and Job Offers

LEARNING OBJECTIVES

What you do after a job interview is critical, and Module 30 suggests good strategies for continued success. After completing the module, you should be able to

- | | |
|---|--|
| LO 30-1 Apply strategies for follow-up phone calls and letters. | LO 30-3 Apply strategies for enthusiasm on the job. |
| LO 30-2 Solve dilemmas with job offers outside of your first choice. | LO 30-4 Develop behaviors for future job application success. |

What you do after the interview can determine whether you get the job. One woman wanted to switch from banking, where she was working in corporate relations, to advertising. The ad agency interviewer expressed doubts about her qualifications. Immediately after leaving the agency, she tracked down a particular book the interviewer had mentioned he was looking for but had been unable to find. She presented it to him—and was hired.¹

Xerox expects applicants for sales and repair positions to follow up within 10 days. If they don't, the company assumes that the person wouldn't follow up with clients.²

If the employer sends you an e-mail query, answer it promptly. You're being judged not only on what you say but on how quickly you respond.

Know, too, that today people must think in terms of careers rather than simply jobs. The world of work is constantly changing, and the days of a person retiring from the company where he or she started are all but gone. Today's worker must be agile, learning new skills and being open to better opportunities before old ones disappear. But instead of being mercenary, be self-reliant. Think of yourself as your best asset, and proceed ethically. Establish and keep good relationships with your employers. Start with the follow-up to your interview.

for examples of follow-up letters after an interview.

Employee recruiter Jenny Foss maintains that staying in touch after a job interview is critical and starts with asking what the next steps are before leaving. She also recommends connecting to the recruiter through LinkedIn.

Follow-Up Phone Calls

After a first interview, make follow-up phone calls to reinforce positives from the first interview, to overcome any negatives, and to get information you can use to persuade the interviewer to hire you.

What should I say in a follow-up phone call or letter? LO 30-1

► Reinforce positives and overcome any negatives.

After a first interview, make follow-up phone calls to reinforce positives from the first interview, to overcome any negatives, and to get information you can use to persuade the interviewer to hire you. Career coach Kate Wendleton suggests asking the following questions:

- “Is there more information I can give you?”
- “I’ve been giving a lot of thought to your project and have some new ideas. Can we meet to go over them?”
- “Where do I stand? How does my work compare with the work others presented?”³

A letter after an office visit is essential to thank your hosts for their hospitality as well as to send in receipts for your expenses. A well-written letter can be the deciding factor that gets you the job.⁴ The letter should

- Remind the interviewer of what he or she liked in you.
- Counter any negative impressions that may have come up at the interview.
- Use the jargon of the company and refer to specific things you learned during your interview or saw during your visit.
- Be enthusiastic.
- Refer to the next move, whether you’ll wait to hear from the employer or whether you want to call to learn about the status of your application.

Be sure the letter is well-written and error-free. One employer reports,

I often interviewed people whom I liked, . . . but their follow-up letters were filled with misspelled words and names and other inaccuracies. They blew their chance with the follow-up letter.⁵

Figure 30.1 is an example of a follow-up letter after an office visit.

What do I do if my first offer isn't the one I most want? LO 30-2

► Phone your first-choice employer to find out where you are on that list.

Some employers offer jobs at the end of the office visit. In other cases, you may wait for weeks or even months to hear. Employers almost always offer jobs orally. You must say something in response immediately, so plan some strategies.

If your first offer is not from your first choice, express your pleasure at being offered the job, but do not accept it on the phone. “That’s great! I assume I have two weeks to let you know?” Some companies offer “exploding” job offers that expire in one week or less,⁶ but most firms will give you two weeks.

Then *call* the other companies you’re interested in. Explain, “I’ve just got a job offer, but I’d rather work for you. Can you tell me what the status of my application is?” Nobody will put that information in writing, but almost everyone will tell you over the phone. With this information, you’re in a better position to decide whether to accept the original offer.

Some applicants have been successful in getting two weeks extended to several weeks or even months. Certainly if you cannot decide by the deadline, it is worth asking for more time: The worst the company can do is say *no*. If you do try to keep a company hanging, be prepared for weekly phone calls asking you if you’ve decided yet.

Make your acceptance contingent upon a written job offer confirming the terms. That letter should spell out not only salary but also fringe benefits and any special provisions you have negotiated. If something is missing, call the interviewer for clarification: “You said that I’d be reviewed for a promotion and higher salary in six months, but that isn’t in

Building a Critical Skill

Being Enthusiastic LO 30-3

Every employer wants employees who are enthusiastic about their work. Enthusiastic people seem more energetic than others; they're more fun to be around. The more enthusiasm you show, the better you'll do in job interviews and on the job itself.

It's easiest to show enthusiasm when you really feel it. Don't settle for "just a paycheck." In addition to meeting your financial needs, the ideal job would let you

- Use the skills you want to use.
- Work with the kind of people you want to be around.
- Work with a product, service, or idea that interests you.
- Have the level of responsibility you want.
- Build knowledge and skills so you'll be even more employable in the future.
- Achieve a goal that matters.

While you may not get all of these factors in a single job offer, you probably can get the ones that matter most to you—if you know what they are.

Seeming enthusiastic is easy for some outgoing people. If you're naturally shy or reserved, showing your enthusiasm may feel like "acting" at first. If you're reserved,

- Smile.
- Lean forward as you talk.
- Put lots of energy into your voice. Vary pace, tone, and volume.
- Use energy in body movements. Gesture while you sit still. Walk quickly. (In some company cultures, run.)
- Let your comments show your interest. Show that you've done your homework. Volunteer to work on issues. Talk to people about issues informally as well as in meetings.
- Participate fully in games and activities designed to energize workers. Think of ways to showcase your talents to help energize others.

Southwest Airlines employees hold a pep rally marking Southwest's new service to Pittsburgh International Airport. Opportunities for employees to show enthusiasm can create excitement and help employees bond.

the letter." You have more power to resolve misunderstandings now than you will after six months or a year on the job.

When you've accepted one job, let the other places you visited know that you're no longer interested. Then they can go to their second choices. If you're second on someone else's list, you'll appreciate other candidates' removing themselves so the way is clear for you.

If you already have a job, you may decide to wait until your desired employer does offer you a job. Figure 30.2 is an example of a letter telling a company that the candidate is still interested.

Is there anything else I should do? LO 30-4

► *Reflect on your successes, keep good records, and be excited about your future!*

Getting the job you want is the start of your career or its next important phase. Celebrate your accomplishment—you deserve it. Later, take a few moments to reflect on things you might improve next time. Could you make your résumé or cover letter stronger? How might you even better prepare for future job interviews?

Start a file with the answers, and include copies of job application materials. Every three to six months, revisit the file to reflect and to update documents. Jot notes down about what you learn.

Know that you are a work in progress. Navigate your career course better by answering these questions periodically:

- How have your habits, expectations, and goals changed?
- What do you want from your job or career in the next year? Five years? Ten years?

The secret of success!

Follow-Up Letters

A letter after an office visit should

- Remind the interviewer of what he or she liked in you.
- Counter any negative impressions.
- Use the jargon of the company and refer to specifics from the visit.
- Be enthusiastic.
- Refer to the next move.

Some research suggests having "an easier to pronounce name" gives people an advantage in the workplace. Researchers at New York University and the University of Melbourne found that lawyers in particular, rose more quickly to higher positions in firms if their name fit the criteria. "The effect is not due merely to the length of a name or how foreign-sounding or unusual it is, but rather how easy it is to pronounce," said Simon Laham, lead author of the study, which reviewed Anglo, Asian, and Eastern and Western European names. Of course, people generally don't choose their own names, but they may have control over which form they use—a more formal and complex name, or one that is shortened to a simpler and acceptable nickname.

*Single-space your address,
date when you don't use letterhead.*

Mr. Adam Phillips
Benner Electronics
1715 Ridgeview Pkwy.
San Diego, CA 91325-5472

Dear Mr. Phillips:

Summarize situation Four weeks ago, I sent a résumé and job application letter to Benner Electronics for the position of Regional Sales Manager but have not heard from anyone. I wanted you to know I am still interested in the position and am available for an interview.

Since submitting my materials, I was awarded a "Gold Medal of Achievement" from my present employer for outstanding sales in April. I led the Orange County group in semiconductor sales, with more than 45,000 units sold for a total of \$81,700.

I would like to discuss how I might put my energy and enthusiasm to work as Benner Electronics' next Regional Sales Manager. If you would like to schedule an interview, please let me know.

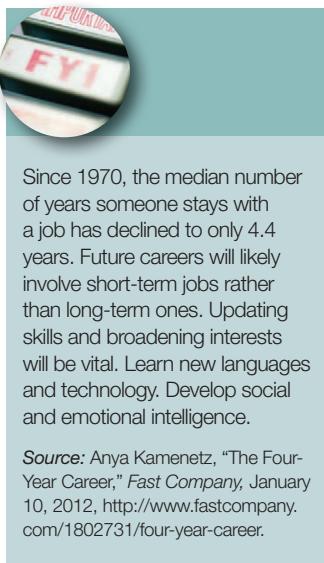

Sincerely,

Maria Alvarez

Maria Alvarez
714-555-1219

Writer's phone number.

Add achievements that occurred after you sent your résumé in.

- How has your job field changed, and what should you do to stay current in it?
- How committed are you to staying in your present career? If you want to change careers, why?

Always keep accurate records throughout the job application and follow-up process, including receipts. Some job hunting expenses are tax deductible. For instance, you might be able to claim postage, photocopying, or résumé preparation costs incurred if you are looking for a job in the same occupation as your last one.⁷ Be sure to consult the Internal Revenue Service or a tax expert for the final say on the matter.

Stay connected to your professional network. Stay in touch with people willing to give you good references. Make sure you have up-to-date contact information.

Thank the people who helped you—in writing whenever possible. Think about how you might help someone else when you have the opportunity.

Go do a great job!

Summary of Learning Objectives

- Use follow-up phone calls to reinforce positives from the first interview, to overcome any negatives, and to get information you can use to persuade the interviewer to hire you. (**LO 30-1**)
- A follow-up letter should (**LO 30-1**)
 - Remind the interviewer of what he or she liked in you.
 - Counter any negative impressions that may have come up at the interview.
 - Use the jargon of the company and refer to specific things you learned during your interview or saw during your visit.
 - Be enthusiastic.
 - Refer to the next move you'll make.
- If your first offer isn't from your first choice, call the other companies you're interested in to ask about the status of your application. (**LO 30-2**)
- To be more enthusiastic, (**LO 30-3**)
 - Smile.
 - Lean forward as you talk.
 - Put lots of energy into your voice.
 - Use energy in body movements.
 - Let your comments show your interest.
 - Participate fully in games and activities designed to energize workers.
- Once you get the job you want, reflect on your successes, keep good records, and be excited about your future. (**LO 30-4**)
- Check into whether any of your job-hunting expenses are tax deductible. (**LO 30-4**)
- Thank the people who helped you, and help someone else when you can. (**LO 30-4**)
- Go do a great job! (**LO 30-4**)

Assignments for Module 30

Questions for Comprehension

- 30.1** What should you do in a follow-up phone call? (**LO 30-1**)
30.2 What should you do in a follow-up letter? (**LO 30-1**)
30.3 What should you do if the first offer you get isn't from your first-choice employer? (**LO 30-2**)

- 30.4** Why should you phone rather than write or e-mail your first-choice employer after you've received another job offer? (**LO 30-2**)

Questions for Critical Thinking

- 30.5** Why is it important to get a job offer in writing before you accept it officially? (**LO 30-1 to LO 30-2**)
30.6 How could you counter a negative impression that came up during an interview? (**LO 30-1 to LO 30-3**)

- 30.7** Is it ethical for a quiet, reserved person to try to seem more enthusiastic? (**LO 30-3**)

Exercises and Problems

30.8 Writing a Follow-Up Letter after an Onsite Visit (LO 30-1, LO 30-2)

Write a follow-up e-mail message or letter after an onsite visit or plant trip. Thank your hosts for their hospitality; relate your strong points to things you learned about the

company during the visit; allay any negatives that may remain; be enthusiastic about the company; and submit receipts for your expenses so you can be reimbursed.

30.9 Clarifying the Terms of a Job Offer (LO 30-1, LO 30-2)

Last week, you got a job offer from your first-choice company, and you accepted it over the phone. Today, the written confirmation arrived. The letter specifies the starting salary and fringe benefits you had negotiated. However, during the

office visit, you were promised a 5% raise in six months. The job offer says nothing about the raise. You do want the job, but you want it on the terms you thought you had negotiated.

Write to your contact at the company, Eliza Raymono.

Polishing Your Prose

Who/Whom and I/Me

Even established writers sometimes get confused about when to use *who* versus *whom* and *I* versus *me*. These pronouns serve different functions in a sentence or part of a sentence.

Use *who* or *I* as the subject of a sentence or clause.

Correct: *Who* put the file on my desk? (*Who* did the action, *put*.)

Correct: Keisha and *I* gave the presentation at our annual meeting.

(Both *Keisha* and *I* did the action, *gave*.)

Correct: John, **who** just received a Ph.D. in management science, was promoted to vice president. (*Who* is the subject of the clause “who just received a Ph.D. in management science.”)

Use *whom* and *me* as the object of a verb or a preposition.

Correct: **Whom** did you write the report for? (*Whom* is the object of the preposition *for*.)

Correct: She recommended Thuy and **me** for promotions. (*Me* is an object of the verb *recommend*.)

Though some print sources may use *who* and *whom* interchangeably, stick to the rules until this practice becomes widely acceptable.

If you’re not sure whether a pronoun is being used as a subject or object, try substituting *he* or *him*. If *he* would work, the pronoun is a subject. If *him* sounds right, the pronoun is an object.

Correct: He wrote the report.

Correct: I wrote the report for him.

Exercises

Choose the correct word in each set of brackets.

1. With [who/whom] are you attending the annual meeting?
2. Delores asked Shannon and [I/me\} to pick Bella up from Sioux Gateway Airport.

3. Zach and [I/me] expected Jordyn to bring only the digital camera, but she brought a laptop, too.
4. I was wondering [who/whom] is expecting to take a vacation in July or August.
5. Loren Adelson let Kenji and [I/me] know that the marketing brochures arrived from Caspar Printing this morning.
6. Because Hawa and [I/me] can speak French, Mitch wants us to meet the Paris delegation for lunch on March 3.
7. No one was sure for [who/whom] the packages were intended, so Ron, Christina, and [I/me] took them back to the mail room.
8. Even though Phil, Tamara, Britney, and [I/me] will be at the company table, we are still waiting for a final list of [who/whom] is going to the awards dinner.
9. We thought we knew [who/whom] made the call, but it turns out Rachel and [I/me] wrote down two different names.
10. The photocopier requires people to key in [who/whom] is making copies, but Deepak and [I/me] were accidentally given the same access code.

Check your answers to the odd-numbered exercises at the back of the book.

Unit 7 Cases for Communicators

A Changing Curriculum

Many liberal arts colleges are blending job-specific education with a more traditional focus on developing skills like critical thinking and communication skills. Take Wake Forest University, for example, where students majoring in English or chemistry can also complete an Innovation, Creativity, and Entrepreneurship minor.

At Clark University, students can join the Liberal Education and Effective Practice (LEEP) program, where they get professional development coursework and plan internships and research opportunities during their freshman year. The LEEP program encourages students to begin thinking about their future careers early in their liberal arts education.

Not everyone is onboard with the changes. Some faculty members worry that focusing on job-specific education comes at the expense of teaching broader skills and will turn higher education into vocational training. Worse, the strategy may actually make future employees less effective by stifling their individuality. “When people start talking about employability,” warns Michael Roth, Wesleyan University president, “what they’re really talking about is conformity.”

Still others, like Davidson College’s Carol Quillen, see a balance as achievable, noting that adaptation can happen but “we

won’t change our curriculum based on what we would perceive as a transitory need for a particular skill.”

Individual Activity

Imagine you are preparing for your future career. Your task is to research all of the resources available at your college or university to use as job leads, information, networking possibilities, and informational sources for your field of study and to create a list of resources for yourself and other students. Use all information options available to you, including your department, professors, and campus library or career center. See what resources are available online as well as in person.

Before you begin your search, consider the following questions:

- What do I know about my future career?
- What education do I need for a job in that career?
- What minors or majors could complement my chosen field of study?
- What companies recruit from my college, and do they recruit people in my field of study?
- What social networking opportunities are there?
- What campus lectures or public programs bring experts to my campus?
- What alumni networks can I access?
- What other resources can I explore to find out about more opportunities in my field of study?

Source: Lauren Weber, “Colleges Get Career-Minded,” *The Wall Street Journal*, May 22, 2012, <http://online.wsj.com/article/SB10001424052702303448404577410592488795980.html>.

Group Activity

Imagine that you and your group will conduct an interview for a job opening. With members of your group, choose an industry to research and explore. Find a job posting that includes detailed descriptions of the position, required skills, and the hiring company. (You can find a job posting on an online job site or your local newspaper. Copy the postings and distribute them to each member of the group.)

Your task is then to come up with relevant questions to ask the potential interviewee.

Consider the following questions as you brainstorm:

- What are the necessary skills for the job?
- What kind of interview will you use for the applicant?
- What are some traditional interview questions you will ask?

When you finish, brainstorm with your group to come up with answers to your interview questions.

Glossary

A

Acknowledgment responses Nods, smiles, frowns, and words that let a speaker know you are listening.

Active listening Feeding back the literal meaning or the emotional content or both so that the speaker knows that the listener has heard and understood.

Active verb A verb that describes the action of the grammatical subject of the sentence.

Adjustment The response to a claim letter. If the company agrees to grant a refund, the amount due will be adjusted.

Analytical report A report that interprets information.

Assumptions Statements that are not proven in a report, but on which the recommendations are based.

B

Bar graph A visual consisting of parallel bars or rectangles that represent specific sets of data.

Behavioral interviews Job interviews that ask candidates to describe actual behaviors they have used in the past in specific situations.

Bias-free language Language that does not discriminate against people on the basis of sex, physical condition, race, age, or any other category.

Blind ads Job listings that do not list the company's name.

Blind copies Copies sent to other recipients that are not listed on the original letter or memo.

Block format In letters, a format in which the inside address, date, and signature block are lined up at the left margin.

Blocking Disagreeing with every idea that is proposed in a meeting.

Blogging Using a web log, or blog, to communicate on the Internet.

Body The main part of a letter, memo, or report.

Body language Nonverbal communication conveyed by posture and movement, eye contact, facial expressions, and gestures.

Boilerplate Language from a previous document that a writer includes in a new document. Writers use boilerplate both to save time and energy and to use language that has already been approved by the organization's legal staff.

Brainstorming A method of generating ideas by recording everything a person or a group thinks of, without judging or evaluating the ideas.

Branching question Question that sends respondents who answer differently to different parts of the questionnaire. Allows respondents to answer only those questions that are relevant to their experience.

Bridge A sentence that connects the attention-getter to the body of a letter.

Buffer A neutral or positive statement designed to allow the writer to bury, or buffer, the negative message.

Build goodwill To create a good image of yourself and of your organization—the kind of image that makes people want to do business with you.

Bullets Large round dots or squares that set off items in a list. When you are giving examples, but the number is not exact and the order does not matter, use bullets to set off items.

Business slang Terms that have technical meaning but are used in more general senses. Used sparingly, these terms are appropriate in job application letters and in messages for people in the same organization who are likely to share the vocabulary.

Businessesese A kind of jargon including unnecessary words. Some words were common 200 to 300 years ago but are no longer part of spoken English. Some have never been used outside of business writing. All of these terms should be omitted.

Buying time with limited agreement Agreeing with the small part of a criticism that one does accept as true.

C

Case The grammatical role a noun or pronoun plays in a sentence. The nominative case is used for the subject of a clause, the possessive to show who or what something belongs to, the objective case for the object of a verb or a preposition.

Channel The physical means by which a message is sent. Written channels include memos, letters, and billboards. Oral channels include phone calls, speeches, and face-to-face conversations.

Channel overload The inability of a channel to carry all the messages that are being sent.

Chartjunk Decoration that is irrelevant to a visual and that may be misleading.

Checking for feelings Identifying the emotions that the previous speaker seemed to be expressing verbally or nonverbally.

Checking for inferences Trying to identify the unspoken content or feelings implied by what the previous speaker has actually said.

Choice or selection The decision to include or omit information in a message.

Chronological résumé A résumé that lists what you did in a timeline, starting with the most recent events and going backward in reverse chronology.

Citation Attributing a quotation or other idea to a source in the body of the report.

Claim letter A letter seeking a replacement or refund.

Clear A message whose audience gets the meaning the writer or speaker intended.

Clip art Predrawn images that you can import into your newsletter, sign, or graph.

Close The ending of a document.

Closed or defensive body position Keeping the arms and legs crossed and close to the body. Suggests physical and psychological discomfort, defending oneself, and shutting the other person out.

Closed question Question with a limited number of possible responses.

Closure report A report summarizing completed research that does not result in action or recommendation.

Clowning Making unproductive jokes and diverting the group from its task.

Clustering A method of thinking up ideas by writing the central topic in the middle of the page, circling it, writing down the ideas that topic suggests, and circling them.

Collaborative writing Working with other writers to produce a single document.

Collection letter A letter asking a customer to pay for goods and services received.

Collection series A series of letters asking customers to pay for goods and services they have already received. Early letters in the series assume that the reader intends to pay but has forgotten or has met with temporary reverses. Final letters threaten legal action if the bill is not paid.

Comma splice or comma fault Using a comma to join two independent clauses. To correct, use a semicolon, add a coordinating conjunction, subordinate one of the clauses, or use a period and start a new sentence.

Common ground Values and goals that the writer and reader share.

Communication theory A theory explaining what happens when we communicate and where miscommunication can occur.

Complaint letter A letter that challenges a policy or tries to get a decision changed.

Complete A message that answers all of the audience's questions. The audience has enough information to evaluate the message and act on it.

Complex sentence Sentence with one main clause and one subordinate clause.

Complimentary close The words after the body of the letter and before the signature. *Sincerely* and *Cordially* are the most commonly used complimentary closes in business letters.

Compound sentence Sentence with two main clauses joined by a conjunction.

Conclusions Section of a report that restates the main points.

Conflict resolution Strategies for getting at the real issue, keeping discussion open, and minimizing hurt feelings so that people can find a solution that feels good to everyone involved.

Connotations The emotional colorings or associations that accompany a word.

Convenience sample A group of subjects to whom the researcher has easy access.

Conversational style Conversational patterns such as speed and volume of speaking, pauses between speakers, whether questions are direct or indirect. When different speakers assign different meanings to a specific pattern, miscommunication results.

Coordinating Planning work, giving directions, fitting together contributions of group members.

Coordination The third stage in the life of a task group, when the group finds, organizes, and interprets information and examines alternatives and assumptions. This is the longest of the four stages.

Correct Used to describe a message that is accurate and free from errors in punctuation, spelling, grammar, word order, and sentence structure.

Credibility The audience's response to the source of the message.

Criteria The standards used to evaluate or weigh the factors in a decision.

Critical incident An important event that illustrates a subordinate's behavior.

Cropping Cutting a photograph to fit a specific space. Also, photographs are cropped to delete visual information that is unnecessary or unwanted.

Culture The unconscious patterns of behavior and beliefs that are common to a people, nation, or organization.

Cycling The process of sending a document from writer to superior to writer to yet another superior for several rounds of revisions before the document is approved.

D

Dangling modifier A phrase that modifies a word that is not actually in a sentence. To correct a dangling modifier, recast the modifier as a subordinate clause or revise the sentence so its subject or object can be modified by the now dangling phrase.

Data Facts or figures from which conclusions can be drawn.

Decode To extract meaning from symbols.

Decorative visual A visual that makes the speaker's points more memorable but that does not convey numerical data.

Defensive or closed body position Keeping the arms and legs crossed and close to the body. Suggests physical and psychological discomfort, defending oneself, and shutting the other person out.

Demographic characteristics Measurable features of an audience that can be counted objectively: age, sex, race, education level, income, and so on.

Denotation A word's literal or "dictionary" meaning. Most common words in English have more than one denotation.

Context usually makes it clear which of several meanings is appropriate.

Dependent clause A group of words that contains a subject and a verb but cannot stand by itself as a complete sentence.

Descriptors Words describing the content of an article. Used to permit computer searches for information on a topic.

Dingbats Small symbols such as arrows, pointing fingers, and so forth that are part of a typeface.

Direct request A pattern of organization that makes the request directly in the first and last paragraphs.

Directed subject line A subject line that makes clear the writer's stance on the issue.

Discourse community A group of people who share assumptions about what channels, formats, and styles to use for communication; what topics to discuss and how to discuss them; and what constitutes evidence.

Document design The process of writing, organizing, and laying out a document so it can be easily used by the intended audience.

Documentation Providing full bibliographic information so interested readers can go to the original source of material used in a report.

Dominating Trying to run a group by ordering, shutting out others, and insisting on one's own way.

E

Early letter A collection letter that is gentle. An early letter assumes that the reader intends to pay but has forgotten or has met with temporary reverses.

Editing Checking the draft to see that it satisfies the requirements of good English and the principles of business writing. Unlike revision, which can produce major changes in meaning, editing focuses on the surface of writing.

Ego-involvement The emotional commitment the audience has to its position.

Elimination of alternatives A pattern of organization for reports that discusses the problem and its causes, the impractical solutions and their weaknesses, and finally the solution the writer favors.

Emotional appeal Making the audience want to do what the writer or speaker asks.

Empathy The ability to put oneself in someone else's shoes, to *feel with* that person.

Encode To put ideas into symbols.

Enunciate To voice all the sounds of each word while speaking.

Evaluating Measuring the draft against your goals and the requirements of the situation and audience. Anything produced during each stage of the writing process can be evaluated, not just the final draft.

Evidence Facts or data the audience already accepts.

Exaggeration Making something sound bigger or more important than it really is.

Executive summary A summary of a report, specifying the recommendations and the reasons for them.

Expectancy theory A theory that argues that motivation is based on the expectation of being rewarded for performance and the importance of the reward.

External audiences Audiences who are not part of the writer's organization.

External documents Documents that go to people in another organization.

External report Report written by a consultant for an organization of which he or she is not a permanent employee.

Extrinsic benefits Benefits that are "added on"; they are not a necessary part of the product or action.

Eye contact Looking another person directly in the eye.

F

Feasibility study A report that evaluates two or more possible alternatives and recommends one of them. Doing nothing is always one alternative.

Feedback The receiver's response to a message.

Figure Any visual that is not a table.

Fixed typeface A typeface in which each letter has the same width on the page. Sometimes called *typewriter typeface*.

Flaming Sending out an angry e-mail message before thinking about the implications of venting one's anger.

Focus groups Small groups who come in to talk with a skilled leader about a potential product.

Forced choice A choice in which each item is ranked against every other item. Used to discover which of a large number of criteria are crucial.

Form letter A letter that is sent unchanged or with only minor modifications to a large number of readers.

Formal meetings Meetings run under strict rules, such as the rules of parliamentary procedure summarized in *Robert's Rules of Order*.

Formal report A report containing formal elements such as a title page, a transmittal, a table of contents, and an abstract.

Formalization The fourth and last stage in the life of a task group, when the group makes and formalizes its decision.

Format The parts of a document and the way they are arranged on a page.

Formation The second stage in the life of a task group, when members choose a leader and define the problem they must solve.

Freewriting A kind of writing uninhibited by any constraints. Freewriting may be useful in overcoming writer's block, among other things.

G

Gatekeeper The audience with the power to decide whether your message is sent on to other audiences. Some gatekeepers are also initial audiences.

Gathering Physically getting the background data you need. It can include informal and formal research or simply getting the letter to which you're responding.

General slang Words or phrases such as *awesome, smokin'*, or *at the end of my rope* that are sometimes used in conversations and in presentations, but are not appropriate in business and administrative writing since they appear sloppy or imprecise.

Generations People grouped by years of birth and often sharing characteristics as defined by events and practices of their time. The three sizable generations today are the Baby Boomers, Generation X, and Millennials (also known as Generation Y or the Internet Generation).

Gerund The -*ing* form of a verb; grammatically, it is a verb used as a noun.

Getting feedback Asking someone else to evaluate your work. Feedback is useful at every stage of the writing process, not just during composition of the final draft.

Glossary A list of terms used in a report with their definitions.

Goodwill The value of a business beyond its tangible assets, including its reputation and patronage. Also, a favorable condition and overall atmosphere of trust that can be fostered between parties conducting business.

Goodwill ending Shift of emphasis away from the message to the reader. A goodwill ending is positive, personal, and forward-looking and suggests that serving the reader is the real concern.

Goodwill presentation A presentation that entertains and validates the audience.

Grammar checker Software program that flags errors or doubtful usage.

Grapevine The informal informational network in an organization, which carries gossip and rumors as well as accurate information.

Ground rules Procedural rules adopted by groups to make meetings run smoothly.

Groupthink The tendency for a group to reward agreement and directly or indirectly punish dissent.

Guided discussion A presentation in which the speaker presents the questions or issues that both speaker and audience have agreed on in advance. Instead of functioning as an expert with all the answers, the speaker serves as a facilitator to help the audience tap its own knowledge.

H

Headings Words or short phrases that group points and divide your letter, memo, or report into sections.

Hearing Perceiving sounds.

Hidden job market Jobs that are never advertised but may be available or may be created for the right candidate.

Hidden negatives Words that are not negative in themselves, but become negative in context.

High-context culture A culture in which most information is inferred from the context, rather than being spelled out explicitly in words.

Histogram A bar graph using pictures, asterisks, or points to represent a unit of the data.

Hot buttons Issues to which the audience has a strong emotional response.

Hyperlinks Web page links to another location or page.

I

Impersonal expression A sentence that attributes actions to inanimate objects, designed to avoid placing blame on a reader.

Indented format A format for résumés in which items that are logically equivalent begin at the same horizontal space, with carryover lines indented three spaces. Indented format emphasizes job titles.

Independent clause A group of words that can stand by itself as a complete sentence.

Infinitive The form of the verb that is preceded by *to*.

Inform To explain something or tell the audience something.

Informal meetings Loosely run meetings in which votes are not taken on every point.

Informal report A report using the letter or memo format.

Information interview An interview in which you talk to someone who works in the area you hope to enter to find out what the day-to-day work involves and how you can best prepare to enter that field.

Information overload The inability of a human receiver to process all the messages he or she receives.

Information report A report that collects data for the reader but does not recommend action.

Informational messages In a group, messages focusing on the problem, data, and possible solutions.

Informative message Message to which the reader's basic reaction will be neutral.

Informative presentation A presentation that informs or teaches the audience.

Informative or talking heads Headings that are detailed enough to provide an overview of the material in the sections they introduce.

Initial audience The audience that assigns the message and routes it to other audiences.

Inside address The reader's name and address; put below the date and above the salutation in most letter formats.

Interactive presentation A conversation in which the seller uses questions to determine the buyer's needs, probe objections, and gain provisional and then final commitment to the purchase.

Intercultural competence The ability to communicate sensitively with people from other cultures and countries, based on an understanding of cultural differences.

Internal audiences Audiences in the writer's organization.

Internal document Document written for other employees in the same organization.

Internal documentation Providing information about a source in the text itself rather than in footnotes or endnotes.

Internal report Reports written by employees for use only in their organization.

Interpersonal communication Communication between people.

Interpersonal messages In a group, messages promoting friendliness, cooperation, and group loyalty.

Interpret To determine the significance or importance of a message.

Interview Structured conversation with someone who is able to give you useful information.

Intrinsic benefits Benefits that come automatically from using a product or doing something.

Introduction The part of a report that states the purpose and scope of the report. The introduction may also include limitations, assumptions, methods, criteria, and definitions.

J

Jargon There are two kinds of jargon. The first kind is the specialized terminology of a technical field. The second is businessese, outdated words that do not have technical meanings and are not used in other forms of English.

Judgment sample A group of subjects whose views seem useful.

Justification report Report that justifies the need for a purchase, an investment, a new personnel line, or a change in procedure.

Justified margins Margins that end evenly on the right side of the page.

K

Keywords or descriptors Words describing the content of an article used to permit computer searches for information on a topic.

L

Late letter A collection letter that threatens legal action if the bill is not paid.

Letter Short document using block or modified block format that goes to readers outside your organization.

Letterhead Stationery with the organization's name, logo, address, and telephone number printed on the page.

Limitations Problems or factors that limit the validity of the recommendations of a report.

Line graph A visual consisting of lines that show trends or allow the viewer to interpolate values between the observed values.

Listening Decoding and interpreting sounds correctly.

Low-context culture A culture in which most information is conveyed explicitly in words rather than being inferred from context.

M

Main or independent clause A group of words that can stand by itself as a complete sentence.

Maslow's hierarchy of needs Five levels of human need posited by Abraham H. Maslow. They include physical needs, the need for safety and security, for love and belonging, for esteem and recognition, and for self-actualization.

Mean The average. Found by adding up all the numbers and dividing by the number of numbers.

Median The middle number in a series arranged in order of magnitude.

Memo Document using memo format sent to readers in your organization.

Methods section The section of a report or survey describing how the data were gathered.

Middle letter A collection letter that is more assertive than an early letter. Middle letters may offer to negotiate a schedule for repayment if the reader is not able to pay the whole bill immediately, remind the reader of the importance of good credit, educate the reader about credit, or explain why the creditor must have prompt payment.

Minutes Records of a meeting, listing the items discussed, results of votes, and persons responsible for follow-up steps.

Misplaced modifier A word or phrase that appears to modify another element of the sentence than the writer intended.

Mixed punctuation Using a colon after the salutation and a comma after the complimentary close in a letter.

Mode The most frequent number in a series of numbers.

Modified block format A letter format in which the inside address, date, and signature block are lined up with each other one-half or one-third of the way over on the page.

Modifier A word or phrase giving more information about another word in a sentence.

Monochronic culture Culture that treats time as a limited resource and emphasizes efficiency.

Monologue presentation A presentation in which the speaker speaks without interruption. The presentation is planned and is delivered without deviation.

Myers-Briggs Type Indicator A scale that categorizes people on four dimensions: introvert-extravert; sensing-intuitive; thinking-feeling; and perceiving-judging.

N

Negative message A message in which basic information conveyed is negative; the reader is expected to be disappointed or angry.

News release Messages that package information about a company and that the writer would like announced in local and national media.

Noise Any physical or psychological interference in a message.

Nominative case The grammatical form used for the subject of a clause. *I, we, he, she, and they* are nominative pronouns.

Nonagist Words, images, or behaviors that do not discriminate against people on the basis of age.

Nonracist Words, images, or behaviors that do not discriminate against people on the basis of race.

Nonrestrictive clause A clause giving extra but unessential information about a noun or pronoun. Because the information is extra, commas separate the clause from the word it modifies.

Nonsexist language Language that treats both sexes neutrally, that does not make assumptions about the proper gender for a job, and that does not imply that men are superior to or take precedence over women.

Nonverbal communication Communication that does not use words.

Normal interview A job interview with some questions that the interviewer expects to be easy, some questions that present an opportunity to showcase strong points, and some questions that probe any weaknesses evident from the résumé.

Noun-pronoun agreement Having a pronoun be the same number (singular or plural) and the same person (first, second, or third) as the noun it refers to.

O

Objective case The grammatical form used for the object of a verb or preposition. *Me, us, him, her, and them* are objective pronouns.

Omnibus motion A motion that allows a group to vote on several related items in a single vote. Saves time in formal meetings with long agendas.

Open body position Keeping the arms and legs uncrossed and away from the body. Suggests physical and psychological comfort and openness.

Open punctuation Using no punctuation after the salutation and the complimentary close.

Open question Question with an unlimited number of possible responses.

Organization The order in which ideas are arranged in a message.

Organizational culture The values, attitudes, and philosophies shared by people in an organization that shape its messages and its reward structure.

Orientation The first stage in the life of a task group, when members meet and begin to define their task.

Original or primary research Research that gathers new information.

P

Paired graphs Two or more simple stories juxtaposed to create a more powerful story.

Parallel structure Putting words or ideas that share the same role in the sentence's logic in the same grammatical form.

Paraphrase To repeat in your own words the verbal content of what the previous speaker said.

Passive verb A verb that describes action done to the grammatical subject of the sentence.

People-first language Language that names the person first, then the condition: "people with mental disability." Used to avoid implying that the condition defines the person's potential.

Perception The ability to see, to hear, to taste, to smell, to touch.

Performance appraisals Supervisors' written evaluations of their subordinates.

Personal space The distance someone wants between him- or herself and other people in ordinary, nonintimate interchanges.

Personalized A form letter that is adapted to the individual reader by including the reader's name and address and perhaps other information.

Persuade To motivate and convince the audience to act.

Persuasive presentation A presentation that motivates the audience to act or to believe.

Pie chart A circular chart whose sections represent percentages of a given quantity.

Pitch The highness or lowness of a sound. Low-pitched sounds are closer to the bass notes on a piano; high-pitched sounds are closer to the high notes.

Planning All the thinking done about a subject and the means of achieving your purposes. Planning takes place not only when devising strategies for the document as a whole, but also when generating "mini-plans" that govern sentences or paragraphs.

Polychronic culture Culture that emphasizes relationships rather than efficiency.

Population The group a researcher wants to make statements about.

Positive emphasis Focusing on the positive rather than the negative aspects of a situation.

Positive or good news message Message to which the reader's reaction will be positive.

Possessive case The grammatical form used to indicate possession or ownership. *My, our, his, hers, its, and their* are possessive pronouns.

Postal service abbreviations Two-letter abbreviations for states and provinces.

Prepositions Words that indicate relationships, for example, *with, in, under, at*.

Presenting problem The problem that surfaces as the subject of disagreement. The presenting problem is often not the real problem.

Primary audience The audience who will make a decision or act on the basis of a message.

Primary research Research that gathers new information.

Pro and con pattern A pattern of organization for reports that presents all the arguments for an alternative and then all the arguments against it.

Problem-solving persuasion A pattern of organization that describes a problem that affects the reader before offering a solution to the problem.

Procedural messages Messages focusing on a group's methods: how it makes decisions, who does what, when assignments are due.

Process of writing What people actually do when they write. Most researchers would agree that the writing process can include eight parts: planning, gathering, writing, evaluating, getting feedback, revising, editing, and proofreading.

Product of writing The final written document.

Progress report A statement of the work done during a period of time and the work proposed for the next period.

Proofreading Checking the final copy to see that it's free from typographical errors.

Proportional font A font in which some letters are wider than other letters (for example, *w* is wider than *i*).

Proposal Document that suggests a method for finding information or solving a problem.

Prospecting letter A job application letter written to companies that have not announced openings but where you'd like to work.

Psychographic data Human characteristics that are qualitative rather than quantitative: values, beliefs, goals, and lifestyles.

Psychological description Description of a product or service in terms of reader benefits.

Psychological reactance Phenomenon occurring when a reader reacts to a negative message by asserting freedom in some other arena.

Purpose statement The statement in a proposal or a report specifying the organizational problem, the technical questions that must be answered to solve the problem, and the rhetorical purpose of the report (to explain, to recommend, to request, to propose).

Q

Questionnaire A list of questions for people to answer in a survey.

R

Ragged right or unjustified margins Margins that do not end evenly on the right side of the page.

Random sample A sample for which each person of the population theoretically has an equal chance of being chosen.

Reader benefits Benefits or advantages that the reader gets by using the writer's services, buying the writer's products, following the writer's policies, or adopting the writer's ideas. Reader benefits can exist for policies and ideas as well as for goods and services.

Recommendation report A report that recommends action.

Recommendations Section of a report that specifies items for action.

Reference line A *subject line* that refers the reader to another document (usually a numbered one, such as an invoice).

Referral interview Interviews you schedule to learn about current job opportunities in your field and to get referrals to other people who may have the power to create a job for you. Useful for tapping into unadvertised jobs and the hidden job market.

Release date Date a report will be made available to the public.

Request To ask the audience to take an easy or routine action.

Request for proposal (RFP) A statement of the service or product that an agency wants; a bid for proposals to provide that service or product.

Respondents The people who fill out a questionnaire.

Response rate The percentage of subjects receiving a questionnaire who agree to answer the questions.

Restrictive clause A clause limiting or restricting the meaning of a noun or pronoun. Because its information is essential, no commas separate the clause from the word it restricts.

Résumé A persuasive summary of your qualifications for employment.

Reverse chronology Starting with the most recent job or degree and going backward. Pattern of organization used for chronological résumés.

Revising Making changes in the draft: adding, deleting, substituting, or rearranging. Revision can be changes in single words, but more often it means major additions, deletions, or substitutions, as the writer measures the draft against purpose and audience and reshapes the document to make it more effective.

RFP See *request for proposal*.

Rhetorical purpose The effect the writer or speaker hopes to have on the audience (to inform, to persuade, to build goodwill).

Rival hypotheses Alternate factors that might explain observed results.

Run-on sentence A sentence containing several main clauses strung together with *and*, *but*, *or*, *so*, or *for*.

S

Salutation The greeting in a letter. For example, “Dear Ms. Smith.”

Sample The portion of the population a researcher actually studies.

Sans serif Literally, *without serifs*. Typeface whose letters lack bases or flicks. Helvetica and Arial are examples of sans serif typefaces.

Saves the reader’s time The result of a message whose style, organization, and visual impact help the reader to read, understand, and act on the information as quickly as possible.

Scope statement A statement in a proposal or report specifying the subjects the report covers and how broadly or deeply it covers them.

Secondary audience The audience affected by the decision or action. These people may be asked by the primary audience to comment on a message or to implement ideas after they’ve been approved.

Secondary research Research retrieving data someone else gathered.

Sentence fragment A group of words that are not a complete sentence but that are punctuated as if they were a complete sentence.

Sentence outline An outline using complete sentences that lists the sentences proving the thesis and the points proving each of those sentences. A sentence outline is the basis for a summary abstract.

Serif The little extensions from the main strokes on the *r* and *g* and other letters. Times Roman and Courier are examples of serif typefaces.

Sexist interview A stress interview in which questions are biased against one sex. Many sexist questions mask a legitimate concern. The best strategy is to respond as you would to a stress question: rephrase it and treat it as a legitimate request for information.

Signpost An explicit statement of the place that a speaker or writer has reached: “Now we come to the third point.”

Simple sentence Sentence with one main clause.

Situational interviews Job interviews in which candidates are asked to describe what they would do in specific hypothetical situations.

Skills résumé A résumé organized around the skills you’ve used, rather than the date or the job in which you used them.

Slang See *business slang* and *general slang*.

Social Networking Tool Applications, generally web-based, that let users network, post messages, and share photos and videos. Facebook and MySpace are popular social networking tools. Spoke and LinkedIn are more specific to business. With Twitter, messages are limited to a maximum of 140 characters and are commonly viewed with a cell phone.

Solicited letter A job letter written when you know that the company is hiring.

Spell-checker Software program that flags possible errors in spelling.

Spot visuals Informal visuals that are inserted directly into text. Spot visuals do not have numbers or titles.

Stereotyping Putting similar people or events into a single category, even though significant differences exist.

Storyboard A visual representation of the structure of a document, with a rectangle representing each page or unit. An alternative to outlining as a method of organizing material.

Strategy A plan for reaching your specific goals with a specific audience.

Stress Emphasis given to one or more words in a sentence.

Stress interview A job interview that deliberately puts the applicant under stress, whether physical or psychological. Here it’s important to change the conditions that create physical stress and to meet psychological stress by rephrasing questions in less inflammatory terms and treating them as requests for information.

Structured interview An interview that follows a detailed list of questions prepared in advance.

Subject line The title of the document, used to file and retrieve the document. A subject line tells readers why they need to read the document and provides a framework in which to set what you’re about to say.

Subjects The people studied in an experiment, focus group, or survey.

Subordinate or dependent clause A group of words containing a subject and a verb but that cannot stand by itself as a complete sentence.

Summarizing Restating and relating major points, pulling ideas together.

Summary sentence or paragraph A sentence or paragraph listing in order the topics that following sentences or paragraphs will discuss.

Survey A method of getting information from a large group of people.

T

T-letter A job application letter that uses some features from a résumé, such as a bulleted list of skills and experiences.

Table Numbers or words arrayed in rows and columns.

Talking heads Headings that are detailed enough to provide an overview of the material in the sections they introduce.

Teleconferencing Telephone conference calls among three or more people in different locations and video-conferences where one-way or two-way video supplements the audio channel.

Telephone tag Making and returning telephone calls repeatedly before the two people are on the line at the same time.

10-K report A report filed with the Securities and Exchange Commission summarizing the firm's financial performance; an informative document.

Thank-you letter A letter thanking someone for helping you.

Threat A statement, explicit or implied, that someone will be punished if he or she does something.

Tone The implied attitude of the author toward the reader and the subject.

Tone of voice The rising or falling inflection that indicates whether a group of words is a question or a statement, whether the speaker is uncertain or confident, whether a statement is sincere or sarcastic.

Topic outline An outline listing the main points and the sub-points under each main point. A topic outline is the basis for the table of contents of a report.

Topic sentence A sentence that introduces or summarizes the main idea in a paragraph. A topic sentence may be either stated or implied, and it may come anywhere in the paragraph.

Transitions Words, phrases, or sentences that show the connections between ideas.

Transmit To send a message.

Transmittal A memo or letter explaining why something is being sent.

Truncated code Symbols such as asterisks that turn up other forms of a keyword in a computer search.

Truncated scales Graphs with part of the scale missing.

Tweet A message sent through Twitter.

U

Umbrella sentence or paragraph A sentence or paragraph listing in order the topics that following sentences or paragraphs will discuss.

Understatement Downplaying or minimizing the size or features of something.

Unity Using only one idea or topic in a paragraph or other piece of writing.

Unjustified margins Margins that do not end evenly on the right side of the page.

Unstructured interview An interview based on three or four main questions prepared in advance and other questions that build on what the interviewee says.

V

Verbal communication Communication that uses words; may be either oral or written.

Vested interest The emotional stake readers have in something if they benefit from keeping things just as they are.

Visual impact The visual "first impression" you get when you look at a page.

Volume The loudness or softness of a voice or other sound.

W

Watchdog audience An audience that has political, social, or economic power and that may base future actions on its evaluation of your message.

White space The empty space on the page. White space emphasizes material that it separates from the rest of the text.

Withdrawing Being silent in meetings, not contributing, not helping with the work, not attending meetings.

Wordiness Taking more words than necessary to express an idea.

Works cited The sources specifically referred to in a report.

Writing The act of putting words on paper or on a screen, or of dictating words to a machine or a secretary.

Y

You-attitude A style of writing that looks at things from the reader's point of view, emphasizes what the reader wants to know, respects the reader's intelligence, and protects the reader's ego. Using *you* probably increases you-attitude in positive situations. In negative situations or conflict, avoid *you* because that word will attack the reader.

Polishing Your Prose Answers

Module 1

1. The design team is making the most of a difficult situation.
3. Mia, who recently graduated from business school, has joined our department.
5. Downloading a patch for that software glitch should fix the problem.
7. The vice president of our Chicago office, Ajay Sajda, visited the Atlanta office in May.
9. Josie tweeted an invitation for the reception at the Four Seasons Hotel.

Module 2

1. Dress appropriately for your job interview. Wear your best suit.
3. Because of storms, Ethan's flight was delayed, so he arrived in Tulsa 30 minutes after the ceremony started but was able to give his speech.
5. We've narrowed down our hiring choices to Michael, Isabella, and Dylan. We should schedule another round of interviews to make our final decision.
7. Liudmila and Carlos developed the reorganization plan for Gemma Infotech, and in a display of interdepartmental cooperation, Linda, Mehran, and Alex helped to revise it.
9. Dr. Faulkner, head of the Savannah research project, asked us to send the report directly to the CDC; we should hear confirmation of the findings by April 20.

Module 3

1. *Tighten our belts* means to economize.
3. *Get off the ground* means to launch a new project.
5. *Carry the day* means to convince people to support you or your ideas.
7. *Crunch the numbers* means to calculate or tabulate figures.
9. *Pick over the bones* means to thoroughly review or consume something.

Module 4

1. Their report notes four markets where increased profits are possible.
3. I'll check with the managers to find out if their employees feel happy with their compensation.
5. Three investors asked if we might consider selling our products online.
7. Mike tweeted a message about the sales kickoff planned for the fifteenth of August.
9. Our fax machine hardly gets used any more, but it's still an important piece of office equipment.

Module 5

1. Passive voice is acceptable to show good you-attitude.
3. Unless there is a compelling reason to know who posted the rules, passive voice is acceptable.
5. Revise: *Please keep* all personal items locked in drawers to discourage theft.

7. Revise: *The IT Department purchased* a second set of tablet PCs.
9. Revise: *We created* apps for our customers to access their accounts with a smartphone.

Module 6

1. *It's* a good idea to keep paper copies of documents, as electronic files can be lost or corrupted.
3. Though the app has been thoroughly tested, *it's* a good idea to test it one more time, just to be certain.
5. Each department should make sure *its* personnel files are kept confidential.
7. Patel and Associates is dedicated to making sure *its* clients receive the best service possible.
9. While *it's* impossible to be prepared for all emergencies, *it's* prudent to have a general disaster plan.

Module 7

1. While we can debate *its* methodology, the *report's* conclusion is clear: We should expand into South America.
3. Too many *departments'* employees are dressing casually on days other than Friday.
5. This *company's* first order of business is to serve the customer as best as it can.
7. Carefully review each *smartphone's* capabilities before committing to purchase one for business use.
9. Either form is acceptable.

Module 8

1. Dean told us that his *customers* expect excellent service—even if that means going above and beyond, such as working past quitting time.
3. The *printer's* toner cartridge is jammed, so someone will need to take a look at it.
5. Cassandra emerged from the meeting with a big smile and said, “The *ayes* have it!”
7. Because our pool *cars* are expensive to maintain, we're thinking of using *rentals* instead next year.
9. When reviewing her *team's* progress, Martina found that many *efforts* in 2012 paid off.

Module 9

1. My tablet PC's apps *are* truly exceptional.
3. We *make* more profit in one week in Asia than in a whole month in the U.S.
5. Either Ashley or Phillip *needs* to submit an expense report for the team.
7. Even though Jill, Marianne, Theodore, and Svetlana *have* traveled extensively, they *are* still good candidates for intercultural communication training.
9. There *are* many good reasons to start saving early for retirement. The most obvious *is* time *is* on your side.

Module 10

1. Traveling overseas on business, I saw that the sights were absolutely incredible.
3. Ringing over and over, the phone was finally answered by me.
5. Imagining the worst, I really worried about traveling this weekend because of the storm.
7. After carefully selecting from all of my investment options, I was pleased to find that my mutual funds yielded a 7% return this past year.
9. Featuring so many great apps, the website made it hard for me to choose which ones to download.

Module 11

1. Tanika sent copies of the memo to Accounting, Public Relations, Marketing, and Purchasing.
3. Jayden e-mailed to let us know that customers in our south, north, and west offices could use more supplies.
5. When Esther came to fix the copier, she pointed out that it needed a new toner cartridge, paper tray, and keyboard.
7. Make sure you order supplies for the strategic planning retreat: pens, paper, giant notepads, markers, Post-it notes, file folders, and two-sided tape.
9. Bailey, Valdez, and Shepherd expect to open sales offices in the following countries:
 - a. Brazil.
 - b. Argentina.
 - c. Mexico.
 - d. El Salvador.

Module 12

1. This voice sounds autocratic.
3. This voice is condescending.
5. This voice is curt.
7. This voice sounds unfocused and unprofessional.
9. This voice sounds stuffy and presumptuous.

Module 13

1. My college lowered its parking sticker costs about \$10 a year.
3. I have to mind my Ps and Qs, I discovered, if I'm going to get ahead in this world.
5. Victor said his greatest achievement was being selected as "Man of the Year" by the Rotary Club.
7. My mother told me that when she was a little girl, she learned she can't always believe what she hears.
9. At Singh and Associates, I told my parents, I learned I have to do my best to get noticed.

Module 14

1. We hope we can expand our marketing efforts to Canada in the next few months.
3. Though Gregory said he had an oral agreement with Parker, Sandy reminded him that it should have been in writing.
5. Sue Ellen wondered if the plan to go quickly to the supply store before the meeting would instead make them late.
7. While they had an oral disagreement on the phone yesterday, they stayed professional and patched things up today.
9. Carolyn said she expects that the Purchasing, Public Relations and Building Management Departments will each send its representatives to the meeting.

Module 15

1. Jessica went to college in Texas, but her sister stayed in Indiana and attended a local private university.
3. George said he was going to be late for the meeting, but Charlene said she would be there on time, so let's plan still getting together at 1 p.m.

5. Tucker wants to know if he should stay later tonight, but I haven't heard from Andy yet, and Paulette told me she would call back in a few minutes.
7. The letter traveled to several offices before it got to me. I only just read it, so it may take me a while to consider what it says. You might want to come back in an hour.
9. While St. Augustine was my first choice, I really like Tampa. I found a terrific place to live that is close to the beach, but it is very affordable. I think I'm really going to like it here!

Module 16

1. The best years for our stock were 1995, 2004, 2010, and 2012.
3. We've got enough time to tour three of the region's cities, so choose from Nome, Alaska; Dearborn, Michigan; Gary, Indiana; Chicago, Illinois; or Lexington, Kentucky.
5. I can see that when Juan takes charge in April, we can expect to see profit increases in May, June, July, and August.
7. Because we only have enough money in the budget for one attendee, we'll have to select Eve, Gail, Dominic, or Lynetta to go.
9. Our international division wants the board to tour Kyoto, Japan; Beijing, China; Berne, Switzerland; Mainz, Germany; and Toronto, Canada.

Module 17

1. We're going to reorganize the department. John and Anthony, our former summer intern, will do media relations while Talia and Deb will join our web development team. Russ, Alexi, and Caroline will stay in market research. Seydina will move to long-range planning.
3. Last week, I got a new cell phone. It has Internet and Bluetooth capability, and I can even store video and TV shows on it and recharge it wirelessly. Being the latest technology, the phone also has a 2 MPX camera, a full-color screen, and a projector. Of course, I can text with it, too, and it works as a phone. I replaced my older phone, which worked but did not have a projector or Wi-Fi connectivity. Though that phone was only two years old, I went online and bought the new one. I'd be lost without my cell phone!
5. I began my career working in packaging for Van Eyck Industries. During my two years with Van Eyck, I spent most of my time on the assembly line, operating hydraulic and boxing equipment. Then I took a junior position in logistics with Evergreen Plastics. I worked there for four years. At Evergreen Plastics, I started as an assembly line supervisor but was offered a position with logistics within a year. I then helped to plan and coordinate the delivery of recyclables to make product, as well as the delivery of finished product to more than 100 stores and other businesses throughout the state.

Module 18

1. I'm confused by elements of this report.
3. This document could be improved with greater clarity.
5. This is a good effort but could still use improvement.
7. You might benefit from further training in writing and editing.
9. Let's fix the spelling and grammar errors in this memo.

Module 19

1. Mark told us he expects the shipment—which was delayed because of the hurricane—to arrive on Wednesday.
3. The year-long project required Curtis, Shanna, and Alexander to travel throughout Asia and South America.
5. While the electrical supply order was correct, we also needed two-foot and three-foot lengths of cord.
7. Though we are doing a good job of marketing to our European-American customers, our Asian- and African-American customers could be served better.
9. There were seven or eight consultants at the IT meeting—certainly a lot more than anyone expected when we scheduled the meeting last April.

Module 20

1. The meeting with Cochran, Weiss, and Landon went very well, and what we must do now is **complete** our bid specs.
3. The first thing I noticed about Nanda is that she is skilled at **negotiation**.
5. Franz let us know that he is willing to give us **choices** for which program to use.
7. I'm pleased that Dalton **listed** the executives who will be attending the meeting in Olathe, but I'm concerned that he may have **ranked** them inappropriately.
9. Before anyone **erases** old files, Gary told us, they should **have** a good reason to not **keep** them.

Module 21

1. Cason **took** the Graduate Record Examination at Sinclair Community College this past Wednesday.
3. Prior to working with Locke, Crane, and Bischoff, Natalie **worked** for Microsoft in Redmond, Washington.
5. Doubtless, Jeannie **said** at the meeting last week, our customers expect the best in service.
7. Riana Tilden **will be** vice president of OCSEA in 2015, at which time Denny Chang will become president.
9. Once I pass my last three classes at Michigan State University, I **will receive** my Masters in Public Administration.

Module 22

1. Wight, Jonathan B. Personal interview. 04 July 2004.
3. O'Rourke, P. J. *The CEO of the Sofa*. New York: Atlantic Monthly P, 2001. Print.
5. United States. Environmental Protection Agency. "An Office Building Occupant's Guide to Indoor Air Quality." Environmental Protection Agency, n.d. Web. 1 Aug. 2009.
Visiting the site provides more information, including that the guide was published in October 1997 by the U.S. Environmental Protection Agency. Though the web page uses quotation marks for the title, MLA treats guides and pamphlets with no authors as a book. Therefore, an acceptable entry could be:
United States. Environmental Protection Agency. An Office Building Occupant's Guide to Indoor Air Quality. Oct. 1997. Web. 1 Aug. 2009.
7. Locker, Kitty O., and Stephen Kyo Kaczmarek. *Business Communication: Building Critical Skills*. 5th ed. Boston: McGraw-Hill/Irwin, 2011. Print.
9. *Husker Fever Card*. U of Nebraska, 2004. Web. 20 June 2012.

Module 23

1. It is in the best interest of our business, Sam Chen said, to make our company's buildings at least three stories.
3. Take this release to Andrea, please, and ask her to sign it. Bring it back to me by 5 p.m.
5. Heather Ansel said that she is coming to the annual dinner celebration on March 19.
7. At 11:34 a.m., Margaret Kim e-mailed that we had been awarded a contract with Tanner, Dempsey, and Mihalek.
9. I have been attending business classes at the community college near my office.

Module 24

Barbara Gillespie-Kim joins our Web Development Department after more than 10 years working with Lerner and Thorpe Associates in San Jose, California, a technology consulting firm specializing in helping companies use the Internet. She started as a technical writer and later led several project teams, including those specializing in Web development, market research, and customer relations. Barbara worked closely with clients throughout the west coast, as far away as Seoul, South Korea; Jakarta, Indonesia; and Osaka, Japan. She received her B.A. in English from San Jose State

University, graduating summa cum laude, and her M.A. in Interdisciplinary Studies from California State University, Los Angeles, graduating with a perfect GPA. She specialized in technical writing in her bachelor's program at California State and in a combined program of multimedia design, Web page development, and graphic design at San Jose State. Barbara speaks Korean fluently and, in her words, "just enough Japanese and Indonesian to embarrass myself!" Please welcome her aboard.

Module 25

1. Improving Customer Relations
3. Will you be in your office at 3 p.m.?
5. You're Invited to Lily's Party
7. Marketing, Public Relations, and Shipping and Receiving
9. Goals for 2014
 - Expanding into China.
 - Expanding into Mexico.
 - Expanding into Brazil.

Module 26

1. We like Ann because of her winning personality and generous nature.
3. Excellent communication skills, a desire to help the Bozeman Company reach its goals, and a proven track record in sales makes me a great candidate for the job.
5. Our Electricity Miser comes with a three-year limited warranty, a guarantee to save you at least 25% on your monthly utility bill, and more standard features than any similar product on the market.
7. Bailey said she expects us to be at the exit within the next 10 minutes.
9. Munahil told us she is excited about the sales and marketing job opportunities with the Oliver Kane Company.

Module 27

Multiple answers are possible (e.g., abbreviations versus using the complete terms; appropriate format changes; updating "2007" to "2012" or later).

1. August 20, 2007

W.W. Lyndhurst, Inc.
10002 Avenue of the Americas
New York, NY 21211

Mr. Frank Sugarman
1201 North 5th Street
Detroit, MI 48201

Dear Mr. Sugarman:

Thank you for your recent inquiry regarding your order of July 17, 2007. As you know, we at W.W. Lyndhurst, Inc., value your satisfaction. Rest assured that a replacement part is on its way.

Should you require anything else, please call me at 1-800-555-1209.

Once again, thank you.

Sincerely,

Kevin Corcoran

Module 28

1. Your enthusiasm might be a better match than mine for writing this report. (A statement like this can also be omitted.)
3. Collette said that you and I need to make sure our travel requests are in by August 1.

5. My boss, Guy Richards, doesn't like it if I call him by his first name.
7. The error on the report almost cost us the account.
9. When Cooper and I give the presentation at Bockner and Basche, we'll be giving it our all.

Module 29

1. A *bond* can be a cord or rope, a financial product, an agreement or relationship, or the act of joining things together.
3. *Tweet* can be the sound a bird makes or a brief message using Twitter.
5. *Smart* can mean clever or intelligent, to feel a stinging pain, or a type of device, usually a phone, featuring advanced technology.
7. A *market* is a place or arena to sell goods or services as well as the act of buying or selling. In slang terms, it also is shorthand for the stock market.

9. People generally think of a *raise* as an increase in pay, but it can also mean to build or lift. In games like poker, it is the act of increasing a bet.

Module 30

1. With *whom* are you attending the annual meeting?
3. Zach and *I* expected Jordyn to bring only the digital camera, but she brought a laptop, too.
5. Loren Adelson let Kenji and *me* know that the marketing brochures arrived from Caspar Printing this morning.
7. No one was sure for *whom* the packages were intended, so Ron, Christina, and *I* took them back to the mail room.
9. We thought we knew *who* made the call, but it turns out Rachel and *I* wrote down two different names.

Endnotes

Module 7

1. Charles Burck, "Learning from a Master," *Fortune*, December 27, 1993, 144; Kathy Casto, "Assumptions about Audience in Negative Messages," Association for Business Communication Midwest Conference, Kansas City, MO, April 30–May 2, 1987; and John P. Wanous and A. Colella, "Future Directions in Organizational Entry Research," *Research in Personnel/Human Resource Management*, ed. Kenneth Rowland and G. Ferris (Greenwich, CT: JAI Press, 1990).
2. Annette N. Shelby and N. Lamar Reinsch, Jr. "Positive Emphasis and You-Attitude: An Empirical Study," *Journal of Business Communication* 32, no. 4 (October 1995): 303–327.
3. Alan Farnham, "Are You Smart Enough to Keep Your Job?" *Fortune*, January 15, 1996, 42.
4. Mark A. Sherman, "Adjectival Negation and the Comprehension of Multiple Negated Sentences," *Journal of Verbal Learning and Verbal Behavior* 15 (1976): 143–57.
5. Margaret Baker Graham and Carol David, "Power and Politeness: Administrative Writing in an 'Organized Anarchy,'" *Journal of Business and Technical Communication* 10.1 (January 1996): 5–27.
6. John Hagge and Charles Kostelnick, "Linguistic Politeness in Professional Prose: A Discourse Analysis of Auditors' Suggestion Letters, with Implications for Business Communication Pedagogy," *Written Communication* 6, no. 3 (July 1989): 312–39.
7. Suzanne Hoholik, "Medical Apologies: Doctors Advised to Say 'Sorry,'" *The Columbus Dispatch*, April 23, 2007, downloaded at www.dispatch.com/dispatch/content/local_news/stories/2007/04/23/imsorry.ART_ART_04-23-07_A1_IH6FE4V.html.

Module 8

1. See Tove Helland Hammer and H. Peter Dachler, "A Test of Some Assumptions Underlying the Path-Goal Model of Supervision: Some Suggested Conceptual Modifications," *Organizational Behavior and Human Performance* 14 (1975): 73.
2. Edward E. Lawler, III, *Motivation in Work Organizations* (Monterey, CA: Brooks/Cole, 1973), 59. Lawler also notes a third obstacle: People may settle for performance and rewards that are just OK. Offering reader benefits, however, does nothing to affect this obstacle.
3. Abraham H. Maslow, *Motivation and Personality* (New York: Harper & Row, 1954).
4. Diane Cadrain, "Cash vs. Non-cash Rewards," *HRMagazine*, April 2003, downloaded from Infotrac at <http://web5.infotrac.galegroup.com>; and Jennifer Gilbert, "Motivating Through the Ages," *Sales & Marketing Management*, November 2003; downloaded from Infotrac at <http://web5.infotrac.galegroup.com>.
5. Rachel Emma Silverman, "Just Married, with Children: The Family-moon," *The Wall Street Journal*, May 21, 2003, D1, D4.
6. John J. Weger reports Herzberg's research in *Motivating Supervisors* (New York: American Management Association, 1971), 53–54.
7. Diane L. Coutu, "Human Resources: The Wages of Stress," *Harvard Business Review*, November–December 1998, 21–24; and Charles Fishman, "Sanity, Inc.," *Fast Company*, January 1999, 85–99.

8. Susan Greco, "Hire the Best," *Inc.*, June 1999, 32–52.
9. Kevin Leo, "Effective Copy and Graphics," DADM/DMEF Direct Marketing Institute for Professors, Northbrook, IL, May 31–June 3, 1983.

Module 10

1. Thomas L. Fernandez and Roger N. Conaway, "Writing Business Letters II: Essential Elements Revisited," *1999 Refereed Proceedings*, Association for Business Communication Southwest Region, ed. Marsha L. Bayless, 65–68.
2. In a study of 483 subject lines written by managers and MBA students, Priscilla S. Rogers found that the average subject line was five words; only 10% of the subject lines used 10 or more words ("A Taxonomy for Memorandum Subject Lines," *Journal of Business and Technical Communication* 4, no. 2: [September 1990] 28–29).
3. Allison Overholt, "Power Up the People," *Fast Company*, January 2003, 50.
4. Deborah Tannen, *That's Not What I Meant: How Conversational Style Makes or Breaks Your Relations with Others* (New York: Morrow, 1986), 108.
5. An earlier version of this problem, the sample solutions, and the discussion appeared in Francis W. Weeks and Kitty O. Locker, *Business Writing Cases and Problems*, 1984 ed. (Champaign, IL: Stipes, 1984), 64–68.

Module 11

1. Jack W. Brehm, *A Theory of Psychological Reactance* (New York: Academic Press, 1966).
2. Ilan Mochari, "The Talking Cure," *Inc.*, November 2001, 123.
3. Kitty O. Locker, "Factors in Reader Responses to Negative Letters: Experimental Evidence for Changing What We Teach," *The Journal of Business and Technical Communication* 13, no. 1 (January 1999): 5–48.
4. Frederick M. Jablin and Kathleen Krone, "Characteristics of Rejection Letters and Their Effects on Job Applicants," *Written Communication* 1, no. 4 (October 1984): 387–406.
5. John D. Pettit, "An Analysis of the Effects of Various Message Presentations on Communicatee Responses," Ph.D. dissertation, Louisiana State University, 1969; and Jack D. Eure, "Applicability of American Written Business Communication Principles Across Cultural Boundaries in Mexico," *The Journal of Business Communication* 14 (1976): 51–63.
6. Gabriella Stern, "Companies Discover That Some Firings Backfire into Costly Defamation Suits," *The Wall Street Journal*, May 5, 1993, B1.

Module 12

1. For a discussion of sales and fund-raising letters, see Kitty O. Locker, *Business and Administrative Communication*, 6th ed. (Burr Ridge, IL: Irwin/McGraw-Hill, 2003), 252–82.
2. James Suchan and Ron Dulek, "Toward a Better Understanding of Reader Analysis," *The Journal of Business Communication* 25, no. 2 (Spring 1988): 40.
3. Frances Harrington, "Formalistic Patterns versus Pressures of Circumstances: A Rhetoric of Business Situations," Conference on College Composition and Communication, New Orleans, LA, March 17–19, 1986.
4. Min-Sun Kim and Steven R. Wilson, "A Cross-Cultural Comparison of Implicit Theories of Requesting," *Communication Monographs* 61, no. 3 (September 1994): 210–35.
5. Priscilla S. Rogers, "A Taxonomy for the Composition of Memorandum Subject Lines: Facilitating Writer Choice in Managerial Contexts," *Journal of Business and Technical Communication* 4, no. 2 (September 1990): 21–43.
6. Karen Lowry Miller and David Woodruff, "The Man Who's Selling Japan on Jeeps," *BusinessWeek*, July 19, 1993, 56–57.

7. John D. Hartigan, "Giving Kids Condoms Won't Work," *The Wall Street Journal*, December 19, 1990, A16.
8. J. C. Mathes and Dwight W. Stevenson, *Designing Technical Reports: Writing for Audiences in Organizations* (Indianapolis: Bobbs-Merrill, 1979), 18–19.

9. Daniel J. O'Keefe, *Persuasion* (Newbury Park, CA: Sage, 1990), 168; Joanne Martin and Melanie E. Powers, "Truth or Corporate Propaganda," *Organizational Symbolism*, ed. Louis R. Pondy, Thomas C. Dandridge, Gareth Morgan, and Peter J. Frost (Greenwich, CT: JAI Press 1983), 97–107; and Dean C. Kazoleas, "A Comparison of the Persuasive Effectiveness of Qualitative versus Quantitative Evidence: A Test of Explanatory Hypotheses," *Communication Quarterly* 41, no. 1 (Winter 1993): 40–50.
10. "Phoning Slow Payers Pays Off," *Inc.*, July 1996, 95.
11. An earlier draft of this problem and analysis appeared in Francis W. Weeks and Kitty O. Locker, *Business Writing Problems and Cases* (Champaign, IL: Stipes, 1984), 96–99.

Module 13

1. Sara Kiesler, Jane Siegel, and Timothy W. McGuire, "Social Psychological Aspects of Computer-Mediated Communication," *American Psychologist* 39, no. 10 (October 1984): 1129. People still find it easier to be negative in e-mail than on paper or in person; see John Affleck, "You've Got Bad News," Associated Press, June 19, 1999.
2. Bettina A. Bair, "Teaching Technology," e-mail to Kitty Locker, October 22, 1999.
3. John Morkes and Jakob Nielsen, "Concise, SCANNABLE, and Objective: How to Write for the Web," 1997, downloaded at www.useit.com/alertbox/9710a.html.
4. Stephen Baker and Heather Green, "Blogs Will Change Your Business," *BusinessWeek*, May 2, 2005, downloaded at www.businessweek.com/magazine/content/05_18/b3931001_mz001.htm.
5. Jeff Wuorio, "Blogging for Business: 7 Tips for Getting Started," downloaded at www.microsoft.com/small-business/resources/marketing/online_marketing/blogging_for_business_7_tips_for_getting_started.mspx, October 7, 2005.
6. Ki Mae Heussner, "Woman Loses Benefits After Posting Facebook Pics," *ABC News*, November 23, 2009, <http://abcnews.go.com/Technology/AheadoftheCurve/woman-loses-insurance-benefits-facebook-pics/story?id=9154741&page=1>.
7. Steven Kurutz, "Twitter 101: DePaul University's Social Media Prof Gives His Syllabus," *The Wall Street Journal*, September 1, 2009, <http://blogs.wsj.com/speakeasy/2009/09/01/twitter-101-depaul-universitys-social-media-prof-gives-his-syllabus/>.

Module 15

1. Interoffice memo in a steel company.
2. Caleb Solomon, "Clearing the Air: EPA-Amoco Study of Refinery Finds Pollution Rules Focusing on Wrong Part of It," *The Wall Street Journal*, March 29, 1993, A6.
3. Philip B. Crosby, *Quality Is Free: The Art of Making Quality Certain* (New York: New American Library, 1979), 79–84.
4. *News-Gazette*, Champaign-Urbana, IL, January 16, 1979, C-8.
5. Richard C. Anderson, "Concretization and Sentence Learning," *Journal of Educational Psychology* 66, no. 2 (1974): 179–83.
6. Based on Lynn Ashby, "7, 8, Facilitate," *Houston Post*, February 17, 1978.
7. Lindsay Tanner, "Products with Good Bacteria Get Popular," December 10, 2007, downloaded at http://news.yahoo.com/s/ap/20071210/ap_on_he_me/diet_friendly_bacteria.
8. "Dried Plums Take Flight," *Silicon Valley/San Jose Business Journal*, September 4, 2001, accessed September 20, 2005, at www.bizjournals.com/sanjose/stories/2001/09/03/daily8.html.
9. Gretchen Glasscock, "My Favorite Bookmarks," *Fast Company*, October 1999, 62.

10. Mary Ellen Podmolik, "New Rule Raises Stakes for Minority Shop Owners," *Advertising Age*, February 28, 2000, 34; and Hersch Doby, "Changing the Rules," *Black Enterprise*, April 2000, 23.

Module 16

1. Robert L. Brown, Jr., and Carl G. Herndl, "An Ethnographic Study of Corporate Writing: Job Status as Reflected in Written Text," *Functional Approaches to Writing: A Research Perspective*, ed. Barbara Couture (Norwood, NJ: Ablex, 1986), 16–19, 22–23.
2. Linda Flower, *Problem-Solving Strategies for Writing* (New York: Harcourt Brace Jovanovich, 1981), 39.
3. Harris B. Savin and Ellen Perchonock, "Grammatical Structure and the Immediate Recall of English Sentences," *Journal of Verbal Learning and Verbal Behavior* 4 (1965): 348–53; Pamela Layton and Adrian J. Simpson, "Deep Structure in Sentence Comprehension," *Journal of Verbal Learning and Verbal Behavior* 14 (1975): 658–64.
4. Arn Tibbetts, "Ten Rules for Writing Readably," *The Journal of Business Communication* 18, no. 4 (Fall 1981): 55–59.
5. Thomas N. Huckin, "A Cognitive Approach to Readability," *New Essays in Technical and Scientific Communication: Research, Theory, Practice*, ed. Paul V. Anderson, R. John Brockmann, and Carolyn R. Miller (Farmingdale, NY: Baywood, 1983), 93–98.
6. James Suchan and Ronald Dulek, "A Reassessment of Clarity in Written Managerial Communications," *Management Communication Quarterly* 4, no. 1 (August 1990): 93–97.

Module 17

1. For a full account of the accident, see Andrew D. Wolvin and Caroline Gwynn Coakely, *Listening*, 2nd ed. (Dubuque, IA: William C. Brown, 1985), 6.
2. "Listen Up and Sell," *Selling Power*, July/August 1999, 34.
3. Thomas Gordon with Judith Gordon Sands, *P.E.T. in Action* (New York: Wyden, 1976), 83.
4. Molefi Asante and Alice Davis, "Black and White Communication: Analyzing Work Place Encounters," *Journal of Black Studies* 16, no. 1 (September 1985): 87–90.

Module 18

1. For a fuller listing of roles in groups, see David W. Johnson and Frank P. Johnson, *Joining Together: Group Theory and Group Skills* (Englewood Cliffs, NJ: Prentice Hall, 1975), 26–27.
2. Beatrice Schultz, "Argumentativeness: Its Effect in Group Decision-Making and Its Role in Leadership Perception," *Communication Quarterly* 30, no. 4 (Fall 1982): 374–75; Dennis S. Gouran and B. Aubrey Fisher, "The Functions of Human Communication in the Formation, Maintenance, and Performance of Small Groups," in *Handbook of Rhetorical and Communication Theory*, ed. Carroll C. Arnold and John Waite Bowers (Boston: Allyn and Bacon, 1984), 640; and Curt Bechler and Scott D. Johnson, "Leadership and Listening: A Study of Member Perceptions," *Small Group Research* 26, no. 1 (February 1995): 77–85.
3. John E. Tropman, *Making Meetings Work*, 2nd ed. (Thousand Oaks, CA: Sage, 2003), 78, 121.
4. Nance L. Harper and Lawrence R. Askling, "Group Communication and Quality of Task Solution in a Media Production Organization," *Communication Monographs* 47, no. 2 (June 1980): 77–100.
5. Rebecca E. Burnett, "Conflict in Collaborative Decision-Making," in *Professional Communication: The Social Perspective*, ed. Nancy Roundy Blyler and Charlotte Thralls (Newbury Park, CA: Sage, 1993), 144–62.
6. Kimberly A. Freeman, "Attitudes Toward Work in Project Groups as Predictors of Academic Performance," *Small Group Research* 27, no. 2 (May 1996): 265–82.
7. Tropman, *Making Meetings Work*, 28.

8. Nancy Schullery and Beth Hoger, "Business Advocacy for Students in Small Groups," Association for Business Communication Annual Convention, San Antonio, TX, November 9–11, 1998.
9. Jeffrey A. Fadiman, "Intercultural Invisibility: Deciphering the 'Subliminal' Marketing Message in Afro-Asian Commerce," Sixth Annual Conference on Languages and Communication for World Business and the Professions, Ann Arbor, MI, May 8–9, 1987.
10. Raymond L. Gordon, *Living in Latin America* (Skokie, IL: National Textbook, 1974), 41.
11. Stephen P. Robbins, *Decide and Conquer: Make Winning Decisions and Take Control of Your Life* (Upper Saddle River, NJ: Financial Times Prentice Hall, 2004), 101–5.
12. Philip R. Harris and Robert T. Moran, *Managing Cultural Differences*, 2nd ed. (Houston: Gulf, 1987), 78.
13. Lisa Ede and Andrea Lunsford, *Singular Texts/Plural Authors: Perspectives on Collaborative Writing* (Carbondale, IL: Southern Illinois Press, 1990), 60.
14. Rebecca Burnett, "Characterizing Conflict in Collaborative Relationships: The Nature of Decision-Making During Coauthoring," Ph.D. dissertation, Carnegie-Mellon University, Pittsburgh, PA, 1991.
15. Kitty O. Locker, "What Makes a Collaborative Writing Team Successful? A Case Study of Lawyers and Social Service Workers in a State Agency," in *New Visions in Collaborative Writing*, ed. Janis Forman (Portsmouth, NJ: Boynton, 1991), 37–52.
16. Ede and Lunsford, 66.
17. Meg Morgan, Nancy Allen, Teresa Moore, Dianne Atkinson, and Craig Snow, "Collaborative Writing in the Classroom," *The Bulletin of the Association for Business Communication* 50.3 (September 1987): 22.

Module 19

1. How to Avoid Wasteful Work Meetings," *Wired*, June 2012, <http://www.wired.co.uk/magazine/archive/2012/06/howto/avoid-wasteful-work-meetings>.
2. Cathy Olofson, "So Many Meetings, So Little Time," *Fast Company*, January/February 2000, 48; and Fara Warner, "How Google Searches Itself," *Fast Company*, July 2002, 50.
3. Andrea Williams, "The Rhetoric of Corporate Communications: A Case Study of a Canadian Employee Communications Program in a Global Financial Services Organization," Ph.D. dissertation, The Ohio State University, 2002, Chapter 5.
4. Michael Schrage, "Meetings Don't Have to Be Dull," *The Wall Street Journal*, April 29, 1996, A12.
5. Eric Matson, "The Seven Deadly Sins of Meetings," *Fast Company Handbook of the Business Revolution*, 1997, 29.
6. Matson, 30.
7. "There's Something about Mary," *Fortune*, October 25, 1999, 368.
8. H. Lloyd Goodall, Jr., *Small Group Communications in Organizations* (Dubuque, IA: William C. Brown, 1990), 39–40.
9. Roger K. Mosvick and Robert B. Nelson, *We've Got to Start Meeting Like This: A Guide to Successful Meeting Management*, rev. ed. (Indianapolis, IN: Park Avenue, 1996), 2nd ed., 177.
10. Marc Ballon, "The New Girls' Club," *Inc.*, March 1999, 88.
11. Cynthia Crossen, "Spotting Value Takes Smarts, Not Sight, Laura Sloate Shows," *The Wall Street Journal*, December 10, 1987, A1, A14; and Joan E. Rigdon, "Managing Your Career," *The Wall Street Journal*, December 1, 1993, B1.
12. Gina Imperator, "You Have to Start Meeting Like This," *Fast Company*, April 1999, 204–10.

Module 20

1. Carol Hymowitz, "Unlike Politicians, Business Executives Seek Profit, Not Votes," *The Wall Street Journal*, August 17, 2004, downloaded at <http://online.wsj.com>.
2. Dan Gillmor, "Putting on a Powerful Presentation," *Hemispheres*, March 1996, 31.

3. Carol Hymowitz, "When You Tell the Boss, Plain Talk Counts," *The Wall Street Journal*, June 16, 1989, B1.
4. Linda Driskill, "How the Language of Presentations Can Encourage or Discourage Audience Participation," paper presented at the Conference on College Composition and Communication, Cincinnati, OH, March 18–21, 1992.
5. Tad Simons, "Multimedia or Bust?" *Presentations*, February 2000, 44, 49–50.
6. Julie Terberg, "Before and After: Presentation Visuals Should Complement a Company's Printed Materials," *Presentations*, January 2003, downloaded from Infotrac at <http://web4.infotrac.galegroup.com>.
7. Stephen E. Lucas, *The Art of Public Speaking*, 2nd ed. (New York: Random House, 1986), 248.
8. John Case, "A Company of Businesspeople," *Inc.*, April 1993, 90.
9. Edward J. Hegarty, *Humor and Eloquence in Public Speaking* (West Nyack, NY: Parker, 1976), 204.
10. G. Michael Campbell, *Bulletproof Presentations* (Franklin Lakes, NJ: Career Press, 2003), 66–67.
11. Robert S. Mills, conversation with Kitty O. Locker, March 10, 1988.
12. Phil Theibert, "Speechwriters of the World, Get Lost!" *The Wall Street Journal*, August 2, 1993, A10.
13. Patricia Fripp, "Want Your Audiences to Remember What You Say? Learn the Importance of Clear Structure," Fripp Articles, www.fripp.com, downloaded September 1, 2004.
14. Some studies have shown that previews and reviews increase comprehension; other studies have found no effect. For a summary of the research see Kenneth D. Frandsen and Donald R. Clement, "The Functions of Human Communication in Informing: Communicating and Processing Information," *Handbook of Rhetorical and Communication Theory*, ed. Carroll C. Arnold and John Waite Bowers (Boston: Allyn and Bacon, 1984), 340–41.
15. S. A. Beebe, "Eye Contact: A Nonverbal Determinant of Speaker Credibility," *Speech Teacher* 23 (1974): 21–25; cited in Marjorie Fink Vargas, *Louder than Words* (Ames, IA: Iowa State University Press, 1986), 61–62.
16. J. Wills, "An Empirical Study of the Behavioral Characteristics of Sincere and Insincere Speaker," Ph.D. dissertation, University of Southern California, 1961; cited in Marjorie Fink Vargas, *Louder than Words* (Ames, IA: Iowa State University Press, 1986), 62.

Module 21

1. For a useful taxonomy of proposals, see Richard C. Freed and David D. Roberts, "The Nature, Classification, and Generic Structure of Proposals," *Journal of Technical Writing and Communication* 19, no. 4 (1989): 317–51.
2. Donna Kienzler, e-mail to Kitty Locker, November 5, 1998.
3. Christine Peterson Barabas, *Technical Writing in a Corporate Culture: A Study of the Nature of Information* (Norwood, NJ: Ablex Publishing, 1990), 327.

Module 22

1. Janice M. Lauer and J. William Asher, *Composition Research: Empirical Designs* (New York: Oxford University Press, 1986), 66.
2. Frederick F. Reichheld, "Learning from Customer Defects," *Harvard Business Review*, March–April 1996, 56–69.
3. Marketing Research Association, "CMOR Tracking System: Cooperation, Refusal, and Response Rates," Respondent Cooperation section of Research Resources page, MRA website, www.mra-net.org, downloaded August 18, 2004.
4. Tracie Rozhon, "Networks Criticize Report on Male Viewers," *The New York Times*, November 26, 2003, downloaded from Business & Company Resource Center, <http://galenet.galegroup.com>; and "Nielsen Explains Male TV Ratings," *Adweek*, December 1, 2003, downloaded from Business & Company Resource Center, <http://galenet.galegroup.com>.

5. "Whirlpool: How to Listen to Consumers," *Fortune*, January 11, 1993, 77.
6. Peter Lynch with John Rothchild, *One Up on Wall Street: How to Use What You Already Know to Make Money in the Market* (New York: Simon and Schuster, 1989), 187.
7. Patricia Sullivan, "Reporting Negative Research Results," and Kitty O. Locker to Pat Sullivan, June 8, 1990.

Module 23

1. Michael L. Keene to Kitty Locker, May 17, 1988.
2. Susan D. Kleimann, "The Need to Test Forms in the Real World," Association for Business Communication Annual Convention, Orlando, FL, November 1–4, 1995.

Module 25

1. Gene Zelazny, *Say It with Charts: The Executive's Guide to Successful Presentations*, 4th ed. (New York: McGraw-Hill, 2001), 52.
2. Most of these guidelines are given by Zelazny, *Say It With Charts: The Executive's Guide to Successful Presentations*.
3. W. S. Cleveland and R. McGill, "Graphical Perception: Theory, Experiments, and Application to the Development of Graphic Methods," *Journal of the American Statistical Association* 79, no. 3 & 7 (1984): 531–53; cited in Jeffry K. Cochran, Sheri A. Albrecht, and Yvonne A. Greene, "Guidelines for Evaluating Graphical Designs: A Framework Based on Human Perception Skills," *Technical Communication* 36, no. 1 (February 1989): 27.
4. L. G. Thorell and W. J. Smith, *Using Computer Color Effectively: An Illustrated Reference* (Englewood Cliffs, NJ: Prentice Hall, 1990), 12–13; William Horton, "The Almost Universal Language: Graphics for International Documents," *Technical Communication* 40, no. 4 (1993): 687; and Thyra Rauch, "IBM Visual Interface Design," *The STC Usability PIC Newsletter*, January 1996, 3.
5. Thorell and Smith, p. 13.
6. Ibid., pp. 49–51, 214–15.
7. Edward R. Tufte, *The Visual Display of Quantitative Information* (Cheshire, CT: Graphics Press, 1983), 113.
8. Thophilus Addo, "The Effects of Dimensionality in Computer Graphics," *Journal of Business Communication* 31, no. 4 (October 1994): 253–65.
9. Jerry Bowyer, "In Defense of the Unemployment Rate," National Review Online, March 5, 2004, www.nationalreview.com; Mark Gongloff, "Payment Growth Disappoints," *CNN Money*, December 5, 2003, <http://money.cnn.com>; and Joint Economic Committee, "Charts: Economy," downloaded at <http://jec.senate.gov>, August 27, 2004.
10. Day Mines 1974 Annual Report, 1; reproduced in Tufte, 54.

Module 26

1. Richard Bolles, "Here's How to Pack Your Parachute," *Fast Company*, September 1999, 242.
2. Walter Kiechel III, "Preparing for Your Outplacement," *Fortune*, November 30, 1992, 153.
3. Carl Quintanilla, "Coming Back," *The Wall Street Journal*, February 22, 1996, R10; Megan Malugani, "How to Re-Enter the Health-Care Job Market," *The Columbus Dispatch*, March 22, 2000, 13.
4. LeAne Rutherford, "Five Fatal Résumé Mistakes," *BusinessWeek's Guide to Careers* 4, no. 3 (Spring/Summer 1986): 60–62.
5. Phil Elder, "The Trade Secrets of Employment Interviews," Association for Business Communication Midwest Convention, Kansas City, MO, May 2, 1987.
6. Anne Fisher, "Ask Annie," *Fortune*, February 7, 2000, 210.

Module 27

1. Timothy D. Schellhardt, "Managing: Pitfalls to Avoid in Drafting a Resume," *The Wall Street Journal*, November 28, 1990, B1; Elizabeth Brockman and Kelly Belanger, "A National Study of CPA Recruiters'

- Preferences for Résumé Length,” *The Journal of Business Communication*, 38 (2001): 29–45.
2. Beverly H. Nelson, William P. Gallé, and Donna W. Luse, “Electronic Job Search and Placement,” Association for Business Communication Convention, Orlando, FL, November 1–4, 1995.
 3. Rebecca Smith, *Electronic Resumes & Online Networking: How to Use the Internet to Do a Better Job Search, Including a Complete, Up-to-Date Resource Guide* (Franklin Lakes, NJ: Career Press, 1999), 191–96.
 4. Taunee Besson, *The Wall Street Journal National Employment Business Weekly: Resumes* (New York: John Wiley and Sons, 1994), 245.
 5. Carolyn Bigda, “Getting Your Resume to the Top of the List,” *The Chicago Tribune*, August 25, 2012, http://articles.chicagotribune.com/2012-08-25/classified/sc-cons-0823-started-20120825_1_job-search-project-manager-key-words.
 6. Anick Jesdanun, “Twist on Résumés: Some Job Seekers Hit ‘Record’ Button. Some Employers Leery of Video Applications,” *The Columbus Dispatch*, May 6, 2007, downloaded at www.dispatch.com/dispatch/content/business/stories/2007/05/06/biz_of_life_jobs_video.ART_ART_05-06-07_D3_F06ISRN.html.
 6. Richard C. Rose and Echo Montgomery Garrett, “Guerrilla Interviewing,” *Inc.*, December, 1992, 145–47.

Module 24	Improving Paragraphs	414
Module 25	Writing Subject Lines and Headings	435
Module 26	Using Details	448
Module 27	Proofreading	472
Module 28	Using You and I	489
Module 29	Using a Dictionary	506
Module 30	Who/Whom and I/Me	513

WHY 30 MODULAR CHAPTERS?

FREEDOM

• **FLEXIBILITY**

• **FOCUSED CLASSROOM**

We listened to the increasing demand for more flexibility with teaching materials. This modular format was created to cater to the way in which instructors teach, and students learn.

Through the author's modular approach, instructors have the freedom to customize their text and assignments piece-by-piece. By breaking chapters into more manageable, topic-focused sections, instructors have the flexibility to cover and assign the content they want, in the order they want to better suit their individual teaching styles.

Instead of losing students in chapters that are long, unspecific, or out of order, with this book students move toward an understanding of the foundations and piece together the critical skills needed to become successful communicators in the Business Communication field.
